His companion Aguila peopled Campeche, Merida, Villa Doca, Salamanca, and Seville, where he lived quietly and peaceably with the Indians, who in this place worshipped the cross, and had temples and altars; which made the Spaniards conceit, that some of the Goths fled thither when the Moors subdued Spain.

Hondura's.

Columbus discovered all this coast, thinking to find a paffage into the South Sea. Francis de las Casas founded Trunillo in the year 1525. by order of Cortes. Here the Spaniards imprison'd and killed one another.

The people are ill natured; but very obedient to their mafters. The first bishop's name was Pedraca: the first governor was James Lopez de Salzedo, killed by his own people. Next to him was Vasco de Herrera, who was killed in the fame manner, as were other governors.

Nombre de Dios.

The country about it was called Veragua, discovered by Columbus, Anno 1502. James de Nicuessa, who went with Columbus in his fecond voyage, obtained the government of it, and fitted out in Spain nine veffels, with feven hundred and eighty men, in 1588. He coasted along to Carthagena, where he found the company of Alonso de Ho-Was discovered by Columbus, and call'd jeda, his great friend, in distress, the Indians Fernandina, fron king Ferdinand: Nicholas having killed seventy of his men; which Book

they revenged, entring their houses by night, and killing and taking them all prisoners.

After this, Nieuessa passed from Hojeda with two carvels, appointing the rest to follow him. Lapez de Olano, who had the command of a vessel, missed of him, and went to seek him in the river of Chagre: there they went ashore and sunk their vessels, intending to make it their residence, and chose Olano for their general, till the coming of Nieuessa. Three of Nieuessa's men came to them in a boat, telling them where he was, and that he had loft his two carvels, and endured great hunger for three months.

Olano hereupon fent one of his boats to fetch him out of that mifery; but when he came to them, he bafely imprifoned Olano, accusing him of uturping command, and destroying the ships.

He would not flay here, though they were within three months of reaping their corn; for fear Olano should have the honour of the undertaking.

Out of the other bark they made a carvel, and went to Porto Bello, so called by Columbus, because of its goodness. Here the Indians sew twenty of his men. He left half his company, and went away to Cape Marmol, where he built a fort, calling it Nombre de Dios. Of seven hundred and eighty men he had not above one hundred left alive. Here grew great contention between Vasco Nunnez de Balboa and Francis Enciso about the command; which was the cause they landed not, but returned.

Nicueffa, feeing they were gone, went to Hispaniola to complain, but was drowned by the way, but first he went ashore by the way, and writ on barks of trees, which were afterwards found, This vary passed the unsortunate James de Nicuessa. He was the first that discovered Darien; where he was reduced to such extremity, that his men were forced to eat dogs, toads, and one another. After this Philip Godofre defired the government of Beragua, but with no better success, by reason of famine: this was in the year 1536.

The admiral Levois Columbus sent Chrislopher Penna to people there, who suffered much by famine. By agreement betwirt the king and Columbus, he was created duke of Veraguas and marquis of Jamaica, Anno

Darien.

Hojeda, Nicuessa, and Bastida, as you have heard, were the discoverers of this country; and after many calamities, mutinies, famine, and other mistortunes, Hojeda died a frier at St. Domingo, and left Francis Pizarro his lieutenant.

In 1502. Bastido fitted two vessels at Cadiz. He had been with Columbus in all his voyages; but lost his ships at St. Domingo by the worm that ear them. He was impritioned by Boxadilla, for trading with the Indians without leave; but the king gave him two hundred ducats a year in lieu of Darien. When those Indians tought with the Spaniards, they would put gold at the end of their arrows, thinking they would stoop for it, and they might kill them.

Pizarro feeing the fifty days expired, wherein Hojeda had promifed to return, (who, as was f...d above, was become a frier, being in great want of victuals left that country, and put to fea with two carvels, one of them was caft away in a ftorm, and the other had her rudder ftruck off by a fift; which made them all conclude themselves loft; but by good luck they got to Cartbagena almost ftarved.

In his way he left Encifo, whom Hojeda had left to follow with victuals. Pizarro told him, how Hojeda was turned frier; but Encifo thought it was an invention of his own, and the Pizarro had fled from him; but being fat. 'y'd, he caufed him to return, though Pizarro offered him two thousand ounces of gold, not to go back, the country was fo unfortunate.

They landed at Comagre to take in water; and though the Indians were man-eaters, yet they used them kindly, when they understood that neither Hojeda nor Nicuessa were there. Going into Uraba their finips struck, and their mares, hogs, and all they had, was lost.

This difaster made *Enciso* desperate, thinking they must all perish; and they all swore to one another, rather to die by the hands of men than by hunger. They landed with one hundred men, and were beaten. Thence they went to a country close by, and built a village, calling it *Guardia*: at first the *Indians* were quiet; but afterwards became their enemies, whom they overcame, and possessible much wealth of theirs.

Now began great factions between Encijo and Vafeo Nunnez de Balboa: Nunnez refused to obey him, or pay the king his fifths; and thus they continued a year.

Henry Colmenores went with two carvels from St. Domingo, to relieve Hojeda's men. And after many dangers he arrived at Carefa, and put fifty five men ashore, whom the Indians slew, excepting seven, that hid themselves in a tree; but they were taken and eaten. Colmenores searing the Indians would attempt his carvels, removed to the gulph of Uraba, and firing his guns, was answered with fires by the Spannards ashore. There was great joy for their meeting; and all of them made up

one hundred and fifty men; a fufficient number against the Indians.

The fictions continued; and to appeafe them Colmenores advised, That Enciso should govern, he having the king's patent for it. Nunnez refused, and would not allow of it; but afterwards took Encifo, and confifcated all he had. Enciso got into Spain to complain of him, and obtain'd a fevere judgment against him 3 which came to nothing, because afterwards Nannez was the cause of finding the South Sea, and all the wealth obtain'd by it. Nunnez had done many other good fervices, and conquer'd Caffilla del Oro.

Nunnez having the absolute power, endeavoured to govern well, and had two hundred and fifty Spaniards; and in the town of Nuestra Sennora el Entigua del Darien, with one hundred and thirty of them he went out to find victuals for the reft: an Indian king refusing him relief, he took two of his wix and children, and carried them away. In the plundering the town he recovered three Spaniards that had been taken of Nicuessa's company, who told him how well that king had used them; whereupon he releafed his two wives and children, and took their oaths to aid him against Ponca their enemy, and to relieve them

with victuals. Nunnez fent his friend Maldivia to Santo Domingo for more men, because the country promifed gold, and with him a process against Encife. He sacked a town two leagues up the country, where he had gold, but could not take Ponca; and fearing to be fo far in the country without more help, he returned to Comagre, and made peace with him. Comagre had a fuir-built house plenty of victuals, and lived in a civil manner. He had feven wives and feven children, his eldeft fon gave him feventy flaves to ferve the Spaniards, and much gold. As they were weighing the gold, two Spaniards fell out, which the king observing, he ftruck down the feales, faying, " If I had "known, Christians, you would have fallen out for my gold, I would not have gi-" ven you any; for I love peace, and I " wonder that you who are friends should " fall out for fo vile a thing. If your country be fo civiliz'd as you report, it had been better you had kept in it, than to come fo far to quarrel. We live here 44 and content ourselves with indifferent

" gold enough. The Spariards were aftonished to hear the young man talk fo rationally; and caused the three Spaniards that were taken, to ask how far that country he promifed was off, and how called. He told them

" things, and you call us barbarous ; but

" we will not kill one another for gold; but " I will show you a country where there is feven days journey, and that the name of it was Termenana; but advised them to carry more men, because the way was mountainous, and the people men-eaters.

Nunnez hearing him talk of another fea, embrac'd him with great joy, and befought him to become a Christian; which he did, and was baptiz'd by the name of Charles He was a great friend to Christians, and promifed to go with them to the other fea, provided they would carry a thousand Spaniards, for fewer would not conquer Temenana; if they mittrufted him, he offered to go bound; and if he told a lye, they should hang him; and this was the beginning of the difcovery of the South Sea.

Nunnez return'd with great joy to Darien, and divided his wealth. The king's part came to fifteen thousand pefos, which was cast away going to Spain. Nunnez endur'd great mitery, the corn they fow'd being spoiled with rain. Men were fint out with great danger for food, who returned with gold; but all full of fores made by the biting of gnats.

Colmenores went another way with feventy men; they met together, and went among the people that live upon trees. The Spaniards defired a peace with them. which they refused, relying on the height of their trees; but when the Spaniards offered to cut them down, which they imagined they could not do, till they faw it, they then offered them peace and victuals. Gold they did not use, but promised to fetch fome, yet came not again being gone to persuade other kings to join with them against the Spaniards. They gather'd five thousand men in boats, which was discovered by a woman Nunnez had with him. He prevented their treason, and slew most of them; and they never after attempted any treachery against the Spaniards in those

Colmenores was fent to the emperor with this news; but his wife they kept as a pledge. Colmenores had been a foldier under the great captain.

John Sebedo, a franciscan, was the first bishop of Antigoa, in Darien, and the first priest that ever was in that new world. Nunnez was a gentleman by birth, industrious in war, and belov'd by his foldiers. This country is unwholfome, fubject to much rain, and many were there killed by thunde, bolts.

Zenu,

Is a river, a town, and port, ten leagues from the fea, which has a good trade for fish. The Indians there work their plate curioufly. Bascada discovered it Anno 1512. but Hojeda and Enciso did most good there.

Enciso being ready to give battle there, toki the Indians they were Spaniards, and peaceable men, who came thither from afar, in great danger, and defired victuals. The others answered, There was little fign they were fuch men; and defired them to be gone, for they would admit of no ftranger among them. The Spaniards perfuaded them to own the true God; and told them that country was given them by the pope, who had the command of fouls; and that they came to take possession of it, They answer'd laughing, That they approved of the service of one God, but would not dispute of religion; that the pope was very free of what was not his own, but had nothing to do with them; and that either the king of Spain was very poor, to defire their country, or very bold to threaten them; and that if he came thither himself, they would fet his head upon a pole. To conclude, they engag'd, and the Spaniards overthrew them with the loss of two men.

Carthagena.

Juan de la Costa, who was pilot with Bastida in 1504. Set out four carvels, offering to fubdue the Indians of this place. He came to Cartbagena, where he found captain Lewis Guerra; they joined together, and took feven hundred men, and returned without doing any great matter.

Peter de Herrera went governor with an hundred men, forty horses, and three carvels in 1532. He peopled it; but a mutiny happening among the Spaniards, he and his brother were brought prisoners into Spain.

The people here are taller than in any other part of the West Indies. They are now christians, and have a bishop.

Santa Maria.

Bastida discovered and governed this land in 1524. but it cost him his life; for his foldiers mutiny'd against him, because he would not give them the fpoil of gold, faying, he valued the *Indians* more than them. His death was procured by his friend Peter Fuentes, who thought by his death to rule all.

Don Pedro de Lugo fucceeded him; and after him his fon, both of them exceeding covetous. Here Pedrarias d'Avila landed, when he went governor to Darien, and had a great engagement with the Indians, who were much daunted at the cannon firing from the ships; for they thought it had been thunder and lightning.

New Granada

VOL. III.

found out the mines of Emeralds, by means of the king of Bigousa, who used the Spamiards civilly. This king had forty wives; his subjects were obedient to him, and would not fuffer him to fpit on the ground. They kept a Lent two months in the year; during which time they were not to know woman, nor eat falt. In 1547, the emperor fent a governor to New Granada.

Venezuela.

The first governor here was Ambrose Alfinger, a German, in behalf of some merchants the emperor mortgag'd it to. In 1528. he was kill'd, and his men reduced to fuch mifery, that they eat three Indians. George Spira, another German, succeeded

Queen Ifabel would not confent that any but her own subjects should go to the Indies; but after her death, the king gave leave to the Arragonians. The emperor opened this gap to strangers, by this contract with the Germans, yet now none can go but Spamards.

Venezuela is now a bishoprick; it is so called, because seated like Venice: the women are more familiar than in any other part of the Indies; but their religion and attire is no better.

Cumana and Cubagua.

Cumana is a river that takes the name of the province. Here was a great fishery for people, and certain friers built a monaftery in the year 1516. John Garcia being their vicar. Three of them went to convert the people up the country, but were flain; yet afterwards the others brought the people to civility, and their children to learn. Thus civility, and their children to learn. it continued two years; at the end whereof they revolted and flew one hundred Spamiards, entered the town, destroy'd the monaftery, and killed all the friers.

James Columbus being governor of Santo Domingo, fent three hundred Spaniards to revenge this wrong, under the command of Gonsalo de Ocampo. At his first coming he pretended to the Indians that he came out of Spain, which emboldened them to come aboard him. When he had as many as he thought fit, he feized them, made them ecaffefs all their villany, and compelled them to build the town of Toledo, which is within half a league of the fea.

When the aforefaid monastery flourished, Bartholomew de las Cafas, a priest that had lived in Santo Domingo, begged the government of this country, promifing the emperor more wealth , and that the Indians Is eighteen leagues from Santa Maria, and should be better used than before. By means was discovered by Gonfalo Kimenes: he of count Naffau, and other Flemings, he

expence, and carried three hundred labourers, with every one a cross on his breast, like a knight. At his coming he found Ocampo there, and the country in another condition than he had expected. He required Ocampo to obey him, which he refused till he had orders from Columbus, who employed him, and would not allow him to come into his town of Toledo, but obliged him to build a great barn of clay without tor his labourers. Both went to Santo Domingo to complain; by which means Toledo, was unpeopled; which the Indians taking the advantage of, they entered upon the clay-house, and left not a Spaniard alive. The priest hearing hereof, became a frier,

had promifed them.

The lofs of the pearl-fishery was a great damage to the king; but Columbus fent John Castellon, with a number of Spaniards, who made amends for the follies of the other two, recover'd the country, built a castle at the mouth of the river, and set up the pearl-f. hery at Cubagua, where New Cadiz was built. This island was but two miles about, and barren in those days, but yielded to the value of two millions in pearls. There is a fweet and medicinal spring in it. At some times of the year the fea is red, which they impute to the breeding of oisters, and purging of women. They fay here are mermaids. This island of Cubagua was discover'd by Columbus, which was the cause of his disgrace, being accused for concealing pearls he took there.

and never fent the Flemings the pearls he

obtain'd it. He was furnished at the king's

Vincent Pinjon, and Adrian his nephew, growing rich in their voyage with Columbus, fitted out four carvels, and had leave to difcover those countries where Columbus had not been. They came to cape St. Augustin, where they found people as big as Germans, and had experience of their valour; for they flew eight Spaniards, yet he brought away thirty Indians, and much brafil; but loft two carvels, men and all, having spent ten

months upon the voyage.

Orellano and Amazons.

This is counted the famousest river in the world, rifes in Peru, has many iflands in it, and flows an hundred leagues into the country. The man that gave an account of it was Francis de Orellano, lieutenant to Gonçalo Pizarro.

Orellano being in Peru, was fent by his captain to feek victuals, and being in a boat, was carried with fuch swiftness by the current, that he could not return to Pizarro. He carried with him much wealth, and came our into the north fea down that river. From thence he failed into Spain, where he fued for employment,

and undertook that voyage to the river of Orellano. He staid in Spain till all his wealth was fpent, and then married, and drew his wife's friends to venture with him. He gathered five hundred men, but unfortunately died at his going to fea, and that enterprise was never after attempted. He reported he met with Amazon women; but it was not believed.

It is supposed that Marannon and Orella. no have both the fame fource in Peru; and that the latter is fifteen leagues over, where

it falls into the fea.

James de Ordas, who had been a captain with Cortes at the conquest of Mexico, was fent thither with the title of Adelantado, carrying fix hundred Spaniards, and thirty five horses; but the enterprize fail'd by his

Jerome Ortillano was fent afterwards with an hundred and thirty men, in the year 1534. who arrived not there, but staid and peopled at St. Michael, Venevente, and o-

ther places.

The River of Plate.

From cape St. Augustin, to the river of Plate, is feven hundred leagues. Some attribute the honour of discovering it to Americus Vespucius; but it was John de Solis, in 1512. who returned into Spain with his thips laden with Brafil wood, and obtained the government of the river of Plate; but landing with fome men, he and they were all flain in 1515. yet his ships returned fafe. In the year 1526 Sebastian Cabot, in his voyage to find the Molucco islands, of which ne fail'd, arrived at the river of Plate with four fhips, at the emperor's charge. In Brafil he found fome Frenchmen trading. The Indians killed two of his men, but would not eat them, faying they were foldiers. Cabot returned into Spain with little credit, though he was not to blame, because his men were in fault.

Don Pedro de Mendosa went to the river of Plate in 1535. with twelve ships, and two thousand men, a greater number than ever had been carried to the Indies at one time; in the way thither he fickened, and

in his return died.

Alvar Nunnez Cabeza de Voca was sent Adelantado to the river of Plate in 1541. with four hundred men, and forty fix horses. He could not agree with the Spaniards Don Pedro left there; nor yet with the Indians, fo that they fent him prisoner into Spain.

John de Sanabria was bound to carry three hundred men, at his own cost, to the river of Plate; but he died at Seville, and his fon went.

F. Bernard de Armenta, and four others, went to the river of Plate, and by the way fell upon an island, where they found three to th friers For 1 Ar Cap

100 ces. And thus much concerning America,

thousand five hundred and fixty miles.

Africk, from east to west, (viz.) from Gambra to Guardusu in ten degrees of north latitude, is four thousand one hundred fifty five miles; and from north to fouth two thousand seven hundred and fixty miles, (viz.) to the equinoctial line, ten degrees, fix hundred leagues; from thence to the cape of Good Hope, two thousand one hundred and fixty miles.

The Two Worlds undiscovered, besides the Four known.

THE four known parts and divisions of the world have been often fpoke of in these discourses; and, wisdes these four, there are two others, generally conceived not as yet discovered.

The one under the pole, and not fit to be attempted, though we certainly know a land to be there; but my hope is, as in my difcourse of the north-west passage will appear, that under the north pole we shall find a sea, and no land, through which we shall pass to China, and those parts of the world.

If not, though that part of the earth should afford us another world, as big and spacious as all the rest besides, yet could we expect no more advantage from it, than Greenland affords us, which never any man inhabited to bid us welcome, nor commodity on shore to entice us thither to repair; and, therefore, though another world should appear in that climate, it can neither benefit us, nor the Christian commonwealth, more than a country of ice and show.

The fecond magined new world is to the fouthward of the Streights of Magellan,

commonly called *Tierre del Fuego*, which is fupposed to be a continent, and to run eaft and west the compass of the world about.

That there is a land, befide the probabilities, there are proofs; the one by Mr. Richard Hawkins, in his voyage into the fouth fea; for falling flort of the Streights of Magallan, he efpy'd a country; but his intention being of another fort than discovery, he would not approach the fhore, but flood his direct course to the Streights, which he passed in 1594.

The next proof of a land, though not of a main land, fuppofed by Sir Francis Drake to be to the fouthward of the Streights, was found out by Cornelius Van Stowden, of whom I have fpoken in my fecond book, that in the year 1616 differenced a paffage into the fouth fea, three degrees to the fouthward of the Streights, where he found diverfity of lands and iflands till he arrived at the Molucco's, as I have faid in the fecond book.

But be it firm land, or islands, it is all one to us, that feek by the knowledge of

though not Sir Francis ard of the bornelius Vass en in my fe-1616. difcote Streights, s and iflands s, as I have

ds, it is all nowledge of it to make gain by it. It is a vain thing for us to think, that a country feated in fo cold a climate, and not inhabited, fhould bring forth the fruits of the earth, or that it can be planted to afford us any commodity, no, not the value of fetching, though it should coft us nothing.

For compare it with Newfoundland, and

For compare it with Newfoundland, and the continent of that coaft, long fince differenced and known to us, and confider what use or profit we have made, or can make of a plantation there, and we shall find it not worth our labour; for though it be not so cold as farther to the northward, yet 'tis in that extremity of coldness, that in many hundred years it cannot be tempered for our bodies to live in.

This may feen an ambiguous fpeech, that the earth of an intolerable cold conflitution may be tempered for men to live in, and to make use and benefit of.

But what I shall say in this point is prov'd both by reason and experience. That the coldness of America in sifty one degrees, which doth parallel us in England, is by many degrees colder than with us in England, and the difference thereof caused by art and pains: for where there is a plantation of towns and houses; commerce of people, whose breath sends forth a heat; divisions of lands, as by walls, ditches, hedges, the grounds trenched and dried with continual fires; it yields a perpetual heat, and is a shelter against all kind of cold, in comparison of a country that has none of these benefits or helps.

We our felves have examples of it, betwixt a natural moorish and wet dwelling, and such a place that by industry and art is brought to a better perfection. We see the difference of houses that are continually dwelt in, and fires kept burning; and others that ie unhabited, waste, and no

care taken of them.

Befides these reasons, to discourage us from planting in these degrees of America equal to England, the French have convinced us by their example, who, by their long travel and charge, have sought to produce some benefit out of those countries; but all their labours have proved vain; for, they find, the cold destroys all their good intentions, and the only gain they now make is in their trades for surs.

Then, if by reason and proof, America in fifty one degrees can yield us no profit, being but two thousand miles from England, where we have a conveniency to transport our men and provision once a year, at an eafy rate, in ships that fish in Newsjoundland, by whom we may be reliev'd; what can we expect from a country in the same latitude fouthward, that is as cold, the people barbarous and savage, and having no con-

veniency to transport our men, otherwise than in ships we purposely hire, to fail nigh seven thousand miles from England, the equinoctial line to be twice passed, in going and coming, which must distemper mens bodies by the sudden entering out of the cold into the heat; and this is the only cause to be imputed to the death of our men in our long navigations.

More then for our own fatisfaction, that a land is there placed, we can expect no good from thence; for where there wants heat, there wants riches, by proof of the pure metals, and the quantity and divertity of them, growing betwixt the two tropicks, above all other parts of the world.

And for our other kind of commodities that are produced out of the earth, the temperate zone affords them in most abundance, but not caused by the heat of the sun alone, but by the managing and manuring of the land, by the labour and industry of the people, and by the commerce, trade, and civility, betwixt man and man, country and country; for, no doubt, in times past, when the people of England were barbarous, they lived in the same estate, and the country was of the same condition that other places are, of the same height at this instant.

height at this instant.

Therefore I conclude, that though all the countries contained in the hot and temperate zones yield no profit, unless they be manur'd and us'd accordingly, yet, I say, no part of the world out of those zones, where the cold has so predominate a power over men, beasts, and fruits of the earth, is of any value or goodness to intice men to inhabit or people it; sor neither by art or industry such a climate can be made capable for man to live in, or fruitful to make

But notwithstanding these reasons collected out of experience, there are some men, who, to appear singular, and others for argument sake, go about to prove there are other countries not yet discovered, as pleasant and as plentiful as those that are known by daily traffick.

It has been my chance often to meet with fome of these self-conceited witty men, and for want of learning to desend my opinion, I have seld to the protection of reason, with humility to submit to judgment, and to acknowledge my errors, after I am confuted by proof: but before the discovery of any such countries should be set on foot, I have advised, That the first thing they should attempt, should be to find out another sun; for the power and operation of this sun is known to us by the light it sends abroad to all parts of the world at several scasons of the year, as the countries are

feated from the equinoctial line, which is termed, The girdle of the world.

This Sin is known to rife in the eaft, and fet in the weft, making its courfe every twenty four hours about the world; its declination to the northward and fouthward, is well known to us not to exceed the two tropicks, which are in twenty three degrees and an half from the equinostial: we likewife know, that it is the guide of the lengthening and shortening of the days, occasioned by its motion. We also know all fuch lands in America, Africa, and Asia, as lie between the two tropicks; and, trading

into these countries, know what the heat of the Sun in that space produces.

Then feeing we are perfectly acquainted with the virtue and quality of our San, and the power and heat it fends forth to the countries adjoining to it; and that the riches of all places grow by the heat they are feated in 1 delire to be fatisfied what richer countries can be hoped for befides those already known to us, unless there be another Sun to work the operation this Sun does. And thus much concerning my private opinion of the two worlds undiscover'd.

Other Seas besides the Ocean, great Part of them lately discovered.

HAVE failed into all the quarters and corners of the earth through the wide unknown ocean, and left no country unpaffage. But befides the great spacious and known seas, besides the commerce, trade, and intercourse of all nations, I have at large related there are other seas, which, in comparison of the ocean, may be termed rather Lakes or Streights, which I will a little handle.

The first shall be the Caspian Sea, which is invironed and compassed about with land, and seated in a main continent; where there is no issue or passage into any other sea; but like a pool or pond it has a settled

The fecond is the *Red Sea*; which, after one thousand two hundred miles running, falls into the *Indian Sea*; and but that this sea is named a sea in the scripture, which is the authentick proof of all other authors, it should no more deserve the name of a sea, than the *Persian Gulpb*, which falls into the *Indian Sea*, and is equal in breadth and length to the *Red Sea*, and yet is called a gulph.

gulph.
The third is the Mediterranean Sea, which divides Europe from Africk; and fomething I will fay of this fea, when it comes to the place to be treated of: but first concerning the Caspian and Red Sea.

The Caspain Sea is at least two hundred leagues in length, and one hundred and fifty in breadth; many rivers running into it, and especially the river Volga out of Russia, which river divides itself into sevenet branches before it falls into the Caspian Sea.

There are few fhips, and but finall trade on this fea, for want of mariners and feaport towns; and because of the poverty of the people, and abundance of ice.

Our English merchants finding a trade into Persia out of Russia by the Caspian Sea, built a ship after the manner of England; the tarused about her issued out of the earth thereabouts; fhe was of twenty feven or thirty tons burthen, and failed with English mariners. This was the first and the best-built ship that ever failed, or display'd christian colours in those seas; she drew not above five foot water; for the sea is both shallow, and subject to shoals. This trade was left off, by reason of the danger of thieves and robbers, and the barbarity of the people.

About this fea Ottoman, the first of that name and house that bare rule amongst the Turks, had his original, and came from thence in the year 1300.

In some places of this sea the water is fresh; and in some other places as falt as in the ocean.

It neither ebbs nor flows, except fome times with the rage of the wind.

There are feveral forts of fish, which are not in our feas; but great monsters and fishes there are none. And thus much for the Caspian Sea.

The Red Sea is not red, as many conceive; but takes the name from the red bufnes that grow along the fhore fide. Others are of opinion, that the name is derived from the red fands in that fea, efpecially towards the fhore, which cause the water to look red.

This fea has three channels; that in the middle is the deepeft, and betwixt twenty five and thirty fathom; the other two are full of rocks and shoals, which makes it navigable only in the day time, and that with danger.

The thore affords neither grafs, herbs, nor weeds, nor the fea any quantity of fift. Some are of opinion, that the gold of *Ophir* was brought out of the *Eaft Indies* through this fea.

No man can fail in this fea, but Turks, or fuch as have licence from them; for which they pay very dear.

they pay very dear.

but Turks, 1; for which

arbour in the e Portugueje damnify the Turks in the Red Sea; but they proceeded fo faintly, that they still failed in their enterprizes.

Mecca is the place fo famous for the fepulchre of Mahomet, and for the number of people yearly reforting to it, feated upon the Red Sea, and forty days journey from Cairo in Egypt. Sida is a great port in this fer; whither forty or fifty thips yearly refort, laden with spices, and other rich commodities out of Cambdaya, and other parts of the East Indies. And now to the Mediterranean Sea.

Out of the Mediterranean two other feas are increased; the Adriatick, which runs up to the city of Venice, and divides Italy from Greece; and the Euxine, that parts Europe from Afia, poslessed only by the great Turk.

The Euxine Sea, and no other part of the Turks dominions, except the island of Cyprus, affords him any harbour to build galleys in, or fhips, or materials to build them withal. What fhips, galleys, or other veffels foever he at any time fends into the Red Sea, are carry'd from thence to Alexandria, and transported to Cairo, and fo to Susa, which is above two hundred miles by land; a trouble and charge not to be estimated, if we consider his fleet of eighty great ships, twenty five foilts, four galleasses, twenty galleys, and seven other vessels, all brough our of the Euxine Sea to Sufa, in the manner a refaid, when he attempted and failed in his enterprize to Aden in 1573.

The commerce and trade into the Mediterranean Sea, has been more ancient and famous, than all other feas in the world, although it is neither long nor broad; for at the entrance into it, it is not above two leagues over, which was forced by means and labours of people, as it is received by tradition; and I the rather believe ic, because to this day the entrance into this sea is called The Pillars of Hercules, who is faid to be the author of the work; and were it not for this fmall entrance, confidering that the fea has a stoppage upon the land of Syria, it were rather to be termed a lake than a

Among many observations on the Mediterranean, this is not the leaft to be confidered, That though the ocean continually runs through this fmall streight of two leagues, carrying fuch abundance of water, that in reason it were enough to overflow and drown that part of the earth on which it beats, having no passage out; yet in no part of the land where these waters pass, does exceed its ordinary and usual bounds and limits. There have been many opinions and disputes about the reason hereof;

and Prester John have often attempted to but for my prrt, I hold with him who judges that fea has a paffage under the earth.

My next observation is, That God has placed in that sea, the most, and the most plentiful iflands of the earth; which iflands have heretofore fent forth men of fame, to enrich the world with wit and learning, and in this time foread their commodities into all the countries of Europe, and receive

theirs in exchange.

And though I may attribute to every island some particular honour, but that it is not proper to my discourse, that treats only of the fea, yet will I fay for the excel-lency of the ifland of Cyprus, which the Turks have enjoy'd ever fince the year 1571. that it affords, without the help of any other country, materials to build and furnish a fhip, as namely, mafts, ropes, fails, and fuch like, that fhe need not be beholding to her neighbours.

My third observation is, That in that fea there have been fought more naval battles by the Romans, Turks and Christians, than in all the other feas of the world befides: the wars of the pirates was in that fea, whom Pompey the great overcame, to his everlasting honour and praise: the Romans kept in continual imployment in that fea two thousand fail of ships, fifteen hundred galleys, eighty great galleons, with their prows and poops richly gilt, and had always double rovision for the navy.

My fourth observation is God's bleffing to the christians and christian shores, oppofite to Barbary, poffesfed by Turks and Moors; for that in all that coast of theirs God hath not given them one harbour to entertain a fleet; which has made them heretofore ignorant in navigation, and fea-affairs; whereas, if the shore had afforded tnem ports, and their land timber, and all other materials to build shipping, considering their numbers, valours, and the division of christians, I am of opinion, before now, they had been mafters of the better part of Europe. And I may the better conjecture it, by the hurts and spoils the pirates of Algiers and Trinis have of late years committed upon the christians, since they have had the use of christian ships; for themselves have none.

And only these two place, afford safety for their vessels; Algiers by a mole or cove, made by art in the fea: Tunis by an open road, called the Goletta; and this shall fuffice for the Mediterranean.

Besides these seas aforesaid, there are many lakes; fome known, others imagined, or received by tradition, as namely, that of Africk, called Zembre, out of which flow the rivers Nilus, Niger, Como, Quama, Maginca, and divers others.

BOOK IV.

The river Nilus flows forty days in a year, and decreases as many, (that is to iay,) from the 27th of July to the 6th of October. The river Niger doth the like; and much about that time.

The river Cambra and Seneca, which divides the colour and complexion of the peo-ple, falls out of Niger. On one fide of the river Cambra the people are of a dead ashcolour, lean, and of fmall stature; on the other, black negroes, tall and well proportioned.

In the lake of Zembre, as also in the river of Layar, there are water-horfes, and water-oxen, which at night come ashore and graze; the horses are sometimes taken and made tame; they run fwift; but a man must be careful how he rides over a deep river on one of them, for they will suddenly dive under water.

Sinus Perficus is in the gulph of Perfia; and has in the mouth of it, in the Indian fea, the island of Ormus, famous for the great trade to it from the Indies, and all the countries in that part of the world.

There are divers towns of the Arabs on the gulph of Persia, and great traffick by water; notwithstanding it is both shallow, great customs are paid, and it is subject to Arabian thieves.

The town they first imbark at in passing down to Ormus, is Bierr; the vessels that

fail in that sea, are of forty or fifty tons in burthen, and have no iron in them, but only in their anchors.

Babylon stands upon the river Tigris, which falls into the river of Eupbrates; it is a great through-fair, and stands in Persia; from Babylon they go to Balfora, which is a town of great traffick; in former time it was under the Arabs, but now under the Turks: from Balfora they go to Ormus, which is fix hundred miles diftant, and all in the Persian gulph.

Befides the fea and lands lately discovered, of which I have formerly treated, producing nothing but my own reasons to ftrengthen my opinion, there are other feas and unknown paffages, supposed to make a paffage or communication from one to another; as namely, the north-west and northeast passages to bring us to other seas, which our nation, above others, has been industrious to search out, to its yearly expence, hazard, and charge, without effecting any thing as yet. These that follow are reasons, or rather arguments pro & contra, to prove or disprove a passage; which I refer, as I do all the rest of my discourses, to the confideration of men of more judgment than my felf; it was written upon the return of Hudfon's ship, after he was treacherously murthered by his company.

A Discourse concerning the North-west Passage.

HERE are three things to be confidered in this pretended voyage, upon the discovery of the north-west passage this present year 1610.

1. The first is the probability of a pas-

2. Whether it is like to tend to the fouthward or northward.

3. What commodities are like to arise to us alone, above any other nation, by it. That there is a paffage, is confidently believed; though there be feveral opinions, whether it runs into the South Sea, or into the North-west, which experience must determine. Some there are who pretend to have passed it themselves; but their words carry so little shew of reason along with

them, that they deserve no credit. Gemma Frigius fays, There went three brethren from Euro, e through this passage, whence it took the name of Fretum Trium

In my opinion, if Gemma Frigius intended we should believe his report, he should have fet down the names of the three brethren, their country, the shipping, out of what port, or by whom they were em-

ployed; the season of the year they set forth, the time of their return; the course they failed; what hope or ditpair in making benefit of their discovery; the conditions of the people they met with; the commodities of every country where they had commerce; the altitude of every place; what dangers are to be shuned, or some particular accident that fell out in the voyage; for these are designs of mens voyages and discoveries: and not mentioning any of them, why may we not conceive it to be a fiction, as well as divers other names, that are given to places in maps within the lands of Africk, Asia and America, which never any man was known to be at, to give an account of.

We must either conclude that passage not worth following, which was discovered, and left off after the first voyage; or that those princes, or others, to whom they made relation of it, gave little credit to their re-

For, no doubt, if there had been any fuch thing, it was undertaken for the fame end we now attempt it, (that is,) for the difcovery of new lands, where we may have

I been any or the fame for the dife may have comcommerce and traffick: they could not be ignorant of the nature of commodities, andit is like they would have brought home an example of fome, that would have given encouragement to have perfevered, and not defifted from the enterprize, it being difcovered; neither is it likely, that three brethren, who prefumed to undertake fuch a voyage for their honour or glory, would let die fo noble and fo memorable an action, as the north-west passage.

The fecond reason to prove a passage, is alledged by Cornelius Nepos, That there were certain Indians cast upon the coast of Germany, which were prefented by the king of Snith to Quintus Marcellus Celer, the pin-

conful of France.

The third, that in the year 1160. whilst Frederick Barbarasso reigned emperor, there came certain Indians cast upon the coast of Germany.

The fourth, that Othen, in the story of the Goths, affirms, That in the time of the German emperors, there were certain Indians cast upon the coast of Germany.

These four proofs are verify'd by three authors: but confidering that we read in the days of Quintus Marcellus, the Romans were fo defirous to enlarge their empire, that they left no means unattempted, nor no country heard of unconquered; and that they would not examine these men, of the custom of the country, the distance from whence they came, the wealth and power of their king, the way of their coming, and, at least, to devise how to fend an ambassador to be informed of the state of their nation, and to fettle an intercourse of traffick. I must confess, if these things were not put in practice by the Romans, they were less careful of their government and greatness than any history can lay to their charge.

These reasons, with one more, I must likewise alledge to the two christian emperors, That they should be so careless in their duty towards God, that having knowledge of heathen people, they would not use their best endeavours to draw and bring them to the yoke of Christ; by which means they might have been civilized; and having learn'd the language and true worship of God, this would have proved a good introduction to have wrought their own ends

and defires upon them.

These, I say, may breed some scruple in me, to doubt that they were people of the West Indies; though in those days, they might give them the names of Indians, because the savages, and the people of America, nor America itself, was not then discovered, nor of many years after. I will not deny, but that fuch men might arrive upon the coast of Germany; but I should have

been better confirmed, if the burden and manner of building their ship, had been expressed, with the number of men', their time of absence from home, the behaviour and civility of the people, what fea or streight they passed, what commodities they brought with them, and defired to carry from thence; for the author faid they came to trade.

But the greatest argument we are grounded upon that they came out of the Indies, is, because in the discourse they gave them the name of Indians; but I do verily believe, if there were any fuch people, that they were favages of America, over-against Germany, who were put from the shore with a westerly wind; as the Spaniards relate of a Biscainer, that was forced with an easterly wind from the Canaries to the coast of America, from whom Columbus had his light for the discovery of the Indies: both these re-

ports I believe alike.

The fifth proof of a passage is grounded upon a report of Cortereal, a Portuguese, who, by his own report, passed it, and gave it the name of Cortereal. But where this Portuguese was born, or took shipping, or by whom he was imployed, or upon what occasion, what became of the rest of the men, the name of the ship, captain, and mafter, or the journals of the voyages, is not expressed; which makes me doubt of the credit of this flory; for there is no man fo void of fense, that does not observe the month and day of his departure from home, and all accidents in the journey; or though the Portuguese should be careless thereof, yet of ten mariners, eight of them would observe

But leaving this to the Portuguese forgetfulness; let us examine who should employ him; and upon what occasion. If we speak according to reason, no prince so likely as the kings of England, Scotland, or Denmark; whose countries lie more convenient for the

Neither is it likely that any other than a prince would fet them out, because it would concern a prince more than any private man; but allow that more than one or ten fhould employ them; think you the fecret of the voyage could be concealed, or that they would leave profecuting it when discovered: no, no; for in those days England, Scotland, and Denmark, would have thought it a great happiness to their state to have found it out.

And to prove what I fay, that England was ignorant of any fuch difcovery, we have no record of any fuch voyage undertaken out of England; nor proof of the Portuguese offer to any king of England, as we have of Columbus, who tendered his fervice

dinary way of trade, than from Lima to Spain by a north-west passage.

Indies, before he made offer of it to Spain.

How this Portuguese could cause such a filence in the rest of the company, as not to make report of it, is very doubtful, seeing man naturally is apt to extol himself; and such a service as that passage, would cause the men not only to boast of it, but also to make offer where it was most likely to be accepted; which, as I have said, I could never hear was done to England.

to Henry VII. for the discovery of the West

It is an old faying, That two may keep counfel, if the third be away; but that the Portuguese could pass in a fhip that had but two or three men to fail her, or that they could be made so silent as not to report, I refer my self to any judicious

man.

The voyage was neither by the king his mafter's appointment, nor by any minister under him, or by the confect of the one or the other, you may conjecture; because the discovery of that passage, was likely to hazard his greatness in the East Indies; and therefore, it any such should be attempted, it is likely he should rather forbid than sure there it.

And feeing it was never feconded by England, Stotland, or Denmark, and the king of Portugal had lefs reason than the rest to discover it, I believe the Portugues was like a great many vagabonds in England, who beg under the name of soldiers, that

never were in war.

The fixth proof of a passage, and particularly out of the South Sea, is related by one Salvatierra, a gentleman of Spain, that spoke it from the mouth of one Andrew Sernita, a frier, in the year 1560, which frier consessed to the said Salvatierra, that he had passed from the South Sea into Germany through the north-west passage.

This report feems to be a hear-fay of a fecond perfon; and whether the frier poke it to Salvatierra, or no, that must reft upon the honefty of Salvatierra; and whether the frier spoke ruth, in saying it, rests as much upon the honesty of the frier; so that there are two mens credits at stake, and neither of them both to be examined: but let us

examine the likelihood of it.

The king of Spain in those days had as little reason to discover such a passage into the South Sea as the king of Portugal; because it would be as great a damage to him as to the king of Portugal; the trade of Portu being as much exposed as that of the East Indies.

But suppose there was no hurt or damage to the king of Spain by that passage, yet the finding of it would be more inconvenient; for it is nearer from Lima to Panama, and from thence to Nambre de Dios by land, and so into Spain, which is the or-

And therefore feeing the difcovery of that paffage would neither profit nor fhorten the Soniards voyage, but might in time y yea hazard the whole Indies. reason the Spaniards had to attem, so difcovery, but rather to divert it; and therefore the frier's testimony to be doubæd.

By his own report, this paffage was not long difeovered before the year 1560. Sir Martin Ferbusher's last attempt to the northwest was undertaken in 1576. So that there could not be twenty year i difference betwist

their two undertakings.

If the frier's relation had been true, it is not likely it would have been concealed: and feeing Sir Martin's action was undertaken by the queen, who had better means to undertland the litate of it than any private man, no queftion but the queen would have procured a certain relation for Sir Martin's better infruction.

Or if the frier's arrival had been upon the coaft of Germany; as neither the time, place, company, nor fhip, is spoken of, nor any German writer makes mention of, which it is likely they would have done, if it had been true, or if not, so memorable a thing as the north-west passage would not have been forgotten in twenty

Befides, the Germans had been as likely as any nation in the world to have attempted it, if there had been cause, considering how industrious and ingenious they are by nature; and seeing that neither report made it samous, nor that it was ever seconded by any other person, I think the frier passed it in a dream, or upon the horse

Pegajus.
The seventh reason to prove a passage, was by Stephen Gemes's offer to Charles V. in 1527, who would have sent to discover it, but that his imployment was so great otherwise, that he could not attend it; and the king of Portugal searing that the emperor would persevere in the enterprize, gave him three hundred thousand ducats to desit; as

faith Francisco de Ulloa.

How probable this is, let us a little examine. First, I think that neither Gomes, nor any other man, durst make such an offer to the emperor; for he might as well have presented him with posson in his cup, as to discover a passage that might prove so hurtful to the state of Spain; and I think sew kings would have suffered Gomes to have lived, if they believed his relation, lest, upon refusal, he might have tendered it to some other prince or country that might lie more conveniently for it.

n paffage, o Charles V. o discover it, great otherit; and the the emperor e, gavehim to desist; as

a little exther (Tomes, such an ofthe as well in his cup, night prove and I think I Gomes to elation, left, tendered is that might Secondly, Gomes could not have been fuch a fool, but to think, as it ftood with the flate of the emperor, to have the paffage found; yet as the emperor was king of Spain, it was the most hurtful and dangerous thing that could happen to his kingdoms; and of the two titles and dignities, the emperor was to respect his inheritance of Spain, being successive, as the other was but elective.

To prove that it has been paffed, is not fer down by Gomes; and reasons that it may be paffed are as well known to thousands as to Gomes; which makes me judge of Gomes to be an undertaking fellow, as we have many in our age that will put themselves into action, and promise good success to keep themselves employ'd.

And I do the rather believe this of Gomes, because I read in the voyage of Magellan about the world, that this Gomes was pilot of one of his ships, wherein Alvaro Mesquita, Magellan's nephew, went captain and coming into the Streights of Magellan, Gomes mutiny'd, and compelled this captain

to return home. Befides, I find it recorded of the faid Gomes, That he undertook the discovery of the north-west passage in 1525, and after ten months spent without effecting it, he brought home certain Indians, and arriving at the Groyne, was called to from the shore as he enter'd that harbour, to know what he came home laden withal; who answer'd, with Efelavo's, meaning with Indians, which the others conceived to be Clavo's, viz. cloves, upon the first apprehension thereof; and in hope to get a reward of the king, the party posted up to the court with tidings, that Gomes had been at the islands of Molucco's, and was return'd home, laden with cloves; but when this news was contradicted, the fellow loft his charge and travel, and they were both derided.

But to return where I left off, though

But to return where I left off, though there had been no likelihood to impeach the emperor in his *Indies* by this paffage, yet confidering it was like to prejudice the king of *Portugal* in the *Eafl Indies*, the emperor had reafon, without receiving any fuch fum of money, to hinder it; for as much as the more nations traded that way, the fooner they might discover those places that were discover'd afterwards, as namely, the *Pbillipines*, and other islands, and in time might prove his most dangerous neighbours

But especially the emperor was married to the daughter of Don Emanuel king of Portugal, who had the reversion of all his kingdoms, if his heirs males failed, as it did, and became hereditary to Spain.

And therefore it was most ridiculous we should conceive the emperor ever threaten-

ed the king of Pertugal with that discovery, or received money of him to that purpose, as is expressed. But I observe it is the nature of all men to slatter themselves with hope of a thing they would have, and will wreit reasons and stories to strengthen their belief, by example of this which they misreport; and therefore I will set down the truth of this story out of authentick authors.

There was a long question and debate between the emperor and the king of Portugal, to whom the Molucco's should belong. And it is true the emperor labour'd to find another way to the Molucco's, than by the cape of Good Hope.

Magellan was a Portuguese by oirth, who had lived seven years in the Indies: he lest the service of his king, and offered it to the emperor, giving hope to find a new way to the Molucco's, though it proved the loss of his own life.

The controverfy to whom the Molucco's fhould belong, continued between the two crowns of Spain and Partugal, and the Spaniards made fundry attempts, by way of the Streights, but evermore with unfortunate fucceis. At last Don John III. of Partugal, and brother-in-law to the emperor, willingly lent him three hundre' and fifty thousand ducats when he went not Italy to be crown'd emperor, upon condition the king of Partugal should no way be molested in his possession of the Molucco stands till that money was repaid; which being never done, the Spaniards never since pretended to those sistands. But there was no mention made of a north-west passage.

Although there are a great many more probabilities that the Streights have not been at any time paffed, than otherwife, yet it is no reason absolutely to disprove a passage, whatsoever any man shall ground upon philosophical arguments, or by any globe or card that is extent; for except a globe-maker can as well prove by experience that there is such a sea as he sets down, and by the testimony of some men that went it, he may as well suppose what he makes sea to be as dry land as the desarts of Arabia: and therefore leaving this trial, I will proceed further.

I have perused all the voyages to the north-west made by Sir Martin Forbisher, and Mr. John Davies, with whom I have often conferred touching this passage; and I have found by them a likelihood of it, but no more assurance than from those that never went so far as they did. Therefore whatsoever is hitherto done, is but imaginary.

I must confess that the last year's attempt of Hudson's has given us knowledge of four hundred leagues further than ever was known before i and out of his discovery we are to conjecture more or less possibility of it.

And because I make this voyage the foundation of all others that shall fucceed, I will set down, as much as I can remember, what I received from the mouth of the master that came home from Hudson, touching the particulars of his voyage, and whether it will avail us, or no, being discovered.

The entrance was in fixty three degrees, and they ran in that height two hundred leagues, and finding the Streight, which was forty leagues over to run fouth, they followed that foutherly courfe, making account it would bring them into the South Sea, and here they ran two hundred leagues more, till they found the water too shallow and unpassable.

They wintered in an island in fifty two degrees; where in the whole winter they faw but one man who came to them but twice: the second time of his coming he brought with him three deer-skins, which he would not exchange for a hatchet; for he priz'd them at more value: but when he saw that he could not have it under the whole three, he was content to let them go, and promifed by figns to come the next morning; but came not.

The favage was cloathed in skins, and his arrows forked with iron. They found the place much fubject to north-west winds, and far exceeding any part of *England* in coldness.

As they tended fouth, going about the headland, they paffed near the shore, and betwist certain rocks, small islands, and main lands

They found the flood to come from the north-weft, which is one of their arguments that it came from the main fea. The next voyage must be to discover from whence this current comes, and to see if in running west or north-west, they can find a streight to run south, or an open sea to the north-ward.

Victuals they found none from the shore, but white partriges; the water they had was fnow water, which fell abundantly into their ships every night: wine, aquavitæ, and other liquid things, did freeze in an exceeding manner, though it was but in sifty two degrees.

I conceive two especial benefits by *Hud*fon's discovery; the one, That we have passed two hundred leagues more west than was ever discovered; that hereafter we may be bold to fail two hundred leagues directly, without losing any time to search one shore or other, which would have taken up a whole fummer, if they had not intended to winter. The fecond is, That whereas there was hope of a paffage to fall into the South Sea, not many leagues after the entrance into the Streights, this discovery has put us out of doubt of it; so that I make account there is another summer gained.

I will suppose we are two hundred leagues in the Streights, and, as they say, we encounter with a north-west slood; but before we direct our course west and north-west, let us judge of this slood, and where they met it: if in the midst of the channel, we may the better believe it came out of the main sea; but if amongst islands, broken land, or rocks, we have no reason to ground our hopes of a voyage upon it.

For by experience upon the coaft of Britany, or where there are many iflands or rocks, the tides alter according to the rocks and iflands, and I know Hudfon's company confess they met them amongst rocks and iflands; and therefore no hold to be taken of a north-west flood.

But according to the hope we conceive of this flood, we direct our north-west course, being entered the Streights, and in fixty two degrees. You must note, that in running north-west, every twenty eight leagues you raise a degree; and the further you run any point to the northward, the greater hazard you shall endure by ice and cold, the worst wintering, if you be put to it, and the surther from your voyage, because the course lies southerly.

But one hope may be, That the northern part of America, which is made land in the maps, will prove fea. Allowing it to be true, and the Streights to run but two hundred leagues farther, either northward or weftward, then let us compare the time we have to pass the Streight, and reckon our departure from England, and we shall find the climate very unseasonable, either to winter, or to make a factory, if we pass it not in one summer.

From England to the Streights-Mouth, feven hundred leagues; to the place discovered two hundred; to the sea imagin'd two hundred north-west, where I will suppose there is an open sea, though the contrary is known. Now have I run one thousand one hundred leagues, and in fixty two degrees.

And if we will know the dittance from thence to the Molucco's, or where we have now a trade, this rule will lead us, (viz.) to measure with the meridian line from the the entrance of the Streight, lying in fixty two degrees, due fouth, to the heighth of twenty three and a half, which is the latitude of cape California; then measure the diffance from this meridian to the cape of California, and from thence to the cape Mendacina, which is the furthermost known part of America, and after to the Molucco's,

But suppose, upon the opening of the sea to the northward, the land proves, as is describ'd in most globes and maps, (viz.) all land, and no sea, then are you to run due west in fixty two degrees, as aforestaid; or as the land shall lie, so many leagues, as you shall measure by the former rule, (viz.) from the faid meridian line to the cape Mendachia, which, considering the distance and distance are the rule.

Or if, being in fixty two degrees, we find a paffage to run fouth-weft, and to fall into the Soulb Sea, about the heighth of cape California, it is great odds, that ftreight will not always run deep, by example of the Red Sea and Perfian Gulpb; both which want no breadth, though very fhallow; and if this should prove deep and broad, yea, though the narrowest place be but one league over, we may have the honour to discover it; but any other nation shall reap as great benefit by it as ourselves, if we cannot make it good and fortify it on both sides.

Let us reckon how many leagues we shall run before we come to the Molucco's by the course into the South Sea: Allow we be in fixty two degrees, and nine hundred leagues from England; and that our entrance into the South Sea be in twenty three degrees fouth-west; then have we raised thirty nine degrees, which in a fouth-west course amounts to nine hundred and seventy five leagues; and from that heighth to Java the distance is certainly known, by the navigation of Mr. Cavendish, the pilot of whose ship, and many other principal men, are yet living, and have annexed the diftance of places, the days of failing, and their abode in every harbour where they arrived, to the Discourse of the Voyage about the World; as thus:

From cape California, in twenty three degrees and a half, to the islands of Ladrones, they note one thousand five hundred and fifty leagues; from the Ladrones to the Phillipines three hundred and twenty; from the Phillipines to Java Major five hundred and twenty five: fo that by this computation, which cannot be disproved, it amounts to four thousand five hundred and seventy two leagues betwixt England and Java, by a passage into the South Sea; and reckoning from Java to England the common way, by observation of the said pilot, it is but four thousand five hundred leagues, (viz.) from Java to the cape of Good Hope one thousand eight hundred leagues; from

VOL. III.

thence to Flores one thousand two hundred; from Flores to England four hundred and fifty; so that we find by demonstration, that it is further by four hundred and forty five leagues, by a passage into the South Sea, than by the known way of the cape of Good Hope, which is daily frequented.

But it may be faid, by the north-west passage we shall have the trade of Japan and China; which will more avail us than the trade of the Molucco's, and the East-Indies, because they are many leagues nearer. If the passage be sound, I consess there is something gained in the distance, but nothing in the navigation, allowing that this passage falls into the South Sea 3 as if it does not, little good is like to ensue of it, because of the hazard of cold, of ice, and of unknown seas, which experience must teach us.

But to disprove the opinion of such as are erroneously carry'd away with the conceit that the Streights are like to fall into the South Sea; about the cape of California, this that follows shall give an infallible satisfaction, by proof that has been made upon that coast to the westermost part of all America, both from Mexico within the land, and from Acapulco, and the port of Navidad by sea.

Ferdinand Cortes, who was captain general of this new-conquered country of New Spain, and Anthony Mendofa, at that time viceroy of it, the one hating the other mortally, as is the custom where two such commanders have fuch equal authority; yet they both preferred the fervice of their mafter before their own spleen and revenge, and jointly undertook a discovery of Quivira, and the westermost parts of America, being made believe it abounded in riches, and had a trade from China, and other parts of Asia. They employ'd in this journey one Francis Vasques de Caranaca, who arrived there by land with a number of Spaniards, both horse and foot; in which journey they endured greater famine and other extremities, than all the rest of the Spaniards undertakings in the continent of America.

Some of those Spaniards, though not many, returned by land to Mexico; from whence they departed, and reported the calamities and extremities they suffered. By this I collect, and by my collection will frame my unanswerable argument, to give the world fatisfaction, that from Mexico to the westermost part of America, in which space, if there be a passage, it must fall into the South Sea, in all their journey they sound neither sea, streight, or other impediment, to hinder or stop their journey by land, but that they went and arrived at Sibola and Quivira; from whence they return'd, which they could not have done if there had been

a stoppage by water, either fresh or falt; hope, and the greatest calamity or misery neither did they carry any provision of boats, or other means to transport men or horse.

But for better fatisfaction to this point, I will lay open a later proof, known to divers Englishmen yet living, that were with Mr. Cavendish in his glorious voyage about the world in 1586. After he had paffed the Streights of Magellan, and the coafts of Chile, Peru, New Spain, he came to California, where he took his rich prize of feven hundred tons of China filks, coming from the Philippine islands, bound for the port of Navidad in New Spain: this fhip had in her one hundred and ninety paffengers; and after he had laden his own thips with her merchandize, he burnt both thip and goods, not being able to carry her with him; and for the men he put afhore at cape California; from whence they travelled by land as far as to the port of Navidad, whither they were bound by fea.

In their way they passed many Indian countries, not commonly known to the Spaniards before; in all which travel they found no interruption by ftreight, river, or other let of water, fresh or falt: and for the proof of their fafe arrival at the port of Navidad aforefaid, besides the relation I have feen of it, it happened that many years after, a pilot of the faid prize taken by Mr. Cavendish, and a Greek by nation, returning into his country, after twenty years spent abroad, happened into the company of one Mr. Lock an Englishman, in Itely, with whom he grew acquainted, and related to him all the particulars of his voyage, as well what happened by fea as by land, after Mr. Cavendift's putting them afhore. But leaving this argument, I will proceed farther.

Allow that we be in twenty three degrees, and in the South Sea, and direct our course to the islands of Japan, we are to run one thousand fix hundred leagues a westerly courfe (viz.) to cape Mendacina seven hundred leagues, and from thence to Japan nine hundred, by the reckoning of Francis Gall, who was a perfect pilot, and had often failed it; fo that by this course we shall run three thousand four hundred and seventy five leagues from England to Japan.

To prove that nothing is gain'd by this navigation, I will allow we are at Japan, and refolve upon our return for England the fame way we went: we must so cast our voyage, as to be fure of a fufficient time for our paffage through the Streights in fummer, otherwise we must resolve to be frozen or starved by the way; and what a hazard we shall run, if winds cross us, our masts break, our ships spring a leak, the fails split, men fail by fickness, I say, if any of these accidents happen, we are left destitute of all help or

that ever befel men will light upon us; for there is no death comparable to hunger and cold: and to flew how unlikely it is for us to return in one, or fearcely in two fummers, let us examine the winds and feafons.

The Spaniards that come from the Philippines to New Spain, stand over to the main land of America, and coast the shore, finding the winds all eafterly at fea, infomuch that they are returning eight months, which they are going in ten weeks; and this is the rather approved by Mr. Cavendiff's failing from cape California to the Philippines, who never found the wind from betwixt the east and north-east, from the 10th of November to the 15th of January, in which time he failed two thousand three hundred leagues.

So that although we shall arrive with a fair wind at Japan, yet, confidering we shall find it against us in our return, we shall fooner by one third part, and with lefs hazard and danger, come home by the cape of Good Hope, than through the South Sea,

Let me now appeal to the opinion of any mariner, whether it were not better for a man to fail fix thousand leagues in a certain and known navigation, where the winds not feafons never fail, than three thousand in an uncertain fea, as we shall find to the northward, where the winds are variable, and the climate unnatural, except it be in the South Sea, which I have shewn the inconve-

The delay of voyages is commonly when the factor is not ready to lay his goods aboard; for there may be time loft in feeking fuch commodities as his merchant writes for, for a convenient time and feafon to thip it; fome want or difability in the ship or company, arrest or stay by the prince where they are, or many other cafualties not thought upon; but when a thip departs from any harbour to far off as the East Indies, and feeks to recover the place whither she is bound, it cannot be any great hindrance to the merchant to lofe a month's time in coming home, but the rather profitable, as I will demonstrate by

one of those voyages. For if by the north-west there be so quick a paffage, and fo fhort a way to go and come as is defired, I fay, the trade in few years will be overlaid; for as it is now by the cape of Good Hope, fince we and the Hollanders have had traffick in the East-Indies, pepper is bought from 2 d. to 4 d. there, and when it increases in price where it fhould leffen, and falls where it should increase, what think you in time this voyage will come to, if followed, either the one way or the other?

there be fo a way to go the trade in or as it is now ce we and the the East-In-2 d. to 4 d. in price where ere it should time this voyed, either the commodities they bring from thence. I fee not but this country may live as well without fpices, as our forefathers have done; neither are they to be had in truck of our home commodities, as cloth, lead, and tin; but if the merchant make gain by this trade, the chiefest stock he imploys must be in filver, which has, and will, in time, make fuch a dearth of money in England, as all men in general will rue it : and as I have faid before, we shall have the less money, and the great quantity of those needless commodities, if the navigation should prove fhort and eafy.

If a man will speak truly and indifferently of the trade of the East Indies, it is not fo fit for any king or prince, as the king of Spain, who has other Indies to supply the filver that goes out of his country; then what hope have we to perfevere in that voyage, who have no mines or means by traffick to bring money into this kingdom? For this take for an infallible argument, That country which receives more commodities than it vends, the overplus must of necessity be of money: and by reason of our wasteful expence, in fuch needless and superfluous things, as filks, lawns, fpices, wine, tobacco, fugar, and a hundred fuch vanities; we must confess there comes in much more of these commodities, than goes out of the realm in truck for them: and then let us confider the benefit of this trade, and how long it is like to continue good, for the benefit and profit of this kingdom.

The mischief that is befallen us, by exhaufting our filver was forefeen long fince by Charles V. emperor; who, beholding the greedy gain of the Portuguese, in their trade to the Indies, was wont to say, "They " were enemies to christendom, by car-" rying their treasure from Europe toenrich " the heathens."

But now to proceed to what I conceive of Hudson's last voyage: I find we are hopelefs of any good by the South Streights where he winter'd, because of the shallowness of the water in fifty two degrees; or if it had run as far as to have brought him into an open fea, yet it was a great error in Hudfon, to bid his company welcome into the South Sea, upon that Streight, tending to the fouthward; for if you please to measure it by a meridian line, you will find it would have brought him fearcely as far as the islands of Lucaias, which is short of the West Indies, and the land Columbus first discover'd.

I verily believe the favage Hudson met withal, had been acquainted with trade; first, by adventuring so near the ships and men, the fight whereof would have daunted him, if he had not feen the like before. Second-

Let us likewife confider what needlefs brought with him three deer-skins, which he would not truck for a hatchet, effeeming them of better value; this shews he knew the price of the hatchet, and knew as well how to rate his hides: and thirdly, by the iron of his dart, which manifeftly shewed, he used to trade with christians.

But if it be true, which is told me, that fome did imagine the iron came from Japan, and that those of Japan traded with them people, ; the conceit is strange to me, that any man should believe that Japan lying so far thence as it is, should have trade with a people and country that affords nothing, no, not fo much as victuals.

If the Japonese came to discover, they faw themselves out of hope to pass that way, by example of our men; fo that it is like, that if they had been there once, they would not have come twice; and therefore little fign of a trade: or if they came to discover, it is likely they hop'd to find a fea, as well as land; and then I fee not, but they might as well come to us, as we defire to go to them.

But whofoever will understand reason, need not go fo far as Japan for it; for it is most apparent, considering the height, the diftance from the ocean fea, from hence, and from Canada, where the French yearly trade, it is like this fellow had trade with the French; and I am of opinion that Canada is but one hundred and fifty miles from this place; and I further believe, That the relation the French give of a fea they have feen west in those countries, is no other than this Streight, or what elfe you will call it, that Hudfon discovered.

Having shewed the small probability of a paffage, and confuted fuch mens reasons as have pretended to have passed it, having alledged fome arguments, that we should have gained little time, though it were discovered either north or fouth; and thirdly, what profit shall we reap by it, though it were found? especially confidering we shall have no more privilege than any other nation, except it prove narrow, for us to strengthen and fortify?

Now laftly will I fet down a project, how to undertake a difcovery with finall charge; and either find it, or be out shope of it, in little more than two years.

Befides the charge and endeavour that is to be used in this voyage of discovery, I will perfuade, though it be with fome cost to the adventurers, That either a pilot be procured from Spain, that hath failed from the Philippines to New Spain, who I think is better able to give a light of this voyage, than by experience we shall attain to in ma-

ny years: Or if there be a difficulty to get fuch a ly, that whereas at his first coming, he pilot, yet that he may be conferred with,

BOOK IV.

by fome of good understanding in cos-mography; for, no doubt, failing along the shore, as they do in that navigation, he can be able to fay, whether it be likely that any great river or streight can give hope of a paffage that falls into the South Sea; or, at least, he is able to tell the distance from China to the main land of America; and whether the current fets from the north, or no, as Francis Gall describes; and he is able to tell the breadth of the main land of America, from cape Mendacina to New Spain, if you doubt of Francis Gall's report; and this will I wish to be done, before undertaking another voyage; for certainly it will give great hope or difpair to our difcovery.

I know it is conceived by the Spaniards in those parts of the world, that there is a fea to the northward that divides Alia from Africk; but if it be true, (as I think no less,) the entrance of it must be farther northward than yet we have discovered; and I am of opinion, we must bring the most northern part of all America foutherly, before we run west; or as the land shall bear; and then finding no ice on the starbord side, we may be bold to fay, we have entred into an open sea; for it stands against sense or reason, that any Streights should run deep or narrow, as it must do, if we profit by it, whether it run west, north, or south, so many leagues as the breadth of America, if America be truly described; as that we shall know by the conference with the pilot of the Phillipines.

But now to proceed upon the north-west discovery; The men that go that voyage, must be such as trade into Iceland; for they are best able to endure the cold, and most acquainted with the northern cli-

Three vessels are enough to undertake it; the one of two hundred tons, the other of fifty tons apiece. The ship is to carry such provisions for wintering, as shall be thought necessary, with a furplus of victuals to be put into the barks at the departure of the ship from them.

This ship may, if they see a convenient place, make her voyage upon the coast with fishing; if not, she may put round for New-foundland, and buy her lading of fish, which being carry'd into the Streights, will make a profitable return, towards the charge of the difcovery

The two barks must be strong and short, because of their aptness to stay and tack, if the come into a narrow Streight, shoal water, or amongst ice.

The captains must be skilful mariners, and good cosmographers, men of good reputation, and of great resolution, for their credits to perform fuch a voyage; and

for their carriage, not to be daunted at any

Their commission must give them liberty to punish with death, if mutinies or diforders arise; but above all, nothing must be wanting that can be thought of for a two years voyage in a northern climate.

The mafters must take an oath, to use their best endeavours to advance the voyage, and to keep fecret the journal: the plats and cards, and all other writings that concern their navigation, must be taken from them at their coming home, and fealed up to present to his majesty.

There are many other cares to be committed to the captains and masters; as their mutual agreement; their husbanding of victuals; their drawing the proportion of every cape; the depth and distance from place to place; the observation of winds, times, and feafons; the variation of the compais, and care in keeping company; and to appoint a place of meeting, if they lose one another, hailing each one both morning and evening; what to do in fogs; to take possession of such countries as they come to for the king, and leaving fome figns of their being there for who foever shall come after. Many other things are to be thought on before their going from home, too tedious to fet down.

If the two barks shall arrive in a place where a river or streight does open two ways, they are to part company, and each of them to proceed upon their discovery, as they shall agree upon, (with this direction,) That upon either of their returns, they appoint a certain place on shore, where to leave their letters wrapped up in a box of lead; and in those letters to make relation of their fuccess, from their departure from one another.

There must be great providence to preferve their men in health, and from danger of their enemy; not to believe the allurement of favages, but when they ftand upon their own guard; and if they be forced to use violence, to have a special care that the first piece they shoot, be fure to kill or hurt; for fo shall the savages be more terrify'd, when they find the pieces kill as well as make a noise.

But leaving the discovery of the northwest passage to the care, wisdom, and discretion of the undertakers; I will deliver my conceit of a voyage, which hitherto no man hath written of, much less attempted; and that is, due north under the pole. One reason that induces me to it, is the nearness to China, Japan, and the East Indies, if there be a passage; for by computation, it cannot be above fifteen hundred leagues from England to Quinsay.

f the northin, and difwill deliver hitherto no sattempted; e pole. One is the near-Eaft Indies, omputation, fred leagues My other reason is grounded upon an error of the philosophers; who conceived it was unhabitable under the line, which experience has taught us to the contrary: the like opinion they held of the pole; and we know they have no more reason for the one than for the other. And seeing the adventure cannot be great or dangerous for the undertakers, I would wish men to be as forward and willing to venture therein, as they are now in this to the north-west; for the proof is alike for any thing that is done as yet.

My third motive is grounded upon that which makes the impediment of the northwest passage; which is ice; and that I least fear or doubt of, for the reasons sol-

lowing.

The abundance of ice which floats in the fea, and hinders the north-west passage, is not the ice of the sea; for the great salt sea cannot freeze; but it is the ice frozen in fresh rivers and sounds, which, at the breaking up of the year, is driven out of the same harbours into the sea; which shews there is more land upon the coast of Labrado, than towards the north pole; for

Thips have failed one hundred leagues to the northward of the north cape of Norway, and fixty feven degrees, and have found no ice; whereas, if there had been land in that courfe, or to the northward of it, they would have found the ice, by the reafons aforefaid.

And whereas cold may be alledged for an impediment upon this difcovery, we find by proof, and not without reafon, that it is hotter to the northward in fummer, than nearer the fun, because of the reslection of it, that gives a light and a heat for one half of the year: it is to be compared to a continual easy and gentle fire, which will cast a greater heat, and of a longer continuance, than a violent slame that is soon quenched.

And because all discoveries before spoken of, and that hereafter are to be attempted, have been, and must be, by the pains, labour, and industry of mariners, I think it not amis to fet down what I was defired by Mr. Wright, the great mathematician, to write to encourage and further a certain stipend for the maintenance of navigation, for seamens better instruction.

The Conveniency of a Lecture of Navigation.

HELD it not amiss to insert so much as I was desired to write, concerning the necessity of having a publick lecture read, for the instructing of mariners and scafaring men of this kingdom; which is as solloweth.

If I fhould go about to prove, how much more fit it is for England to maintain navigation than any other country that lies upon the continent, I should do no more than many worthier persons have hitherto undertaken, or that men in common reason should conceive; for England is an island, and therefore bound to maintain shipping for desence of itself, offence to other nations, and inriching the commonwealth with trade; for neither can any man enter into peaceable or warlike sort, or we our selves pass forth of the kingdom, without the help of shipping.

And yet are ships alone no more available, without men to conduct them, than weapons without hands to fight. Seeing therefore that ships and feafaring men are unseparable, the one of no use without the other, we must have as great care to bring up men, and make them skilful in that art of navigation, as to maintain shipping for the good of the commonwealth.

But, with pity I fpeak it, we have not respected the instructing our mariners; and no marvel that we have sustained so great a Vol. III. lofs by fhipwreck; for no more than our feamen get by bare experience, they never endeavour themfelves to knowledge: and I judge the reason is, because they have no means to attain it; otherwise I think they would be as willing to know their errors, as it were fit they should be taught.

The help they received in these later times, was by mens writings, which I hold not so prostable as what they shall hear delivered by mouth; for the ordinary mariners are oftentimes ignorant of what they shall read, as not understanding either word or sense; and when they shall have it demonstrated to them, and the hard words and meaning made plain, they will both conceive what they hear, and be able to put in practice when they understand it.

Another discommodity they shall find by writing, is, That the secrets of the art will be published to the world, and other nations are likely to make as great use and benefit of it, as we ourselves: and therefore, as we ought to strive to exceed other men in navigation, in respect I have shewed it imports our country so much, so ought we to keep it secret, according to the example of Spain, which seeks to conceal divers rivers, and other places in the Indies, from us, which they know by discovery might breed them inconveniencies, and benefit us.

It is a question, Whether a man shall attain to better knowledge by experience or learning? and many times you have controverfies arise, betwixt a scholar and mariner upon that point.

The scholar accounts the other no better than a brute beaft, that has no learning but bare experience to maintain the art he professes: the mariner accounts the scholar only verbal, and that he is more able to

fpeak, than act.

I confess this is great arrogancy in both, to stand so obstinately upon themselves, when they ought in reason one to affift the other; but especially the mariner is to receive comfort from the icholar; for he that has but bare experience, receives what he has by tradition, for learning is the original ground of all arts; but he that has experience joined with learning, it makes that man excellent in the art he professeth. What made Abraham Kendall and Mr. John Davies fo famous for navigation, but their learning, which was confirmed by experience?

If we had but a lecture of navigation read, which seamen might resort to, they would foon reform their spightful humours, and confess how needful it is, that learning fhould be added to experience. And this lecture, no doubt, in a little time will make men as famous as either Kendall or Davies, to the honour and benefit of the common-

Men of learning were able to give great light for the finding out the longitude, and for the discovery of new lands or passages, which experience must beat out, when they have their grounds from learned men.

Every man in travel or journeying defires to find the nearest and easiest way, for his rest and gain of time, to come to his journey's end: and so ought the mariner much the more; for the fea is tedious, and more difficult than the land. The land is firm and fledfaft; the fea wavering and moveable: the land is known and determined by marks, figns, and limits; the fea is vaft, and no marks to knov it: the land has hills, mountains, and rocks; the fea has ftorms, tempefts, great difficulties and dangers, and therefore the more need of help to avoid the fearful perils, and unlooked-for accidents man is fure to meet withal in the wide and spacious sea.

I am of opinion, there is no error the mariner finds at fea, either in card, ftar, inftrument, or compass, but upon his information may be reduced by the skilful mathematician, and made perfect, if not fuddenly, time may work it, by following fuch inftructions as shall be prescribed by

It is flrange to fee our errors, that we prefer idle and frivolous thudies that bring no profit, as namely, there are lectures of logick, rhetorick, and mutick, allowed, and the readers of them have a competent maintenance for the fame; none of which fludies can be in election to bring the twentieth part of benefit to the commonwealth that this is like to do, if it be well

But I speak not, that I would have this lecture only erected, and the rest suppressed; for learning must be nourished in all commonwealths, being the ground from whence government is derived; and for my own part, I will rather wish a larger contribution for the maintenance of the reit, than a diminishing of what they have.

I am partly of opinion of our Mathematicians, that hold there is no certainty in the art of navigation in our ordinary masters that take charge; for if there were, they would not fo much vary one from another, as usually they do: for proof whereof, let there be four or five mafters or pilots in one ship that goes or comes from England to the Tercera's, if they be any time in traves at fea, you shall have some of them thirty leagues before the ship, and others as many

leagues behind the thip.

Imagine by this what danger every thin is in that goes from England, and comes home again, which, to men of understanding, is a wonder that more ships do not miscarry, considering the danger of our coast: It is not art, but fear and care, that preferves them; for if they fhould prefume upon their art to bear in with any land, the rocks would devour ten times more ships than they do: but the mafters having io provident a care, and fo great a mistruit in their own art, that though they observe the fun and stars never fo exactly, they will not prefume to bear in with the land which they have not made, except the coast be clear, and the wind large to claw it off

But if this art can be made perfect, and the errors corrected and reduced to a certainty by the painful fludy of the learned, it will prove a happy thing to all feamen, and by confequence to the whole common-

The only means of help that is to be expected or hoped for reformation of these ancient abfurdities, which the mariner by all his wit and skill cannot correct, must be by a publick lecture allowed to be read, and competent means collected and gather'd for the fame: for if the hearers of a lecture of the liberal fciences receive profit by hearing it read, you must confess they will receive much greater profit from this, being well taught.

For befides the common good we shall receive by this lecture, it will concern gentlemen to study it, who seeing the pleafure, and the necessity of it, will make them forward in actions by sea, which will be a great strength and stay to the kingdom; for it is requisite that gentlemen should have an insight into sea affairs; seeing they are commonly employ'd in his majesty's ships in time of service.

It is well known to other nations as to us, that *England* of late years has undertaken greater enterprizes, and atchiev'd greater

victories by fea, than ever any of our forefathers have done. And that these famous memoirs of ours may remain to posterity, it is fit that gentlemen who live in this age, but especially such as have been actors in expeditions themselves, should contribute towards the maintenance of a lecture of navigation; which act of theirs will remain for a monument to those that are the sounders of it: so shall they deserve well of succeeding ages, and their noble deeds will ever live fresh in memory of those that shall come after them.

A Comparison betwixt our ancient and known Trades, and those now in being, since the late Discovery of New Worlds; with something relating to the Hollanders and Fishing, Particulars being reserved to the Sixth Book.

WOULD have our hopeful fifhing, now intended, compared and parallel'd with fuch actions of ours, as of late years have been atchieved with everlaiting honour and renown to our nation, as shall appear by that which follows, as well in the discovery of unknown countries, as in new plantations, and other fought trades, not heretofore known nor dream'd of by our forefathers; and yet the ambition of that mungrel and unmannerly nation of Holland feeks to lesten our praises: they cannot really challenge any thing of themselves, but that we gave them light of; as shall appear in the fixth book following.

I confess that fuch English as have been the actors, authors, and abettors of our brave enterprizes, have obliged the whole commonwealth to them; first, by the adventure of their lives, to seek out the secrets of commerce. Secondly, by the expense of their estates, till they brought it to perfection. And, lastly, by their labour, pains, and endeavour, to advance our navigation to that it was in former times; and yet if all these be examined and compared to our fishing, it will come short to the happiness our kingdom will reap by it.

If we enter into the original of our English trafficks, and the continuance of them, till the discovery of new countries, that gave us a greater scope to fearch out the bowels of the earth, you would think it strange our nation could flourish in so high a measure as it did, in comparison of the present times: for I find, that in failing to the southward, we exceed not the bounds of the grand Canaries, which voyage in former times was held a greater wonder and stranger than now about the world: neither was the art of navigation so common, or so perfectly known, till of late years, that by our travels we have attained to it; for I re-

member my felf the ignorance of a prime mafter, who, going to the *Canaries*, returned home without freing any of the feven islands, for want of skill to direct him.

And to prove what I have faid, That our traffick to the Canaries firetches no further to the fouth, this following shall clear the doubt, (viz.) That upon all treaties with Spain, since the discovery of the Indies, we were not prohibited by name the trade of the Indies; only we are tied to our antient and accustomed trafficks with Spain, which we cannot drive further to the fouthward than the grand Cavaries, nor of right by that article of peace can require it.

Our ancient and usual trades, before the new discovery, was to all the dominions and islands of the kings of Spain, of France, of Portugal, the Seventeen Provinces, the several parts of Germany, Denmark, Norway, Sweden, the Baltick Sea and Island: these were the limits and bounds of our English commerce, before the latter end of Henry VII. when we came acquainted with America, Africk and Asia.

It is marvellous if we confider what England is now, to that it was in former ages; what wealth is returned into this kingdom, in refpect of times paft; what increase is made of his majesty's rents and revenues, in comparison of his progenitors; what an increase there is of ships in number and goodness; what dread and fear all other nations apprehend of our greatness by sea; and what rumours are spread abroad in all the quarters of the world to make us famous. It is admirable if we call these things to mind.

And to come to the particulars of augmentation of our trades, of our plantations, and of our discoveries, because every man shall have his due therein, I will be-

gin with Newfoundland, lying upon the main continent of America, which the king of Spain challenges as first discoverer; but as we acknowledge the king of Spain the first light of the west and south-west parts of America, fo we and all the world must confess, that we were the first that took possession for the crown of England of the north part thereof, and not above two years difference betwixt the one and the

And as the Spaniards have from that day and year held their possession in the west, so have we done the like in the north; and though there is no respect, in comparison of the wealth, betwixt the countries, yet England may boaft, that the discovery, from the year aforefaid, to this very day, hath afforded the subjects annually one hundred and twenty thousand pounds, and increafed the number of many a good ship and mariners, as our western parts can witness by their fishing in Newfoundland.

Neither can Spain challenge a more natural right than we to its discovery; for in that case we are both alike: if we deal truly with others, and not deprive them of their right, it is Italy that must affine the discovery to itself, as well in the one part of America, as in the other.

Genoa, and Christopher Columbus by name, must carry away the praise of it from Spain; for Spain had not that voyage in agitation, or thought of it till Columbus, not only proposed, but accomplished it. The like may be faid by Sebastian Cabot, a Venetian, who by his earnest intercession to Henry VII. drew him to the discovery of Newfoundland, and called it by the name of Bacallao, an Indian name for fish, for the abundance of fish he found upon that coast.

And speaking of plantations, I will begin with Newfoundland itself, which lay uninhabited, and the country unthought on to produce profit, till my lord Baltamore, and some merchants of Bristol undertook it. It may be they were the rather drawn to it by the plenty of fish, not once doubting of the foil, because they had no proof of the winters habitation; and they might think that a fresh and green shew of a hopeful summer to the eye, fuch as England yields, would fend forth the like winter, and the like effect in winter; but by trial it failed, and proved a chargeable adventure, and the decay of my lord's estate. He returned for England, where once more he resolved to try his fortunes in a new plantation in Florida; but in the mean time, and in the year 1632. he died.

Let not this colony of Newfoundland eclipse my lord's judgment, or the adven-turers with him. The chiefest exceptions and the like might have been faid of England, upon the first plantation of it; for they lie both in one parallel. Newfoundland affords in view plenty of wood, grafs, water, and other hopes of commodities, till time and experience gave light to the contrary; and at the first, therefore, not to be difproved, till a winter had made known the condition of the foil.

They had another help to their plantation, in that they were in no danger of favage enemies, which all English colonies are fubject to, and have tafted the mischief of; but, above the rest, if the land had proved fuitable to their hopes, and worthy of inhabiting, they might have planted and fupplied it, at less than half the charge and expence of other colonies where the English are seated; for that there refort yearly one hundred and fifty thips to the fishing in Newfoundland, which ships go not half freighted, and not above fifteen or fixteen days failing with a reasonable wind, that would be glad at a fmall rate to carry any provisions for the advancement of the plantation.

And feeing I have begun with America, I will take it in my way, not having relation to the years of the first plantation, but the neighbourhood to one another, and to the places where they are feated: and the next, according to the latitude, is New England, whose sea affords excellent and choice fish; whither divers ships of England yearly refort, to take and disperse it into feveral countries in Europe: the land, by mens endeavours, will be made to produce fundry commodities, as a book that is published can witness; but for want of time, for yet it is but a child, and larely born and inhabited, little can be faid of it, more than a miftrust of the good success thereof, through the numerous and irreligious people that poffess it, being refractory to the churchgovernment of England. From thence running fouth, we arrive at Virginia, a place evil chosen for feat, foil, air, or any thing else to give encouragement for a plantation; yet feeing it was begun, and that the undertakers would not feem unconstant, to change their first resolutions, they have fince 1602. continued a footing in it, with costly adventure, though hitherto it produced little more than tobacco. But this nothing leffens the worthinefs of the undertakers, whose end is the general good of the commonwealth.

Not far from thence, to the fouthward of it, in the year 1585. a colony was fent to fettle in Norambega, by the procurement of Sir Walter Rawleigh, a man much favoured and graced by the queen in those days; and the man chosen for the conducagainst it, is the coldness of the climate, tion of his ships thither, was Sir Richard

Greenville, who upon his arrival was to leave the government to Mr. Ralph Lane; and though the fituation, the climate, and the natural foil, and the proof of the commodities the country yields, was able to give encouragement for the profecution of it, yet for want of means, and willing minds, which is the bane of all undertakings, it failed, and produced nothing but tobacco, which has brought a greater mifchief to this kingdom than the profit would have countervailed, though it had proved furcefail.

Later than all these, and, indeed, which is now in the infancy, is a plantation in Florida, and near to an ancient colony of the French, who through ill government were in the end forced to quit it. He that can judge of things must confess, That of all other plantations, this gives the greatest hope and comfort, by proof that hath been made of it, and the temper, and the heighth it lieth in, if it be carefully followed, and fufficiently supplied. One danger must be eschewed, which other nations have found the fmart of; which is the untamedness of the wild Indians, who are cruel to themselves, and worse to strangers, as both the French and Spaniards have taffed. God fend them fortune that live there, to their defires, fo they make not . England still unfortunate with tobacco.

Eaft-north-eaft from Florida lies the island of Bermudas, inhabited and peopled by our nation; whose extent can yield no greater profit than the circuit of the ground can promise, being but thirty miles in compass; by means whereof the planters are forced to till and manure their grounds in that excessive manner, that in a little time it will not be able to sustain their people, but force them to find another habitation; which will move the less piry, because they seek only to plant for tobacco, a thing so notione and loathsome to this kingdom.

This island at the beginning was discovered by the Portuguese nation, and inhabited by them, till they found little profit accrued from it, and then they abandoned it, and left behind them fuch food, especially hogs, as they could not carry with them; and thus it lay waste for many years, with a general opinion to be inhabited with fpirits, which made all men fhun the fight of it at their return out of the Indies: though this error was eafily falved; for I knew, above fifty years fince, one captain Ruffel, a Frenchman, shipwrecked upon that island; and with great industry of his people, for few of his men were loft, they patched up a boat out of the materials of the perished ship, that carry'd them to Newfoundland, where they found relief and pailage into their own country.

Vol. III.

I knew likewife in the year 1592, another French ship wrecked upon the same island, in which an Englishman, one Henry May, was passenger, he having belonged to one of the ships captain Ryman had, when he was drowned returning from the Indies. This May, and some sew men of this French ship were preserved, and made shift, as the others did, to get to Newfoundland.

This plantation of Bermudas was not purpofely undertaken by us, but accidentally fallen upon by the like shipwreck in Sir Thomas Gates and Sir George Summers's passage to Virginia, whither they were bound; and being delighted with the pleasures of that island, which was so well stored with hogs, they seated their colony remaining in it; since then they sound a reasonable quantity of amber-grease floating out of the sea; and not without reason; for the coast of Florida, oppose to it, abounds in amber-grease.

The next, and more to the westward from thence, are the islands of Barbadoes and N. Christopher's; and whereas the Canary Islands were formerly called the Fortunate Islands, so would we have these islands called the contrary, (viz.) the Unfortunate Islands, in that they produce nothing but stinking tobacco; which, if we judge withly, discovers the michief it does: but it has such a bewitching power over the takers, that all the ill which comes of it, they interpret as good to their bodies, and have no more power to leave it, than drunkards when they are muzzled in it.

The next, and upon the next continent is Guiana, and the river of Amazons, where there have been many colonies fettled by our nation in that spacious country; yet I could never hear of any commodities that rose by it, or not so much in value, as two miles of ground in England would afford; and yet I must rightly say of that evil to-bacco, this plantation sends the best, if the ftrength of tobacco be fo accounted. The benefit of this plantation is, That the favages are more civil and tractable than in other parts of America; and that the climate and foil gives hope of good to come of it: but where the Dutch have had footing, and quitted it, takes away my belief of it.

Further to the fouthward of this coaft the English never fate down with a refolution to plant; and yet there are many ships that have made fundry voyages, some to trade, others with letters of reprifal, as well upon the coast of Brasil, as through the Streights of Magellan, who have after coasted to Chile, Peru, Panama, News Spain, and cape California, and took their leave of America, and the westermost

I

cape Mendosina, the farthest land discover'd.

Our Trade to Africk and Afia.

The next addition of our new trade, is upon the continent of Africk, as far fouth as the cape of $Good\ Hope$, and then eafter the teap of Guardafu/a, which is the fea circuit of Africk, from thence we will pass over to Afia, till we arrive at the $Molneco\ Iflands$, and the continent of Cbina, to all which places we are now no strangers, by our late and large navigation.

The first country and the nighest to us, where we settled a new trade, not frequented by our forefathers, was Barbary, under the king thereof, called Mulley Abaleck, in 1577. who gave the English large and fair conditions, as appears by the privileges exant; and from that year to this very day we have enjoy'd the same; and so prevail'd with succeeding kings, that we have beaten the Portugusse out of that trade, who at first laboured to do the like to us.

In our time of wars with Spain, our ships of reprifal have received great comfort and relief of the two ports or roads in Barbary, which, upon necessity of victuals, water, and other wants, they have fur ply'd us withal, and taken from us fuch goods, by way of traffick, as we have made fale of; but with that craft, fubtilty, and danger of betraying us, that he who knows them well, would no further trust them, then necessity would compel him. The Barbarians had so much honour and civil honefly, that if a Spaniard and Englishman were in their ports together, they would forbid the meddling with one another, being enemies; fo great a regard they had to the king's royalty: as otherwise, if they were never so little way off at fea, and one of them taken by the other, if he that took, would bring her taken into the port again, they would hold her prize to him, and give money for her.

I'remember the like case in my self, Anno 1587, that coming into the road of Sallee, I found a ship of Catalonia, a subject to the king of Spain, there trading; and the English merchants on shore searing I would make an attempt upon her, befought me not to offer violence in harbour upon her, affuring me, if I did, the king would take occasion to consistate all the English goods in his country, and to imprison, and, perhaps, put to death the merchants: whereupon I forbore to attempt

The western parts of Barbary have two open roads, Sasin and Santa Cruz; out of which the ships that ride there put to sea, when they find, by the bellow of it, the

wind likely to endanger them with a wefterly gale.

Our English ships riding there have often been forced to put to sea, for their fasety; and many times before their return they have met and taken several Spanish prizes; which have been more beneficial to them, than their merchantable voyage has proved.

And to conclude with the trade of Bar-bary, I must say, That though the English in time of war have often brought the sub-jects of the king of Spain prisoners into the ports, and though the Moors did more value buying the men than merchandize, yet how leud soever the Englishmen were, or what necessity soever they were driven to, it was never known they made sale of one christian.

The next bordering country to Barbary, is Guinea; unhealthy, through extrerrity of heat, and infection of the air, for which there are many reasons alledged, and antidotes invented to avoid the contagion thereof: but all in vain; for the putrilaction of the air is occasioned by the huge and montrous beafts that country abounds in, which when they die, by reason of the excessive heat, cast such an intolerable stench, that infects and putrises both air and earth, to the destruction of mankind.

The discovery of Guinea, and the sovereignty thereof, was given to Don Alonso V. king of Portugal, in 1471. which he enjoyed peaceably, and without interruption or challenge by any nation, till the year 1481. The voyage was intended by certain Englifb, and the negroes themselves as willing to accept of their neighbourhood, with offer to give them a proportion of land, there to live and inhabit; but this deligawas frustrated, and proceeded not, at the instance and request of the king of Portugal, Don John II. to Edward IV. king of Engiand. And fince that time, to this very day, a footing in Guinea was never attempted or defired; which must be conceived to be out of the unwholeformeness of the climate and the air.

But though we were not refident in Guinea, by any place in the country we possefied, yet have we continued a yearly traffick to fundry parts of that coast on this fide the equinoctial, ever fince the year 1553, till this present 1632. and many corporations and patents granted by queen Elizabeth to her subjects of Exeter, and other the western parts.

Another benefit we have made of that country, is the relief it has given us in our longer voyages, as to Brafil and the South Sea; for all thips of ours, that have passed the Streights of Megallan, found succourand

made of that iven us in our and the South at have paffed nd fuccourand refreshing at the port of Sierra Leona, where, at this day, we have a certain trade.

From the port of Senega in Guinea, we have made several attempts to discover Tombakatoo and Gago, two places within the inward parts of Africa, which afford the greatest quantity, and the purest and the best gold in the world; and from whence the king of Morocco or Barbary is surnished with all his gold, by his caravans he sends thither in great peril; for many times they are swallow'dup in an ocean of sands.

From this part of Guinea, or rather from the cape of Lopez Gonfalez, till you come to the cape of Good Hope, no christians have traded with the negroes, but the Porraguese themselves; in which course is seated Angola and Congo, which is inhabited by barnished men sent out of Portugal for offences there committed; a place of that insection, as that it is fit only for men of that condition; and from those places they surnished the West Indies and Brasil with numbers of negro slaves, who work in their mines and sugar-works.

As Sierra Leona has been a relief to our nation in our long navigation, as I have declared, fo is the bay of Saldania, within three leagues of the cape of Good Hope, a fuccour to our fitips of the Eagl Indies; for thither they refort in their going and coming from thence, though it yields no benefit but victuals and water, for which they truck with the most wild, ravenous, and irreligious negroes in the world.

From the cape of Good Hope there are two paffages or navigations to the East Indies; the one by the way the Portuguese fail, keeping the Mrick shore, on the left-hand or larboard-side; which course we likewise take with our ships that trade to Cambaya, a country subject to the great mogul; and in going there they sometimes touch at the island of Socotora, upon the mouth of the Red Sea, and where St. Thomas was shipwrecked. This island yields our merchants the best Alloes Secatrina in the world; and not far from thence it associated and the secation of Meeca could send out; which I forbear to speak of.

And of late, by that track, we have found the trade of Ormus; which island we gave the Persians affiltance to take from the Portuguese; though I do not commend that act, in joining with turks against christians.

Surat and Cambaya, in that coaft, affords us good and commodious traffick, though the Portuguese seek to impeach us: but besides the going and coming home of our ships, as also of other parts of the Indies where they remain, they are freighted, or else freight themselves, from port to

port, to their exceeding great profit and

The other navigation from the cape of Good Hope, is to the fouthward of the island of Madagascar or St. Lawrence, but not frequented by the Portuguese, but upon great necessity, when they are forced to it in great penury, not being able to recover Goa, or other part of the Indies, as in my former book I have related: but to us that resort to Bantam and the Molucco's, or other parts of the Indies thereabouts, it is far the nearer, and much the safer, for we sail in a more open sea than the Portuguese do to Goa, where they meet with many rocks and shelves.

When our ships arrive at the settled ports, there trade is certain, and their return so usual, that thereneeds no repetition thereof: but our people not being contented till they had discovered such countries and places, as same made report of, from hence they made an attempt upon the discovery of China, Japan, and the sarthest remote places of the world, being led to it by the rumour of the magnificency and wealth of them.

But it proved like many other reports, rather shadows than substance; for though the people of *China* deserve more praise than others, for excellency of arts, and ingenious inventions, yet it is far short of the wealth that is faid to be in it to our western parts of *Europe*.

This discovery hath resolv'd us of the ftate of those parts, which we so long defired to know, fince we heard the fame of them, which made queen Elizabeth often fend her letters to fuch princes as dwelt thereabouts, and devised how to convey them; and have answer of them. So defirous fhe was to understand the conditions of those parts, and imploy'd some of her own subjects by the way of the gulph of Persia, thinking to find the conveniency from out the East Indies; but still sailed by the finister practices of the Italians, who incenfed the Portugueic that they came for fpies, and caused them to be apprehended and imprisoned, where they endured great affliction before they returned into their native country.

What I have faid is sufficient to prove that our new and latter discovered trades have far exceeded our ancient and long accustomed commerces, before the year 1586, not only in value of wealth, but in distance, whither they reforted for them. And it is made apparent, that no part of Africk, America, or Asia, that any nation has traded to, but I have done the like: and that whereas in some places they have fought to impeach and restrain our trades, yet we have forced them to it, and brought

them

them to our own conditions. And this shall suffice for the southern and western parts of the world.

Our Trade to other Parts nearer to us.

Now I will once more come nearer home, and put my felf into the trade of the Streights, being more pleatant, gainful, and less dangerous or laborious, than the rest I have treated of. My first voyage shall be into the Mediterranean Sea, unworthy of the name of a fea, by reason of its threightnefs, in comparison of the great and spacious ocean.

This fea being anciently known to us, but not frequente, for these reasons: former times did not afford shipping sufficient to follow it. Secondly, fuch goods and merchandize as these countries yielded, were received from hand to hand, and we ferved by veffels of their own. Thirdly, we could not pass without great peril and danger of the turks, who furprifed and imprisoned us; whereupon the Venetians engrofied the whole trade upon those seas, and furnished us with the rich merchandize of Turky, Perfia, and India, at what rate they pleafed themselves: and yet this was not all; for they laboured to make us strangers to the Great Turk, the Egyptians, and bordering countries, and brought them to that ignorance of our nation, that they thought England to be a town in the kingdom of Lon-

The Venctians fent yearly their Argofers to Southampton; which town enjoy'd a charter from the kings of this land, which was wrested out of their hands by the earl of Leicester, to the utter decay of that town: and the Argofers fince then have become strangers in England; the last whereof took her leave with an unfortunate end, which my eyes were witness to, in the month of October, 1587

This goodly ship of one thousand one hundred tons, being richly laden with the accustomed commodities they use to serve the kingdom with; and being come as high in the channel as the Isle of Wight, which land the English pilot visibly made: this pilot, called Foster, for his excellent skill, was not long before redeemed out of the Turkish captivity by the Venetians, to serve in this voyage.

Upon this good land-fall, the pilot put the passengers in hope, many of them being of great account and effeem, the next morning to harbour them; for night growing on, he would not hazard to put in with the shore that evening; but the gentlemen being impatient of delays, and the land appearing to them, they thought themselves free from all danger, which is the common

ignorance of many that know not the feas. But to be short, they compelled the pilot by force to put in at the Needles, the we-ftermost part of the Isle of Wight. When the poor man, neither with perfuafions nor tears, could prevail, he did his best to enter the channel of the Needles; but fuch was the greatness of the waves, and the unweildiness of the ship, not answering her helm, that she struck upon the Sbingles, where she, her goods, and company, except feven poor creatures, perifhed,

The sea betwixt the island and the main land was enriched by her lofs, with feveral forts of merchandize. What was faved was not worth speaking of. I had the fortune to light on two buts of muskadine floating on the fea ; for then was I riding at Cowes, in the first ship I ever went captain of. I found these two buts of muskadine a great help to us in our voyage, when we were reduced to extremity for want of victuals.

About this time our merchants of London began to take into confideration thefe great and inestimable riches brought into the land by the Venetians and French, who absolutely enjoyed the trade of Turky; and the great part of that wealth, which came out of Perfia and India, was retailed from them to us. They devifed how fuch commodities might come to our hands by a more direct way, than to be ferved as we were at fecond-hand; and therefore zefolved to make an overture by favour of the queen, and her letters to the great turk, for an immediate traffick from England to Turkey, and his dominions, and fo home again, with fhips of her subjects, without being beholding to others.

These letters were sent by her majesty, and received with great humanity and courtefy by the grand feignior, as appears by his letters yet extent. He could not give more respect and honour to her majesty, than by shewing a willingness to embrace her gracious propolitions of trade: and in conclufion, articles were agreed on, and a grant of great privileges and immunities by her majesty's subjects, which have since continued, and been peaceably enjoyed.

We may reckon from this time the decay of the Venetian state in matters of trade; for Argosers, which were wont to visit us, are now unknown to us, and we poffers the wealth they were wont to reap. The commodities of Persia and the East Indies are brought by our felves, in our own veffels, directly out of Turky; where we have obtained as great a freedom as we can defire: fuch places as the Venetians were wont to take freight in their fhips, to transport from port to port, we now absolutely enjoy that privilege; for all strangers are more defirous toms W great and of th know by th

Whereas we were wont to be served with great part of our fpices from them, and they, by the way of the red fea, out of the Indies; now the passage is better known to us than to the Turks themselves, by the cape of Geed Hopes and instead of receiving India commodities from them, we fupply as well them as the Turks with the fame out of England. And laftly, the terfor of the Turks galleys, to impeach our trades in the Streights, is now taken away, by the privileges obtained from the grand feignior 3 and we may hold our ships in as great fecurity as themselves: and moreover we may boldly fay, we have fustained lefs loss by the pirates of Algiers than they have done; which pirates of late years have been the fcourge of the christian trade.

In our time Venice flourished in ships and galleys, above all other ports or parts of the Streights, though there were a competition betwixt them and the state of Genoa: and it is not unworthy of note, that the first use that was made of ordnance and imall fhot, after the invention of it in Europe, was in a naval bartle between the Venetians and the Ge-

This shall suffice for our southern, western, and eastern trades, or within the Streights, as high as Constantinople, Egypt, or other places, under the jurifdiction of the grand feignior. I will now return to the north, and run through its frozen climes, as I have already done through the fouth, and its parching heat.

Sebastian Cabott, a man before spoken of, having a sharp, acute, and folid brain, apply'd himself to the imitation of Columbus; who by his late and happy discoveries had enriched the world with wealth, and himself with reputation.

Cabott being carry'd that way of honour, out of a christian respect, to reduce the world to a perfect knowledge of God; or out of a hope of riches, it being the natural difease of mankind; or out of ambition, to make himself equal in same with Columbus; or out of a defire to perform what he had long thought of, which was to fail round the globe of the world; which of these was his design, I cannot say, but charitably will conceive the best.

Whatever it was, I find an extraordinary and hearty defire in him to enrich the English nation, by adventuring his life in fundry attempts, to discover what he had long before conceived upon reasonable grounds, and effect what he had fo wifely projected, as appeared by fetting afoot the northern do him honour; and for requital of his parted.

Vol. III.

travels, both in body and mind, he was chosen governor of the merchant-adventurers, for the discovery of new regions, dominions, islands, and other places unknown in the reign of king Edward VI. and a penfion affigned him.

He gave the only information and inftruction to the new-begun voyage and difcovery of Sir Hugh Willoughby in 1553. which, though it proved unhappy to Sir Hugh himself, his ship and company pe-rishing with cold in the port of Arsina in Latland, yet his third thip recovered the harbour of St. Nicholas in Ruffia, where he fettled a rich and commodious trade, profecuted to this day by the merchants incorporated, and called The Ruffia Company.

The English not thus ceasing, but as men travelling, who arrive at a port or city where they had never been, would be inquisitive to know and learn the state of the country and its neighbourhood, without resting till they had satisfied their curiofity; fo our English merchants finding the Caspian Sea famous by report, yet unknown to us, and its bounds one way upon Muscovia, they devis'd, though the journey was long, troublesome, and dangerous, to arrive at that fea, by the approbation and confent of the king of Ruffia; and from thence to make trial, whither the faid fea would conduct them.

This was no fooner conjectured than effeeted; and our merchants furnished themfelves out of England with carpenters, mariners, and other necessaries, to build a ship for fuch a voyage. This ship was twenty feven tons burden, and the first that ever wore the English colours upon those seas ; from Rusha they arrived in Persia, not once, but often, as appears by Mr. Jenkin-fon's relation. Thus was Perfia, and all the countries adjacent discovered by us; first, to the northward, as far as Russia; after to the Caspian Sea; neither of them both being known to our forefathers.

The English did not thus rest; but as they were led to those unknown seas by a kind of fate, so they supposed the same sea did not end thereabouts, but had a paffage farther to the eastward; which, perhaps, being difee ered, might lead to Japan and China; and thereupon, for the fhortening of the discovery, they sent a small ship at the fpring, that wintered at Comoro, eighty leagues from St. Nicholas, which fet fail from thence to find out the conjectured paffage: this bark used its endeavour, fo that no blame could be laid upon the mafter or the company; fhe paffed to the eastward of the Waggats, where she was indiscoveries. There wanted no thankfulness terrupted by extremity of ice and snow, in those days, either in king or country, to and forced to return from whence she de-

This

This did nothing difmay the hopeful enterprize of the merchants, but once more they made an attempt with two pinnaces directly from England; the matters whereof (Petit and Jackman) with the fame infractions of the other bark, wherein Stephen Burrows was, to find out the end of the eaftern fea; but being likewife encountered with the extremity of weather, the one returned, the other perifhed, though both of them did their parts very fufficiently.

Being now hopeless by their often repulses they found in the north-east passages, yet they would not let die what they had in agitation, for finding the Souib Sea, as the summers bonum of all other voyages; for from the fouth-west part of America, which bounds upon that sea, is sent forth the greatest quantity and mass of gold and filver the earth affords: whereupon they let this attempt to the eastward, and made trial of that to the westward; for they imagined that all great and large seas have a correspondence with one another, if it could be found.

The first man that made the enterprize, as well upon the country of Baccalass, which he found and named so, as also in his offer to look out a passage that way, was Sebastian Cabets, aforementioned; but failing of the passage, he hit upon the land; but by reason of the vehement cold at that time of the year upon that coast, he stood to the fouthward, and from thence into England, taking possession of the country for the crown of England along the coast he went.

This voyage and many more to those parts, was fet out by the city of Bristol, which to this day continues its fishing at Newfoundland: but for the discovery of the north-west passage, the man that most la-boured and waded in it, was Sir Martin Forbisher in three attempts: the first in 1576. the second in 1577. the third in 1578. After this, and in the year 1585, and 1586. Mr. John Davis undertook the discovery, but failed, as many others have fince done; which is no wonder; for he that will read a discourse of the north-west passage in this book, shall be fatisfy'd, it is a vain and hopeless thing; and so has captain Fox, that was employ'd upon it in 1631. at his return, confessed to me, for such reasons as I shew'd him before his going.

Now to come to my own observations: I am of opinion, that next to the discovery of America, and the wealth thereof, which it sends into Spain, the Spaniards have greatest cause to give God thanks, that the attempts of the north-west have failed; for thereby they enjoy the absolute benefit of the South Sea, and the incomparable wealth therein, without molestation, sear, or disturbance of any other nation; whereas if

the paffage had been known, no christian prince but would have strove to have had a part with them; and now it is in vain by any great attempt to prejudice the Spaniards. but by the Streights of Magellan, which is the only known way thither. It is as vain for any enemy to poffefs and inhabit fome of the towns there planted, in refrect of the diftance and danger to be feconded and fupplied out of Europe; And, laftly, any fuccour out of the East Indies will frustrate any expectation of good, the winds blowing continually contrary to arrive from thence. I refer the reader to what I have faid before of other discoveries that failed, and particularly to that, than which nothing can be faid more to the honour of the difcoverer Sir Francis Drake, in whose voyage about the world, may be feen what he did and attempted; and, therefore, I shall not repeat it here. But to proceed:

Comparing what I have faid of our former discoveries, our labourious plantations, and our new-found trades, with our present intended fishing, which of them will yield greatest wealth, strength, and ease, I have made appear in my fixth book; and therefore I present you that now live and are in being with it, to judge which is good and best; for though it is true what is done, deserves the name of good and immortal praise; fo that which is now in hope to be done does far surpass the former, and is to be atchieved with less difficulty, less peril, and less loss, than the others that have made our nation so worthily famous.

When the contents of the fixth book shall be maturely considered, the laborious industry of the Hollanders will plainly appear; how they have raised themselves, and their

**erected commonwealth to an equality with princes. Now shall it rest a little to distinguish of their good deeds and bad; for fortune and same gotten by craft, are commonly of no continuance, but lost with shame.

What is due to them in praise of their virtues, I will not rob them of; for I hold it a fin to belye the wicked. They are frugal in expence, the benefit whereof themfelves and country find: they are industrious, as their actions abroad and at home demonstrate; they are just in contracts, making a confcience in the little religion they have to defraud a man: they labour to find out the fecrets of lands uninhabited, and countries undifcovered; they are inventors of arts, which to their praise they enrich the world with: they are willing without excuse to contribute to any good for their state, not standing so much upon privileges or petitions of right, as to neglect any occasion of advantage to benefit the commonwealth: they are laborious and painful of grip cont expe by t excel their galit is fup beft c a pri Bu covet with mary

body, not admitting a beggar in their provinces; and willing to relieve and comfort one another in strange countries; they are enemies to the expense of law, and the griping of lawyers, and end most of their controversies by arbitration of friends; their expense in drinking is saved and mitigated by their misery in eating; for out of their excessive covetousness, they almost starve their bellies, and by their unmeasurable frugality they scarce cloath their bodies; for it is supposed, that their people, in one of their best cities, spend not in apparel the value of a prince's coat in a year.

But all these virtues are drowned with a covetous ingratitude, which has friendship with no body, but for interest; and no marvel, for popular states are no longer thankful than they receive benefits. There is nothing of fhorter life among them, than the memory of pleasures and favours past; they are so careless to give satisfaction for the evils they do, that if we demand it at their hands, it is as much as to fpeak of valour to a faint heart, or charity to a merciless man, or a courtefy to a churlish dispofition, it will prove but telling a tale to him that is affeep. The definition of philosophers in matters of friendship is as follows: A friend is long jought for, scarce to be found, and bard to keep: a friend is always ready to comfort in advertity, to belp in necessity, to bear with one's infirmity, and to reprove one's error gently.

But the Hollanders are otherwise in their friendthip: they are like an ill bird that lays an ill egg, an ill tree that bringeth forth ill fruit, or a young cub that grows crafty like his dam; they do patricise, and follow the steps of their predecessors, that make riches their heaven: and whereas it is held no hurt to know evil, but to do it, those people are very perfect artiss in their trades,

as well in doing, as in knowing evil.

But to fpeak the truth, their natural evil has been nourished and made worse by us;

for if we had not connived at them and their actions, to our prejudice, they had wanted power to have executed their ingratitude; therefore in reason it had behoved us to consider what we gave, before we gave; to whom we gave, or how we gave; to relates ought to be governed by wisdom, and not by popular affection or passion: wife men should not measure things by outward appearance, but by discretion and reason; or else they behold their actions in a salie glass.

But let us now at last feek to avoid that evil we have done, in making the Hollanders too great for us to tolerate, left we feel the effect of repentance. It is not the meanest point of wildom to doubt and mistrust the worst; for doubts beget understanding, and thereby prevention.

As in natural bodies, the longer one lives in health, fickness is the more dangerous when it comes; so it is with us and the Hollanders, the longer we have lived in a mutual and unseparable peace; now that they have over-wrought us with cunning, and made us seeble by the strength they had fucked from us, it will behove us to recover our antient vigour and valour, and be no longer deluded with false pretences, as safety to us and the commonwealth: let us seek to follow the old rule, in seeking to quench the fire in our neighbour's house, though it be our enemy, lest it should stame into our own; for it is an easier thing to meet a danger aboard, than to repulse it at home.

In this book I have faid little to prove what I have promifed in our intended fifthing, but refer the reader to my fixth and laft book, dedicated to his majefly. And feeing I have made a relation of all difcoveries and plantations of chriftian people; I will end that fubject with a plantation of the French, for difcoverers they cannot be termed, which is the next that follows:

Certain Plantations of the French Nation.

THOUGH we cannot call the French discoverers of countries, because they never sought to find out any new worlds or passages that were not sound to their hands; yet since the first discovery of other worlds, they have been always ready to insest them with piracy, and such voyages: for their going to Peru has been no other than to spoil and re's other nations.

And yet I must give them their due in what they have deferved; for though they cannot be called *Discoverers*, as I have said, yet they may worthily be counted in the number of planters, as well in the north

port of America, as in the fouth beyond the line, and upon the continent of Brafil.

To the northward they have inhabited the river of Canada, where they have found a rich commodious trade of furrs, till the Englifb supplanted them in the late wars betwixt us and France. The next place they had footing in, they themselves called it New France. The third habitation they made was in Florida. And the fourth, as I have said, was to the southward of the line, and upon the continent of Brasil; all which I will particularly handle.

But before I treat of them, I will lay a blemith and tax upon their nation; for fome of their authors flick not to affilme to themselves the names of discoverers of such places wherein they were but planters; herein they do manifest injury to the English, Spaniards, and Portuguese; for all nations do justly attribute to them the finding of theie countries, as I have formerly declared and proved; the one by Sebastian Cabott, the other by Pedro Alvares Cabral in his voyage to the East-Indies in 1500, being the fecond that was gone after the first discovery. And now I will proceed to their plantations, and success in them.

The first undertaken voyage to Canada, (for I will begin with the north part of America,) was enterprized by Jobn Verafana a Florentine, in 1524. employed by Francis I. king of France, which Verasan is said to discover from the sittieth to the twenty eighth degree of the north latitude: but it is to be disproved in sact; for all the extent of land betwirt those degrees was long before discovered by Sebastian Cabots, in the right of England, as I have often

The next that undertook this colony was James Carter of St. Mallows, in 1534. with three ships, wherein that winter twenty five of his men perished with cold: but, however, the king prosecuted the voyage both in the year 1540. and 1542. and the French have ever since had a yearly traffick upon that coast for surs, as also in sishing, inlomuch as it is written, that one Sevales made forty two voyages in person into those parts.

The next habitation the French undertook was in the year 1603, into the country named (though improperly) New France, which truly and properly belongs to England, as I have faid before; for if the first discoverers be not allowed owners of the land they discover, by a law amongst christians, we, and all others, have as much right to the Indies as the Spaniards and Portuguese themselves.

In the year 1603. Henry IV. king of France, the 8th of November, granted a patent to Monfieur Le Mante, for a plantation of those northern parts of America: this voyage was begun the 5th of March the same year by Samuel Champlayne of Borage, who inhabited it unjustly, and gave it the name of New France.

This Champlayne was a painful, industrious, and a laborious undertaker: he paffed many dangers, wonderful travels, adventures, and treacheries often practis'd against him, as well by his own people, as the uncivil favages; and to second this enterprize, Monsieur Mante, the patentee, went thither himself in person in 1604, with the like

fuccefs, as all planters in those northern parts have found, (viz.) variable hopes and fortunes, to little purpose, as appears by divers voyages made to the succour and relief of that plantation.

The English in Virginia hearing that the French were become incroaching neighbours to them, and in a country that did properly, and of right, anciently belong to the crown of England, as several patents made it appear, which the queen granted to Sir Humpbry Gilbert and Sir Walter Raleigh, knights; and those English searing, that in time this intrusion of the French might beget a custom, and that prescription and position might make a cavil in the French to insist upon a right; therefore the governor and council in Virginia, in the year 1624, advised and undertook to find out what the country produced, as also to be better informed concerning the French plantation, which they were only told of by certain Indians.

After fome time spent in coasting along that shore, at last they arrived at the port and fort where the French had made their habitation, and finding in the same harbour a ship of France belonging to the planters, the English, suddenly, and at unawares, surprized her, without the loss of a man on either side, except one French jesuit, who was slain even as he was ready to give fire to a piece of ordnance against the English.

The French in the port being difmay'd by the loss and difaster of their bark, the English landed with great celerity; whereupon the French desired a parley, and time to consider of their furrender; but this request would not be granted; and therefore they secretly convey'd themselves presently out of the fort, and in a hidden manner escaped, and left it to the possession of the English, to whom it properly belonged

English, to whom it properly belonged. The French governor of that colony being expelled, and wandering up and down without a house to put his head in, sent to treat with the English commander, offering to become a subject to the king of England, and to hold his possession of him and his crown, pretending to discover many secrets of mines, and other riches, not known to any but himself.

But the English commander's end being only to hold their right in that country, and having no authority to connive or permit any nations living there, but his majefty's born subjects, he refused all propositions of accommodation, and return'd to Virginia, from whence he went, and carried with him another jesuit, companion to him said, and fent him into England, where he received good entertainment: the rest of the French travelled to Newfoundland,

Now let me speak like a christian, and with a heart of pity, to see so great and good a work, as the conversion of souls from insidelity and paganism, should be diverted and destroy'd by a vain word of ambition; for hitherto the country is not brought to that perfection, as to produce any thing that may make it worthy of same, or a ground for an ambitious man to work upon: for if the quarrel betwixt those two countries be considered, it is like two dogs that should snarl and fight for the picture of a deer, or any other beast; for there is little more substance as yet to be expected in this wide, vast, and desolate country that can afford land sufficient to both the nations, if content would please them.

I will therefore with and pray with my heart, that all princes would put to their helping hands in the planting and eftabiliting the chriftian religion in all remote and barbarous countries, and that with one confent they would fettle a national law within themfelves, and to have it generally received by agreement, to prohibit violence to any plantations where colonies are feated for the propagation of the chriftian faith: as alfo, that they would add and confent to the like privileges to all poor labouring fifhermen fifhing upon the feas, that no diffurbance may be offered them; their pains and danger well deferve it for themfelves, and no lefs in respect of the

general food, every man reaps good by.

The French had a colony in Florida more ancient, and countenanced by Chastillon, the admiral of France, Anno 1562. a great upholder of the Hugonot feet. He fent for governor monsieur Lannear, and John Rigall, who arrived in Florida in thirty degrees, and there erected a pillar with the French arms. At first they were friendly entertained by the savages; but soon after, according to the nature of the French, who cannot long agree in love together, there happened quarrels amongst them; for the commanders shewed such cruelty and infolency, that one of the captains was flain; and, rather than a great part of them would endure what they did, they put themselves in great adventure into a fmall pinnace to go to their country; but endured that necessity of victuals, that they were driven to cat one of their company, and had famished if they had not been reliev'd by an English bark at fea.

This colony was not relieved according to promife, because of the civil war in France; but that ceasing, Lannear was sent once more, in 1564, but there ensued such murders, such mutinies, such killing, running away, and betraying one another,

Vol. III.

as it is wonderful to read; and amongst the rest there was one Francis Jean, who, by great accident, got into the Havana, and made known to the Spaniards the Francis plantations and weakness; whereupon the Spaniards sent some to supplant and weaken them, who used execution upon most of them, and possessed them fort. Such as survived were put to most lamentable famine, and, indeed, had perished if Sir John Hawkins, at his return out of the Indies, had not been brought thither by a Frenchman, who left them a bark and some relief.

In the fourth voyage of the *Erench* to *Florida*, they required the *Spaniards* as they had done to them before, and hang'd and deftroy'd to the number of four hundred. After this flaughter they returned to *Roebel*, expecting great reward from the king for that fervice; but the *Spanijh* ambaffador prevailed fo far, that the commander durft

not appear, but hid himself.

Peter Malindes the Spanish general, when he exercised his cruelty upon the French writ over their heads, I do not this as to Frenchmen, but to Lutherans and Hereticks; the French commanders served the Spaniards the like sauce, and writ over their heads, Not as to Spaniards, but to trailors, robbers, and murderers. The French after this quitted the country and fort of Florida, and never since have had any sooting in it.

Laftly, for the French planting in Brafil, it has been with the like success as in the northern parts of America. The first that undertook it was Levius; and the cause for which he undertook it was to plant and lettle the now-reform'd religion, as they term'd it: he had an approbation of it by John Calvin their fect-mafter, who much encouraged the action: but it fell out that in time, one fect increasing out of another, as commonly herefies do, instead of amity, they lived in a contention, and never ceas'd wrangling and jangling upon the interpretation of the cofpel, till it was decided by the piftol: for murders, mutinies, and all other mischiefs ensued upon it; so that in the end, Levius confessed it to be a work of God, as the author of peace, and the hater of divilions; whereupon he abandoned that fect, and reconciled himfelf to the church of Rome, in which religion he lived and died, as himself expressed in writing.

Theveits, and after him Stadius, were two of the next that followed this planfation; and to make an end of the tragical habitation, Diego Flores de Valdes, in his return from the Streights of Magellan, as you have heard, in the year 1582, coafted the Brafilian shore, till at last he came to an harbour called Pariba, where he found sive French ships, three whereof he burnt, and the rest he took, and

5 L

Book IV

inhabited the fort with his Spaniards: the Frenchmen ran into the mountains, where they lived in company with the favages..

But for a conclusion of these plantations, as well by us as the French, and to avoid prolixity, I will briefly describe the nature of the rude, wild, and favage people of America; who are not to be inticed with fweetness and good usage, nor to be mafler'd by force and cruelty. Generally their religion is alike, though they adore feveral creatures for God; and every nation has a fundry opinion and practice in their cere-monies; but their supreme God of all is the devil, the enemy of mankind.

The foil and temper of many plantations exceeds us in temperature, and planted, manured, and husbanded at the charge of a prince's purse, no doubt but they may be brought to perfection; for the bane of all colonies is private mens undertakings, that are impatient of delays; for if it yield not an expectation of private gain, they are willing rather to lose their first adventure, than to shoot a second arrow to find the former shot: and moreover, factions arise amongst people that are not governed by a prince's direct authority; envy reigns amongst them, to see some advanced above themselves, and are ready to cast asperfions upon their rulers, and to tax them with deceit and fraud, whether they deferve it, or not.

I observe in all the English and French plantations, the hopes are alike; fometimes they feed themselves with the hope of a paffage into the South Sea; other times with the riches of mines, and the commodities they produce, and make large relations to persuade people to persevere in it.

But the conclusion is mutinies, murders, feditious desperate adventures, want of victuals, and other calamities, more strange than ancient histories can acquaint us

If the charge bestowed upon such vain hopes were valued with the gain they have reaped, it were not worth a purse to put it in , and for ours in England it would be confumed in fmoke: for our staple commodity which it fends out, is ftinking barbarous tobacco; for from the barbarous favages it is derived; a brave original for civil men to learn and imitate.

The French herein far exceed us; for by their industry, and laborious endeavours, they have attained to a rich and profitable traffick of costly furrs, which makes our shame the greater, when we consider how eafily they have effected ir, and how profitably they perfevered in it, whilft we are fucking of fmoke, that brings with it many inconveniencies, as time has made it too plain to us.

Advice how to plant the Island of St. Lawrence, the greatest Island in the World, and reckoned a Port of Africk.

HAVING handled at large the discoveries and plantations the christian nations have laboured in, and by their industrious pains have brought to good per-fection, I will now at last fay fomething of the likeliness of a country, that in all probability may produce good; I will only collect some reasons, and refer the rest to the examination and confideration of those that are well inclined to the honourable undertaking and proceeding of new planta-

There are two particular things to be required in a colony: the one I have already spoke of, which is, That it be the act of a prince and his purfe to bear the charge; but if that be wanting, and the action be put upon private mens expence, there are three things to be confidered upon such an enterprize; the one, is the length and diftance from home; the fecond, how to fupply it with leaft charge and most conveniency; and the third, for hiring of veffels for transportation of men and materials. the condition of which ships must be according to the place they inhabit, and the enemies they are to fear.

This being done, the next confideration is the climate, the nature of the foil, and what profit it will yield at prefent; as alfo what hope of future; the nature of the people, and whether they may be made capable of reason, and be reduced from their barbarous incivility.

Of all the places I can think of, for conveniency and profit within the bounds of America, Africk, or Afia, out of my experience and study, is the island of St. Lawrence, antiently called Madagascar, five hundred leagues from the cape of Good Hope, the greatest island in the world, and the place of all others I principally commend; for our planting will be in fourteen degrees of fouth latitude, where our English are now no strangers; for commonly they refresh themselves, and find succour in their voyages to the East Indies.

There is nothing that I observe to further a plantation but this will yield: First, the winds are certain, at the time of the year, to carry us directly thither, without firiking fail: and though it be farther diffant from England, than Virginia, or that part

winds and weather are both uncertain in going and coming. Secondly, whereas the charge is great to hire ships purposely to transport men and provisions to America, where the numbers are many, they are fublect to fickness, and other disasters of the fea; I do make account that it may be fo ordered and contrived, that every ship trading to the East Indies may be hired conveniently to carry twenty planters, without annoying or peftering the ships, being spacious, and of great burden; and this will prove his charge to the undertakers, than to hire them purposely for Virginia.

And if we examine the nature and con-

dition of the country, and the people that inhabit it, with the experience we have of our Englishmen that refort thither, we shall find the climate fingular for health, and the ground fruitful to produce wealth, as the great and extraordinary oxen the place affords, can witness. This alone exceeds all the hope America can at prefent yield us: for our increase of cattle upon that continent must be raised by such beasts as we carry'd out of England, which must be done with great charge, trouble, and long time before they be brought to perfection.

The cattle we shall there find, will bring us a certain commodity of hides; and as we shall feek to increase them, so will our gain and profit increase the more.

What other benefit we shall make by this plantation, time and our own endeavours will make it appear: for the two barks which I wished to be kept there for intelligence from other places, I would wish that the one should discover the fouth part of the island, and the other on the north fide; and to make their rendezvous at the fame place from whence they departed; fo shall we discover the very heart of the whole island; and no doubt but we shall discover variety of gainful things, unthought of by us as yet. I have known of my own experience, and by examination of divers Portuguese, with whom I have spoken, that the Moors who live and inhabit the main continent of Africk, over against it, have a fingular trade with the people of St. Lawrence for elephants teeth, ambergreafe, &c. all which we should enjoy with ease, when we are settled, and perfectly known to them.

Besides the plenty of beef it will yield us for food, there is other delicate meat to be found, as muttons, but with hairy skins, hens, and other forts of fowls; oranges and lemons, and other kind of rare fruits there naturally growing; which America will not yield us, unless we plant them; which will

of America, yet I hold it will be often end fail of the excellency of the others in fooner gone to than Virginia, where the respect of the climate. The sea and the rivers will afford plenty of fish of all kinds; and for the prefent we shall not want a sufficient quantity of maiz and caffido for bread, till we fow our English corn of all

And for the people in that part of the island, it is known to all that have been there, that they have behaved themselves lovingly and respectfully to one another, and no less to strangers. By their civil behaviour and labour they draw their cattle to a tameness, as with us; which shews they are naturally civil, which is not usual amongst such people: and to prove it the more, as well in that as in their other courses, they are Mahometans in profession of religion; and though it be as false as falfehood may be to truth, yet by that religion they are taught more civiller converfation and humane behaviour, than the *Indians* or infidels are instructed in, who acknowledge feveral creatures for gods; fome the fun, fome the moon, and fome feveral beafts and creatures of the earth: but I make account with our familiarity, love, and good usage, we shall entice their children, with confent of parents, to bring them for England, where they shall have good education and breeding, answerable to our own; and this will be the method to work our good in our plantations of that country; and the only means to propagate christian religion in remote parts.

Having a plantation or fettled dwelling in the island of St. Lawrence, we shall make our navigation to the East Indies much more pleasant, short, and profitable, by using and settling a magazine of commodities betwixt us and the Indies. First, by their receiving our commodities, and returning those we receive from thence, by the fame ships we employ; for part of one fleet, may be fent from St. Lawrence to the Indies, and return ehe commodities those countries afford to St. Lawrence. which our ships shall there receive, and bring them directly for England; so that all our fhips fhall be continually going and coming, and every twelve months have a return from thence; which now is more than double the time.

I defire that this project to St. Lawrence may be compared with those our nation has undertaken to America, and the reasons duly confidered, without partiality; and being fo fatisfied, that they would follow them with a general confent, and fo fettle their plantations, that there may be a neighbourhood from one to another; for being, as they are, thus divided, they can give no help or fuccour, but must stand upon prove a work of many years, and in the their own firength, what attempt foever

shall be made upon them by an enemy; befides many other reasons one may produce, that would much avail them: for what fuccour can Newsoundland, which is the furthest part north, give the island of Providence, the furthest part south, or any other places betwixt them that we inhabit, as namely, New England, Virginia, cape Florida, the Barbadoes, St. Christopher's, Tartuga, and the island of Providence, if you examine the distance from one to another, and how the currents and winds fet upon these coasts.

As the island of Providence is the last I name, so it is the greatest in same by the persons that countenance it, and by the purses that maintain it; and because you shall know the difference betwixt that island and St. Lawrence, I will here make a description of the island, and refer it to your own judgment.

The Nature of the Island Catalena, or of Providence, as called by us.

A MONGST many ridiculous and vain plantations we have had footing in feveral places of *America*, as appears in this book, there is one small island, whose name we have changed from *Catalena* to the island of *Providence*; because some pretend to foresee it may damnify the *Spanish* nation, if they shall hereafter give us occasion of war.

This island of Previdence is seated upon the coast of Terra firma, one hundred leagues north from Carthagena, eighty leagues north and by west from Nombre de Dios, and from the headland of Gratias a Dios, thirty sive leagues. This island for the greatness of it, may be termed rather a rock than an island, not exceeding ten or eleven miles in length, and five in breadth; a small proportion of land to promise either victuals for sustenance, or commodities worthy of Labour to countervail the tenth part of charge that has been bestowed on it.

For it is like a barren and uncultivated ground, that of itself can send forth nothing, if pains and labour do not make it capable to afford nourishment; even so this least and worst of islands can promise no more than the ill ground I compare it unto; but our undertakers think by the situation of it, that it will advantage us much against Spain, the impregnableness of it by nature considered, which we have helped by art.

The island has these particular benefits in it : A port containing eighteen foot in depth, with good ground to ride in; it is environed with huge and high rocks and cliffs, and made impregnable against landing the harbour on westermost side of the island, which makes it a safe riding, by reason of the perpetual easterly wind that blows off the shore. There's only one place to land in; for that excepted, it is encompaffed about with fuch rocks, that a boat cannot come near the shore. If a fhip put but one mile to leeward of the harbour, the cannot recover it again by reason of the current; unless she put for Hispaniola, and difembogue betwixt it and Cuba, at least three or four hundred leagues, back-

wards and forwards; neither can they directly go from thence to *Cuba*, by reason of the shoals and flats in their nearest course. Therefore a ship must stand over for the main land thirty five leagues from *Providence*, and pass through a channel, not half a mile in breadth, and yet four leagues in length.

The wind and current fets to the welf-ward from Providence, till within twelve or fourteen leagues of the shore; and then the current fets to the southward, though the wind keeps its continual course from the east; and were it not for the change of the current, it were impossible for to setch Nombre de Dios, Porto Bello, or Carthagena. Our English ships have a great advantage of the Spaniards, by reason of their fastness by a wind, which the others cannot beat it up, because of their leewardness.

Every fourteenweeks, the climate wherein the island is feated, produces an harvest of corn, pease, potatoes, and other roots and herbs: the potatoes make a delicate kind of drink, both pleasant and wholesome. The sea affords such great abundance of sish, that two boats and ten sishermen will be able to seed one thousand persons every day.

There are two other islands not above fixteen leagues from Providence, the one call'd St. Andrew, the other the Mosquito, not inhabited. These two islands afford great quantity of tortoifes, which will be a great relief to the island of Providence: they are not to be dwelt upon, because they cannot be made defensible; and St. Andrew's is full of rocks and shoals, and dangerous to come near, by any that do not perfectly know it; neither has it an harbour, though in the westermost part of it one may anchor in fafety. And thus much for the description of the island, as namely, the height, the feat, the diffance, the temperature, and distance from other places. Though there is cause for me to write more particularly of this island, yet will I not here insert it, but fpeak more amply of it in my fifth book; to which I refer you.

TO THE

PROJECTORS

O F

This A G E.

F I could think of a note proper word than Project, to entitle this enfuing book, I would do it; for the name of projects, and the inventors of them, are grown to hateful and contemptible, that all honeft men abhor and detest them.

There are no burthens, which the sharpness of lewel brains can invent to vex

There are no burthens, which the sharpness of lewd brains can invent to vex the commonwealth with, but they stile by the name of projects, when indeed the name Promoter were more proper, as people fitter to be loathed than cherished in a well-govern'd kingdom. Such men are a curse to the country that breeds them, to their friends and parents that nourished them, and to God himself that created them; to their sinon man, directly or indirectly, but finds himself hindered or injured by them; their courses incite God to punish, and men to abhor them. A father of the church faith, It is a greater sin to project, and lay unlawful things on the poor, than a merit to relieve them. A favourite to Alexander the Great, whom we may rather term a projector, advised him, after his great expence in war, and wealth decay'd, to lay taxes upon his subjects: but Alexander answered, That gardiner did ill who ploughed up the berbs and roots of his garden: for the king is like a gardiner; roots, trees, and herbs, like the kingdom. A stattere told Antiochus, That all things a king did were lawful. Yea, he said, to barbarous kings, but not to him that respects justice.

St. Levis, king of France, was angry with one that advised him to lay new taxes upon his subjects, saying, That God punished such examples in kings. This king well deserved the name he bore, who had more respect to his subjects than to his profit.

A king of Persia being desired by his favourite, to grant him an unjust suit, he told him, No: but that be would give bim the value of the thing be requested, because it would not make bim poor; but said, I will not do what you desire, because it is unjust. Projectors should have as little employment under this king, as they have reputation amongst honest men.

Though Augustus Cacsar did not by name dislike the condition of these people that vex the commonwealth; yet in his precepts given to the governors of his provinces, he intimated a detestation of them, when he told them, I do not send you to rule, that you should envy the innocent, or be a hangman to offenders; but that with one hand you should be an helper to the good, and encourage the evil to amend; that you be a tutor to the satherless, a pleader for widows, a staff to the blind, and a father to all.

I have heard of a judge in our time, who by his audacity, and forced authority and impudence, was able to pervert and wrest laws to his appetite and liking: this wicked judge had got a popular applause and esteem amongst the ignorant multitude, and by his friends was commended to king James of Great Britain, for a good minister to his state. The king answered, Vea, if I would become a tyrant. Inti. ating, that the judge who misconstrues laws, were a fit servant for such, and not for upright kings. Solon was such an enemy to the projectors, that he established a law, That whospever proposed any thing to the prejudice of the commonwealth should die. He also decreed, That it should be lawful to revenge an injury that should be offered to one another, that every man might have a feeling of the party injured.

5 M

The

fifth book;

To the Projectors of this Age.

The difference betwixt the projectors of our age, and the projects I tender in the enfuing diffeourie, is this, They pretend evil under the colour of good; they fet a fair countenance on a foul face; they fmile on those whose throats they would cut i they do, like Scipio, and all other rebels, pretend reformation, and taking away the abuse of the common-wealth, when themselves are abusers of it.

In my projects I have no other end but the common good of the kingdom; I neither expect or defire gain; I fet up no new devifed taxes or tolls; I invent no impositions, nor raise contributions; I force no man to undertake or compel people to adventure; but I perswade like a philosopher, who advised four things to be considered, before the taking of any important thing in hand; To examine the beginning, to consider the middle, to approve the end, and to consider with the wise.

If any of my propolitions prove profitable to the state, and acceptable to the subject, I have obtained my wish: if not, I desire they may die, without any more appearing in the world.

BOOK V.

Containing divers Projects and Stratagems, tender'd for the Good of the Kingdom, &c.

The first Project shall be for the Safety of his Majesty's Navy; and the Conveniency and Inconveniency in keeping it at Chatham or Portsmouth.

S there is no man that builds a house, but at the first groundwork of his building will be fure to make his foundation firm and staple, (for on the strength thereof all the rest of the building must depend,) even so it is with kings and princes; for that king who means to live in fastey, and to avoid dangers at home, or from abroad, must first seek to make his state firm and sure, as well in defence upon an invasion, as before he enterprize any action of osience upon his enemy, or else his building is upon glass and ice, and will suddenly fall for want of a settled soundation.

Therefore, like a careful builder that will provide to encounter a danger, in my enfuing projects I will first lay down a means and remedy how to secure this kingdom against the attempts of our neighbours, if in time they become our enemies, before there shall be cause of hostility, or before we make any enterprize upon them in a warlike manner. And the first thing I will handle, as the greatest importance to the kingdom, is the safety of his majesty's navy, and the conveniency or inconveniency in keeping them at Chalbam or Portsmouth, as I have said before.

The Conveniency of Chatham.

1. Chatham is fo fafe and fecure a port for the flips to ride in, that his majefty's navy may better ride with a hawfer at Chatham, than with a cable at Portfmouth.

2. The reason of the long continuance of the navy at *Chatham*, is the conveniency of docks, and all other places, for the conveniency of ships; and considering that the officers of the name are there seated with their whole samilies, it would breed a great

innovation and change to bring them to Port/mouth.

3. The nearness from Chatham to London, from whence they may be supplied with all things they shall stand in need of, for that London is the storehouse of all England: it is necessary therefore that the navy should be kept at Chatham, rather than at Portsmouth.

 Woolwich, Blackwall, Deptford, Limeboufe, and Ratcliffe, yield more docks for the building and repairing of ships, than all other places of England.

 All England cannot furnish failors like to London, and the Newcastle trade, which once in three weeks repairs to the port of London.

6. No part of England can victual a navy fo conveniently, speedily, and at so small a charge as London; all the corn for bread, beer, butter, and cheese, &c. is brought by water from the adjacent countries thereabouts. And for beef, pork, and bacon, London is placed in the center, far more conveniently than Portjmoutb, which has never a river to bring commodities from other thires; nor the country of Hampshire so fruitful as to surish it.

7. Our trade to the Eaftland returns their commodities to Lendon, which furnishes us with all materials belonging to shipping, as, namely, cables, cordage, pitch, tar, rosin, mass, yards, &c. which cannot be done at Portsmouth, the place yielding nothing that creates a trade.

8. The water at Chatham flows fufficiently every firing tide to grave the greatest thips; and it is a doubt whether it can be made to heighten fo much in Portsmouth, as to do the like.

9. No wind or weather can endanger the coming home of an anchor in *Chatham*, and

the river affords sufficient space for every fhip to ride, without annoying one another: as to the contrary, a ftorra, with a wind from the north-east to the south-fouth-east, will ftretch the cables of the ships in Portsmouth; and if any of their anchors come home, they cannot avoid boarding one another, to their exceeding great damage and danger, the channel being fo narrow

10. A navy lying in the harbour of Portfmouth, the fafety of them depends upon the town of Port/mouth; and if Port/mouth should be surprized, or taken at any time, the whole navy falls into the enemy's

11. Not a cable, anchor, maft, yard, barrel of powder, or any other thing that belongs to the furnishing a fleet, but must be brought from London or Chatham to Portsmouth, with an exceeding great charge, and no lefs delay and danger, confidering the uncertainty of winds, the peril to be intercepted by enemies, and the hazard of shipwreck.

12. The exceffive charge in fending down carpenters, cawkers, and other feveral workmen belonging to ships, with impress of mariners, will amount to an extraordinary great expence. All which will be eafed

by being at Chatham.

The Exceptions to the Navy lying at Chatham.

1. The feveral winds to carry them to Portsmouth.

2. The hazard of the shoals and fands in

going thither.
3. The distance from Chatham thither, if the French should attempt any thing upon

4. And some there are that advise part of the fhips to be kept at Port/mouth, and the other part at Chatham.

Whofoever shall alledge these reasons, must distinguish of the service in hand, whether it be offensive or detensive, or against Spain, France, Holland, or any part of the east country.

If Holland or the Eastland become our enemies, then doth Chatham lie most with advantage to annoy them, if they attempt any part of our north coast, or Norfolk, Suffolk, Effex, and Kent, which are places of most peril, considering their nearness to

the city of London.

If we have wars with France, there is little advantage gotten betwixt Chatham and Portimouth; for being at the Downs at Dover, we shall be over-against France, and nearer to the Isle of Wight than Brest is, or any part of Brittany, where I suppose the fleet of France will be made ready; and for the two navies, English and French meeting

at fea, no place or time can be affign'd them. fhips being in continual action, and failing one day on one coaft, and another day on another.

And whereas the feveral winds are objected as an impediment to our navy at Chatbam, you must know that an easterly wind keeps in a fleet at Chatham; and fo it doth the French, if they be in any part of Brittany: and our ships also, if they should be at Portsmouth, though they should be in the Channel, yet with that eafterly wind, they cannot go to the eastward; fo that you fee an eafterly wind brings an equal inconveniency, as well to the one, as to the

And whereas from Chatham we must have two winds to bring us into the Channel, or to Portsmouth, the one foutherly or westerly to carry us to the Downs, the other northerly or eafterly to bring us to Portsmouth in three tides; with fair weather, from the Downs, we shall be able to fetch Portsmouth howsoever the wind is; in which traverse we shall be as likely to meet a fleet of France, as in any other part of the Channel.

To answer the objection of fands and shoals to endanger us in our coming about from Chatham, we fee that by the care and skill of pilots, no memory or record can tell of a ship of his majetty's so lost, as out of Portsmouth it is fresh in old mens mouths, and the ribs of the ship I have often feen, called the Great Henry, a shiproyal of king Henry VIII. there perished.

I likewise remember in the days of queen Elizabeth, and in the year 1586, that the Revenge, (after taken by the Spaniards,) was as near destruction, coming out of the

harbour of Portimouth.

And to fatisfy the advisers that wish part of the navy to be kept at Chatham, and the other at Portsmouth, this I say, That an army on land, or a navy at fea, which shall be divided, is easier to be cut off before they meet, than if they were met together in a main battle, especially in so narrow a fea as ours, where fleets cannot pass without encountering one another.

Moreover, if the French should anchor with a number of ships sufficient to encounter with either of our two fleets divided, either at L., Hellen's-Point in the Isle of Wight, or the Dozens, or Gorend, it were impossible for our fleet to pass unseen or unmet withal; by which means they may cut

them off before they meet.

But, as I have faid, the country must be confidered with whom we have war; for if we have war with Spain, neither Portsmouth nor Chatham is fo convenient as Plimouth; for in the winter, which is the time that ships must keep harbour, they shall have fpace fufficient to make provision against the

fpring, and ease a great charge in carrying the ships from Plimouth to Chatham, and after from Chatham to Pinnouth; which we cannot allow less than two months, if not more; and moreover, from Plinnouth we shall put to sea with our ships morble and clean, sooner, and better manned and victualled, than either from Portinouth or Chatham.

Therefore I conclude, in comparison betwixt Chatham and Portsmouth, Chatham is the best and safest place; and wish that our whole navy may be kept at Chatham, and not make any continual residence but there only, considering the former reasons. Never hurt besel any of them that made their being there, either by weather or attempt of enemy; and yet I must consess, they are not altogether so safe and secure from the assumption as the safe and secure from the assumption and therefore it behoves us to be cautious and wary of it, as follows:

In the stratagems contained in my third book, I advised a general to provide to withstand an enterprize to be made upon ships in harbour, where they are usually moored with two cables, to which directions I refer you; but with leave, somewhat I will say of the state of our navy at Chatbam, and the danger that may befal us from Holland, if they become enemies to us, as also shew the way of prevention.

Holland, by reason of their abundance of fhipping, the number of foldiers quartered in all the parts of their country, and their daily and speedy use in gathering th ir sorces together for present service, as they often do, will give us the less suspicion if they should intend any sudden stratagem upon us; and the first thing that they will attend, is the opportunity of a fettled eafterly wind, to bring their fhips, without striking fail, as high as Gravesend, and there fuddenly put eight or ten thousand men on the Kentish shore, to march to Upnor Caftle, four or five miles from thence; where they fhall find no refistance, the caftle being both weak and weakly provided; and having it, they have an entrance to the river, where the ships ride.

The ships having done so much as belongs to them, in landing their men, they will, no doubt, repair presently to Upnor, which is the place they will principally shoot at; and the castle being taken before their coming, their passage is made for them to surprize our navy, which they will find unprovided of men, more than the ordinary ship-keepers; their ordnance commonly ashore, and without powder or

thot; for unless there be imployment of thips to sea, the ammunition is always kept in the Tower of London, and too late at that time to be supplied from thence, if this devilish design should prevail; I protest the very thought of it makes me tremble, and wish it may be prevented.

And for prevention, it will behove us to feek how by art and skill to raife works and fortifications, both by land and water, for the guard and ftrength of *Upnor Cafle*; and to order and appoint that a certain number of trained foldiers, thereabouts dwelling, upon every allarm repair thither with their arms, which will prevent any fudden furprize; and in the mean time we shall have leafure to draw a greater army together, than they will be able to withfand.

And so much as concerns the defence of the river, by booming, and making fconces upon ir, I have faid fufficiently in my former thratagems; but feeing this is a matter of fo great import as the fafety of our navy, and by confequence the fecurity of our kingdom, I advise and wish that the ordnance, or greatest part of them, be continually kept aboard the ships, both mounted and fitted with all kind of ammunition belonging to them: that as in the cafe of Upno Caftle, the trained foldiers of the count: y, have order to repair on board the navy with their arms: that the ships them-felves be warpp'd and towed as low as the in ermost boom, and there to moor them-Glves a head and a ftern to welcome an enemy with their whole broad-fides. And if all thefe fail, (as God forbid,) then the ships to fink themselves at an anchor, to avoid falling into the hands of an enemy; which fhips are eafily after to be weigh'd without hurt or detriment.

Having left a remody, as you have heard, for the fecuring our navy, my next project shall be to hinder French attempts upon us, they being a nation of most danger, by reason of their nearness and greatness, and especially if they be affisted with the help of Holland with fhipping, so o doubt, but in matter of state France will labour to gain Holland from us, and to fettle it with a firm league and friendship with them, to redeem their loss of Scotland, who for many hundred years made their dependency upon that kingdom; and if Scotland prove honest to England, they may fear by our conjunction, of foes we are become friends, and that Scotchmen may as well turn their fwords upon their breafts, as they have done heretofore upon ours.

A Project to prevent the French landing in England, if they become our Enemies.

WE in England look upon France to be a strong and potent country; the people in it to be both warlike and valourous: but it lying upon a main continent, and ours an island, divided with a fea, we think we may eafily offend them, and not be offended by them.

This opinion is generally received; and, indeed, not to be confuted, but by fuch as understand the sea better than the ordinary fort of men: but for the explaining it, if ever there happen a war betwixt France and us, I will truly fet down the danger that may redound to us by France, and the means how to prevent it, as I have already done, or will do, if a war happen betwixt Stain, or Holland, and us.

The general position is, That France is no way to compare with us for number and ftrength of shipping; and by consequence, we are to fear no danger from thence, upon

any attempt they shall make.

In answer hereof, it is true, if the meeting and encountring a fleet at fea were certain, the strongest are likely to prevail against the other. But I have formerly shewed, that there are three principal things to be required in a sea-action: the first is providence, to learn the design of an enemy, to prevent him: the fecond is fecrecy, to keep the enemy from intelligence: and the third, is how to work for advantage of wind and weather.

If the French intend to invade us, we may eafily conjecture, by their preparation by land and fea, and the drawing down their army to their port-towns; but where they mean to attempt us, if they keep their defign fecret, it will be hard to difcover; and the chief reason we are to conceive, is according to the place where they keep their rendezvous, the observation of winds to bring them from thence to feize our coast, and the weakness of our harbours, where we may conceive they think to land.

If there were no more difficulty than the vulgar and common conceit, it were probable not to be in the power of France to hurt us; but speaking like a seaman, for that fea actions must be governed by the winds, thus much I must let you know, That a foutherly wind, which brings them for our coaft, keeps our ships in harbour that we cannot budge; fo that they shall neither fear our force by fea, nor our ships be able to impeach them, unless by chance and accident they arrive in the same harbour our ships retire to; so you see it is neither the number or strength of fleets, that

can withstand them, if they observe the advantage of a foutherly wind.

This is a peril that every man conceives not; for if France can of themselves afford a quantity of veffels, to transport an army, or by hiring ships abroad, or compelling strangers to serve that come into their ports to trade; it is not much material whether they be of strength, or no; for with a foutherly wind they shall not fear any force to meet them at fea.

There was never fore, but God provides a falve; and this fearful hazard must be cured by prevention: (as thus,) Our fleet muit divide into three fquadrons; and being at fea, and forced to feek the shore, every fquadron be appointed a particular harbour to repair to; by which means every port on the fouth coast shall be defended and guarded by our fhips; which will be a force fufficient to withstand the strength of France by fea, if they be not affifted by Holland.

The ports being thus guarded, they are prevented of landing; for an invador is not fo mad, as not to provide a harbour for his fecurity; and no road or bay with an outwardly wind, is able, without great danger, to give him conveniency of riding or landing, the fea and fiege will be fo great.

But it may be objected, That though this

ferve for the fouthern coast, yet the north part of England, Scotland and Wales lies open to their landing. The answer to this is, That if ourthree fquadrons be divided, the one to make good the Downs, another the west country, no fleet can pass betwixt Dover and Calais, but they of the Downs shall have a view of them; and the fame wind the others have, will ferve them to follow, and to prevent their landing: the western squadron will do the like upon any attempt that shall be made upon Milford Haven, Wales, or any of that part of England.

But our furest course will be with some ships to beleaguer their harbours of rendezvous in France a good distance from the shore, for fear of embaying: we must confider that fuch winds as ferve to bring them for England, make a fecure road upon that coast to ride in; and such winds as are dangerous to keep that shore, make it impossible for the French to put out of harbour; as I will flew more particularly, when I treat of the way to prevent the French and Hollanders meeting.

Thus you may perceive, that an invafion out of France into England or Scotland, is to be prevented. But his majesty has another ! tions (

that part of he with fome oours of ren-littance from g: we must rve to bring ire road upon ich winds as ore, make it t out of harparticularly, prevent the

hat an invalor Scotland, ajesty hasanother other kingdom of more danger, the conditions of the people, and the openness of the harbours confidered, and that is Ireland, which I will a little handle.

Ireland, as it is an ifland, is in the cafe of England, though more dangerous, in refpect the people are more rebellious, and divided from England, that cannot be with celerity relieved, if an enemy do land: befides, the Irish nation and their natures do not so well simbolize with the French, as with the Spaniards; or if they did, the French have less advantage to invade that kingdom than the others; for fo much as the fame wind that carries a fleet out of Frince into Ireland, the fame wind ferves us to follow them out of England.

But feeing I am upon this fubject, I will let you know the difference betwixt the danger of a French invasion and a Spanish into Ireland. You must consider that a southwest wind that brings a fleet from Spain into Ireland, is not only against us to go into Ireland, but keeps our ships in harbour, that we cannot put to fea: by which occafion the Spaniards may land in despight of us.

Moreover, if with that wind they land to the northward of Ireland, though it be no further than to the river of Shannon, we must have not only a north-east wind to carry us to Misen-Head, or ape Clear, but when we are at either of the two places, we must have a contrary wind to carry us in purfuit of them that land to the northwards, which is a foutherly wind; and how this is like to happen, and what dan-

ger may befal us in the mean space, is a main point of confideration; and therefore it fell out very luckily to us, that in the Spaniards last expedition to Ireland, they landed at Kinfale, to which place one wind carry'd us directly out of England, to give a relief to our army, and to prevent a fecond fupply from Spain.

If they had landed further to the north-

ward of Milen-Head, we should have had, as I have faid, two contrary winds; befides, they would have come to them, where they should have found succour and relief, far from our army by land, where our march had almost been impossible, confidering the feafon of the year, and the weak

help that the country would have yielded us. My advice therefore is, When an enemy is feared in Ireland, that there be a care to keep our fleet at fea off of Mijen-Head, as a place to take advantage of all winds; and that the beacons be well watched on thore, with directions to the watcher, that they give notice to our fleet at fea, to diffinguish the enemies landing to the northward or to the eastward of that place; for our ships lying open of the cape of Misen-Head, they will be able instantly to follow them, whether they shall go to the northward or eastward.

But this caution I give, that no occasion but necessity compel the fleet to feek a harbour: for I have shewed before the inconvenience of it; and the difficulty to get them in again; that in the mean time an enemy may work his mischief.

How to prevent the French and the Hollanders meeting to rescue one another, if they become Enemies to England.

'Onfidering how things stand, or may hereafter stand betwixt France and Holland, to the prejudice of England, (for that every state changes with time and advantage to themselves and commonwealth,) it will not be amiss, for prevention of evil that may happen to this kingdom, to follow the practice of a skilful physician, in the cure of his patient, to give him cordials to avoid the discase, rather than afterwards, when it has feized upon him, to go about with physick to recover him; and according to this example, it will be better for us before-hand to withfland the peril, than feek to shun it when it is too late.

The dangers are of two kinds: the one by an increase of ships in France, that may in time prove prejudicial to the state; for it is perillous to have neighbourhood with danger: the other is, the affiftance they may find in foreign parts by fea, and above all other nations, the Hollanders, who are nearest able to equal us in shipping,

The fear of an invalion out of France, our ancestors never much dreaded; for our fhips were ftill the walls and bulwarks of our defence, and ever made that nation recoil with dishonour and loss, as our histories do at large declare; and rather than the French ambitious thoughts should now afpire to greatness of shipping, it were far better, happier, and faf r for us, to proclaim an everlafting war against them, than by a fuffering peace, they should attain to a strength by sea; for princes in matters of most importance ought to govern by rules of state, and to be directed by precedents of times.

We will not oppose the French greatness amongst themselves at home, when it shall have no relation to us abroad: But if France will not be contented with what they have been, but labour to be greater than we think fit they should be, wisdom bids us provide for the best; which we cannot better do, than to abate the pride and

power in the beginning 3 for it is an old faying, That peace and power are incompatible, and live not long together 3 and the ftrongest pillar of peace, is to take away the occasion that may breed a war.

But in case, according to my proposition, that France, out of matters of state, shall seek to give affishance to Holland, and we to impeach it at sea, this that follows shall direct those that have the command of so great and weighty a charge as the government of our seas.

Our fleet, confilting of a number of fhips, must be divided into three fquadrons, and appoint three feveral places for their rendezvous, (vix.) the Downs, the ifle of Wight, and Guernsey, all of them opposite to the harbours in France, betwirt Calais in Picardy, and Ushant in Britany.

Our fquadrons are to work according to winds; for that wind which is dangerous for us to keep the French coaft, is impossible for their ships to put out of harbour, as I have formerly shewed; and therefore we need not put our selves to hazard, but upon a just occasion, when the wind shall serve them.

Although fome of their ports are better than others, yet there is none of them in the diffance aforefaid, but are bad harbours, and dry from half tide to half tide, that a fhip cannot get either in or out, but by favour of a whole tide.

And it is moreover to be confidered, that there is no wind that will carry a ship out of thoseharbours of France into Holland or Zealand, but a foutherly or westerly wind; for though they may put out to fea with an eafterly wind, yet being at fea, they cannot recover the places aforefaid, and therefore had better keep the harbours, and avoid the danger of meeting us at fea: and befides, that fuch winds as aforefaid will carry them out of harbour into Holland, we shall be as ready to take the advantage of them from our own coast, as themselves can be from theirs; confidering what time they must have to embark their men and provisions, and observe their tides for going forth of their ports. The Downs lie conveniently to guard Calais, Bullen, St. Vallery, and Havre-de-Grace; the ifle of Wight will have an eye over Diepe, Sherbrook, and all the creeks to the Hagg; the islands of Guernsey and Jersey will do the like to St. Maloes, which is a port of greatest importance on that coast.

But the places of greatest weight, are Brest, Blavet, and some other harbours for the entertainment of their best and greatest ships, which lie east and south-east from Usbant, and not within the channel opposite to England,

But those French ships that shall there remain, must have two contrary winds to bring them into our channel, the one to get about Ushant, and that being done, the other is to sail into Holland, in which course they must pass our three squadrons aforesaid, and will find it impossible to essential.

Havre-de-Grace, which is the fecond good harbour next to St. Maloes, lying betwist Calais and Ufbant, is in the fame flate of Breft and Blavet, which must have two contrary winds to carry them to Holland; though they be nearer to Holland by many leagues, yet they shall run the same hazard and peri of Breft, as I have declared.

Thus you see how easy a thing it is to

Thus you fee how eafy a thing it is to prevent the French and Hollanders meeting, if a differest and understanding commander have the rule of things, and knows what belongs to it.

For the better information of those that shall be employed, I will set down the state and condition of every harbour in Erance.

The State of the Harbours in France,

THERE is a bank in the middle betwirt Dover and Calais, fouth from Dover, and weft and by fouth from Calais, that has but four fathom at low water, and four leagues long.

The Old-Man is a good road for northeaft, eaft or fouth-eaft wind, fix or feven fathom deep.

St. John's road, night o it, is a good road for the fame wind, and is fifteen or fixteen fathom deep.

Bullen is a barred harbour, and dry at w water.

The river of Somme, where St. Vallery flands, if it were not for a bank that lies at the entrance thereof, were a good har-

From the Old-Man to Diepe, fouth-fouthwest, betwirt them lies the river of Hen; the town of Treport is upon it at low water

Diepe at full fea three fathom: there are three bouys to direct you at half flood: finall fhips may go in at low water dry.

Feckban, four leagues, west-south-west, a good harbour, two fathom at low water.

Havre-de-Grace, at high water, three si-

Havre-de-Grace, at high water, three fathom; and at low water one. There is no failing from hence up the river of Scine to Roan, without a pilot.

Caen is fix leagues fouth-west from Sand-Head, a barred harbour, and full of finds going in.

Four leagues eastward lies the island of St. Mark, and to be failed about, but foul ground.

the ifland of out, but foal

The bay of *Hegs* is a good road for north-north-eaft winds, and, indeed, for all winds.

Cherbourg is a fmall dry creek.

From thence is Faux-Moberil, a dry haven.

A league from hence is Cape de Hague: west, three leagues from this cape, lieth Aldernay, west-and-by-north, almost three leagues long, east and west: the east is good to fail near the shoar, but the west is bad, and the south side worse.

From Aldernay to Guernfey, west-south-west, eight leagues; the east end of Guernfey is star, the west stoopy. Beware of the sistend of Aren; it is stull of rocks: betwixt the eastle and the land it is a good road at six or seven sathom, and without the eastle at twelve or thirteen sathom: it ebbsor slows here at six or seven sathom up and down. There is good anchoring round about the island.

From Guernfey to St. Malo's feven leagues fouth-fouth-eaft, and to Sacke, eaft-and-by-north, one league: you may anchor about it at twenty fix or twenty feven fathom.

From Guernsey to Jersey, south-east, eight leagues: There is good anchoring at Guernsey round about it; and yet there lie rocks to the west side: on the north side there is a good road for a north-west wind. Cateline Bay, on the east side, is a very good road. You may go between Jersey and the rocks, called Pater-Nester, eleven fathom, and anchor at Trimity Bay.

From the west end of Jersey to St. Malo's, south-and-by-east, eight or nine leagues. In the way there are rocks called the Monks.

The course from the Hagg to St. Malo's by Grand Ville, Mount St. Michael, and Caucall, is full of rocks and fands.

The island near St. Malo's, called Zezembre, a ship may go round about it safely.

The tides hereabouts rife and fall feven fathom. There is no entrance but for small ships into St. Malo's.

About five leagues west from thence lieth

a great fandy bay, where one may ride fix or feven fathom at all winds.

You may ride about the islands of Brifack; and a league and a half from hence are the islands of Pickle, islands which you may fail about; as also the seven islands, at four fathom, as likewise Greeveland.

The haven of St. John's de Dien, three leagues from Morlain, is a barred harbour; from whence you may go to Morlain through the rocks, and anchor in five fathom wa-

All havens thereabouts are barred, but Rojco, which is deep water, and has many good ships belonging to it. It is the Bas that makes Rojco so good a harbour.

Breft is the best harbour in all France, and Blavet the next: Odegerne is a good harbour; the bank before it is five or fix sathom deep on both sides; there is three fathom within at low water.

West Penmark is a good harbour, three fathom at low water. Bindett is a dangerous harbour for rocks.

There is good anchoring about the island of Mutton and Groye.

Blavet is an excellent harbour, four fa-

thom at low water,

Morbeau is a good harbour, but forceable tides, eight or nine fathom; within the east fide is a bold shore.

Behind the west point of *Croisick* there is a good road, at five, six, or seven fathom, and safe as in a harbour.

The river of *Nancy* is a good harbour, feven or eigh fathom water; but you must have a pilot.

The island Heyes has no good road; but the best is a fouth-west, or west-fouth-west wind.

St. Martin's twelve leagues, east-fouth-east from Heyes.

From St. Martin's to St. John de Luz, is fifty four leagues, and never a harbour in the way, but Bourdeaux, worthy to be accounted, being all of them barred harbours.

A Project how to war upon Holland, if they give Occasion.

If the Hollanders shall neglect our favours and friendships, or become obstinate, perverse, and insolent, and so proud withal as to distain us, I have not that mistrust of the force of England, but that it will prove the revenge, and punish their unthankfulness, as well by what I have said in the precedent project, as by this that follows; for as in natural bodies, the longer they live in health, sickness is the more dangerous when it affails them, so it will prove in an unsuccessful war of the Hollanders, who have so long sailed with a prof-

perous and fortunate gale, when at last they taste of the perverseness of fortune.

What can they value themselves upon, (to speak truly,) but England deserves the honour of it? We were the first that gave them life; and it is such a life, if they would consider it, that if we feed them not, they faint and famish. Let them remember an old observation of state, That he who entertains an army of strangers, takes a wolf by the ear; for as it is dangerous to detain them, so it is more perillous to let them go. And if his majesty at any time call home his

fabjects from their service, that have been the wolves to their enemies, they will foon become filly sheep for others to prey upon; for things eafily and unlawfully gotten, are foonest lost and consumed, if they be not

supported.

If England at any time excepts against their ill usage, and calls them to account for injuries, they will find that we are the ftronger, and able to give them laws, and they the weaker to accept of the less evil; for where can they trade but they shall find interruption by us, laying afide their paffage through our feas? that without our leave and harbours, they cannot fublist in their navigations? But now to my purpose, to what I have in hand.

I will imitate the marquis of Santa Cruz, a man eminent in Spain for his experience, employment, and good fuccess in sea actions, who upon the breach of peace with England in 1585. prefented to the king his mafter a relation how his territories should be de-

fended, and the English annoy'd.

And as an imitator of the marquis, I advife, feeing we know not how foon matters of unkindness may burst out betwixt Holland and us, that in the mean time we inform ourselves of the true state of their provinces by fea; and that there be a choice made of two fufficient feamen to be fent in a fecret manner into the Low Countries, to take a view of their shipping, as namely, the number of veffels, their ordnance, and quality of them; to enquire of their ships abroad, and the conditions of them at large; of their number of mariners, and to diftinguish betwixt the fishermen and failors; to enquire of the decay of their trades, if their men and fhips be employ'd in warfare ; to observe how a war with England will relish with the multitude, and where and how they think most to annoy us; for these things are necessary to be known from an enemy.

The next must be to supply and guard our forts and castles on the sea coast; for it is a main and important thing to keep the Holtanders from the succour of our harbours; and if they be forced to keep the fea in foul weather, with contrary winds and long nights, the length and narrowness of our channels, the clifts of England and France will be enriched with their wrecks.

Such towns feated opposite to Holland and Zealand, ought to be extraordinarily guarded and fortified, but especially Sandwich, Harwich, and Yarmouth, in respect of their harbours and roads to entertain fleets, their natural fituation for ftrength, and the number of people there relident that are descend-

But how all these places should be guarded and defended by shipping that are so far distant and remote from one another, there rests the difficulty.

In this case we must work according to the winds; for all fea actions are guided by it. And suppose the Hollanders with an easterly wind direct their course for Harwich, Yarmouth, or other northern parts of England or Scotland; and that our ships with that wind lie in the Dozons, which is our ordinary rendezvous, this northerly or north-east wind is full in our teeth to purfue them.

Or by keeping the fea with our ships, our meeting is as uncertain, the fea being wide and fpacious; and if we be taken with a hard gale of wind, and put to leeward, whilst we feek to fetch it up again, they shall have time and leifure to land where they lift, as I can instance in this case many

precedents.

And therefore, instead of the Downs. I conclude Yarmouth to be the only road for the rendezvous and feat of our fhipping; for there we shall be ready upon all occasions to set fail, what wir foever shall bring an enemy from Hollana, though it were into the river of Thames, or the northern parts, having the least warning, which we cannot fail of with fire-beacons, or pinnaces to be kept at fea. And as the advantage of an invader is to work with the advantage of the wind, fo must the defendant seek as well to prevent them by the fame advantage of wind.

The next thing I would wish to be put in execution, which rather should be the first, as of most importance, as I have already declared, is, the guard of his majefty's ships in harbour at Chatham; for the prosperity and welfare of England consists in their fafety: and if Holland should prove an enemy, now that Flujbing is in their poffession, and within fourteen or fifteen hours fail from Chatham, gives them a brave op-

portunity.

I think good to give this caution, That an attempt upon the navy is more perillous for an enemy to the eastward of us, as Ilolland, Denmark, Sweden, and Germany, than from the fouthward, as France, Spain, or the Streights; for ships from the eastward are able to come directly with one wind from the countries aforefaid, as those from the fouthward must have two contrary winds, the one at fouth-west, to bring them to the Downs, and after, an eafterly wind, to carry them to Chatham, which perhaps will not happen in an age.

And it is not unworthy confideration, how fatal those easterly countries have been to this kingdom, first by the Saxons, and after

by the Danish conquest. My next advice is, that we strive by all means possible to possess ourselves of the

firive by all

town of Flushing, being of more importance to our state than any town of Europe, as I will declare in my next project: first, we shall be strengthened with as many ships as belong to Middleburgh and Flushing: secondly, it will draw all the rest of Zealand into our subjection, the principal harbour being Flushing: thirdly, it will be a bridle to Holland; for they can no more maintain their navigations to the southward, than a subject to live under a king, and disobey his laws; for we having Flushing, and guarding the Downs in Kent, all succours and fatety for their ships upon that coast is taken from them.

Now to proceed to the *Hollanders* encountering us at fea , for that it must come to, not once but often, if wars ever happen betwixt us.

They will in reason labour to put their fortune upon the first battle at sea, because their state cannot maintain a long and lingering war with us: secondly, their ships and mariners, by which they live to support their state, their revenues being contributions raised out of trade, necessarily must fail, when their ships and men are converted to any other use than merchandize; but especially when the same ships and men must be maintained out of this kind of revenue, that was wont to bring in gain.

Thirdly, the victory first gotten redoubles the courage of the victor; it associates and disheartens the vanquished; it shakes the fidelity of subjects, many whereof are too much inclin'd to the Holland faction; it gets the reputation, and gains friends and alliances abroad, who commonly sway with good success: and therefore, I wish we never present them, at the first encounter, with less force than to determine the quarrel.

The benefit the Hollanders shall make upon our coast, is, the use of our roads, though we debar them our harbours; which roads are open, spacious, undefensible, and will succour them in all winds and weathers, as namely, the Isle of Wight, Portland, Torbay, &c.

And to prevent them herein, must be to divide our steet into three squadrons, as I have often said before; and being so divided, no ship can escape us; for though they shall pass one squadron in the night unseen, or in a sog, they cannot avoid falling into the lap of one of the other two: And we shall make our East-India voyage no farther than our own channel; for their ships must pass it going and coming.

I will not omit to put in execution a firstagem when our fleet shall be thus divided, viz. to place along the sea-shores fres like beacons from the cape of Cornwall, to to the North-Foreland in Kent, with a care

they be well watched and guarded; that when a fleet shall be defery'd at sea, or ships arrive in the road aforefaid, the beacons next adjoining to be fired, and like a running post, one fire to take it of another, that in a little space an easterly squadron shall have notice what happeneth to the westward, and the west to the east; so that howsoever the wind is, one of the squadrons shall come round upon the other, and upon the ships in the roads aforesaid.

But perhaps some will fay, That if so few ships as those of *Dunkirk* did so great a spoil to us in time of war, what can we expect but destruction from the *Hollanders*, that have an hundred vessels to one of the others in those days.

To which I answer, That though the Dunbirkers took many ships in the queen's time, yet they never lessened ours nor the Hollander's numbers; for by reason their habours were not to be entered at all hours and tides, but only at a half-slood, they used to take out the masters and merchants as pledges to perform such conditions as they agreed upon for releasing the ship and goods. And at that time they stood in that danger of our ships, and the Hollanders who guarded the coasts, that they durft not keep their prizes longer than they had made this contract aforesaid.

But with us it will be otherwife; for all fuch fhips as we take, we shall be able to enjoy without danger or fear, our coasts and harbours being nigh us, our ports capable at all times and tides to receive us. And I dare boldly affirm, that if his majefty will give free liberty to his subjects to take and spoil as many Hollanders as they can in their trades at sea, in a little space they will be able of themselves, without his majesty's help or affistance, to take or destroy the better part of their vessels within their provinces.

For let us compare them with the pirates of Algiers and Tunis, who till of late years, that they were instructed by Christians, were ignorant in what belonged to ships or mariners: and if we considered in what little space they increased to the number they are now of, being all of them ships of Christians, and not one of their own, it is to be marvelled, and our case to be compared with it.

For if we fit, furnish, and man such ships as we shall take from the Hollanders, and imploy them against the Hollanders themselves, the natural inclination of our men at sa considered, the small expence in rigging, victualling, and surnishing them; the little distance they shall sail both outward and homeward, and the continual supplies from land they shall receive, for one thip the pirates

of Algiers have taken, as aforefaid, we shall become owners of forty, and make one of them the destruction of another, without farther help, either at home or abroad.

For fecuring our Newcofile trade, it must be to fortify our ships with ordnance, to go in sleets, and to sail near the shore, that if they be chaced, or in danger of taking, to run on land. The countries upon the sea-coast must be commanded to keep a good watch in the day-time, and to be ready to rescue any ships that shall be so distressed.

And because I have named the ships of Newcastle, I will say something of them, and compare them with the ships of Holland, which some of my countrymen so much magnify, and hold so terrible, that they are frighted with the name of them, and defire to fright others.

What I shall say may perhaps be wondered at, and my judgment by some taxed; but, if well considered, it will not seem so great an error, as upon the first

apprehension. I will com pute two hundred sail of ships, betwixt two and three hundred tuns in burden, belonging to the trade of Newcastle, vessels for their strength in building, for their spaciousness within board, for the decks to place their ordnance, and all other conveniency to make men of war, I dare say Holland has not the like.

If these ships be fortified with English ordnance, which Holland affords not, but with grief I may say, is supplied from us, and if one hundred of our trained soldiers be put on board every one of them, which we may do of our own nation, and which Holland cannot do, unless they dissolve their land-army, and put themselves into the mercy of the enemy, I will be bold to say, that these ships alone will be able to encounter the whole force of the Netherlands, and, as I have computed but two hundred ships, by a project contained in this book, we shall double the number of two hundred, and, by consequence, be as strong again.

Though this trade feems to be but of fmall account, in respect of the grossies of the commodity, that it is amongst our selves, and in the kingdom, and that the ships return from Lendon unladen, yet we may account it of most importance and consequence to the state of England, considering the multitude of mariners it breeds,

and the readiness of them for his majesty's fervice, when he has studder occasion to use them; for every three weeks these ships never fail to make their repair into the river of Thames, if they be not hindered by wind; as all other trades but this is out of the kingdom, and upon their voyages in fummer, that if his majesty have need to furnish but two of his ships to sea, there will not be sound mariners sufficient to man them, if it be not for the Newcassle trade. Leaving this, I will once more return to our annoying the Hollanders.

And if we go further from home to feek out the Hollanders, yea, as far as the East Indies, a place that has puffed them up with pride, and has bred a heart of difdain against us, more for the number of their ships that refort thither, and the length of their navigation, than for any profit they find there. The next voyage we undertake shall be to seek them in their return from thence, in a defolate and uninhabited island, called Mauricius, after the name of the last prince of Orange, lying in the course betwixt those places of the Indies they trade to, and the cape of Good Hope. This island affords them great comfort and refreshing, which makes their navigation much the easier and commodious; and as the meeting of ships is more certain in a harbour than at fea, fo is ours the more fure

to find and take them there.

If it happen that the Hollanders fail falling in with that ifland, which must proceed more out of negligence than will; for they are to expect a great fuccour in their way home by that ifland, then they to repair to Saldanna bay, near the cape of Good Hope; or missing that, then to the island of Santa Hellena, well known to us, and long frequented by the Portugues is for no other places can succour their unsufferable wants.

And though we should fail to meet them in any of these places aforesaid, nevertheless they cannot account themselves safe at home, when they remember the long distance they have to fail, and the dangers they are to pass through our channel, if we become their enemies, unless they avoid us, by going into the north part of Scotland, which in my fishing project I have handled.

There are many other ways to offend the Hollanders, which I forbear to speak of, referring them to my breast, till there be occasion; and I will prosecute my design upon the island of Wakerland. A Pr

ys to offend to speak of, till there be te my design A Project how to get Possession of the Island of Wakerland, if the King of England will compound with the Natives.

In my former project I wish'd, as a matter of greatest importance to our state, to seek and get the possession of the sistend of Wakerland, wherein Flushing is seated; the reasons whereof I have in some kind declared; and now shall follow the manner how to compass it with consent and liking of the inhabitants, if they will accept and hearken to reason, before we attempt them with violence or force: for it is a maxim, He that is master of the sea, so the shall be able both to take and defend Flushing, or most islands.

The first thing we must put in execution, we must have a book printed and divulged in the name of some person, pretending to be born there; and advising the inhabitants of the island to hearken to his reasons, being moved to write out of a natural affection he bears his country.

His first reason is for them to consider the end for which they have so long sought, (viz.) their religion, their liberty, their security, and their commodity, and have not as yet attained them, nor like to do, so long as the king of Spain is made able to substitute that war.

The fecond confideration, is how to compass these four ends by a more gentle, and easy course than by war, which may be effected if they will judiciously weigh the ensuing reasons.

The book must make it appear, what discourtesies and oppressions Holland imposes continually on them; which indeed is unsufferable; but that both their security depends upon their mutual agreement, because of the third that is enemy to them both

To wish them to consider, That though their payment in the island of Wakerland do equal Holland in their proportion, and that their men of war of Zealand are efteemed and known to be more warlike, and to have done braver exploits than the Hollanders by sea, yet notwithstanding what service is done, either by land or sea, is all attributed to Holland; for Zealand and Wakerland is not once mentioned; and therefore to advise them to divide themselves from Holland, that their worths and virtues may appear to the world.

The way to attain to happiness must be by the countenance and affistance of some powerful neighbour prince to rely upon; and England, above the rest, would be able to obtain that for them, in a peaceable manner, which with the loss of their blood, they could not enjoy in seventy or eighty Vol. III.

years of war: and if the enfuing conditions may be yielded to, by the king of England, they may boldly fheath up their fwords, and never have cause hereafter to draw them again.

The Conditions on which the Inhabitants are to contrast with the King of England.

The beginning of all mens actions must tend to the service of God, every one according to his private confcience; and no other king in these parts of the world, but the king of England, does maintain the religion by them professed; and for the better proof thereof, his majesty's father, of famous memory, shewed himself a principal pillar, and the absolute cause to settle the true religion in their provinces; as it appeared by the council of Dort, against the innovation of the Armenians; which feet Wakerland was never known to favour or embrace: nor will his majesty assume the nomination of their elders, or preachers, or meddle with their church-discipline, but refer it to themselves.

Whereas they are over-charged with contributions and excifes, in the government they now live under, they may condition with his majefty, to eafe them the moiety of what they now pay, and the other moiety be referved for defence againft an enemy; or in fortifications or maintenance of garrifons; all which foldiers to be Englift, as people that are no ftrangers to them in acquaintance or conditions, as they have made proof when they lived together, without any kind of discourtefies.

Forafmuch as many times they appeal to the general flates, refiding in the *Hague*, or upon occasion they are often called thither, to their great expence and discontent they shall be eased of that trouble and charge, and determine all questions, and settle their affairs, amongst themselves, by authority from his majesty, without having relation to any other provinces: this will prove a greater freedom and liberty than they could all this while compass by the sword, or can otherwise do by any way they can think of.

His majefty by this grant, and other immunities he may give, without innovation or infringing their ancient laws and cuftoms, will make them freer than ever they have been; and his protection will be fo ftrong a defence to them, that no prince or nation dare offer to injure them, either at home or abroad.

5 P

Ιr

It is apparent what benefit they shall reap by these privileges: First, in easing them of the molety of their excises, but most especially, if his majesty will be drawn to grant them the privilege of his subjects in their customs within his own dominions, and to have a freedom of their ships to take freights within his majesty's ports, which the laws of the land prohibit to any but his own subjects; this will be much greater to their advantage and profit, than ever they shall attain to by living under the government they now do.

Perhaps his majesty may be drawn to confent to the remove of the English staple from Delph to Middleborough, where it had long continued heretofore, to the commodity of the whole island, as themselves best

In yielding their obedience to his majefty, is no new precedent amongst themfelves; for in the year 1424. after Holland, Frizeland and Zealand, with the island of Wakerland, had continued in the line of Thieri of Aquitain, the space of six hundred years, Jacoline, widow and heirefs of thefe provinces, refigned them to Philip I. duke of Burgundy; by which refignation these

three states became joined to Flanders, and the rest of the provinces, and still continues in the line of Philip.

If these people may enjoy their religion quietly, their liberties freely, their fecurity peaceably, their commerce, trade, and wealth plentifully, and have the honour to be subject to so mighty a king; no man can justly pity them, if by refusing it they fall into the hands of enemies.

And if their pride and obstinacy refuse this folid advice of a friend, as the flate of England now stands, that by our permission the Hollanders are grown to fo great 4 strength by sea, it behoves us to seek a remedy for our fafeties; which cannot be better done, than by possessing the island of Wakerland, which does more concern us than any plot of ground elsewhere.

And if we be put by force to enjoy it, there is no more to be faid than I have often repeated; That fo long as we are ftronger by fea, that we keep our ports guarded and armed, and prohibit their entrance into them, not only all Wakerland, but Holland and Zealand, will be at our devotion as aforefaid, as may appear by the project that went before.

Of the Harbours of Holland, Zealand, and Flanders, in order, if we have Wars, to take Advantage of them.

HE Texel has three channels, whereof the Spaniard's, or the king's, is the best: when you are within, there is a good road under the island of Texel; and from thence you go up to Amsterdam, and all places within the Zurick Sea.

To the northward of the Texel lies the Vlie, a good channel, but narrow; for ships that come out of the Zurick Sea, there are

two channels going out of the Vlie. From the Texel to the Maese, S. S. W. twenty four leagues, the Maese goes into the Brill, and has threechannels, whereof one is better than the rest, and has sixteen foot at a full fea: within the Brill the channel carries them to Skedam, Roterdam, Delph Haven, and other places thereabouts. The old Maese carries them up to Dort.

From the Maese, or the Brill, up to Goree, two leagues S. W. The Goree hath eighteen foot at low water; and fo you may go up at Helvoet-Sluice, where you may ride with the greatest ship of Holland.

From Goree to the island of Wakerland, fix leagues S. W. The island of Scowden is betwixt them; and Bruers-Haven is in that iffand.

Flushing is the best harbour in all Zealand, and lies in the island of Wakerland; the channel has four fathom, at the water going in.

From Flushing to Graveling, twenty four leagues W. S. W. these harbours following lie betwixt them, and all upon the coaft of Flanders, (viz.) Oftend, twelve leagues; from thence to Newport, three leagues; from thence to Dunkirk five leagues; from thence to Graveling, four leagues. Mardike lies betwixt the two last, and is the best harbour upon all that coast, as it is now made.

From the Texel to the Foreland in England, S. W. forty feven leagues.

From the Texel to Yarmouth, W. thirty two leagues; from the Maele to Harwich, W. a little foutherly, twenty nine leagues; from the Maese, or Goree, S. W. and by W. thirty fix leagues; from Flushing to the Foreland, W. twenty four leagues.

A Project

A Project how to make War upon Spain, written in the Queen's Time, and presented to Sir Robert Cecil, by her Majesty's Appointment.

THE continual annoyance our finall ships of war have for many years offered the Spaniards upon their own coafts, makes them of late more provident than before they were, by drawing home their fhips in fleets, that were wont to come straggling; as may appear by the West Indies trade, whose ships strove to be first at home, to take the better market; but now they use to repair to the Havana, where they attend the coming of the plate fleet; into which ships they put their silver, gold, and things of value; and are wafted them-felves by the fame fleet; by which means few of the India ships, have been of late years taken into England.

The Portuguese trade is more general than the Spaniards; as namely into the East Indies, Brafil, St. Thome, Castle de la Mina, and other parts of Guinea; from the two latter they use to send their gold brigantines to St. Thome, and transport it into Portugal with the fleet, which returns in September, both into Brafil and hither; they freight the boats of Holland, and the east country that are of good force, which defend themselves, and their lesser ships in their company from the English.

These fleets of later years have avoided touching at the Tercera islands, which were wont to afford them relief and fuccour, because they were continually haunted by the English; and fuch armada's as were wont to be fent to those islands, now keep off the headlands on their own coast, as the furest means to defend them; for whosoever feeks a coast, will first fall with a headland or cape.

How to employ our Fleets against Spain.

The last summer's good fortune that Holland and we both had, in taking each of us a carrack, may encourage us both to employ our fea forces against Spain, being a means to work us both fecurity, and for Holland to profecute their wars with more advantage: and if by one confent we agree together, we must resolve upon the imployment of two feveral fleets; the number, the time, and manner how to employ them, with the hopes of what we are to make by hem, are as follows:

The carracks outward: the plate fleet homeward.

The Firm Land and New Spain fleets out-

The carracks and New Spain fleet home-

The carracks departure from Lisbon is certain; for if they exceed the 15th of April, they are commonly forced back, not being able to double Abrobos shoals on the coast of Brafil in the eighteenth degree.

And, as I have faid before, that the meeting of a ship or fleet is more certain upon a headland, nigh a port whither they are bound, than in an open fea, where they may escape by night, by fog, by being to leeward, or many other cafualties; therefore, besides the gross sleet that should make good the coast of Spain, it were fit the enemy were busied in both his Indies; and how to offend him in his East Indies, I have fet down in this book; to which I refer you. Our fecond and most material hope, is upon the plate fleet, whose coming home is uncertain; though for the space of four or five years past, they have observed the months of March and April: the ports whither they refort are St. Lucar or Cadiz; the likeliest place of meeting them is cape St. Mary's, the headland they commonly make before they put into St. Lucar.

The greatest doubt of meeting this fleet, is the intelligence they may receive out of Spain; confidering the small distance betwixt them and the Indies, and the certainty of the winds, whereby they may give warning to their fleet to winter there, if they see cause; and therefore the subtlest and securest course to prevent them, is to send two or three pinnaces, excellent choice failors, to lie before the Havana, to attend the coming out of their fleet, and after to purfue them aftern, till they bring them into the heighth they mean to hail in; which done, one of the three pinnaces may repair with all speed to our fleet, where they shall have directions to find them, and give relation in what state, and in what heighth they left them: the other two pinnaces are not to leave company of the fleet, unless the fleet alter its heighth; which, if they do, one of the two pinnaces is to follow the fame directions the other did, with this caution, That if they find themselves in danger of being taken, they throw their instructions over-board.

The third and last hope of our fleet is the ships of Terra Firma, or the Firm Land, which go for the next year's plate, and are commonly to depart from Spain, at the coming home of the other fleet; the place to meet them is eighteen or twenty leagues from Cape Canteen in Barbary. We may know by the wind, within a point or two, how they will steer, as also the time of their

departure

departure from St. Lucar by the moon; for they must observe the spring-tides to come over the bar: we may likewise provide to have intelligence by the way of Mamora or Salley, two towns in Barbary, opposite to that part of Spain.

If we should prove to unhappy as to miss

If we should prove so unhappy as to miss this steet, if her majesty will purpose this squadron to the Indies, they will not fail meeting with them at the northermost part of Dominica, where they use to water; or being departed from thence, their course is certain to cape de Vela; and after to Nombre de Dios, where commonly they take in their treasure, and where they may be easi-

ly furprized.

I will fuppose our second seet to be at fea, upon return of our first, who have these fea, upon return of our first, who have these several hopes likewise: the carracks and New Spain seet homeward; and the New Spain seet outward. If her majesty will resolve to keep a continual seet, as is proposed, sew of these ships can possibly escape us, either going or coming, seeing we know the course they fail, the season of the year they must needs pass, and the harbours whi-

ther they are bound.

The New Spain fleet outward, is to depart from the same part, through the same seas, and in the same course, the Terra Firma or Firm Land steet doth; only they differ in the time of the year; for they exceed not their midsummer-day to set sail from Spain, because of their safe getting to the port of St. John de Ulva, before the entrance of the northerly winds, which are perillous upon that coast.

Their watering-place is Guadalupe, where a fmall ftrength were able fuddenly to furprize them; their men and fnips being out of order and farme, by their rummaging them, and doing other works about them when they come to water; and their force confifting but of two galleons of war, the one admiral, the other vice-admiral.

The Security to our State.

These undertakings being followed according to the designs set down, and taking that good success that is hoped for, are one great means to breed security to our state; the enemy being impoverished, and we enriched.

Our only fecurity must be to cut off Spain's forces by sea, seeing their means of invasion and strength of defence depends upon their shipping: how this service may be affected, and the benefit that will arise by it, is here briefly handled.

First, and principally, we must keep employed two main sleets upon the coast of Spain eight months in the year, that is, from March to November; every fleet to confift of forty five ships, to be divided into three squadrons; one to lie off the rock to intercept all traders of Lisben; the second at the South Cape, to stop all intercourse to St. Lucar and Cadiz, and to and from the Indies; the third to the islands, left they should there stop, and put their goods ashore, having intelligence of our being upon the coast of Spain.

Our fleet being thus divided, no army at fea can be prepared, or at least gathered to a head, but we shall intercept them; we shall not only debar the Spaniards and Portuguese their own trade, but all nations to them; they will not be able to feed without our permission; nor no nation can be brought to greater extremity than they will be.

Perhaps the number of these ships will exceed the proportion her majesty is willing to employ; but if Holland will be drawn from the trade of Spain, and join with us, the number may be easily raised by them, and our maritime towns in England, so that her majesty needs employ but its ships of her own in each fleet, to serve for admiral and vice-admiral of every squadron.

It is not the meanest mischief we shall do the king of Spain, if we war thus upon him to force him to keep his shores still armed and guarded, to the infinite vexation, charge and discontent of his subjects; for no time or place can secure them, so long as they see or know us to be upon the coath.

The terror is so great they conceive of her majesty's ships, that the of them prefenting themselves in view, do commonly divert their actions, as may appear by these brief observations following.

In the year 1587. Sir Francis Drake with twenty five flips prevented an expedition for England that fummer, which they attempted the next year, 1588. because they were not molested, as in the year before.

Our action to *Portugal* following fo fuddenly upon the overthrow of 1588 made the king of *Spain* fo far unable to offend, that if it had been profecuted with judgment, he had been in ill circumflances to have defended it, or his other kingdoms.

From that time till 1599, he grew great by fea, because he was not busied by us, as before, as it appeared by the steet that took the Revenge; which navy it is very likely had been employ'd against England, if it had not been diverted by my lord Thomas Howard in 1592.

And for four years together he employ'd his fhips to the illands, for the guard of his merchants, which made him have no leifure to think of *England*. The expedition to *Cadiz* in 1596, did not only from the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of t

ftrate the intended action against England, but destroy'd many of his ships and provisions that should have been imploy'd in that fervice.

In 1597, he meant a fecond revenge upon England, but was prevented by the expedition of my lord of Effex to the islands, which action, if it had been well carried, and that my lord would have believed good advice, it had ruined the king of

The next year, that gave cause of fear to the queen, was 1599, the king of Spain having a whole year, by our sufferance, to make his provisions, and brought his ships and armies down to the Groyne; which put the queen to a more chargeable desensive war, than the value of an offensive sheet would have been maintained upon his coast.

This great expedition was diverted by the fleet of Holland, which the Adelantado pur-

fued to the islands.

The year that followed was 1600, which gave hope of peace; for nothing was attempted on either fide till the year 1601, that he invaded Ireland, but with ill success, as you have heard.

by her majefty's ships in the mouth of his harbours, with the loss of a carrack, so that he was not able to prosecute his affairs against Ireland; for no sooner was Sir Richard Leeuson returned, but I was sent again upon that coast, as you have heard, who kept the king's forces so imploy'd, that he betook himself only to the guard of his shores.

The fequel of all these actions being duly considered, we may be consident, that whilst we busy the Spaniards at home, they dare not think of invading England or Ireland; for by their absence, the sleet of their Indies may be indangered; and in their attempts they have as little hope of prevailing.

ing.

Thus have I ventured to deliver to your honour, fo much as you defired at my hand; and fo much as I think is convenient for our prefent actions.

How to work for intelligence out of Spain, I have shewed in my fir book; but will proceed to the state of the harbcurs in Spain, for us to take advantage of.

Of the Harbours in Biscay.

From cape Machichaea to cape de Pennas, lies the coast of Biscay.

From cape Machichaea to Bilboa thirteen leagues, S.S.W. Barmea is in the way; a barred haven.

a barred naven.

Placentia, W. from it; a barr'd haven.

Bilboa, a good harbour; but in it there is a fand, called la Bars.

Vol. III.

Castro, five leagues from Bilboa; no fafeguard for ships but with a S. W. wind. From Castro to Lavedo, fix leagues, W.

a good harbour for great ships. From Bilboa to St. Antonio, W. and by

N. nine or ten leagues.

From St. Antonio to cape Kefgo, W. three

leagues.
From cape Kefgo to St. Andre, five leagues,

W. and by S. a good harbour.

Betwixt St. Andre and cape Pennas, thirty

feven or thirty eight leagues, W. and these havens betwirt them:

The haven of St. Martin, W. five leagues from St. Andre; a barred harbour.

St. Vincent, five leagues, a barred haven, from St. Martin.

To Chares three leagues, in a barred harbour.

Roi Sella — five or fix leagues; a barred harbour.

From thence to Villa Vicioga two leagues; a barred harbour.

From thence to Sanson, seven leagues; betwixt it and a little island, there is a good road.

In the west side of Sanson is likewise a good road.

Orion, where fishermen lay their nets. Torres, a good road for a S. W. wind.

The cape *Pennas*, three leagues. From cape *Machichaea* to cape *Pennas*, fixty eight leagues.

But coming from St. John de Luce in France, Fuenterabia, four leagues; from thence a good road for a N. W. wind.

Passage is the next, a good harbour, at feven fathom.

St. Sebastian, three leagues W. from it; a good harbour, five, fix, or feven fathom before the town.

From hence to cape Machichaea thirteen leagues.

It is good anchoring in all the bays upon the coast of Biscay twenty fathom.

The Coast of Galicia.

From cape *Pennas* three leagues S. S. W. to *Aviles* a good harbour, and a good road without, feven or eight fathom within the harbour.

From Aviles to Ribadeo, three leagues, S. W. and by W. a good harbour, three fa-

N. W. from Ribadeo eight leagues, cape Brilo; and within Vivera, a good harbour, one may go about the island of St. Cyprian.

From Vivera to Ortegall nine leagues,

St. Mark's, in the way, a good road, at feven or eight fathom without; fafe for a S. W. and a W. wind all the coast along.

5 Q

Andaluzia.

Aydmonte parts Portugal and Spain, and is one of the best havens in all the Condado, three fathom half-slood.

Lepe, or St. Michael's, not to be entred without a pilot, the channel alters fo.

Palos, or Sa'rs, fix fathorn within, at the bar three and a half at half-fleod.

St. Lucar has a great bar, but deep within for any ship.

Cadiz, a brave bay at eight, ten, twelve, or fifteen fathom: from thence to the Streights mouth eleven leagues.

Barbary.

Opposite to this part of Spain lies Bar-bary, though the king of Spain has most harbours in it, as namely, Oran, Ceuta, Tangier, Alaracke, Mamora, Afamor, and Marzagoa. The Moors have only Salley of the north, and Sasin and Santa Cruz on the west.

Arzila, the north channel, good ships may enter.

Alarache, the river crooked, but a good road without, at fifteen or fixteen fathom.

Mamora, two fathom at entrance, but a good harbour within.

Salley, a barred harbour all that coast; a good road at fourteen or sifteen fa-

Marzagoa must have a pilot to bring in a ship.

To cape Cantyn thirteen leagues, only a cape to ride under.

Safin, a good road, ten, eleven, or twelve fathom.

The island of Magadore, a good road for small shipping.

Santa Cruz, fuch a road as Safin.

A Project how to increase two hundred Sail of Ships.

EAVING the voyages usually gone into foreign countries by our nation, the next I will undertake, shall be to sail to Newcastle, which we may properly call our North Indies, because of the commodity and strength that ariseth to the kingdom by it, as shall appear by what follows.

by it, as shall appear by what follows.

The chief trade we have now-a-days to increase mariners and shipping, is our trade to Newcastle: there are yearly set to work in that trade two hundred fail of

fhips, which ships and mariners are once in three weeks in the port of *London*, ready for his majesty's service, if there happen any sudden occasion.

All other trades are out of the kingdom, and upon their voyages in the fummertime, fo that if his majefty has occasion but to furnish two of his ships with men, the kingdom cannot afford them at that time of the year, if it were not for the trade of Newvastle.

he kingdom, the fummerhas occasion ps with men, hem at that not for the

be by increasing this trade, whereby more fhips may be fet to work, (as thus,) to prohibit all strangers to fetch coals at Neweastle; and for us to make our staple at London or Woolwich for all strangers to ferch their coals from thence, after we have with our own fhips brought them thither; for whereas there are two hundred fail of ftrangers ships set to work to the trade of Newcaftle, the same number of ships would be increased, if his majesty's subjects had the bringing of them for London or Woolwich.

I will now prove it to be rather beneficial than burtful to strangers.

1. The stranger will be able to perform this voyage in ten or twelve days to London, when many times he is five or fix weeks to Newcastle; so that he shall make three returns for one.

2. Whereas the stranger carries only ballast in his ship to Newcastle, because that country cannot vent fuch merchandize as they would otherwise carry, they need not come empty to London; for that London will take off all fuch commodities as they bring, to the increase of his majesty's cus-

3. Whereas most of the strangers that come to London, go away in their ballaft, by which means they carry out of the kingdom fuch moneys as they receive for freight, if the staple of coals be fettled in London, they will be glad to imploy their moneys in coals, which will be profitable to them; and we keep our moneys in England, which is now carried away.

4. The bar going into Newcastie, and there lying on ground with their ships, confumes and weakens them, having their weight of coals on board; I mean the ftrangers ships, that are not built with the ftrength that ours are. As in London their ships will ride and float, and take in their coals out of one ship into another, which will lengthen their ships four years in the ordinary age of fhips; so that they will gain the third part of a ship in changing their ports.

5. They shall not be subject to the spoil

The course how to effect this project must of pirates, as hath been of late years to Newcastle; for pirates never resort into the narrow feas, because his majesty's ships are continually there.

> The Stranger cannot except against this, because the like is used in other Countries.

> 1. The Venetians have a law, That no strangers shall take in goods into their ships, in any of their ports, before their own thips be laden; or elfe they will take the lading out of other ships to lade themselves.

2. In France there is a penalty, That our Englishmen may not bring falt for their own fpending; if they do, it is forfeiture of ship

and goods.

3. In Calais they will not fuffer any paifenger to go for England in other veffels than their own.

4. In Dunkirk they have lately taken up the Venetian law.

5. In Holland they will not fuffer any fhip of another town to take in goods from one town to another, but they must transport it in a ship of their own town; as for example, a ship of Flushing to go to Rotterdam, to carry to Flushing; but it must be fent in a ship of their own town: and this they do, because they will make an equality in fetting their fhips and men to work.

6. The Biscainers have the same privilege over all other Spaniards the Venetians have over strangers; and the reason is, because Biscay affords all the best mariners in the kingdom of Spain; and to encourage them to fea, this privilege is granted

Now I have strengthened this kingdom with defensive forces to withstand the power of an invalion, and shewed the means how to invade our neighbouring enemies, if they become fo, I will not contain myfelf in the temperate zone, but feek what projects may be produced in the torrid zone, where the fun has fuch a fcorching power, that the philosophers thought it was unhabitable; and I will take Guinea in my way to the East Indies, it being the place from whence they were first discovered.

A Project in the Days of Queen Elizabeth for the settling her Subjects in Guinea; shewing of what Convenience it would be. Writ in the Tear 1597.

HE neglecting the opportunity in times paft, by refuling the offer made by Columbus to Henry VII. for the discovery of the West Indies, which Spain then accepted of, has made Spain, which was one of the most inferior kingdoms in all Europe,

now become the mightiest in wealth, greatness, and esteem; and to think to lessen them in those parts where they are grown fo mighty, is now too late, their footing is fo strongly fettled in America, and especially between the two tropicks, which natural-

The

ly affords gold and precious merchandizes; for in colder climates we can expect little gold, by what we have found in Norren-

But many are erroneously carry'd away with an opinion of Guiana, and the plenty of gold in it, which makes them forward to settle an habitation in that country. The only reason I conceive men can have to induce them to it, is the climate, that may afford gold, but no proof of any hitherto sound there; and I have given my reasons of the unlikeliness of finding any there in my fourth book.

My reasons for disapproving our planting in Guiana are these: first, it is in the continent of America, fronting upon the Spaniards, whom we shall find very ill neighbours to us. The second is, the men we send must be by sea, and that far off; and the number cannot be so great to cope with the Spaniards that are there already: and it will so much concern them, not to accept of our neighbourhood in those parts, that they will rather imploy their whole forces to remove us, it concerning them so deeply, not to have any partakers with them in their Indies.

Thirdly, we shall enter upon a poor barbarous country; the people wild and rude, that can give us no affurance of their fidelity, being void of understanding. The provifions we must live on, must be carried by us, the country having no strength but by nature, no towns or houses to lie in; and requires a long time and great charge to be furnished with victuals, fortifications, and buildings.

But leaving *Guiana* for the reasons here given, I will a little handle the planting and inhabiting *Guinea*, and will prove it the most convenient place for us, now in time of war, to possess and keep.

The country is nearer to us than Guiana, the trade certain to the Portuguese for gold, and other commodities, which Guiana affords not; our fettling in it in times past was fo much feared by the Portuguese kings, that they fought by all means possible to divert us; and king John II. understanding of a preparation of a fleet in England for a voyage to Guinea, doubting it would prove prejudicial to him, sent Rui de Sonsa, a principal man of his country, ambaffador into England, to confirm the old league with Edward IV. and to acquaint him with the title he had to the feigniory of Guinea, defiring him to lay afide his fleet that was preparing for that coast under the command and conduct of John Tynten, as also not to fuffer or permit any of his subjects to trade for Guinea.

The king was willing to yield to his request, and defirous to accept of his league;

for in respect of his domestick troubles at home, he could not have leisure to seek the enlargement of his kingdom abroad: thus for necessity sake our country lost the opportunity of trading and inhabiting part of Guinea in the days of Edward IV.

And fince the year 1553: there was a voyage undertaken by the perfuafion of Antony Ames Pinteado, who being a man of good regard with the king of Portugal, by talfe fuggeftions was cast out of his favour, and forced to fly his country; and coming into England, he discovered to certain merchants the benefit and commodity of Guinea, he having lived there some years himself.

The king of Portugal hearing of this flex, fought by all means to take off Pinteado: fift, by promite of great rewards to procure his return; which failing, his death was practis'd by fome Portuguese in England, which he having knowledge of, prevented.

Laftly, the king thought to frustrate his defigns, and arm'd a galleon to intercept him at fea. This galleon met the English, but durft not offer any violence.

The voyage was proceeded on with great hope of good to follow; but through the wilfulnefs of Windbam, who had the command of it, a man both rash and headstrong, preferring his own stubborness before Pinteado's experience, the voyage was overthrown; for after they grew rich by trade, Pinteado persuaded their return for that year, alledging the danger of sickness by their longer stay upon that coast: But Windbam neglecting his council, in few days after there grew a most contagious sickness amongst them, that they both died, and many of their company, before they could recover home.

Doubtlefs if this voyage had been discreedly carry'd, as it was projected, it had returned great profit for the present, and had settled a continual trade into Guinea in a small space; for the negro kings offered them many immunities, and a place to dwell and sortify; and this happen'd at the beginning of the Portuguese plantation, which in little time it would have been occasion for us to have eaten them out of their trade, and given us opportunity to discover new lands and trades within the country, as the Portuguese did from thence into the India.

Many more voyages have been attempted by the English, upon that coast, with profitable returns: but at the chief place, which is the Casile de la Mina, we could never attain to have a trade; but if her majesty please, yet there is no time overpast, but that the country may be subdued, her subjects settled in it, and the trade main-

tained w

Spain.

The pwealth is whereof tributary defended have fette country.

en attemptcoaft, with chief place, , we could , but if her time overpe fubdued, trade maintain'd tained with a yearly and certain benefit to her majesty, as now it is to the king of Spain.

The place of importance for ftrength and wealth is the Cafile de la Mina, the taking whereof makes all the reft of the country ributary of courfe, it being the only place detended by the Portuguese, and where they have settled the chief trade of the whole

John Baptista de Revolasco, at my being in Portugal, had the country of Guinea in farm from the king, no man having licence to trade thither but himself, whose course was not to seek the negroes in their own ports, and make the voyage long and uncertain, but he sent his merchandize to Casse de la Mina, whither the negroes to forced, as well from the inward part of the country, as from the sea side, to utter their commodities; by which means he made Mina a continual mart, being always surnished with great quantity of gold.

The place being taken, the wealth in it will be great, the keeping it not chargeable, and rhe living in it fecure, it being ftrongly for:ify'd to their hands, with helps that we shall add unto it: it yields plenty of victuals: the town is fairly built, the people civil, the country not unpleasant; all these are sufficient encouragements and motives for us to inhabit it.

Though many object the fickness of that climate, by example of divers ships of ours that have felt it, yet the true cause has grown from want of experience: for there are divers observations to be followed by them that shall refort there to live.

The first is the time of the year in going, which is in September: the second, is the time of of staying, which must not exceed March. And whilst they abide there, they must keep and observe a certain diet; for there are three things principally to be avoided, (viz.) the unmeasurable eating of fruits, the serence or dew that falls morning and evening, and the company of the negro

I have examined the voyages made thither by our English nation, and find the greatest death of our men is in their return home, coming out of the hot countries into the cold; which proceeds principally from want of cloaths in the poor mariners; and this is ordinary in our shorter voyages: but such as shall live in the country, no time of the year is to be respected for their health; for it is to be supposed that no man is so gluttonous as to over-eat himself, where he shall find so great a plenty, and so good a choice; for nothing breeds a surfeit so son, as after a scarcity and want, to come to plentiful feeding, and want of government

Vol. III.

and difcretion to temper themfelves in their dier

Moreover, those that live ashore in Guinea shall have houses to defend them from the serene, or other insection of the air. And in answer of the negro women, I think no Englishman so barbarous as to offer it.

By possessing the Mina it may give us a great encouragement of other discoveries; neither do I see any reason but from thence we may find a way by land to Tombagoto and Gago; that would afford as great plenty of gold to the queen, as Peru does to the king of Spain.

The king of *Morocco* has a trade to those places; and the chief merchandize carried thither is falt: if we could get thither by land, I doubt not, but from thence, or near thereabouts, we shall find some river to fall into the sea, that in time we may come at it by water; and then shall her majesty become as great and rich in the eastern parts of the world, as the king of *Spain* is now in the western.

Her majesty having Guinea, may turn it to her best profit and commodity, as to plant fuch things as the earth will bear, the foil affording as great plenty of mer-chandize as the West Indies, (as for example,) Guinea and Brazil yield as good, and as great store of ginger as the other doth; but the king of Spain commands that no ginger fhall grow in either of them both, but fuch as they preserve for their own use, and call it green ginger; for if he would give leave to plant it in Guinea, the increase would be fo great, that he would make it of no value in the West Indies: likewise the West Indies, Guinea, and Brasil, will yield a better grape, and a greater quantity of wine will be made there than in Spain; but the king will not grant it, nor permit the general planting of grapes. Thus does he politickly keep one country under another in their commodities, and bars the earth from bringing forth the increase for the use of man, as God has appointed.

There will be required for this voyage five hundred foldiers, and convenient fhipping to transport them, with all things neeffary for fuch an action. The men that go must be choice in their abilities of body, and clear from fickness and diseases; for infected men carried from home, have been the overshow of may enterprizes.

the overthrow of many enterprizes.

The greatest force the *Portuguese* prefume upon, is their number, and the valour of their negroes, whom they make believe, we defire to conquer and kill; and that our quarrel is their defending them.

But to prevent this policy of theirs, we will carry negroes with us that fpeak their

language, and have lived in Europe, and feen the difference of our using of them, and of the Portuguese's for in Portugal they buy and fell them, as we do horses, in markets.

When these things shall be known to the negroes, it will be a means, not only to delire peace and friendship with us, but to animate and provoke them to rise against

their mafters.

In this journey there must be special care and choice in victualling, both for the goodness, quantity, and diversity, for our ordinary victualling with salt meats breeds a putrefaction of blood in hot countries, and is one great cause of their sickness in those parts. The men that go, ought to have this and change of apparels for the nature of the ferenc is to rot any kind of garment.

Though this voyage was not undertaken in the reign of queen Elizabeth, which was the active age for fuch enterprizes, and the time gave great advantage, by the weak

provision the king of Spain had thereabouts, yet fince the war ceafed, by our laborious endeavours, we have attained to a profitable trade on that coath of Guinea.

I must confess I much laboured to put this voyage in execution at the time we were authoriz'd by a war with Spain, to juffily our doings; and to flew my willingness the more, at my release out of my imprisonment in Spain, in 1591. I procured a rutter of the coast of Guinea, that shewed the distance, the height, and course from pore to port; the dangers, and how to frun them; the conditions of the people; the commodities the country affords, and what they defire from us a which I think not fit to infert in this book, for making the volume too spacious and great; but will proceed to a defign of the West-Indies, which was prefented by me, and promifed by the queen to have it undertaken as I projected

A Project of a Voyage to the East Indies, with a Design to have had Footing in the hithermost Part thereof.

Will profecute my voyage from Guinea to the Eest Indies with my infuing projects, as Bar:bolomew Dios proceeded in his discovery; and the first port I will arrive at, shall be Mosambique, a place of great importance and relief to the Portuguese, both going and coming from the Indies.

It her majetty will pleafe really of herfelf, or by joining with her merchants, to undertake a voyage to the East Indies, it will prove a great annoyance to the king of Spain and his subjects, if the projects following be well undertaken and prosecuted.

The only good we are to expect of this East India attempt, must be the provident proceeding in our first voyage, as well to fettle a certain and secure trade, as to have

habitation in the country.

And therefore to go abruptly, and to offer them a trade, confidering we are, or shall be differed by the *Portuguefe*, and *Hollanders*, were a thing uncertain, and full of hazard; for though those two nations love not one another, yet to bar us of our resort thither, they would not slick to cast many foul aspersions on us.

For prevention whereof it were necessary her majesty made choice of an able and well experienced gentleman, who, besides the charge of the voyage, should have the im-

ployment of an ambaffador.

His meffage and letters should import the greatness of her majesty's state, her power by land and sea, her protection of the Netberlands, and the several disgraces and overthrows she has given the king of Spain,

whereby it is to be fupposed, that some of the *Portuguese* his subjects, in their secret hate to our nation, nor being able otherwise to revenge themselves, have most unjustly scandalized our proceedings: therefore wishing them that they would receive what she writes for a truth, coming from so mighty a prince, and to give no further credit to the *Portuguese*, than as the behaviour of her subjects shall deserve.

What prefents or obligations of friendflipher majefty should fend in fign of her love, I will omit, only there must be care to win fuch persons as have most credit with the princes with whom you shall traffick. And the conditions and articles settled, we defire that an ambassador may be sent to her majety, with offer of pledges for his safe return.

The exceptions against this voyage, are, the great distance from England; the danger of the people, having no religion to engage themselves by; the force of the Portuguese by their long continuance there; and the commodities we must send, which are fine filver and oil, the one we may ill spare, the other our country doth not naturally yield.

The method to provide against these inconveniences, is, whilst there is no suspicion of us, to possess and keep some town of the Portuguese nearest us, it will prove a great refreshing to us, and make the journey both short and pleasant. Secondly, we shall be the more respected by the people, when they see we have sooting so near them. Thirdly, we preven bique,

ainst these ins no fuspicion e town of the prove a great journey both we shall be le, when they em. Thirdly, we shall weaken the Portuguese, and prevent their carracks wintering at Mofamtique, if they fail doubling the cape of Good Hope. The reason I prefer Mosambique before the rest of the Indies, is the neurness to us, and where the carracks certainly water in their way to the Indies; and the time is fo certain'y known to us, that we shall undoubtedly intercept them.

The riches of the town are both gold and merchandize; for the governors and dwellers of Mosambique are allowed only the trade of Sofala, lying under that jurifdiction. The keeping of the town will be eafy, the dwelling in it fafe; for it is feated in a ftrong and defenfible island; it has plenty of victuals, corn excepted 3 the town is fairly built, with many commodities to it, and in every point like the castle de la Mina, I have formerly deteribed.

When we are mafters of the town, and have fortified it, and possessed our selves of the carracks, the enemy will be weakened, and unprovided of entertainment in their way to the Indies; for that it is the only place where they have refreshment.

The Portuguese use this place for their refuge and fuccour, not for trade, but only what the governor drives with Sofala, as I have shewed; but we will make it our chiefeft town of mart, and thereby our voyage shall be made short and easy; for our ships

that go thither, shall fetch away the goods that our ships bring from Goa, and other parts of the Indies; by means whereof, every twelve or thirteen months we shall have a certain return of our adventures.

The way of proceeding upon this expedition must be to fend an extraordinary number of failors, befides the foldiers; the failors to man the carracks, the foldiers to defend the town; they must depart from hence in February, and be at Mofambique by the last of June, which will be twenty

days before the carracks arrival.

The money and goods taken in the four carracks, may amount well nigh to fix thousand ton in bulk, which may be there unladen and kept in flore-houses, and vended into the Indies by our ships yearly; for they are fuch commodities as will keep, and the return of them in truck will be more commodious than five times the bringing of them for England,

Our hope is no less in meeting their carracks in their return for Portugal, at the islands of Santa Fiellena, where they never fail to water; and if we have the happiness to enjoy them both going and coming, we shall be masters of an inestimable wealth, and bring the Portuguese dwellers in the East Indies to fuch an extremity by it, that they must be forced either to revolt, or accept of our trade.

A Project and Reasons against our East India Voyage, fully answered before the Trade began.

HE Hollanders, who are a people both apprehensive and laborious in what they conceive or undertake, having light given them by the two voyages of Sir Francis Drake and Mr. Cavendish, what the East Indies and South Sea afforded in wealth; and being likewise seconded and encourag'd by the follicitation of some of their own nation, who put themselves into the service of the Portuguese trading into the East Indies, and whilst they were there, understood the depth and fecreey of it, revealing it at their return, were fo far prevailed upon, as to pare no cost to make trial where there was fikelihood of profit; and accordingly began a trade into the furthermost part of the Indies, and have yearly fince continued it with various fuccess.

Not long after, we, who are rather imitators than first enterprizers of things, where there is not a prefent return of profit, finding by the fuccess of the Hollanders that the voyage was worth our embracing, by the rumour of gain ipread abroad, (though in this, as many other reports, fame proves as often false as true,) thought fit to venture fomething upon it: and accordingly our English merchants gathered their joint-stocks together, and from thence-forward to this very day they have fettled a trade in the East Indies; and what it has produced you shall understand at the end of this argument.

But forafmuch as every innovation commonly finds opposition; from some out of partiality, and from others, as enemies to novelty; so this voyage, though at the first ir carry'd a great name, and hope of profit by the word India, and example of Holland, yet was it writ against, and answered, as in the enfuing discourse shall appear.

1. Object. This voyage will be an occasion of exhausting our silver, which is already too much diminished by the Irish wars, and by the Hollanders drawing of it and our gold over into the Low Countries.

Anfw. I confess this is the strongest reafon of the feven, that are alledged; yet I think not but there may be means to draw out of other countries fuch a quantity of filver, as would furnish this voyage yearly; if

BOOK V.

there could be means to keep our own filver turers shall be forced to abstain from bringing from transportation into the Low Countries: for it is to be feared, that the best part of filver the Hollanders fend into the East Indies, is drawn out of England. But this objection is fully answered by the project of Mosam-

2. Object. It will be the decay of many a good mariner, in the climate there, and by the way being so untemperate, that either the one balf, or a third part of our people cannot but

Answer. This trade, in my opinion, will be fo far from diminishing our seamen, that no voyage will or can breed better mariners; for long voyages make the skilfulleft and best navigators. But whereas the unnatural heat is alledged for the cause of the death of men, we find by experience, that the greatest infection and death of people is not whilft they abide in the hot countries, but in the entring into the cold out of the hot, which comes principally for want of cloachs in poor mariners, as I have faid fufficiently in my discourse

3. Object. It will be the decay of shipping; because, unless they be sheathed with lead, they prove so worm-eaten, that they are never after ferviceable, except it be for one voyage only.

Answ. I cannot see how this can any way prove the decay of shipping, but rather the maintainance of greater thips than have been used among our merchants; for if they mean to maintain an yearly trade, they cannot have less than eight or nine ships of one thousand or twelve hundred tons each; which, upon the occasion of service, are of greater strength than the whole shipping of London; and where there are so many good thips fet to work, it will be a maintenance both of ships and men ; for as people die, double the number will be bred and harden'd by these voyages.

All this while we speak by conjecture, not by experience; for what greater trial can there be, than of the Portuguese ships, who make their voyages a year and half long; and yet most of them make twelve or thirteen voyages: after this proportion they continue much longer than ours; yea, I have known one carrack make twenty four

But if you allow that sheathing them will continue them the longer, we may better do it in England than Portugal, because our

country affords it.

4. Object. It will binder the vent of cloth; for whereas now our merchants may put over their six months bills of debts, as well for spices as other merchandize, thereby to m. the more speedy return; our East India merchants will be able to afford them so cheap at our own doors, that our merchants and advenin of spices, and so want often times present commodities to make return of.

Answ. Here we speak generally, that it will hinder the vent of cloth, because the merchants may put over their fix months bills for fpices; but the fpices being afforded better cheap at home, the merchant must be forced to leave off his trade, as though our chief vent of cloth were in exchange of spices: but I conceive that in most countries where they utter our cloth, merchants do not return spices; as into Barbary, Italy, France, &c. From some parts of the East Country we have fome spices, but very little, which was wont to have come from Turky to Venice, and fo dispersed into the East Countries; but fince our trade to Turky it has not been much.

What inconveniences can then grow of this trade, but to our Turky company? which, if they cannot have other commodities than fpices, to exchange for our cloth, it were better for the commonwealth to diffolve that trade, than that to the East Indies which is the fpring-head from whence

fpices flow.

As we are now ferved with spices, it is at the third hand, and at an unreasonable rate, which enriches fome private men only; but furely, if this trade to the East Indies were encouraged, and carry'd with equality, the commonwealth would be the better for it; infomuch that all manner of spices would be far cheaper than now they are. If any find prejudice by this trade, it will be the Turks themselves; when they shall see all Europe ferved with Indian commodities, directly by fea, their trade will be overthrown.

5. Object. They will bring in fuch quantities of spices as will lie too long upon their bands, and not to be vended in due time; as was feen by the pepper of the carrack, which not withstanding a general restraint against the bringing in of all other pepper, to the hindrance of many a merchant, yet it was a year before it

could be made away,

Answ. Allow that our trade will decay in Turky, especially for spices; and that we be ferv'd with no other spices than shall be brought out of the East Indies, all cafualties excepted; for you must understand they will fometime stay long for their lading; fome of their ships, it is likely, may miscarry, others not return justly at the time appointed; fo that I make no doubt, but England, Scotland, and Ireland, will be able to take off a great part: if not, the East Country and Ruffia will utter more than we can spare.

Whereas you refer yourfelf to the example of the carrack, it is thus to be answered: They that bought the spices of the queen

o the example be answered: of the queen

in the carrack conditioned, That till they were vended, none should be brought into England; by which restraint, and they having ingroffed the whole quantity of the fpices, before they made fale of them they provided that the whole store should be spent within the realm; and then they forced every man to pay what they lifted, knowing we could not otherwise be supply'd: and this proceeded out of abuse; for when the greatest quantity of the carrack's spices was unfold, then were they at the greatest rate: and to the contrary, if there had been no spices in England when the carrack groffed by fome few, no doubt but in a year they had been wholly vended.

6. Object. The original of this voyage was fecret malice of some against the Turkish company, and a greedy desire of privategain; the effect whereof will be such a molestation to our neighbours the Hollanders, and fuch hatred we shall reap at their hands, as all our gain shall not be able to countervail this one

Answ. We are not to enter into the hatred or private grudges of men, but into the commodity or discommodity that will arise to our nation by this trade: if it be more profit to maintain traffick into the East Indies than into Turky, I see no reason that for the benefit of some private men of the Turky company, we should nourish the one, and neglect the other; but methi is if there were no more reason of gain than out of spleen to some merchants of the Turky company, they should not adventure fo great a ftock, without a hope of profit.

We fee by experience what commodity the Portugi ese have made this hundred and odd years by that trade, and we conceive the Hollan ters find a great commodity by it, which may give us fatisfaction in it: neither do I fee that the Hollanders have more advantage to persevere in that voyage than we.

For offence to be given the Hollanders, I fee not how in right and justice they can except against us; for they can challenge nothing of difcovery, fince of the two we gave them light thereof by the voyage of Sir Francis Drake and Mr. Cavendish, who had been there before there was ever mention of Holland or Hollanders.

Secondly, they are not fubjects to them, with whom we shall traffick, but free princes of themselves, that may make election and choice with whom they will entertain leagues.

Thirdly, we may with better reason, and we have better means to bar the Hollanders of traffick with Turky, Barbary and Russia, than they to restrain us of this; VOL. III.

for we were the first light-givers of those

And therefore, if all her majefty's gracious respects to them should in the end be recompenced with ingratitude, the world would confess their unworthiness and evil requita! of fo many favours: but suppose they should do their worst against us, we know how to be even with them by many advantages we have over them, as before has been declared.

7. Object. Lastly, the money thus transported pays no custom at all to ber majesty & nor are the merchants bound to return bome came in, and that they had not been en- fo much treasure in value or quantity, but only

upon their bare words. Answ. Though the money, upon the transportation of it, pay no custom, yet the merchandize which is bought with that money pays a great and extraordinary cufrom ; and her majefty's cuftom will be increased by it : but to take away all exceptions to this point, the merchants offer to become bound to bring into the land fo much filver as shall be transported in this

And sceing therefore the particular objections are answered, of exhausting our treasure, consuming our mariners, deltroying our ships, hindring the vent of our cloth, bringing in commodities not utterable in due time, that malice was not the cause of it, that in justice it cannot be prejudicial to the Hollanders, that it will be no decreasing of customs, and the filver we fend not to be our own; all these things being rightly weighed and confidered, I refer my felt to the centure of any indifferent man, whether the objections be fully answered,

What was written in the former discourse, as well by the objector as the answerer, was but conjectural, till time and experience, which are the discoverers of truth, resolve the question doubted of.

But now having twenty and odd years trial, what this voyage to the East Indies has produced, a time fufficient to judge of the conveniency or inconveniency to the state, or the commodity or discommodity to the common wealth, and the profit or difprofit to the adventurer, I will thereupon collect out of the reasons aforesaid, betwixt the objector and answerer, and how near their opinion forted to the truth, as also what errors, and by whose means they prov'd prejudicial to the subject.

The first objection of exhausting our coin was answer'd, and confessed to be the ftrongest argument of all the rest: but a third person, whom I term the moderator, fays, That if the company had provided, as they promifed, and as they might eafily

have done, to have brought the quantity of filver out of foreign parts, and have put it aftore at *Dover*, for all people to behold, till their fhips of the *Indies* had paffed by, and then had imbarked it, this would have taken away all occasion of repining by the fubject, that their coin was transported out of the kingdom to uploid the *Eaft India* trade; if this had been really done, without evasion or cunning, the objection had been falved, and our moneys found no impediments to the voyage.

The fecond, was the death of our men: and though this was anfwered fully, yet to confirm the opinion of the anfwerer, there cannot be a better proof than experience, that peoples bodies do as well agree with, and return from the Indies in health, as from fhorter voyages; and that whofoever has been there once, defires to go thither again: fome there are that have made fix or feven voyages, and found no diftemper or difference in their bodies; and if there were no greater objections than this of health, it were tolerable, and worthy to be encouraged.

To the third, that it will decay fhipping, the answerer disproves it very sufficiently; but, indeed, the greatest abuse of the voyage shall now appear in the covetousness and desire of gain in our merchants, according to the nature of Englishmen, who strive to be presently rich, and have not patience to stay a time for it.

The bane of our East India voyage was, that they exceeded the proportion of eight or nine ships, treble to the number of those that were projected: this was the decay of timber, which this kingdom will hereaster smart for; for the loss of men and money, it will be regained in an age, when timber must be growing many ages.

This proportion of eight or nine ships would not have overcloy'd the trade, either there or here; nor have brought the commodities of the East Indies to so great a price as now they are there; neither would it have drawn so mighty stocks of money by the company to maintain it, whereby all the kingdom find themselves aggrieved, imputing the want of money to this cause: thus it is apparent, that the voyage is not the cause of the inconveniency, but the ill ordering and managing of it by the merchants.

The fifth objection is imputed to malice against the Turky company, and the molestation we shall offer the Hollanders. The moderator alledges, that there are very few of the Turky merchants that are not admitted with their stocks into the East India company, and all questions accommodated; whereby their malice ceased: and to the point of the Hollanders, we fee that it is not that trade alone, but all others in general they feek to deprave and deprive us of; and it is true, that it is trade that fets their hearts against us, not only in our own traffick, but that of late we have debarred them of their trades, which before, out of cunning, they only ingroffed and possessible possessible possessible possessible possessible property as a namely, that of Spain, and the king of Spain's dominions, whilst they had fubtilly engaged us in a war; but now that our peace debars them of it, and that we enjoy it our felves, thefe are the motives of their hates to us; and as for their love, it is to be valued according to the profit or use they can make of us, as in the next and last book I have at large declared.

This shall suffice for our East India trade; but I will still have relation to the East Indies.

A Project how to intercept the Ships of Cambaya that trade yearly into the Red Sea.

Though the trade of the East Indies was first sound out and prosecuted by the Portuguese, and in these latter times frequented by us and the Hollanders, yet can we not say, but that the natives of these remote parts had use of navigation, commerce and traffick with one another, long before the resort of the Europeans amongst them; as is apparent by the continual intercourse and trade, to this day, betwixt those of Surat, subjects to the great Mogul, and Ziden, a part within the Red Sea, which is commonly called the sleet of Mecca.

The veffels which pass there seas we cannot properly call ships, because their built is much differing from ships; they are neither able to brook the waves of a grown

fea, or of force to withftand the power of an enemy: these vessels are carry'd wish a certain, settled, and constant wind, both outward and homeward, as I have declared, when I had occasion to speak of the nature of the winds, called the Monfons yet, as ugly, and as unshapely as these vessels are to our eyes, they transport inestimable riches and wealth betwixt the places aforesaid.

And whenfoever his majefty shall please to prohibit the trade of his subjects to the East Indies, and that the merchants shall be weary of it, which will be according to their loss or gain; for the nature of a covetous merchant is like an usurer, that values and esteems his own profit more

than the conveniency or benefit of the state: they are not fatisfied with abundance; for the more they have, the more they de-

But leaving the passion and humour of fuch men who are only for themselves, let us enter into the true condition of this kingdom, and the way to benefit his majesty, as well as his subjects have been benefited by the East India trade; and here I present a defign to his majesty, if he shall prohibit the trade of the East Indies, as I have faid

It is not like other sea actions, that enemies are authoriz'd to take from one another in a broad and ocean fea, where fhips are hard to be met, or thall contest with force and ftrength; or in fuch weather as shall forbid ships boarding; or such winds as shall make it difficult in fetching up a chace; or fuch veffels as fhall make a doubt of the riches of their lading.

My project is to encounter the Gambaya fleet, in their return out of the Red Sea, in their course from thence to Surat: these vessels are not freighted with merchandize of mean and base condition, but with the richeft that Egypt and Turky can afford: their strength not able to refist their failing in a fea, that never endured florm; their winds and feafons fo certain, as fome of our East India ships can put us out of doubt of, who have heretofore friendly visited them.

The wealth in them, and the ease in taking them, being thus known, we are to

think of the hurt and mischief that may enfue upon it, and to ballance indifferently, whether it is to be embraced or rejected for conveniency fake.

There are two fort of people, and both infidels, that will find themselves aggriev'd if this defign be fet on foot. The one is the Grand Seignior, into whose country they resort, to barter their East India commodities, and make a return of merchandize there exchanged, to the great increase of customs, that accrue to the great turk by

The other is the great Mogul, king of Cambaya, but of late years known to us by the traffick of our merchants: they are the subjects of this king that trade into the Red Sea, who besides his customs and other adventures in the voyage, will receive detriment by the loss of his ships, which no doubt will exasperate him.

These are the considerations on which depends the conveniency or inconveniency to ground this voyage upon, Whether the forbearance of that trade by us, or the profit that will redound by it, will carry away the stronger force.

Two ships of his majesty's, for countenance and strength, will be sufficient, with choice of victuals, and other provisions for health; the rest of the ships to be rated in tonnage, according to the proportion that may be judged to contain the goods taken in the ships aforesaid.

A Project of the Genoese to have brought the East India Commodities into Muscovy by Land in 1520.

S commerce and trade draws a con-A course of people where commodity appears, and by confequence acquaintance, and civility, knowledge of one another's customs and countries, and the ways and means to direct them thither; so did this trade of the East Indies most especially, being so lately discovered, and yielding such great wealth and riches, a thing not dreamed of, till time gave light thereof by the Portuguese new discovery.

The way, and the nearest way that could be thought of, to attain to the East Indies, was after attempted by feveral nations, fometimes by the cape of Good Hope, other fome by the Streights of Magellan, and then again from New Spain, and, lastly, by the north-west passage; which shews a great willingness and defire people had to fearch out the fecrets of those countries, which they found so plentifully stored with all manner of riches,

And because the Genoese were a people not much accustom'd to voyages in the ocean, wanting both fhips, failors, and harbours,

for fuch navigations, yet because they would not be accounted flothful or idle, and feeing it was an age of wit, in which every nation fought to exceed one another, they in the year 1520, proposed a journey by land from the East Indies to Muscovy and Russia, and one Paul Centeraneo, a merchant of Genoa, was imploy'd in it, and went with authority from that state to Basilius, then king of Ruffia, with offer to bring that trade thither. He shewed the rivers and countries they fhould travel through, and acquainted him that the Portuguese, who ferved all Europe with spices and drugs, brought them by fea, whereby they became mouldy, and loft their true operation and virtue, though indeed it was otherwife; for after the Portuguese loaded their goods in their carracks, they never moved or unshipped them, till they arrived at their port of Lisbon; as on the contrary, if they should come to Muscovia, they were to pass many rivers, where they should unlade, and lade again, to the spoil and lofs of their merchandize, befides many

BOOK V.

dangers they should suffer by the Arabian sused and rejected that offer made by Paul thieves, which the king of Russia did wife- Centeraneo, and it was never after attemptly foresee and consider; and therefore re- ed or proposed.

A Project bow to attain to Tombagatu and Gago, the richest Parts of the World for Gold, feated in Africk, and never yet discovered by Christians.

MANY and feveral attempts have been made by the English trading into Guinea, to arrive at the two places aforefaid, being incited to it by the fame of the abundance of gold they yield, and the fineness of it by the daily proof that is made of it in Barbary, whither it is brought in truck of mean commodities.

The king of Morocco or Barbary yearly fends certain camels, which pass with much hunger, pains, and peril, in going and coming thither; and many times they are taken with violent forms, and foutherly winds, which fwallow and devour them like the fea; but yet this danger does not hinder the trade, because the profit is so great, that a camel laden with falt will return his load in gold. And this is the encourage-ment our Englishmen have to attempt it by rivers; but have still failed, either by death of the undertakers, by want of victuals, by the encounter of the wild negroes, or shallowness of the water to hinder their pas-

I will fet down the errors I conceive of the former undertakings, and deliver my opinion, how it is fitting to enterprize it with little charge or hazard to the actors or adventurers, by example of the Portuguese happy and honourable attempt made upon the discovery of the East Indies, which gave the first light to all succeeding discoveries, as I have touched in my fourth book.

King John II. of Portugal, wifely imagining with himself, that the riches of the East Indies, brought to us of Europe by the way of the Red Sea, might have a paffage from thence by an open fea, if it could be discovered, and the trade convey'd from thence directly to Portugal, without being beholding to infidels, as then we were, he caufed timber to be felled to build two small ships for that discovery of the East

In the mean time whilft he was imployed in furnishing the pinnaces for this voyage, he imploy'd these persons following to discover by land the state of the Indians, and to get what light he could to encourage his lea intention.

The first man he employ'd was a Francifcan frier; who for want of language returned from Jerufalem; without effecting any thing. The next he fent were two fervants of his own, both of them s' ilful in the Arabick language, the one called P_{ℓ} dro de Govillam, the other Alphonso de Pai-va. They left Portugal the 7th of May, 1487. and coming to the Red Sea, parted company: Alphonso went to Prester John's country, where he died : Govillam travelled to Callicut and other places of the East Indies, where he fully informed himself of those countries.

In his return from thence he met with two Jews, the king of Portugal had fent to meet and advise him to inform himself throughly of the state of the East Indies,

One of these two Jews he sent back to the king, with a relation of the state of those countries; the other he carried with him to Ormus, from whence he fent him likewife to the king with a further relation, and himself travelled to Prester John's country, where the king, whose name was Alexander, treated him courteoufly; who dying, the fucceeding king detain'd him prisoner, where he died, and never sent more to the king of Portugal.

The king being truly informed by the relation of the two Jews, he haftened the preparation of his two fhips; which voyage proved fuccefsful by the discovery of the East Indies. By the example of this land undertaking, we are to profecute our intention for Tombagatu and Gago, and to labour how to arrive at them two places by land, that we may with more ease, after we are there arrived, find out a paffage by a river, when the country is made known to

The men by whom we are to work our defign, must be the black people of that country, whose complexions are suitable to those of Africk; for white men would feem monsters to them, and soon be destroyed by them. The climate of the country, the diet, the travels, the avoiding other dangers and inconveniences, the negroes can better fuffer than white men can under-

Therefore I advise, seeing what we do must be by the travel and endeavours of the negroes of the country, that every English ship that goes yearly to Guinea, may be tijoined to bring from thence three negroes, with care to treat them civilly and kindly, Book V.

what we do yours of the ery English may be reee negroes, and kindly, that that at their return the many have just cause to commend our usage of them.

These negroes being " I in England, may be fent into feveral cities and corporations, two or three of them in company together, where they may be fet into free fchools, to be taught the English tongue, to write and read, and the true worship of God, with necessary provision for their apparel and diet; and when they are thus made capable to perform fo much as they shall be employ'd about in their own country, then to fend them back again, there to follow fuch inftructions as shall be given them, for finding out the way and paffage to the two places aforefaid; and after they return from thence, to affign them a place where they shall find a ship and men to entertain them; for the only thing that is to be required in this voyage, is to discover a way to Tombagatu and Gago, and to know the true state of that country, and a means how to fettle a trade with the people thereof.

The rivers by which we must make this attempt, are Senega and Gambia; and though there be two entrances into them, yet they make but one river, and betwixt them compass an island.

I confess there have been many undertakings by the English, to find a passage by

the river to Tombagaiu and Gago, but to little purpose, as it has been carry'd; therefore my design and desire is, that what sollows may be put in execution.

Befides the ordinary ships that trade to Guinea, and make their return for England, I wish that two pinnaces, each of twenty tons, and two substantial shallops, be appointed to follow the discovery in the rivers, to be well manned, sufficiently victualled and armed, to stay out a whole year, with several commodities the negroes defire to have, to allowe and entice them to us.

These two barks are to sail so high into the rivers, till they be stopped by shoals, and then to cause the two shallops to proceed further with their oars; for the greater way they go by water, the less journey the negroes shall have to travel by land.

These ships and shallops are to make their aboad thereabouts the space of nine or ten months, and to employ themselves in traffick, to know the state of the country, to learn the condition of the people, to win them by civility; and by consent of them to obtain a place ashore to inhabit and fortify, and make it a rendezvous for a yearly course and trade ever after, as the Castle de la Mina is to the Portuguese.

A Project for a private Voyage to Guinea.

THERE is much more use to be made of the country of Africk, than either we, or any other nation have laboured to find out; which I do impute to the unhealth fulness of the climate, and the neglect of people in not labouring to bring the blacks to civility by courteous handling and treating them, as I have touched in my precedent project.

And because I would have nothing attempted that may not bring a possibility of profit, I here present a private voyage with one ship of two hundred tons, and four or five shallops, to be quartered and carried

It is not unknown to as many as trade to the East Indies, what succour they find in the bay of Saldanna, near the cape of Good Hope, especially of oxen, where there are the greatest abundance, and the biggest of body in the world; and the seathereabouts afford great quantity of whales, out of which may be made train oil.

My directions in this voyage are to buy and freight a Holland fhip of two hundred tons burthen, with the number of shallops aforefaid, to carry in her to the value of two thousand or three thousand pound cargo, two hundred ton in cask, with all things necessary to kill and boil the whales; and three or sour butchers to say their bees.

The place whither they must first refort, is the bay of Saldama, aforesaid; but in their way, to touch at the isle of May, at cape Verde, there to take salt to save their hides they shall truck for. At their coming to this bay, some of their men must be imploy'd in traffick with the Blacks; some in killing their cattle for their hides; and others in fishing the whales, and making oil of them. And as they shall find a decay of either oxen or whales, then to remove to the northward, where I doubt not but they shall find a sufficient store of both, as also gold and other rich commodities, to settle a trade ever after.

Vol. III.

5 T

A Projest

A Project how to trade to the West Indies for Tobacco, with the Confent of the King of Spain, or some one Merchant his Subject.

HE colour of our English ships reforting to the East Indies in time of peace, is to feek a trade for tobacco; and under that pretence they have committed divers piracies, though the king of Spain has used all the strict means and courses possible to avoid that mischief: he has made it death by law, if any of his subjects, either directly for indirectly traffick or have commerce with any foreign nation; and has often used the rigour of that law, as well upon his own subjects that have offended in that kind, as upon strangers with whom they have traded; and yet gain is fuch a temptation, that in some places the Spaniards will not forbear traffick, though they run into imminent danger.

But to take away the occasion of this abuse, and that England may be served with better tobacco than any other growing elsewhere; and that the king of Spain, for his part, receive no prejudice in his cuftoms for tobacco, this is the way that I devife.

That a merchant of Spain, and another of England, do make a contract, that the English shall take off such a quantity of tobacco, and at a certain rate agreed on, and receive it at one of the Tercera islands; which will be an eafe to the navigation, having the less way to fail, and by consequence, the less danger of the sea and pirates; and this to be done with a ship of the Spaniards, and manned with Spaniards; and for fuch commodities as shall be brought out of England, to deliver either at the islands aforefaid, or in any port of Spain, at the election of the Spaniards; whereby the king of Spain shall not be deceived of his custom either going or coming.

When the Spaniards have a certain vent

for their tobacco, which is the thing they defire, they will not hazard to trade with any ftrange nation by ftealth; and when the English perceive they are out of hope to truck for tobacco in the Indies, they will be disappointed of trade, and in a little time make them become ftrangers in those parts; and this is the reason that must be used for the king of Spain to grant his con-

And when we shall be served with tobacco, and shall have proof of the goodness of it, in comparison of the beaftly itinking tobacco that comes from other places, people will defire it for wholefomeness, and detest the other; which when our planters at Virginia, and other colonies, shall find their tobacco undervalued, it will be a cause that the people will apply themselves to more beneficial labours than they now do, in planting tobacco only.

And because tobacco shall be better used. and made up, to make it the more vendible in England, (for the goodness and badness of tobacco confifts in the ordering of it,) we defire that two or three Englishmen, practifed in that art of making up tobacco, may be hired by the Spaniards, and carry'd to the Indies, to make it merchantable there where it grows; fo shall we be fure to ferve England, with none but choice tobacco, where it will give a better price to the feller, and more content to the buyer.

Both the kingdoms and subjects of England and Spain will receive benefit by this project, if they be governed by the directions aforefaid; and if there be a question of the king of Spain's confenting to it, it is no more than merchants within themfelves may contrive, without making request or suit to either of the two kings.

An Answer to a Project of the Hollanders for surprizing the Island of Canaria, and that of St. Thome, under the Equinottial, Anno 1599. in Reproof of some of my Countrymen, who seek to prefer their Actions before ours.

T is wonderful to behold and fee the mutabilit, and uncertainty of this envious fpiteful age of ours; and amongst many intolerable vices that reign, emulation is most rife; for let a man be advanced by virtue in his vocation, as, namely, a scholar to promotion and dignity by his learning, it breeds a fecret hate in all fcholars against him: the foldier for his fervice, makes all foldiers enby favour of the prince, makes all courtiers repine at his fortune, and enter into examination of his merit above others, as though they fhould be judges of their own worth. This shews the corruption of mens minds in our time; for virtue was never envy'd, but by men of vice; nor honour despited, but by them that could not judge of it.

Envy stops not at private grudges; for very often it enflames the hearts of princes against the greatness of other potentates; it reigns in one kingdom against the prof-

perity and welfare of another; but this kind of emulation I confess to be tolerable; for the example of one good prince may make another virtuous; and the example of one kingdom, make another strive and endeayour to equal it.

But the fault I find, is with this malicious humour you shall find in my ensuing discourse; where, in this expedition of the Hollanders, my countrymen are apter to give them honour, and to attribute good success to them, it being an action of their own, than if they had joined with us.

I know not what to impute it to; whether envy to others, because they could not be actors themselves; or a natural love to the Holland nation, not perfectly knowing them; or to their popular government, because they have cast off all subjection to monarchy: but sure I am, that their partiality has discovered a great deal of envy, as they shall know by what follows; for I will so unmask them, that they shall not deny it.

After their engaging us in a war with Spain, it is known, to as many as know any thing, that not withflanding our prohibition of trade with Spain, which continu'd eighteen years, they never committed any hoftile act by fea againft Spain, nor had encounter with fleet or flips of Spain; but to the contrary, fupply'd them with all manner of provisions and ammunition againft us.

Then feeing there appeared no act of theirs, to commend either their fufficiency of valour, it is ftrange to me, that my countrymen should extol them above our felves, only out of an imagination of what they would do, but not by proof of what they have done.

This trade of theirs into Spain continued all the reign of king Philip II. But he dying, and his fon fucceeding, he caused a general embargo and arreft of all ships within his dominions, which belonged to any parts of the Netberlands, that were not obedient to his father's government; and published an edict, That it should be lawful, that that time forward, to use the same law upon any such filips as should be found in his country.

This was effected accordingly; and the Hollanders being certify'd thereof, knew it was not their advantage to fuffer their ships to lie and rot without imployment: neither had they means to maintain so many mariners as were in the country, without they had the use of navigation. For these two reasons, and a desire they had to annoy the king of Spain, they sent this present year, 1599, seventy three ships to sea, the general whereof was Peter Van Doist.

Whilst this preparation of theirs held, there was an overture of peace made to her

majefty by the king of *Spain*, and archduke *Albertus*, which the queen was inclined to hearten to 3 but upon the earneft interceffion and requeft of the *Hollanders*, with promife to fecure her at home, with their fleet abroad, from any hurt *Spain* fhould intend againft her that prefent year, fhe, out of a gracious respect to them, was willing to furcease speech of that treaty for a time.

And now in answer to a book they published at their return from the Canaries, which they entitled thus, The conquest of the Grand Canaries rande this last summer by seventy three sail of ships, sent out by the command and direction of the States General of the United Provinces to the coast of Spain, and the Canary islands; with the taking of a town in the island of Gomera, and the success of part of this sheet in their return homeward, which fet fail from Holland the 25th of March, and returned home the 10th of September, 1599. When you read the two first words, The Conquest, you will not think there followeth less than a kingdom; for commonly it is not a phrase used to commonly it is not a phrase used to

ftate, but to a kingdom.

The Grand Canaria, which they think to blind the ignorant people with, to be a place of fo great fame and renown, because of the length of the word in pronunciation, is an island of twelve leagues in length and breadth; many villages in it, and one town bigger than the rest, called a city, where the bishop's feat is, for all the other islands.

There are in Number feven islands; Grand Canaria, Teneriff, which is the biggest, wealthiest and strongest, Palmo, Gomera, Fuerteventuta, Larezarose, and Ferro.

Upon the first discovery of these islands, they were called the Fortunate, and now the Canary Islands; and by setting down the Canaries, he would have the world think, that they had conquered all the islands; whereas, if he would have spoken truth, and according to sense, the should have intituled his book, The surprise, and taking of the city of Palmes in the island of Grand Canaria: the title of this book is as ridiculous, as if we should write the story of the Sack of Cadiz, and intitle it, The Conquest of Spain, because Cadiz is a city in Spain. Thus you see they are people that will set a great gloss upon a small shew.

Their promife made to her majefty at their fetting from home, was, to view and fearch all the harbours upon the coaft of Spain, and to deftroy the king's fhips, whereby the should be fecured at home.

The first port they fell in withal was the Groyne, being guided with a favourable and large wind; for from Holland thither, they were failing but eleven days; but when they

came

came before the harbour, they behaved themselves so unadvisedly, that the town took the alarm, and was provided to withthand them.

Here lay divers of the king's fhips, which they would not attempt, but difhonourably departed; though I must confess they performed half their promise made to the queen, in viewing the harbours; but not the other half in destroying their ships.

If her majefty had refted upon their affurance of fafety, and not otherwife provided to fland upon her own guard, I am of opinion the Spaniards had fooner vifited us than they them; and yet they flick not to be to Phat they caft anchor in twelve or descen fathom water, and that the lovest fine two hundred cannon fhot, but kind the water aman: they also fay they towad out that hips with boats, in despite of their shot, or that they were in no danger of their shot, or that they were in fee with the gunners not to hurt them, as any man may conjecture.

But it feems they were fo much discouraged with looking into this harbour, that they never offered the like to any other upon that coast; but forgetting their promise to the queen, the general made known his purpose to his captains, that he meant to attempt the islands of Canaria.

If this project was defigned him from home, or that it was left to the difcretion of the general to undertake what he thought fit; in the one, the flates flewed themselves ignorant in marshal-sea affairs, or the general had no disposition to enterprize the service that might bring danger; for the Canaries are known to be of such small importance, that we never held it worth our labour to possess them, though it were many times in our power.

ny times in our power.

Says the author, "The place of landing was difformmodious and difficult, but that moft of the enemies were flain, to the number of thirty or thirty fix. The lord general leaping first on land, was thrust into the leg with a pike, and had in his body four wounds more, being in great danger to lose his life, but that one of the foldiers slew the Spaniard that did it; but his wounds were of small moment."

Gentle reader, first you are to observe, that by their own consession, they had very great difficulty to land; and that before they landed, they slew most of the enemies, which were to the number of thirty or thirty six; then let us think whether it was greater valour in the thirty six, to withstand the twenty sour companies, as they report of themselves after, or for the twenty four companies.

ty four companies to overcome the thirty fix men: after this proportion it was three Spaniards to two companies of Hollanders.

Then follows a report of their lord general's valour: a lord we will allow him, because the author gives him the title, though, if it were examined, he was no more lord, than they have authority to make a lord: he was the first man, the author siys, that leap'd assore, and received a wound in his leg with a pike, and four in his body, which put him in great danger of his life; but that a soldier slew the Spaniard that did it; and that his wounds were of small moment.

Mark the improbability of the one, and the variety of the report of the other: for how is it likely that one foldier should come to the push of pike, upon the general's leaping ashore, and give him so many wounds, having his troops so prepared, that they would not suffer the head of a man to appear? This man's valour sar exceeded the thirty six; for he undertook their whole force, being twenty four com-

The author fays the general was in great danger to lofe his life; and in the line following, his wounds were of finall moment: thefe two are contraries, and for my part I know not which to believe; but confidering the probability of the manner of his hurts, and the contrariety of the flate of his wounds, I do verily think the thirty fix men could not make the refiftance they fpeak of. Secondly, the general came not to the push of pike at his fift landing. And, thirdly, he received not fo many wounds, as for his glory they report of him.

After they had thus landed, they followed the victory with great lofs to themselves, and little to the enemy, by their own report; for they fay, They neither sound wealth nor prisoner in the town, their goods being all carried into the mountains, and the people having quitted it, and escaped.

The memorableft thing they did in the town, was the delivery of thirty fix prifoners, who reported that two others, one an Englifbman, the other an Hollander, were carried into the mountains, being cenfured by the inquifition, whom they had not the means to redeem for want of two Spawingle.

The author reports, That after the taking of the town, their people committed fuch diforders in the country, the paffages being known to the Spaniards, and not to them, that at one time twenty of them were killed; another time they returned with the loss of seventy men, and in the poor island of Control.

after the tale committed the paffages , and not to of them were ned with the poor ifland of Gomera, Gomera eighty, and made the rest retire; besides, at divers other places they received loss.

This proceeded rather out of diforder amongst themselves, than any unlawful act of the Spaniards; for those thus flain, were no less than free-booters that went a robbing, without leave of their officers; tho' the Hollanders rail and exclaim against their cruelty, alluding to their names, that the Canaries were fo call'd, because of Canes, the abundance of dogs then found in the island: they fay that the people would run as fwift as dogs, and were as tyrannical and blood-thirfty as ravening wolves, which they sufficiently manifested; for as soon as they could lay hold on any of their people, like to mad curs, agreeing with their names, they would prefently worry them: and they, I confels, had no other remedy but patience; for they took never a Spaniard to exercise accustom'd cruelty.

But though they did not sufficiently revenge themselves upon the people, as you have heard, yet they neglected not to riste their cloisters, monasteries, and churches; and not being content with the spoil of them, they destroy'd and burnt them down to the ground. This example they never learnt of us, in the actions they have been with us; for we ever had a respect to the churches, though we differed in religion, and held it was a house of our God as well as theirs, though we serv'd him not both in one

The Hollanders are people that will omit nothing for their glory; and amongst many famous acts they have atchiev'd in this expedition, they fet down the taking of feven sistemen by one of their pinnaces, fishing under Fuerteventura, and the general's committing them to prison.

These seven Spaniards stood them in great stead for their reputation; for had it not been for the taking of these seven men, they had return'd without manifesting their landing in any part of the king of Spain's dominions; not having taken a man before, to have testify'd to the world they had met with an enemy.

After the fack and spoil of the city of Palmes, the general embark'd his army, and was willing to perform some other service that was not of danger; and call'd a council of his captains and pilots, enquiring of them which was the weakest island, for there he meant to land: you fee he was not defirous to know the wealthieft, but the weakest island; making account where there was wealth, there was strength that would relift them: but he wifely confidering that the taking an island, though it was of no importance, yet it would carry a great shew and gloss to the world, (for men would not enter into the value and worth, VOL. III.

but into the name of an island,) did hereupon couragiously resolve upon the attempt of Gemera, a place of so small account, that they might have been asham'd to undertake it, but especially to publish it in print.

If all our deeds, according to that computation, were publish'd to the world, we have had many ships, not above three in company, that have perform'd greater fervice; and yet the Hollanders stick not to boast that they left the island of Gomera burning, which was never done before by any nation.

Some men that know not the state of this poor silly island, would think it were to be compar'd with Vienna, which the Turks have often assaulted with huge armies, and never had power to prevail against it. And in the same case men hay imagine, seeing they did that which has not or done by any nation, that it was a plan of that invincible strength, as stough many armies had attempted it, yet stey in diever power to prevail against him who eas, in very truth, this island is poor have wealth, and weak in power, readier to yield to a weak enemy, than to we shand a mean army.

This island was subdued upon the first discovery without fight; all the rest withstood the conquerors; which it is like the general well knew by his demands, which was the weakest island, which embolden'd him upon the enterprize.

Here he found no resistance; for all the people abandoned the town and fled to the mountains, and committed many murders upon the Hollanders by their undiscreet straggling.

Once again the general embark'd, and dispatch'd thirty-four of his ships back for Holland; and himself with the rest meant to proceed to the West Indies: those ships that return'd took two prizes of fmall value, that had but thirty men in both, which takes up a long discourse in this book I have answer'd. If all our prizes were estimated, and the number set down, since the beginning of our wars with Spain, there have been at least six hundred greater and richer vesses brought to England, which we think not worthy to boast of: but indeed they are to be excused; for the taking of these two barks, and the thirty men, are the only deeds they did in their project to the Canaries.

You have heard, upon the division of the fleet, the general resolved for the West Indies; which resolution was suddenly altered, and he directed his course to St. Thome, an island under the equinoctial line: what becomes of them, I am not very inquisitive to know, till I see it published in print, as this was;

neither, in my opinion, can they expect any thing but death, the country and climate exceeding all parts of the world for fickness: and I verily believe this latter project to St. Thome, was defigned by fome traitors amongst themselves; for the Portuguese that live in that island consess, that no man born in Europe, ever liv'd there so long, as to have a white beard, or attain to fifty years of age.

And to conclude, feeing how indifferently the Hollanders have carry'd themfelves in this laft action, wherein they have deceiv'd the expectation of all their well-willers, that are not too much transported with partiality, I would not have my country-

men hereafter to magnify them above their worth; but that in reafon, without affectation, they will compare the managing their actions with ours, which in differetion they are bound to do; and they shall undoubtedly find great difference betwirt

What I have here writ, I proteft is neither in malice to the Hollanders, nor in partiality to our felves, but out of a fincere love of truth; for I am fo far from any detracting humour, that if I can fee amendment in them and their actions, I will be as ready to do them honour therein, as I am now willing to defend my countrymen from the feandal of fpightful tongues.

A Project how to ruin Spain, with the Assistance of Holland, if his Majesty enter into a new War with that Crown.

If the king of Great Britain declare himfelf enemy to Spain, no man need doubt but that he shall have affiliance of Holland to join with him in any action against that crown; and then it may be supposed what hurt in time may redound to Spain in the Indies, if both the nations do really join together, and their designs be well grounded, by example of what hurt the Hollanders alone have done the Spaniards in Brazil and the Indies, without the help of

any other nation.

And to defeend to particulars, there is lately an occasion, and an unavoidable opportunity offered, never thought on by England or Holland, when they both had wars, and studied how to vex the kingdom of Spain by their hostile actions: now, I fay, there is a new discovery, wherein the Indies may be hazarded, the Spanish nation subverted, and all the rule, government, and riches, settled upon us and Holland, if we join mutually together, as we have done in fundry other actions heretofore.

The ground of this defign stands upon the peopling and planting of an uninhabited island, eighty odd leagues from Carlbagona, in Terra Firma, and not above ten or twelve miles in length, and, as I formerly faid, fix in breadth, five hundred leagues west from the other islands the English now possess, and where there are already scated fix thousand able and sufficient foldiers, with their arms, and other abiliments for war, and are like daily to increase, by the forwardness of people that willingly put themselves into such actions.

Such islands as the *English* are feated in are in the hithermost part of *America*, and by which all ships that go to the other islands aforefaid, or to *Terra Firma*, are to pass by, with a certain and settled wind which never fails; and the men that there inhabit,

their bodies are made able and fit to live in fuch unnatural climates to their former breeding; their hard and evil diet, with drinking water, is made familiar to them, and they are become excellent folders.

There people thus planted, will much forward any enterprize that shall be made upon the Indies, by the conveniency and little charge to transport them confider'd; as likewife the ability of them, which we may account trebble to as many as we shall carry out of England.

But now I will proceed to the defign, and to the way how to put it in execution, which may prove the most dangerous plot that was ever intended against Spain, fince the first discovery of the Indies; though at the first apprehenfion it may feem ridiculous, and rather to be contemn'd than fear'd by the Spaniards: but if they will call to mind the precedent of other times, they shall find that their king Don Rodrigo and his country was conquer'd in two years by a few barbarous Moors not worth naming, and could not be recover'd in feven hundred and feventy odd years of wars after. The like may be faid of England, when it was subdued and subverted by less than four hundred Saxons at the beginning; things not to be believed, but that times and stories make it manifest; and in reason this island may prove as dangerous to the Indies, as the others have been to Spain and England; for it is like a spark of fire, out of which greater fires may be kindled and made unquenchable.

This island, which I have spoken of in my fourth book, is near Carthagena, and not far from Porto Bello, and Nombre de Dios, whither the treasure of the Indies is brought first from Peru by Sea to Panama, and after to the places aforesaid by land, before it be embark'd for Spain.

e spoken of in arthagena, and and Nombre de of the Indies is ea to Panama, efaid by land,

This

This island has of late chang'd her name, from Carthagena to Providentia, out of a foreseeing providence and care that some well-minded Englishmen do owe to their country that have fo named it, thinking to work the effect, for which they possess and fo call it, as may be gather'd out of a difcourfe, it being of that importance, by reason of that impregnableness, and the commodity of an harbour, to receive fome shipping of a reasonable bigness, and being naturally encompats'd about with rocks and shoals, that it is impossible for any bark or boat to make an enterprize upon it, but only in the harbour, which is fo for-tified, that no force is able to affail it, infomuch that it may be faid of this island, That God has placed it with his finger, to impede and forbid the trade of the Indies upon that coalt, as aforefaid.

And though this island affords nothing but water for the fustenance of the people that fhall inhabit it, yet in a fhort space it may be fupply'd from the Toringus, which we enjoy near Hispanicla with hogs and beefs, fufficient to relieve as many men as the circuit of the ground can contain.

But now to the use that can be made of the ifland: It is to be confider'd, as aforefaid, how dangerous a thing it will be to the Spaniards navigations thereabouts. Secondly, that whereas in all our voyages and expeditions in the queen's time to the *Indies*, we have still quailed, because our sleets made their abode out of *England* above fix or feven months, going, coming, and staying there, for want of provisions to abide there any longer, but were ftill forced to return when their greatest service was to be executed.

The use we must put this island to, is to make it a magazine to relieve our greatest enterprizes upon the main land, without either fending or turning back into England; for every thing that England can supply us with, this island may receive from thence without charge; and the ships thus freighted may return laden with falt that shall cost them nothing, to countervail the expence of their transportation.

Here shall we be fully furnish'd, and all difficulties taken away, to further our enterprize upon the main land; which upon our first landing we must divide our armies into two parts, the one to go to Panama, and possess the port of the South Sea, whilst the other enjoys Carthagena and the North Coast; that betwixt them they shall give the greatest blow to all the Indies as ever was projected by man, as well Peru as New

These places being taken, as it will prove no great difficulty, by example of fewer forces that have done far greater exploits

in the fame place, feas, and towns, this is the way for England and Holland to become mafters of that land and fea: for the flrength of the Indies confifts in the people and inhabitants of Peru and New Spain; the one north, the other fouth, thousands of miles from thence; which diftance will debar them of fuccours, and all that coast will be left to their own defence; whose weakness the English have found in fundry actions heretofore: Or if it be alledged, that their ports and towns are better fortified than they have been; it may be answer'd, that if it were fo, yet our army and ftrength will be twenty times double to that in former times: and that moreover, a country invaded (that relies upon the force of towns and fortifications) by an enemy that commands both land and fea, though it be never fo impregnable, in the end must yield.

Leaving fome attempts formerly made by our English before they were warranted by the war with Spain, who then joined with the Shemeerones, which are negroes revolted from their mafters betwixt Nombre de Dios and Panama, a place where they feized upon the king's treasure ashore in those times, I will recite some particular exploits done upon the towns of the Indies, during the war of queen Elizabeth.

Drake, with fewer than a thousand men, 1585. took 81. Jago in Cape Verde, 81. Demingo in Hispaniola, Cartbagena in Terra Firma, and 81. Antonio and 81. Hellena in Florida.

Drake and Hawkins, with feven hundred 1595. and fifty men, took El Rio de Hacha, Rancheria, Tapia, Santa Maria, Nombre de Dios, and Porto Bello; and were forced, for want of supplies, to return for England; as if the island of Providence had been theirs, the advantage of it foreseen, and they fupply'd from it, as is now intended, they had taken Panama, and by confequence had an entrance into the South Sea; which would have proved the most dangerous delign against Spain that was ever

If we call to mind private mens under- 1594. takings, captain Preston, with one hundred and fifty men, took Puerto Sancto, Clacho, the town and fort of Chapa, the city of St. Jago de Leon, and the town of Camena.

Captain Parker, with two small ships and 1596. one hundred and eighty men, took St. Vincent in Cape Verde, Porto Bello, and a fort call'd St. Jago, with the king's treasure in Terra Firma. The same captain Parker, in a voyage before, and with fewer men, took one town of importance, call'd Campeche. I could repeat many more 3 but these shall

The earl of Cumberland, with fewer than one thousand men, took Puerto Rico,

a place of great strength and defence, with the loss of twenty eight men. These precedents flew what these places are, or may be made in strength.

And if so few ships, and men could surprize and take fo many cities and towns without the countenance or help of the queen, or the affiftance of other princes or countries, and in time of war that gave continual alarms to them to provide for enemies, what may England and Holland now do, joining their forces together, that have the command of more bodies of men, more number of fhips, and to be furnished with greater celerity to second their actions, than all the world befides? but especially, having this island that will serve for a key to

open the lock of the Indies ?

But to end with the defign of the north fea, which is so diffinguished by the Spaniards, I will now fail into the South Sea, and Peru, the fountain out of which the treatures of the Indies flow; and will fet down the last resolution taken by the projectors, counsellors, and adventurers of this action, which in my opinion feems to be a thing of great reason. They conclude, as upon a matter of great consequence, to take away all occasion of help or succour from Spain, is to forbid the ordinary trades of their neighbour countries into Spain; which being done, the Indies is hopeless of help: and the way to put it in practice, as they conceive, is, to put out a general proclamation throughout Europe, for all nations, towns, and cities, to take notice of, that if fuch countries, towns, and princes, will from thence forward defift from their traffick with Spain, with ammunition, victuals, or other abiliments for the war, that then from that day they shall enjoy the immunities and privileges of trade into the Indies, as freely as now they do, or have at any time done, in their commerce, of England or Holland: as to the contrary, if they relieve Spain with the commodities aforefaid, they are to stand upon their perils, and not to expect favour. This will debar Spain of foreign helps, and be a means to unfurnish them of all materials to fit out fleets; fo that the Indies will be left to themfelves, and the dwellers there to defend

The conference and resolution of the treaty aforesaid, provided for all things to be prefently put in execution, and to forecast all doubts that might be impediments to them; and they confidered how eafy a thing it was to go through the work they had projected: fo on the other fide, they weighed, that the substance of the wealth of the Indies, was thousands of miles from Panama, whither it was brought by sea, not having means or paffage to transport it by

land; and therefore conclude, that the ruin of Spain in the Indies, was to have an entrance and command of the South

They know the condition of that fca. and all the harbours and towns inhabited and possessed by the Spaniards, from Chile and Peru, till they arrive at the ports of Navidad and Acapulco in New Spain, which are the harbours whither Mexico, and all that coast fend their commodities, as well into the ports of America, as into the Philippine island; and that by the taking those ports, the whole country of New Spain must necessarily submit and yield.

They are not ignorant, that though that fea affords ships for trade from port to port, yet they and their ships are shut up from any other traffick out of that fea, by reason of the Streights of Magellan; and that the ships there built, are made only for merchandize, not for defence and ftrength, not one of them carrying one piece of ord-

They likewife know, that the Spaniards thereabouts are rich, and unaccustomed to war; that if they may have good conditions for life and goods, they may be easily drawn to live under our subjection and go-

They moreover know the evil disposition the people of those countries bear to the Spamiards, and how willingly they will be drawn to join with us against them; and to join the one and the other more heartily to the invaders party, they refolve to make a publick act and decree, That all Indians, as well the one as the other, shall be freed from their labours, their flaveries, and forced tyrannies. And because the Spaniards shall have no dependency or necessity of the help of Spain, it shall be lawful for all men to plant wine, oil, and other commodities they defire. It shall be also as lawful for them to enjoy their religion, as in former times. These will be motives and reasons sufficient, as well to draw the one as the other to the government of England and Holland, when all the poffibility of relief shall be taken from them.

For the effecting of this they determine to fend forty or fifty warlike ships into the South Sea by the Streights of Magellan, which shall carry a sufficient number of men to perform their defign, with all manner of ordnance, with ammunition to strengthen the shores and ships; no part but shall be poffeffed, strengthened, and inhabited by us, till we come to Panama, where they shall find it planted and enjoy'd by their countrymen in as good a manner, as though they should arrive in England or Holland; and from thence they may eafily pass to the ports aforefaid of Navidad and Acapulco in

And because this counsel and resolution fhall not feem vain, by example of the north feas aforefaid, where I have made a repetition of fuch towns and ports as have been taken by the English, fo I will do the like in the South Sea, by one ship alone that departed England in 1586, and upon all occasions and services could land but eighty

The first exploit he did, was by taking away certain ordnance from a port, built by Peter Sermiento in the Streights of Ma-

gellan, where he found all the people dead, except three only. Sailing from thence to Chile, he took Santa Maria; he took and spoiled Marmaroma, Arica, Pifca, Paraca, Cheripa, Paito, the islands of Puna, a place of great importance for the building and trimming of thips; and arriving at New Spain, he took and spoiled Acapulco, the port of Navidad, the port of St. Jago, the bay of Compostella, the island of St. Ambrose, and the bay of Massaclam. And therefore let no man doubt that any part of that coast or feas can resist forty or fifty fail of thips fent from hence,

Projects for the Spaniards to annoy the Hollanders in feveral Trades.

The first Project.

THE Hollanders have compaffed a great and beneficial trade into feveral places of Guinea, which antiently belonged to the Portuguefe, as the first discoverers of them : the Hollanders now refort thither daily, and are well accepted of by the negroes of that country, who bring them gold, and divers other rich commodities, in truck for their flight merchandize.

The project to hinder the trade of the Hollanders, and quite to banish them from that coast, is, to furnish as men of war, fix or seven of those ships they ordinarily fend to Brafil well mann'd; and these in their way to range along the coaft of Guinea, where they shall undoubtedly meet and take the Holland ships that trade there in feveral parts and ports, as is apparent, having neither port, nor other strength to re-fift them. Or if it shall happen that they have made any defence on thore by the affistance of the negroes, they may easily sup-plant them with the soldiers they carry with them; whereas by giving them a longer time to inhabit that coast, it would become a more difficult enterprize to subdue them, by the example of the Hollanders possessing divers places in the East Indies, which at the first might have been prevented.

If the Hollanders be but once thus ferved, it will be a means to make them quit that coalt, and clearly thrust them out of Guinea: for Guinea is not like the East Indies, where the Hollanders maintain an hundred ships by their several trades in fundry parts, as well those places they enjoy, as the others that accept of their commerce; whereas in Guinea, the traffick is but in particular places, whither the merchandize is brought them by negroes from afar off within the land, which cannot be of any great bulk, for want of carriage of thips or boats; neither are they defign'd any particular harbour, as the Portuguese are at Castle de la Mina.

Vol. III.

The Hollanders have as litte hope of robbing and spoiling the Portuguese, because their trade is but finall, and their ships few, whereby they are not able to maintain footing in that country, without greater expence than the profit will countervail: fix or feven ships of Portugal will be a sufficient strength to drive them out of Guinea, those fhips to range along the coast, and cut them off where they shall find them trading in their feveral places.

My project is, after they are thus deftroy'd, that the fix or feven ships of Portugal stand over to Brafil, and there take their freights of fugar, and other rich commodities, which, confidering the fafety and waftage by those ships of war, will be a means to ease the expence in furnishing the thips of war.

The fecond Project to Ruffia.

The north part of Russia was but a thing imagined, till Sebastian Cabott, by his perfwalions in the reign of queen Mary, drew England to the discovery of it, Anno 1553. which enjoy'd the absolute trade thereof for many years, till the Hollanders encroached upon us, as they have done in all other trades, as I have faid in my fixth book. In continuance of time the Hollanders, have increased from two ships to one hundred, as is apparent by fo many as they yearly fend; and have made a greater use of the country than to merchandize alone; for they have fet up a trade of making cables, ropes, and other cordage in such abundance, that they outdo all other places in the Baltick Sea ; and from hence they directly ferve Spain with those commodities: and because the passage being through our channel, in time of war they feared to be intercepted by us, they directed their course to the north part of Scotland and Ireland, purpofely to avoid us.

The advantage Spain is to take of them in this project, is to carry their deligns difcreetly and fecretly; to be provided of pilots without sufficion or noise, which must be done out of England; for no other christian country trades into Russia but we and the Hollanders; and though their harbours are dangerous at their going in, by reason of their bar, yet it is familiar with the pilots that use it. The force the Hollanders have to guard their hundred sail of ships, is commonly three or four men of war, who suffect no annoyance from Spain at any time; and by these three or four ships you may judge of the strength you are to employ against them: though I advise you carry no less than thirty sail of ships, well manned, to man the Hollanders after you have taken

Befides the command you shall have over the ships aforesaid, you shall possess their storehouses, cellars, yards, and what else belongs to them, and spoil them, that they be never able to erect more, without an in-

finite charge.

The third confideration, is the feafon of the year; for they must cast to be at St. Nicholas by the 10th or 12th of July; for no longer than the 17th of August they can well abide there, by reason of the winter fo fuddenly coming upon them: or if they shall arrive earlier than the 12th or 14th of that month, perhaps they may come with the foonest, and find their goods not shipped; but though they should, it will not be very material, for they may row up with their boats to Polmogro, eighty miles distance, where the greatest part of their commodities are made, and shall either meet them in their transportation to the ships, or possess them on shore, where they shall undoubtedly find them.

Or if upon any other accident the *Spanifb* thips shall not arrive at the port of *St. Nicholas*, before the others put out to fea, then they may fland to the north cape of *Norway*, and there lie off and on the headland, which the *Hollanders* must of necessity fee and double, before they can direct their

course for Holland.

If Rulfia were a country in league with Spain, or otherwife had correspondence or friendship with them in commerce and traffick, then I confers it were against the laws of nations and honour, to offer violence to an enemy within the port of another! prince, when they are under his protection. But I could never understand, that ever leagues were treated of, or trade maintained betwixt Russia and Spain, or ambassadors employ'd, or other obligations of friendship, since king Pbilip was king of England; and therefore the king of Spain can be no more taxed or blamed, if he used this opportunity upon his enemy, that is offered him by this proposition, especially when none of his sub-

jects can receive prejudice or fear of hurt, or imbargo to be made upon their persons or

Let the Spanish commander, at his arrival in the road of St. Nicholas, have a care to fummon fuch English ships as he shall there find in harbour, and to admonish them to forbear offering violence, or making other refiftance in defence of the Hollanders ships, and let them understand in a friendly way, how they are to carry themselves by the articles of peace, which they may carry and flew them; and withat to tell them roundly, if they exceed their commission therein, that justice will be required at their hands by their ambaffador refiding in England, who will be fure to profecute it with all rigour and feverity: and in the Spanish fleets behalf, let the general give affurance, no way to impeach the English, or by any direct or indirect means to trouble or molest their peaceable traffick.

This project prevailing, the Spaniards will be inriched with one hundred fail of Holland ships, and their lading; great part whereof is cordage, and other things of confiderable value, which Spain has most need to be furnished with, and need not hereafter be beholding to friends for them.

A Rutter of Ruffia.

He that will direct his course from Spain to the north cape of Norway, must steer a northerly course, till he arrive to Iceland, where upon occasion he may refresh himself with butter, slesh, and fish, and from thence steer away E. N. E. for the north cape.

From the north cape to the north Kave,

E. and by S. thirteen leagues.

Thence to Marcroft, E. S. E. twelve leagues.

Thence to Wardbouse, S. F. fifteen

leagues.

Here you may have your felf from Ward-boufe, to the point of Kegro, E. S. E. eleven leagues, no good road for great fhips.

From Kegro to Zoufe, S. E. nine leagues. From the feven islands to Swetnofs, twenty one leagues: there are islands where you

may anchor.
From Swetnoss to Lombasco, S. S. E. thirteen leagues.

From thence to Orgolouse, S. S. E. seven

leagues.

From Orgolouse to cape Caudenos, N. E. forty seven leagues; but you must fail from the three islands to Cross Island, S. S. W. thirteen leagues.

From thence to Calmonse Archangel, and by W. seventeen leagues on this side of Archangel is St. Nicholas.

r great fhips. . nine leagues. The Third Project.

That the Spaniards may practice against the Hollanders, and to be as easily effected as the rest, and of greater consequence than all the others, is a design against their fishing; which all men know is a means to uphold their state, to increase their ships, and to multiply their wealth; in which, if at any time they be prevented, or intercepted, they become more miserable than all other people, in that they shall be made a prey to their enemies.

This fifting I formerly treated of, with the condition of the *Hollanders* that only enjoy it by our permiflion: now will I proceed to the defign upon them, for the *Spaniards* to execute, fo it be with the approbation and fufferance of the king of *Eng-*

Thave already declared the place of rendezvous, where the Hollanders meet; as also the time of the year, the month, and day, when they begun to fish, with the profit they make of it: the place of rendezvous is Blazowande in Sbutland, an island in his majesty's jurisdiction of Scotland; thither commonly resort one thousand or more fishing vessels, called busses, which, by a law made amongst themselves in Holland, cannot put forth line or net to fish, till the 24th of June.

And therefore the Spaniard must so cast, as to be at Blazoronde before that time, or at least two days, to take an opportunity before the others going out of harbour; which, if they have a care effectually to accomplish, they shall bring both the persons of the Hollanders and their ships to their mercy. And after this is effected, I need not teach

the Spaniards how to carry their bufiness, or what conditions to make with the Hollanders; for they shall have time sufficient to compass their ends, after they have them in their power.

The Fourth Project,

Is for the king of *Spain* to keep a conftant fquadron of ten or twelve fhips, choice failors, upon his own coaft: they will be able to keep the *French*, the *Hollanders*, and the *Turks* pirates, from the incurfions they ufually make upon that coaft, and put them to look their prey in a vaft and open fea, which is as uncertain of meeting fhips, as the finding a needle in a bottle of hay; for I have often fhewed, if capes and headlands be well defended, the others will not be worth the coft and charges they shall be put to

Befides the fervice done against ships of war in this manner aforefaid, they will secure their own trades, and impeach all such Hollanders, that shall go in or come out of the Streights, if they keep a squadron twelve or fourteen leagues south from cape St. Vincent, and spread themselves north and south a league and more in distance from one another; one ship of Holland that shall be taken in their course out of the Streights, will countervail the charge of a whole squadron for many months; and the example of it, seeing their good success will encourage the Spaniards to keep ships continually thus imploy'd.

Here I end my projects, till I have occasion to speak of them again; and now shall follow my stratagems.

Stratagems to be used at Sea.

Fleet that is bound to a port, and fears to meet an enemy, may avoid him by this firatagem following: Belides fuch pinnaces as must be sent to look out the ships expected, to give them warning of an enemy, they ought to have other pinnaces, choice sailors, that should attend the enemies sleet; and finding they lie in a height, the others have order to sail in, to draw near them, and to entice them to chase them; and in pursuit of them, they will be drawn to leeward, and give passage for their sleet's entrance.

2. But if this prevail not, they may cause one of their pinnaces to be purposely taken to deceive them with false instructions; as for example, If their fleet have order to come home in thirtyseven degrees; the enemy finding those directions, will not

suspect a deceit, but will stand into thirty feven degrees, when the others will come home in thirty six, the height former assigned them, and so avoid them.

3. Or if a fleet be fent out for guard of those ships expected, and not so good of fail as their enemy, to force them to quit their coast, it were better such a fleet should lie in a contrary height to that their ships have directions to fail in, than otherwise; for the enemy finding in what height they lie in, will verily believe they have orders to come home in the same height, and will strive to meet them in that height, before they shall join together, when the others have directions not to come within forty or fifty leagues of them.

Archangel, and is fide of Arch-

Tit

BOOK V.

4. If fleets shall meet in the night, or after an encounter they forbear fighting when it is dark, and one of them have a defire to qoit the other, they may cause so many lights as usually their admiral, or other ships, carry in the night, to be carry'd by pinnaces in such a height as may equal the poop of their ships; and the enemy accompanying those lights, will not suspect the slight of the sleet, who in the mean time may convey themselves away, and leave only the pinnaces behind them.

g. If a fleet will deceive an enemy of a lefs force, that is fo far to windward, that they cannot fetch them, they may do it with counterfeit flags, and working like merchants fhips; and for a bait, may appoint part of a fleet to chace another aftern, and the chafer to wear the enemies colours.

The ships must shoot, but miss one another; which they to windward spying, will come home in hope to have a part of the booty, and so be brought into the wake of the seet, and entrapped.

6. This stratagem will serve as well for a road, to cause in the like manner one ship to chase another, as though she that is chased, laboured to recover the road: and a stag seeming to be a friend, may embolden them to go forth to the rescue of her, and so fall into the laps of the energy.

7. People are not so easily deceived with counterfeit stags, as they have been; for the often practice of such stratagems, makes men more cautious: we were wont to make it a common custom, after we had taken a Spanish carvel, to cloth our men with the others garments, and to send them into the harbours of Spain to be informed of the state of their shipping.

8. In 1587, and the first time I went to sea as captain, I had two pinnaces, and one Spanis frigate with me: the frigate took a Portuguese, and after was robbed her self by a French ship of war: out of necessity thas frigate was forced into the harbour of Setweal in Portugus, and the people seeing her Portuguese built, and the men attird in the habits of the Portuguese they had formerly taken, and having a Portuguese aboard with them, that came out of England, and whom they trusted, they were supply'd with what they wanted from the shore, and departed without suspicion

the shore, and departed without suspicion.

9. One night I came into the road of Cezimbra, pretending to be a Flemming bound to Setuval to lade salt, and desired a pilot; under which colour I deceived the pilot, and diversother boats and barks that came aboard me, by whom I understood the state of the sleet at Lisbon, ready to set to sea in pursuit of me. I could recite many stratagens of this kind.

10. If a fleet intend an attempt upon an harbour, where a ftrong fort may impeach their entrance, by example of Lisbon, and the caftle of St. Julian's, the stratagem is to fet two or three old vessels on fire, fitted with all manner of necessaries to make a smoke, and to run them ashore under the castle, that the gunners may not see a ship, much less have an aim at them, and so they may pass without danger.

11. What stratagems may be used against such ships as are entred a harbour, and how to prevent it, I have expressed in the second book, where I treated of the last expedition at Cadiz, in 1625.

And because I have named Lisbon, I will fet down a stratagem I had in mind after

my imprisonment there.

12. Both many years before and after I was prisoner in Lisbon, the Hollanders had a free trade into all parts of Spain, which I took advantage of in this stratagem following: I devised that twenty Holland ships freighted with merchandize, under the colour of merchants, should repair to Lisbon, and that every ship should have a number of men fecretly hid in sthem; and when they came to anchor at Belem, which they generally do, and are viewed by the king's officers, these men should not appear; and after their discharge from Belem, I had order'd that every thip should ride as near the king's palace at Lisbon, as conveniently they could; and that in the night when there was no fuspicion of them, and the galleons had no more men on board than the ship-keepers, the Hollanders should sheer aboard, possess, and burn them; for they were fure to find no relistance : after this was done, there was no danger of their coming out; for it is an ordinary thing for ships to pass Belem in despight of the

13. If a thip fall into company of a fleet at night, it is necessary to have a fudden and a ready answer; as also two or three of the nation to speak as they shall be directed; as for example, and as you shall read in my last voyage in the queen's time, how in the night I lighted amongst twenty four galleons of Spain, and being fo nigh the admiral, I could not avoid her, had I been known to be an enemy, I commanded a Spaniard that ferved me to call the admiral, and tell him there was a strange ship entred amongst our fleet, which of all others he could not suspect mine, because of the warning I gave him; and in mean time I tacked from him, and fo escaped in a secret manner, making no noise.

14. In the ifland expedition I met the Indies fleet, and it blowing little wind, I went off in my boat to defery them: when I perceived what they were, I made my

destroy'd.

15. It is a common use when ships are scattered, and chance to meet in the night, not knowing one another, to hail one another in a strange language, which I disapprove, as a thing dangerous; for the other being fatisfied by his tongue, not to be his confort, or of his country, prepares to fight; and thus had it like to fall out with me: the Mary-Rose and I meeting one night, after we had loft company, one of my company hailed her in Spanish without my privity, whereat I was angry, and caused her to be called to in English, even as she was giving fire to her broad-fide. It is folly in this case to counterfeit; for no good can come of it, feeing the one cannot part from the other, without knowing what they

16. The figns that direct a fleet in the day-time, are striking, or hoisting the topfails, shewing their flag, or shooting their ordnance; by shewing lights in the night, many times I have keem when a ship hath lighted in company or an enemy, that by chance she has made the very same sign given by the general, by which means she has escaped; and in the like manner ships have been taken by the fame fortune: therefore there cannot be a better stratagem than when a fhip shall make a fign, to be anfwered by the fame; and the contrary ship begin a new fign, before the other make any; for it is not to be doubted, but the other ship will answer every sign that shall be made by her that makes the first.

17. I once knew an unlikely ftratagem take good effect, in this manner; After three days chafe of a rich fhip, my lord of Cumberland was out of hopes of fetching her up, she was so far to windward, only a pinnace kept her company, and in the night carry'd a light for us to follow. I advised my lord to fire a culverin at her, though we could not fetch her at twice, saying, that panaps she would yield to the countenance of the ship, that would not for shame do it to a pinnace. This seemed ridiculous; and I had much a-do to perswade my lord; yet upon my importunity he yielded to it, and the ship, as I foretold, submitted her solf.

18. A fhip that is chafed and defires to flow fear, thinking to draw her that chafes into her clutches, must counterfeit and work as though she were diffressed, and lie like a wreck into the sea; she must cast cregs, hogheads, and other things overboard, to

hinder her way; fhe must shew no more men than an ordinary gang, and haul in her ordnance, and shut her ports, that her forces be not discerned, till the other ship come within command of her.

19. As fhips ought to observe their admiral's working in the night, by his light, so ought they to be more careful when they are nigh a shore, left they mistake a light on land, instead of their admiral, by example of 1597. When the Adelantado drew down his sheet from Lisbon to the Groyne, and coming nigh the north cape, the greatest part of the sheet sheet sheet with a light on the shore, mistaking their admiral, and cast away thirty six ships and five thousand men.

20. As lights direct one another at fea, fo are they directors of ships from the shore, as I can instance in many cases, some of which I have already declared; to which I refer to the ships of the ships of the ships of the ships of the ships of the ships of the ships of the ships of the ships of the ships of the ships of the ships of the ships of the ships of the ships of the ships of the ships of the ships of the ships of the ships of the ships of the ships of the ships of the ships of the ships of the ships of the ships of the ships of the ships of the ships of the ships of the ships of the ships of the ships of the ships of the ships of the ships of the ships of the ships of the ships of the ships of the ships of the ships of the ships of the ships of the ships of the ships of the ships of the ships of the ships of the ships of the ships of the ships of the ships of the ships of the ships of the ships of the ships of the ships of the ships of the ships of the ships of the ships of the ships of the ships of the ships of the ships of the ships of the ships of the ships of the ships of the ships of the ships of the ships of the ships of the ships of the ships of the ships of the ships of the ships of the ships of the ships of the ships of the ships of the ships of the ships of the ships of the ships of the ships of the ships of the ships of the ships of the ships of the ships of the ships of the ships of the ships of the ships of the ships of the ships of the ships of the ships of the ships of the ships of the ships of the ships of the ships of the ships of the ships of the ships of the ships of the ships of the ships of the ships of the ships of the ships of the ships of the ships of the ships of the ships of the ships of the ships of the ships of the ships of the ships of the ships of the ships of the ships of the ships of the ships of the ships of the ships of the ships of the ships of the ships of the ships of the ships of the ships of the ships of the ships of the ships of the ships of the ships of the shi

21. Lights kept in the night off of a headland, as the *Lizard*, or fuch capes, are a fafeguard to fhips in their paffage, that are in view of them. Lights likewife give warning of an enemy that is upon a coaft, and for that ufe beacons were invented.

22. Ships that are appointed for more readine's of a fervice to ride in the found of Plinouth, in the range of Dartmouth, or other roads upon our coaft, and in the night are fuddenly taken with a fform at fouth, which is a deadly wind in those roads, if lights be placed on either of the sides of the point of Catvater or Dartmouth, will be guided into the harbour, be it never so dark.

23. In a bar, ed harbour, fuch as *Dunkirk*, that is continually beleaguered by an enemy, by keeping lights from half-tide to half-tide, he that enters, is directed how the tide increases or decreases, and thereby how to avoid the enemy.

24. Ships riding at the *Downs*, and fearing a furprize from an enemy in the night, with a foutherly wind, by placing two boats with lightson either fide of the brake, will direct one how to pass the channel, and avoid the sands; which being done, and the lights taken away, the ships that pursue them will run upon their death if they follow.

25. The cutting down mills, trees, taking away buoys, or other marks that direct the pilot, is a great fafety to any port, or place, fuch as the *Thames*, where many funds muft be paffed.

26. The placing of fhips for the advantage of wind, is a matter of great confequence; as for example, if an invafion againft England be intended from the fourhward, that wind that brings an enemy for England, will keep in our fhips in harbour, that they cannot ftir out; only one place is advantageous to us, which is

Limebouse

Limebouse near Plimeuth; for that wind that brings an enemy from the westward or fouthward, will serve our ships that lie in Limebouse to follow them, if they pass into any part of our channel to the eastward.

27. Prospective glasses, if they were not so common, were an excellent stratagem to be used in many cases at sea, and yet it is no hard thing to deceive those that use them; for a merchant-ship that carries not above ten or twelve men, may have the shapes of men made, and seem to be one hundred afar off; they likewise may have counterfeit guns made of wood, which the glass cannot discover from iron, to the terror of the affailant. It may as well serve for a man of war to stow his men in hold till a ship come near him.

28. The best and the greatest ship in the world may be sunk by a bark of twenty tons by this stratagem, viz. to place a cannon in the hold of a bark with her mouth to the side of the ship the bark shall board, and then to give fire to the cannon which is stowed under water, and they shall both instantly sink; the man that shall execute this stratagem may escape in a small boat hauled on the other side of

the bark.

29. Two galleons may be manned, and furnished in the manner following, and will be as great a guard and fafety to a fleet of galleys as the wings of an eagle to little birds, or a caffle to a flip.

The two galleons shall carry each of them one thousand men, with all kind of arms for offence and defence: there shall be placed aloft such kind of fowlers as I will

invent

Their hatches shall be made with it hodors, and pikes placed under them, to at as saft as men enter they shall fall upon the pikes so placed; all the deck shall be strew'd with round pease tallow'd, that treading upon them, no man shall be able to stand upon his feet; the ships on the outside to be stuck with tenter-hooks, that they shall take no hold to enter with their hands; and their cloaths will stick upon the tenter-hooks, that they shall not be able to enter: there shall be barricadoes, and close sights made with all advantage, and all parts of the ship be made musket-proof for the safeguard of men.

Allow by the water and without board they shall be fortify'd with packs of wooll, that no shot shall pierce them, or galleys be able to board them; every ship shall have upon his yard-arm a barrel or two of gunpowder mixed with bullets, that as the galleys shall approach the distance of the yard, the barrel of powder shall be let fall with a pulley, and matches about the bar-

rel that fhall give fire upon the fall, and breaking of the barrel. In this manner will the galley be burnt, and the men flain all at one inftant.

30. If galleys attend a fleet of ships, thinking to cut off some stragglers, as they did to Sir Francis Drake, and after to us at Cadiz, where they took some few vessels; in such a case, the great ships must be a guard of the outfide of the fleet to the leffer ships; and if the fleet chance to anchor, to place the least and weakest veriels outermost of the fleet in the day-time, which will imbolden the galleys in the night to affail them; but when the dark. fomeness of the night shall approach, then to remove them, and in their place to cause the best and the greatest ships of the fleet to anchor where the others did, that if the galleys attempt them they shall be entertain'd to their loss.

31. If a fhip will board an enemy under a caftle, let him that boards bring the fhip boarded betwixt him and the caftle; for then dares not the caftle fire for hazarding their own fhip boarded.

32. Sinking of thips full of ftones is an old invention, and uted as well to defend one's felf in a barr'd harbour, as by an enemy to keep in thips from going out: but it is to little purpofe to him that poffeffes a harbour; for when the water is decreafed, fuch thips funk may be waded to, the ftones taken out, and the thips burnt without hurt to themselves or harbour.

33. Booming harbours for the fafeguard of fhips is ufual; but at each end of the boom fconces must be built to defend it. For this I refer you to my first book, which will give you more particular light.

34. One of the known dangers in a fhip of great burthen, and in a great florm, that carries weighty ordnance, is the breaking loofe of one of her pieces in the lower tire; for before fhe can be mufled, or overcome by force of men, what with the rowling of the fhip from one fide to the other, the piece will carry the fhip fide, and founder her in the fea.

35. For avoiding these perils, there is but one remedy, if it take effect, which is suddenly to heave up the harches of the deck, that in her recoil she may find the deck open, and fall into the hold, where she shall

be easily overmafter'd.

I am of opinion, if any had efcap'd aboard the king of Spain's thips that were wreek'd, which was impoffible, they would confefs the breaking loofe of their ordnance was the excasion of their destruction; and no marvel, for they use to carry their great ordnance upon field-carriages, which makes them the more dangerous and unferviceable, when they come to traverse them.

ip'd aboard re wreck'd, I confeis the was the ocno marvel, it ordnance is them the lble, when 36. If there could be made a hall of wildfire, as I have heard fome take upon them to do it, which ball should burn without quenching, then were it an easy thing to convey one of those balls secretly into a ship, and privately to hide it till the party be gone out of the ship, which then being set on fire, will not only burn the said ship, but all others near her.

37. In paffing a fort in the night, it is good to make both the fhip and fails black, with a care that no light be feen in her; but the way for an enemy to prevent an entrance is this, to make a fire opposite to the fort, and to lay the ordnance point blank with the fire, that when they shall fee the shadow of the fire taken from them by the fhip and tails, then to discharge their ordnance, and be sure to fink the ship.

38. A fhip that will keep another from boarding her, she being to windward, and may board her, the remedy is, to put forth two mafts at two ports, that the ship coveting to board, she shall light upon the masts, and keep her from coming near the

39. It is a good stratagem to board a ship though she presently fall off again; and during the time she is on board to appoint the carpenters with their axes to cut the port-ropes of the ships boarded, that at her coming off again, when she shall begin a new sight, her pieces may serve for no purpose, because her ports will be clogged, and not able to put forth a piece of ordnance, but lie to be annoyed by the green.

40. A number of thips lying in an harbour dry, from half-tide to half-tide, may be thus deftroy'd: As I will make a comparifon betwixt England, Flanders, and France, where two of them have wars with one another, and the third peace with both; I will suppose that a ship of France, and a man in her that I will trust, freighted for Dunkirk, where English barks are forbid to go; the bark is to be laden with deals, and other dry substance apt to burn, and under her boards there must be stow'd pitch, tar, rofin, and other ingredients not to be quench'd: the Frenchman that shall execute this stratagem, must forecast at his entrance into the harbour to feek to lie aboard the best faips, and where he may do the most hurt and spoil to the rest when his ship is on

All things being thus provided, and the train fufficiently made, the Frenchman must watch his opportunity that his match come to the train by that time it is low water, which he may compute by hours and the length of his match; and in that time he may have his horse in readiness to carry him over the river of Gravelin, but nine

miles from thence, where he will be in France, and free from danger.

The fire thus taking, and all things order'd by these directions, as well this ship as all others in the harbour will be destroy'd; for the water going from the ships, and they lying dry, they are not able to remove or stir, or have water to quench the fire till the shood rise; so that in the mean time they will be utterly destroy'd.

41. If thips defire to furprize a fort or fconce that would give them landing if it were taken, it is thus to be done: To imbark the men fecretly in their boats in the night, and without noise of their oars, and then to row as near the fort as they can, without being difcover'd; and in the mean time to cause a small boat, not near the place where the others are, to thew a light or two with a match, as though it were accidentally done and not willingly, and to leave the boat adrist; which the fort perceiving, will prefently let fly her ordnance against her; which the other boats feeing, they may fuddenly land and enter the fconce by their fcaling-ladders, before their ordnance can be laden

42. If an enemy should land in boats upon a shore, that the surge of the sea should be very inconvenient for the landing of themselves and arms, there is a kind of bridge to be made with boards, that may be laid over from the side of the boat to the land, and avoid the surge; and instead of wading, their men may go in ranks ashore without wetting.

43. If an army fhall land where the fhore is all beachy, and full of little flones, like *Deal* and the caftles thereabouts, where they may bring ordnance to impeach the enemy's landing, I would advife, that the artillery fhoot not fo much at their boats, but fuffer them to come on fhore, and then to let fly at the flone or hills piled up on purpose in heaps, nat will featter and disperse, as not a man will be left alive.

44. A flip that defires to be boarded, and to be enter'd by his enemy, may use this ftratagem; To haul in all his ordnance, to flut his ports, to hid his men, to firike his fails, and make all the figns of yielding; which the enemy perceiving, will be embolden'd to board him; and whilft they are fuffer'd to enter and pillage, the defendants may fuddenly rife, fubdue and master them.

45. If an enemy fink fhips to keep in others from going out, fuch fhips fink may be fuddenly weighed, if the affiliant quit the harbour, without any great detriment to the fhip funk; therefore they are to make choice of the shallowest place to fink

their fhips, and nearest to deep water, where their own thips may ride and float, that with their ordnance you may keep the ship funk, that no boat, or other help, can weigh them; themselves shall be kept from any danger of firing; for no enemy can approach them, fo long as the fhips funk lie there.

46. There is a stratagem as old as the invention of thips, though the common people attribute it to the wit of Sir Francis Drake, at Cadiz, in 1588. against the Spaniards, to fill old thirs and vessels with pitch, tar, train-oil, brimftone, reeds, dry wood, and to join three or four of thefe fhips together in the night, and then turn them a-drift with the tide, where the enemy's fleet rides, and either burn or difperfe them, after they are thus put from their

anchorage.

47. At my being at fea in my youth, 1585, two fmall fhips of us accompanied together, we met a strong and obstinate ship of Holland, who refused to strike his slag, or to flew his cocket: this flip had in her an English pilot, by whom we exposulated with the Hollander, without any semblance of boarding her; but being very nigh her our mafter cry'd to the man at helm, with gr at anger, to port the helm, left we should come foul of her; but privately he gave charge to the helmsmen, to put his helm aflar-board, when he should have put it port, and cry'd with great vehemency to the Englist pilot to bear up; for our ship came against her helm, and willed them to get fenders, and have spikes to fend off, left we should come foul of her: the Hollanders thought all we faid was true, and every one of them put their helping hand to keep off our thip with fenders and oars, not apprehending our intention; and when we faw their people thus employ'd, and not to have time to take arms, we fuddenly boarded, entered, and took her by this stratagem.

48. As the greatest advantage of a feet of ships of war is to have intelligence of their enemy when they come upon their coaft, fo the way to obtain it, arriving upon the coast of Spain, is to let a ship's boat lie under the island of Burlings, where they shall not fail, by break of day in the morning, to cake fifthermen that will be able to inform them of the state of things ashore: it may as well ferve for any other place, if

they fee fair weather in hand.

My lord of Cumberland, arriving upon e coast of Spain, was fore distressed for intelligence; and a fudden calm arifing, two or three leagues from us we fpied two carvels; whereupon I put myfelf into the ship's boat, and rowed to them; one of them I took, the other might have escaped, but by this stratagem I prevented her: I took

out two or three of her men, and manned her with my own company, and immediately without delay fent her to meet with her confort, who made figns that they might think her discharged, and rowed my boat on board the ship that there should be no fuspicion; so that the carvel was thus taken by deceit, which otherwise might have escaped; but when I had so much as I defired for intelligence at their hands, I difmiffed them, and after found, I being taken myfelf, that they reported well of my good usage of them.

50. I had a stratagem upon prince cardinal Albert, when he was viceroy of Portugal, but was prevented by his fudden going into the low countries; and thus it was: When I was prisoner in the galleys, about the 10th of September, the cardinal paffed down to a pleafant house called Cintra, with a small train, where he fpent his time in devotion. Usually he repaired thither at the same time of the year, and to the same purpose; which I well observed, and meant, if ever God gave me liberty, to have furprized him in this manner: To have conforted with two or three ships of war, which would no way have hindered the hope of their voyage, to have anchored before Cintra, that is feated upon a hill, and not above two miles from the sea. I meant in the middle of the night. when there was no noise or suspicion, to have landed an hundred men with firelocks. who might, without difficulty, have furprized him and his house, and have brought

manded to attend. 51. When I was removed from the galleys to the castle of Lisbon, I had another stratagem on foot; but was prevented by a traiterous Englishman, whom I was forced to use as an interpreter, before I had the

him to the place, where the boats were com-

There was in prison with me a Portugueje gentleman, called Emanuel Fernandes, who had been in England fervant to Don Antonio, their pretended king: this man was much devoted to the fervice of the queen; and I observed that a pilot of the king's usually employ'd to meet the Indies fleet with letters of advice, to direct them the course they were to come home in, reforted to him. I fo dealt with feignior Emanuel, that upon confiderations agreed on betwixt us, if my defigns should prove successful, he did really undertake to prevail with the faid pilot, inflead of carrying the letters of advice to their own fleet, to carry them to the queen, that fo the treasure might by this intelligence be intercepted; for I had so contrived it, had I not been prevented by the faid treacherous Englishman, that the queen should have notice of it, by letters I wrote to the lord Burleigh, lord high treasurer, and to the lord

I el, that upon ixt us, if my , he did really faid pilot, inadvice to their ne queen, that intelligence be trived it, h:! id treacherous ould have nothe lord Bur to the lord admiral

admiral, and convey'd the faid letters in the foles of my boy's fhoes; but by the falfe dealing of the Englishman aforefaid, my plot was difcovered, and my boy carried into Belem caftle, three leagues from thence; to that when I thought my fervant had been embarked for England, two months after I had intelligence by an Englishman, gunner of the faid caftle, that he was ftill there prifoner, and had famished, if he had not taken pity of him.

The first thing the Spaniards did, after the imprisoning my boy, was, to rip and fearch his shoes, according to the intelligence given them; but though it was unfortunate to me, yet in another kind it fell out luckily; for a great rain falling that morning he was carry'd away, it so moisten'd his shoes and letters, that they were mouldered, and could not be read, as the boy after contess'd at my arrival in England; so that they could have no witness, but the Englishman who was my ac-

Since I am upon this project, though it may feem tedious to the reader, yet will I fet down the danger that befel the gentleman and me, upon the occasion aforefaid: This seignior Fernandez had been prisoner in the castle of Lisbon almost seven years; and his offence for coming out of England with letters and messages to Don Antonio's friends in Portugal; yet such was the power of money, that by means thereof he was to receive liberty, had it not been for this treason discovered by this vile Englishman.

A day was appointed for his fentence of death, which with weeping eyes he acquainted me with, like a friend in a delperate cafe. I advited him, if all other hopes failed, to feek fone ftratagem to escape prifon, with promise of my endeavour to help him, and to be short, for delay could do no good. He provided himself of a rope and a cudgel to put betwixt the battlements of the castle wall, thinking when we went to our necessary business, which was once a day, with a guard of two soldiers, to have taken an opportunity to have slipped down the wall, and to have run into a church, thereby scated, to take sanctuary.

But after four days trial made at our coming to the wall, as I have faid, we found it impossible to put this stratagem in execution in the day time; and I considered withal, the danger that might have befallen me, if he had escaped; therefore we thought upon another course, though it was more improbable, and which was as followeth: over the little room he lay in, was a chamber where soldiers had been lodged, that a week before were embarked in a steet to sea; the chamber was not so high, but that by

the help of a high ftool, which he had in his Vol. III.

room, the top of it could be reached to: here we put our helping hands, one of us ftill working, till we cut with our knives a trap door out of the boards above-head, that a man might creep through it; and finding by the almanack when the nights would grow dark, we contrived all things against that time, to perform our devised plot; and by means of his fon, who had access to him, he provided of a sword-scabbard, and a flick to ferve inflead of a rapier, that he might feem to be a foldier as he paffed the centinels, he carried his rope and cudgel, aforefaid, and a bag with a little bread and wine for his fuftenance, under his cloak; and thus he went armed out of the chamber above, as a foldier, with a wooden fword by his fide.

He paffed the Corps de Guard and five centinels before he came to the wall, pretending he went for his neceffary occasions, which they never mistrusted, seeing he carried the fign of a foldier, which was a stick in his scabbard. At his arrival at the wall, without fear, or any sense of age, he slipped down by the rope, and happily cleaped.

Not long after, the round paffing about the caftle, efpy'd his rope, cloak, cudgel, and wooden fword, which affured them of the efcape of fome prifoner; whereupon the drum beat, the alarm was taken, and the foldiers furioufly came running into my chamber, as they did to others where prifoners lay, with their fwords drawn, and threatening death. I confess I looked here to have ended my life 3 but that pass'd, and two foldiers were left to guard me till morning.

They finding it was my neighbour feignior Emanuel Fernandez that was escaped, the hue-and-cry went through the city and country, and command for his apprehension; but such was his fortune, that he escaped the sury of the tumult, and I was left at stake to be baited for the offence, in the morning early, I appeared before the judge, as the only delinquent, the rest of the prisoners casting it upon me; all agreeing, I was the likeliest to know of his escape, because of our continual conversation, but little knowing the true cause of our often meeting.

But neither threats, ill ufage, or promife of liberty, could make me confeis any thing to the prejudice of either of us. I was fo urged and threatened, that I was forced to ufe for my defence this argument, (viz.) That I was no fubject to the king of Spain, but to a prince his enemy; that I was taken in war; and therefore required the benefit of that law for my redemption: I came not willingly to their country to learn their laws, or to bring in others to breed inno-

vation: I was subject at that time to the univerfal law of honour and arms, by which I challenged the privilege of a gentleman for my treedom; and for the accident now in question, I deny'd that I had any knowledge thereof, or that I was any way privy to it a and that the unlikeliness of it should plead for me, and be a fufficient testimony of my innocency: I told them, they knew I was fo unskilful in their language, that I could not devise a practice or plot with a man I understood not; and that my imprisonment had kept me from acquaintance, either in city or country, to contrive any evil against their state; and it it argued guilt to be accused, no man could prove innocent; and therefore I defired them that they would rather pity my mitery, than accuse me unjustly : I intreated them to confider that I was a prisoner among my enemies, destitute of all relief, and in a place where no friend could refort to me; for I bemoan'd my wants, there being a reftraint of intercourse and trade betwixt the two nations.

But what I could fay did little prevail; for they aggravated my supposed offence with cruelty of threats; insomuch that I was fore'd to plead in another stile, and let them know, that by the law of arms they could prove nothing against me that deserved punishment; the privilege of which law I challenged, as being taken in war, and continued prisoner for my redemption; during which time, it was lawful for me to seek my own liberty, and to neglect no octation, wherein I might do service to my prince and country; and therefore what they accused me of, could not be deemed an

offence.

I told them moreover, though I used this but as an argument, yet their barbarous usage of me deserved a greater revenge than I had ability to perform; whereas, if they had treated me with courtefy, I had been more bound to them, than if they had reposed trust in me. I ended with this desiance, That they should be wary what violence they offer'd me; for I had friends in England, and was of a nation that both could and would sufficiently revenge what cruelty soever they should use towards me.

These reasons begot a more calm respect from them; and another while they used persuasive arguments, with promise of liberty and reward, making me believe the gentleman was taken, and confessed so much as they accused me of: but I well knew their words were but wind; for that they would never have warned me, if they could have juttify'd their allegations by a personal testimony: yet I consess the thoughts of one thing much terrify'd me; which was a letter I gave to seignior Pernandez at his consession.

parture, which might have been produced againft me; the letter was in his behalf, to all Englifb captains at fea, for his friendly entertainment, his defign being to put himfelf into a fifherboat, to look out at fea for a man of war to transport him for Engl. nd.

After a tedious examination of four hours, when they faw their fubtleties could work nothing out of me, prefumption being but an unequal judge, they returned me to prifon, with charge to be more thriely looked to: and after neglected no cunning means to entrap me, as I have more largely express d in another discourse, at the request of some of my friends.

I will again return to the gentleman feignior Fernandez, who no doubt was as much perplexed out of prison, as I who could not fly from the danger of my enemies, in whose custody I remained. All hue-and-cries, fearches, promifes of reward, and other devised policies, not prevailing for the apprehending of the poor gentleman, he liv'd in a difguifed obscure manner, till time furnithed him an opportunity to embark in a fisherboat, to make use of my letters aforefaid, where he fpent fourteen days at fea, and failing of meeting any thip at fea, and wearied with fea-fickness, he was forced to return to shore, where he lived some time among poor shepherds and herdsmen, till he thought his difguife and disfiguring himfelf, had to altered him that he could not be known.

Now thinking his new-formed shape would fecure him from being discovered; and hoping that the long time fince his escape might make his fact to be worn out of memory, he was embolden'd, in a beggar's habit, to try the charity of good people; and chancing to repair to a gentleman's house 'or alms, it happen'd that the faid gentleman and he, had been fellowprisoners in the castle of Lisbon, who by his tongue, and other femblances and marks, discover'd who he was; and immediately called a fervant, which gave a fuspicion to feignior Fernandez, that it was to give warning to the officers to apprehend him; but to prevent what his heart mifgave him, he fuddenly ran into the church there by, and took fanctuary for his defence.

This accident being fo ftrange, and falling upon a man the whole kingdom had an eye upon, because of his former escape, the prince cardinal was immediately with speed advertised of it at *Lisban*, being above one hundred and twenty miles from thence. It was my fortune before this happen'd, to be released out of my imprisonment, which I account a happiness, that thereby I was brought into no danger.

brought into no danger.

fanctuary, with all fpeed caufed him to be taken out of the church, and brought to his old accustomed lodging in the cattle of Lisben, where not long after the law proceeded against him, and he received the doom of death due to such an offence; but not without grief and forrow to many of the beholders, as well Spaniards as Portugues; for indeed he was a man of much goodness and great charity, and to his ability obliged many a soldier in the garrison.

The day appointed for his execution being come, and having received all the rights and ceremonies of a Christian, he was brought out of prison, with a winding-sheet lapped bandelier-fashion about him; and many foldiers and others to behold him, to give him their last adieu; and for a farewell for himfelf, he took occasion to fpeak to the foldiers there prefent, in this manner; he told them, How much he had loved them; and that to some of them he had given testimony of it, in his better fortunes, which he knew they would thankfully acknowledge; and in lieu of all his former courtefies, and kin-1-effes, he defired them to requite him with one now at parting, as the last request he should ever make; which was, For one of them with speed to repair to the house of the Misericardia, an office of great reputation and truft concerning religion and charity, and his defire was, That they might be informed of the injury done to God, themselves, and the holy church, by taking per force a penitent finner out of fanctuary: a thing fo unjust and unfufferable, that it behoved them to take notice of it.

This little hope gave great content to the foldiers, and happy was he that could make greatest haste to the house of the Mifericordia, to make relation of the strange accident that had happened. The gentlemen of the Misericordia weighing the difhonour and injustice done their house, delay'd no time, but posted on horseback to the place of execution, where they found poor feignior Fernandez ready to recommend his spirit to God, and the hangman as ready to perform his office; but fuch was his fortune, by the speed and courage of the gentlemen, that they redeemed him from present death, and returned him to the place from whence he came; for as they were loth to lose their privileges, so they were as unwilling to offend their king.

The ftrangeness of this accident may put a man in mind of an old English proverb, that Marriage and hanging goes by desliny.

52. In the forty eighth stratagem, I have shewed how necessary it is to get intelligence of an enemy, and how to obtain it, as you shall there find, for that part of Spain and Portugal I spoke of; so likewise you

fhall read in my first book, how to compass intelligence of the fouth part of *Spain*, as namely *St. Lucar* and *Gadiz*, by example of a precedent of my own: as also in the fame book, I refer you to the way how to procure intelligence at the *Tercera* islands; to which book I refer you for brevity fake.

53. When the queen lived, the was inclined to harken to a project of mine, for the taking and inhabiting the cattle De la Mina in Guinea, many years possessed by the Portuguese; and for defence whereof they rely'd most upon the number of negroes, in whose country Mina is seated; and to indear the negroes the more to them, and to exasperate them against the enemies, they make them believe, That what war foever they have with others, is in their defence against those who seek to slay them, and to possess their country. But to meet with this project, I devised to carry a number of negroes out of England, that could fpeak their language, and were able to report the difference betwixt the Portuguese usage of them and ours; for in Portugal they fell their negroes in open market for flaves, as we do horfes, which they know we do not; by which means we shall be able to disappoint their designs.

54. The marquis of Santa Cruz, when he took the Tercera islands, made offer of landing at the city of Angra, and finding the island had drawn all their forces together to withstand him in that place, he instantly winded nis galleysabout, and rowed five leagues to the eastward of it, and landed where he found no resistance. The same did my lord of Essex at the island of St. Michael, who pointed to land at Porto de Gallo, but left that resolution, and went with his boats to Villa Franca, which he took easily, all their forces being drawn to

Porto de Gallo.

55. Naming Villa Franca, I will fay fomething that happened to me eighteen years before this I have fpoken of, rather to make you laugh, than for ferioufness fake, and yet I place it amongst the stratagems; and thus it was: You must know that notwithstanding the wars with England and Spain, some of those islands connived at the grade betwixt them and the English fhips, which went under the name and colour of Scots: it chanced that one evening I came into the road of Villa Franca, but without the command of the castle, attending the darkness of the night to go aboard an English ship there riding, to avoid fuspicion of being ieen from the shore: upon my boarding of the far:e ship, I was carried by the mafter to banquet in his cabin; his company that were on board efpied a boat rowing from the shore, and brought us news of it, being in the cabin,

Book V. which I to put in

which put the mafter to a deadly fear's for my being discover'd would have proved his undoing. I comforted him, and willed him to follow my directions, and he should escape any such danger. I defired him to go out of the cabin, and leave me there, and to fay what I should bid him. The boat came to the ship-side, and told the mafter, That the strange ship that rid not far from him was an English rover, and willed him to be careful; for that night 'twas thought he would furprize her: I willed the mafter to tell them, That he fulpected as much, and flood upon his guard, but feared that the ship had descry'd their boat coming off from the thore, and it was likely they would intercept their boat in their return to land, and advited them, as they loved their liberty, to haften away. This put the Portugueje in fuch a fear, that fuddenly, without speaking one word more, they put off their boat without entering into the ship; which made us laugh heartily, and was a good addition to our supper.

56. In the year 1600, there was a complaint made by the inhabitants of the cinque ports, that the French incroached upon their fishing at sea, a rocky ground five leagues fouth from Rye; which place ferves all Lonaon with choice fish: whereupon I was fent down to redrefs this diforder, and made use of the stratagem following; because, if I had difcovered my felf with my fhip, the French would have fled: therefore I mann'd the English fisherboats with my own company, and gave them order, as I should pass by with my own ship, and shoot a piece of ordnance, to board the French and possess them; which they did, and by means thereof the cinque-ports injoy'd their

ancient privilege. 57. The stratagem of taking the pirates in Ireland, Anno 1614, is amply fet down in my fecond book, to which I refer you, withing you to perute it; for it will give you pleafure and content in reading it, and a light withal how to use the same stratagem, if there be occasion.

58. A thip, and by contequence he that is imploy'd in her, may be deceived by touching the needle in the manner following: a thip going her course to the port she is bound, may be deceived in touching the north point fouth with a loadstone, which is contrary to the place she is going to, and may, perhaps, carry her upon fome shoals and rocks, that in a right course there is no cause to fear.

59. In the voyage with my lord of Lindfey, in 1635, we tent over a fisherboat to Breft, Baltour bay, and other places upon that coast, to spy and view the state of the French and Holland fleet, which we knew

was thither retired, but with such instructions as the French could not suspect it a an that they might fee we had great confiden a in them, and to receive advertisement from them, we pretended the cause of our implay ing the boat was to look out certain Tur pirates, who we supposed hover'd upon their coast. The boat returned with a true r. lation, as we after found which; gave us good latisfaction.

60. Not long after my being taken by the galleys in Spain, if I had not been by accident prevented, I had scaped the imprisonment I endured for many months in the faid galleys at Cafcais and Lisbon, which was most grievous to me, by this stratagem following. Whilft we rid in the har bour of Lishon, there came aboard the g ley where I was, a mafter of a fhip of Hoiland, who spake good English: this man came from Brafil; for at that time the Portuguese freighted Holland ships in most of their long voyages, though they pre tended to be in war one with another. This Hollander pitying my cafe, wished me privately aboard his ship, promising to conceal and hide me that I should not be found; befides his word, I took his protestation and vow to perform his promife, if I could devise to escape out of the galley. I veri ly believe the man meant truly and honeftly; for he confirmed it by many protestations at other times and days. Whereupon I was not idle to devife an escape, and writ a letter with my own hand, directed to the rest of my company, then prisoners with me, declaring that my captivity was fo hard, that I could no longer endure it, but chose rather to end my life by drowning my felf, and wished them to fignify so much to my friends in England: and one night, when all things were whift and filent in the galley, I intended fecretly to escape, by stealing secretly into the ladder of the galley at the tide of ebb, and to convey my felf into the water without noife, or moving either hand or foot, till I was brought clear off the galley's view, and then to fwim on board the Holland ship, who lay just in the wake of the galley, and in view of me: this I might eafily have done without suspicion, or notice taken of me; but unluckily it fell out, that the day before I meant to put this stratagem in execution, the galleys were commanded upon fome fervice to fea; fo that before our return to Lisbon the Holland ship was gone a new voyage, and I frustrated of my hopes.

As commonly one discourse begets another, fo this accident puts me in mind of fome others that befel me, or that I was witness to, in the time of my imprisonment,

to put in writing, that there may remain a remembrance of them after my death: and what I infert is neither as project or fratagem, Lut only a plain narration of what I have heard and feen.

Riding in the port of Lisbon, (for there is no other place for the galleys to refide upon all that coast,) there was aircover'd to the general a practice by an Italian to draw the Forguilo', or galley-flaves, to take arms and rife against the foldiers, and possess themselves of the galley and men where he was, in order to recover their liberties, and dif-pole of the galley as they pleafed. This treaton being examined, the *Italian* confest'd it; and for his reward his two arms were made fast to the stern of two galleys, and his two legs to two others, and he quarter'd by the rowing of the galleys. If this Italian had had the wit of an Italian, he would not thus have play'd the fool; for he might well know where fo many men were to be trufted, as are in a galley, it could not choose but be reveal'd. The flaves confifting of fo many nations, and the trefpasses being so different, some condemn'd for life, others for years more or lefs, and any one revealing it, was able to purchase his own liberty and reward. Or suppose they had prevail'd in their defign, the reft of the galleys had been able to have mafter'd them 3 or if not, they had been dethitute of victuals to fuftain them, not having formuch as water; for every fecond day they used to fetch their water from the thore: or though all those I have spoken of had been no impediment to them, yet there had been no place to have fled to but some port of France, no nearer than feven or eight hundred miles.

The next accident I take notice of, was in the fame port of Lisbon, and in the fame galleys that happen'd to the captain of the vice-admiral, a churlish and ill-natured man, as my felf had fome occasion to fay; for after my being taken prisoner, I found him difcourteous and uncivil towards me; for without leave, knowledge, or warning to my page that ferv'd me, nor permission to see me, he fent him to the farthest part of all Spain, intending he should never return more into his country; though after he tailed of his purpose, by means of an Englishman that lived thereabouts, whither he was fent, and understanding this accident of his coming thither, and that he had been my fervant, whose name and friends he well knew, though he was unacquainted with me; yet at my request by letter, when I heard of the condition of the man, most courteoully he procur'd means, and obtain'd liberty and licence for my fervant to return to me, and of his own accord furnished him Vol. III.

which I have been defired by my friends with money fufficient for his journey, who arrived fafely, and continued to do me fervice during the time of my imprisonment; whom after I preferr'd to be a captain in the fervice against the Spaniards.

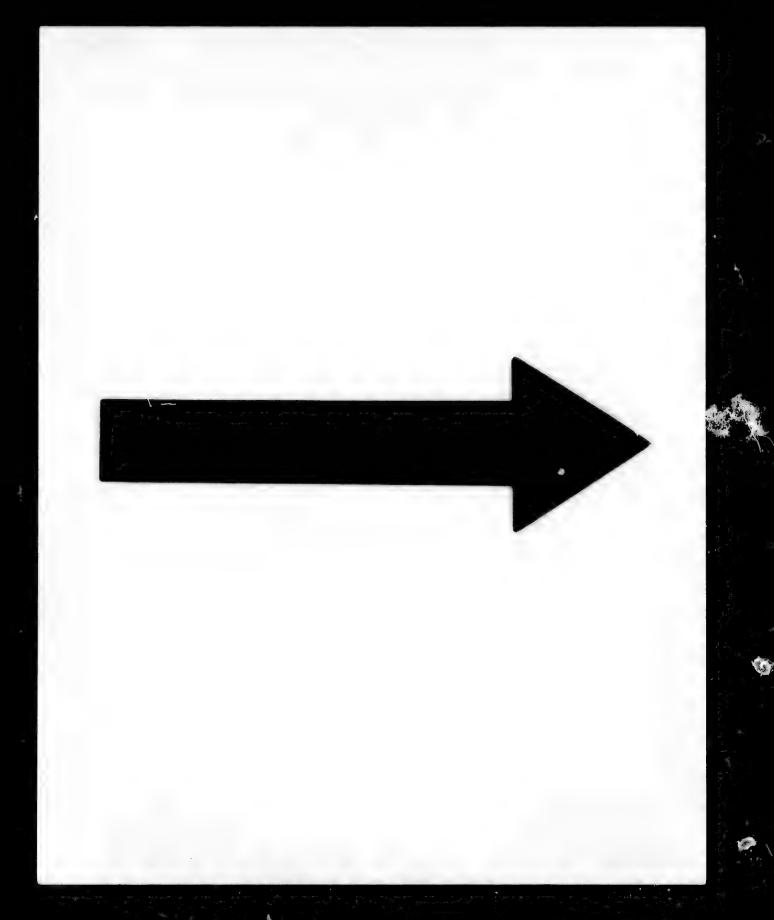

This ill-condition'd Spanish captain after

tafted a just reward for his ill disposition a for as it is the use of captains of galleys to make choice of some Moor or Turk to attend them in their cabins, as people more neat and officious than christians, and more ob-fequious and defirous to pleafe than their own natural countrymen: out of those suppoted reafons the captain made choice of one of them, a Turk in religion, and most confonant to his humour, as he conceived. It happen'd, that as this Moor exceeded in diligence, fo it increased his credit and trust with his captain; who fending him one day ashore to wash his linnen, (for some of the Moors exceed women in that employ,) he carried with him one hundred crowns of his captain's, which he had in charge among other moneys and plate; this Moor was inticed by company to play, where he made a short end of his hundred crowns.

After some time his theft was discover'd to his captain; who was fo inraged, having no means to recover his lofs, that he returned him to his oar and painful bank in the galley, where he remained in his former flavery. But this was not revenge fufficient to please the captain, but he ordered him a cruel punishment usually inflicted upon offenders, laying them flat over the Cruzea, where he was unmercifully beaten with a bull's pizzle till he was made unable either to stand or fit, or to do the king's work; nor was the captain willing he should do him service till time had overcome his passion; but then finding a great want of his attendance, he once more delivered him out of his chains, and accepted of his fervice as he was wont, and so he passed some time as he was formerly wont to do.

But the Moor carried a canker'd revengeful heart against his captain, which he craftily diffembled, not giving any kind of fufpicion till he had found a way and opportunity to compass it; which was in this manner:

At his usual hour in the morning he repaired to get up his captain, but provided all things for his purpose; as first, a crossbar to keep down the scuttle; and being below, he provided himself with powder, fire, match, and other necessaries, which he placed in the outward room, and fuddenly rush'd into his captain's cabin with a naked dagger in his hand, to whom he gave eight stabs, making account he had flain him; but hearing a noise without, he left the captain, and betook himfelf to a gentleman who cry'd out for help; which

STATE OF THE STATE OF THE STATE OF THE STATE OF THE STATE OF THE STATE OF THE STATE OF THE STATE OF THE STATE OF THE STATE OF THE STATE OF THE STATE OF THE STATE OF THE STATE OF THE STATE OF THE STATE OF THE STATE OF THE STATE OF THE STATE OF THE STATE OF THE STATE OF THE STATE OF THE STATE OF THE STATE OF THE STATE OF THE STATE OF THE STATE OF THE STATE OF THE STATE OF THE STATE OF THE STATE OF THE STATE OF THE STATE OF THE STATE OF THE STATE OF THE STATE OF THE STATE OF THE STATE OF THE STATE OF THE STATE OF THE STATE OF THE STATE OF THE STATE OF THE STATE OF THE STATE OF THE STATE OF THE STATE OF THE STATE OF THE STATE OF THE STATE OF THE STATE OF THE STATE OF THE STATE OF THE STATE OF THE STATE OF THE STATE OF THE STATE OF THE STATE OF THE STATE OF THE STATE OF THE STATE OF THE STATE OF THE STATE OF THE STATE OF THE STATE OF THE STATE OF THE STATE OF THE STATE OF THE STATE OF THE STATE OF THE STATE OF THE STATE OF THE STATE OF THE STATE OF THE STATE OF THE STATE OF THE STATE OF THE STATE OF THE STATE OF THE STATE OF THE STATE OF THE STATE OF THE STATE OF THE STATE OF THE STATE OF THE STATE OF THE STATE OF THE STATE OF THE STATE OF THE STATE OF THE STATE OF THE STATE OF THE STATE OF THE STATE OF THE STATE OF THE STATE OF THE STATE OF THE STATE OF THE STATE OF THE STATE OF THE STATE OF THE STATE OF THE STATE OF THE STATE OF THE STATE OF THE STATE OF THE STATE OF THE STATE OF THE STATE OF THE STATE OF THE STATE OF THE STATE OF THE STATE OF THE STATE OF THE STATE OF THE STATE OF THE STATE OF THE STATE OF THE STATE OF THE STATE OF THE STATE OF THE STATE OF THE STATE OF THE STATE OF THE STATE OF THE STATE OF THE STATE OF THE STATE OF THE STATE OF THE STATE OF THE STATE OF THE STATE OF THE STATE OF THE STATE OF THE STATE OF THE STATE OF THE STATE OF THE STATE OF THE STATE OF THE STATE OF THE STATE OF THE STATE OF THE STATE OF THE STATE OF THE STATE OF THE STATE OF THE STATE OF THE STATE OF THE STATE OF THE STATE OF THE STATE OF THE STATE OF THE STATE OF THE STATE OF THE STATE OF THE STATE OF THE STATE OF THE STATE

being done, he put the match to the train he had prepared, and fet the galley on fire, which he leaped into and burnt himself to aines; but by the help of the other galleys that rid near her, they fuddenly boarded her, faved all her flaves, and the captain, who was not quite dead; but what elle was in her was all confumed. A rare example of revenge in a heathen to a christian! and though the captain and he differed in religion, yet not much in condition and perverse natures.

This captain was after question'd as the author of the destruction of the king's galley, by the ill usage of this flave; and had it not been for the general's fake, Don Francisco de Coloma, brother to Don Carlo Coloma, who was after ambaffador into England in king James and king Charles's time,

he had deeply fmarted for it.

Misfortunes thus left not the captain, but flill attended him, as a thing fatal to his ill nature; for after the recovery of his hurts, and restitution of his command, he was once more rifled and robbed by another Moor he entertained in the place of his other fervant: This Moor was enticed by two Spanish foldiers to commit the theft; and after it was done, he and the foldiers pass'd over the river without interruption, and kept company together till they arrived upon a spacious great hill, where the soldiers, finding a good opportunity for their purpose, slew the Moor, possessed the money, and escaped themselves; so that they were never heard more of whilft I was in

I will leave speaking of the galleys whilst I was in them: And now I was removed to the castle of Lisbon, where I remained prifoner a good space; but I will end with the hap of two of the said galleys, which my eyes beheld, and my felf was made an

actor of revenge upon them.
In my first book, and in the year 1591. you will find how I became prisoner to the Spaniards, and what passed in the fight betwixt fix galleys and the ship I was taken in: It happened that about eleven years after, and as you shall likewise find in the fame book, that Sir Richard Lewson and my felf had the furprizing a carrack and two galleys, which we burnt in the road of Zezimbra; which two galleys were of the number aforefaid that took me, and one of them the very fame wherein I was kept prisoner. This act of revenge to some men would have been very pleafing.

In September, which is commonly the month for the galleys to make their retreat into harbour for winter, I and eight of my company were strongly guarded to the caftle of Lisbon, there to lie imprisoned till a course was taken for our redemption out of England, with an allowance of 7 d. 1 per diem for each man for his maintenance, a proportion that did not equal 3 d. per diem according to the rate of things in England. All the time of our imprisonment we were close confined, only in the morning we reforted to the castle walls, with a guard of foldiers, to perform our necessary occa-

It happened on St. Andrew's day following, being upon the walls, at our usual hour, we beheld a great galleon of the king's turning up the river in her fighting fails, being fumptuoufly deck'd with ancients, ftreamers and pendants, with all other ornaments, to flew her bravery. She let fly all her ordnance in a triumphant manner for the taking Sir Richard Greenville'in the Revenge at the island of Flores, she being one of that fleet, and the first voyage

fhe ever made.

I confess it was one of the greatest and forrowfullest fights that ever my eyes beheld, to fee the cause the Spaniards had to boaft, and no remedy in me to revenge it but in my tongue, but hoped for future comfort, and took such Englishmen as were in my company to witness what I should fay to them: I offered to give them one for ten, if I did live, to be at the taking and pofferfing of that triumphant galleon, that carry'd the name of that day, viz. St. Andrew. This passed but as an idle defire I had to fee my word come to effect.

In the year 1596, which was five years after, enfued our Cadiz expedition, under the command of the earl of Effex and the lord admiral, where, amongst fifty-eight ships there destroyed and burnt, the said St. Andrew was, and the and another only, faved from the fire : but this was nothing to my prognofticating wager, for I could assume no more to my felf than any other man of that fleet; but it happened, as I was captain of the Repulse under my lord of Essex, I was appointed in the Repulse's boat and some others to save the galleons that were run ashore, whose names were these, St. Matthew, St. Andrew, St. Philip, and St. Thomas: the St. Matthew and St. Andrew we preserved, though it was with some peril to us: the St. Philip and St. Thomas fet themselves on fire, even as I was ready to enter the St. Philip: and I may boldly fay, what I spake in the caftle of Lisbon was now punctually performed; and for the truth hereof, it is not long fince one of the Englishmen lived, and till his death vouched my words to be true.

These four strange accidents I have inferted in this fifth book, at the entreary of friends that have heard me often relate them;

but what shall follow was upon the importunity of fome of my children, who confidered how young I was when I put my felf into the wars at fea, how long I have fince lived, and been acquainted with the affairs of the world, which amounts to fifty-fix years, and the often dangers and perils I have gone through by the fword, by famine, by danger of the fea, and other cafuaities, as all men are subject to that run such desperate adventures. These reasons prevail'd with me, that I yielded to their request: and though in my first book I have had occasion to speak of most of them, when I treated of the voyages that then happened, and wherein there was occasion to mention them, yet, for brevity fake, I have added them to the latter part of this fifth book, that they may fuddenly be turned to, and found referring to the year and book where you shall find them; and I will make my beginning in the year 1585, when the wars with Spain began, and wherein I was an actor at the taking of the first Spanish

In that voyage of 1585, and in the month of September, I was a youth of fixteen years of age, and fo inclined to fee the world abroad, that without the knowledge of father or mother I put my felf into an action by fea, where there was in company of us two fmall ships, fitted for men of war, that authorized us by commission to seize upon the subjects of the king of Spain. We departed from the Isle of Wight, to which place we returned with our dear-bought prize: she was a Biscainer of three hundred tons, well mann'd, fufficiently furnished, and bravely defended; the came from Grand Bay in Newfoundland, which at our first arrival upon the coast of Spain we met with, and refuling to yield to us, we fuddenly boarded, and by confent of all our men entered her; but the waves of the fea growing high, we were forced to ungrapple, and to leave our men fighting on board her from eight of the clock in the evening till eight in the morning. The manner how, and all other circumstances, you will find in

my fecond book. My next escape was in the year 1587. and the first voyage I went captain to sea; where, abiding longer than I expected, I was put to great extremity of victuals, and coming from the Canary island towards England, I fell in with Ireland, and put into Dingle bay, where the same morning I was taken with a most dangerous and tempestuous storm, being upon a lee-shore, and the weather as dark and foggy as though it were night. The master found himself so nigh the land, that within an hour we could not escape shipwreck upon the devouring clifts, if God did not fend us the fight of a

little rock called the Crow, half a mile from the entrance of the port of Dingle: every man was as careful to look for this rock as for life, for our fafety confifted in the fight of it; and by great fortune it was fpy'd by a Brazilian Indian that ferv'd me; which rock was a perfect director to our mafter. and in half an hour he harbour'd us in the port of Dingle. This put me in remembrance of what I had formerly read, that there was nothing more pleafant to a man than to fee himfelf at the point of death by shipwreck at fea, and fuddenly to escape the danger by arriving in a fafe harbour.

Here I received two lives from God, the one was the escape of shipwreck, as you have heard; the other of famine; for when we were fafely arrived, we took view of our bread, for other victuals we had none, and we had divided to every man his proportion of bread a fortnight before, and found but fix bisket cakes amongst our whole fifty

men and more.

Reckoning according to years, which course I mean to follow, my next shall be in 1589, when I served as vice-admiral to the earl of Cumberland to the iflands Azores; and coming to Flores, the most westermost island of the seven, my lord had notice of certain Spanish ships riding in the road of Fayal, ready to take the first wind for Spain, to the fouthward of which island my lord had passed eight days before. Upon this news my lord hastened thither, both to be refolved of the truth thereof, as also to make an attempt upon those ships, if he should see a possibility to prevail: but arriving two days after towards the evening, a calm took him, and he was not able to reach within two leagues of the road where the ships lay; whereupon there was a council called, as in all cases of difficulty there is, wherein my felf and captain Lifter very earneftly proposed, and by entreaty prevailed, that we might have leave in that calm to row to the road to take a view of the ships, that against morning we might fee where to take advantage by furprizing

As we drew near the Spaniards the dashing of our oars was heard, which gave the alarm to the admiral, who only wore the flag, and inftantly let fly her ordnance, without any certain aim, more than the dashing of the oars directed. Captain Lister and I feeing our felves miffed by the shot, were fo much encouraged, that, rather like mad than discreet men, we ran aboard the admiral with an intent fuddenly to surprize her; but finding fo great an inequality in our forces, (for the ship carry'd fixteen pieces of ordnance, was well mann'd and provided,) we were glad to put off our boat and retire,

repenting of our bargain.

As we were rowing towards our fleet again, which all this while beheld the fight, and heard the report of the ships ordnance, we met another boat of greater burthen fent to fuccour us; and after joyful falutation, we refolved and concluded with both our loats to return again, and give a fecond affault upon the admiral, telling them the state and condition of the ship, which did fo encourage both the one and the other, that by consent it was agreed they should board her in the quarter, and we in the haufe, and we to cut her cable, and let her drive off to fea. All this was fuccefsfully acted, and the ship miraculously enjoy'd, notwithstanding the continual shot from the caftle, to which the fhip was moored; and which castle a month after we took, and afforded us forty five pieces of ordnance, mounted and difinounted. I must not forget, that as we entered the admiral on the one fide, the Spaniards leap'd over-board on the other, except the captain, John de Palma, and one more.

Now having got an unexpected victory, rather by valour than reason, we towed out the ship with our two boats, the castle not fparing to fire at us, till we brought her without reach of the shot, and then we agreed to take out all our men, except one at helm to govern her, and ftruck down her fails; and we ourselves returned in our boats once more into the road, where we poffeffed ourselves of the other seven ships left behind, three of which were of reasonable good value. For the other particulars of this voyage I refer to my first book, where you shall find this relation following;

Coming into the island of St. Mary's, we found an unwelcome entertainment, though indeed we meant the people no farther hurt than to be supplied with water from the island; but it feems they were better prepared to forbid us than we expected; for at our offering to land with two hundred and odd men, two parts of them were fuddenly hurt and flain; in which encounter my fword, which I placed naked, and the point upward, was thot afunder, and the bullet pass'd through the belly of my doub-let, which, if it had not been for my sword, had done the like through my belly

My lord being thus frustrated of all hope of water and other refreshment, was to feek the help of another island to give him relief; for now drink began to be scarce, and it was likely it would put us to desperate want; and standing from hence to the island of St. George, by labour and pains, and by the help of my fwimming, my ship drawing little water to come near the shore, I procured fo much water as kept us after from perifhing.

St. George, we might fee a goodly fpour, iffuing out of the great clift, which gas my lord a great comfort to be fupply'd with drink by that fpout. Now began our people to be in defpair of any help of drink. cither by fea or island, and by one confent, in a tumultuous manner, cry'd out to return to England, which much troubled my lord, who hoped for a better fortunate voyage before his return; and finding no man fo heartily true to him as myfelf, he bewail'd himself and his case to me, how much it imported him to try what water that fpout would yield him, conjuring me, by the love I bore him, that I would put myfelf into a fmall boat that rowed with three oars, one man to fteer, and myfelf to fit, and to venture afhore, to fhew the poffibility that foot would yield him for water, promifing that he and his ship should stand within a mile of the land, to take me up at my return. I performed it as honeftly as he reposed trust in me, though by an accident it had almost cost me my life.

In my way, rowing towards the fhore, a great whale was fpy'd from my lord's thip, lying with her back upon the water afleep, as is the nature of whales before ftorms. This whale was supposed to be a rock, and dangerous for the ship to bear further into land; and thereupon tacked about to fea leaving me to the mercy of the waves. I had no fooner fet my foot ashore, but it began to be dark with night and fog, to blow, rain, thunder, and lighten, in the cruellest manner that I have seen. There was no way for me to escape death, but to put myielf to the mercy of the fea; neither could I have any great hope of help or life; for the ship was out of fight, and only appeared a light upon the shrowds to direct me. This fudden alteration of weather, gave me loft in the opinion of my lord and all his company.

All this while the ship lay upon the lee; and feeing it was in vain to expect my return, the mafter called with the whiftle to fill the fails; but the mafter-gunner being a countryman of mine, and one that loved me well, (an approved man of skill and art, by the place he held as mafter-gunner in the pope's admiral galley in the victorious battle of Lepanto, in which battle he was fore wounded,) he humbly befought my lord to forbear filling the fails one hour longer, which roy lord willingly granted; and in that interim of time, one of the company in the ship spy'd a flash of fire, and heard the report of a musket; for all our powder was fpent to that very laft fhot, by means whereof we were preferved, rather by miracle than any human art. And to make it the more strange, we were no Paffing by the other fide of the island of fooner rifen from our feats, and ropes in

And to ge, we were no its, and ropes in

our hands to enter the ship, but the boat immediately funk. And though I have passed many dangers, as will appear by this treatif; yet I account this the greatest of all, and none of the rest to be parallel'd with it.

What miseries we endured in the latter end of the voyage, you shall find in the first book, where I have occasion to speak of our return, and the extremity we endured, which was more terrible than befel any fhip in the eighteen years war; for laving afide the continual expectation of death by shipwreck, and the daily mortality of our men, I will fpeak of our famine, that exceeded all men and ships I have known in the course of my life : for fixteen days together we never trafted drop of drink, either beer, wine, or water; and though we had plenty of beef and pork of a year's falting, yet did we forbear eating it, for making us the drier. Many drunk falt water, and those that did died suddenly, and the last word they usually spake was drink, drink, drink: and I dare boldly fay, that of five hundred men that were in that ship seven years before, at this day there is not a man alive but myfelf, and one

The first port we arrived at was the Vintry in Ireland, five miles by land from Dingle church, that gave me fuccour in my former voyage, as I have faid: here we made shift to furnish my lord with a horse, and myfelf and some other gentlemen followed a-foot. At our coming to the town, we found my lord in the house of the sovereign, which is the title of mayor, telling his strange adventures, and his dangerous escape of far ishing with want of drink. The sovereign told his lordship, That about two years before, a gentleman came into their port, in as great a want of meat, as his lordship was of drink; and even as he was repeating my name I entered the door, who my lord took by the hand in their presence, and said, Lupus est in fabula. They beheld me with admiration, and told my lord, that it was my fortune that brought him thither; and held themfelves happy that it was in their power to give him relief, as they had done the like to me before.

In the year 1590. my former fickness, you have heard, I took in Ireland, kept me from imployment, or thought of the sea; but now finding my body as willing as my mind to follow my begun courses, this year of 1591. I attended my lord of Cumberland once more, and had the command of the Garland under him, wherein he went admiral. I can say little of any consequence of this voyage that concerned myself, but my imprisonment by six Spanish galleys, Vol. III.

near the island of *Burlings*, which I have had cause to remember, by some accidents you shall read in my succeding voyage.

My constancy has been such, though to my coft, where I have made profession of love, that no fmall unkindness could fuddenly divert me, when my affection has been grounded upon true friendship, as may appear by my faithfulness to the lord I now speak of, for whom I have often ventured my life, with little fruit of his favour. And I must confess it was some blemish to my judgment; for notwithstanding many admonitions, I was incredulous, still relying upon him, and followed him in this voyage of 1593. in the place I had formerly held, captain of the Golden Lyon, a fhip of the queen's, wherein he ferved as admiral. What I shall fay here relates to fome principal accidents that concern myfelf in this voyage; and for the rest, I refer you to my first book, where I have fhewed, that my lord being fevered from his fleet about the Burlings, met with twelve hulks of the east country, that after fome fight, yielded, and delivered him a large quantity of powder, which they carried for the king of Spain's fervice; my lord took the one half of those ships, and stood off to sea; the other half he left with me to examine and rummage. wards night my lord caft off those of his company, whom I fpy'd making towards me and their conforts, which feemed strange to me, that was left guarded but by a fmall ship, and his long boat with fifty men. I feared, as after I found true, that those ships had a refolution to board and take me; but to prevent their defign, I leaped into my lord's boat on one fide of the ship, as they boarded her on the other; in which leap I received a hurt in my leg, which to this day, in 1641. I have found a great decay to my whole body.

In the faid book you will find, that from hence my lord flood to the island of Cuervo, where he was taken with a most melancholly fickness, and in despair of health or life, unless he might be relieved with the milk of a cow; and I feeing in what condition he was, and valuing his life as much as my own, I ventured my person to get him a cow from the hands of the enemy, either by fair or foul mean; and put myself into the hands of the Portuguese of the island of Cuervo; first shewing a flag of truce, I told them the cause of my coming to them, was out of love; and that we had a great fleet at fea thereabouts: and left any of them should do them injury, I brought them a protection from our general, the earl of Cumberland, to defend them, if any violence should be offered them; and fo infinuated to them, as they afforded

6 B

courtcous entertainment; and because night 'rew on, they defired me to stay all night: I willingly imbraced their offer, and by my liberal carriage, obtained what I required; and the day following carry'd a cow and other refreshments aboard, which gave plenty of milk till my lord's arrival in England. This cow, in all likelihood, was the saving of my lord's life for the prefent; which he acknowledged.

In the enfuing year 1505. I was married; but before my marriage, I engaged myfelf by promife to attend my lord of Cumberland, as his vice-admiral, to fea. Himfelf went in the Malice Scourge, a brave hip, built by himfelf; his vice-admiral Allfider,

a goodly ship of the merchants.

Now I began to have a proof of what before I had just cause to suspect, viz. the inconstant friendship of my lord of Cumberland; for though I was drawn by his sweet words and promises to this voyage, and that we had proceeded upon it so far as Plimonth, and from thence eight or nine leagues to sea, towards the coast of Spain, without imparting, or making shew of any thing to me, he suddenly quitted the voyage, and appointed another captain for his own ship, which did so much discontent me for the present, that I abandoned the company of his ship at sea, and betook myself to my own adventure: This bred an after-quarrel betwirt my lord and me; and it was a long time before we were reconciled.

My voyage produced no danger of famine or fword, as other voyages had done. The worst enemy I found were storms, which were fuch as forced me to cut my main-maft by the board, and compelled me to bear for England. After I had weathered the coast of Spain, the storm held on fo outragious, and of fuch long continuance, that I was driven to Spain before the sea, betwixt the Groyne in Gallicia, and Blavet in Britany, which port the Spaniards at that time possessed. The sea was so grown, and the waves fo mighty, that they raked me fore and aft, for want of a main-maft to keep up the ship; so that I expected for many days together nothing but foundering in the fea; but at last it pleased God to fend me to Plimouth, where I found the people much diffracted, upon the news brought them of the arrival of four Spanish galleys, from Blavet to Penzance in Cornwall, which village they took and facked. These four galleys could not chuse but pass me that night in a calm unseen. Sir Francis Drake was now at Plimouth, ready bound with his fleet to the West Indies, in which voyage he died. Upon the news of these galleys, he instantly put to

fea, and myfelf with him; and arriving at Penzance, we found the Spaniards were gone, and the poor fpoil not worth their labour they found in the town.

The next offensive voyage by us, was to Cadiz, in 1596, under the command of the earl of Effex, and my lord admiral, where-of I had formerly occasion to say something, when I made mention of burning of fifty eight sail of ships, and the taking the St. Andrew. The principal and dangerousest thing that happened to me in that voyage, was the accident follow-

My lord of Effer having made way through the town, at length came to the fpacious market-place, where he found the greatest and sharpest resistance from the houses thereabouts, that forely flanked him, which way foever he paffed or looked, and one house more than the rest seemed most dangerous; whereupon I defired my lord to spare me fifty old foldiers of the Low Countries, to give an affault upon that house. which his lordship granted, and I performed, and took it. In that conflict I was fhot with a musket-bullet through my fearf, and breeches; and the handle and pummel of my fword shot from my side, without any further hurt. As I stooped for my handle, and pummel of my fword, Sir John Winkfield was next to me a horfeback, who had received a hurt in his thigh a little before; and as he was asking me how I did, (for it feems he feared I was forely wounded by my flooping,) he was fhot with a bullet in the head, and fuddenly fell down dead; and these were the last words that ever he spoke. What more concerns this voyage in general, you will find in the first book : but by the way, this I note, that as the fword is the death of many a man, so it hath been twice the preferver of my life, the one at the island of St. Mary's, in 1589, the other now at Gadiz, in 1596.

The island expedition succeeded this to Cadiz, in 1597, equal with it both in greatness, goodness, and the person of the man that commanded it. In this expedition I was captain of the Rainbow of the queen's, which ship had a special cause to be remembered, by meeting the Indies seet in the manner following.

My lord of Effex had intelligence from the island of Graciofa, where he had some men ashore, of certain ships descry'd off to sea. The night drawing on, his lord-ship divided his sleet into three squadrons, and myself being the next ship to him, he commanded me to stand away south that night; and if I shy'd any ships, to make signs, with shooting my ordnance, and making false sires, promising to send

twelve ships after me. I instantly departed as I was directed, not doubting but the twelve ships would follow me. It blew little wind, and within lefs than four hours, about twelve a-clock in the night, I fell in company of a fleet confifting of twenty five fail; whereupon I put my felf into my boat, the calm continuing, refolving, though it were with my apparent peril, to discover what ships they were, before I would presume to make figns, as I was directed: approaching near the ficet, I hailed them in Spanish, who answered me in the same language; and by their course, I knew them to be the Indies fleet; and having as much as I defired for the prefent, I returned on board the Rainbow, and afterwards performed to much as I was commanded, in fhooting of my ordnance, and making false fires: I accompanied the fleet that night, and the next day, till I brought them into the road of Angra, in the island of Tercera; and what after befel me and them, I refer to my first book : all the hurt that happened to me in this defperate attempt of mine, besides the hazard of fhot from the cattles and fleet, my ship being that through fifteen times, was foul words and railing language, with fome that from the Spaniards when I first hailed them in my boat.

In our return this voyage, I was in more peril, hazard, and danger, than any other thip of our fleet; for the Rainbow is known to be the most rowling and labourfome ship in England, especially in the condition I was in, having spent my foremast in a mighty storm, and mountainous seas, where

we hourly expected death.

My next voyage, of all others, was most fortunate to me, wherein the carrack was taken, and the best service performed by so few ships, that happened in all the queen's time; and yet it gives the least occasion to speak of, of many others wherein I was an actor, fave only that I must assume to my felf to be the chief perfuader of the attempt upon her. The resolution taken by consent of council, how to affail her, was in this manner, That Sir Richard Lewfon and I should anchor in the road of Zezimbra, near the carrack and their other forces, the rest of our fhips to ply up and down, and not to anchor: Sir Richard, according to his directions, made his first entrance into the road; but by the negligence of his mafter, much to his diflike, he failed in anchoring, and the current taking him on the bow, carried him out of the road; fo that it was the next day before he could recover in again: my felf having the rear, followed my admiral according to former order, till I had brought one broad-fide against the galleys, and my other against the carrack and castle, which done I let fall my anchor; and for

what followed upon it, I refer you to my first book.

This voyage ending, the next was the laft undertaken by the queen; for not long after fhe died: and this was the laft voyage againt Spain; for by her death the war ceafed, and as I was a foldier and a youth at the beginning thereof, fo I was general of this laft fleet; and for the particulars of this voyage, more than thefe few following, I will refer you to the first book aforefaid.

I departed England the last of August, 1601, and arrived at the rock the 26th of September, where a light was efpy'd by my ship in the night, which after we found to be a fleet of twenty four galleons, which I had intelligence of the day before by the carvel I fent into the shore to discover. I drew fo nigh those ships, that I could not escape them if they had taken me to be an enemy; and finding my felf thus intangled, I commanded a Spaniard, who ferved me, and held a dagger at his heart, upon his life to fpeak as I directed him, which was as follows; To call to them with a loud voice, that there was a ftrange fhip fallen amongst their fleet, and that he knew not what the was; I conceived, that having warning from me of it, of all others she could not suspect I was she; and in the mean time, in a secret manner, I tacked about, and quitted my felf of them, without further fuspicion; but the Adventure (for only she and the Wbelp was left with me) could not carry her felf fo diffemblingly, but the was in danger of being taken, and escaped with the loss of some men.

The next morning they chased the Adventure and Whelp, for I was gotten a little way to head of them; three of the best failing thips of the Spaniards drew near the Whelp; and perceiving, that unless I acted fome desperate thing she would be taken, I struck my top-fail, though it was much against the will of my master and company, crying out, that I would lofe my felf and thip; I stood with the Whelp and Adventure, and caused them to stand their course to fea, whilft I staid for the three Spanish fhips, with whom I would make trial of their force, and hoped to make them have little lift to purfue them. The Spanish admiral was aftern with his whole fleet, who perceiving my working, and the little respect I had to his three ships aforesaid, tacked in with the shore, and shot off a warning-piece for his fleet, and the three thins to follow him.

Being thus luckily acquitted from the Spanish fleet, wherein Don Diego de Borachero was general, I returned to the fouth cape, with the Whelp only; for I had lost company of the Adventure two nights before: and arriving there the one and twentieth of

I nee

For

October, I gave chafe to a galleon of the fleet of Ciriago, who recovered under the caftle of cape Sagre, before I could fetch her up ; b. : though I knew the force of the caftle, by findry fhot I had formerly received from it, and was acquainted with the excellency of the gunner, who was an Engliskman of my acquaintance, in the fight of their general Ciriago and his foundron, I attempted, and had taken her, had it not been for the cowardlines of the helmiman, that fheard off as I was ready to board her; the fight was not long but dangerous, with the lofs of twelve men on my fide, and in no lefs danger of finking; who was fo beaten from the caftle, that it was a spectacle to behold my thip, for the might be crept through from fide to fide. For all other circumftances I refer to my first book. And fo I take my leave of the queen's reign.

This voyage ended, and I returned for England: at Christr as after, there was a confultation by the tords of her majesty's council, to prepare two fleets, the one for the fpring, the other to fecond the first in Tune following; Sir Richard Lewfon to command the former, and my felf the latter, in fome action against Spain; but though this was a pretence ? isfy the world, yet the lords had an a ent in queen er of her it; for at that time they ke being fick, there was much ser of her death, because of her years, which made them the more willing to haften this fleet to fea, to have it in a readiness to defend the kingdom, if the queen's death should hap-

And though Sir Richard Lewfon, nominated general of this fleet, was not beloved by the lords, fearing his ambition; yet they continued him in his place and command: and whereas I was appointed to fecond him in a latter fleet, yet the lords by importunity perfuaded me to accompany him as vice-admiral in this voyage, they having a greater trust and confidence in me than in him; and therefore I was ordered to command the Merebonour, a better ship than that Sir Richard ferved in.

All this was done out of policy; and few of the lords, but fuch as were intimate friends to the king knew of it; for their intention was, if the queen died, and king James had found any opposition, that my lord Thomas Howard, afterwards earl of Suffolk, should take charge of this fleet, and come aboard me, and I to go into Sir Richard's fhip, and Sir Richard's authority to ceafe. But, God be thanked, there was no cause for this wife forecast of the lords; for his majesty repaired peaceably to London, and we returned fasely to Chatham, after we had feen the king's entertainment by his well-affected fubjects.

Two years after, and in the year 1604. was nominated admiral of the Narrow Seas, without fuit or feeking of mine; and the first service I was appointed to, was the transportation of the constable of Castille, who was to repair hither, to conclude a peace betwixt the two crowns, that had been eighteen years at variance. What happened in that imployment, as also in the twelve years after, that I ferved as admiral, I refer you to my fecond book throughout: only I must say, that as in former imployments, I went not without danger of life by enemies, by the peril of fea, and famine, as I have formerly repeated: in this imployment I was to fear neither for nor famine, the king having a general peace with all princes and nations, and my imployment being not so far from home, but that in few days I might be supplied with victuals; though I account another danger greater than the reft, which confifted in accidents of the fea, and extremity of florms and foul weather, in the fouth and flraitest part of England, where commonly I was to lie at anchor; and upon any occafion being put from my anchors, the narrowness of the seas betwixt land and land, would put me into imminent danger of shipwreck and life: the shoals and fands were no lefs dangerous, confidering, that very often we were to be attended with fogs and mifts; befides, that we were fometimes put to double a lee-shore, which, if we failed of, we prefently perished.

But Cod fo provided for me, that I efcaped all these hazards; and at last found malice had a greater power and force against me, than by fea I found, or otherwise I deferved: for when I thought to have left my painful labours at fea, and to have enjoy'd tranquility of peace on land, envy, unluckily and unlooked for, feized upon my innocency: for being thought a bosom friend to a nobleman I much honoured, who at that time began to be aimed at, and was afterwards born down by a court-faction, though I was one of the meanest in number, and unworthy to have knowledge taken of me, as a man of no eminency; yet confidering how my estate then stood by my engagements, and otherwise, I found fortune more aversed to me than most of the others had felt by malicious practices.

TO THE

KING's Most Excellent Majesty.

HE dedication of books is antient, usual, and useful; though in these later times they are turned into apologies, expressing the unworthiness of the author, and the insufficiency of the matter, modelty carrying with it so shame countenance against the law of history; for Cicero saith, That eloquence is not so much to be respected in writing, as not to publish salloweds, and dissemble truths.

For me to follow the rules of apology, will betoken a great weakness and imbecillity,

For me to follow the rules of apology, will betoken a great weakness and imbecillity, and look as if I had obtained victory over an art I am ignorant in; for eloquence belongs to scholars, who by their witty pleading, will drive every circumstance to a consequence.

Silence were better in my cafe than fpeech, were it not I am to fpeak of things I know, of things needful and necessary, both for your facred majesty, and your whole commonwealth.

I need not reiterate what the enfuing narration reports; I only and humbly crave leave of your majefty, that my defects may not blemish the worthiness of the work now in hand, no more than a homely painter that takes upon him to draw a fair face: the benefit of my labour will be to your majefty an immortal honour and glory; to your kingdoms an everlatting praise and profit; and to your faithful subjects an effential proof of happiness.

All in one must applaud your facred majesty for atchieving this work, which never any of your famous progenitors had in agitation; so that we may truly judge, That from the beginning (by God's providence) it was referved for king CHARLES to make your name, your fame, your fortune, and all other blessings, equal with your progenitors Charles's, and especially Charlemain, from whom your majesty is lineally descended: and as that Charles worthily deserved the title of Great, so I doubt not but the same God will pour the same greatness and happiness upon your majesty, that our hemisphere may enjoy as great a renown by you, as other lands have done by those from whom you are descended.

If your majefty would have been sway'd by prevended policy of state, by sollicitation, by affection, or other enticements, and left the common utility of your subjects, this work had lain still like a child in his swaddling-clouts, without care of nursing it; but your majefty's virtue appears herein, and we, your loyal subjects, cannot honour you enough for it. And it we should speak all the truth of your facred majesty, it were to fay far more than we do of your most excellent virtue and goodness: but for want of parts otherwise to express me, my office shall be, to pray for your majesty's long life, for your victorious atchievements, the confusion of your enemies, and that all men's hearts may be as sensible of your majesty's good, as the meanest of your subjects,

W. M.

All GENTLEMEN, and others, that have read my former Discourse concerning the SEA.

Have annexed this relation of fifting to my former treatifes of the SEA, which you have done me the honour to perufe: I confess it had been more proper to have inferted it at the beginning of these books, than at the latter and, for these reasons: the dedication would have required it, as being humbly presented to his majesty's protection; the subject would have challenged it, as a ground and foundation of the increase of ships, navigation, and traffick; England would have stood upon it in right, as a work of greatest consequence, goodness, and renown, due only to her.

But being thus in a consultation and dilemma with myself what to do, I considered

and concluded, That the first view of a book either gave delight, or difgust, to the judicious reader; and if I should have presented you with this rude and laborious filling, as the first dish of my banquet, it would have disheartened your farther proceedings; and therefore I chose rather to please your palate and taste with strange occurrences and accidents at fea, as most delicate meats to keep you from furfeiting.

There are two parts to be plaid in the fcope of my discourse; the one by you, which is the speculative part, out of curiosity to inform yourselves of the secrets and practice of the fea, not intending to make profession or profit by it; but like to a student in Alchymy, who covets to know the depth of the art, but not to fpend a penny in the practice, or

The fecond part is only proper to those that mean to make themselves apprentices to the fea and the art of navigation, to inlighten their future knowledge and understanding: but this is not attained to by ease or floth, but by practice and pains; not by imagining and reading, but by peril, travel, and toil; not by youth and carelessies, but by years and stayedness: for though Alexander the Great was but twenty years of age when he began his conquest, yet none of his captains were under fixty; and though Demostbenes was the most famous of all philosophers for eloquence, yet at first he was but a scholar, and taught by Plato.

There are many things contained in the former several books, which cannot be accounted within your element; I commend therefore such things to your idle hours, as give delight and recreation to your wasteful and confuming time, when leafure admits no moment of matter to think on, like the sport of young whelps, that are to be used for pleafure, when one has nothing else to do, or for want of other company

The reading of these discourses is not worthy the name of study; for they handle no

ferious thing, either of hiftory or learning, but are to be efteemed for curiofity sake, as Romulus did carvers of stone, or Caius Cesar goldsmiths, or Vespasian painters.

Your wisdom knows better how to apply yourselves to the reading, and making choice and use of what is comprehended in the former discourses, than I can either advise, or inftruct: And (for a farewel) I wish you as much happiness as one friend can do to another, that is, content to your mind, honour to your dierts, wealth to your will, and blef-fing from God. All happiness is comprehended in these few words, and they are made the subjects for the eloquence of tongues to amplify upon; for it is matter that makes a good orator, though I confess form adds somewhat to it.

BOOK VI.

Which treats of a Fishery to be set up on the Coast of England, Scotland, and Ireland, with the Benefit that will accrue by it to all his Majesty's Three Kingdoms: With many other Things concerning Fish, Fishing, and Matters of that Nature.

A Discovery of the Hollanders Trades, and their circumventing us therein; and the Means how to reduce the Fishing into our Hands, (as of Right due to us:) With the Honour and Security that will redound to his Majesty, and all his Subjects.

O man is fo void of reason as not to know, that he is born for the fervice of God, his prince and country; God requires it for our own good; a prince, out of duty derived from the commandment of God; and our country, by the law of na-ture, next to our parents: God directs us by his written word how to ferve him; a prince, by his human laws how to ferve and obey him; and our country, by instinct of nature how to ferve and reverence her. The city of Paris had a faying of old, One God, one king, one faith, and one law. These four words are effectual, and as much as can be comprehended in our fervice to God, prince, and country. Cicero faith, That take away the piety towards God, and you take away all conjunction of buman fociety.

As most men differ in feature of face, in diet, condition, and education; yet all good men agree in an unity of the service of God, prince, and country, in these several degrees and qualities; the divine with prayer, the foldier with arms, wise men with counsel, and rich men with treasure.

These being done willingly, makes a fweet harmony betwirk king and commonwealth; for that prince is happy that has young men to take pains, and old men to countel; the one supports the other in con-

venient time, like fruit that all comes not together, nor ends together; some teaching, and others obeying.

The next confideration is, how to make the people subsist in the service of God, prince, and country; for there must be a

rational means to work by, feeing monarchy cannot be upheld and supported without people employ'd, and fet to work in their feveral labours: and therefore, confidering God has created man for the fervice of him, his prince, and country, every one is bound to apply himself to the fervice of them, and to prefer them before all private respects. Let me follow that maxim, as the meanest of many thousands of other subjects, and offer my mite, as the first fruit of my harvest; not like the divine, the foldier, the wife or the rich man, I fpeak of, but with my poor talent God has endued me with, which is my experience, that could not have been compassed, if God had not given me a longer life than many others; if with that life he had not marvellously defended me from dangers of ememy, the fword, water, and many other cafualties incident to mankind.

If with those days and years he had not given me a defire and means to observe, conser, and be inquisitive, I had not been able to have presented this my defire to serve my king and country, but should have gone as naked out of the world, as I came into it.

My meaning is, not to leave our fruitful foil untill'd, or feas unfrequented, our iflands unpeopled, or feek remote and ftrange countries difinhabited, and uncivil *Indians* untamed, where nothing appears to us but earth, wood, and water, at our first arrival; for all other hopes must depend on our labours and costly expenses, on the adventure of the sea, on the honesty of understands.

takers; and all these at last produce nothing but tobacco, a new-invented needless weed, as too much use and custom makes it

apparent.

In what I propound, I will not direct you to the eloquence of books to periwade, to the inventing wits to entice, to the affecting traveller to encourage, nor to any man that with fair words may abule you; you faill know as much as I can fay, in calting a line and hook into the fea. His majefty doth inftantly challenge his own; and by example of one line and net, you may conjecture by multiplication the profit that will arife by the work. You shall be made to know, that though you be born in an island feated in the ocean, frequented with invisible fish, swimming from one shore to the other, yet your experience has not taught you the benefits and blessings arising from that fish.

I doubt not but ro give you that light therein, that you shall confes your selves blinded, and be willing to blow from you the fool mist that has been an impediment to your sight; you shall be awakened from your drowfy sleep, and rouze your selves to larther this best business that was ever presented to England, or king thereof, nay, I will be bold to say, to any state in the world.

I will not except the discovery of the West Indies by Columbus; an act of greatest renown, of greatest profit, and that has been of greatest consequence to the Spanish nation.

You will wonder, being born a subject of England, and casting your eyes upon the gainful soil of the land, that you never conceived what the sea afforded: I confess it were impossible for you to live in that ignorance, if it did not appear by the ensuing discourse, how you, your country, and especially the princes of these realms, have been abused, and the profit thereof concealed.

The Comparison betwint the West-India Trade and our Fishing.

To make my comparison good betwist the trade of the West Indies and our fishing, which of them yields most honour to their king, and most profit to their country, most danger and most labour to the subjects, I refer to my collected reasons.

If men confider the divine work of God, and the end of his working, it is marvellous to behold, that America, being a continent, and equal to all the reft of the world in bigness, thould be concealed from the creation till one thousand four hundred and odd years after the birth of Christ, and not so much as

thought of, though some philosophers seemed to rove at it.

And when it pleafed his divine majefty to east that bleffing upon Europe, if we confider the time he did it, and the occasion why he did it, it will put us into admiration and acknowledgment of the power of Chrift, against the opinion of Jews and Turks, for could he shew himself a more just and loving God, than in pouring upon Christendom such a bleffing of wealth, at the time it was likely to be swallowed up by barbarous Turks and Moors, who were only withstood by the wealth of the Indies?

We may hope the fame God has the fame happiness in ftore for this kingdom, to add immortal glory to his majetty's goodness; or else it as impossible, in human reason, that our loving neighbours, the industrious Hollanders, should for so many years enjoy this fishing, who, to their everlasting honour and praise, have increased threby more vessels for the sea than all Europe besides can muster.

The first discovery of the Indies gave no great hope of profit, till after a long, chargeable, and painful navigation, it was brought to perfection.

The fifting upon his majefty's coaft of England, Scotland, and Ireland, needs no discovery; the experience of our neighbours having found it out and practis'dis, fince the year 1307. to their unmeasurable wealth, and our shame: and for the honour of him that first found out the secret of pickling of herrings, which was one William Backalevo by name, there was a samous tomb in the island of Beverlute erected, yet to be seen, where he was buried.

The *Indies* fend forth more gold, filver, and other merchandize, than all the *European* trades befides.

The fishing produces more riches by its trade than the others do, as I will make appear when I come to compute the one with the other.

The wealth of the *Indies* is not brought from thence without great expence and hazard, confidering the cafualties of the fea, and the fear of enemies to intercept it.

The fifting is ftill in view of us and our thores, our veffels daily expected into our harbours, and others ready to eafe them of their burthen, and to transport it into other countries not far remote, where they are in no danger of hurricanes, enemies, or other perils.

The infurance in going and coming from the *Indies* may be valued at a great rate, which we shall Maye in our fishing, there being no fear or hazard in it. by an king would ftrong pover No in the

d coming from a great rate, fifthing, there The wealth of the *Indies* being furpriz'd by an enemy, is more prejudicial to the king of *Spain* than four times that wealth would profit him, his enemy being made ftrong and rich, and he weakened and impoverished by it.

No fuch accident can prejudice us; for in the mifcarrying of our fifthermen, we fhall only lofe fo many barks, falt, and nets, and no enemy enriched or fortified

Inhabiting in the *Indies* causes a scarcity of natural *Spaniards*, whereby many times the king's affairs fall and perish. The fishing employs all our loose people, which abound in this kingdom, and makes them capable to serve their prince and country.

The Indies fet to work four times more thips than all the reft of the dominions of Spain, and add more strength to them

by fca.

The fifthing will maintain twenty veffels to one of theirs, and England furnish them with most of the materials belonging to them; whereas in Spain they are brought, in time of war, with great peril and danger of the enemy.

The Indies are far remote from Spain to be supply'd, if there happen changes in any part thereof; which other nations may take notice and advantage of.

The fifthing is one body, governed by a company, that no enemy can annoy; and if queftions arife betwixt parties and parties, they are fpeedily to be determined without charge or detriment to either; whereas the others have their appeals to their courts of juffice in Spain from the Judice.

The chief commodity of the *Indies* is bullion, hides, cocheneal, &c. Our only fish countervails the value of them all; and though for the present it affords no bullion in specie, yet it draws the money coined out of that bullion.

The ships that trade to the *Indies* are great in burden, and make but one return or voyage in a year; and when they are careen'd, the water in *Spain* not rising enough to ground them, it is done with far greater labour and charge than ours, that are brought on ground one tide, and hauled off another, ready for a new voyage, and never wanting freight.

But what I have observed is not to be effected with words, but works; not with talking, but doing and acting: for betwixt words and deeds there is great difference; words without effect are like water that drowns people, and does itself no good.

The property of a merchant is to have money in his purfe, and credit upon the *Exchange* to advance his trade.

All men in this work must become merchants, not only for themselves, but for their prince and country; all are to reap profit by it, none pain or forrow, but the slothful, idle, and base people, who are like drones amongst bees; for the purchase of sloth is dispraise.

There are three things necessary in every work a the man that works, the inffrument to work with, and the matter. There is nothing required of the men in our work but labour and pains; the inftruments to work with are thips of feveral kinds to be made and erected; and the matter to fet on the work is money: All these concurring in one, will make it a work of fame, renown, ftrength, riches, and all the good that God can bestow on a nation and people. But if fluggishness and carelessness, or other mistrust of return of gain prevail, it being out of the element and breeding of gentlemen, and others that apply themfelves to the profit of the land, and not the fea 3 and that they neglect the offer and proposition following, we are worthy to be chaftened with penury and want, and unworthy to enjoy the bleffing of God, which he has p ured on this land above all others he has been pleafed to create.

What better light can we have for this work, than from our nearest and intinatest friends the Hollanders? who, by their long travels, their excessive pains, their ingentous inventions, their incomparable industry, and provident care, have exceeded all other nations in their adventures and commerce, and made all the world familiar with them in traffick; whereby we may justly attribute to them, what the Chinese assumed to themselves, That only they have two eyes, the Europeans but one, and all the rest of the world none. How can this better appear than out of their labours and our fish calls?

They have increased the number of vessels; they have supplied the world with food, which otherwise would have found a scarcity; they have advanced trade so abundantly, that the wealth of subjects and the customs of princes have sound the benefit of it; and lastly, they have thus provided for themselves, and all people of all forts, though they be impotent and lame, that want employment, or that are forced to seek work for their mainte-

And because their quantity of fish is not to be vended in their own provinces, but to be dispersed in all parts of *Europe*, I will give you an account of it, as it has been carefully observed and taken out of the custom-books beyond the seas.

The Quantity of Fish vended in other Countries.

In four towns within the Sound, viz. Koningsberg, Melvin, Stelin, and Dantzick, there is vended in a year betwixt thirty and forty rhousand last of herrings; which will amount to more than fix hundred and twenty thousand pounds; and we none.

Denmark, Norway, Sweden, Liefland, Rie, Regel, the Narpe, and other towns within the Sound, take off above ten thou-fand lafts, worthone hundred and fixty thou-fand pounds.

The Hollanders fend into Ruffia above fifteen hundred lafts of herrings, fold at twenty feven thousand pounds; and we not above thirty or forty lafts.

Stode, Hamburgh, Bremen, Embden, and upon the river Elbe, in fifth and herrings, above fix thousand lafts, fold at one hundred thousand pounds; and we none.

Clevelan, Juliers, up the river Rhine, Frankfort, Cologue, and over all Germany, in fifth and herrings near twenty two thousand lafts, amounting to four hundred and forty thousand pounds; and we none.

Gelderland, Artois, Hainbault, Brabans, Flanders, and the archduke's countries, eight or nine thousand lasts, fold at eighteen pounds the last, amounts to one hundred and fixty thousand pounds; and we none.

At Roan in Normandy, five hundred lafts of herrings, fold at ten thousand pounds; and we not one hundred lasts; there commonly fold for twenty, and fometimes thirty pounds a last.

Befides what they spend in *Holland*, and fell there to other nations, the value of many hundred thousand pounds.

Now having perfected the valuation of the Hollanders fish, caught on our feas, and vended into foreign countries, our shame will manifelly appear, that of so many thousand lasts of fish, and so many hundred thousand pounds in money made by them, we cannot give account of one hundred and fifty lasts taken and vended by us.

The Hollanders are no lefs to be commended, in the benefit they make of the return of their fish; for what commodity foever any country yields in lieu thereof, they transport in their own vessels into Holland, where they have a continual staple of all commodities brought out of the fouth, from thence sent into the north and theeast countries: the like they do from out of the fouth into the north, their ships continually going and bringing inestimable profit, like a weaver's shuttle, he casts from one hand to another, ever in action, till his gain appear in the cloth he makes. And if we compare Itolland's forecast with ours, the imputation of sloth and negligence will lie heaviest upon

us, like him that beats the bush for others to catch the birds: for Rusha, with our adventure, charge, and shipwreck, was first known to us, that for many years together, afforded great profit, by the usual trade of eight or ten ships yearly.

About twenty years past, the Hollanders incroached upon us with two ships; and in continuance of time they brought us from ten to two or three, and themselves to sixty vessels, or more, and lately to one hundred; the chiefest gain arising out of our fish, and other English commodities they setch from

Newfoundland being an ancient patrimony of England, and we the first discoverers thereof, immediately after the sinding out of the West Indies by Columbus, has been since a great enriching to the western parts, with the fish there yearly taken; and now the Hollanders of late have found the way thither, and sent in the year 1629, and ever since, twelve or fourteen great ships, to buy the fish taken by his majesty's subjects; whereby his majesty does not only lose his custom in going out, if it be brought for England, but in the return of that commodity, which might amount to sourteen or fifteen thousand pounds, if his Highnes's subjects had the carriage of it.

To fay no more of the Hollanders greateft trade with England, there are three fifthes of little note, and not regarded by us, which they make gain of themselves: the first is lobsters; the greatest part whereof that serves London, at the time of year, they bring from the furthest northern part of England; which is never practised by the English. The second is, the great quantity of oysters yearly transported by them into Holland, which causeth the decrease and dearness of oysters among us. The third, is lampreys, out of the river of Thames, which they use for bait for cod in the north seas; and this is the cause of the scarcity and dearness of this fish in London.

The Hollanders Navigation into the Streights.

But the greatest navigation of theirs, and of most importance to their state, for maintenance of ships of burthen and strength, is into the Streights, from the port of Marfeilles, along the coast as far as Venice. In this trade I will compute but sixty ships of two hundred tons burthen each, having above as many more trading into Spain, Portugal, and the south part of France, and all with our English sish, taken by his majesty's subjects; as, namely, pilchards caught in England and Ireland, baccaloes of poorjohn in Newfoundland, and red herrings taken and made at Tarmouth.

the Hollanders greatland, there are three and not regarded by us, ain of themselves: the greatest part whereof t the time of year, they heft northern part of never practifed by the d is, the great quantiy transported by them auseth the decrease ters among us. The out of the river of use for bait for cod in this is the cause of the of this fish in London.

Navigation into the ghts.

vigation of theirs, and o their state, for mainrethen and strength, is from the port of Marft as far as Venice. In upute but sixty ships burthen each, having e trading into Spain, th part of France, and fish, taken by his mamely, pilchards caught rd, baccaloes of poornd, and red herrings urmouth. The Hollanders are aimost absolutely masters of these trades; what by combination made with the merchants that deal in that kind of fish, and what through the cheapness of the freight in their vessels; which makes them sell the cheaper.

During these eighteen years last past they have so increased their navigation, whereas before they had not above two ships to five of ours within the Streights, within the said eighteen years they are able to shew ten of theirs to one of ours, and merely by the trade of fish; for true it is, there is no commodity in the world of so great bulk and small value, or that can set so many ships of burthen to work.

As for example: A mean man may freight his thip of two hundred and fifty tons with fifth, that will not coft above one thousand fix hundred pounds, that forty merchants cannot do, of better and richer commodities: I speak not upon surmise, but what is approved by divers merchants; but especially one of good account, whose name I must conceal, unless authorized by him to publish it, who computed fixty ships of this fort of fish aforefaid; of the which there is not returned one penny profit into England, where they gather the sweet dew of their food.

The principal work I aim at, is how to undertake the Italianders with our own weapons, and how to equal them with pinks, buffes, and other verfiels, till we be made partners with them in their fishing; not by hostility, or uncivil usage, nor to deprive them by his majesty's pre: ogative, which the law of nations allows us; or out of envy to their labours; or to revenge discourtes, only we will seek to do what nature discharge, (viz.) to enjoy and make use of our own, by the countenance of our blessed king, that in justice gives all people their research and the

Holland is inriched by the fixty ships aforesaid, which I have computed, by the carriage of red herrings, as I will after demonstrate, fix hundred twenty one thousand seven hundred and fifty pounds, in their return out of the Streights.

The Hollanders fishing in their Pinks, and Busses, that the English may not only equal, but out-do them in it; and the great Benesit it will be to the Nation demonstrated.

There needs no repetition of any former relation; for truth has spoke it, which is so glorious of herself, that it needs no shade to give it better gloss: in what sollows I will demonstrate by the particular proceedings of the Hollanders, in their pinks and bulkes, what certain gain they yearly raise

out of them; and when experience, the mother of knowledge, shall make it apparent to you, I hope you will remember what you are, and how easily you may make your selves and country by it.

I confess this fishing is a business I have taken into confideration. My lord of Northampton, if he were now living, was able to witness how much it was folicited and desired by me, and no less wished and desired by his lordship. I caused one Tobias Gentleman, a mariner by profession, but indeed a man of better parts than ordinary seamen, and much practised in their northern fishing, to dedicate a book to his lordship, which gave particular notice of the Hollanders proceedings in their pinks and busses, and what we shall do in the imitation of tiem.

But by the death of my lord, it refted unthought on by me, till the late duke of Richmond revived it, and importanced me once more to it. His death in the like manner made it die, till his majefty, of late, out of his princely care for the good of his loving fubjects, for the renown of his kingdoms, and defire of the unity and equal benefit of his two realms of England and Scotland, took more than an ordinary care how to effect it, well befeeming fo bleffed and benign a prince: and now I will defeed to the particulars of the Hollanders buffes, as well in their taking herrings, as cod, and ling, and the feafons of the year for both.

From the Texel in Holland to Brafound in Shetland, an island belonging to his majefly's dominions of Scotland, is two hundred thirty and odd leagues, whither there refort the 22d or 23d of June wellnigh two thousand fishing vessels. The twenty fourth they put to sea, being prohibited till that day, and a penalty upon the breaker thereof, holding the herrings till then unseasonable to salt for their fatness.

Every one of these vessels that day directs its course to find out the shoal of herrings, like a hound that pursues the head of a deer in hunting. When they have laden their busses, which is sooner or later, as they find the shoal of herring; they presently return home for Holland, and leave their herrings aftore to be there repacked, and from thence immediately to be fent into the Sound, where they receive them for a treet deliner.

a great dainty.

The buffes having thus disburthened themselves in *Holland*, once more furnished with victuals, cask, and salt, they repair to sea to look out the shoal they had formerly left; and then sinding them, and filling them once again, they do as they did before, return to *Holland*.

Nor thus ceasing, the third time they repair to the shoal, as aforefaid; and in their three fishings, computing with the least, they take to the number of one hundred last of herrings, which being valued at ten pound the last, which is no more than eighteen shillings a barrel, will amount to one thousand pound sterling each ship.

Many times this fifting fleet is attended with certain veffels called yawgers, which carry falt, cask, and victuals, to truck with the buffes for their herrings, and carry them directly into the Sound, without returning into Holland; for it is a matter of great confequence and gain, to bring the first herrings into the Sound; for there they are efteemed as partridges with us, at their first coming: but now of late years the Hollanders are prohibited by the state carrying or trucking away their herrings, till they first land them in Holland; which will prove the more commodious to us.

I will fet down the rate of a bus new from the stocks, with the price of her nets, tackling, falt, victuals, cask, mens wages, and all other charges whatsoever belonging to her; and will rate the profit gained by her four months fishing, which is likely to continue twenty years, being the ordinary life of a bus.

Imprimis. A buss, with her furniture and tackling, will cost 500 l.

Item. One hundred lasts of cask, at 18 s. the last, 90 l.

Item. For salt, thirty weigh, at 3 l. 10 s.

the weigh, 105 l.

Item. For beer for the men four months,

a gallon a day, 16 l.

Item. For bread, after the same propor-

tion, 12 l.

Item. For butter, cheefe, billets, 20 l.

Item. For mens wages for four months 88 l.

It is to be confidered, that mens wages are not to be paid till the voyage be ended; so that the present disbursement is but 723 l.

Rating the hundred last of herrings but at 1000 l. there is gotten clear in four months, 500 l. in a buls, and 165 l. in money; so the the total sum as appears gotten is 665 l.

Here plainly appears, that there is gotten fix hundred and fixty five pounds in one fummer; whereof, if you deduct one hundred pound for the wear of the bufs, and the reparation of her nets against the next fummer, yet still there remains five hundred and forty five pound, for clear gain by one bufs in four months; a profit exceeding all other trades.

It is to be noted, that I have proportioned in this computation a bufs of thirty five laft, that is to fay, feventy ton; but I conflider with myfelf, that we will make a greater gain with a bufs of twenty laft, which is but forty ton, than the Hollanders do with their feventy ton, in respect of the nearness of our harbours to put in upon all eccasions; and after the proportion of our buffes, we must lessen the proportion of the feven hundred and forty five pounds, which is the first disbursement, as aforesaid.

Now having shewn you the charge of the busses, I will shew you the charge of a pink of twenty last, that is forty ton.

A pink being built new, and all things new to her, will not coft two hundred and fixty pound, with her lines, hooks, and other fifting appurtenances.

Imprimis. A pink	1. 260
Item. Twenty last of barrels	18
Item. Five weigh of falt	18
Item. Beer, cask, bread, and petty-	12

Sum i	228

Twenty lasts of barrel cod, at fifteen pound the last, amounts to three hundred pounds; and deducting fixty eight pounds ten shillings, for the fitting her to sea, there remains two hundred and thirty two pounds ten shillings clear gain, by one pink in two months, rating the cod and ling, but as they are fold in England; but being transported, commonly they will double their

I prefent you not with toys to pleafe children, or with shadows of untruths; for I know truth to be so noble of itself, that it makes him honourable that pronounces it; and that an honest man will rather bear witness against friendship than truth. I have made it appear with what facility the Hollanders go through with the golden mine of theirs, which they fo term in their proclamation extant: I make proof their buffes and pinks are built to take fish; that they fill themselves thrice a summer with fish; that this fish is vended and esteemed as a precious food in all the parts of Europe; and that the return thereof gives them means to live and breath; without which they could not.

It is manifest that fish has brought them to a great strength both by land and sea, and lame withl, in maintaining their intestine war against so great and potent an enemy as the king of Spain,

And

iave proporus of thirty ty ton; but e will make twenty laft, ne Hollanders espect of the in upon all ortion of our ch out of the ounds, which forefaid.

And if all these benefits appear in them, and nothing but shame and scorn in us, let us enter into the cause thereof, and feek to amend it 3 let us labour to follow their example, which is better than a schoolmaster to teach us. Nothing is our bane but idlenefs, which ingenders ignorance, and ignorance error; all which we may be taxed with: for to a flothful man nothing is so easy, but it will prove difficult, if it be not done

There are but two things required in this work; that is to fay, a will to undertake it, and money to go through with it : which being found, we will place charity to begin at home with ourselves, before we yield it to our neighbours; and then this business will appear to be effected with more benefit, more strength, more renown, more happiness, and less expence, than Hollanders have or can go through withal. Time is the most precious experience; and you shall find that time will cure our carelesness past, that reason could not hitherto

The instruments by which the Hollanders work, are their vessels of several kinds, as I have declared, not produced out of their own country; for it yields nothing to further it, but their own pains and labour.

Their wood, timber, and planks to build ships, they fetch out of divers other places; and yet are these no more available to undertake their fishing and navigation, than weapons are without hands to fight. Their iron, hemp, cordage, barrel-boards, bread, and malt, they are beholding for to feveral countries; and if at any time out of displeafure they be prohibited the transportation, they are to feek a new occupation, for the

Comparing their cafualties and inconveniencies with ours, you shall discern the advantage and benefit God has given us, in respect of them; for all the materials formerly repeated, that go to their shipping, England yields most of them, or in little time the earth will be made to produce them in abundance; so that we shall not need to fland upon the courtefy of our neighbours, or to venture the hazard of

the fea in fetching them.

Whereas all manner of people, of what degree foever in Holland, have commonly a share, according to their abilities, in this fishing, and that the only exception amongst ourselves, is the want of money to undertake it, you shall understand how God and nature have provided for us; for I will apparently answer the objection of money, and cast it upon the sluggishness and ill dispofition of our people, who if they will take away the cause of this imputation they shall

take away the offence due to it, and by which we are fcandaliz'd.

In the objection of lack of money to fet on foot this work, it would feem ridiculous to strangers that behold the wealth and glory of this kingdom, with the fumptuous buildings, the coftly infide of houses, the mass of plate to deck them, the daily hospitality and number of fervants to honour their mafters, and their charitable alms distributed out of their supersquities. And to descend to people in particular, if they behold the bravery of apparel vainly spent, the rich and curious jewels to adorn their bodies, and the needless expences yearly wasted, they would conclude, that it were not want, but will that must be our impediment.

But leaving these observations, let me tell you, there is never a lord, knight, gentleman, or yeoman, of any account in England, but for want of money is able to furnish either timber, iron, wheat, malt, beef, pork, bacon, peafe, butter, cheefe, or home-fpun cloth out of the wooll,

All which shall be taken from them at an ordinary rate, and the value allow'd

them in adventure.

No man that has or hires land, but may as well plant for hemp, to make lines, nets, and cordage, feeing the laws of the kingdom command it, as any other grain; which hemp may be fpun by their neigh-bours and tennants, and fo all people fet on

Then what need have we of money, but for the building of veffels? for you fee with what eafe every thing elfe is compaffed.

Before these buffes shall direct their course to Shetland, to be there welcomed by the Hollanders in their own houses, (a thing not usual for strangers to entertain their true inhabitants,) I will first view all harbours and creeks, capable for buffes in his majesty's kingdoms of England and Scatland, and there lay fuch provisions for the benefit of our fifthing, that it shall appear, if the Hollanders have usually made a thoufand pounds in four months by their three fishings, we shall be able to exceed them in the course following;

I will suppose our buffes to be at Brafound in Shelland, ready the 24th of June to put to sea, in pursuit and chase of the herring-shoals. I will suppose likewise, that the one and the other have fished their vessels full, the Hollanders ready in their way to Holland, there to unlade and return again, as I have faid before. If you compute the distance and loss of time in the four hundred leagues, running backward and forward, then shall you find great difference of gain betwixt us and them a 6 E

And

for we shall not need to run many leagues, nor perhaps not ten, till we make our repair into the next harbour, where provision shall be made of victuals, falt, and casks; and our buffes putting the herrings ashore to be repacked again, with all speed they hasten to fea in purfuit of the shoal; and the herrings being repacked, are immediately fent to the Sound to take their first market : all which will be effected before the Hollanders can be at home with their herrings; and after they are arrived in Holland, they are to fail very nigh as far to the Sound, as we shall be from England or Scotland. There needs no argument to prove the truth thereof, feeing a fea-card or plot will demonstrate

But I may be answer'd, that the yawgers, formerly spoken of, which truck with the buffes for herrings, will fooner be at the Sound than we, and make a great benefit by

the first sale of their fish.

But to give you fatisfaction herein, I pray you conceive our buffes are in harbour within the space of three hours after they have fished, and not subject to foul weather to hurt them. They shall have a convenience to mend and dry their nets; they are to unlade their herrings, and to lade their falt, cask, and victuals, without interruption, and to fea again speedily: whereas the yawgers must watch their time for fair weather, and a fmooth fea, to exchange their falt, victuals, and cask, for herrings.

They must watch a fit time and weather to mend any defects in their nets, buffes, or in drying them: thus you may fee, all cafualties confidered, our arrival at the Sound before them is more certain, for the

reasons before expressed.

But there was never any business so easy, but it either found objection, or opposition, till made plain and apparent, as well to the doubters as the beholders; for most men are guided by opinion, rather than by judgment: and fo fares it with his hopeful and unanfwerable work, where fome frame supposed reasons and impediments; but time will determine their doubts, and declare their mif-

There are three arguments, but rather errors, that possess people's tongues with the difficulty of our fishing; which I do not mean to convince with bare words, but with infallible truths; for I had rather offend in telling truth, than please by feigning falshoods.

The first objection is, The taking our fish with greater charge than the Hollan-ders, by means whereof they will over-work

The fecond, That they would do no less in the vent and fale thereof, by their long practice in that trade.

The third is, The fear of fraud and deceit amongst ourselves, after the example of the East Indies, Virginia, and other companies lately erected.

Truth has no need of a ghoftly father to abfolve her; reafon shall make her speak to the first objection in taking our fish, with

the comparison of Holland.

You must know that the charges belong. ing to a fishing vestel, is her hull, tackling, nets, falt, casks, victuals, the number of men, and their wages.

Butter and cheefe excepted, there is none of the rest of the materials growing in Holland, and most of them afforded in Eng. land, Scotland, or Ireland; by reason whereof England may yield them better cheap

than Holland.

The feveral victuals carried to fea, are flesh, fish, bread, beer, butter, cheese, and peafe: for fish we may value at an equal rate, for it costs neither of us more than the taking; and as flesh is more chargeable than the rest, it will cost us nothing; for it is to be confidered that a fat beef, in the island of Hybrides is fold for less than twenty shillings, the hide and tallow whereof in England will give ten shillings, the other ten will be raifed in carrying wine, ftrong waters, and other commodities defired by the people of the country; for every ten shillings to employ'd doubles the adventure; as, namely, Aqua Vitæ, ten shillings bestowed in England, will yield more gain than will purchase the carcass of a cow.

For bread, beer, butter, cheefe, and peafe, England affords them better cheap than Holland: first, in respect they grow in England in greater plenty than in Holland : fecondly, they all pay excise in Holland, and not in England: and, thirdly, no man but knows the difference of feeding betwixt the Hollanders and the English; and that a Hollander eats half as much again as one of our

English at sea.

Both the one and the other carries an equal proportion of men, and their wages are upon an even rate; but herein we shall over-work them by the reasons following:

In a buss of fifteen or sixteen men, the meanest amongst the Hollanders has twenty shillings a month; and we will ease the charge of wages eight in fixteen in our fishing about the Lewes, viz. we will carry but eight men to the place of fishing, where we will hire eight more for less than half the wages we give the rest; and herein shall we fave forty eight pound a year in every bufs, by means whereof we shall go cheaper than the Hollanders nine thousand fix hundred pound in our two hundred buffes. And moreover, in the wages and victuals of the men, we shall fave so much as will come to fixteen hundred pound.

And victuals of the is will come to Whereas it is conceived that the Hollanders will transport their fish at a less charge than we, it will appear otherwise; for the yawgers that attend some of their busses, to carry their herrings to their first market, as I have said, those herrings of theirs are not repacked, but allowed more than two barrels to each last, to make up their tale; by means whereof they pay two barrels freight in every last of herrings, more than we that have the shore near us to repack them; which in two hundred busses will amount to sive thousand pounds more gain to us than to the Hollanders.

Whereas every fishing vessel in Holland contributes to twenty or thirty ships of war to defend them from the Dunkirkers, our peace eases us of that expence. And this shall suffice in answer to the comparison betwixt the Hollanders and us, in taking their fish.

And to the second point, to prove that we shall vend our fish at as easy a rate as the Hollanders, (thus I say,) That your experience must teach you, that in the Sound, where the greatest quantity of herrings is uttered, as I have before shewed, necessity will compel them to take them off; for it is not their affection to the Hollanders above us that will make them refuse ours to accept of theirs; and then consequently ours will be better fold, in that we shall serve the market before them, by the means and reasons aforesaid.

And if we go further from home, as to Spain or the Streights, you must understand that the Hollanders ships go with fewer men than ours, occasioned by the slight building and tackling of their ships, in comparison of us: and as there is twenty or forty men difference in the sailing of them, the like difference there is in the strength of them: wherefore the merchant had better, for the safety of his goods, give sifty shillings freight to us, than thirty shillings to the Hollanders; his goods shall be better defended against pirates by our forty men, than the others twenty.

than the others twenty.

The English hips will double a lee-shore, when the others will be forced in foul weather upon the rocks; the cables and anchors of the English will hold, when the others will be forced to come home and break; the English will be able to put out at sea, when the others will take in sail; the English, upon some accidents, may come on ground, and by their strength come off again without hurt, when the others will perish; the English go deep in water, which makes them whossome in the sea, and carry the merchants goods with little loss; the Hollanders are laboursome and dangerous in a storm, which causes great leakage in oil, wine, and such commodities,

to the great annoyance of the merchant 3 yea, oftentimes more than the difference of the freight.

As the English go in greater security than the Hollanders, so shall the merchants save by not insuring the value of difference in freight; which I could compute and prove, but that it is too tedious.

And moreover, if the English have the abfolute carriage of the fish taken by them, and the laws of the realm warrant it, our thips shall never want imployment, nor have cause to look out for freights; by reason whereof a ship of two hundred tons may go cheaper by two hundred pounds than usually they have done. And thus much for our foreign trades.

Now let us return to the vending our fish in the kingdoms of England and Wales.

If the late proclamation for the observing of fish days be duly kept, it will be a means to vend our fish, and incourage others to venture in the fishing; so as there be a prohibition, as there is in *Holland*, that no fish be brought into any of his majefty's kingdoms but by his own subjects.

Neither will it feem a thing unreasonable to enjoin every yeoman and farmer within the kingdom to take a barrel of fish for their own spending, considering they save the value thereof in other victuals; and that it is no more than the fishermen will do to them, to take off their wheat, malt, butter and cheese, for their food at sea. The farmer by this means shall never be unprovided of fish, to observe the days commanded by his majesty, without sending to the market, as otherwise they would be compelled to do.

The farmer will find by experience that it is as cheap a food as any other they can feed upon, and gives a better delight to the tafte, confidering the feveral ways in dreffing it.

fing it.

The labouring man who works with the farmer takes of him his butter and cheefe; for every poor man's cafe is not to keep a cow; and fuch labourers will be as willing to take fifh from the farmer as any other victuals, if he be willing to spare it.

There are few farrners but will spend the value of a barrel of sish yearly; and he that does so shall save twenty in the hundred by buying the quantity of a barrel together, rather than by re-

And because the country shall be better ferved with fish and other commodities than they have been, we will make several staples of salt, coals, and other merchandize defired by the country, where boats may have passage up the rivers not used herecofore;

as namely, Middlesex, part of Hertsordsbire, Surrey, Buckingbamsbire, and Oxfordsbire, may be served by the river of Thames.

Essen may serve itself, part of Hertfordfoire, and part of Suffolk.

Norfolk will ferve Cambridgelbire, part of Suffolk, Bedford/bire, Huntington/bire, Northampton/bire, and a ftaple there made will ferve Warwick/bire; for from thence go their empty carts to fetch coals, which may furnish the shire with little charge.

Lincaln/bire will furnish itielf, Nottingbambire, part of Rullandbire, and Derbybire by the Trent; Cumberland and Westmoreland, will furnish themselves by the east

and west sea.

We will leap over the land to the westward, as Chefibire and Lancashire, which will furnish themselves, part of Shropshire, Worsestershire, Staffordshire, and the north part of Wales.

That fide of the fea will furnish Wales

till you come to Severn.

The north fide thereof will furnish Pembrakeshire, Carmarthenshire, Glamorganshire, and Monmouthshire, and the fouth part thereof will serve the north fide of Cornwal, Devon, and Somerset; and up the river of Severs will serve Glouestershire, Herefordshire, part of Stropshire, Worcestershire, and Willshire.

The fouth sea of England will furnish Cornwal, Devonshire, Somersetshire, Dorsetshire, Hampshire, and part of Wilshire, Suf-

fex, Kent, and part of Surrey.

Thus is England and Wales compassed, and a consideration to be had for the meetest place to erect our staples, to utter the commodities brought them, and to receive from them.

If at any time corn fails the countries, we will hereafter supply them at a reasonable rate with our trade to Dantaick with herrings: if plenty make it warrantable to transport by the statute, we will take it off from them, so as they shall have no just cause to complain either of dearth or abundance.

We will provide that no rogues or vagabonds shall be to them annoyance, or the poor of the parish charge them; for all such people shall be set to work by us: then will the contributions to the bouse of correction cease, which will be a more ease to the parishioners, than the value of many a barrel of herrings which they shall take off from us.

When our staples shall be erected in the country as aforefaid, out of them we will furnish every parish within the kingdom with hemp by weight, to set the people to work, and to receive it again by weight, allowing every one such a rate for their

work, that they may live well thereby. No girl nor boy of nine years of age, no man nor woman, how lame of their legs foever, but shall be able to get their livings, no person so blind, but may live without alma.

For besides the making of nets, and such work as belongs to it, we will set up a trade of making of cables, and all manner of ropes, as well to vend abroad, as sumish the kingdom at home; as also pole-davies for sails, and not be beholding to France for them.

All these reasons considered, it is apparent, that the farmers and people of the inward country, who hitherto have not tasted of these happinesses, and whose passages by water have not been frequented or known, shall reap as great a commodity and prosit by this sishing, as our selves; and have no more reason therefore to resust the taking of our herrings in the manner aforesaid, than we have to take off the commodities by which they live. And this shall suffice for the second point of vending our fish.

the second point of vending our fish.

These fix several trades following we will erect in all parts of England, not historic practised but in some places near the

fea fide:

Hempsters, Rope-makers, Spinsters, Weavers of Pole-Davies, and Carders, Net-makers.

Besides the increase of coopers, smiths, shipwrights, caulkers, sawyers, sailors, sishermen, basket-makers, sail-makers, labourers, and many other trades in great abundance.

In answer to the third allegation of cousenage and deceits amongst ourselves, by example of the East Indies, Virginia, and other trades, I cannot fay whether they deferve the imputation of the fraud that is cast upon them, or no; for report is like an echo, heard, but no man knows where: but to give fatisfaction as well in the managing our trade, as that truth speaks it, no deceit can creep in at it, as that which follows shall declare: It is not intended (as I conceive) that a felect company shall have the disposing of this fishing, as the other has, or to receive, disburfe, or imploy the moneys raifed by the adventurers, or to direct and order things at their pleasure; but contrarywise, for example, whosever shall be a member in it, shall have his choice what to adventure, with whom to adventure, and the manner how to adventure, without controllment of any other: as this, If he undertake for a buls or a ship, it shall be in his choice to accept of a partner, two, three, four, or more.

And after the value of their adventure. to erect fo many ships as it shall please themselves to nominate, and appoint such persons for the ordering of it as they shall make choice of ; fo that if deceit appear, it wil be among themselves, for no body else shall meddle in their adventure.

But because in all commonwealths there must be a head to govern and execute juflice, to which the reft of the body must fubmit, it is convenient that the fupreme commission and authority be given to some of the lords of his majefty's honourable privy council, and other persons of quality to be chosen, as well in the kingdom of Scotland and Ireland, as in England, to fettle a form of government, with a judge to rule, and to provide for all mischiefs and inconveniencies that may happen betwixt man and man, and prevent the abuses and questions that may arise betwixt merchants, mariners, owners of ships, falters, coopers, and others whom it may concern: but thefe commissioners are in no wife to handle or meddle with the parties in their adventures, or with their flocks of money, or with the employment of it.

Farthermore, to stop the mouths of such suspicious conceits of fraud, you shall find it is not in the wit of man to overreach them, for the reasons following: The quantity of fish that a buss takes cannot be concealed; for of neverfity the must repair to the ports of England or Scotland, where the cuftaniers enter every barrel of fish in their books, and none can be transported without a cocket: besides the number of cask they pay for, they must look to have them filled, and likewise the quantity of falt bought, to have it employ'd.

The price, as well of those that are vended at home as transported abroad, is eafily known; the usual freight of ships and the factorage is foon gueffed at, and therefore no means left for deceit to enter in at.

Now to return once more to the fishing, where we left the buffes for that fummer, and provide them against the middle of November, to repair to the ifland of Lewes, where, till the beginning of February, they shall take the principal herrings of all others in loughs and harbours, as I have formerly

declared. Which being done, about the first of March they depart from thence to the island of Rona, betwixt fifteen and sixteen leagues from Lewes, from whence there runs a bank of one hundred miles in length, and as tar as Tillbead in Ircland; which bank affords the best quantity of cod and ling of any part of the feas, and one hundred and odd years not used.

figned to repair to Brasound in Shetland; in which space I make account they will fill their veffels twice or thrice with cod and ling, and leave them in the ifland of Lewes there to be fetched by other ships that shall bring falt, and all other kind of necessaries which shall be fitting.

The 20th of June approaching, the buffes are to repair to Brajound, as I have faid before; from whence they must profecute their fishing of herrings, as in the former year, till their arrival at Yarmouth. If then they please to take an account of their year spent, it will appear that one buss employ'd by us, as I have projected it, will be of much more value than to the Hollanders, and be the way to teach us how his majesty's dominions shall slourish, not for a while, but for ever.

At Yarmouth we may account the goodness of the herrings spent; for betwixt Winterton and Orfordness they use to spawn, and are called by the Hollanders the ropefick herrings, which they forbear to take.

The nature of the young herring, after it is fpawn'd, is to feek the comfort of the fresh water, and put themselves into the mouth of the Thames, or amongst the fands, where the water is not altogether fo brackish; but like poor filly creatures they are here entrapped by the stale nets that use to take the fprats; but for one fprat they take they catch one hundred of these young herrings, and bring t em to Billingsgate, where they fell them not for above two-pence or threepence a peck; which if let alone, would by Midsummer following grow to be a perfect and big herring, worth twenty-five or thirty shillings a barrel. This mischief must be prevented, and the fishermen enjoin'd not to go to the westward of Orfordness to take fprats.

From Orfordness the herrings direct their course to the North Foreland in Kent, where they furnish both the English and French fhores with fo many as are taken by both nations, though they be both shotten, and of the worst kind.

Their abiding hereabouts is according to the winds; if it hang foutherly or westerly, they remain the longer; but if eafterly, they are taken, as it were, with the wind in the poop, which carries them the length of our channel, till they arrive at the Landsend in Cornwall, from whence they divide themselves like a fleet of ships that should be directed by a general: fome go through St. George's channel, betwixt England and Ireland; others to the westward of Ireland, till they arrive at the islands of Hybrides or Lives, the place of rendezvous; and we may suppose they are at home, by the strength and goodness they find in that place; for though they run the length of

our channel lean and fick, yet as foon as they repair to those islands, they become the largest, the fairest, and the best herrings in the world; and here they are taken in loughs and harbours, as I have said, and valued at forty shillings the last above others.

Flere I will leave them taking their reft, and fhew another benefit we shall receive upon the shoals of Shetland, Orkney, and the Hybrides, which the Hollanders have not, nor cannot make use of, in respect they are not subjects of his majesty.

And because I have pursued the herrings till I left them at the island of *Lewes*, I will begin with those islands, and truly fay, they are placed for the benefit of fishing above all places in the world.

ing above all places in the world.

The condition and fituation of those islands I refer to the map, that will give you light of their feat, their altitude, and their neighbourhood with Scotland and Ireland; but the nature and disposition of the people you shall receive from me, who have seen them, and can belt speak of them.

them, and can beft fpeak of them.

Of many hundred islands belonging to this kingdom of Scotland and Ireland, I may lay, those of Lewes exceed the rest in fertility of soil; it yields, with the labour of people (which they are not guilty of) all manner of grain, cattle, fish, and sowl; and although their fire be not of wood or coals, which we esteem the best fewel, yet it hath plenty of peat and turs, that they have little cause to sear cold.

There is an old faying, which may be well applied to those islands, and the inhabitants of them, That they have a good land, and are ill people; for, to speak the truth, the christian world cannot shew a more barbarous, more bloody, and more untamed generation. But his majesty being lately informed of their breeding, and uncivil living, is graciously pleased to reduce them to the knowledge of God, and the acknowledgment of him, which hitherto they are ignorant in.

This being done, and the islands being furnished as is intended, I will make it appear, that the seas about them, and the loughs and harbours within them, will yield more commodity to the subjects of his majefty's three kingdoms, than any other trades whatsoever, either near home, or far abroad.

Now will I stand over for the islands of Orkney and Sbetland, which have no need of other description, but that it is pity so good and civil people should inhabit no better a country: we may say the contrary of them that we said of the island of Lewes, that it was a good land, but evil people; these are good people, but possess an evil soil.

The way to relieve them, is humbly to intreat his majefty to pleafe to accept of his revenue in Orkney and Shelland in fifth, to encourage the people of those islands to undertake and practise the use of fishing, which, through poverty and the want of trade, they are not now able to go through with.

Befides the rent to his majefty in fish, whatsoever fish they shall take by their own labours we will take off from them, and supply them with falt, nets, hooks, boats, and what else they shall stand in need of; by means whereof, every man in those islands shall be able to subsist and maintain himself, that now knows not how to get his living, but is brought up in sloth and idleness.

What is requisite for the Planting of the Island of Lewes, and other Islands adjacent,

but the nature and disposition of the people you shall receive from me, who have seen them, and can best speak of them.

Of many hundred islands belonging to this kingdom of Scotland and Ireland, I may say, those of Lewes exceed the rest in service is supported to the service of that benefit.

2. That his majefty grant liberty and privileges to his subjects of England and Scotland, there to erect and inhabit towns, villages, florehouses, and all manner of manufactures and trades; that hereafter we shall not need to supply those islands, but find all things established to our hands, as in all other places of Europe where trades are upheld and maintained.

3. That his majefty inflitute a governor there, to be refident for the fpace of three years, and not exceed that time, left in longer continuance abuses creep in through the avarice of governors.

4. That in every ifland there be erected one principal town above the reft, and a citadel in it, to keep the people in obedience; for the inhabitants of those islands are naturally inclined to incivility, treachery, and liberty, which are next neighbours to rebellion.

5. That every child be taught the English or Scatch language, and that their education be according to their abilities of body and disposition of mind, or as the estates of their parents are able to maintain them, some in learning, some in manuring and husbanding of grounds, but the most part in fishing and sea-affairs, having so convenient a seat for the same.

6. That the natural inhabitants of those islands have no correspondence with the *Hollanders* upon the main continent more than is needful, considering the danger that may ensue by their too great friendship, who are naturally the most dangerous and

worst and the one wor See marri afores

I have annexed hercunto what I think fit to be put in prefent execution, for planting the iflands of *Hybrides*; which being done, all the good formerly exprefied will follow; befides, there are other things, which I forbear to touch, as matters not fit for me to handle.

I have brought my intention to an end, and laid open the mifchief our flate or long fulfiered by refigning, at leaft conniving at the Hollanders lifting, who have made long

use of it

I have made it appear how eafy it is for us to enjoy, or to be restored to what we have loft, and the profit all kind of people shall reap by it, if will and money be not wanting. I have made it plain to as many as defire to know the truth, that the increase of ships in Europe is occasioned by the taking and transporting our fish; that nine thousand Holland vessels are kept by it, and all their people daily fet to work; infomuch that I dare boldly fay, if the food of fish were prohibited by all forts of chri-ftians, and duly observed, it would lessen the number of shipping three parts in five. And therefore, feeing our fish is able to make us happy, and this narration lays down the way how to attain to that happiness, let neither excuses, false pretences, or affection to the Hollanders, divert us from it, as it did in the year 1609, when by proclamation the Hollanders were to refort to London for licence to fifh on the coast of England; and Edinburgh, for the like in Scotland; and yet neither of them both was performed, nor the contempt quef-

Two hundred usurers, with willing minds and forward purses, are able to matter this work; but, I sear, the devil, whose friendship is not to advise, but ro deceive them, will not allow a gain so well gotten. The excessive practice of usury is the decay of commonwealths, repugnant to all humanity, charity, and natural benevolence, and a slavery to those that defire to live poor to die

rich.

But, to speak the truth, it is pity that a work of so great goodness and gain should be tainted by men of so penurious a condition, who are neither good nor evil by the disposition of another, but by their own perverse will and nature; God, I fear, will blessour endeavours the worse for them; they are like trees that carry no blossoms in the

fpring, and therefore no hope of any fruit at the fall.

This work is unspotted, and pity it should be defiled with the fin of avarice; his majefty's greatness and glory will appear by it; for nothing can be to a prince more royal, than to make the state of his kingdom better than he found it; or of evil and shothful servants, to make them profitable to a commonwealth.

This shall suffice for so much as concerns our manner of fishing, our commodity arising by fishing, and the use other nations make of our fish, which I have divulged to many of my intimate friends; and now shall sollow other matters, still concerning the subject of fishing: And the first shall be touching salt and cask.

Concerning Salt and Cask.

The next necefary thing we can endeavour and labour to advance our fifhing by, without being beholden to other nations, is falt and cask; for in my former narration I have fhew'd, that most of the materials belonging to our fishing may be found in *England*, except falt, pitch, and tar; and to take fifth without falt to fave it, is like choice of meats and no cook, or others to dress it; for both putrify without present help.

Such faits as are for the use of fishing, are of divers kinds and strength, some too hot and strong, others too weak and faint; and therefore if a mean betwixt both could be invented, and made within his majesty's dominions, we might esteem it a great jewel, and next in value to the philosopher's stone, and the finder out of the secret to deserve as great honour of his country as William Bacalute, who was the first deviser of packing of herrings amongs the Flemmings, as in my former relation I have declared.

There are many, as I am informed, at this day, who make trial to attain to the art and fecret of making falt; I mean with the convenient strength for the falting and pickling of fish; I do not speak of the making of our white salt, long practised in England and Scotland; for that kind of salt of itself is not for this use, and yet not bad, if according to the quantity it be mixed with the stronger salt; for it makes a sish the whiter and better to the eye for

Those that undertake this work and invention of adding strength to falt, above our ordinary white salt, must have a care of the place they choose to make it in; first, for the conveniency of the taking it off by fishermen when it is made; secondly, such a place where the salt water hath no mixture

with freshes or funds; and thirdly, where they shall find plenty of fact for their purpose.

The first practice that was made of it was in the life of Wight, a place, in my opinion, ill choten by the projectors; first, for uttering of their falt, if they had brought it to perfection; for the greatest quantity they could vend, is at Tarmouth in Norfolk. and the coast towns thereabouts, to the northermost part of all Scotland ; which was almost as great a voyage as to bring it from

the coast of Britany, where it is made.

Neither had the west country any advantage in the transportation; for that all the ports of Dartmouth, Plimouth, and all parts of Severn, which only use the fishing of Ireland and Newfoundland, shall be easier and more conveniently ferved out of Britany with falt, than from the Ifle of Wight ; Southampton and Portinouth alone would receive benefit, by reason of their nearness; and not confiderable, in respect of the little

fifthing they ufe.

The Isle of Wight was a place as ill chofen, in respect of the brackishness of the fea, and fearcity of fuel, in comparison of the northern parts, that can be fupply'd with coals at an easier rate; and for proof of the freshnels of the sea, in comparison of other feas, thefe are my reasons: where two lands make a streight so small, as betwixt England and France, and both the kingdoms fend forth many fresh rivers which fall into the fea, the fea cannot have fuch force of strength or saltness, as the northern coast has, where the ocean comes pouring in upon them.

We see by experience in Holland, that the falt they make, is not with the water that comes near those towns where they make it; though a man that knew not the contrary would fenfibly think it had fufficient faltness for that purpose; but they find it otherwise, and have ships purposely made to fill themselves with the salt water off at

fea, and not near the land.

A 1 if the Hollanders make fo great a profit as they do, by their falt, imagine what we shall make of it, when we have obtained the use of making it, considering our water by proof is falter, nearer hand, and our coals at a far cheaper rate, if our works be fet up at Yarmouth, Lynn, Boston, Hull, Tinmouth, the Holy Island, and all the parts of Scotland; in which harbours our fishermen either dwell, or will refort thither daily for falt.

Therefore I conclude, if the perfection of the work may be brought to pass, either in making falt of fufficient strength, out of invention; or if not, in imitation of the Ilollanders to make falt upon falt, the towns aforefaid are the meetest to set up that trade

of falt; and the rather because they have now in practife the making of white falt, and the other will be the fooner effected by it.

And for fuch falt as shall be used in the Learn there is no place lies more conve-, the making of fab of any kind, that ifland, the fea having an extraanary faltness, and the country afford-

ing fo great plenty of fact.
The Figlish and Switch fishermen that shall use that fishing, shall find as great, and as extraordinary profit and gain, by receiving their falt at the ifland when they shall there arrive, the brought of their thips will come to: fer white they use now to bring in their thip the best part of their lading in falt, finding, the soft anderendy to their hands, inflant the tree field lade themfelves with cank, wanting for their ufe.

Salt upon falt is made out of elegan with of falt that cometh out of other out France fends out the greatest part of the and according to its ftrength, the fall it makes is of less virtue and operation, and the more of it is fpent in the falting of fish.

The Portuguele and Stanilo falt is the stronger in substance, by reason of the sun's power; for according to the heat and force of the fun, falt increafeth in ftrength.

To the fouthward of Spain, and as far as cape Verde, and the island of May; as also weltward from thence to cape de Ray, and other places in the West Indies, the falt is far stronger than in Spain, by reason of the force of the fun and it will make double falt to the other.

But whereas it is alledged by fome that know not what belongs to the bufinefs, that the going fo far, as to the places aforefaid for falt, will not quit the charge : to anfwer that objection they must know, that if profit arise by this trade, it must be in the built and bigness of ships they imploy; for I would not advise a ship of less than three hundred tons, but as much bigger as they pleafe, to be fent upon that voyage; and fuch ships to be provided out of Holland, till we get use in building them; for they will fail with two thirds lefs men than ours.

And moreover it is to be confidered, that the falt they there fetch cofts nothing; for it is there naturally made of the fea water and the fun, and nothing is required but their labour and pains in bringing it aboard.

If we hit of our falt-making in England, it will prove a great benefit to us; for the king off France, and the king of Spain, lately finding a necessity for all nations to take of their falt, have laid a gabel and custom upon it, and thereby increased the price so much, that we and all Europe be-

in Wales. After this work is fettled and brought to perfection, I advise there may be an equal carriage of it, betwixt the buyer and the feller, that they may both live with an indifferent profit and gain; and fo to accommodate it, that the buyer may be certain of the price; if not, this inconveniency will follow, That the falt-mafter will transport the falt beyond fea, where it goes at the greatest rate: like corn-masters, if they were not prohibited by a law, not refpecting the good that would redound to their country; fo much is their covetuous defire of profit: but being bound to ferve the kingdom at a certain price, and that we shall find no want or scarcity of it, let them after have liberty to dispose of it for the

ing, charity flould begin at home.

There must be a penalty also upon him that will buy or be furnished with falt, under colour of fishing, and shall notwith-standing transport the same into any parts beyond the seas, or otherwise, for his private gain. As well this abuse, as many others that can be imagined to creep in, must be foreseen and prevented.

best benefit; but according to the old fay-

According to the ftrength of our falt, you may rate the quantity that goes to the falting a barrel of herrings, and so estimate it from one barrel to one hundred last, viz. a weigh of salt is forty bushels, and every bushel will salt a barrel of herrings, so that twelve bushels will salt a last of herrings, being twelve barrels of thirty two gallons to a barrel. A last of herrings is two tons after the English account.

And if you can bring the falt to the proportion of three pounds ten shillings the weigh, it were a price indifferent betwixt the buyer and seller; yea, though you proportion the Spanish salt at a greater price, and our white salt at a lesser, yet, if betwixt both it may be rated equal, as I have faid, at three pounds ten shillings the weigh, it were very well.

The fame proportion of falt you must use to the cod, viz. a bushel of salt to a barrel of cod. And as for ling, it is not to be barrelled up, but to be salted in bulk, which will take up much the less salt.

Vol. III.

The next confideration about our fishing, is, How to make our provision of cask, as well for herrings as for cod; the greatest quantity which furnishes the Hollanders, is brought out of Norway, Seveden, and other parts of the Sound, which they return in their ships, after they have made fale of their fish in those parts.

The same course we may take, if we be so pleased, or that we cannot return a better freight for our ships: but we have an easier and a nearer way to be supplied with cask; for no country of Europe affords better provision of timber, or ash to make them, or more conveniency to transport them to what coast soever we shall sish on in his majesty's dominions: this benefit we enjoy above the Hollanders, who have not in their country one whole timber-tree for this purpose, but are served from abroad, as I have formerly said.

All kind of wood that belongs to the building of ships, or other works that have relation to timber, we do, and shall find, in a little time, a great want of; for wood is now utterly decay'd in England, and begins to be no less in Ireland, if there be not a speedy course taken to redress it, and a prohibition against the transporting of it out of Ireland into Holland, which the Hollanders make a continual trade of, not only of timber, but also of 'I other commodities Ireland affords, greatly to the prejudice of the English; and for the better proof thereof they have erected a company in Amsterdam, by the name of the Irish Company.

And therefore I would to God his majefty would take thefe things into confideration; as also to restrain the felling of timber in England, which is too common by the liberty that is given to widows, to fell and fell without impeachment or wafte; and to young heirs, after they come to possess their father's lands; for the readlest monies they can think on towards their wasteful expences, is a fale of timber; and whilft this is fuffered, and no provision for preferving or planting of trees, as the law provides for in that case, what can be imagined will fall to England hereafter in fucceeding times? for if money, or wealth, decay in a kingdom, there may be means by trade to recover it again; if feamen die, so long as there are ships and navigation, they will foon increase, and make their deaths forgotten; but if our timber be confumed, and spent, it will require the age of three or four generations before it can grow again for use; which we ought the more to respect, because the English timber far exceeds the Iri/b in lightness and good-

6 G

Though

Though the carriage of ship-timber be prohibited, and as daily executed, yet there are divers abutes that must be looked to and prevented, as well in this kind of timber, as in vent of our own red herrings; the deceits whereof, betwixt the English and the Hollanders, combiners, you shall understand by this that follows.

The Hollanders have gotten a late practice, by their inwardness and friendship with some men of Yarmouth , (for naturally that town is more inclined to Holland than England, as descended from thence 1) these English dwellers take upon them the building of fhips, according to the direction of the other, who underhand disburfe the money ; and the ship being built, the English in thew make fale of her to the Hollander ; when his title in the ship is, perhaps, thirty pounds, to colour the deceit. are many other things to be proved, that upon examination would discover many abutes offered both to the king and fub-

These combiners stop not here, but crastily avoid his majesty's proclamation; for whereas, as I have formerly delivered, the red herring is only made in Tarmouth, and the Hollanders have in a manner the absolute carriage of them into the Streights; and although the state is many times willing to prevent the carriage of them by strangers, yet craftily they use this policy, speedily to fend away the herrings in English vessels to Holland, as foon as they are made, from whence they immediately ship them for the Streights, before our great ships can take them in at Yarmouth: other times they meet fuch ships as come from Tarmouth laden with herrings, off the fands of Tarmouth, where they ride, take them in, and carry them directly to the Streights many days before ours can be ready at Yarmonth in our great ships; by which advantage of time, they get their port, and make fale of their herrings, long before our arrival there, and fell them at a double price to us at our coming, to an ineftimable lofs, both to his majefty's subjects and to his customs, as I have faid before; by the precedent of a ship freighted from Yarmouth to

And therefore to avoid this cunning and cozenage, it is fitting his majesty prohibit the transportation of fish, except in his subjects bottoms, and a day to be limited for the transportation, that we may be sure to be near our port, before the strangers can follow us out of England; fo shall we be fure to make our market before the strangers can depart England, which will be a great advantage

Marseilles.

As this deceit appears in the vent of our red herrings, fo there is no let's an unconfeionable courfe held betwixt the Hollanders and English fishermen, that take the pilchards and poor-john, the one in England, the other in Newfoundland, for fuch is the neceffity of the poor fishermen, that they receive imprefs of part of their money beforehand, to perform first conditions they are bound to, much to their prejudice, and the Hollanders advantage , whereas, if the English had the absolute carriage of fish, they would attain to the fecrets of that trade, and deal more reasonably with poor men than the others do.

I have before in this book computed the value of fixty ships, of two hundred and fifty tons each, what the Hollanders gain by the trade of our fish into the Streights, and not one penny thereof returned into England; and for a more authentick proof, I defire that merchants may be examined upon the truth thereof, and then you shall find my computation to fall out right; and for your better fatisfaction, I will fet down the feveral ports within the Streights, and the number of thips that repair to them; by which it will appear what lofs this kingdom has for fo many years fuftained, and what gain and profit may be made by it, if it be reduced into our hands; befides the ftrength of ships, the increase of mariners, and same this nation will reap by it.

An Estimate of what went before.

A ship of two hundred and fiftytons, will carry, in fish, to the 1600 value of Freight for the same, at 5 l. the? 1250 Affurance, 5 l. per Cent. 80 Charges at Venice at the least All this is loft by the ftranger's carrying of it, and (calculating fixty ships after this pro-621750 portion, there is loft the fum

Twelve for Venice; eight with pilchards, four with red herrings.

Four to Ancona; whereof three with pilchards, one with red herrings.

Six to Civita Veccbia. Six to Genoa. Eight to Naples. Twenty to Legbern. Three to Villa Franca.

Forty fix to Marseilles, whereof thirty with dry fish.

In all one hundred and five thips, belides many more fmaller for Spain and France; as I have shewed.

Here

Here shall follow some indirect dealings of the Hollanders, which I forbore to insert in the former ditiourse of fishing, and shall be inserted at the end of this book, calling it an addition to my sixth book; but I will still prosecute the subject of fish and sishing, and will not cease till I have laid open every coast of the known world, whither sish reforts, and shew the benefit that is or may be made of it, as well by the inhabitants as strangers.

Concerning Fift and Fifting.

There are two natural foods for man to feed on; the one is fleft, maintained and increafed by the fruitfulness of the land and foil of the earth; the other is fift, fwimming in the common, spacious, and open fea, which no man can challenge a right to, as to the land they may; and therefore it may be called common.

This fifth requires no head, as beafts and cattle do, to overlook them, or to keep them in their limits or bounds; no man can fet his mark upon them, to challenge a property in them: no body that cafts a net into the fea can fay what belongs to them, till it be drawn again: no difficulty or care can be required to nourith it, feeing there is fuch abundance increased over all the feas and coafts in the world, as experience teaches us.

The difficulty in making use of this food is in the taking it, which is done by art, engines, and pains; for unless the prerogative of princes in some cases, and upon some coasts, prohibit the sufferance of taking fish, it is as lawful for a beggar as a king to challenge a right to it, after it is taken.

The use of fishing and the benefit that arises by it, needs no other repetition, than in my former declaration.

There now only remains my labour and observation to collect the forts of fishes every country affords, and which are used for present food, and which are fent abroad by way of trade; and then I will refer it to consideration, what penury Europe, which is the most slourishing part of the world, would be brought to, were it not for the endeavours and labours of the poor sishermen.

Befides the general fishes of herring and cod, taken upon the coast of England, Scolland, and Ireland, and vended as in the narration aforesaid, there are many excelient fishes upon every maritime shire in England, which are of great sustenance to the inhabitants, and which I forbear to name, but will fet down only such fish as is vended abroad, and returns gain and commodity to the kingdom by way of traffels.

As the northern parts of England yield both cod and herring, as aforefaid, so do the western coasts pilchards in such abundance, that many times they are not able to save the third part of them, for want of falt, as appears in the last wars with France.

Ireland affords these three kinds of fisher in as great numbers as England; and the herrings and pilchards exceed ours, which makes them valued above the English in other countries. They have another fish which frequents not our thores, called the hake, taken in the deeps betwixt England and Ireland, much prized in Bistav: they have plenty of kay, or thornback, and buckorm, which is dried whiting, much defired in Britany.

The feveral parts of England have feveral feafons of fifthing, some whereof I have shewed; but will add to it our fishing at the Sow, a rocky ground, a league and more in length, and fix leagues fouth off at feato Rye. This is the principal place that yields that primest fresh fish that ferves London, and the place France did lately incroach upon, under colour of five boats licensed by king James, at the request of the French king. But his subjects increased almost to as many scores as boats, till by order of the state, I reduced it to the allowed proportion, as is to be seen in my second book.

Upon the coast of Lancashire, the fishing for cod begins at Easter, and continues till Midsimmer; for hake in the deeps, as I have said, betwixt Wbissimide and St. James's about Padstew for cod and ling, from Christmas to the middle of Lent; on the north part of Ireland, from Christmas to March.

Englishmen have not the use of barrelling up of cod; and if it be not barrelled, it is not vendible in France; neither can they make haberdine; for if they could, it would be well fold in Spain and Portugal.

Now to the fifting upon the coaft of Holland, France, Flanders, Portugal, Spain, and other countries, where the sea affords fifth, but no great use is made thereof, more than for present food; for neither lerrings nor cod are there to be found, which are the staple and vendible fish for profit.

The coast of Holland yields the least quantity, and the worst choice of fish of all the rest; and yet fish is there most eaten out of necessity, having so many people that inhabit the country, and so little quantity of land for their sustenance. The greatest store of fish that maintains them is taken upon our seas, and kept in well-boats, and brought into Holland, where it is vended and fold.

Coming upon the coast of France, the rareness of it, and coming so far; and yet first town you shall find to entertain you, will be Calais, which in truth exceeds all other places of that kingdom for the prefent food of fish; not that they are such tifhes as I have named before, either for quality, for quantity taken, or provision to take them; for their boats are only shallops, not above a ton burden, unless it be in October, when their bigger vessels resort thither to take the last shoal of herrings that comes from the northward. And it happened in the year 1610, that fifty fail of those vessels were funk, and eight hundred people in them, as they were there

If you keep along the shore of France till you arrive at St. John de Luz, the furthermost part thereof, it affords no other fish, but for prefent spending, except at some time of the year that they falt their spare mackrels, which at the time of the year

they take.

Biscay is like France in the nature of fish, and fishing upon their own coast: but what profit either of them make by their fishing upon the shores of America, I will after shew; only I must say, that Biscay is often visited with monstrous fishes, as whales and grampoiles, which none of the rest I have spoken of are, in abundance, which yields the taker of them more commodity by the oil, than the value of other

The next in order is Galicia, and Portugal, as far as cape St. Vincent, the fouthermost promontory of all that coast, or of Europe. I will join them in one, because they are all one continent, and subject to one king. They both afford fish alike in a reasonable quantity, but especially of pil-chards; and here they are so excellent above others, and so necessary to the people of Portugal, that the country had better want their East India trade, than their fishing for pilchards upon that coast.

Doubling the cape of St. Vincent, you tend east, as far as the Streights of Gibraltar. Besides the fish these seas afford to equal the rest of Portugal, it is haunted with a fish called Tunney, a victual of great use, in that it is pickled up in barrels, and serves for fea-store, besides a great quantity that is transported into the Streights. The custom of this fish is worth in value to the duke of Medina Sidonia, forty thousand pound ster-ling a year. The fattest Tunney is near Gibraltar.

After you enter the Streights, that fea cannot be compared to the others, neither in quantity, nor in goodness of fish, though one kind of fish they have, which the others have not, which is anchovies, effecmed for a great dainty amongst us, because of the

I think our fprats and young herrings in England might be made to equal them in tafte.

In returning out of the Streights, we will keep the coast of Barbary westward, as high as cape Canteene, in which circuit there is very little fish taken, though no doubt but the fea affords as good fish as upon the christian shore, opposite to it, but that the Moors are no fishermen, nor have provision or harbours for it.

The christians enjoy all these sports, except Sally : fo that if the Moors had conveniency of fifthing, yet the christians would have hindered them, that they should have

reaped no benefit by it.

From Canteene to the fouthward there are two roads upon the coast of Barbary, Sasin, and Santa Cruz; and in the middle betwixt them there is a small island, called Morothore: but no manner of fish in any of those places, nor vessels for that pur-

To the fouthward of Santa Cruz, there is plenty of hake taken by the Spaniards, who go purposely out of Spain thither to fish: somewhat I can say hereof, by proof of a bark of mine that was freighted from Seville, and fitted with falt, hooks, and lines, and made a good return of her fish in-

to Spain back again.

To the fouthward of this place, and as far as cape Blanco, the hithermost part of Guinea, there is an excellent fishing for porgus, fomewhat like to an over-grown feabream, but much bigger. There are yearly employed out of Spain fifty or fixty veffels, called canters, upon that fifthing only; and if they escape taking at their return, they make commonly a good voyage. The only inconveniency is, That upon that coast the winds hang continually betwixt the north and the east; so that many times they are forced to run a westerly course as far as the islands of Tercera, which makes the voyage the longer and more dangerous for meeting with the enemies.

From this part of Guinea, to the fouthermost place thereof, which is the cape of Good Hope, the coast is inhabited by negroes, except it be in fome few places, where the Pertuguese have their aboad; but the negroes are fo ignorant in fishing in boats, that they know not what belongs to it, though there is plenty of fish for food, if fishing

were exercised,

It is an old faying, That there is water enough in the fea, but of no use, because of the saltness; and Fish sufficient in the ocean, but not possible to take it. The greatest store of fish for food is upon coasts, eipecially islands, where they have space to fwim about it 3 or in fhoal water, where ; and yet

dangerous for to the fouthers the cape of ed by negroes, ces, where the but the negin boats, that to it, though od, if fishing

there is water fe, because of u in the ocean, The greatest a coasts, espenye space to water, where a line a line may reach the bottom; for in the main and large ocean it's impossible to find ground with all the lines you can lengthen. Yet in the hot and fouthern feas, there are these kinds of fishes for food, which swim high, and sometimes appear above the water, (viz.) the dolphin, the bonito, the dorado, and shark; the last whereof does not spawn, but whelp like bitches: she is ravenous, unwholesome to eat, and so eager upon a bait, or a thing she shall snatch at, as I have known them bite a man's leg and thigh away at a bite, as he has been swimming. These sishes are taken with harping-irons, fishgigs, and hooks made purposity.

Befides these fishes, which are good suftenance to long voyages, there are also flying fishes, but never taken but accidentally, when they are chased by the dolphin, and forced to put themselves to flight; but as soon as their wings or fins grow dry, they may by chance light into a ship, for longer

they cannot fly.

There are no iflands to the fouthward, great or finall, beginning with the Tercera's, the Canaries, cape Verde, all the iflands of the Well Indies, the Rermuda's, St. Hellena, &c. but have great flore of fifth flocking about them; but the leaft number in all the feas, is betwixt the two tropicks, where there is no use made of them, for want of harbours, fear of enemies, and other inconveniencies. Such fish as are taken about the island of St. Hellena, or the coast of Brasil, the next westerly land to it, have a virtue above all fishes for delicious taste and wholesomeness, in both equal to the best steff with us.

Having followed and chafed the fifth as far to the fouthward as any known land has given light, let me once more return to know what the northern feas and the islands yield in that cold climate and habitation, and we shall find it a great proportion for the food of man. The fifth more naturally desire the cold and northern seas, than the hot and fouthern shores, where the sun has so predominant a power and heat.

And to begin with the northern parts of Europe, I will arrive at Denmark, Norway and Liefland, whose coasts abound in fish, as well for their own food, as for sale abroad: I will call it food to them; for in many places of Norway and Finland it serves for bread to the inhabitants, after it is dry'd in the frost, and made stock-fish.

Now let us leave these shores, and stand over to the islands placed in those northern seas, a great many whereof belong to the crown of Denmark; as namely Northsare, containing thirty in number; Frizeland, Iceland, and others. And it is a marvellous Vol. III.

thing to fee with what abundance of fifth they are frequented, and what a number of fhips refort thither to take them, and after to vend them: for to speak of England alone, there go yearly from the northern and eastern coast one hundred and fifty ships, which imploy two thousand five hundred feafaring men, that upon all occasions are ready to serve their prince and country.

All these trades aforesaid are not to be told like new flories, to breed wonders; for time has approved at ever fince those lands have been known to us : but as God gave a new light of a new world by the discovery of America, now daily known and frequented by us of Europe, and whose foil yields benefit to the christian world; fo did that God, that was the maker of the land, fhew himself the same God, in pouring forth his bleffing upon the fea, by the riches and increase thereof, wherein England had some honour thereby in the discovery of Newfoundland, that fince proved most commodious to the commonwealth, and most especially to the western parts thereof, by their yearly imployment of two hundred fail of thips thither.

The French, the Biscainers, and the Portuguese, were so much encouraged at our discovery of Newsoundland, as from that time, till this very day, they have upheld the trade thereof, by the fish they call Baccallao, and we Poor-John; but by our continual haunting that coast, we have found an inconvenience alike, that the fish grows less, the old store being consumed by our

continual fishing.

The Biscainers not being contented with this trade, where they found so many neighbours to join with them, went farther to the northward, and possessed themselves of a harbour which they named the Grand Bay, where they find, besides their Baccallao abundance of whales, where they make more advantage by their oil than of the other.

The French being desirous to try experiments, as well as the Bifcainers, found a fishing-land fifty leaugues off to sea from Nevopoundland, and called it the Bank, where commonly they make two voyages yearly, without resorting afhore to dry their fish, and therefore it is called wet-fish: and this I hold one of the best means to maintain their mariners in all France; which, if in time of war we seek to beat them from this fishing, we shall find them but indifferent enemies at sea.

The *French* alone, and no other nation, have continued a footing in these countries, though we have often attempted to do the like, and failed. But in the late years of our wars with *France*, in 1628, we took their port, and possessed it fome time.

The English have had more absolute trade to Newfoundland, fince the year 1585. than ever before; for in that year the war broke out betwixt Spain and us: whereupon the queen fent certain ships to take such Biscainers and Portuguese as fished there; a fervice of great confequence, to take away the thips and victuals from our enemies subjects; and fince that they have almost abandoned their fishing thereabouts. Out from these men thus taken, and brought for England, came the great fickness that the judges and justices died of at Exeter.

Going fouthward from Newfoundland, the English have had a new plantation, by the favour of the fea, that yields them great ftore of better and a larger fort of fish than the other coast does; only it is too thick to dry; and therefore not to be vended in the Streights, or the fouthernmost part of

As you fail from thence farther to the fouthward, though it be as far as the Streights of Magellan, you shall find all that coast in the nature of the shores of Africk, as low as the cape of Good Hope, both in the condition of the fish, and in taking it : but fomething I will fay of strange fish found in the West Indies, and the coast of Brazil,

not known to us in these parts. There is a fish in the West Indies called the Malatia, that has a stone in its head the most fovereign remedy for the cholick in the world.

The tortoife, now familiar to us, by our usual navigations into the Indies. They lay very large eggs, and a great quantity together, which are hatched in the fand by the heat and operation of the fun: the young ones as foon as hatched creep into the

There are many fword-fifnes and whales. betwixt whom there are frequent battles, as I have shewed before.

The whales upon these fourthern coasts are more furious and dangerous than in the northern, though the northern be the bigger, but not fo nimble with the tail, which is the peril of the whale; for if a boat come a-head of her, the cannot do much hurt, but in rifing from the bottom, as I have shewed before.

There are many venemous fishes upon that coast, as, namely, the toad-fish, of no fmall bigness; taking it out of the water it snorts, and poison lies in its skin, and whofoever eats it with the skin dies.

There are other fishes of the same nature like toad-fiftes.

The P. rachie is like a fcate, and whofoever toucneth it has the palfy, or is benummed; the Camaruma, the Amoriatie, the Anicurub, the Irepourungo; besides many others that are venomous.

There are many mermaids and strange shell-fishes, as well those that are known to our coast, as others unknown.

I have feen a fish very monstrous in the island of Flores, that appears with its fine about the gills, above the water four or five yards, and its jaws gaping above a yard broad, which puts the beholders in fear. This kind of fish I never knew nor heard of but in that place.

Something concerning Whales, and several forts of Monstrous Fishes.

And now another while I will speak of monstrous fishes, that are useful and profitable, but not to be valued or eaten for food, and these they are: the whale, the grampus, the porpoise, the sea-horse, the morse, the seal, \mathfrak{S}_c . All these affords the commodity of oil which is made of them, when dead; and the manner to kill them is fo commonly known, that I need not repeat it. The whale yields, besides her oil, bones, which are for divers uses, imploy'd in feveral trades; fhe yields Sperma Ceti, the virtue whereof is known to us, and is fold by apothecaries. Some are of opinion that the ambergreafe comes from the whale, and is cast ashore where it is found.

Some there are likewife that believe the teeth of the fea horse are medicinal; but for my part I believe the contrary, and that the only use to be made of them, is for hafts of knives, and other works that ivory is put

re it lies by its ness, taste, and found upon the re also in abun-

und. that believe the nedicinal; but for ary, and that the m, is for hafts of hat ivory is put

The whale and most of the other fishes are as frequent and common in the hot and fouthern climates, as in the cold and northem countries, though we only use the cold, as Greenland, where we kill and make great benefit of them.

The European shores have the least number of whales; which I impute to sholewater, because the greatest quantity known are about the great bay of Biscay, from which place we were instructed in our whale-fishing, when we began it in Greenland.

The whales that are found dead amongst us, of which I have had fome proof by one or two cast upon land, come dead ashore by fome burt received at fea; for the nature of the whale, after fhe is hurt, is to feek the land, where she leaves her body to enrich him that has right to her, by her coming upon his shore.

Befides the great number of whales that make their habitation in the north feas, and the farther northward the greater store, there are abundance of them upon the coast of Brafil, the West Indies, and Guinea, which may the better appear by the Indians conceit, who thought the first ships they saw, when the Spaniards came thither upon the discovery, had been whales.

Upon the coast of Brasil there are such abundance, that if the Portugueje who dwell there would employ themselves in killing them, it would prove a commodious thing; but, I conceive, the reason they put it not in practice, is the mass of gain they make by their wood and fugars, holding the other not worth their labour, and having no vent for it but in Portugal.

By this you may perceive the pains and industry of man, and the difference betwixt men and nations; for if the Hollanders were planted in Brafil, and had that benefit of the whale the others have, they would, and might very well, with their cheapness of freight, ferve Europe with their train-oil from thence; for I remember that two ships of Holland went to Saldanna's bay, as far as the cape of Good Hope, to kill whale, (for upon that coast there are abundance;) but it happened that one of the two ships was there wrecked, which perhaps might difcourage farther proceedings upon that

But if we consider the industry of the Hollanders, and compare it with the floth of the Portuguese, that the Hollanders went two thousand leagues to lade themselves with train-oil, when the Portuguese might have done the like at their own home, and rejected it, we must consequently attribute as great praise to the one, as we may blame and floth to the other.

There are many dangers that may happen, and have happened to ships, by their accidental meeting with whales at fea, fome whereof I will mention upon my own knowledge. The nature of a whale is, when the receives a hurt, to feek the bottom of the fea, and with fury to rife up again, and shew her felf above water; if in rising she chance to come under the keel of a fhip, fhe utterly destroys the ship, and the men in her.

I remember, that being upon the coast of Barbary, and not far from a whale, in 1587. I faw her mount above the water as high as the top of a ship, occasioned, as we conceived, by the fword-fish, who is an encmy to the whale, and upon their encounter cunningly gets under the belly of the whale. and with his fword vexeth, and forceth her to mount above the water, as I have faid: this whale, upon her falling down again into the water, made a greater noise

than the report of a cannon.

A whale in a calm betokens foul weather; for there cannot be a truer fign of a ftorm, than whales and porpoifes playing upon the water. It happened in the ship in which I was taken prisoner off the Burlings, in 1591. the day sevennight before my taking, in the night-time the ship gave stem to a whale that lay assep with her back above the water; the accident was fo ftrange and rare, that it amazed the company, who gave a fudden shriek, thinking the ship had been founder'd upon a rock; but looking over-board they beheld the fea all bloody, which comforted them, conceiving it to be, as they found it was, a stem upon a whale.

In the year 1589, being at the islands Azores with my lord of Cumberland, after our overthrow at St. Mary's, as I have fhew'd in my first book, and have had more particular occasion to speak of it in my fifth book, to bring this for an example of the greatest hazard I ever endured in my life, occasioned by a whale there, as you shall understand; to which place I refer you, because I will not be too tedious in this discourse.

In the reign of king James there was a thip of Portsmouth, the owner thereof my good friend, captain Towerson by name, who in her way, in company of other ships, to a fishing in Newfoundland, gave stem to a whale as fhe lay afleep; the ship had all her fails drawing, and a large wind, but for want of the company's looking out, fhe gave fuch a blow to the whale, that she prefently founder'd; but by the help of other ships of her company the men were preferved, who otherwise had perished.

Many other accidents of this kind have happened to fhips, which I need make no

repetition of, they are fo common; and this shall suffice for the subject of fishing, as well for food, as others that yield the commodity of oil.

I will speak little of the mermaid, because there are diversities of opinions: some think there are none; others that there are, though there be little doubt thereof; for we shall find in the year 1322. in our English chronicles, one taken in England, another in Holland, and a third in Britany; for the reation whereof I refer you to the authors aforefaid.

There is a tradition to this day in Galicia, one of the kingdoms of Spain, that a mermaid coming out of the fea, engender'd with a woman afhore, and begat on her a child: and to fpeak of later times, I fee divers have feen them, who are now alive, and can justify it.

There are other strange fishes to be seen on the coast of Norway, and especially in fixty eight degrees of latitude, which are very wonderful, besides the great dangers and other particularities belonging to that fea, more than any other yet difco-

In the country and height aforefaid there is a well called by the name of Neal-stream, which well draws the water to it with an in-drought, and with fo great a fore-noise and dread to the hearers, during the time of the flood, which is fix hours, that it is to be wonder'd at, above all wonders a man can report.

The force and violence of this flood is fuch, that its power reaches two miles about it every way; fo that if a ship or vessel happen to be within that compais, it draws her into its bottomless gulph, where she is

fwallow'd up, and perifhes.

The ebb has the contrary effect, which endures the faid space of fix hours, and fets off with the fame violence the flood draws to it, infomuch that it will not fuffer the heaviest thing that can be thrown overboard to fink. At this 6bb the fishermen use to take away many sorts of strange de-formed fishes, not seen elsewhere upon any coast whatsoever; one whereof I will take special notice of, which has been avowed to me by a very fufficient man who faw it; it is like an cel, and one hundred fathom long, which has fometimes entered a boat on the fide, and paffed through her on the other fide; and if it be cut afunder, which a knife may well do, it casts forth the greatest stink in the world, and enough to poison a man that smells it.

Some are of opinion, that the stream passes under the ground through the parts of Norway, and bursts out again at the northermost part of Finland, where is another Neal-stream, though not fo violent or dangerous as this, and where the fame kind of fish are taken as in the other afore-

This place is called by fome the Navel of the fea; and fome think the ebbs and floods upon all the coasts on this fide the equinoctial are caused out of this miraculous Nealstream. I fet this down but as a conjecture. not to be rely'd on; for the fecret of ebbing and flowing is only known to God. and not to be apprehended by man; and fo the philosophers acknowledge.

There are other dangers appearing upon our coast, but not so terrible and fearful as those of Norway; and for which, there may be reasons given, (as namely,) the race of Portland in Dorfetsbire, the race of Conquet in Britany, the race of Lyons in Italy; and I have feen another, not much inferior to the least of these, at the isle of Palma in the Canaries.

That of Portland has been the destruction of many a ship and man, though it may be avoided, either by going within it towards the land, or without it to fea. The ship of war wherein I went the first time to fea, in her return from the coast of Spain, in her fecond voyage after, where she had made a profitable voyage, taking fundry Spaniards, as her lading would have witneffed, out of a covetoufness to gain a league or two, though the might have eafily avoided it, put herfelf into the race, little valuing the danger, and was prefently fwallowed up in view of her conforts, and neither man nor boy escaped.

The cause of these races that makes the bubbling and turning of the water and freams is the meeting of tides, and the foulness and rockiness of the ground, which makes that space of the sea, where this happens, to boil up like a pot upon the fire.

There are other places where the tide fets with wonderful force and fwiftness, as well upon the ebb as flood; and namely, Pintley Frith, which divides the whole continent of Britany from the islands of Orkney: I have paffed it, and found fuch admirable tides, that I was amazed. I have heard people thereabouts fay, that the force of that cide is fuch, that if a fhip chance to anchor in it, and the cable and anchors hold, the ftrength of the stream is so violent, that she will be swallowed up at an anchor.

In the island of Orkney joining to it, as also upon the coast of Norway, the tide sets with that force, that he who knows not the nature of it will be afraid to approach near the fhore; and yet experience tells us, that the tide fets from the land, and keeps a ship from running on shore.

The

The fea produces many other strange things of nature, which I forbear to repeat; but the thing I covet to know, is what wonders the fea produces under the north pole, not yet attempted by any nation, though the English have approached near-est it, fince the discovery of the island of Greenland, whither they refort to kill their whale.

Philosophers mention four indraughts in the ocean fea, in the four quarters of the world; from whence many conjecture, that as well the flowing of the fea, as the blafts of the wind, have their original: but these being mysteries above my capacity or reading, and nothing tending to the subject of fishing, which at last I have brought to an end, I will draw to a conclusion of my whole fix books, making account, after a long and tedious navigation, I am at last arrived in a fafe and fecure port, where I have leafure to recollect my felf, and think of my errors past, in taking so great pains to fo little purpose, as to write so many lines and leaves of the fea only, few gentlemen delighting in it, or making profession of it: but before I end, as in my former navigation I have fpoke of the profit of fishing, I will fet down the enemy to fishermen and fishing in this that followeth.

There is no action at fea, be it great or fmall, that brings not with it both charge and danger; nor no business so easy that can be done, without pains and difficulty: and this subject we are now upon, that is, fishing, the only thing that is required in it, is labour and pains; for danger is little to be regarded, confidering it is not far from home we are to feek our profit, nor our harbours fo few, but they may be entered for our fafeties both day and night, by erecting

But indeed the greatest danger that may be feared to our fishermen, is interruption of pirates, who are the very fcum of a commonwealth, and people to be abhorred by all honest and laborious men. It is usual, when these miscreants fail of relief of victuals, and are made desperate by want of it, to place all their hopes of food upon the poor painful fishermen, who, we may truly fay, get their living with more hazard, with more pains, with more cold and watching, than any other trade or people whatfoever: their labour produces nothing that is ill, but the best help for man, which is food to live on.

Husbandmen and fishermen are the upholders of commonwealths; all other people live by their labours. They are flewards to provide fustenance to feed on; and yet comparing them together, there is great difference betwixt their lives and pains : the hufbandman's work is without danger or ha-VOL. III.

zard; and if he be wet, he has prefent help of fire to dry him; he is allowed a bed inflead of the other's board to lie on; his diet is certain, and in a quiet manner, when the others are tost to and fro without a stedfast standing: if the one be cold, he may recover himself with exercise and work; if the other be cold, he is made colder, his labour being in cold water; the one keeps his certain hours for fleep, the other has no certain time to reft, but must attend his danger, which he is never free from: every hour he must be ready to look out for his shoal of fish, and watch his opportunity of weather and tide to take them: the one has pleafure on holidays, and is free from labour; all days are alike to the other; and the Sunday can give no more content or comfort, than the rest of the

What heart can be fo hardened, or pirates fo pitiless, as to disturb those harmless and innocent creatures, that make pains their pleasure, and their labour their countries plenty, procuring good for it by their own toils. And because such wickedness will never escape unpunished or unrevenged, as these pirates commit upon such harmless people, I will a while digress from the fubject I have in hand, and relate a strange and tragical accident that defervedly befel two pirates that were disturbers of the innocent fishing.

A Story of two Pirates.

After my return from Ireland, in 1614. where I had been imploy'd to suppress the arrogance and infolence of pirates, and where I punished the conniving that was betwixt those people and the inhabitants of that kingdom, I once again fent a bark for that coast, to be informed how things stood after I left them, and whether the fevere course I had taken against them, in doing justice by death upon one of them, wrought better effect than before.

The first harbour my bark arrived in, fhe met a pirate named Tucker, a feaman bred from his youth, and continual practice made him excellent in his art and profession: he was very glad upon this occasion of meeting my bark to infinuate into my man's acquaintance, thinking thereby it would be a means for him to bewail himfelf to me, and to obtain the thing next to life he defired, which was his pardon, though he departed with the best part of his spoils, which were things of good va-

His persuasion prevailed so far with my servant, that though his directions were to view the northern parts of Ireland, where I had lately been, and there to inquire after the behaviour of pirates, and the entertainment the country gave them; yet, as I have faid, by the importunity of Tucker, my man was diverted from his imployment, and perfunded to return with his letter of fubmission to me, on whom he wholly cast himself to dispose of, with promise there to stay a certain time to expect my answer; and to fweeten me the more, he presented we with a token worth accepting, but that I was always cautious in fuch cases how to connive at pirates, as in my letter I expressed. I mistrufted, before he could receive my answer, the winds then hanging contrary, he would depart from Ireland; whereupon I directed divers letters to one effect, and fent them by feveral ships, if they should chance to meet Tucker upon their way in their voyages. But as I have shewed the last refuge pirates have for victuals, is to feed upon the fisher-men; and Tucker finding that Ireland could not supply him, by the strict course I had formerly taken, was forced to go to the northward, to feek fuccour of the poor fishermen, a contrary course to the ships that carry'd my letters: and coming to the north Farro, there he met with another pirate of the same fort, but far less honest, as it proved. These two concerted together, as thieves use to do in mischief.

The islands of Farro are dangerous, by reason of the great tides, and their setting; and it happened that Tucker's ship was wrecked upon one of them, in company of his companion, the other pirate; who seeing it, did not degenerate from his kind, for all spoils were alike to him, friend or foe; instead of help in that case of distress, play'd the part of a hawk over his prey, and had no more pity of him than of a Spaniard, who were most obnoxious to pirates

in those days.

To be fhort, this pirate, who falfly called himfelf Monnocho, fuddenly poffeffed himself of Tucker's ship, himself, his wealth and company; and used them with that rigorous cruelty, as though his action had been lawful, and allowed by authority to punish delinquents and offenders, and rather out of fear than pity, he shewed mercy to their lives; and niftrufting if he should detain them in his own ship, they might make a party and faction; for the condition of fuch people, is never to be constant, or honest, no longer than their devilish humours hold; therefore to avoid any fuch tumult, Monnocho seized upon an English fisherman, amongst many others he had taken, and put Tucker and his company into her, to feek a new fortune; which you must think was like to thrive, if you confider their course of life. And here they parted company like two wolves

that should separate themselves to seek their prey, they care not where, nor of whom, purposing never to see one another, unless the gullows gave thema meeting. Monnocko was a fellow of as base a condition as his present profession made him, being not long before a surgeon's mate, in a pinnace ferving under me. And now hovering about those islands, it was his hap to meet a ship of the king of Denmark's, to whom the islands belong: this ship, after a little encounter, apprehended, and knew well what to do with him, so just that nation is to the detestable course of sea-rovers.

Here Monnocho found worse usage than he gave Tucker; for the time was not long before his ship made a return into Denmark, and in as short a while after he tasted deferved death upon the gallows; where he hung a spectacle for all men to behold.

Now Monnocho is brought to the defliny by right due to him; I will go fcour the icas, and look if I can fpy Tucker, being out of hope to find his ship put to that use for which she was first designed; I mean fish-

After Tucker had fpent fome time at fea, domineering over the poor fishermen; they now tired with the usurping tyranny of the pirates, and being defirous to live by honest labour, rather than by evil pains, privately practifed, and watching their opportunity, effected that they had determined to put in execution; which was, suddenly to surprize and feize upon the pirates persons, when they should least suspections.

The attempt proved fortunate; for fome they flew, and others they hurt; and Tucker they took prisoner, and insulted over him, as he had done before over them.

This lucky accident made the fishermen repair to shore, to supply their wants, their provisions being continued by the pirates; as also to deliver the men, as delinquents, into the hands of justice, who were after conveyed to the Marshalfea in Southwark, where they daily expected the doom of death.

The poor man, captain Tucker, being hopelefs and friendlets, fent me word of his misfortunes after his departure from Ireland, bewailing his hard hap and heavy chance, not to meet with any of my letters, written to him as aforefaid: He shewed the comfort of life was taken from him, and confessed his offences were above satisfaction; and that I was the only sheet-anchor he was to rely on; otherwise he was to perish.

I confess I was much moved and grieved with his calamity, when I remember'd how

Tucker, being me word of eparture from hap and heavy ny of my letter the from him, re above fatifonly fheet-an-wife he was to

ed and grieved nember'd how his his penitency appared in his former letter to me, repenting his mifdoings, and detefting his kind of life, with a defire of pardon and forgiveness of his offences paft.

This complaint came at an unlucky hour, both for him and me, it being in the midft of the time that malice fer herfelf againft me; for in few days after I was unjuftly committed to the *Tower*; and yet I thank God by his providence, not an hour before I was imprisoned, I had finished and ended his pardon, that I might say the ending of his trouble was the beginning of my own; but not through his cause or occasion.

Tucker being fet at liberty, was to difpose of himself as he should be guided by grace. And to give some sign of his thankfulness for the favour I did him, he resolved not to depart Loudon, what shift soever he made to live, till he had acknowledged his life from me; and though at that time there was a general restraint of all people's resorting to me in the Tower, yet that prohibition was no sooner taken off, but Tucker was one of the first that repaired to visit me, with that protestation of thankfulness, and vows of amendment of his life, that he gave me fatisfaction it proceeded from a penitent heart. It joy'd me much to see his resormation, and I held myself happy for the deed I had done in regaining a lost sheep that had stray'd out of the slock.

His credit being loft, which made him unfit for employment, moved pity in me what courfe to put him into; for no beginner can fet up a trade without a flock to enable him: and to requite his remembrance of me, by the token he font me from Ireland, I returned him the better part of that gift, withing that good fortune would

attend his happy beginning.

He was not long determining with himfelf, but immediately took a voyage to Denmark, whither he had often before traded. Arriving there, and having occasion to go about his affairs, it happened, that passing a river, the ferryman of the boat knew him by an infallible token; for not long before the man was taken by Tucker at sea. The fellow had no soone landed him and his sare, but speedily he hastened to the magistrate, requiring a warrant for his apprehension, alledging the cause; which was no sooner demanded than granted, all people of that country being naturally bent to revenge themselves upon offenders in that kind.

Being thus arrefted, he was carried to prison, where he received the rigour of justice; and upon trial, by the witness of the ferryman was sentenced to die. The gibbet was erected near joining to that where Monnocho, his former companion, was still

hanging for him to behold, which was very odd; for it is not the greatness of the person, nor of the accident, makes a wonder the greater; for all things, be they great or little, are at the disposal of God alone, who many times advances the mean, and casts down the mighty. And it is worthy of observation, how in many cases he gives light to men, to discern his just punishment to some, for example of mendment of life to others.

And amongst the rest, this accident of these mean and ungodly pirates is no less strange, if we call to mind God's justice towards them, if you will consider the first progress of their beginning, till death cut them off, as it does all people that commit unnatural crimes; for such men never escape without cruel revenge: for a stather of the church faith, He ceases to be a man, and becomes a brate beast, that leaves the rules of reason and bonesty, and gives his mind to mississed and sensitive.

These two mens cursed courses are not unlike a novel; first in their unexpected meeting in remote islands, where they were both strangers; secondly, that upon their meeting they protested and yowed friendship, though I must say, that the agreement of ill men in mischief cannot be called friendship: but call it what you will, and the did not long continue; for there was a bone cast betwist them, as it were, betwist two ravenous mastiss, to strive for, and the

stronger to carry it away.

After these two pirates had parted company, the one stood to the northward, the other to the southward, a quite opposite course to one another, and where there was never likelihood of meeting more; but rather to avoid and eschew each other, their quarrel was so mortal: and yet both of them tasted one fortune alike; first in their apprehension, and after in their manner of execution; but above all, the place never doubted or feared by them; and where, perhaps, in many ages the like will not happen again, it being out of the road-way for such people to refort to.

This shall suffice for God's justice by example of these two miscreant pirates, and his detestation to their wicked courses against the filly and innocent sithermen, who, we may truly affirm and say, of all other people, get their living with the pain-

ful fweat of their brows.

I must not omit to give divers precedents of God's miraculous working in the example of fishing. Some I have heard avowed in the places where these accidents have happen'd; others I have by report, which is not so much to be credited, as, namely,

at Tenbigh in Wales, a place not inferior to any that I know in his majefty's three kingdoms, for fituation, air, plenty, and pleafure, which in times past enjoy'd a plentiful fishing; the other is the island of the Lewes, I have so often treated of.

These two places abounding at several times with an extraordinary quantity of fish, the minister of the one, and the bishop of the other, envying the prosperity of the poor fishermen, being led out of a covetous desire, sought to impose a greater tax by way of tythe, than had ever been before paid to their predecessors, which was no sooner questioned, but the fish vanished, and for a time became strangers to those shore this happened; and as I will not conclude of the cause thereof, yet I will say with a father of the church, Non est bonum

ludere cum sanctis.

This shall suffice for so much as is contained in my fixth book, touching fish and fishing, and the merchantable commodity arifing out of it; in which I will compare myself to a merchant, that freights his ship with findry and several commodities, and fends them to feveral ports, thinking by the variety of wars to countervail the charge of the rest; for what commodity is defired in one country, is commonly little effeemed in another, as by example of gold, which above all other things is coveted in these parts of the world where we live, and nothing accounted of by the Indians where it is produced: hatchets, knives, and glaffes, are held grofs, bafe, and of little value by us; and yet esteemed in the highest degree of treasure amongst them: and fo fares it with these six books, which are freighted and stuffed with superfluity of needless collections. Some perhaps may be delighted, and take advantage of them, how unworthy foever they may feem of themfelves; for I remember the faying of that matchless and generous gentleman Sir Pbilip Sidney, That there was no book fo bad, but had fomething in it that was com-

Whofoever is defirous to be informed in fea affairs, and actions in the late wars betwixt Spain and England, will find it in one of my fix books: Whoever will feek to avoid errors and overfights by example of that war, may learn it: Whoever shall defire to know how a general ought to carry himself in the government of his fleet, will be instructed in it: Whosoever covets to understand how to defend his country, and offend others by fea, shall be taught it: Whofoever is defirous to fail into any of the four quarters of the world, as America, Europe, Afia, and Africk, shall find the fea open, and discovered to his hands: Whofoever will delight himfelf with the paffages, troubles, and conquests of the Spaniards and Portuguese, and their enterprizes upon new worlds, shall understand it: Whofoever will hear how the Indians were reduced to civility and christianity, he shall not be ignorant in it : Whosoever will put his hand to further fuch projects as are contained in the fix books, shall not only fee reasons to induce him, but shall deferve everlafting praise of his country, for his forwardness in them: Whosoever of an Englishman will live no longer in ignorance of what our feas produce to inrich them, shall have it discovered to their hands. Things to be admired at, when they shall remember their former errors.

I will fay with Sir Pbilip Sidney, if any of these prove profitable, commendable, or delightful, the author is not to be condemned or blamed; for indeed he is like the merchant, spoken of before, that must seek to put off his ware, not by words, but worth; and as he refers himself to the buyer, so do I this discourse to the reader, to judge at his pleasure; for things give better counsel to men, than men to things; and in recompence for my labour and pains, I only crave a favourable construction, howsover they shall appear in your

conceit.

ΛN

A N

ADDITION

TO THE

Sixth and Last Book of Fishing,

AND THE

Reasons why it was divided from the other former Discourse.

Forbear to annex this addition to the former relation of fishing, to avoid giving publick offence to the Hollanders; for it is an old faying, That truth many times turns a Man to Ruth; and I fee that the prefent policy of our state is rather to diffemble an injury, than to revenge it, though the Hollanders fecret envy is more to be feared, than when they declare themselves openly against us: but yet it shall appear that I have not been altogether ignorant of their beginnings and rife, but have carefully beheld their proceedings and actions, and can judge of their malicious detractions to us, and others; which is the nature of faction, at first to fhew itself humble, till it mount to the top of ambition.

Our eyes and fenses make it clearly appear, that they and their cunning courses are the mediate causes of the poverty that daily affails our glorious kingdom, as I shall instance fome particulars within the land, before I ingust myself into the open sea; which are as follow:

What trades and artificers of all kinds do they fet up, to the ruin of many a poor *Engliftman*, that has lived an apprentice and bondman feven years to attain his art and occupation?

What trades are there in which they have not flocks going, or feriveners with money to lend?

VOL. III.

What land is to be fold, or mortgage to be had, that they have not the first refusal of?

What marriages of man or woman falls amongst them, that they will inrich the English with, so long as any of their country or tribe is found amongst them?

What maritime town, or other of account, within twenty miles of the sea, opposite to *Holland*, that is not stuffed and filled with their people, to the impoverishing of the inhabitants and dwellers?

What maffes of money and gold have they, against the laws of the realm, transported out of it, as truth has made it plain?

What lofs did they to the king and kingdom, when they and their faction opposed the brave work of dying and dreffing of cloths, after it was in a good way of going forward?

What hurt or hindrance do they to our navigation, when they freight strange veffels, and refuse the *English* ships?

fels, and refuse the English ships?

What an innumerable wealth have these people attained to, whose beginning was nothing when they made their first entrance into this kingdom? If it be consider'd, it will appear to be admirable.

And for all these domestick damages the subjects secrive, his majesty has no

more benefit by them, than if they were natural English

Thefe are the leaft to what shall appear when I hunch into the ocean, and there encounter them ; but in the mean time I will unmask their craft and cunning, and difcover the fubriley of their English friends to intrap us in the fnares of their policy, under the false colours and pretence of security to the flate.

As well the one as the other defires it may be held a maxim of state, That the fecurity of England must depend upon the fortunes of Holland; a foul imputation they cast upon us, when we remember the noble and victorious actions of our forefathers, who made other nations fear them, and they to fear none: out this polition is devited to ferve private mens purpotes, contrary to truth or reason, as I will make it appear to the judgment of ...ise men. But under this conceived colour the Hollander plays the part of a Panther, which has a fweet feent, but a loathfome face, which makes other beafts follow till he has got them into his clutches. And the Hollanders have fo entrapped us, that we are caught in their nets, and by nets we must be freed: we are made filly fishes, to be enfnared by the subtilty of those fishermen; but I hope we shall be releafed and relieved by fish, with our endeavour and pains.

Now to hoift fail and put to fea, to encounter, at least to discover, the Hollanders infolencies, their practices, their deceits, and defigns, wherein I will make the indifferent reader wonder, and after judge, how dangerous a thing it was to put arms into their hands, and how necessary it is to bring them into the same state of shipping they were before the wars.

I will begin with the days of queen Elizabeth, speaking to the watchmen of our commonwealth of that time, and use an old phrase without application, That prosit and bribery makes a judge blind.

Was it discretion and fafety in those men, after the Hollanders had ingaged us in the war with Spain, that our ships were arrefted, our goods forfeited, and from thenceforward prohibited traffick, yet to fuffer the Hollanders to continue as absolute a trade into Spain as in time of peace, and fupply them with ammunition, fhipping, mariners, and intelligence against us? and rather than their manner of war should ceafe, by which they ingroffed the intire trade into their hands, if ever the king of Spain's army in Flanders, or his armado in Spain, should have wanted powder, or other abiliments for the war, they would have fupply'd him: for all their drift was no more than to keep us fevered from Spain,

and to prolong the war for their benefit of commerce and traffick. This was the beginning of their rifing, to our ruin; and from this very day we must reckon, as from the birth of a child, their first life and profperity.

Was it fecurity for us, when our watchmen gave way to Monsieur, brother, and next heir apparent to the crown of France, and who had fucceeded his brother, if he had outlived him, to be invefted duke of Brabant, who had then enjoy'd the Low Countries with France, and who was no fooner placed in it, but he began treacheroully to practife, by example of Antwery, and other places?

Was it the part of friends, and with whom they had lately leagued, that when the king of Spain imploy'd a fleet against England, or upon defence of his own coast, he had thips, men, and his principal pilots, Hollanders, who were either preft in Spain, or willingly ferved against us?

Was it not cunning in the Hollanders, and fraud to us, when the greatest trade of the Spaniards and Portuguese into the West Indies, Guinea, and Brasil, was in Holland ships, which defended the Spaniards goods from the English, with more flaughter to the English when they encountered, than ever we received from Spain? Here they supported an enemy by nature, to hurt and injure a friend by fact and proof.

Was it fafety to us, or honesty in the Hollanders, in the year 1599, that her majetty rigged and furnished a royal navy upon a fudden fervice, and expected affiftance of fhips from them by contract, that in conclusion they fent but seven ships, and fuch, that the worst of ours was better than the best of them? Here they left us unprovided to encounter a danger; for a foe is as good that hurts not, as a friend that

helps not. Was it fecurity, honour, or profit to us, that with an expence of more men and money than we have conquered kingdoms heretofore, we have maintained their principality, making mechanick perfons equal with princes, raifed a rabble commonwealth against the monarchy, trained up their people in discipline of war? that of a mean and timerous generation, we have put valour and knowledge of arms into their hands? And for all these unspeakable good turns done them, we have no more affurance from them, than discourtesies we receive in all parts where we meet: and no marvel; for popular states write favours in dust, injuries in marble.

Was it fecurity, in all the time of war, to fuffer our prime foldiers, and of all degrees, to be under their subjection, the most

part of by con pole of of their verame whereas the firt good, state pr mon g Lift.

part of our wealth exhaufted thither; and by confequence to be in their power to difpole of this kingdom as pleased most voices of their felect council, which in their government is opposite to monarchy? For whereas monarchy propounds honour as the first thing, the second the publick good, and the third interest; a popular thate prefers private profit, makes the common good the fecond, and honour the

Was it fecurity to let go the cautionary towns, Flushing and Brill, being bridles to their infolencies? For by them we could at any time either curb, or give them their reins, as fince we find by enjoying that liberty all their injuries towards us began, which before they durit not offer outward-

Was it, or is it fecurity to us to fuffer yearly three thousand vessels of theirs to fish upon his majesty's seas, and instringe his majesty's laws of England and Scotland, in which feasthey are bound to acknowledge a fovereignty to the kings of both kingdoms? and under that pretence of fifthing, they may use this stratagem, cunningly and fecretly to put ten or twelve foldiers in every bufs? and under colour of fifthing, to land in fome of his majesty's dominions, where it is to be feared they will not want a party?

Is it fafety, when we enter into confideration, (by the multitude of their veffels increafed out of fishing,) how they insult upon us at our own home and abroad, as, namely, in the East Indies, a thing able to move pity for the fact, and revenge for the doing it? and besides many other scorns and disgraces they put upon us, which need no repetition, because they are fresh in our memory? They resemble Hecuba, that has a human voice, speaking, like a friend, but is a wolf ravening like a feind.

Is it good and beneficial to us to fee the Hollanders enjoy our absolute trade of the world, and first discovered by us; and not contented with the moderate gain to themfelves, labour by all indirect means to impoverish us, in uttering their commodities at an under rate, whereby to weary us of all fuch trades? For fuch is their covetoufness, and such their unthankfulness, that they regard neither favours done, nor to be done them; and when there is no fear of revenge, there is little conscience of offence in a covetous man. Lycurgus fays, That riches and trade produce a scarcity of virtue. And it is a rule, That prove a man unthankful, and disprove bim in all his other

By this false position, That England's safety must depend upon Holland's prosperity, we were driven to a war with Spain, and by

that war to defend their commerce; for they never undertook hoffile act by fea against Spain till obliged by necessity that they were prohibited that trade: but the greatest mischief of all others, was tolerating their fifhing, which we only might have enjoy'd; by means whereof we have relign'd our weapons, which are the ships increased out of it, into their hands out of our own, to dispose of to their advantage and our hurt, if at any time they comply with their king, and make him thereby mighty by fea, or if they cast themselves upon the protection of France, as they will do if France can bestead them more than we. This is a way, out of our cinders, to kindle a fire to burn and confume us.

It may be compared to a fubrile woman, who, to abuse the simplicity of her weak husband with her hypocrify and indirect practices, draws him to rely on her for the managing of his citate, being made believe he cannot otherwife fublift, according to the former proposition; but he dying, her voluptuous defires difcover her foul intentions, and the despites his friends and children. In this simile Holland is the unnatural mother; this kingdom the filly hufband; and the subjects the outcast and un-

respected children.

Our watchmen, in their wisdoms, might have foreseen this, and prevented it by enjoying the fifthing; for then had England Lept the fame strength by sea, which Halfund has fince attained to; then had Engfund undertaken the fame courfes in fifthing, as the Hollanders did; then would not England only have outftripped them, but all the world in strength of ships and wealth of fubjects; and by confequence have caused not only an admiration, but a terror to all the world that should but hear of us, as now we are brought to reproach and fcorn, by that mean nation of Holland, in remote countries, as far as the Indies, where they east the imputation of a petry nation, and poor people upon us, and make themfelves fovereigns and kings over this part of the world; and as vermine gnaw upon meat, fo do they detract from the worthieft perfons.

In this trade, as in all others, they either deprave is, or deceive us; by example of a mercha, of note, who above five years fince freighted a ship of red herrings, from Tarmouth to Marseilles, and departed in company of some Hollanders. It happened that by advantage of wind and weather the Hollanders arrived at their port, and made fale of their herrings to an exceeding gain before the other's coming. The English finding the Hollanders unburthened of their lading, fome two hundred barnels excepted, defired to buy them at the rate the others

had been fold, thinking thereby to keep up the price; but the Hollanders fold them at a low price to hinder and prejudice the others fale. This envy of the Hollanders was the greater, in that it was grounded upon malice, and not founded upon injury: for Macrobius fays, That anger is increafed upon occasion, but malice upon ill condition.

But if we enter into confideration of our other trades, which they feek to deprive us of, let their carriages in Greenland, in Necessiandland, and Ressia appear, three places first known to us: in Greenland they contested with us in our whale-fishing, and were like to bring it to a naval battle, though the law of nations casts it upon us as the first discoverers. Here their envy appeared, and they shewed there is no such dangerous foe as the feeming friend.

Newfoundland being our ancient difcovery, and that no nation could challenge intereft therein but ourfelves; not many years fince the Hollanders practified to convey threefcore or fourfore mariners, out of the west country, to instruct them in that manner of fishing; but it was discovered and prevented; beware therefore of them; for they are like a serpent, that never stings so deadly, as when it bites without hissing.

Notwithstanding, as I have shewed before, that they have brought the trade of Russia, from two ships of theirs to sixty, and the decrease of ours from sitteen to two, yet this would not satisfy them, but they practised with the Musevia ambassador at the emperor's court at Prague, to forbid us the absolute trade of Russia; like envious persons that desire no good to any but themselves.

It is no lefs admirable how they ti'e advantage of us, upon all occasions offered, as namely in the year 1628, when our wars with *France* prohibited our trading thither, whereby we were compelled to be served by the ships of *Holland* with the greatest part of wine that furnished this kingdom.

This prohibition much increased the Holland shipping; and they thereby raised their freight to their own price, and brought it from twenty four shillings to four pounds a ton; a sum never heard of, but upon that occasion

One instance I will make apparent by a merchant of great account, himself being witness, and to whom it happened: a Holland ship being in the river of Tbanes to be sold, this merchant offered two hundred and fifty pounds for her, but could not have her under three hundred pounds; whereupon they parted for this difference of price, and the Hollander repaired to Bourdeaux with his ship, and there procured a freight for

England, which cleared three times the value of what he would have fold her for 3 for to this merchant's knowledge, he gained nine hundred pounds by that voyage.

One great advantage the Hollanders have of us, is the built of their fhips 1 there being little difference betwixt the Hamburgers, or Eafterlings, and them. This gives them a freedom of trade into all parts, as well friends as foes: as friends they pais for Hollanders, as enemies, they take upon them the name of Eafterlings; to that betwixt the one and the other, they circumvent us in our freights of ships, and have just occasion to laugh at us; as, indeed, I confider what they do is under pretence of facety to this kingdom: for good words, and ill deeds, deceive the wifeth.

They have many inticements to draw people and trade to them; they debat no man, be he Turk, Jew, or Christian, the freedom of religion; which made one traly fay. That the true religion was professed in Amsterdam; for all Cets, be they never so diabolical, are there allowed and maintained by some or other.

As for their cultoms and excifes, though they be high, and indeed intolerable within the land, (for those mechanick people being in love with the word liberty, though they find it not in effect, live in excessive flavery, and pay impositions for every thing they eat or wear;) yet any thing brought in by sea, goes at a low rate; as for example of wine from Bourdeaux, that which pays nine hundred pounds custom in England, will not come to above fitty pounds in Hellund; and all other merchandize after that proportion. And this is the only cause of their great trade in their provinces above all other parts.

As these are their policies at home, so have they no less deceits abroad, but far less justifiable by the rules of honesty; for to make a man honest, is to take away the occasion of being dishonest; but contrary to the law of honesty, they injure, andwill give no redress; they will fusser no wrong, nor yet give satisfaction in things of right; the thing they call good in the mickes, how ill soever it is to others. But to come to them more particularly.

them more particularly,
You shall not be ignorant of a policy of theirs, wherein they shewed craft and cruelty to the Dunkirkers they took at sea, only to abuse us; for when they had the chance to take one of them, which was not often, and that with the advantage of three ships to one, most inhumanly they would stay them, I purposely to make us believe, their 'malice was implacable, and irreconcileable; and yet

s at home, fo d, but far lefs onefty; for to take away the but contrary jure, and will fer no wrong, ings of right: emielves, how it to come to

nt of a policy ved craft and hey took at hen they had them, which th the advanmost inhun, i purposely alice was ime; and yet twithstanding notwithstanding these barbarous acts, they made their daily resort and trade into the ports of *Dunkirk* and *Flanders*, where they implied them with victuals, powder, shor, or any other things they stood in need of.

And fince then, as in the days of king fames, in the view of all people 3 and though our articles of peace with the archduke did warrant our traffick thither, yet they would forbid it, and seize upon ships of ours as they entered the ports of Flanders, seeking to force us to Calais, from whence they knew our merchandile would be carried to Flanders, their drift being only to enrich France by our loss, with the customs we there, paid: to thankful never wax old 3 for no man is more bound to be grateful than they who have received such deep obligations, as I have proved the Hollanders have done from us.

Many grievances our merchants have received from Spain came by their foul practices, as namely, by their carrying counterfeit brafs money into that kingdom, and laying it upon us; for which we have found a difpleasure and punishment due for such an

offence.

In time of peace, in the reign of king fames, the Hollanders spared not to disperse rumours throughout this kingdom of fleets and preparations in Spain against us, to our no small scandal, as though we were born to sear, or that our intelligence seemed so weak as to receive it from them; when indeed they did it to nourish jealousies betwixt the two states, to eat us out of that trade, as they have done in all others.

He that shall read what is gone before, shall find that their ingratitude does as much appear, as a crow that picks out the eyes of him that first nourished him. And now I will apply my self to the watchmen of our time, to consider of these collections following;

1. Whether the ground and foundation of their positions, to make *Holland* equal in power with *England*, was laid with mature judgment, yea, or no? or out of some pri-

vate ends to advance themselves, fortunes, and credit?

2. In the fecond I would have them confider, in what eftate Holland, and the people in it was in, before they conteited with their lawful prince for fovereignty, to that they are now brought to?

 The third, is to confider what a height they are now in, by our conniving with them; and we leftened and diminished by it.

4. The fourth, is the damage and hazard we have run in labouring to continue their greatness, and not feeking to abate it.

5. The fifth, is the difcourtefies done use out of a covetous defire of gain, and we ftill to bear and permit them?

6. The fixth, is the condition of their English friends that fill uphold their faction, and what the end of their defigns are like to prove, if they be not let alone?

7. The feventh, is their ftrength by fea, and to think of a means to equal them in number of fhipping, and how to bring their fifting and other trades into our hands; which may eafily be effected, if my former proposition of fishing be profecuted.

8. And lastly, it is to be consider'd, what tie or security we can have of them, longer than we yield to their insufferable injuries and insolencies? For they may well presume, that we bearing so many blows at their hands without revenge, demand the more.

And this shall suffice for a discovery of the Hollanders first beginning in greatness; their fixty and odd years of continuance, and their present state now in being; wherein their ingratitude to England is laid open, which the Persans define to be a spring of vice, the enemy of nature, the position of amity, the ruin of gentleness and benignity. All men must consess they have found the true affection of friendship in us, described by Plato, That he is a good friend who does his friend good, but a mighty friend that defends him from harm.

Some other Things I forbore to infert in this Sixth Book of Fishing, concerning the Islands Hebrides, and especially the Lewes, worthy of Consideration.

those islands, and the use the Hollanders may make of them, for the fame reasons expressed before, as too tart a sauce for Hollanders taftes, and unfit to be published to the view of the vulgar fort.

But before I look to far to the northward as those islands, I will take a survey of my own country of England, and gather fuch collections as to make me understand the

other the better.

I will not fpeak, as I am an Englishman; for all men naturally are partial to the country and foil that first gave them life and food; but I will speak according to fense and truth, to make my argument and reason the stronger, in what I shall say of the state of the islands Hebrides.

As God hath given a bleffing to England above all other lands he hath placed and feated in this world; for, as it were, with his own finger he hath fettled it in a fea for its own fecurity, an annoyance to all other countries, in permitting and impeaching universal trades and navigations, as that we may truly fay to that point, that we are only happy above all others.

For whereas the fouthern and richest part of Europe cannot sublist, nor the traffick of the Indies be maintained and upheld without fuch materials as are fent out of the northern regions; as also, that there is a necessity in the same case for the north to receive benefit of the fouth; all thefe navigations, as well the one as the other, must necessarily have their passage through our feas and channel, and by confequence fall into our mercies, as I have handled in my first book.

And as it has been an ancient polition of state, for the kingdom of England to have an eye to its back-door, which was then Scotland, till both the kingdoms were bleffed and united in one, whereby the occasion of jealoufy, and the opportunity and practice of France ceased, that was wont to ftir up coals, and fet one nation against the

other. So I may fay of these islands Hebrides, that they may be made as dangerous a backdoor to Scotland and Ireland, as Scotland has been in former ages to England, being placed and feated with most advantage to annoy the two kingdoms aforefaid, if the Hollanders hold their footing they now have in them: the condition of the people of

Forbore to handle the conditions of Holland being confidered with their popular government, which other nations begin naturally to affect, by the example and encouragement of their late fuccesses and fortunes, by their wealth increased out of their trade, and by the excessive number of shipping, which are the dangers of islands; for without shipping they cannot be in-

> By the Hollanders possessing those islands, they may make their rendezvous and staple of all their fouthern navigations, as well in peace as war; they shall find sufficient succours in those islands of victuals, both slesh and fish, to give them relief; they shall find that in those islands they shall be fecured with feveral harbours of more importance and goodness, than their own coast can afford them; those islands will furnish them more natural helps against an enemy to defend themselves, if any attempt should be made against them; but above all, when they have thus fettled and feated themselves, we shall lose our ancient and accustomed advantage of their passage through the Narrow Seas, which is the only awing power we have over them and all other nations; for they enjoying those islands, will be enabled to refort to them nine months in the year, and so to pass to Holland by the northern parts of Ireland and Scotland, and avoid our channel and us, and our means to

> Moreover, in those islands, which are feated as a back-door to Scotland and Ireland, as I have faid, and in fo remote a place and distance from England, the danger is, that the people who are untamed, uncivil, will eafily rebel by the infinuating practices and infligation of the Hollanders, who are ready to allure, entice, and undertake any unlawful action, which shall tend to the overthrow of monarchy, and to fettle their own form of usurped govern-

> And therefore it behoves us to have a circumfpect eye over the Hollanders; for if errors and dangers are not remedy'd in the beginning, after follows great and unavoidable mischiefs, like what is past; which is fooner to be repented than recalled.

> This shall suffice to those points I have treated of in this fixth book, wherein I have unmask'd and discover'd, out of my own experience and observations, the Hollanders long and fubtle deceits to abuse us; for all

true-minded Englishmen to behold with an eye of indifference, how with cunning and craft they have still laboured to nourish divisions betwixt the two mighty kingdoms of England and Spain, merely for their own profit and gain, till the death of queen Elizabeth), when they could no longer support their politick practice, king James suc-ceeding, who brought the blessed effect of his motto, Beati pacifici.

I could follow this subject of the Hollanders, but for making the bulk of this book too big; and that I would not do injury to another book that is written by the fame author, entitled, Certain Observations that are not worthy the name of bistory, that happened to England fince the year of our Lord 1558. and a little before. Which book contains these particulars:

The favours England hath done Holland. The state of Holland from the beginning of their infurrections. The continuance, and what the end is like to prove.

Collections gathered out of a book written by Sir Roger Williams, and printed

Whether Holland do injury to their prince, yea, or no?

The desperate condition Holland has been often reduced to.

The difference of times betwixt the beginning of queen Elizabeth's reign, and the latter end.

A Relation of some Things that happened in the Reign of Queen Mary and Queen Elizabeth.

Hough I have made a description at cities spend not so much in apparel as is large of the Hollanders inconstancy, faithleffness, and manifest injuries they have offered to us, yet I must say there is no man so wicked or vicious, but some kind of virtue will appear in him, for which he deferves cherishment, as well as chastisement for the other; but naturally they are people that defire rather to live without virtue, than die without money; and this that followeth shall fet forth their praifes in the worldly carriages.

They are frugal in expence, the benefit whereof themselves and country find; they are industrious, as their actions at home and abroad do witness; they are just in contracts, holding a confcience in the little religion they have, not to defraud any man; they labour to feek out the fecrets of lands not invabited, and countries undifcovered; they are inventors of arts, which to their praise they have enriched the world with ; they are willing without excuse to contribute for the good of the flate, not flanding fo much upon privileges or petition of right, as to neglect any occasion of advanrage to benefit their commonwealth; they are laborious and painful of body, not admitting a beggar in their provinces, and willing to relieve and comfort one another in strange countries; they are enemies to the expence of law and the griping of lawyers, and end most of their controversies by arbitration of friends: their expences in drinking are faved, and mitigated by their mifery in cating: for out of their exceffive covetoufness they almost starve their bellies, and by their unmeasurable frugality they scarce cloath their bodies; for it is verily believed the people in one of their chief

fpent in a prince's court.

But all these virtues are drowned in a covetous ingratitude, that holds friendship with no body but for interest, which ends in the felf-fame interest: and no marvel; for popular states are no longer thankful, than they receive benefits; nor nothing is of shorter life amongst them, than the memory of pleasures or favours past: they are so careless to give satisfaction for the ill they do, that if it be demanded, it is as much as to speak of valour to a faintheart, or charity to an unmerciful man, or of courtefy to a churlish disposition; for it will prove but the telling a tale to him that is afleep. The definition by a philosopher in matters of friendship is as fol-

A friend is long fought for, scarce to find, and hard to keep; a friend is always ready to comfort in advertity, to help in neceffity, to bear with one's infirmity, and reprove his errors gently. But the *Hollanders* are contrary in their friendship; for they are like an ill bird that lays an ill egg, an ill tree that brings forth ill fruit, or a young cub that grows crafty like his dam; they practife and follow the steps of their predecessors; they make riches the heaven of their thoughts; and as it is held no hur: to know ill, but to do it, these people are perfect artifts as well in doing as knowing mischief.

Yet, to speak truth, their natural ill has been nourished and made worse by us; for if we had not connived at them and their actions, to our own prejudice, they had wanted power to have executed their ingratitude: therefore it had behoved us to confider what we gave, before we gave; as also to whom we gave, and how we gave it; for states ought to be governed by wisdom, and not by popular affection or passion. Wise men should not measure things by outward appearance, but by discretion and reason, or else they behold their actions in a fallic glass.

But now let us at last feek to avoid that evil we have done in making the Hollanders too great for us to tolerate, lest we feel the effect of repentance. It is not the meanest point of wisdom to doubt and mistrust the worst; for doubts beget underslanding, and thereby prevention: and as in natural bodies the longer one lives in health, sickness is the more dangerous when it comes, so it is with us and the Hollanders; the longer

we have lived in a mutual and inseparable peace, now that they have over-wrought us with cunning, and made us feeble by the strength they have suck'd from us, it will behove us to recover our ancient vigour and valour, and be no longer deluded with false pretences of fasety to us and the commonwealth. Let us follow the old rule in feeking to put out the fire of our neighbour's house, though he be our enemy, lest it should flame into our own; for it is an easier thing to oppose danger abroad than repulse is at home.

I have had occasion to insert some part of this last leaf in my former fourth book, which is there to be seen.

The End of the Sixth Book.

THE

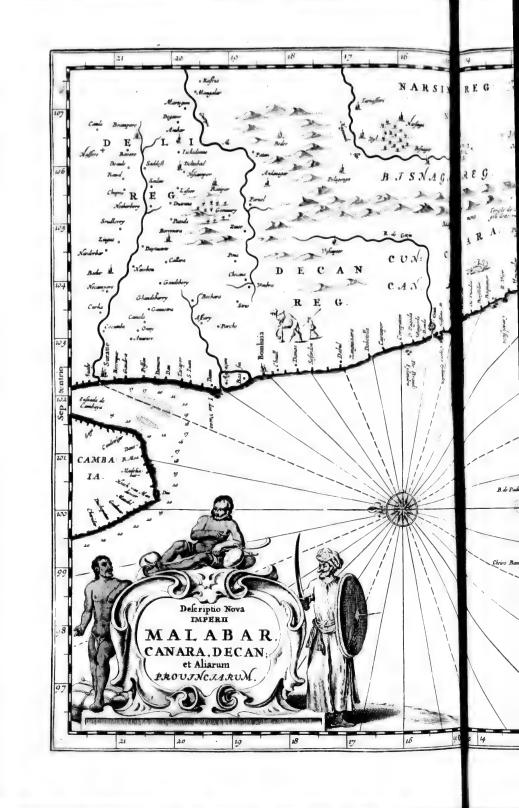

PREFACE

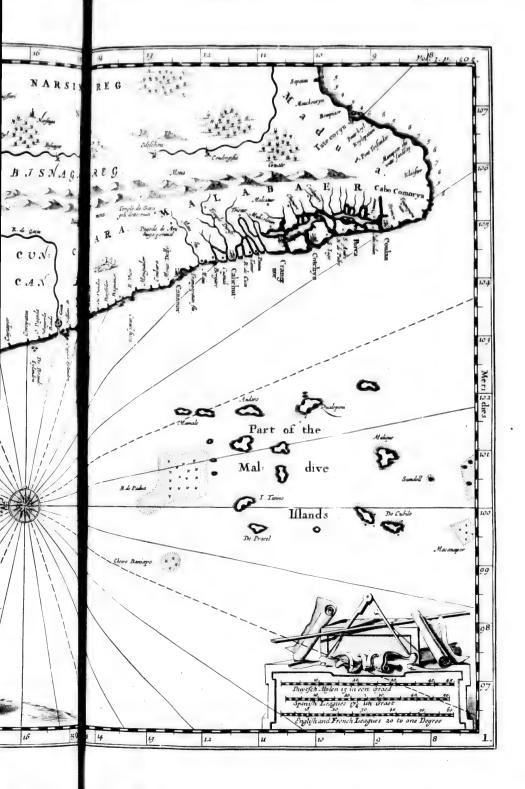

TO THE

READER.

OST of the modern East-India voyages that have been published of late years, being very defective either in refpect of the many fabulous relations that are inferted frequently, rather to please the reader, than to pursue the strict rules of truth, (not to mention the errors in the computation of the distances of places, and frequent unnecessary digressions,) it is no wonder, if the most curious in history have conceived a very indifferent opinion, if not an intire aversion to them. It was upon this confideration that the enfuing treatife coming to our hands, we thought it absolutely worthy the publick view, it being agreed by all who have had the opportunity of travelling in those countries, that the fame may, in respect of its sincerity and exactness, challenge the prerogative before any other hitherto published upon the same subject. For, confidering that the author chereof lived not only in the station of a minister in divers places of Malabar and Coromandel, and especially for several years in the kingdom of Jafnapatnam in the isle of Ceylon, but also affisted in person in divers sieges and expeditions, and thereby had more than ordinary opportunity to be informed concerning the nature and constitution of those countries, their products, inhabitants, manners, cuttoms, religion, ceremonies, œconomy, traffick, manufacturies, civil and military exploits, and what else may be requilite for the accomplishment of a good history, founded upon the faith of one who had been as eye witness of those transactions; consequently he may challenge the preference before many, who relate matters chiefly upon hearfay. As to those things which are not grounded upon his ocular testimony, the same were taken from authentick records and manuscripts, and illustrated with maps and draughts of those several countries, cities, nations, Uc. done to the life. What relates to the idolatry of these Pagans, we are convinced, by his own testimony, that besides the opportunity he had of viliting their Pagodes, or temples, (a thing rarely allowed there,) one of their most learned Brahmans lived with him in the fame house for a considerable time, from whom he, by constant conversation, as well as out of their own records, learned the most fecret recesses of their religion, and had the exact draughts of their idols, much beyond what Abraham Royerius (who writ upon the same subject) can pretend to upon that account. As for our part, we have made it our chiefest care to give you an exact delineation of the before-mentioned draughts in the best copper plates that could be procured; and that with all imaginable exactness, according to the true originals, contrary to what is practifed by many, who study to represent matters of this kind, rather according to their own fancy, than to truth. We have only this to add, that to avoid all unnecessary prolixity, it was judged requisite to omit many digressions, tending not so much towards the elucidation of the history, (as we suppose,) to shew the author's criticism in the holy scripture.

An Exact

DESCRIPTION

Of the COASTS of

MALABAR and COROMANDEL

IN THE

EAST-INDIES.

CHAP. I.

The Division and Limits of the Indies. The Author's Purpose in the ensuing Treatise. A Description of Cambaja and Suratte. The Treaty with the Great Mogul, by Mr. Van Teylingen.

HE main delign of the enfuing treatife being to give an exact account of the Indies, as for as is come to our knowledge, rither by our own experience, or the constant conversation with people of unquestionable credit, viz. the coasts of Malabar and Coro-mandel, together with the isle of Ceylon, and places thereunto belonging; we thought it not beyond our scope to insert the true limits and division of the whole Indies, whereby the reader (together with the annexed map) may form to himself the more clear idea of the fituation of these places.

India therefore borders to the west upon of the In- the river Indus, towards the Arabian Sea; to the north it is inclosed by the mount Taurus, on the east fide by the vast Eastern Ocean, and to the fouth by the Indian Sea. India was anciently divided into two parts by the river Ganges; thence the more eastern part was called *India* beyond the *Ganges*, and the western part *India* on this side of the Ganges, now known by the name of Indoflan, and, according to the opinion of some authors, is the fame mentioned in the fcripture by the name of Havila.

India is besides this divided into several kingdoms and provinces, to wit, the empire of the Great Mogul, Decan, Malabar, Coromandel, Crika, Bengale, Pagu, Siam, and

there is a vast number,) the islands of Cey-Baldaus. lon, (of which in the fecond book,) of Sumatra, Borneo, Celebes, Amboina, Banda, and the Molucque ifles, viz. Termate, Macbian, Bachian, Tidor, Motir, Potbacker, and divers

As it is not my intention to treat of the ther's inwhole Indies, but to confine my felf to those tentions, parts I have for the most part seen my self, and to give you a relation of fuch remarkable transactions, both of peace and war, as have happened there; so I will begin with the kingdom of Cambaja, and its capital city, having the fame name, and end with Bimilipatam upon the coast of Orixa, bordering upon Bengale.

Cambaja is a different province from Gu-The pofuratte, fituate at twenty two degrees of nor-Cambaja. thern latitude; it has got its name from its capital city named Cambaja, (formerly the Indian Cayrus,) seated at the mouth of the river Indus, (or Sandus,) known by dif-The River ferent names among divers nations: it rifes Indus was among the mountains of Paramifus, and firmerly being augmented by at least nineteen other Sandus and rivers, (among which are the Hydaspes and Pangab, Hypafis, whither Alexander the Great car from its ried his arms,) it falls by feven different thes. channels, or, as some will have it, by five, into the sea, two of which pass through and exonerate themselves into the sea in Cambaja, besides the Maldive isles, (of which this kingdom of Cambaja. It borders to

Raldeus, the east upon the country of Mandoa, to the west upon the country of the Nautakers The limits or Gedrofiers, to the north it has the kingand ferti-lity of doms of Sanga and Dulcinga, and to the Cambaja. fouth that of Decan. It is one of the most fruitful provinces of the Indies, which furnifhes the circumjacent places with corn, wheat, rice, peafe, butter, oil, and divers other provisions. The inhabitants are generally either Gusurattiens or Benjans, being much addicted to traffick, and very quick in their dealings. They make here the best calicoes of all forts; and the country abounds in indigoe, granates, hyacinths, amethifts, and divers other precious Its extent, commodities. According to Cluver's computation, Cambaja is one hundred and fifty German leagues long, and as many

The city of Cambaja (called the Benjan

city of formerly a rich city, but fomewhat de-

sum of the Paradise) lies, according to the common computation, fixteen leagues to the west of Brochia, feated at the entrance of one of the largest channels of the river Indus. About three leagues thence, on the opposite shore, is a great village, inhabited by the rebellious Raspoutes, a perverse generation, conduct of living for the most part upon rapine. This ske Moors, river is almost dry all the winter, though at high tide it rifes feveral fathoms deep, fo that then ships may come up to the very walls of the city, where at low tide it is fordable. This city is reckoned as big again as Suratte, being well built, and fortify'd with a tripple wall: it has three Bazars, or great market-places, for the fale of al! forts of merchandizes, and twelve gates; befides that almost every street has a peculiar gate, which is flut up every night, to prevent disorders: its whole circuit is about fix or feven English miles; and without the gates are four very delicious large cifterns or ponds, and fifteen gardens, for the diver-fion of fuch of the inhabitants as are pleafed to divert themselves there with walking in the cool of the evening. They are for the most part pagans, and addicted to traffick, especially in all forts of stuffs for clothing,

> Mecha and Persia. Amadabath, the capital city of the province of Gusuratte, lies eighteen leagues from Cambaja, about twenty three degrees and a half northern latitude, and confequently directly under the tropick of Cancer: it is feated in a great and most delightful plain, just on the bank of a very fine river; it is both ftrong and populous, being fortified with a goodly wall with round turrets and twelve gates.

which they transport to Diu, Goa, Atchin,

The streets are very broad, the houses very handsome, and the pagan temples stately built. In the center of the city is the caftle, the refidence of the governor, Balico furrounded with a very high wall; the gates whereof are guarded by a certain body of troops, who let no body pass or repass without leave, this being formerly the or-dinary feat of their kings. The commodities found at Amadabath are girdles, turbants, gold tiffues, filk ftuffs, fatins, damasks, tapestries, suchar, amspien or opium, gummi lacca, borax, preferv'd ginger, mirabolans, fal-armoniack, and indigo. Under the jurisdiction of Amadabath, are twenty five confiderable towns, and two thousand nine hundred and ninety eight

The city of Suratte is a place of great the cry traffick, both the English and Dutch has Suate ving factories here: it lies open to the water-fide, except that the caftle is well provided with cannon brought from the thip Middleburgh, which was loft there 1617. But on the land-fide it is fortified by a wall of stone, the old fortifications being only of earth: it has no more than three gates, but two governors independent on one another, one of the castle, the other of the city. Next adjacent to the palace of the last stands the custom-house, where all goods imported or exported pay three and a half per Cent. cuftom, except gold and filver, which pay only two per Cent.

These custom-house officers are very Different troublefome and injurious to strangers, and some have often given great cause of complaint tissim. to our company, as will appear from the following petition, and the Mogul's patent (or Firman) granted to the faid company, and dated the 15th day of the month Rammasay, in the 16th year of the king's reign, and fince that of Mahomet

The king did immediately dispatch his orders, that the cuftom-house officers should not take from the commodities bought at Agra, and belonging to the Dutch, from ten to twelve per Cent, and those bought at Amadabath ten, or ten and one half per Cent, that they fhould be obliged to rest satisfied with the bills of loading given them by the Dutch merchants, and exact no more custom under any other pretence; that furthermore, all commodities bought at Brodera and Suratte should pay according to the price they were bought for; and that they should avoid giving any just reason of complaint to the Dutch. But thefe promifes had not the defired effect, as will appear out of the next following letter of Mr. John van Teylingen prefident and governor of the Dutch factories in Gusuratte, Indostan, and

Afr Van Tevlingen's Letter,

WHereas by the manifold exactions and injuries, the robbing of the " factory of our company, the detention " of Daniel Maffourw, barber's mate, and " divers other enormous proceedings, the persons in the service of the company, in the empire of the Great Mogul, have " received confiderable detriment from divers of the Great Mogul's officers, (contrary to the intent of his Firman, or letters patents,) which must needs tend to the great damage of the company in general: it has, after mature deliberation, " been thought expedient, by Mr. Cornel. " van der Lijn governor-general, and the " rest of the members of the council of the Indies, to redrefs the faid affronts and injuries by force of arms. The yachts, the Larck, the Sluice, the Lillo, and the Eight Churches, being equipped lately for that purpose, and to be joined by divers other thips from Batavia, we give the command thereof, during my absence from the fleet, to the head factor Gerard Pelgrim, which however shall cease that " minute, when I come aboard any one of these ships in person. To prevent all diforders, rapine, and other enormities, " I do by these presents give a strict charge " to all the officers, of what degree foever, " and to all the foldiers and feamen aboard these vessels, not to hurt the Moors, either in their lives or estates, (this being contrary to the intention of the council, but only to feize upon their ships, money, " and goods, and to fecure them, till fatif-"faction be obtained by the company up-"on their just pretentions. We therefore once more command all the officers, fol-" diers, and feamen, without exception, " not to injure or rob (after the feizing " of any of these ships) the Moors in their " persons or goods, under the penalty of

"corporal punifiment, and (according to Baldens, the nature of the crime) of the lofs of the lofs, as they will answer the fame to the contrary at their peril."

Given at the Dutch Factory at Suratte, Feb. 10. 1649.

JOHN VAN TEYLINGEN.

The following Order was likewife directed to the Head Factor Gerard Pelgrim, and the Factor Peter Ruttens,

T being firmly refolved in council, Some or-the 25th of October, to profecute with G. Pelgrim the utmost vigour the design laid former- and P.Rut-" ly by the governor-general, and the tens. council of the Indies, (which was de-" lay'd by our long stay,) with the first opportunity, the yachts, the Sluice, Larck, Lillo, and Eight Churches, are " chosen for that purpose: but two of them " being now at Mocha, and the other "two ordered to flay there the winter 46 at Dabul, we constitute the head fac-" tor Mr. Gerard Pelgrim commodore " over the faid ships, as soon as they are rejoined aboard the Larck, or any other of these ships he shall be pleased to chuse, where he shall carry the stag, with authority to call on board the council of war when occasion requires. In his ab-" fence, or feparation of the fhips, the factor, Peter Ruttens, shall exercise the fame authority as Gerard Pelgrim, both which however shall cease with the arrival of the prefident Mr. John van Tey-lingen. Whether the two before-mentioned yachts shall leave Mocha together, or not, is not yet determined; but in the mean while we strictly charge you, that fo foon as you have notice that the Chasirovan, (a ship of a vast bulk,) or any of the other ships belonging to Suratte, are preparing to depart you fet fail fome days before them, under pretence of being bound (according as we used to do) for Gamron. All which is to be understood, provided matters be not brought to a happy conclusion before that time; for if that were, you have nothing to do but to profecute your voyage in good earnest thither, unless you had a fure prospect of gaining confiderably by your flay, and increasing the price of your cargo. For the rest, " it is to be your main concern, to take effectual care that none of the Great Mogul's ships, nay, even such as trade thi-"ther from Diu, escape your hands; and " especially to keep a watchful eye over " the Chafirovan, which commonly fails " fooner than the reft, and has more ready " money

D.// ..

Baldaus. " money aboard. In case it should happen (which we hope it will not,) that the yacht the Eight Churches, which is to return from Gamren, should, by some accident or other, be detained in her " voyage, we have provided against it, by " ditpatching to the commanders thereof a 66 copy of these orders for their direction upon occasion; which after the return from " their voyage they are to deliver, fealed up, into your cultody, where the fame is to remain till you fet fail again; which is to be redelivered to them to ferve for " a fure direction, in case you should be feparated at fea. Silence ought to be your most peculiar care in this case, for " fear the fecret coming to the ears of the "Moors, they should stop the departure of their ships. The Larck and the Lillo, " and in default of those, the Post, after " their first appearance here, shall be fent "to Gamron, whence they shall fail pret-ty late, as if bound for Batavia; but un-" der pretence of being unable to profecute " their voyage, come to an anchor in the " road before Dabul, from whence they fhall fail, Aug. 15. steering their courte " directly for the river of Suratte; where they are to stay till the arrival of the president Mr. John van Teylingen 1-" board them ; and in the mean while feize upon all the Moors vessels coming " from Mocha; yet fo, as not to commit " any further outrages against them, except only to keep them in fafe custody till the company shall have received fa-" tisfaction from the king Chastiaan. So foon as they have retaken a veffel, they " shall take the Nachodas merchants and " feamen over in their ships, and keep "them under a good guard, yet without any moleftation, rather shewing them all the marks of respect and civility that can be; and shall put as many soldiers and feamen of ours aboard fuch a " fhip as fhall be thought fufficient to keep " her: and proclamation is to be made, " enjoining every body to abstain from doing the least injury to the seized Moors, either in their persons or goods; and officers are to be appointed to fee "the fame put in execution. After we have got all, or most of the Moorifb " vessels into our hands, you shall take " care to embark all the Facquiers, and

other loose people in one ship, and to Baldous, let them sail their ways where they please, they being not worth our keeping. This done, you shall take the first opportunity of fair weather to transport, first the ready money, and after. wards the merchandizes aboard our yesfels i but fo, as that they be well packed and fealed up first, an exact inventory made, with the names or marks of the respective owners; each parcel is to be marked with a peculiar letter, a copy of which is to be given to the owners, and a written acknowledgment to be taken from the Nachodas of what is thus taken, and to be redelivered. in case matters be adjusted hereafter, that fo every one may know where to look for his own; the factor being to be careful in this point, in the transportation, as well as the mafter of the thip in receiving, as they will answer for the loss at their peril. The English yacht coming from Mocha you are to let pass unmolefted for weighty reasons, purfuant to the resolution taken in council the fourteenth. The fame is to be done in respect of all French, Danish, and all other ships in amity with the states, provided they don't attempt any thing upon the Moors in your cultody; in which case you shall defend yourfelves to the last extremity. Lastly, if the matter could be fo contrived, that our veffels coming from Mocha might intercept and feize the ships of Cambaja, and carry them to the river of Suratte, it would be a fingular piece of fervice, and much haften the accommodation. I conclude, wishing you health and happinefs in your voyage and undertaking, for your own glory, and the interest of the company.

Raldaus.

CHAP. II.

The Treaty carried on. What Articles were proposed by the Dutch, and agreed to by the King. His Patent, or Firman, and Ratissication of the Treaty.

FOR fear of exasperating the Great fit to dispatch the following letter to his majesty.

"MOST renowned, most potent, and most inlustrious king, and " lord, filled with majesty and wealth, the " brightest princes among the most power-" ful 1 As an unjust war is deservedly de-" tefted by all nations, and feldom comes to a happy conclusion; fo our being ob-" liged to act against your majesty (pur-" fuant to the command of our general, " and the council of the Indies,) is founded " upon very just and legal pretentions.
" Had your officers thought fit to treat us " according to the tenour of your majef-" ty's patent, or Firman, granted to us, " we should never have attempted to raise " any differences betwixt your majefty and " us, much lefs have had recourse to open " hostilities. But when we were forced to " fee our traffick, not only in this place, " but also at Bengale, interrupted and spoil-" ed by most injurious monopolies (to the " great detriment of the company) by iin-" tolerable affronts, and refuling our just request, and humble petitions, to have " the two fugitives, and fince circumcifed " fervants of the company, delivered into " our hands; and to have due reparation made for the damage fuftained by the " company in the robbery committed up-" on their factory. All these injurious pro-" ceedings have obliged our governor-ge-" neral, and the council of the Indies, to " have recourse to the law of arms, to pro-" cure us reafonable fatisfaction; and ha-" ving for this purpose sent us four ships " from Batavia, we did the 12th and 16th " of this month, feize your majesty's ships the Genjawer and Sababbi, (coming from " Mocha,) and after having taken out of " them all the ready money they had " aboard, and understanding that the faid " Genjawer and Sababbi belonged properly " to your majefty, we thought fit (out of " respect to your person) to have them carried by our feamen into the river, and " under the castle of Suratte, not question-" ing but what we have been forced to un-" dertake upon this account, for the main-" taining of our just rights, will meet with " a favourable construction from your ma-VOL. III.

" jefty. The money feized by our veffels, "fhall not fuffer the leaft diminution, but be kept with all fecurity, till fuch time that your majefty fhall grant us a new patent in due form, purfuant to fuch articles as we have orders from our fuperiors to reprefent to your majefty, and are as follows:

" I. It is defired that leave be given to Articles "build a warehouse for our own use, ci. Proposed by ther in or near the fquare of the cattle, to the Great where we may lay up fafely our mer-Mogul, chandizes at the first hand free from those diminutions and loffes we fuftained yearly in the Ali vandigo, paying exactly the usual customs, that done, we shall be at liberty to carry on our traffick, as formerly, undifturbed and unmoleited. The governor's answer was, "That el- The answer. ther a place or house should be granted us just without the castle, not far from the Alphandigo, for our proper use only. "II. We defire that our traffick may be carried on without diffurbance at Bengale, and in the circumjacent places, free from paying any duties, except what is paid usually at Pipeli, (the place where goods " are imbarked,) pursuant to the patent formerly granted by his majesty, but contravened by the avaritious governors. Hereunto it was answered, "That the governor Miermofa should endeavour to obtain this point from the king. " III. Restitution was required of such fums of money, as of late years had been unjustly detained, both at Suratte and Amadabath, and full fatisfaction defired for what customs had been extorted from

"for what cuftoms had been extorted from
our fhips betwixt Agra and Amadabath,
contrary to the express words of his majefty's patent; the whole sum amounting
to forty one thousand four hundred and
seventy nine Ropias.
"IV. His majesty was requested to issue
his orders for the full restitution of what
money was taken out of our factory at
Stratle; and that a certain sum (as his
majesty should direct) might be allotted in
lieu of satisfaction for the robbery committed upon the said factory, the mur-

"mitted upon the faid factory, the murdering of the company's fervants, and the injuries and affronts put upon us: the fum of the money taken away from thence amounting to fixty fix thousand Ropias.

CHAP.

Unto these two points the answer was made; " That the restitution of what was taken from us was a reasonable request; " but to give fatisfaction, for that other " enormities were committed by robbers, (fince fled from justice,) was not in their power; but if any of these criminals could be taken, they should be delivered into our hands.

" V. That for the future none of his majefty's ships, or any others belonging to those of Suratte, Bengale, or other places, should traffick to Achin, Pera, Queda, Oedjang-Salang, Malacca, &c. and in cafe they should, they might be seized and declared as good prizes by our veffels, by reason that the company being then ingaged in a war against these places, were refolved to block up their rivers, and to keep all foreigners from trafficking with them by fea, till they have received entire fatisfaction at their hands.

"VI. It was defired that his majesty would deliver to us the (beforementioned) " two circumcifed fervants of the company; and if they were at present out of reach, to deposite into our hands, in lieu of them, four hundred thousand Ropias; which fum shall be restored immediately after the delivery of these two per-

The answer was; "That one of these circumcised fellows was retreated many years before into Persia; and the last died in his flight about eight months before: but if they would have his bones, they would endeavour to procure them.

" VII. That if ever any of the company's fervants shall run away hereafter, they shall not be protected, much less be circumcifed; and in case any of the inferior officers should notwithstanding this detain any of them, (contrary to your majefty's knowledge) they shall be obliged to deliver the same to us.

" This article was granted, provided they did not take refuge among the Raspoutes, then in rebellion against the

Mogul.
"VIII. That fatisfaction should be given for what expences the company had been forced to be at both by fea and land, fince the robbery committed upon their factory.

"This article was rejected, a general fatisfaction being promifed already.

IX. That for the future a sufficient guard fhould be kept to protect the fervants and goods of the company from the like danger; and that in case any such thing should ever happen again, the governor shall be obliged to man. fatisfaction.

" It was promifed, that for the future a Balden guard should be kept to secure the company against all danger.

X. If our Caffila, or caravan, (which God forbid,) should be plundered by the way, that the governor shall be obliged to find out the goods; and if found, reftore them to us, and in case of neglect. to make fatisfaction for them.

It was answered; "That we must sue for a Firman, or patent, on that account, which would without question be

granted. XI. That in all the cities, towns, and territories under his majesty's jurisdiction, we shall be exempted from paying any duties, custom, or impositions, except the customs at Suratte and Brochia; and in cafe any money should be exacted from the fervants upon that account, the money shall be made good by his majesty's Duwan, or commissioner, at Suralle.

" XII. That the cuftom payable from fuch goods as are to be exported, shall continue on the fame foot as fettled by the king's last Firman, or patent.
"This article was granted without the

least limitation.

" XIII. That the customs of the merchandizes imported, shall (as formerly) be fatisfy'd with merchandizes each in its kind.

" This was also granted.

" XIV. That we shall be at liberty to dispose and sell our cargo's and goods where and when we pleafe, without being controuled therein by the governor, or any other merchant.

" This was likewise agreed to. " XV. That no governor, of what quality or degree foever, shall obt ruct us in the buying up what commocities we have

occasion for, or imploying of brokers and other fervants for that purpose, such as we judge may be most serviceable to us; neither shall they be taxed, or otherwife molefted on that fcore.

It was answered; "That doubtless his

majesty would grant that article; and that in the mean time no body should intermeddle with the traffick belonging to the company.

XVI. That no body, of what degree or quality whatever, shall pretend to ob-" ftruct us in the fending away of our goods, or stop our Caffilas (caravans) or carts, and camels thereunto belonging, much less to endeavour to detain the same after they have been hired.

Unto this it was answered, " That the king would doubtlefs grant this request. " XVII. In case of any contests ariling betwixt both the nations, whereby mur-

vered, "That the grant this request, any contests arising ons, whereby mur-"der Baldaus, "der or manslaughter may ensue, (which God forbid,) the governors shall have "power only to punish the criminal, if he be one of his subjects; but if he belong to the company, he is to be put into the hands of our directory, in order to be punished according to the laws of our country; and if any of our people engage with any of the Indian women, the fame shall be delivered up to us to suffer condign punishment.

Unto this it was answered," That this "article must be referred to the king's determination; but that further fatisfaction should be given upon this head to the Dutch company at Suratte.

"XVIII. If by tempefts, or other accident, fome of our ships should be stranded, or otherwise be lost in these coasts,
the goods saved by your majesty's subjects shall be restored to the owners.

This was granted.

"XIX. That we shall be maintained and protected in the quiet enjoyment of the propagating and refining of the salt-petre; and that we shall meet with no opposition from the governors in transporting the salt-petroposition from the governors in transporting the salt-petroposition from the posterior with new exactions, as it happened two years before when the prince of Zaasschan squeezed fix hundred ropias out of the company.

"This article was referred to the king.

"XX. That fuch as fhall be injurious in "words to any of our nation, shall be pushified by the governor, in the produce of the affronted party, to prevent further "inconveniencies, which otherwise might arise from thence.

"This article being very just, was agreed

"XXI. That we shall have full liberty to keep and maintain the yatch we always have had upon the river of Suratte, and (in case this becomes useless) to build another, and use it as formerly, for our diversion, or other occasions.

"We don't in the least doubt, but that your majesty, according to your wonted "bounty, will take into ferious confidera-"tion this our humble, but nevertheless just " and equitable request; it being our con-"flant wish, that matters may be brought "to a fpeedy accommodation: and we promife that immediately on the receipt " of your majesty's Firman, or letters pa-"tent, we will discharge what money and persons are in our custody, and carry on " our traffick in your majefty's dominions, " as before: but in case your majesty " (which we hope not) should refuse our " petition, we defire notice may be given us thereof, that we may in time (with your majefty's confent) remove our ef-" fects, and quit your territories; it being

"our firm resolution not to stay here, unless Baldeus."
your majesty will be pleased to grant our just request; notwithstanding which

"we live in hopes of a favourable answer from your majesty's goodness."

Unto this was affixed another paper, as follows.

Most potent King!

UST upon the conclusion of our humble petition, the deputies impowered by Miermofa the governor, to " treat with us concerning the differences on " foot betwixt us, viz. Mierfia Mamoeth, " Hagie Siasbeecq; Zabandaar, and feveral " other persons of note, have promised us " to give fatisfaction for the money (purfuant to your majesty's orders) taken from us, to stop all traffick from Bengale, and this place, &c. to Achin, Pera, Queda, " and Oedjang-Salang, &c. till the differences betwixt us and those places be " brought to a conclusion; concerning " which we expect further orders from our governor-general of the Indies. It was " further promifed us, that a place should " be affigned us for the builing of a ware-" house, near the Alphandigo; which as well as the other articles being confirm'd to us " by oath of the before-mentioned depu-"ties, we were on our fide willing to re-" leafe the goods feized by our ships, which " we have done accordingly, and refettled " our traffick at Suratte as before: all which we hope will not be unacceptable to your majesty; humbly begging your majesty to be pleased to take our farther proposals into confideration, and to favour us with your royal Firman, to avoid all further differences, and to establish a mutual, firm, and everlafting correspondence betwixt us, which we shall very religiously observe, (as long as your majefty's governors don't act contrary to the faid Firman,) without the least interrup-"tion on our fide. We wish your maje-" fty a prosperous and long life, and vic-"tory over your enemies.

Dated in your majefty's city of Suratte, September 28, in the year 1649, after the birth of Christ.

The King's Letter was thus. :

The King Chaasjan fends the following Directions to Micria Arep, bis Governor of Suratte.

"JUST as the Sajetes are efteemed King's leading among the faints, to is Mierfia Areptet, or Fitzer respected in his family. I would have man.

" you rest secure of my royal favour: be-

Baldæus. " fides what dignities you were possessed " of before, we have thought fit to bestow " upon you the reward of Paans Zeddi, " and three hundred horses for your services, in the government of the open country; and fince the departure of Mi-" ermofa have put you into his place; and " for the better maintaining of your grandeur, have allotted you the royal reve-" nues of both your governments, in the " administration of which you shall be very " vigilant and courteous; towards the " chief merchants you shall comport your "felf very obligingly, and give a helping hand to all the foreign nations trafficking there, as tending to the no small increase of our treasury. Your authority shall not extend to exact more than the usual customs, even of the meanest perfons, but you shall act in every thing as a man of honour and conscience: what rarities you happen to meet with coming from foreign places, you shall (like your predecessor Miermosa) send to my daughter Sahebbejen, who twice a month pays "her respect before my throne; whatever is extraordinary fine and rare, let it be " valued, and purchase it of the owner ac-" cordingly; but if you cannot agree, fend

" him hither, that he may be fatisfied in Baldens, his just demands. So foon as my royal -Firman comes to your hands, you shall endeavour to lift ten christian constables, well versed in their art, into our service. and you shall spare no cost to have some great cannon cast for our use. We have been informed, that about two years ago, the *Dutch* factory was robbed of fifty He make thousand Ropias, for which they have it left than thousand Ropias, for which they have it left than the many belonging it is feized divers fums of money belonging to our merchants, and coming in their ships from Mocha, and have thereupon declared their fentiments to the governor Miermofa; it is therefore that I command you to oblige the Hollanders to restore the faid money to the owners, who have neither the least share or knowledge in what relates to their loss; and in case you should not be able to bring " things to an agreement with the Hollanders, we command you to demand the faid fums of money of Miermoja and Ommerchan, and pay the fame to the faid merchants, (whose effects are seized,) in recompence of their loss.

These are the contents of the king's letter, as it was translated from the Persian.

CHAP. III.

The Chom of Suhali, or the Road before Suratte. Traffick of the Dutch, English, Moors, and Portuguese to Suratte, Gusuratte. Brochia, Goga, Pattepatane, Mangerol, Brodera, and other places,

their ancient records) pay a yearly tribute of two millions Mamoidys, or one million of livres, or four hundred thousand crowns, to their king Achabaar, one Ganna Ganna being then their governor, who had eighteen hundred villages under his jurifdiction. All about Suratte are abundance of very pleafant and stately summer-seats, and magnificent burying places, (a thing much in request among the Moors,) besides feveral large cifterns, or rather ponds, faced with freeftone. Among the rest one deferves particularly to be taken notice of, as having no less than a hundred angles of

> of which stands the tomb of the founder. About an hour and a half to the north from the mouth of the river of Suratte (named Tap-gyly) is a road, where ships may ride at anchor near a ridge of landbanks, which, together with part of the continent, breaks the force of the winds. This road, commonly called Chom Subali,

twenty eight yards each, with stone steps to

lead you down into the ciftern; in the midft

THE city of Suratte did (pursuant to or Sualicom, lies at twenty one degrees fif-The Com ty minutes north latitude, extending from of Suhii. north-east to north, and again fouth-west to fouth: the entrance of it is but narrow, and at high water not above feven, but at low water scarce five fathoms deep, with a hard fandy bottom: the north-north-east, and fouth-fouth-west winds make here the highest tides. The harbour of Subali is not above a musket-shot broad: the fouthfouth-west winds make this road unsafe, the land-shelves lying then almost dry. The English settled their factory there 1609, and the Dutch 1616, who carry their merchandizes upon waggons drawn by oxen from the faid road four leagues to the city.

It is to the settlements of those two na-Traffit of tions Suratte owes its chief increase in Suratte trade, many rich merchants and artifans having been drawn thither fince that time, who fend their commodities thence by the Red-Sea to Arabia, Aden, Mocha, Hideda, Juda, Mecca, Chibiry, Catziny, Doffer, and Souakin, (in Ethiopia,) confitting in fine and coarfe Indian, Gusuratte, Decan, and

Baldeus. Bengale stuffs and cloths, callicoes, indigo, fugar, gums, ginger, tobacco, wheat, rice, butter, and other provisions, in which this country abounds. Besides that two or three of the king's ships trade into these parts, and transport certain precious commodities belonging to some peculiar merchants and persons of the first rank; these are generally obliged to the company, for furnishing them with some able scamen and constables, (the Moors being but ill versed in these things;) especially while they were

at enmity with the Danes.

One of the king's fhips, named Saby, arrived here 1618. in its return from the Red Sea; the cargo whereof confifted in coral, camblets, fattins, velvets, woollen and linen cloths, tin, quickfilver, cinabar, leather, faifron, flaves, (both black and white) gum arabic, aloes of Socotora, amber, civet, fanguis draconis, myrth, raifins, almonds, dates, coffee-berries, and about fix or feven hundred paffengers returning from Mahomet's tomb at Mecca and Medina; the whole valued at two millions five hundred thoufand Ropia's, each Ropia being about

gaRopia, half a rix-dollar.

These ships set sail in March and April for the Reil Sea, and return in September or October; they soldom spend above twenty five days in their passage. The inhabitants of Goa, Dabul, Beffain, Daman, and Din, do also sind their thips to Mocha and some other places in the Red Sea, and the Benesial juns and Armenians used to come thence to Suratle in their light ships loaden with all all forts of trilles, which they exchange for wheat, linen, rice, and costee-berries.

Towards the latter end of the Mouffon, viz. in March and April, abundance of Materials. labars refort hither: thefe being mortal enemies of the Portugues, are commonly well armed with fire-locks and feynitars, and formerly used to be very mischievous to them. The commodities they bring to fale here, are coarse sugar, cardamon, pepper, and cayr, (of which they make cables and

ropes,) and coco-nuts.

Formerly the inhabitants of Suratte used to send yearly one or two ships in May or June (when the Portuguese ships were in harbour) to Achin, Tanasseri, Queda, and the Malarve islands, laden with stuffs, and cloths, and callicoes; and returned with pepper, camphire, cloves, nutmegs, mace, sandel-wood, porcelain, Chinese silks, (brought thither by those of Malacca,) tin, benzon, clephants teeth, and coco-nuts; the last being almost the only product of the Maldive isles.

The men in power here are generally very haughty and fierce; and though fufficiently curbed by the king's absolute iway, yet by Vol., III.

reason of the distance of the provinces from Baldæus, his residence, commit many enormities in this territories bordering upon Persia, Auwa, the river Ganges, and Bengale, thence to Decan, and to the west by the sea.

The province of Gusuratte (in which all Extent of the beforementioned cities lie) extends in Gusuratte. length from fouth to north; it begins at Damana, and reaches forty Cos beyond Amadabath, bordering upon the country of Pathane inhabited by pagans, fo that its whole length is one hundred and eighty Cos, or ninety Dutch leagues: to the east it borders Two Indian upon the country of Parta Bufia, or at least Cos one within forty Cos or twenty leagues of it, leagues. extending further eaftward for three days journey towards Amadabath, and to the west to the sea, and the kingdom of Suadi, which is divided from Perfia by a great defart. It was a most fruitful and populous country, before it was reduced by the Great Mozul.

About twelve leagues to the north of Su-The city of ratte lies the city of Brochia about nine or Brochia. ten leagues from the fea, and twenty one degrees fifty fix minutes upon the river Nardabath, which coming down by Decan and Mandouw, affords a good paffage for fhips, about half way from the fea towards Brochia, the paffage being ftopt up there by a fand-bank, which has not above nine or ten foot water. The fituation of this city is both very convenient and pleafant, upon a hill, being furrounded by a ftrong ftone wall: this place is famous for its manufactories of linen and cloths, of which they make more here than in any other place of the *Indies*; and they have the best way of whitening the first. The *Malabars* used formerly to come hither every year with nine or ten ships. The Dutch and English have had their factories here a confiderable time ago. Its inhabitants are for the most part Benjans, who are very expert in managing the linen manufactory: the two fuburbs of the city are chiefly inhabited by callico-weavers and merchants: Brochia is reckoned to contain eighty feven villages in its territories, the country round about being all low grounds, except that about five or fix leagues to the fouth-east, the mountains of Vindat have their beginning, which are very rich in Achatstens. All merchandizes paffing through Brochia pay two per Cent. cuftom.

Goga is a finall city feated in the bay Goga thirof Cambaja, where it grows fo ftreight, y leagues
that it rather refembles a river than an baja,
arm of the fea: it has neither walls nor
gates to the land-fide, but is defended by
a ftone wall towards the fea. Here all
the ships defigned for Arabia, and the
fouthern parts, (by the merchants of Cam-

Baldeus, baja and Amadabath,) are careen'd and ed, and the true fituation of the place where Bald me victualled, there being a fafe road here, though fomewhat shallow: here also the Portugueje convoys used to keep their station to expect the coming of their merchant-

There are befides thefe feveral other places of lefs note belonging to this pro-Pattapatane vince, as Pattapatane, Margerol, (menand Man- tioned by fome under other names,) the inhabitants whereof live upon husbandry and managing of cotton: Brodera, an inland town, inhabited by husbandmen and cloors the superny used to keep some coarse cloth length end its fortifications. not to

Mar. abab wer for its pleafant fituation, fometimes hore ed with the refidence of its kings, but is fince come to decay to that degree, that it is no more than a poor village now. We will also make mention only of Nariau, Waffet, (a very ancient caftle,) Iffempour, Batona, and their products, fuch as indigo, faltpetre, borax, afa-fœtida, amfion or opium, gummi-lacen, and divers other commodities.

But before we leave the province of Guficratte, and take our way thence over Diu, Daman, &c. to Goa, and to to the Malabars, we may fay fom thing of its traffick. It is Traffick of beyond all difp te, that the traffick of Su-Gularatte. ratte, and adjacent places, is of great confequence, provided there be no want of ready money, and the management thereof be committed to persons of understanding. I remember that the college of XVII. give these following by-rules to their factors: to inform themselves of the constitution and manners of the inhabitants; what commodities are vended, and best to be vended there; who, and how potent our enemies

are; what religion and coin is most regard-

they fettle, in respect to its northern or fouthern latitude. Certain it is, that the inhabitants of the province of Gujuratte are a cunning and fubrile generation, who must therefore be managed with dexterity and much refervedness, mixed with a becoming gravity and outward fplendor, wherewith thefe people are much taken, yet without ever attempting to lord it over them; a thing which after has proved detrimental, if not destructive to the undertakers. It is to the wife conduct of our forefathers that we are obliged for the establishment and improvement of our traffick at Suratte. where our factory was no fooner fettled, but we fent from thence, 1624. Jan. 20, our first ship, called the Heusslen, along the coast of Melinia and Soffala, and thence to the Care of Good Hope, and fo to Hol-

This was followed the same year, March 12. by another, called the Peuca, but was forced to winter on the coast of Coromandel. These were followed, April 23, 1625, by the thip the City of Dort, and the Wefop yacht, but were obliged to winter in the ifle of St. Maurice. In the year 1626, the following thips were fent to Holland, taking their way through the South Sea, viz. the Golden Lion, Walcheren, and Orange, 1628, the City of Dort was fent thence to Holland through the straits of Madagascar, along the coast of Fulfalia.

Our Dutch vessels generally arrive here from Batavia about the end of August, in October, or beginning of November, and fometimes towards the middle of December; the Dutch factors at Suratte taking always care to fend their ships into Persia in January, or about the middle of February at fartheit, that they may be at Batavia before the end

CHAP. IV.

Of what Consequence the Traffick of Suratte is. A particular Description of the City of Mocha; and of its peculiar Customs. The City of Agra, and its Strength. The Descent of the Great Mogul; his Pomp and Riches.

OF what consequence the traffick of Suratte is to the Dutch, they have been fufficiently made fenfible by their factors ever fince 1616. The chief commodities to be vended here are, lead, quickfilver, cinabar, ivory, tin, copper, cumeta's, cloves, nutmegs, mace, pepper, porce-lain, &c. And this traffick is the more

confiderable, in respect of the communication it maintains with our other factories in those parts, with Agra, Mocha, and divers other places upon the coast of the Happy Arabia, where our traffick feems to be well established, provided we take care to live in good correspondence with those nations, which must be maintained by all pollible Raldeus, posti ~ iend some re- thefe marks upon fever the traffick final our f repr

communicather factories ocha, and dicoast of the fick feems to we take care ce with those tained by all politible tend to the difficultion thereof. Amongst these, the seizing of the Moorish ships has marks upon feveral times brought our traffick into no the traffick finall jeopardy, as it happened 1621, when on the same our thips the Samson and Wesos having made repritals upon fome Moorifo veffel, our trade into Arabia was quite interrupted, and likely to have been quite loft. And we run the same danger 1628, after the yacht the Grottenbroeck had taken a ship of Gusuratte upon the coast of Coromandel; and though our late feizure happened not to prove much to our difadvantage, yet can't we at all times promife our felves the firse fuccefs, it being certain, that though the . Moors court our friendship, yet are they, on the other hand, very stubborn, and not easily reconciled.

Another thing absolutely requisite for the carrying on of the trade here, is the king's Firman, or patent, to keep the avaricious governors of Cambaja, Suratte, Brochia, and other places, in awe; befides that the Portuguese priests are always busy to create an ill opinion of us in the Moors: they must be carefully watched in their measures and weights, without which they will play you the fame game as Godjanifan and Godjaaffan did many years ago to Sir Henry Middleton, an English knight, who put them in irons aboard his ship till they had given him

full farisfaction.

Our traffick to Mocha is likewife of great A laftrip. confequence to us: Mocha is feated in the m of Mo-Happy Arabia, at the entrance of the Red Sea, at thirteen degrees twenty eight minutes northern latitude: it is of a confiderable extent, without any walls, in a barren ground, but well built with red and blue stones, the houses flat on the top, like those of Constantinople; it has three very fine pagodes, or pagan temples, two whereof have no steeples, the third in the midst of the city, being adorned with a very high fleeple. At the north end flands a finall caftle, like a redoubt, built of blue stone, for the defence of the harbour, 1612.

Mocha was about ninety or one hundred years ago no more than a village inhabited by fithermen; but fince its reduction by the Us increase, Turks, is so increased by degrees, that it is one of the chief places on that coast now; the traffick of the Indian ships that used to come to an anchor at Aden (formerly a great trading city) being transferr'd to Mocha, by reason of the caravans which come thither with more conveniency at certain times of the year. Its inhabitants are Turks, thra ins, Benjans, and Jews: here is con-flantly a great concourse of people from the beginning of March to the middle of of comber; about which time the great ship

Baldows, possible means, by avoiding such things as kiff Sultan for the transportation of the Baldows. richeft commodities from the farthermost parts of the Red Red hither) arrives here, its cargo being generally effected at 2500000 or 3000000 of reals, and confilling in pieces of eight, golden ducats, The trade Italian golden tiffues, camblets, faffron, of Mocha. quick-filver, and divers other commodities, befides flaves of both fexes taken in the Levant, or thereabouts, being generally Grecians, Hungarians, or of the ifle of Cyfrus; of all which they pay ten per Cent. custom. The same thip fails book again the first of January, laden with spices, indigo, fine callicoes, turbants, and fuch like Indian commodities.

Befides this, there comes every year in Carnyans March a Caffila, or caravan, confifting com- over A monly of one thousand fix hundred camels, lexandria. the merchants being for the most part Turks, Arabians, and Armenians: these come by the way of Alep? and Alexandria hither, and fpend common two onths in their whole journey, because they travel not above three or for Dutch is gues in a day. They bring along with them twifted filk, gold wire, ted coras, cinabar, fatfron, myrrh, divers fort. If finall wares, needles, spectacles, knives, scittars, looking-glasses, &c. 7 is carrivan leaves the place again in Dec day, loaden with all forts of Indian commodities, and thus fpends near a twelve-month in their whole

At Cairo you fee a vast multitude of pil-Pilgrims grims towards the beginning of the year, going to Mocha, who take the conveniency of this caravan to travel to Mocha, eight leagues from whence lies Medina, where is the tomb of Mahomet, which is thus yearly vifited by betwixt thirty and forty thousand pil-

Mocha has been fo rich for many years Riches of paft, that in cuftoms and taxes it pays no Mocha. less than two hundred thousand reals, or pieces of eight every year to the Grand Seignior, being one of the largest and most confiderable places under the jurifiliction of the baffa of *Yemak*. The governor of the city fits fometimes in personat the custom-house, visiting the packs and chefts, he having a certain allowance out of every cheft or pack. Al' Indian ships coming to an anchor here are obliged to pay, befides the ordinary cuftoms, anchorage-money according to their Anchoragebulk, from ten to fifty reals, which, with money. fome other exactions, makes the whole amount to fifteen per Cent. The Turks here have also another invention of fqueezing fome money out of the Moorifb Nachodes, or officers of the ships; for the governor having fummoned them immediately after their arrival to appear in his presence, called Manfouri (which is kept by the Tur- they are conducted thither in great state,

ing reconducted to their lodgings, the clothes are taken away again. The fame is repeated afterwards just before their departure, when they are reconducted to their boats; and their clothes being taken off again, each officer is obliged to pay for this mock drefs twenty or twenty five reals each time.

No fooner are the Moorish thips come into the roads after they have dropt their an-Rudder and chor, but they must carry their rudder and tails to be fails afhore, and unload the whole cargo of oroughs as the fhip, (whether they fell it, or not,) of which they are obliged to pay the full cuftoms. After they are quite unloaden, they give a fignal with a cannon for the governor or his deputies to come aboard to fee whether any thing be left behind; and then

they have liberty to fell.

In the firing the Portugueje come hither with their thips from Goa, Goga, and other places; their cargo is commonly indigo, farcaa, callicoes, fail-cloth, all torts of Guharate fluffs and clothing, tobacco, rice, and medicines; most of which commodities are fold to the Turky caravans, except the rice and tobacco, which is confumed in the country. They carry back reals or pieces of eight, golden ducats, a certain root used by the Indians in dying red. A little before, or about the fame time, ufed alfo to come to Mocha the ships of Daman, Cambaja, and the Malabar coall, loaden with pepper, clothings of Cambaja and Coromandel, allegia's, taffecela's, red and white caffen, red jeta's, canckyns, baflas, fine turbants, white and blue girdles, painted callicoes, rice, tobacco, coarfe and fine porcelain : in lieu of which they carry back hories, raifins, almonds, camblets, elephants teeth of Soffala, red roots for dying, which grow only in Arabia, chauru or coffee-berries Befides these the inhabitants of Achin, of Paty, and other places on the coast of Melinda, trade hither: they commonly fet fail from home in February, or beginning of March, and return from Mocha about August, to take the conveniency of the Monfiel

The want of good water and fuel, which ttuor and fuel fearer the ships must purchase here at a dear rate, is a great defect in Mocha: however, not far from the city lies a fmall ifle, where the English used to lay up and careen their fhips: here you may have provisions for old clothes in abundance, as likewife fuel and water enough; whence it is evident that the

> trade of Suratte, Agra, Mocha, and Libiry, (a city feated on the red fea, at fourteen

Buldwis, attended by his Grums, pipes, &c. and be- degrees fifty minutes, fortified with four Bullion round baftions, and adorn'd with three temples,) is one of the most considerable in those parts, as the English have found by

experience.
But before we take quite our leave of Su-Things 4 ratte, and the adjacent territories, we must capite of fay fomething also concerning the city and Igracastle of Agra. This castle, the ordinary refidence of the Great Mogul, is one of the most noble thructures of the eaft, feated upon the banks of the river Jemeni, fortified with a ftrong wall of red ftone, with large and deep ditches, draw-bridges, and four gates. Here is also kept the king's treasury, and the whole court, or general affembly of the great men of the empire, who oftentimes are not refrained by the absolute authority of their monarch from committing most barbarous enormities.

Thus it happened, August 4, 1644, in Murder the evening after fun-fet, when all the per- commend tions of quality used to appear in the Ga- fence five falchanna to falute the king, among the king, rest Raja Ammerfing (a commander over five thousand horse, who had been absent tome days by reaton of his indifposition) making his appearance there, was asked by Sillabatchan, the king's chief Bakia, why he had not appeared there in feveral days? He answered him, That he had been prevented by his indifposition; wherewith the other being not fatisfied, gave Raja some opprobious words, which to exafperated him, that without more ado he run Sillabatchan with his fcymitar through the body, Laying him dead upon the ground, Another lord named Galieban, feeing the other murdered in the king's fight, cut almost oil the arm of Raja, and another gentleman, the fon of Raja Rittelda, dispatched him quite. The king a sing this tragical spectacle gave immediately orders that the body of Sillabatchan should be carried to his house in order to his burial; but that the body of Raja Ammerfing should be thrown into the river: but fcarce were they got with the body without the gate to execute the hing's command, when fome of the Rasi sutes, (a rebellious crew,) who had ferved under him, feeing their commander's body dragged thus along, did fall upon the king's fervants, and killed above thirty of them, among whom was the king's fcepter-bearer; fo that if the king would fee his orders put in execution, he was obliged to fend a confiderable force to protect them against the Rasboutes.

Agra has four gates, one on the northfide, covered by ftrong works; the fecond
on the weft fide, where is the market place,
and the royal court of judicature; the third
on the fouth fide leads to the royal palace,
being always chained up to prevent any body
from paffing through it on horfe-back, except the king and hischildren: the fourth faces
the river, where the king every day falutes
the fun, and about noon fees the engagements
of elephants, lions, and other wild beafts.

The city of Agra therefore is now the capital city (as Labor was formerly) of that part of the Indies on this fide of the Ganges, which is under the jurisdiction of the Great Mogul. The castle is said to have been sounded by king Accabar, (descended from the great Tamerlan,) after the conquest of Guillette.

fivalle, and I will not pretend to give you an exact from I will not pretend to give you an exact from I will not pretend to give you an exact from I will not be forces he brought into the field 1630, againft Chaijaan, which confifted in one hundred and lorty four thousand five hundred horse, and sive thousand elephants; these last the Megul also uses for his diversions, and he is often seen in great state on the back of an elephant richly accourted, attended by a great number of horse. When these elephants are to engage against one another be-

fore the king, they pay their reverence by Baldens, bending their knees, and shaking their trunks to the king; which done, they fall Combat from with a great deal of sierceness; but as the difference as they are hotly engaged, certain performs are appointed to part them; which done, all enmity ceases betwixt them, they touch one another with their trunks, and are fed with sugar reeds, and arack, or strong-waters.

As to the wealth of the Great Mogul, the fame appears in its luftre on certain feftival days; the new-year's feaft kept on the Feftival day of the first new-moon in March, days. which lasts eighteen days. On the young the prince's birth-day every body brings his birth-day. offerings to the king, who in his turn makes presents to his courtiers, bestows new places and dignities upon such as have deserved well, and augments, their yearly salaries. The people slock on that day to the queen's palace, (if she be living,) where having likewise made their offerings under the sound of their musical instruments, the prince is weighed in a golden pair of scales against gold and filver, which (after the weight thereof is set down) is distributed the next day among the poor.

The prefent king's birth-day is celebra- The king's ted the fecond of September, when the king birth-day is weighed in the fame manner against pre-

Buldens cious stones, gold, filver, gold tisties, filk rtuffs, butter, rice, fruits, &. which is afterwards bestowed upon the Brahmans ; and nuts made to curioufly of gold wire, (as likewife almonds, and other fruits,) are thrown among the people, that a thousand of them weigh not above twenty ropias, and cost about fixty ropias. The whole ceremony is concluded with drinking to a great excefs all the night long, notwithstanding Ma-bones's law. Sir Thomas Row relates that he had a golden cup befet with Turquoifes, Rubies, and Smaragdes, prefented him by the Great Mogul on his birth-lay, but not till he had emptied it four or five times.

The Moors also celebrate a certain feast to the memory of two brothers, fervants to Mahomet Raly, who being on their way to Coromandel on pilgrimage, were forced by the pagans of the country to feek for shelter in a certain castle, but being desti-tute of water, they fallied out couragiously upon the pagans; and after having killed many of them, were at last flain themselves. Their memory is celebrated in June, ten days after the new-moon, when they carry a bear along the streets loaden with turbants, arrows, bows, and feymitars, certain priefts finging doleful tunes, and flashing them-

felves with knives, till the blood follows Batt very plentifully. In the market-place they they fet up the figures of two men of thraw, representing the murderers of these two saints, at which they let fly their arrows, and at last burn them to ashes. They keep also another feath in June, when they kill abundance of he-goats, and afterwards fraft upon the meat. This is faid to be done in commemoration of the facrifice of Abra-

The Great Mogul being absolute lord over thirty feven large provinces and kingdoms, the persons and estates of all which are at his fole difpofal, belide the immenfe prefents of his subjects, (none of whom dare approach his person without them,) must needs be matter of immenfe treatures. The king of Visiajour fent at one time thirty elephants, two whereof were girded by golden chains, weighing four hundred pound weight, two others with filver chains, the rest of brass; besides five hundred horses, the faddles and bridles whereof were befet all over with diamonds, pearls, and rubies. Mr. John Twift has given the world an exact account of the treasury of king Acca-

CHAP. V.

The Title of the Great Mogul; and of the Kings of Achem and Siam. The Origin of Mahomet; some of his pretended Miracles, Alcoran, Uc.

I T is most furprizing to understand what god-like titles the subjects of the Great Mogul bestow upon their lord and master! How all his words are looked upon as oracles, and all his actions received with a profound amazement! Hence it is that the vulgar fort are really of opinion, that certain rays dart from his head and turbant, which admit not of the near approach of indifferent persons; and that they scarce ever mention his name without the additional titles of the most potent upon earth, lord of the world, great monarch, the most exalted majesty, the brightest of princes among the great ones, &c. Tis true, most of the Indian kings affect most magnificent, or rather vain-glorious titles; but the kings af Achem and Siam feem to outry all the reft in this

The king of point: the first stiles himself "King of the
Achemia" "world, created by God, whose body " fhines like the fun at noon-day: a king " unto whom God has given the luftre of

" full-moon; a king chosen by God; a

"king perfect as the north-star, king of

kings, of the posterity of Alexander the Great; a king before whom all other kings must bow their heads, and pay homage; a king as wife as a round globe, and happy like the fea; a king who is God's flave and fervant, who fees God, and lets the world know the justice of God; a protector of God's justice; a king bleffed by God; a king who covers the iniquities of men, and forgives their offences; a king under whose shade flaves feek for shelter; a king perfect and infallible in his counfels; a king and benefactor to his people; a just king, who maintains God's juffice; the most beneficial king upon earth, the soles of whose feet emit a most odoriferous fcent, beyond all other kings; a king whom God has bleffed with his gold mines, whose eyes are as bright as the morning star; a king who is master of many elephants of all forts; a king unto " whom God has given riches, to adorn his " elephants with gold and precious flones;

The king of Siam goes ftill beyond it, as may be feen by his letter written 1636, to the late prince of Orange, Frederick Hunry.

THIS is a golden letter of friend-" I fhip and confederacy, replenished with the brightness of God, the most ex-" cellent, comprehending all that is to be " known; the most fortunate, above what " is to be found by men ; the best and the " most secure in heaven, earth, and in " hell; the most magnificent, delicious, " and most agreeable words; the glory " and irrefittable virtue whereof pass all " over the earth, with the fame vigour, as " if through God's power the dead were " revived from their graves, and pu-" rify'd from all their iniquities, to the " furprize, not only of the pricits, but " also of merchants, and all the servile fort " of mankind. For what king can com-" pare with me, who am the most potent, most illustrious, and invincible? The 46 mafter of an hundred crowns, adorned " with nine forts of precious stones; fu-" preme lord [we pals by some blasphemous "expressions] of the vast and most no-" ble kingdom of Siam; the bright-" ness of the most beautiful city of India, " the capital city of the world, the streets whereof are crowded daily with people; " a city adorned with all the beauties of the "world, and irrigated with delicious " brooks, whose lord has a palace of gold " and precious stones; a master of gilded " thrones, of the white, red, and round-" tailed elephants, which three forts God " has not bestowed upon any other kings; " a divine lord, in whose territories is de-" posited the victorious sword, and who " refembles the God of war with four

Let Mo. But to return to the Great Mogul, and of christ 600, and died 632. His compa-

language there, though befides this there Baldeur, are at leaft three other languages used throughout his territories. The chief lords of his courts have their certain monthly salaries allotted them, out of which they are obliged to maintain a certain number of horses, among these are four who maintain twelve thousand horses each, (the king's sons entertain fifteen thousand horse,) others one thousand, others one hundred, in proportion to their falaries, the whole number of horse maintained by his courtiers, being computed at an hundred thousand horse.

The Mogul changes his cloaths every day for new ones, which he beflows upon his courtiers. The Mogul entertains certain officers of quality, called Nahabes, at Swatte and other places, whole bufnets is, to enter upon treaties with foreigners, and to keep the roads free from robbers, by punifiling them with the utmost feverity. The Mogul has also a laudable custom, to lay up vast fums of money and provisions in certain places, to be referved for necessitous occasions. He appears three times a-day, and fits in council from feven till nine in the evening.

The Moguls profess the Mahometan reli-Religion. gion; but are no great zealots in it, as Athanafius Kircher has well observed in Gelal Edim Mahomet, the tenth of the Moguls descended from the Great Tamerlain the first, who called the jefuits into his empire; and their continual debaucheries in strong liquor (directly contrary to the law of Mahomet) is an infallible fign of their indifferency in point of religion: besides that, throughout all the empire, they are not near fo well verfed in the Alcoran and the law of Mahomet as the Africans, those of Fez and Morocco, &c. Notwithstanding all their ignorance, this accurfed doctrine has spread itself within fifty or fixty years, from hence all over the istes of Java, Borneo, and Celebes, befides divers other countries in those parts.

The Mahometans are obliged to pray five The Mahotimes every day, viz. in the morning, at metan relie noon, in the afternoon, after fun-fet, and at midnight; certain people being appointed, who, from the steeples of the mosques, exhort them to their prayers, by crying Lailla illa illa, Mahomed Reful Lalla: when they are going to pray, they stand upright upon a carpet spread upon the ground, holding both their hands to their ears; fometimes bowing towards the ground, fometimes standing upright again. The Alcoran is the law-book of the Mahometans, containing one hundred and fourteen chapters, being a mixture of the Jewish and Christian doctrine. Mahomet flourished about the year of christ 600, and died 632. His compaBaldæus. of Mahomet was one Abdalla, and his mother

Emine, descended of the illustrious family
of the Koreishites.

Mahomet'.

**Mahomet first served in the wars under the emperor Herachius, and afterwards served a merchant; after whose death he maried Chadiga, a rich widow; and being addicted to enthusiasm, he and his companion Sergius compiled the Alcoran, pretending that he kept correspondence with the archangel Gabriel, who in his trances (which were nothing but epileptic fits) had revealed to him these secrets. He was born at Mecca; but being forced from thence, sled to Medina, from which time Mahomitans take their Epocha, and call it Medina Alnabi, or the city of the great prophet. His doctrine was sirst received by his wise Chadiga, and his servant Seydin; after-

wards by Hali, Abubeker, Omar, Olman, Baldean, and others his followers, who were called Calipbs. The Perfians prefer Hali before Mabomet, and the Turks, Omar. Abubeker reigned two years, Omar ten years: it is he who regulated the Alcoran, and infituted the faft in the month Rammedan. Olman reigned twelve years, and conquered Manritania and Cyprus. Hali was by Mabomet appointed his successor; but the other three having usurped the kingdom, with the exclusion of Hali, this is the reason the Perfan, who adhere to the last, abominate the three former.

The hatred between the *Perfians* and *Turks* (though both *Mahometans*) proceeds from the different interpretations of the *Alcoran*, and certain ceremonies relating to their prayers, covering their heads. Ge.

CHAP. VI.

The Feasts, Sabbath, and some other Things belonging to the Mahometans; their Priests, Holy Orders, Manners, and Customs.

OT to infift here upon the fabulous trifles of Mahomet's vifions, contained in fome parts of the Meoran, we will proceed to give you a fhort account of the most material parts of the Mahometan religion.

Their cir-

They commonly circumcife boys and girls at thirteen years of age, viz. so soon as they are able to say their consessions, There is but one God, and Mahomet bis Prophet. If a Jew turns Turk, he is not circumcifed again, but only washed with water. Their washing, or bathing is performed upon a threefold occasion.

1. After they have eased nature, or co-

habited with their wives.
2. When they are to go to the Mosque, or to read the Alcoran. And,

3. After they have committed fome enormous fins.

Their high priest is called Musti, in great esteem with the grand seignior, and a member of his privy council. Next to him are the Cadilesheri, or provincial high priests of Europe, Natolia, &c. These are followed by the Cady, Seriphes, Santones, Hoggy, Talismans, and Dervises.

Sabbach.

The fabbath of the Mabonetans is on Friday, which they keep with the fame strickness as the Jews do theirs on Saturday, at least with more devotion, as the christians their Sunday. They have in each city, besides the other Mosques, one great Mosque, where they then assemble to perform their devotion. Their lent begins in February with the new moon, and continues thirty days, with a great deal of severity, for they neither ear nor drink all the day long;

but fome make themselves amends at night, though the zealots will not taste the least of wine, or any other strong liquor all that time, nor converse with their wives. They are permitted to marry as many wives as they please, though the Alcoran allows no

more than four wives.

Their churches are flat on the top, com-Churcia monly built on a rifing ground, fo as to be # Migue feen at a diffance above the other houses. They have within nothing but bare white walls, without pictures or hangings; though on some of their tombs we see certain pasfages ingraved out of the Alcoran. On the fouth-east of the Mosque stands the pulpit made of brick-work, about three fteps from the ground, from whence their teachers fay their publick prayers, and explain the Alcoran. Their great Mosques are generally adorned with two high steeples, each having stairs within from the bottom to the top. Their Mosques have scarce any revenues belonging to them, except what the priest makes by letting some few chambers belonging to them: many of them are built by charitable perfons, and fome of these have a settled income. It is further worth observation, that if a Jew will turn Mahometan, he must first own Chrift, before they will receive him among the Musselmen.

They have many ecclefiaftical orders Drawn in among them, three whereof have no poli-dam. feffions, or any other propriety; and fome pretend to fuch a degree of purity, that they profefs themselves born without manly seed. Some make certain vows, like the Roman Catholick monks; some appear quite

Some have vowed perpetual filence; fome carry water without reward; fome prick themselves with sharp-pointed needles or instruments; others carry a ring of three pound weight in their privy members.

For the rest, they believe God a corporeal being, who is carried in a throne by the angels, and Christ to be only a man, and Mabomet the comforter mentioned by John xiv. 16. They believe a third place belides heaven and hell, and therefore pray for the dead; as also a general judgment, but implicated in many fabulous abfurdities; for they tell you that two black angels, one called Munger, the other Quaregner, will appear, the first with an iron club, the other with a large fork in his hand; that every man besides is to have two angels to affift him; but if after all he cannot give a good account of himfelf, the angel with the club knocks him down, and fo he is carried to hell. And because they are of opinion that those angels appear to them in their graves, thefe are generally built hollow; whence also they often make the following ejaculation: Good God, preserve us from the interrogating angel, from the pain of the grave, and from the evil way. They add many fabulous things concerning the angel Adriel, who, at the approach of the day of judgment, is to kill all living things, and to hang himfelf at laft, till after forty years the angel Serapbiel shall awaken the fouls; and fuch-like fables too long to be inferted here.

Concerning beatitude, and the paradife, they believe it confifts in a continued enjoyment of pleafures there. They divide it into feven different apartments; one whereof is of gold, the fecond of filver, another of pearls, precious ftones, and fo forth. Here they are to pass their time in pleafures with certain most beautiful women, created for that purpose by God, whilst their wives shall look through a grate, and be spectators of the enjoyments of their husbands with these most beautiful women, who thall not be fubject to the monthly times, or child-bearing, and the men as vigorous as Mahomet himfelf, who gloried in his having out-done by double the number Ovid himself, Et menimi, numeros sustinu-isse novem. They say they shall drink in paradife of the fpring of Aleazar mentioned by Mahomet; they shall be delighted with the fcent of the most odoriferous citrons, which shall produce most beautiful virgins that thall imbrace the Muffelmans and delight them with their charms for fifty years together: and more fuch like no-

Vol. III.

imaginary corporeal pleafures, to be enjoy'd Baideeus, in the next world by fuch as have observed the following rules in their life-time, which they reckon absolutely requisite to attain to this blifs.

To believe one God; and Mahomet his Rules to prophet, and a day of judgment it to pray attangent at certain times; to wash, bow, and obferve certain other ceremonies in praying: to pay the tenths; to fast in the month Rammeden; to go on pilgrimage to Mecca; to abfrain from extortions, wine, and hogs-flesh, because they believe the hogs to have been progenerated out of the elephants and mens dung in the ark of Noab. They are also forbid not to use tables nor dice, not to fwear by God, not to be rath in our judgment, or deceive a brother either in publick or private; not to part from a virtuous wife; not to be too forward to object and discover the faults of a brother, or to dispite him; not to set the fear of God and his punishment out of our eyes, or to calumniate our neighbour, and fpread what is heard upon flight reports. On the other hand, they are enjoined to be thankful for God's mercy; to be patient in adversities, and not to despair of God's mercy; and to believe that whatever happens to us does not come by chance; (for the Mahometans maintain strongly God's providence;) not to deny a brother's request out of avaritiousness; not to raise God's anger out of love to his creatures, or to prefer a temporal interest before that which is to come: in all ghostly affairs, to have a respect to him that is above us, and in temporal matters, to those that are below us : not to enter into any affociation with the devils; to refrain from vanity, allow orphans and widows their own; to inflruct their children in fuch things as relate to the divine fervice; to do good to your neighbour; not to curse any of God's creatures, but to praise him in his works; to read the Alcoran, (except when you are unclean;) to appear at the publick congregations; and to do as you would be done by. It is further their opinion, that the fouls of the brutes are likewife to be revived and joined with

vigorous as Mahomet himfelt, who gloried in his having out-done by double the number Oveid himfelt, Et menimi, numeros fuffinument. They fay they shall drink in paradife of the spring of Aleazar mentioned by Mahomet; they shall be delighted with the steet of the most odoriferous citrons, which shall produce most beautiful virgins that shall imbrace the Musselmans for fifty years together; and more such that is the servery thing they see, subcreas the Turks of both jexes, young and old, rich or poor, are as regular and decent in their habits, as if they belonged to one certain order; and are

ig one certain order ; and

Baldæus. so careful in the education of their youth, that their schoolmasters prescribe every day a certain part of the Alcoran, which they learn by beart, and so in two years time pass through the whole Alcoran.

Tokens of

Divorces.

In their marriages, and the tokens of marriageableness and virginity, they obferve the following rules: As foon as the monthly times begin to appear, they carry the maiden, for feven days together, adorn'd with flowers, and, as it were, in triumph, to the next brook, during which time she is to eat nothing but what comes from the cocoa-tree. The Portuguese (who perhaps have got it from the Moors) publish the marriageableness of their daughters by the found of trumpets, and invite their next Their mare relations to a feast, When a marriage is to be concluded, they bargain very hard for the dowry; but this being past, and the agreement made betwixt the parents, guardians, or other nearest relations, the day for the confummation thereof is appointed: then the bridegroom on horseback, adorned with fweet-scented flowers, under two umbrello's, passes with his next friends through the chiefest streets under the found of trumpets, hautboys, drums, and other fuch-like instruments, to the bride's house, where having stay'd half an hour at the door, and entertained his bride with the mulick, and the throwing of fome fquibs, and other small fireworks, he is admitted into the house; and being seated upon a chair raifed fomewhat from the ground, and covered with tapeftry, the bride is brought to him by her parents and relations in the prefence of a priest and the judge of the place, (without whose consent "no marriage is valid:) the priest having read certain passages out of a book, the bridegroom fwears, that in case of a di-vorce from his wife, he will be ready to reflore her dowry; which done, the prieft gives the benedictions, and they are married, the whole being concluded at that sime with a present of Betel and Arrack to the guests, yet not to any excess, though afterwards they keep the wedding for three, four, fix, feven, or eight days together, according to every one's pleafure and abi-

However, divorces are very frequent among the Moors, (or Indian Mahometans,) which is foon done, if the husband, purfuant to his promife, returns the dowry, which confifts commonly in nothing else but the woman's apparel. A man is at liberty to kill his wife in case of adultery; but a woman may not so much as sue a divorce upon the same score. When a woman is divorced from her husband, fhe takes ge-

nerally her daughters along with her, lea-

ving the fons to the husband's disposal, Balders The next morning after the bridegroom has lain with his bride, and found her a virgin, publick proclamation is made thereof throughout the whole town, (for the honour of her parents,) when the bride's mother haftening to her daughter's bed-chamber, and finding the usual tokens of virginity in the sheets or cloaths laid for that purpose, she carries them to the bridegroom's parents, who rejoice with her at the conquest of their son over the maiden's virginity. But if these tokens are not apparent, matters are carried off with lefs pomp and more filence.

The Mahometans in general are enemies The Mila to incest, so that even the Grand Seignior's metans e fon, after the death of his father, never neutro touches his concubines, but shuts them up added; in a certain castle; on the other hand, they/edem are extremely addicted not only to luft, but also to fodomy itself, and combination with brutes. There are inflances, that two prostitutes in Perfia have been condemned, one to be occupied by a horse, the other by an afs; the first died, but the second escaped

with life.

The Moors feed generally upon rice in Thur fall stead of bread, which is well taited here. and grows in great plenty in Bengale, and divers other provinces; the fame is in much request throughout the Indies, in China, Japan, in the ifles of Formofa, Java, Celebes, Borneo, Ceylon in Malabar, and other places, though Japan and Bengale produce likewife very good wheat. The poorer fort, who can't get above four or five pence a day to maintain themselves, are forced to be contented with Kitzery (a mixture of beanflower and rice) boiled in water. Their habitations are alto very low and mean, Habitation made of clay, and their houshold-stuff fui-on. table to their houses; for besides a few vesfels of brafs, and the two bed-fleads where the man and wife lie, (who never fleep together,) there is nothing to be feen there, they having neither benches nor chairs, but only mats to fit upon. In fome places they use cording instead of wood for fuel: but the houses of people of fashion are spacious, and divided into many apartments, flat on the top, whereupon they take the cool air in the evening. They are very fplendid in their entertainments, wives, and houses, but especially in gold and filver plate.

Their clothing is very grave, and they thinking fcarce ever change the fashion thereof; theirs men wear coats of callico, or rich tiffues and filks; they are frait above, close to the body, fastened with a girdle round the wafte, and reach down to the knees: their breeches are wide above, and narrow at the bottom, reaching down to the legs, and

trimmed,

Raldeus, trimmed with fringes; their shoes are of gilt leather, which they turn down at the heels, for the conveniency of throwing them off upon occasion. When they falute one another, they touch the turbant with the hand only, but never move them as we do our hats. They are girt about their loins with a girdle of fome fine stuff, over which they wear another of fine linnen, and a broad dagger on the left fide. The ornament of the women confifts chiefly in bracelets about their arms and feet, ear-pendants, nose-rings, and other jewels: when they are going abroad, they cover their heads with a veil, with feveral hair-locks twifted together, hanging down their backs.

They observe certain peculiar customs in their burials; for no fooner is the breath out of the body, but their wives, children, and neighbours, make a most lamentable outcry, asking ever and anon the deceased. What made him die? whether he wanted any thing in his life-time? This they continue for three days fuccessively: then they invite his friends to a feaft in memory of the deceased, whose corpse being in the mean while well washed, and fowed up in some white fluff, with all forts of odoriferous drugs, is laid upon a bier, and accompa-

nied by three priefts, (who fing and read Baldaus. all the way,) carried by ten or twelve perfons to the grave: here they lay him upon his right fide, with the feet to the fouth; the head to the north, and the face to the west. This done, they lay boards over the whole corpse to keep the earth from touching it; and whilft they are filling up the grave, the standers-by mutter out certain prayers, and then return to the house of the deceased with the priests, who for several days after pray for his foul, shorter or longer, according as they are able to pay them. During this time, no fire must be feen in the house, what victuals they use being dreffed without doors. Upon the grave they lay two stones, one at the head, and another at the feet, the interstice being of the same length with the dead corpse underneath it: upon these the priests read certain chapters out of the Alcoran, and distribute some bread among the poor: upon the fame, at the head, t'ey set sometimes a turbant, and if a semale be buried there, a kind of a bonnet. Thus much of the Mahometan subjects of the Great Mogul; of the idolatry of the Gentives we shall have occasion to treat at large in the third

CHAP. VII.

A Description of Diu. A Sea-Engagement of the Portuguese with Jazy and Hocenus. The fingular Bravery of Laurence d'Almeyda, and Nonnius Vasques Pereria. The Harbour of Diu taken by the Portuguese. The Flight of Jazy and Hocenus. Moorish Colours fent to Portugal.

T the uppermost fouthern point of A Gusuratte lies the city of Diu, the draught whereof you see here annexed, where the Portuguese have three strong forts. It is commonly called Diu, though its right name is believed to be Tivo, i. e. an ise, in the Malabar language, as may be seen in the names of Naynativo, Anchatico, Maltivo, or the Maldive iflands, which being in all fixty in number, extend from the cape Commoryn from the feventh degree of northern latitude, to the third degree of fouthern latitude, a tract of one hundred and forty, or one hundred and fifty German leagues.

As to the origin of Diu, they relate that one Jazy, a native of Sarmatia, did fettle in this island; but being taken prisoner and made a flave by the Mabometans in thefe parts, he changed the christian religion for that of the Turks, and being fold into Cam-

baja, was at last, for his fingular dexterity in managing the bow and arrow, preferr'd to the service of king Madrafakaon, the fa-ther of king Mamudius. Jazy, to give a proof of his skill, shooting one day a certain bird of prey flying, he gained thereby fo much credit, that the king not long after gave him his liberty, and restored to him the ifle of Diu.

This ifle, which at that time had nothing to Reflored by fhew but the ruins and miferable remnants of Jaby. a once-flourishing city, began to recover part of its former fplendor under Jazy, by reason of its convenient fituation betwixt the Arabian shore and the kingdom of Decan. Having provided for the fecurity of the place, by erecting divers forts and other fortifications, and his wealth increasing in a few years, he began to equip a fleet in order to attack his enemies fhips at fea. Hocenus (otherwife named Mir Amirazem) a Perfian by birth, and

federacy with Hon cenus.

Chaul.

Baldaus, commander in chief of the ships that were to come from Egypt into the Indies, having lately had a fmart ingagement with the Portuguese, Laurance and Francis d' Almeyda, and coming that way, Jazy thought mito a confederacy with him, which was done accordingly: which they were confulting by what means but to a noy their enemies with their joint floors news was brought, that Laurence a' Almeyda was with a few ships come to an anchor before Chaul, and had landed his men, (as being quite ignorant of the arrival of the Egyptian fleet in those parts.) One Nizamaluc reigned at that time at Chaul; for the great perfors of *Decan* having imprisoned their king, had divided his kingdom among themselves, whereof this part was fallen to his share. Nizamaluc, though no great friend to the christians, yet for interest sake had ordered his subjects to maintain a good correspondence with the Portuguese trafficking in those parts; which Almeyda being not ignorant of, he thought he might flay here with fafety enough, till he had the opportunity of convoying the Portuguese merchant ships to Cochin. It was, indeed, rumoured abroad, that the Egyptian fleet had been feen on that coaft; but the Portuguese imagining that the same

might be occasioned by the arrival of cer-Balder, tain ships coming about that time of the year from Mocha, they made no great account of it: one of the ships crew at length efpy'd a confiderable fleet from the top of the main-mast, but could not discern their ftrength, till at last they began to suspect the truth; for Hocenus was advancing that way, and Jazy preparing to follow him, in order to attack the Portuguese. Certain intelligence being at last brought to Almeyda, that the enemy was at hand, he ordered his men aboard, which was fcarce done when they faw the Egyptians advancing against them. These Barbarians had flattered themselves with hopes to surprize the Portuguese; but these having just had time enough to put themselves into a good poslure of defence, received their enemies fo warmly, that they thought fit to flay for the arrival of Jazy; however, they charged one another (but at a distance) all that day; but towards night Hocenus retreated with his veffels to the other bank of the river among the fands, for his greater fecurity's fake,

hopes of boarding the Egyptian thips; but not being able to come close enough up with them by reason of the fands, he was forced to rest satisfied with plying them with his cannon, which he did all the day long, notwithstanding the enemy were much thronger in thips and men. The encountry.

gagement was very hor, Laurence d' Almande being himfelf wounded twice with an fellows, though much inferior in rank, fravers. arrow: the combat continued thus with confiderable lofs on both fides, till towards night Jazy came to the relief of the Egyptians with forty thips, but not daring to engage with the Portuguese, came to an nearer to Hocenus in order to join with him the pext day.

The Portuguese being somewhat moved at this unexpected fight, represented to " Jmi- their admiral Almeyda, that having gained fufficient honour in the yesterday's engagement, they ought now to confult prudence, and to endeavour to bring their ships out of the harbour in the night time into the open fea. Almeyda did not disapprove the advice of his fea-commanders; but as he was of a haughty temper, fo he could not refolve to fleal away by night, but determined to make the best of his way to morrow by day-light; with this resolution he ve ordered all his ships, as well merchants as others, to be ready to fet fail with the first tide by break of day. The Moors no fooner perceived his intention, but they made towards them in order to intercept their pattage; in this engagement a bullet happening to strike through the Portuguese water, and was cast upon the rocks, whence and aft the could not be got off: The Portuguese commanders feeing the impossibility of faving the ship, tent a boat to the admiral, defiring him to fave his person, and preferve himself for another occasion; but in vain, for he told them, that be would never be guilty of fuch a piece of treachery, as to leave those who had bitberto been his companions in danger in the lurch. Accordingly he animated his men both with his words and example to defend themselves to shall give you a more ample account anon. theutmost extremity; being thus animated by their admiral, they fought like lions, rejecting all proposals offered them by the enemy, resolving either to save the ship, or die in the defence thereof.

In the mean while Almeyda having one of his thighs thot off by a bullet, loft however not his wanted courage, but ordering his men to place him upon a chair near the main-maft, he there gave his or-

villaus. Fazi, attacked the first with great fury, in unfortunate ball took away part of his breast Baldare and ribs, fo that his entrails falling out he gave up the ghost immediately, and his dead dad killed, carcase was carried below deck immediate. This was the end of the brave Almeyda, who had fignalized himfelf fo often by his bravery in the fervice of his king and

whose names do well deferve a place in this ploits. history; one was Laurentius Frerius Catus, a fervant to the deceated admiral, who being wounded with an arrow in one of his eyes, threw himfelf notwithstanding this anchor at the entrance of the river, to be upon his mafter's body, and when he faw the Moors enter the thip, fell in pell-mell among them, and killed feveral of them with his fword before they could difpatch him. The other was a failer, named Andrew Van Portua, who standing on the top of the main-mast, and being wounded by a musket-ball in his fhoulder, and having before loft the use of his right-hand, defended himfelf from thence with his left-hand for two whole days against those Barbarians, till at length they promifed him his life; upon which he furrendered, and afterwards returned fafely into Portugal, where he was honourably rewarded for his bra-

The taking of the admiral's thip of the Portuguese, though it cost the Barbarians fix hundred men, (one hundred and forty being lost on the christian side,) yet occafioned no finall joy in their fleet; as on the other hand, the lofs thereof foon reached to Cochin by fuch thips as were fled thither: however the Portuguese were so far from being difmay'd thereat, that refolving to be revenged upon those Barbarians, they left no flone unturned to gather a more formidable strength at sea; and Albuquerque, after having fettled matters at Socotora, (an iffe at the entrance of the Red Sea,) did confiderable milchief to the Moors near Ormus, as Laurence d'Almeyd: the father of the admiral lately killed, venged him-felf for the death of his fon, by the taking of Dabul, Diu, and Panane, whereof we

For Emanuel king of Portugal, being informed concerning the convenient fituation of the harbour of Diu, fent his orders to Sequeria to build a fortress there, cost it what it would. Accordingly Francis d'Almeyda, after the taking of Dabul, Diu atfleered his course for the harbour of Ditt. tacked by Hocenus was for engaging the Portuguese the Portu without the harbour; but at the perfuafion guese. of Jazy laid afide that defign, it being ders as occasion required; but whilst he thought much more expedient to expect was bufy in incouraging his men, another the coming of the christians with their joint

CHAP.

Baldaus, forces, and to annoy them at their approach both by fea and land; for which purpose they had besides the Egyptian ships and those of Din received eighty brigantines of Calecut, and had planted their cannon at convenient distances along the shore. The Portuguese admiral was somewhat sur-prized to see the enemy keep so close beyond expectation; yet interpreting the fame as a good omen of his future victory, he spent the remainder of the day in viewing the posture of the enemy, and confultations what was best to be done.

He having declared his refolution of attacking the admiral's thip of the Egyptians, aboard of which was Hocenus, the fame was approved; but he defired not to expose his person at this critical juncture, but to commit the management of the de-They attack fign to Nonnius Vasques Pereria: accordtive Moors ingly, every thing being got in readiness, harbour, they entered the harbour the next morning with the first tide, and a strong sea-wind, Nonnius leading the van in his ship with two hundred chosen men, being followed by the admiral d'Almeyda to protect and cover his rear. Nonnius advanced bravely under the thundering noise of the cannon, (by which ten feamen that were furling the fails were killed at once,) and making his way through the midft of the Barbarians, at last boarded Hocenus in his ship, though not without great flaughter on both fides, he himfelf having the misforcine to be wounded in the throat by an arrow, of

The Portuguese not being dismay'd at the difafter of their commander, but inflamed with revenge, redoubled their fury, which the Barbarians being no longer able to witniftand, they gave all over for loft, Heconus himfelf narrowly efcaping in a boat to the shore, and (being somewhat diffident of Jazy) took horse immediately, in order to fly to the king of Cambaja, where so do the he was well received. Those of Calecut seeing the best of their brigantines ruined by the enemy's shot, thought it their best way

which he died three days after.

to fave themselves with the lightest over Balla, the funds, and two of Hocenus his gallies were carried off by Roderic Zoares; many of the Barbarians leaped into the fea, where they loft their lives; the rest got ashore, and dispersed, Jazy not being able to flop their flight.

There was yet remaining the ship of Jazy, a vessel of a vast bulk, appearing like a caftle, well provided with artillery and men, being besides this covered with oxes hides to keep off the arrows, and hinder the enemy from boarding by its flipperiness: the Portuguese made several attempts to mafter it, but being as often repulfed, at last funk her with their can-July The lofs of the Barbarians was com-finish puted at three chousand men, the Portuguefe had only thirty killed, but three hundred wounded. The Portuguese relate that Nounius his ship being very old, yet held out very well during the combat, but immediately after was found leaky in many places; most of the Manaluques or Egyptians were flain in this engagement, How flenderly the Portuguese were provided with all manner of necessaries, may be gueffed from hence, that when Nonnius his wound was to be dreffed, there was no linen in the ship to do it with, but they were forced to tear a shirt for that purpose. Certain it is that the Portuguese can make harder shift than most other nations, a thing of great consequence in time of war, plenty and luxury being often the ruin of the best armies. The booty got by the Portuguese in this engagement was considerable; for befides four war-ships, and as many merchant-men, with their artillery, they got a confiderable quantity of gold, filver, and precious stuffs and cloths, all which was given a prey to the foldiers and fhips crew: three of the fultan's colours were fent to Portugal, to be preserved there in memory of fo remarkable a victory; which made an ample amends to the Portuguese for the loss they had fustained some time before near Chaul.

Peace made with Jazy. Ferdinand Coutinho made Viceroy. Differences arisen betwixt Almeyda and Albuquerque. The Portuguese take Diu; which is refortified by Jazy. Nonnius goes to Diu. The Isle Betel taken. Saldania surprizes Goga.

for paste, ring in his promifes, to endeavour to engage all the neighbouring princes into the interest of Portugal; fo the peace was concluded, under condition that he should furrender all the remaining Egyptian thips to the Portuguese, release the prisoners taken near Chaul, and provide their fleet with all manner of necessaries. Jazy being very willing, or rather necessitated, to comply with the conditions, the Portuguese thought fit not to attempt any thing further against Diu for that time, as being unwilling to embroil themselves with the king of Cambaja. Thus Almeyda retired victorious to Cochin, having paid to Nizamaluc, as he paffed that way, the usual presents that were in arrears.

But Almeyda did not long enjoy the fruits under by of his late victory; for Ferdinand Coutinbediesed bo, a person of quality, was soon after sent country with fifteen ships and three thousand men to join with Albuquerque, in order to attack the Moors, and especially the city of Cale-Defences cut; for some differences being arisen betwixt hirms Al- Almeyda and Albuquerque, which were fomented by fome malicious perfons, the king of Portugal thought he could pitch upon no better expedient to prevent the ill confequences thereof, than by fending Coutinho to succeed Almeyda, who preferring the king's interest before his private interest, quietly furrendered his charge; and at the fame time was reconciled to Albuquerque, after he had managed the government of the Indies with more than ordinary conduct and wildom; a person worthy of a much hetter fortune than what happen'd to him afterwards. For in his return to Possugal having occasion to touch at the cape of Good

Hope, to take in some fresh provisions, some

of his men being got ashore, and falling into

differences with tome of the natives about the exchange of their commodities, Almeyda

running thither with fword-in-hand, to fee

what was the matter, the natives began to fall upon him and his men; and being re-

inforced with fresh numbers, set so hard up-

on the Portugueje, that they were not able to get to their ships without fighting their

way through them, which they did with a

Baldiens. **J** AZY thought it now time to fue for out the loss of their commander Almostic, Baldiens, just full peace; to obtain which he was not figure in his propriet. The major the major that the major the major than the major than the major than the major than the major than the major than the major than the major than the major than the major than the major than the major than the major than the major than the major than the major than the major than the major than the major than the major than the major than the major than the major than the major than the major than the major than the major than the major than the major than the major than the major than the major than the major than the major than the major than the major than the major than the major than the major than the major than the major than the major than the major than the major than the major than the major than the major than the major than the major than the major than the major than the major than the major than the major than the major than the major than the major than the major than the major than the major than the major than the major than the major than the major than the major than the major than the major than the major than the major than the major than the major than the major than the major than the major than the major than the major than the major than the major than the major than the major than the major than the major than the major than the major than the major than the major than the major than the major than the major than the major than the major than the major than the major than the major than the major than the major than the major than the major than the major than the major than the major than the major than the major than the major than the major than the major than the major than the major than the major than the major than the major than the major than the major than the major than the major than the major than the major than the major than the major than the major than the major than the major than the major th (who was run through the body with a It! This was the unfortunate da. end of this great man, fo famous for his great atchievements both in Eurofe and Afia, being forced to end his days upon the shore of Africa, which robbed him both of the rewards due to his fervices, and even of a christian sepulture.

We told you before, that the Portuguese thought fit not to attempt any thing further against Diu; it is now time to shew you. what further measures were taken to bring about their delign to creek a fort in that island. They had so far agreed the matter with the king of Cambaja, that he favoured their intentions, or at least was not against them; but Juzy not only used all his endeavours at court to obstruct the defign of the Portuguese, but also prepared every thing for a vigorous relitance in case of need. Jazy plays

In the mean while he was rot fparing in fair the bypowords or promifes, nay, even in deeds to the crite water Fortuguese; for no sooner arrived Sequeria the Portugat Dia from Ozmus, but he regaled the guese. fleet with fresh provisions, and the officers with prefents, with a great many protestations of friendship to the crown of Portugal: but when Sequeria began to talk to Jazv concerning the intended fort, he declined the matter, alledging that it lay not alone in his power; and therefore they must obtain the king of Cambaja's confent, in which he would affift them with all his in-

Sequeria was not fo stupid as not to smell Is discovere the rat; but thinking it best to repay him ed, in his own coin, he dissembled the matter, and returning his compliments with much civility, he prepared underhand for war; but Jazy, who had a watchful eye upon all his actions, knew fo well how to improve his time, and provide for his fecurity, that Sequeria thought it most adviseable to delay his project till the next year, against which time he expected fome confiderable ein-

Sequeria was no fooner departed, but Fa- Jazy forizy imbraced this opportunity of strengthen-fies him/elf. ing himself on all fides; he added several new works to the place, and erected a caftle great deal of bravery; but, alas! not with- in the midft of the entrance of the harbour,

CHAP.

Baldans, and betwixt that and the city defended it with a strong chain: he kept several ships loaden with ballaft ready to be funk upon occasion, to stop up the passage on the other fide, and ordered vaft pieces of frones and rocks to be funk under the walls, to prevent the Portuguese galleys from approaching near to them i he also for the better defence of the harbour hired one hundred and eighty brigantines, and fome merchant men, manned with Arabians, Perfians, and Turks, (professed enemies of the christians,) leaving in the mean while no stone unturned to thwart the defigned project of the Portugueje at the court of the king of Cambaja.

Nonnius Acunia Diu.

COMS.

Neither were the Portuguese idle on their fide, but having made what preparations they thought fit for fuch an undertaking, Nonnius Acunia, the chief commander of the Portugueje in the Indies, fet forward in order to put it in execution: but being refolved to make use both of cunning and force at the fame time, he had by prefents engaged feveral bold and cunning fellows, who were to pass to Diu in the quality and habit of merchants, but in effect to ferve for Spies, and to give notice of what they thought worth his knowledge. Thus pre-Hisrendez. pared, the time and place of the rendezvous of the whole fleet being appointed at Chaul, he fet fail from thence with three hundred fail, great and fmall, well provided with artillery and ammunition, having aboard three thousand Portuguese, as many Malabars, and two thousand Canarines, for

Dabul, a small city in the confines of Cam-Sail for baja; where the Portuguese, being much animated by the presence and speech of a certain Franciscan frier, named Anthony Petron, declared that they would not defift, till they had forced the Barbarians from their firong holds in those parts. But finding the place deferted by its inhabitants, they steered their course towards Betel, (a fmall rocky ifle not above a league in compass, separated from the continent only by a narrow ftreight,) about eighty leagues

fuch, by reason of the rocks which inclose the ifle near the shore, that it might easily be made defentible by an indifferent force, Betel begun the king of Cambaja had not long before to be forti- fent thither a certain commander, a Turk fied by the by birth, with two thousand foldiers, and Cambajans. one thousand workmen, to creek certain fortifications there; but having not had fufficient time to bring them into fuch a condition as to be able to refitt fuch a force

from Diu. The fituation of this ifle being

as this, they thought it their fafeft way to capitulate.

The commander in chief (having obtained a paffport for that purpose) had an interview with the Portuguese general, offering to furrender the iffe, under condition

that they might have liberty to depart with Ballic, all their baggage and goods. Nonnius al. lowed the first; but would not consent to to to so year. their taking the leaft thing away with them, upm to a except what they had about them. This tion. harsh answer was no sooner known in the ifle, but they refolved to abide the utmost extremity, rather than comply with it. The king's treasurer found means to have a boat built, wherewith he transported all the king's money and goods to the continent. Many of the garrison enraged with revenge A mole. and despair, brought all their hortes, but permitted moveables, wives and children tog ther, and mion. burnt thom and themfilves. There were about feven hundred left, most of them votaries, refolved to die with fword-in-hand, These like mad-men fell upon the Porceguele with more fury than effect; for the Portuguese general having repulsed them, attacked the next night by the light of the moon, their intrenchments with fo much vigour, that after a most obstinate refilance The Pre-(in which the Turkijh commander was kil-gustenin led) they left them to the Portugueje, some the fle. running to the rocks, from whence they precipitated themselves into the sea; others endeavouring to escape the sword by hiding themselves in the hollowness of the rocks; but being discovered, some of them were cut to pieces, the rest made slaves. A certain Moor having nothing left but his fword, and feeing his comrade flain juit by his fide, and a Portuguele advancing with his pike towards him, in order to kill him, ran desperately towards him, and thruiting himfelf upon the Portugueie's lance, at the fame time killed his enemy with his fword; fo that they both died upon the fpot.

The Portuguese lost in this action about Liftin feventeen perions of note, and had an hun-Portugue dred and fifty wounded, many of whom died afterwards. Nonnius thought fit to tarry here eight days, in hopes of receiving fome intelligence from his fpies at Din; this proved of great advantage to those of Din, for in the mean while Mujtapisa and Sorbar (who had been at the fiege of Aden) comits to an anchor with fix hundred Tores, and one thousand three hundred Arabians before Diu, the inhabitants thereof (who before that time thought of nothing else than how to come to a good composition) being encouraged by this reinforcement, were refolved to venture all for their defence. Multapha was no fooner entered the city, but he ordered the women, children, and other defenceless people to be fent out of the town; the reft being mustered were found eleven thousand in number, (without the Turks and Arabians,) able to bear arms: ftrict watches were fet in all places, to let no body pais in or out of the town without

special.

Baldeus, special licence; the cannon were planted on the walls, mines dug and filled, chains made across the harbour, and the entrance thereof defended by feventy three well-manned brigantines. To be flort, nothing was omitted that was thought necessary to ilrengthen themselves either by sea or land.

Non.ius Acunia in the mean time tarried at Betel, in expectation of the tidings he waited for from his spies there; but these being too narrowly watched to fend any intelligence, he refolved to take his chance, and fo fet fail for Diu, where he cast his anchor in hopes to come to a parley with the inhabitants; but he was not a little furprized when he heard the cannon from the ramparts thunder among his fhips, and three bullets that had paffed crofs the admiral's ship, gave him sufficient warning, that it was not fafe flaying there long, which made him give immediate orders for the whole fleet to weigh anchor, and to fecure themselves without the reach of the cannon from the city. Being by this time fufficiently convinced, (without confulting his fpies,) that there were but little hopes of peace or a furrender, he took a full view of the town, to fee on what fide it might parts.

be most conveniently attacked; and finding Baldaus. more probability to fucceed on the harbour than on the land fide, (efpecially fince he was better provided for a fea than land enterprize,) he ordered all his thips and artillery to be got in a readiness, in order to attack the caffle at the entrance of the harbour, break the chains, and to fall upon the enemy's fleet, from whence he might annoy the city with his cannon on the north fide. The attempt was made accordingly, The Portubut without fuccess, the Portuguese being so guese as-fiercely; lied on all sides by the enemy's sant Diu cannon, that they were forced to defift, and Nonnius thought fit to retreat to Betel, from whence he returned with his fleet to Goa, leaving Anthony Saldania with fome thips on the coast of Cambaja, to watch the enemy's motions. Saldania, after having done confiderable mischief to the enemy, by the taking of the fmall city of Goga, and burning twenty five brigantines, left James Sylveria behind him, and returned afterwards to Goa; where having fpent the greatest part of the winter in refitting their ships, Nonnius in the spring set fail for Chaul, about two leagues from Calecut, to intercept the Arabian ships trading in those

CHAP. IX.

Nonnius routs the Mahometans; takes Bazain; and Martin Soza Daman. Badur King of Cambaja engages in a Treaty with the Portuguese. His Forces, and Expedition to Citor. The Destruction of that City. Badur twice defeated; flies to Diu. His End.

SILVERIA was in the mean while not idle, but took many ships bound for Diu, burnt fome villages, and kept the place fo blocked up on all fides, that in a little time they were within reduced to great fearcity of provisions. The next following year *Sylveria* continued to play the fame game by destroying many towns, villages, and ships: he also took the cities of Pate and Patane, as also Mangalor in Cambaja, with a vast booty, and a great number of prisoners; the new king of Cambaja being not in a condition to affift those of Diu, by reason of some intestine troubles.

Nonnius at the fame time keeping still in remembrance the difgrace he had received before Diu, and being refolved to let flip no opportunity of revenging himfelf, he laid land-men aboard them, (half Portugue, half Vot. III.

his defign against Bazain in Cambaja; accordingly he fet fail with a fleet of eighty hips great and fmall, with four thousand

Malabars:) he fent Emanuel Albuquerque with some ships before, to secure the entrance of the harbour, fent for James Sylveria, who had his flation on the other fide of Diu, and followed himfelf with the whole

Tocan the chief of Diu, had, upon notice that the Portuguese were arming against him, intrenched himfelf with a confiderable number of horse and foot at Bazain. Nonnius on the other hand, being well informed of the condition of the place by certain deferters, divided his troops into three bodies. The vanguard was led by James Sylveria, the main battle by Ferdinand de Za, the reer being commanded by Nonning in person.

As they were advancing towards the The Portutown, they received feveral fmart falutes guefe atfrom the enemy's cannon, and whole tack it. showers of arrows, Tocan having intrenched himself with ten thousand men in the

Baldens, out-works a notwithflanding which, the form time, till the Rashoutes being forced B. . . . · Pertuguele foll not fo much as one man whilst they were advancing towards the enemy, whom they charged to briskly, that they were forced to betake to their heel.; and the inhabitants feeing themfelves diferted by their protectors, followed their Portuguele footfleps. Thus this city, with all it works, fell into the hands of the Perin-

guefe, with the lofs only of fix men on their fide whereas the loss of the Moors was computed at five hundred and fifty. They found in it a confiderable booty of provifions and ammunition, as bullets, gunpowder, and brimftone. Nonnius highly extolled the bravery of Sylveria, who commanding the vanguard, had behaved himfelt to gallantly, that the main battle did not as much as come to the charge, and as an acknowledgment of his fervices, made prefents to him and all his officers. After they had destroyed all the fruits of the field round about it, they deflroyed the city, and demolished the fortifications, as thinking it not for their interest to spare a sufficient number of troops to garrifon it. Thus Nonnius having taken an ample revengupon the Barbarians, returned with his fleet to Goa, and the Mahometans being convinced by this as well as the loss of the ifle of Betel, (and afterwards that of Daman,) of the firength and bravery of the Portuguese, began to remit much of their fierce. ness, and were at last forced to submit to the building of a fort upon the ifle of Diu, as will appear out of the fequel of the

Soza #1tacks Da-

Martinus Alphonjus Soza being come lately from *Portugal* (in the quality of admiral) to Goa with five flout veffels, and being joined by thirty five thips, and fix hundred land-foldiers of Nonnius's fquadron, he fet fail for Daman, a city of Cambaja, about fourteen leagues from Bazain. This being a place of no ftrength, the inhabitants had deferted their habitations; but the Rafboutes, a daring and unruly generation, being joined by fome Turks, to the number of five thousand in all, had intrenched chemfelves near the harbour, and defended the entrance thereof with a good number of great cannon.

Alphonfus Soza took peculiar care in taking a view of the posture of the ememy; and as he was going in his boat from the harbour along the shore, having taken notice of a place in the city which was but ill guarded, he ordered fealing-ladders to be hung to the walls; so that whilst they were fealing the town the defenders fled, and thereby gave an opportunity to the Portuguefe to make themselves masters of a gate : here it was the flaughter begun, the fight being carried on with equal obstinacy for

to give way, many of them were cut to pieces by the Portugueje, who loft no more than ten men in this action, but had many more wounded. Three days were fpc in in demolishing the fortifications, and laying the whole city level with the ground: which done, Soza turned his victoriarms towards Din, and all along the co. it of Cam ".

Bacher king of Cambaja, being extremely nettled at the fuccels of the Portugue; whom he was not in a condition to oppose, at a time when he faw himfelf entangl | in another war, thought it his best way to fue for peace with Non-ins Acunia, offering Per , not only Bazain, but also the adjacent iffe, (among which were likewife the Saljetes, and s. and a confiderable tract of land on the continent, thereby to engage the Portuguei in his interest against his enemies, vi in mantina the queen-dowager of Sanga, and the Mogores, a warlike nation descended from the Scytie, who are frequently at war with the Perfians: their king Miramudius, who boatted himfelf to be descended from the Great Tamerlane, having not long before made a powerful irruption into Cam-

The intention of Badur was first to vanquish the queen of Sanga, and afterwards the Mogores: his whole force confifted in Ha walled one hundred and fifty thousand horse and Property five hundred thousand foot, beside: fifteen thousand hired foreigners, two hundred elephants trained for the war, and a very good train of great artillery: with this army he marched to Citor, a very fine and populous city under the queen of Sanga, who was not long before retreated thence with her children. The inhabitants of Citor, unable to refift to powerful an army, refolved to follow the footheps of those in the ifle of Betel, (mentioned before,) and having brought together all their gold, filver, and precious flones, &c. burnt themselves with their wives and children, with the treafure. It is faid, that during the conflagration, which lafted three days, more than feventy thousand persons perished by the flames. Badur entered victoriously into Ci-Hetro tor, where having rewarded the fervices of Ctor. his officers that behaved themselves well with prefents, he marched directly against the Magores, but with very different fuccefs; for being twice put to the rout by them, and deferted by Mustapha his general, he was forced to fly to Diu; and being full of defpair, would have taken a refel: tion to leave his kingdom, and to fend his treafure to Mecca; but being, at the earnest entreaty of his friends, removed from that resolution, he sent an ambassador to S :man the Grand Seignior, to offer him for

**Micros, hundred thousand crowns, provided he would ferd a certain number of well-difficulation plined troops to his affillance a but fearing left the defired fuccours should come too late, he offered to Soza, who then lay before Chand, as also to Nonnius Acumia, a proper place for the creeting a fort near Diu, previded they would affilt him against his enemies.

The Partuguese willing to take the opportunity by the forelock, Soza failed to Dis immediately, and being followed by Nonnius, the treaty was figned, and a place ned, viz. the hill which overlooks the harbour of Diu. This happened in the year 1535. The Portuguese went to work immediately, and laid the foundation of a triangular fort, the wall from the fea-fide to the hill being feventeen feet thick and twenty high, at the end whereof, just upon a hill near the city, was erected a redoubt, and on the other end a stone tower, (such a one as the Portugueje have at Granganor and Cananor,) from whence extended another wall to the other corner of the island : the wall was defended by a deep ditch, as far as the rocks would permit; in the midft whereof was a gate defended by two towers, named St. Thomas and St. James. Thus king Badur faw a goodly fortrefs perfected by the Portuguse within forty nine days, that part to the fea-fide being fet afide till another opportunity.

One James Bottelba, a brave commander, abut fallen into difgrace with Emanuel king of Portugal, being willing to court any opportunity of being reflored to the king's favour, got a brig intine built on purpose of eighteen feet in length, and fix broad; and having provided himself with as many seamen as were required to manage her at sea, he set fail from Dia, without letting them know whither they were bound, and proved so prosperous in his voyage, that without any remarkable accident he arrived safely at Lisbon, and brought the kind advice of their good success at Diu.

The Portuguese left a garrison of eight hundred men under Emanuel Soza in the fort, and were no fooner retired from thence with their fleet, but Badur began to repent of his having admitted the Portuguese into the ifle of Diu, (especially fince the produce in mised fuccours arrived but flowly;) where upon he ordered the governor Ninaar to furround the city with a new wall, and to inclose the royal square without the place, whereby their fortifications must approach very near to, and lie directly opposite to those of the Portuguese. These being resolved not to permit a thing of this nature,

which must needs tend to their prejudice, Baldeus. Badur was much incensed thereat, exclaiming highly against their proceedings, and endeavoured to have surprized them in their forts, which not succeeding, he fought for aid from the Samoryn of Calecut, and several Malabar kings against them.

Nonnius being advertifed of all thefe trea- Nonnius cheries, fets fail once more with twenty tals once thips and five hundred choice Policy Die. foldiers for Diu, ordering Martin Alphonia to follow him from the Malabar coast. No fooner had he cast anchor before Din, but feigning himfelf fick aboard, he fent certain persons to compliment king Badur, and beg his excuse for his not coming in perfon: whereupon Badur went aboard toge-Badurgius ther with Soza, the governor of the for, to about give a vifit to Nonnius, who met Budur at the door of his great cabbin, and faluted him with a great deal of civility. For though the death of Badur was refolved on before-hand, yet, that they might not feem to violate the laws of hospitality, they had thought fit to defer the execution thereof till his return towards the fhore: it was not long before Badur went into his boat again in order to return, but was no fooner got into it, and making the best way to the fhore, when Nonnius giving the fignal to his men, and exhorting them to do their duty, they leaped into boats kept for that purpose, and following that of Badur, attacked him on all sides. The king being grown desperate, exhorted his people to a to kill'd. brave defence, encouraging both by his words and example; which made the fight fo obstinate, that the Portuguese were in danger of lofing their prey, Soza himfelf being flain in the first attack. The bravery of a certain fervant of Badur deferves our The braveparticular notice, he being observed to have ry of a few wounded, with eighteen arrows, as many Badur. Portuguese, till he was killed by a musketshot himself. In the mean while, three yachts, armed with Turks, were fent from the fhore to fuccour the king; but being most of them killed, and the king's galley struck upon the bank, he leaped into the fea, and though forely wounded, did fwim to the galley of Tristan Pavia, and discovering himself to be the Sultan, begg'd his life; which Triftan Pavia would willingly have granted; but just as the king was entering the veffel, he was flain by a fearman, Badur flain, who knocked his brains out with a club. This was the unfortunate end of Badur, one of the most potent kings of Alia, who not long before had been a terror to all the cir-

cumjacent countries.

Mamud

the city on the fea-fide. Badur was fucceeded in the kingdom of Cambaja by Mamud his fifter's fon, who being an infant, under the tuition of Driacan, Madremaluc, and Alucan, these were follicited by Sofar (out of a hatred to the Partuguese) to engage in a war for the re-covery of Diu. Alucan having got together a body of five thousand horse and ten thousand foot, and Sofar three thousand foot and one thousand horse, they pitched their tents in June not far from Rumenstadt. Sofa attacked the town vigoroufly; but being in one of the attacks wounded in both his hands, the Portuguese got a little breathing-time, and in the mean while repaired the walls of Rumenstadt, which for tome reasons they had demolished before: for Antbonius Sylveria having resolved to fortify and defend the whole island against the Indians, was disappointed in his design by Alucan, who improving the lofs of some Portuguese ships by tempest to his advan-The Portu. tage, galled the Portuguese so forely from guese for. his ships in their entrenchments, that they sed min the were forced to quit their posts; so that

Alucan landing his men, foon became maf-

ter of the whole ifle and the fuburbs, where Baldon there happened frequent skirmishes betwixt them, the Indians being not strong enough to attack the fort, which was bravely defended by Lupo Soza Coutinbo.

Whilft thefe things were transacting in Cambaja, the Grand Seignior, to revenge the murder of Badur, (at the request of his widow,) had equipped a fleet of fixty four flout galleys, which being joined by feven ships of Cambaja, and three Moors of Malabar with three thousand five hundred landmen aboard them, under the command of Soliman bassa of Egypt, they set fail from Aden, not questioning but they would foon be masters of the Portuguese fort, and confequently of the island, from whence they might extend their conquetts into the continent of the Indies. Matters being concerted beforehand betwixt Soliman and Sofar, the last went out to meet the Turkish foundron about fifteen leagues at fea; and Anthonio Sylveria being advertised of their sylven approach, took all imaginable precaution promise for his fecurity, in disposing what force he for a nonhad to make a vigorous defence, and at the define. fame time gave notice thereof to Goa, to folicite for prompt fuccours from thence, encouraging his men both by his example and exhortations. By this time Soliman having Solima cast anchor in the road of Diu, he ordered land and feven hundred chosen men to land, and at-ports tempt the attack of the Portuguese fortress; guese. which they did accordingly, but were forced to retire to Sofar's fort with the loss of fifty janizaries killed, and a greater number wounded; the Portuguese had also six men killed, and twenty wounded.

About the fame time the Turkish fleet being in great danger of being forced by a strong fouth wind upon the coast, and much exposed to the enemy's shot, he retreated to Rumain the harbour of Madrafaba, five leagues Madrafaba, from Diu; where having concerted new ba. measures with Sofar, he sent back his landforces to renew the fiege of Diu. But Alu-can, one of the tutors of king Mamud, ha-ving conceived a jealoufy of the delign of the Turks, retired with his forces from be-Alucan fore Diu; and having represented their am-lawu Diu-bitious projects to the king, he soon obtained of him a prohibition in all his terri-

Baldeus, tories not to furnish the Turkish camp with

This proved no fmall disappointment to Soliman, who notwithstanding this did not lose courage, but purfued his design of carrying the place, cost it what it would: Afren for this purpose the Turks contrived a very put of the large fireship, which, under favour of the tide, and the smoke of some burning wood, they intended to fend into the harbour, and to fix to the fortifications; and whilft the Portuguese were busied in quenching the flames, they were to attempt the furprifing of the fort on the land-fide: but whilft they were staying for the spring-tide, Francisco seem fire Goveano, a Portuguese, found means to set hith Por- it on fire, though not without great hazard, being obliged to pass twice the enemy's fire; twenty of the Turks aboard the fireship leaped into the fea, and were all flain. The fact left by Tur's were so incensed at this disappointment, that they exerted all their fury against Rumenstadt, the walls whereof being fo ruined as not to be maintained any longer against a vigorous attack : Patieco, the chief commander thereof, thought fit ments with this fuccess, renewed the siege of Diu, both by fea and land, with more vigour than ever, leaving nothing unattempted, with canonading, mining, or whatever might be attempted to reduce the place; whilft the Portuguese, on the other hand, with counter-mines, retrenchments, and frequent falleys, endeavoured to stop their fury.
The Turks being at last, by means of a galfem the lery, advanced over the ditch, and entering the breach, a most furious combat ensued for four hours fuccessively, the Portuguese defending themselves like lions Masseus relates, that a Portuguese having spent all his balls, pulled out one of his teeth, and an much arged his mucket with it. At last the Turks were forced to retire with the loss of five hundred men flain, and one thousand wounded: the Portuguese also on their side had sourteen of their best officers slain, and fo many of their foldiers either killed or wounded, that they had fcarce forty men left fit for fervice. Besides this, they began

to be in such want of provisions and ammu-

nition, that they were very near reduced to

the laft extremity. However, they did not Baldauss. lofe courage, but encouraged one another rather to die upon the spot, than to fubmit to the most fordid slavery; the women and children were even not backward in giving all the affistance they were able.

In the mean time, Nonnius Acunia, being fufficiently fenfible of the danger of the fortress of Diu, had left no stone unturned for the relief thereof; but the case admitting of no delay, he fent fixteen Patachos or yachts thither: these coming to an anchor Diu rein the night-time before Madrafaba, had lieved. each put four lanthorns on their sterns, with an intention to terrify the enemy. This succeeded accordingly; for the Turks having by this time loft above three thousand men, and fearing the fuccour expected from Goa might be much stronger than really it was, fet fire to the city, and leaving five hundred wounded men, and most of their great cannon behind, reimbarked the first of November, steering their coast towards Arabia; and Sofar, with the remnants of his forces, retired to the continent, to the no finall honour of the Portuguese, who, with so To the fmall a number, had defended themselves great honot against barbarous undisciplined Indians, Portu but against a body of warlike, well-exercised guese, Turkish troops. It is faid, That Francis I. king of France, was so highly pleased with this brave action, that he defired, and had an original picture of the brave Sylveria, the governor of the place.
Whilst Nonnius was busied in making all Nonnius

Whilft Nonnius was busted in making all Nonnius the necessary preparations for the relief of relieved by Din, Goa Garzias Noronia was sent by Don Noronia. John, king of Portugal, with eleven men of war, and seven thousand land-men, to relieve Nonnius: among these there was one ship filled with malesactors and criminals of all forts, who had obtained their pardon from the king; but this being separated from the rest, was never heard of afterwards. Nonnius Acunia having surrender'd the government to Noronia, after a stay of ten years in those parts, set sail for Portugal, his native country; but before he could reach it, died at sea, near Nonnius's the Cape of Good Hope, on the African danth.

Noronia makes an Agreement with King Mamud. Lupius Soza con. stituted Governor of Diu. Sofar's finister Defigns against the Portuguese : He besieges Diu, in Conjunction with Mamud ; is sain in the Enterprize. The City is vigorously assaulted, and is bravely defended. An unsuccessful Salley made by the Portuguese.

Baldaus. Cends his Mamud.

ORONIA apply'd all his thoughts to the affairs of Diu; and having difpatched certain deputies to Mamud, to treat with him of a peace, they at laft, not without a great deal of difficulty, came to the following agreement; in the negotiation of which they met with no small opposition from the grandmother of Mamud and Sofar, who were continually inciting the young king to revenge the death of his uncle king Badur, viz.

There were That the king of Cambaja should remain in the poil filon of the city of Diu, and the Portuguese continue masters of the fort and harbour thereof, that they should divide the customs share and share alike; and that the Cambajans should be at liberty to erect a wall to front the castle, provided the same were done at a convenient distance.

Matters being thus fettled, Lupius Soza was constituted governor of the place inflead of Sylveria, with a garrifon of nine hundred men. But it was not long before Manud, at the instigation of his grandmother, fent a confiderable body to attack Bazain; but Laurentius Tavora making a vigorous falley upon them, constrained them to feek for peace. Sofar in the mean time having recovered himfelf, had for fix years together bent all his thoughts upon the ruin of the Portuguese; and having found means to ingratiate himself into king Mamud's favour, they fent underhand their emissaries to the neighbouring Indian princes, to engage them against the Portuguese, who they told them did lord it over them, under pretence of trafficking in the Indies. The affairs of the Portuguese were at that time flate of the but in a very indifferent condition in those parts, their treasuries exhausted, their naval strength neglected, their feamen very scarce; and the land-soldiers deserted in fuch numbers, that of the nine hundred that were in garrifon under the command of Lupius Soza, there were not above two hundred and fifty left in the government of Mascarenbas; and what was worse, there was not above a month's provision, and a flender share of ammunition left.

Sofar was not unacquainted with thefe things, having learned them from divers Portuguese merchants; so that looking upon this as a fit opportunity to execute their

projected defign, they pitched upon the Balden, winter feafon, when they knew the Porlus \sim gue fe could not be fo eafily fecured from Goa, Sofar being in the mean while not negligent Treating to cajole Mascarenbas, the Portuguese go. of Sofa. vernor, by his letters into a belief of his fincerity, the fame did not discover his real intentions, till it was almost too late; but finding no other redrefs but in a brave defence, he made all the necessary preparations for it, by fending away all the useless mouths, and fortifying himfelf after the best manner he could; and having bought up what quantity of rice, flesh, and dried fish he could get of the Portuguese, he sent advice of his approaching danger to Bazain, Chaul, and Goa. This happened in the year 1546. Sofar took for a pretence the Breaking new walls that were to be erected at one are open end of the city, which being built too near influence. the Portuguese fortress, these stopp'd the progress thereof, which soon gave occasion to open hostilities. Mascarenbas, to animate his foldiers, told them, " That they ought to remember the brave actions of the " Portuguese in this very place, where they had frustrated the designs of the Turks, " of which the same Sofar, who now came to attack them, had born his fhare; that God would certainly punish the breach of faith of this wretch; and that they " ought not to be difmay'd at the winter feafon, there being no question, but that the Portuguese, by their skill in maritime " affairs, would overcome these difficulties, and succour them in due time." The next thing he did, was to take care of all

Sofar by this time had begun to carry on Sofar athis approaches a good way, and ply'd the tacks Dis. place warmly with his carnon, but could not without much difficulty attempt an affault by reason of the ditch, which being enlarged of late, was as broad again now as it was in Sylveria's time; however he ceased not to play with his cannon, especially in the night time; and being tenfible of what advantage it would be to him, if he could make himfelf mafter of the harbour, by ta-

hefe difficulties,

e time." The

Raldeus, king the water-redoubt, he contrived such another engine, or firefhip, as the Turks had made use of in the former siege, which they intended to fet on fire, and to carry with the high tide under the fort: but the Portuquese having received intelligence of this defign, fent out Jacobo Leti with twenty men,

to burn her; which he did with incredible Baldaus. bravery, and the lofs of one man only, being forced to carry the veffel through the Sofar's enemy's fire on both tides, till he brought her within a certain distance of the fort where she was fet on fire, and consequently Sofar's project vani hed into smoke.

Not long after the Portuguese were rejoiced with a fresh supply of men, provifions and ammunition from Goa, under the command of the young de Castro, a brave gentlemen; who, after he had been afflicted with very hard tempests at sea (in which several of his veffels were separated from his fquadron,) came with the rest, being eight in number, into the road of Diu, and in spite of the befiegers, landed his men, ammunition, and provisions, which increased the number of the garrison to four hundred and Eng Ma- fifty men. About the fame time Mamud, we can king of Cambaja, came in perfon with a good number of troops into the camp:

Mascarenbas being willing to know their exact number, fent out feveral desperado's, who engaging the out-guard of the enemy, three of them were killed in the skirmith, but the rest had the good fortune to carry off one of the enemy's fentinels, by whom Mascarenhas was informed of what he had a mind to know. Majcarenbas having or-

dered certain fignals of rejoicing to be made, the enemy fent a messenger to know the reason thereof; who was answered, that 'twas done on account of the king's arrival in the camp, which put them in hopes that for the future they should fight against a great prince, whereas hither-to they had been engaged with vagabonds and rogues.

Mamud immediately after his arrival levelled his cannon with great fury against the walls of the fortress, and having brought along with him an expert gunner, he ordered him to cast certain siery balls into the place, though without much fuccefs, till the faid conftable being killed, another fucceeded in his place, who was so unskilful in his art, that his fireworks did more mischief in the camp than to the enemy. However, by the continual battering of the enemies Makes a cannon, a large breach was made by this breach in time in the wall, which the besieged repaired to the best of their power;

Baldaus, but their main reliance was upon the breadth of the ditch, which the beliegers were endeavouring a pass by the help of their galleries. To prevent this, the Portuguese had opened an old vault at the foot of the wall, in which they spent several days and nights, but turned to their advantage, fince from thence they could take away great part of the materials the enemy had brought thither for the filling up of the ditch. From Sofar hill I hence it was also that Sofar received his

death's wound, being flain by a bullet which paffed through his hand and forehead, which occasioned no small disturbance in the enemy's camp; and had it not been for Rumecan his fon, the fiege had been likely to have been raifed at that

The joy the Portuguese had conceived at the death of Sofar their mortal enemy, was not a little allay'd by the perseverance of the befieged in filling up the ditch; and that with luch fuccefs, that having stopped up the before-mentioned vault, Mascarenbas began to be reduced to the utmost stress, of which he gave notice to the viceroy at Goa, requesting immediate succours. It was now about the middle of August, when the mahometans were preparing for the general affault. They visited their mosques with a great deal of devotion, and St. James's Day being appointed for this attack, they advanced without the least noise in two bodies before the break of day towards the breach, in hopes of furprizing the Portu-The Indians they entered the breach with most terrible and dreadful out-cries; which, however, was fo far from terrifying the brave Portuguese, that they were repulsed with great flaughter; some of the Indians taking the advantage of the low tide, got into the water-fort, where they pitched Mabamet's standard, which Majcarenbas no sooner perceived, but flying thither, he gave them fuch a reception, that after thirty of them were flain upon the spot, the rest were forced down headlong over the wall. This done, he returned to his poil, where both by his words and actions he fo encouraged his men, that Rumecan, after a hot dispute of fix hours, faw himfelf obliged to found Are repul- a retreat. In this action not only Majearenbas, but also Ludovico Soza, Ferdinando de Castro, Anthonio Passando, and all the Portuguese in general, acquired immortal honour, feveral women having exposed themselves in the midst of the combat.

Notwithstanding this repulse, the Indians did not cease to continue their fire against the fortress, which not succeeding according to expectation, they began to apply their mines, not without fome fuccefs. Mafcarenbas having taken notice that the enc-

my retreated fometimes without any neces. Balden fity, near a certain tower, gave notice thereof to de Castro, and some other officers of note, commanding them to quit it; but these flushed with their last success, refused to obey, for which they paid dear foon after; for the enemy taking the opportunity, when they perceived the tower full of foldiers, blew it up on a fudden, with at A min least one hundred Portuguese in it, and simus, a among them de Castro, and several others Perugue of quality; and fuch was the barbarity of the Indians, that they thrust their swords through the half-dead bodies of fuch Portu. guese as were thrown up into the air before by the mine. They were for improving this opportunity; and during the confusion occasioned by this disaster, attacked the fort with incredible fury, but were fo warmly received by Mascarenhas, that they were glad to retreat. To prevent the like for the future, the Portuguese governor ordered his men to act with more caution for the future, and the tower of St. Fames to be blown up, which was executed; and not blown up, which was executed, and lose long after, finding the enemy ready to attack the tower of St. Thomas, he blew up the mine underneath it, and with it three the indiana. hundred Indians.

The Portuguese affairs in the fortress be- a man, gan, notwithstanding all this, to grow worse and worse; for though they had made intrenchments within intrenchments, yet had they (after a fiege of four months) not above one hundred and fifty men left for the defence thereof; and being reduced to great extremity for want of provisions, were forced to feed upon unwholesome things; which fo discouraged the garrison, that they were refolved to put an end to their mifery by fighting their way through the enemy.

But being just upon the point of putting their defign in execution, they were rejoiced with a most unexpected relief from Goa, Diumino whence they had fent fifty frigats, under the st min command of Alvares de Castro and Franciscus Jonesia de Meneses, who arrived happily at Bazain. simul Alvares failed streightways thence with part of his forces (amounting to nine hundred in all) for Diu, and good store of ammunition and provisions, the rest followed before the end of September. You may easily imagine with what joy the poor emacerated foldiers of the garrifon received this welcome news; which however they would not improve to fo much advantage as they might have done, out of a perverse temper, peculiar to the Portuguese, who, as they are foon dejected in advertity, fo are they infupportable in prosperity: for now the foldiery began to accuse Mascarenbas of cowar-Muling dice and neglect, telling him in plain terms, mo in that they were refolved no more to be flut Portugues. up within the walls, but to act like brave Portugue's

Portuguese, to attack the enemy in their works, and to make him once for all to repent that ever he had attempted the Portuguele, whose glorious name was dreadful all over the Indies: this they told him they were fully refolved to put in execution; and if he refused to head them, they would chuse another, the first, the best they could. Mascarenbas, who knew very well the stubborn pride of the Portuguese, when flushed with fuccess, did what he could to divert them from their defign by all the mild infinuations and most forcible arguments he could invent, telling them that the fecureft methods were always the best; and how dangerous it might prove to hazard the lofing of the fort when they were in a condition to keep it till the approaching fpring, when they expected fufficient fuccours from Goa: but finding them deaf to his perfwafions, he spoke to them in the following manner: "Soldiers, ye are not insensible "that if you would consider your duty, " you ought rather to follow my com-" mands than your own directions; but

" fince you have tied up my hands, and both by your words and actions, nay, " by your very looks, give me fufficiently to understand, that instead of command-" ing I must obey, go on, and shew your courage, your knowledge, and expe-

rience in martial affairs : go on, I fay, Baldaus, I will inflead of leading you on, follow you, with this caution, however, that I would have you remember to take care to return with the fame marks of bravery as you march out." Then dividing the whole garrison into three bodies, he ordered Alvares de Castro to command the van, the main battle he gave in charge to Francisco de Meneses, himself remaining to guard the rear. Thus they marched towards the Their wa enemy; but with far different fuccess from successful what they had promifed themselves: most falley. of them after the first charge retreating towards the town, inflead of pushing forward. The body commanded by Menefes being charged in front and flank, betook themfelves to their heels, and de Castro himself, being forely wounded by a stone, was hardly faved by Mascarenbas, who crying out to the foldiers, that it was now time to shew their bravery they had so much boasted of before, would fain have stopped their slight, but in vain; for they retreated with fo much fear and precipitation, that for fome time after, they scarce durft look the enemy in the face, or keep their post; whereas the Indians, incouraged by this fuccess, approached with their engines nearer and nearer to the walls of the

CHAP. XII.

De Castro comes to Diu. Takes some Arabian Vessels. Routs the Indians; who leave the Isle. Rumecan killed. Soliman's Transactions before Aden: He causes the King of that Place to be hangd' on his Mast, and makes himself Master of the City. A Description of Daman, Dabul, and Visiapour.

De Caffro, viceroy of Goa, had no fooner received the unwelcome news and Div. of the death of his fon, and the distressed condition of Din, but he fent at the beginning of the spring Alvares de Acunia with five men of war and four hundred land-men thither, with ftrict orders that they should keep within their fortifications till the whole fleet with the intended fuccours should arrive there, Alvares in his passage thither took several Arabian vessels, aboard of which were feveral persons of note belonging to Sofar, who, though they offered a great fum of money for their ransom, were all cut to pieces, and their heads thrown in-

The fpring being pretty well advanced by this time, De Castro fet fail for Bazain with forty yachts, having on board fourteen

hundred Portuguese land-soldiers, and three hundred Canarines. With these, after having for some time insested the coast of Cambaja, he arrived in the Ilba dos mortos, whence he fent an express to Mascarenbas, with orders to batter the enemies intrenchments near the fea-fide with his cannon, to facilitate his landing; which being bravely executed by Mascarenbas, De Castro entered the harbour without much opposition, and foon after landed his men. De Castro De Castro being not a little furprized to fee the fort relieves Diu appear more like a heap of rubbish than a in person. fortification, the very ditches being laid level with the ground, he called a council of war to confult of the most proper means to put an end to the fiege: fome were of opinion, that some time ought to be allow'd to the foldiers to refresh themselves after 6 X

Baldicus, the fatigues of the fea; but De Captro tel- orders for the repairing the fortifications of Baldica ~ lingthem, That it would be a great dif-E ace for a Portuguese viceroy to be locked up in a fort, it was refolved to attack the enemy next day.

De Ca-

He routs

dians.

Accordingly they marched out in good guete make order, De Castro ordering the draw-bridges to be drawn up, to cut off all hopes of retreating into the fort, and leaving Anthonio Correa with some men to guard it against any fudden attempt. The better to diffract the enemy's forces, Nicolao Gonfalvo was commanded to make a false attack with fome ships on the backfide of the island. Rumecan on the other hand, trufting to his number, took care to guard his posts on all fides, against which De Castro marched with a much leffer force, exhorting his foldiers in

Aro's peech a few words, That they ought to remember to his job that they jerved a king, who never failed to reward fuch of his foldiers as fought bravely for Goa's cause, and the defence of his territories in the Indies, the per ervation whereof depended on this battle; that therefore they should fight like men, and confider that all their safety lay in their bands, all hopes of retreating being cut off by the shutting up of the gates of the fort, and the removal of the fleet to the

backfide of the ifle.

Things being thus disposed, Gonfalvo made his false attack on the other fide of the ifland, which fo alarmed the Indiathat they haftened in whole troops thithe: which gave opportunity to the Portugueje (who were about three thousand strong,) animated by the example of De Castro and Mascarenhas their leaders, to break in upon the Indians with fuch fury, that they were not able to reful them. Rumecan finding his forces to give way, and imagining that the fort was left destitute of men to defend it, affaulted the fame full of defpair; but being repulfed by Correa, was forced to follow the rest, and being closely pursued by the Portuguese, quitted the isle, and with the remnants of his forces passed over to the continent. The Portuguese entered the city, where they killed all they met with, without any regard to age or fex, where they got an incredible booty, and among other things the standard of Cambaja, a prodigious quantity of arms, and thirty five brafs cannon, one whereof being of an extraordinary fize, is kept to this day in the arfenal at Lisbon, with certain Arabick characters upon it. The Portuguese lost not above fixty men in this action; whereas of the Indians were killed no lefs than four thousand, and fix hundred taken prifoners: Rumecan himfelf loft his life, as he was preparing to pass over to the continent : De Castro, after having given the king of Portugal an account in his letter of this glorious victory, and the bravery of his officers and foldiers, gave

the fort, and returned triumphant to God, where he was received with the general acclamations of the people,

Castagnedo gives a somewhat different relation of this action; for he tells us, That Rumecan wanted neither bravery nor conduct; and that he put the Portuguese so hard to it, that had it not been for Masearenbas, who led in person the soldiers to the charge, the Portuguese would in all likelihood have loft the day. He fays further, That they had one hundred and fifty men killed, and among them divers brave officers, George de Souse, John Manoel, Francisco Azevedo, Cosmo de Paiva, Balthasar George, Eduardo Rodrigo, Juliano Ferdinando, Vajques Ferdinando, and others; that the Indians loss amounted to three thousand men; and that the whole fiege of Dia confurned the Portuguese at least two thousand

We told you before, that Soliman did come with his fleet before Diu, from Aden; about twenty leagues thence, coming to an anchor, to take in fresh water, he tent certain deputies with a letter to the king of Aden, with the usual present of a brocado'd veit of tiffue of gold, offering him his friendthip, and requiring him in the Grand Cignior's name to furnish his fleet with flesh

fuel, if he could not affift in person in expedition he was going upon, to expate the Portuguese (declared enemies of the Mahometans) out of the Indies. The king of Aden was at that time a tributary to the Portuguese, unto whom he paid yearly ten thousand ducats tribute; notwithstanding which he gave a very honourable entertainment to the messengers, promising to furnish them with what necessaries they wanted. About seven days after the whole Turkish fleet entering the harbour of Aden, was received with fingular demonstrations of joy, the king fending one of his chief courtiers aboard to congratulate Soliman upon his arrival, and to invite him ashore. Soliman returned for answer, That he should be glad to embrace the king's kind offers; but that the late fatigues of the fea had put him into fuch diforder, that he could not ftir at prefent; but as foon as he should be recovered of his prefent indisposition, he would not fail to pay his respects to the

The king's meffengers were no fooner treating returned to the city, but Soliman fent three king of hundred men after them, under pretence of Admi refreshing themselves, and taking a view of the place, (being all chosen men;) and the better to cover his treachery, he fent word to the king, that to prevent any diforders, he would fend one hundred men the next day to bring them aboard again. Aden was fo credulous as to affign thefe three hundred men their quarters in his caftle; which Soliman had no fooner notice of, but he fent the next day, instead of the one hundred men, no lets than two thoufand Janizaries, to the no small aftenishment of the king, who now beginning to mistrust the matter, did not know what course to take; but whilst he was considering what measures to take, news was brought that a much ftronger body of Turks was advancing into the city, who had no fooner posted themselves near the castle, but the commander in chief told the king with a fmile, That he would be pleafed to give a vifit with two or three of his courtiers to forced 4esard the Turkish Solman, who was indifposed aboard his vessels. The king now began plainly to fee the danger that threatened him; but not being in a condition to make any opposition, he was forced to fubmit; and being brought before Soliman, he asked them with an unparallel'd magnanimity, under what colour he could prefume to take in cuftody a prince in amity with the Grand Seignior, and to treat him no otherwise than as a criminal? Unto which Soliman reply'd, And are you not ashamed to let the admiral of the grand feignior stay three days in your harbour with-

out paying bim a vifit ? The king returned, Baldaus' Had the grand seignior been bere in person, I ought to have done no more that what I have done; and I am fure I should not have been treated thus. 'Tis true, I am now in your power, which I might have prevented, had I not trusted my self and my kingdom with those who now are going to betray both; without which Aden need not have stood in fear of your strength : I am now, though too late, sensible of my approaching destiny, seeing myself in the hands of a treacherous tyran, but though you may diffose of my body, I hope the bravery of the inhabitants of Aden, and the grandure of their princes will out-last your barbarous cruelbut Soliman ordered him to be hanged on hanged. the main-maft yard, with four of his chief courtiers, and afterwards feized apon the city, excufing his treachery with the grand feignior's order, to punish the king for his

being a friend to the Portuguese. Diu being one of the chiefest places of the Indies, we thought it would not be unacceptable to the reader, to infert the entire history thereof here. We will now proceed Daman, to the description of the other places: Daman was one of the most ancient and noted places of the kingdom of Cambaja, which

He had no fooner ended his speech, The king of

Baldeus, as we told you before, was taken and detroved by Martino Alphonso de Soza. As to Chaul and Bazain, there is scarce any Chaul thing remarkable to be faid of them, except what has already been mentioned in the ac-

count of Diu.

Dabul is a city feated at feventeen degrees Da forty five minutes of northern latitude, upon a most pleasant river, arising out of the mountain Ballaguatte, about two leagues from the fea; in former times much frequented by foreign merchants, and famous for its traffick and riches. Sabajus (a declared enemy of the Portuguese) had furrounded this city with a wall, and fortified the harbour thereof with a ftrong caftle, which being garri-foned with fix thousand men, (among whom were five hundred Turks,) he thought himfelf fecure against any attempts of the Por-

But D' Almeyda, the Portuguese admiral, appearing with his fleet, (aboard whereof were thirteen hundred European land-foldiers, befides four hundred Malabars,) fent fome of his galleys to make a falfe attack upon the cattle, whilft he took this opportunity of landing his men at fome diffunce from thence. The *Indians* perceiving their error, marched with all possible speed out of their gates against the Portuguese, whom they galled forely with their arrows; but Istaken by these advancing with sword-in-hand against their enemies, made fuch a havock among them, that they were glad to retreat towards the city, and being closely purfued by the Portuguese, these enter'd pell-mell with them, and made a great flaughter, killing all they met with, without sparing men, women, or children. They got here a confiderable booty, though a great part of the best moveables were burnt with the city, which was fet on fire by the Portu-

We have hitherto given you an account Limits of the kingdom of the most considerable cities of the kingof Decan, dom of Decan, bordering to the fouth upon Malabar, upon Bisnager to the east, upon the fea to the west, and upon Cambaja to the north: it's divided into three parts, viz. into Cuncan, Canara, and Ballaguatte, the last

of which is a ridge of high mountains flat on the top, with most excellent pastures, ex-The king- tending even beyond Gos. the length dom of Vi- order is the kingdom of Vifiapour: the length fifty leagues, and its breadth one hundred and fifty. Its capital city, which bears the fame name, lies feventy leagues beyond Goa, eighty from Dabul, and is faid to be five leagues in compass, with very strong walls,

> above a thousand brass and iron pieces of great cannon. They tell us, that among thefe there is one carrying no lefs than five hun-

and five noble gates, on which are mounted

dred and forty pound weight of gunpowder, Baldaus cast by a certain Italian, a native of Rome, who being questioned by one of the king's commissioners concerning the money he had di burfed upon this account, threw him into the fame hole where he had cast the can-non before. Some have reckoned this city, but erroneously, among the cities of Cambut erroneously, among baja. The king of Vijiapour was formerly The language absolute fovereign of this kingdom; but Vijapour after a long and heavy war was forced, with faling divers other princes in those parts, to become Great Mo. a vaffal to the Great Mogul: he used alfogul. fometimes to be embroiled with the Por-

This kingdom borders to the fouth of Wingurla, upon the river Mirfee, the boundary of the country of Carnatica, in the territory of Sivifaneyk. To the north of the long, Wingurla lies the fea-port of Danno, the boundary of the kingdom of Visiapour on the tide of the empire of the Great Mogul, about ten leagues from Daman. The river here has four fathom and a half water at high tide, and one fathom and a half at low water, The fecond river is named Terrapeur, having at low water half a fathom, and with high tide two fathoms depth. The third called Chunam, has generally two fathoms. The fourth, called Macbyn, has two fathom and a half at high water, and half a fathom at low tide. The fifth harbour is called Quelleny; the fixth Bazain; the feventh Bombain, (Bombay,) where the depth is fix Bombar. fathom at high, and four at low water: the eighth is called Siouwel, where at high water there is fix fathom deep. All thele rivers belong to the kingdom of Visiapour; but are for the most part in the possession of the Portuguese, who have built their forts upon them: as for instance, at Bombain, (Bombay,) a spacious harbour, (at eighteen degrees fifty minutes northern latitude,) where thips may lie fafe at anchor against all the winds. Here the Portuguese have built a very fine castle, (the draught whereof you may fee in the next cut,) which commands the whole road; and was in 1662. given in part of a dowry, together with Tangier, in the Sireights of Gibraltar, to the infanta of Portugal, upon her marriage with Charles II. king of England; whereby the English thought to have got a great booty from the Portuguele; whereas they are in effect places of no confiderable traffick. The rivers Dabul, Radiapour, and Carapatan, are entirely possessed by the natives.

For the rest, this kingdom abounds in

falt-petre works. The royal palace lies in Thernal the center of the capital city, defended by a palau. double wall and ditch, with one hundred battering pieces, and a garrison of two thousand men; the richest merchants dwell in the fuburbs. The other cities of note

Raddens of this kingdom are Cintapour, a feaport town, Razapour, Banda, Rajebaar, inland cities; Arec, Mirdfy, Afta, Tamba, viagoria and Wingurla, where the Hollanders have a stately factory: it is seated at fifteen degrees feven minutes of northern latitude, a place very considerable, not only for its plenty in wheat, rice, and all forts of provisions and refreshments, but also for its situation near Goa, which stood the Dutch in no small flead, whilst they were engaged in war

with the Portuguese, and had blocked up Baldeus, that harbour. The forces of the king of Visiapour consists in one hundred and fifty thousand horse, and eight thousand foot, of which more anon in the description of Negapatan. We will in the next place proceed to the description of Goa, together with its origin, and what afterwards happened most remarkable in those parts betwixt our nation and the Portuguele.

CHAP. XIII.

Goa taken by Albuquerque. The Death of Sabajus. Hidalcan comes before Goa. Albuquerque takes Goa a second time; routs the Moors, and establishes Christianity in that City. The Life and Actions of Xaverius in the Indies, China, and Japan: His Zeal and Piety.

Conhus THE city of Goa is feated in an ifle of badar, a confiderable bigness, at fixteen deadment grees of northern latitude. The air or cliin profe mate is not very wholesome here, so that the min the Portuguese have in this place (as the Dutch have at Batavia) their great hospital of the Indies; because many of the Europeans die here immediately after their arrival, and many more fall fick by reason of the moisture of the air, as it was formerly at Patavia, which has been remedied fince in fome measure, by draining the fens thereabouts. Goa is the capital city of the Portuguese Indies, the chief residence of their viceroy and archbishop. The city

is built after the Portuguese manner, each house having its peculiar garder, as at Cochin, and other Portuguese cities in the In-

The famous city of Goa was conquered hAlbu for the Portuguese by Albuquerque in the following manner: One Timoja, a famous person in those parts, having possessed him-felf of a small isse belonging to the king-dom of Onor, was a declared enemy of Sabajus, (of whom before,) and the Mahometans of Goa, who interfering with him in their commerce, he had destroyed many of the ships of the Egyptians and Saracens tra-ding thither. Thus being linked in point of interest to the Portuguese, he had declared to Almeyda his readiness to do what service he was able to perform to Emanuel then king of Portugal.

Albuquerque coming into those parts, sent for Timoja, to consult with him concerning certain matters of moment relating to those parts, who informed him, that Sabajus being a declared enemy of the Portuguese, had, after the taking of Dabul, bestow'd vaft fums of money in making preparations against the christians; but being pre-Sabajus bis vented by death from putting them in exe-death. cution, he was succeeded by his son Hidalcan, who being engaged in a war with the neighbouring kings, and Gos at this time embroiled with intestine divisions, which had made most of the garrison desert his service, he was of opinion, that in case Albuquerque would for this time set aside his expedition against Ormus, and attack Goa, he might make himself master of that city without much opposition: and to convince him of the fincerity of his intention, he offered to go along with him in person, and to take his share in all the danger. Albuquerque approving of the counsel of Timoja, called together a council of war; in which it being agreed to lay aside the design upon Ormus and in lieu thereof to attack Goa, Timeja lifted a good number of foldiers, (under pretence that they were to be imployed against Ormus,) and soon after having join'd Albuquerque with fourteen ships, they tarried near eleven days in the isle of Anchediva: for some of the Portuguese began to question the fuccefs of this enterprize, alledging that there were four thousand men in garrison in the city, and that it was imprudence to rely too much upon Timoja: but Albuquerque Albuquer. perfifting in his resolution, set fail from the que fers ifle, and came to an anchor before the bar of fail for

From hence he detached Anthony Noronia, his lifter's fon, and Timoja with fome light vessels, to make themselves masters of the two forts that defended the entrance Two fores towards the city; which being done with taken. all imaginable fuccess, he fent his mef-fengers to Goa, to let the inhabitants know, that if they would fubmit, they should be treated like friends, and be discharged of

the Portu-

Baldaus, one third part of the tribute they were obviliged to pay to Hidalcan; but in case of refusal they must expect no mercy. The inhabitants of Goa feeing themselves reduced to this nonplus, in the absence of Hidalcan, most of their foldiers having deferted, and their forts in the enemies hands, thought it their wifest course not to abide the ex-tremity, but to accept of the offers of the Portuguese; which they did accordingly, and received Albuquerque with all the demonftrations of friendship, who rode triumphantly on horseback into the city under the acclamations of the people, a Dominican carrying an enfign with a crofs in it, and another the keys of the city (furrendered to him) before him. He was very punctual in performing all the articles agreed upon betwixt him and the inhabitants, forbidding the foldiers, under the most severe penalties, to commit the least outrages. His next care was to take a view of the condition of the city, where he found divers goodly vessels, some lately built, others upon the stocks; the arfenal very well provided with artillery, and the king's stables with a confiderable number of the best Arabian horses. And finding, by the fituation of the place, of what confequence it might prove to the Portuguese for the future, in carrying on the war upon the continent of Cambaja and the cape of Corus, and to keep the neighbouring princes in awe, he left no stone unturned to provide for its security.

Thus much for the first enterprize of the Portuguese upon Goa. We will now also give you a fhort account of their further Loft again fuccels, how they loft it again by treachery, by the Por- and regained it a fecond time, the 25th of November 1510. where these following persons fignaliz'd themselves to their immortal honour, Manuel de Cunha, Manuel de Lacerda, Don John de Lima, and his brother Don Jeronimo de Lima, Denys Fernandes, Diego Mendes de Vasconcelos, with many others.

For Hidalcan had no fooner received the furprizing news of the loss of Goa, but he made a peace with the neighbouring princes upon the best conditions he could, with an intention to bend all his forces towards the recovery of Goa. The better to compass his design, he sent Camalcan his general, a brave foldier, before with eight thousand foot, and fifteen hundred horse, to endeavour to pass a certain branch of the sea Hidalean, which incloses the ifle, he himself intending prepares for to follow with an army of five thousand ry of Goa, horse, and forty thousand foot, as foon as he had made all the necessary preparations for fuch an enterprize.

of the approach of Hidalean with a most Balden powerful army, caused no fmall consternation in the island. Goa was inhabited at that time by two forts of people, viz. the Mahometans and Pagans; the first out of an irreconcilable hatred to the christians, cry'd out for Hidalcan the fon of Sabajus, who was of the fame religion with them; and the pagans fearing leaft they should be feverely chaftifed for their having furrendered the city upon fuch eafy terms, were for purchasing Hidalcan's favour by betraying Albuquerque's counsels to him. The worst of all was, that many even among the Portuguese began to upbraid Albuquerque with want of conduct; who they faid, out of vain-glory only, without the least regard to the interest of Portugal, had with a handful of men ventured upon to defperate an enterprize, as the feizing of fo populous a city.

Albuquerque nothing dismayed at all these obstacles, endeavoured to appeale the Portuguese by fair words and promises, tool one hundred of the chief inhabitants into custody; and having intercepted a letter directed to Camalcan, he punished the author thereof with death, with divers others who were convicted of a correspondence with the enemy. But as his chief aim was Albuque. to diffute their passage cross the branch of que mus-the sea, he had erected batteries provided town is with cannon; at convenient diffances near professions the fea-fide, and fecured all their boats, the ife. by which means he had repulfed them feveral times in their attempts. At last, camalan taking the advantage of a dark tempe-pafficus fluous night, they brought over both their the iff. horfe and foot, without receiving any confiderable damage from the Portuguese. Thus approaching to the city in battle-array, most of the inhabitants joined with them, which obliged the Portuguese to retreat thither, though without any great prospect

of fecurity. Camalcan summoned Albuquerque to a furrender under certain conditions; but though he was fenfible of the approaching danger, and the difficulty there would be of receiving any relief in the winter feafon from May till September, when the frequent ftorms render the feas thereabouts unnavigable, and choak up the entrance of the harbour of Goa, yet was he resolved to expect the arrival of Hidalcan, and to abide the utmost extremities, rather than to surrender the place, refolving, if all failed to pass the winter in his ships in the harbour in spite of the enemy. Camalcan, astonished at the refolution of the Portuguese, made for fuch an enterprize, feveral fierce attacks upon them, but in Camalean having pitched his tents near vain; till at last Hidalean appearing the sea-shore, this, together with the news with all his forces, he resolved to cut off

great prospect equerque to a ditions; but approaching re would be of er season from the frequent outs unnavitrance of the efolved to exand to abide than to furrenall failed to the harbour can, aftonishuguese, made hem, but in n appearing Baldeus, all manner of provisions from the Portuguese, by which means he did not question to become master of the place without bloodshed.

He refolved however to fend a herauld to Albuquerque, to offer him honourable conditions, if he would depart; but whilft they were treating upon that head, he found means to have a ship loaden with ballass since the city, where the branch of the fea is pretty narrow, and the channel very strait, with an intention to have another sunk hard by it: Albuquerque was no sooner advertised thereof, but he called a council of war; in which it was unanimously agreed, that they should embark the next night, before they had stopp'd up the whole channel, that the enemy might not intercept their passage.

Accordingly they marched out in the dead time of the night; but having fet fire to their magazine, they were discovered and attacked by the enemy; fo that with much ado they got to their fhips, when they weighed their anchors, and with incredible difficulty passed through the narrow channel at fome distance from the town: by The Portu- which, however, they were not freed from their mifery or danger; for by the continual windings of the river they were frequently exposed to the enemy's fire, and being destitute of fresh water, they were forced to drink falt corrupted water; what horse-flesh they had left being also consumed, they were reduced to feed upon mice, cats, and leather, which occasioned a great mortality among the Portuguese. Add to this, that they were continually annoy'd with the enemy's cannon from the two before-mentioned forts, (left by the Portuguese for want of men,) and faw no way how to pass them without a most manifest ha-

Albuquerque being put to these straits, refolved upon a thing which at first fight appeared rather to be a magness, than founded upon ferious confiderations; but the event shewed, that in extremities the bold-Abazar- eft and most hazardous undertakings are often the best. Both these forts were prothe Potta. vided with good garrifons; but being fenfible of the misery of the Portuguese, they regarded them so little, that they scarce thought it worth their while to guard their posts: Albuquerque having received fome notice thereof, detached three hundred chosen men, whom he divided into two troops; these being animated with great promises and revenge, advanced towards the forts at the fame time, and finding the centries afleep, killed them, and fo entering the forts, foon put the rest to flight, took possession of the fort, and carried off the cannon aboard their vessels. Hidalean

was fo furprized at this bold enterprize, Baldaus, that not thinking himfelf fecure in the place where he was, he ordered his tent to be pitched at a greater diffance.

The next thing the Indians attempted was, to endeavour to fet fire to the Portuguese fleet by means of dry brush-wood and faggots dipp'd in pitch and rofin; to prevent which Albuquerque manned out certain boats to burn them before they could come near enough. This occasioned a smart engagement, wherein Anthony Noronia, (a Anthony brave young gentleman, declared viceroy Noro of the Indies after Albuquerque,) being dangeroufly wounded in the knee, died a few days after. The enemy's loss was also very confiderable; but the death of Noronia, together with the manifold miseries, dangers, and difficulties they had daily to struggle with, made the Portuguese resolve to full The Portus to the ifle of Anchediva to fet ashore their is Anchefick men, who flood in great need of refresh-diva.

ments for their recovery. Whilft Abuquerque was here ruminating with himself how to recover Goa, a squadron of ten Portuguese men of war arrived in the Indies. Strengthened with this fuccour, and having new modelled his forces by purging them of fome mutinous spirits, he embarked one thousand five hundred land-foldiers, and three hundred Malabars aboard thirty four veffels; and fleering his course to the isle of Onor, he concerted new measures with Timoja for the recovery of Goa: and having engaged him to lift as many forces as possibly he could, he fet fail immediately towards Goa with fuch an aftonishing confidence of success, that the Indians upon his approach deferted the forts without firing a cannon.

Advancing from hence to the city, a Artack Gon bloody engagement enfued near the royal a fecoul palace, which Hidalcan's foldiers pretending time. to defend to the utmost extremity, but being routed, the rest threw down their arms, fome precipitating themselves from the walls into the ditch, others feeking refuge, or rather death among the waves, whilst the rest dispersed in the island. This engagement lasted above six hours. Immediately after Timoja coming to the affiftance of the Portuguese, they entered the city, where they Andenkeis, made a most miserable havock among the Moors, whom they were resolved to extirpate root and branch; feven thousand whereof are supposed to have been flain in four days time, the pagans themselves being exasperated at them for having disposless'd them of their lands, cut many of them to Commit pieces, and among the rest the treasurer of great cruel-Hidalcan, in whose house they found a iii. good booty. Such of the Mahometans as were taken prisoners, Albuquerque ordered to be inclosed in a Turkish mosque, together

Baldaus, with a certain renegado christian, who had deferted to Goa, and to set it on fire; which was executed accordingly.

The next thing Albuquerque took care of, was to have bricks and lime made for the rebuilding and strengthening of the fortifications; and (if we may credit the Portuguese) as they were digging under the ruins of some old walls, they found a brazen crofs, which (confidering no christians were ever known to have lived there before) was looked upon by them as a miraculous good omen, prefaging the establishment of the

christian religion there.

Albuquerque having punished with death fuch of the inhabitants as had had a hand in the first mutiny, ordered that the Portuguese should marry the young women of the country, (after they had been baptized,) the better to people the city, which from that time began to increase considerably; Sequeria having caused the first church that was built, with the adjacent houses and convent, to be dedicated to St. Francis. And The church in the year 1548, the church and convent cifcans and of Dominicans was erected of brick-work. twelve fathers of that order being about that time introduced into the Indies by James Bermudius, a Castilian. After the arrival of the jesuits in those parts, (who have also a fine college here,) there were in four years time baptized no less than seventeen thousand two hundred and ninety Indians, without reckoning those converted by the Franciscans and Dominicans before. In the jefuits chappel lies intrenched the body of Francis Xaverius, of which the Portuguese relate strange miracles, as well as of his whole life; an ample relation whereof may be seen in John de Lucena in Portuguese, by Daniel Bartholi in Italian, and by feveral others in Latin; and in another treatise of Bartholi, printed at Rome, 1653. concerning the actions of the antient fathers of the jefuitical order. It will be fufficient for us to touch upon force of the chief heads related by the Portuguese of this

The death of Xave-

Increase of

He died in the isle of Sanchan in China, : 1552. the fecond of December, of a violent fever, in the eleventh year of his voyage over the Indies. His dead carcafe was laid in a coffin with his cloaths on, filled with lime, with an intention to transport his bones thence after the flesh had been confumed by the quick lime. Many days after the Portuguese opening the coffin, found His body un- his body not only uncorrupted, but also of a lively colour, and most agreeable scent. Thence being transported to Malacca, and the coffin being opened a fecond time, above three months after his decease, they found neither the least figns of corruption, or any naufeous stench. After he had been

buried here five months, a certain jesuit tra- Baldau, velling that way from Goa, being defirous to fee the body of Xaverius, found not only the body, but also his cloaths uncorrupted, and of a very odoriferous scent.

Thus it being judged unseemly that his

body fhould remain any longer under ground. Didacus Pereria caused a magnificent coffin adorned with gold and filk to be made, wherein the body was deposited at Malacca, till it could be transported to Goa, where Is transfer it was received with incredible demonstra-10d to Goz. tions of joy by the viceroy, all the perfons of note, and especially by the jesuits, and deposited with a great deal of ceremony in the chappel of St. Paul. And finding that the people were so eager to touch his body, that it was to be feared they would in time confume it, or carry it away by piece-meals, it was inclosed in an iron grate; such being the zeal of the people of Goa, at that time, that they would embrace the body of Xaverius without intermission, lay their beads upon it, rub it with their hands, &c. and the whole city rung of the praises of this faint, of his uncommon zeal, piety, charity, mildness, his dangers in his voyages, his chaftity, temperance, fafts, prayers, miracles, conftancy, prudence, and great actions for the honour of christ.

The speech he made upon his departure for Japan and China to his friends, who were for diffwading him from fo dangerous an undertaking, is so excellent in its kind, that it very well deserves a place in this

Am furprized to fee you who fpend Xiverius
your days in the praise of God Al-Jimes. " mighty's power and mercy, should now " be so diffident thereof in regard of my person. Have you forgot who is the supreme governor of the universe? and "that every thing is ruled by his will? Can you be defittute of inftances of this nature? Don't the waves of the fea, who opened a way to the fervants of God through the depth thereof, furnish you with an undeniable example? Don't the winds who allay'd their fury by his command, proclaim his power? Pray look upon Job, who could not be afflicted by the devil, without God's special permission. The mouth of truth himself tells you, that the hairs of our heads are numbered. As we fee ambaffadors of temporal princes, relying upon their characters, and the power of their maf-ters, pass unarmed and undiffurbed, through an enemy's camp; so it becomes us, who bear the character of interpreters of the divine law, and of 66 teachers of the heathens, to rely upon " nothing but the affiftance and power of

Baldens." the divine majesty, which without any other weapons can carry us fafely through " all dangers both by fea and land, through " fire and fword, or what else may feem to oppose the accomplishment of his And if it happen that some of his " faithful ministers fall into the hands of "cruel persons, if they are devoured by wild beasts, suffer shipwrecks, or are exposed to hunger, thirst, cold, heat, " ficknesses, and other miseries; all these " are to be looked upon as the effects of " the divine pleafure, to try the faith and " conftancy of his fervants: for were it not " fo, we are fufficiently convinced by ma-" ny examples, in what manner our God has a careful eye over them; how he " has fent the ravens to feed them, the angels to feed them; how the wildest " beafts have deposited their natural fury and become mild? how the flame itself " has not been able to hurt them, nor the " greatest tyrants to execute their cruelties upon them. 'Tis true, the victory " does not always incline on our fide, and " we are often frustrated in the expecta-"tion of the fruits of our labour; but " those disappointments ought not in the " least stop the hand of a zealous minister, " in attempting every thing that may con-duce to God's honour, and the falvation " of fouls. If a foldier, in hopes of a fmall " fhare of honour, ventures his life in the " midft of his enemies; if the feaman for "the hopes of an inconfiderable lucre, " leave the shore, and commit his life to " the merciless waves, would it not be a " fhame for a minister of Christ to refuse " to hazard his life for God's fervice, and " to look upon every thing as a trifle in " comparison of the kingdom of heaven, " and its increase? Let no such thoughts " enter our minds, there being nothing fo

" hinder us from the promoting of God's Baldous." fervice."

A most excellent speech, worthy to be imprinted in the hearts of all faithful ministers of Christ; and the more valuable upon that fcore, that his deeds were altogether agreeable to his words; for embarking at Goa for Malacca, he thence fet fail in a Chinese Jonke, or vessel, for Japan, where he arrived happily at Cangoxima, where this great man did not think it below himself to be instructed in the first rudiments of that language for Christ's fake. The next thing he applies himself to, was, to have the chief articles of the christian faith translated into the Japonese language, making use for this purpose of an interpreter, till he attained himself to the perfection thereof, in which he ceased not to labour day and night; being moved by an uncontroulable zeal of planting the gofpel among these pagans. Truly a very commendable zeal, not to be forgotten by all who bear the name of christians; and though Xaverius's religion differs in ce that points from ours, yet might his piety and other commendable virtues ferve as an encouragement to all pious ministers, to follow his footsteps in performing the service of God to the utmost of their power. It must be confessed on all hands, that had not the active spirit of the jesuits awakened the Franciscans, and other religious orders from their droufiness, the Roman church had before this time been buried in its ruins: and as for myfelf, I am very willing to own, that my pen is not capable of expressing the worth of so great a man; though at the fame time I am of opinion, that if Xaverius were alive now, he would difown many things, especially as to his miracles, fince published by his " precious, that ought in this regard to followers.

CHAP. XIV.

Increase of the City of Goa: Its Traffick, Manners, and Way of living of the Portuguese there. The War betwixt the Dutch Company and the Portuguele. Their Ambassadors appear in the Great Council at Batavia: Their Propositions and Transactions.

THE city of Goa increasing every year in riches and traffick, increased also in strength by the addition of several forts traffick was much more confiderable for-

little disturbed by our ships. Whilst Goa Increase was in its flourishing state, they used to and traffich fend their ships to Pegu, Siam, Japan, Per-of Goa. near the water-fide; this being the capital fia, Camaja, Arabia, Malabar, Coromancity of the Portuguese in the Indies. Its del, Bengale, Achem, besides divers other traffick was much more considerable formerly than of late years, fince by our Europeans, but also Canarins, Moors, and tanis. blocking up the bar of Goa, they were not a Pagans of all nations, who live for the

Baldæus, most part upon trading, or are handicrafts-The great threet of Gos has many rich fhops well flored with filks, porcellain, and other precious commodities, druggiffry wares, manufactories, &c. Some of thefe, as well as freth provisions, are fold every day in the market-places, where you hear a crier, or auctioneer, (called by them Lalang,) to fell in publick all forts of goods, both movable and unmovable, cattle, flaves, &c. to the fairest bidder; but they leave off early, by reason of the excessive heat about midday.

The manner of living of the Portuguese hing of is the fame here as in more con-the Portu- the Indies; they are diffinguished into Cazados, i. e. married people, and Zoldado, fingle people; the last are most effectived. The Portuguese here are generally very idle, feldom applying themselves to any employment, leaving the management of their bufiness, for the most part, to their flaves; even the women committing the care of their children to the female flaves, who also give them fuck. The men frequently marry with the natives of the country, yet not fo much now as formerly: the children begot betwixt a Portuguese and an Indian woman are called Miffices, as the children of these Miffices are called Castices.

The men are generally addicted to exceffive luft; and I remember to have feen three women-flaves lie in at once, who were got with child by their mafters; fornication and adultery being confidered among them as errors of little moment: but they are very averse to drunkenness, notwithstanding which quarrels and murders are frequent

among them.

The men are also generally excessive proud, there being fearce any of them that thinks himfelf removed a little above the vulgar fort, but what has his umbrello carried over his head, another fervant to carry his cloke after him, and another who holds his fword: they use frequently fault, not excepting even the maidens and women; and as they walk along the streets, they are continually stroking and fetting up their whiskers. The women never appear abroad either a foot or in chairs unveil'd, their husbands being (and perhaps not without reason) very jealous of them; for which reason also they keep them at home in their apartments above stairs, the windows whereof are fo contrived, that they can look upwards, but not downwards into the

The differences most in vogue at Goa are the burning fevers, which the Portuguese cure by venefection, fometimes five or fix times a-day, but they let but little at a time. The French or Spanish pox are also so common here, (as in most other parts of the

Indies,) that a Fidulgo, or gentleman, here Balant does not look upon it as a difgrace to have been afflicted with it twice or thrice in his life-time. For the reft, the Portugue/e ufe much fweetmeats, and take a draught of cool water after it, they being enemies to strong liquors, and moderate in their diet, a fmall there fufficing for a good number of people. The women feed much upon rice, though they have excellent wheaten bread they also use frequently Betel and Arek, and all forts of pickles, which makes them have a pale colour.

The king of Vifiapour has more than on. . Ilthewn his inclination of attacking Goa b land, especially at that time, whilst Corn . lius Simon/z commanded the Dutch fleet in ... those parts, he being much respected amon, the Mahometans ever fince his burning of the galleons near Mormagon: but the de. h of the faid admiral prevented the defign of that king, as much queftioning whether 11: fucceflor might be a man of the fame flame, In the year 1041, the faid king promit fecond time to form the flege of God, pr vided the Dutch company would engage to let a certain number of their ships winter at Dabul, Ortzery, or fome other of his majefty's harbours, which was no more than a necessary precaution, it being certain, that in case the fiege should miscarry, the Portugueje, without our affiftance, would have made themselves masters of these harbours. Formerly it was accounted dangerous to fend our thips to the bar of Gou before O.fober; but experience has taught us fince, that this coast of the Indies is navigable towards the latter end of August, or in 80%tember, the exact time when the rich shi, s come from Mofambique, Mafeatte, and i. vers other places, which have iometimes been taken by our ships; whereas if they come later, they have nothing elfe to do but to attempt the galleons under the calle. In the year 1640, the Portuguele made and to bring into the harbour two caracks, ... as many galleons, well provided with an and all other necessaries, which gas then the opportunity to fortify the ifle of M. magon; fince which time, to realer the blockade by fea the more effectual, the ILilander have ordered certain frigates to creize with a floop near the cape and the Barnel Iflands, (called Ilbas quimadas,) wher ... Portuguese Cashilas, which supply them with provisions, are prevented from going out or in.

It is fufficiently demonstrable, that thezione Dutch company did at first judge it for their ene interest to be masters of Goz, but hid is the afide afterwards, thinking it more for the interest to block up the bar of God; certain it is, that both the directors and to: governor and members of the grant count. of the Indies, looked upon the sar

CHAP. XIV.

populate. The chief intent of this petition, was to fift. shew, That though it was beyond all que-

ftion, that the Dutch East-India company was crected in its first beginning in the years 1601, 1602, and 1604. to carry on a peaceable commerce in the Indies; but that fince experience had fufficiently convinced them, that the Portuguese, who had play'd the mafters in the Indies for many years before, had left no flone unturned to difturb the commerce of the Dutch, by feizing their thips, and imprinting very difadvantageous notions of them into the Indian princes, That in 1602, when the Dutch East India trade was incorporated into one fociety, or company, two peculiar advantages were (among others) obtained thereby at that time: first, full authority of protecting their traffick jointly in the Indies by force of arms; the confequence whereof had been, fecondly, that the Indian princes were entered into an engagement with the faid Dutch company, out of harred and fear of the Pertuguele; that, by these means, the thips of the Dutch company having purged the feas of the pirates, had fettled fince the year 1604, their factories and traffick, not only in all the islands from the Red Sea as far as Japan, but alfo in the territories of the Grand Seig-To me of mior, in Aravia at Mucha, in Perpa even ch in the capital city of Hpaban, in the king-... la dom of Cambaja, and the empire of the Great Megul, in Docan, in Malabar, Nartinga, Coromandel, Golgonda, Bengale, Aracin, Pegu, Achin, Sumatra, Jambi, Palimban, Bantam, Cambodia, Siam, Cocbin-China, Tonquin, &c. That fince the establishmen. of these factories, the security of their commerce was chiefly founded upon this maxim, To maintain a war against the declared enemy of thefe Indian princes, their engagements to us being founded upon their of inion of our enmity with the Portuguese. To prove this, they alledge the following ten realons.

. restons 1. Because the Dutch East-India company "" con-was chiefly by means of the war with the "true of Portuguese arrived to that greatness it is forth now at, their whole traffick in the Indies being founded upon this bafis; whence they draw yearly a return of feventy eight thoufand nine hundred and ten millions of guilders; and if the faid foundation were not fhaken, they might expect every year larger

2. That in case of a truce, they should not reap the fruits of the victories, viz. to

put a ftop to their power, a thing absolutely Baldieus to be confidered.

3. In case of a truce, the equipment of many thips of war would be laid afide, by which means Holland would be deprived of the strength of a considerable number of men of war in case of necessity.

4. That in case of an abatement of the equipment of thips of war for the East Indies, and confequently of the diminution of our trade in the Indies, and the return of our fhips from thence, the advantage accruing to Holland by the convoys must also be necessarily diminished.

5. That many thousands of families in the Indies would thereby be deprived of their livelihood.

6. That the whole East-India trade, by which many millions are gained yearly, would decay in proportion as the Partuguese should increase in the faid traf-

7. That in regard of the interest of the Dutch company, it ought to be confidered, that fince of late years they had been at vaft expences in providing thips of war, and lifting of foldiers, they were (through God's bleffing) in a probability of making farther conquests upon the Portu-

8. That in case the East-India trade fhould come to decay, and confequently their profit be diminished, they would be in danger of being ouite oppressed by the heavy burden they la under, of providing garrifons and other necessaries against the attempts of the Europeans their enemies.

9. That thereby the Dutch company would be exposed to the hazard of being deprived of all the advantages they had gained by right of arms from the Portuguese, or otherwife.

10. In case of a peace or cessation of arms betwixt the Dutch company and the Portuguese, it was to be feared, that the good understanding betwixt the said company and the Indian princes would foon decay, to the no fmall detriment and danger of the company and their fervants, especially in Japan: which traffick, if it were loft, the trade of China would be of little confequence; a peace or truce with the Portuguese being absolutely contrary to the engagements they had with the Indian

In confideration therefore of the great detriment that would accrue to the faid company by a peace with the Portuguese, the faid directors did most humbly petition their high and mightinesses to take it into ferious confideration, whether the damages their fubjects, and effecially the company, were likely to fuffer thereby, would not in

Baldeus, a great measure over-ballance the advantages the flates might promife themselves from a peace with Portugal; and in case they judged the peace with Portugal abfolutely for their interest, whether the East Indies might not be excepted in the faid peace, as was done in the truce concluded 1609, and whereof other inflances were in fresh memory betwixt France, England, and Spain, who notwithstanding they were entered into alliances fince the conclution of the peace in Europe, yet did continue the war in the Indies, as is evident from the English fquadron's appearing before Mojumbique, Goa, and Manilba, and the affilling of the Perfians in the conquest of Ormus

against the Portuguele. Laftly. They requested, that in case their high and mightineffes did not judge their reasons of such weight as to stop the truce in the East Indies, betwixt the company and the Portuguele, who lately have thaken off the Spanijo dominion, and embraced the interest of king John IV. their high and mightineffes would be pleafed at leaft to delay the conclusion thereof till advice could be had whether any of the places belonging to the Portuguese in the Indies had declared for the new king, that the directors might have the opportunity (in case of an enfuing truce) to recal fuch of their fervants as were perhaps engaged in the fervice of some of the Indian princes, without which they might be in danger of being fur-

prized and feized there, to their irrecoverable detriment.

The bar of Goa had for a confiderable Goa block d up to the time been kept blocked up by a fquadron Durch. of Dutch this the better to a grand or of Dutch ships, the better to annoy the Por.uguese in their traffick. James Cooper kept the faid harbour block'd up for three years fucceflively, as commodore, who was fucceeded by Adam Westerwold, (of which hereafter in the description of Ceylon,) and he by Anthony Kaan. In the year 1639. commanded before that place Cornelius Simonion Van der Veer, (mentioned before,) a brave commander; and 1641. Matthew Hendrikjz Quaft, with ten ships, and one thousand one hundred and forty seven men: this fleet took a carack richly laden from Portugal; but he being killed in the engagement, was inceeded by Cornelius Leendert/z Blaau, reer-admiral.

ras Peru- In the year 1642, two Portuguese ambasam- fadors, named Diego Me des de Britto, and cone to Ba- Gonfalvo Villofo de Santt Jojeph, a religious of the order of St. Francis, being fent by the Portuguese viceroy of the Indies to the general and great council of the Indies at Batavia, the fame were ordered to be received with all marks of honour and refpect: for which purpose Mr. John Maatzuyker, chief penfionary, Justus Schouten, a member of the great council of the Indies, Si-Bald on mon van Althen doctor of the laws, theriti of the city of Batavia, Sebald Wanderaar receiver-general, Peter Soury, Baren: Wiels mans, Dirk Snock, Ewoud Spieringh, head factors, John Lamous ferjeant-major, Girard Herbers doctor of the laws, head factor, Francisco de Souza de Castro, and Anthonio Fialbo Fereira, both Portugue, gentlemen, were fent to conduct them from Their maje aboard their veffel to the general's palace, tion, under the difcharge of five pieces of cannon; and being immediately introduced into the apartment where the great council Afferin was then affembled, after the first complicational, ments on both fides, one of the ambatadors began to make his harangue: " That Portural having withdrawn itself from the " Spanish jurification, had chosen D: " John, duke of Braganza, their king; " that the faid king having foon after fent an ambaffador to their high and mightineffes to treat of a peace and an alliance betwixt both nations, they had all the reason to believe that the same was brought to a happy conclusion before this time: in regard of which they were fent by the viceroy of Goa to treat with " their excellencies about a cellation of " arms, as would more at large appear out of their credentials." Which they delivered at the fame time to the governor-general with this superscription:

A. O. Senbor Anthonio de diemen, Caritaon General de Nacaon Ollandeja n'este Oriente.

On the other fide was written,

De Conde d'Aveiras Viceroye Capitaon d' India.

The letter was fealed with the arms of Portugal, and written in the Portugueje language, as follows:

N the beginning of September arrived Tie in our fort Onor, a caravel, fent from Portugal; whereby we were informed, that the Portuguese have proclaimed and acknowledged a king of their own, by the general confent of that nation. His majesty of Portugal did, in one of his letters, give notice to us, that certain " ambaffadors having been difpatched to their high and mightineffes the flates general, to treat about a peace, it was not doubted but the fame would be foon concluded, a truce having been already agreed upon betwixt the two nations in Europe, whereof notice had been given to the faid majefty to the commodore Qualt, intimating, I hat as a ceffation of " arms was concluded in Europe, fo the " fame might take effect in these parts,

Raldieus, " and that he had given orders to the viceroy of Goa accordingly. After the " decease of the faid commodore we gave " notice thereof to Cornelius Leendertfz " bisan his fuccesfor, who excusing him-" felf with his want of power, as being obliged to follow ftrictly the orders of " the great council of the Indies, we thought fit to fend Diego Mendes de Britto, gen-tleman of the king's houshold, and fa-" ther Gonfalvo Villofo, to treat with your " excellencies concerning this point, they " being provided with credentials from his " majefty, that whatever shall be agreed " upon with them shall be valid, and kept " inviolably. We wish all blessings to the crown of Portugal and the United Pro-" vinces. Dated Decemb. 6. 1641. itself from the Subfcribed, Conde d' Aveiras.

The great council having told them, that they would take the matter into ferious confideration, the discourse began to turn upon indifferent matters, and among the rest concerning the carrack lately taken by the Dutch. The ambaffadors being asked whether the captain did not present the viceroy with two or three casks of wine, they answered, No; at which the governor-general shewed a great diflike, telling the ambaffadors, that they must pardon the matter, it being a common thing for the best seamen to make the worst courtiers. After the ambassadors had dined with his excellency, they were conducted to their lodgings at Mr. James tion out, Harder's house. They were both persons of a goodly aspect, the Franciscan being being betwixt fixty and feventy years of age, the other of about fifty. Their train confifted in two pages, and four Portuguese footmen, besides the negroes and mistices, a gentleman, a fecretary, furgeon, and two boys; their livery was orange colour.

The 8th of February the faid ambaffadors Tem feed. The 8th of February the faid ambaffadors manner, demanded a fecond audience; which being for weighty reasons deferr'd till the 10th, they appeared a fecond time at nine a clock in the morning in the great council, reiterating their former propositions concerning a ceffation of arms: and left the governorgeneral might not as yet have received a full account of what had been transacted in Europe, they produced certain original letters, fent by his Portuguese majesty to the viceroy: but these being only private letters from certain Dutch merchants living at Lifton, and another letter from the states-general to the admiralty of that place, and consequently the same that were before sent hither from our fquadron at Goa, by the way of Coromandel, by the floop called the Pipeli. His excellency the governor-general Vol. III.

reply'd, That the last being fent to the Baldous. council before by the commodore Quajt, they had perused the same, and found, that in the letter of the states-general, it was expresly said, That the Dutch should not molest the Portuguese on the other side of the line; which being to be under-stood of the north side, the Indians were not comprehended therein; besides, that they had not received any inftructions upon that account from the governors and directors of the East-India com-

But to convince the ambaffadors that they were not entered into this war out of any other motive than to obtain an honourable peace, they could not but put them in mind, that though they had delivered their credentials from the viceroy, they had not brought along with them any positive proof, whether the faid viceroy were authorized by his majesty of Portugal to treat concerning matters of fuch great confequence; and it was confequently to be doubted whether the fame would be ap-

proved of and ratify'd by his majefty.

One of the ambaffadors reply'd, That the viceroy of India was always endowed with a power of making peace and war, many infrances of which could be alledged upon divers occasions, which would leave no room to question his authority in this case; but if they did, they were ready to remain as hostages for the accomplishment of what should be agreed upon. His excellency the governor-general return'd, That he was fatisfied of the authority of the viceroy in making peace or war with the Indian princes, but remained doubtful, whether the same did extend also to the European nations: nevertheless, that he believed the viceroy would not transgress his commission, and that therefore they had been acknowledged as plenipotentiaries; which being done, there remained nothing now to do, but to proceed to the treaty itself, and to make their propositions under what conditions they would have the truce fettled.

The ambaffadors answered, That they looked upon it as unnecessary to insist upon many conditions or limitations at this juncture, when they expected every day to hear of a peace concluded betwixt both nations in Europe; according to the conditions of which, both parties would be obliged to regulate themselves hereafter: that their only aim now being to obtain a ceffation of arms, the main thing in question, was to fix a certain time of its beginning, which they thought ought to be taken from that very hour the truce was agreed upon and fign'd betwixt them.

Baldons. The governor-general told them, That ~ he agreed with them in that point; that not many conditions were required at this time; but that it would be next to an impoffibility the truce fhould commence from the very hour the fame was figned, it being very probable that the Dutch fquadron would, in the mean while, not let flip any opportunity of taking their advantage over the Portugi efects the forces lately fent to Ceylon, perhaps, might have made an enterprize tipon Negumbo or Columbo, as, on the other hand, the Portuguese might probably have undertaken fomething against Gale, or have obtained fome advantages against the Dutch in other places: the viceroy himself having commanded Don Philippo Mascarenhas, that he fhould (till the news of the truce did arrive) act with his utmost vigour against the Dutch in Cevlen. He urged, That all these things considered, it was to be feared, that in case the truce commenced according to their defire, this might furnish occasion to new mifunderstandings, it being more than probable that neither of the two parties would be willing to restore what they had conquered in the mean while; that therefore it was his opinion, that the beginning of the faid truce must be so fixed, as that fufficient time might be allowed for giving notice thereof to the subjects of both

parties. The ambaffadors made many objections against this, insisting to have the beginning of the truce fettled from the date of the figning thereof; alledging, among the rest, that they could fcarce imagine the viceroy should have fent such orders to Mascarenhas. The governor-general reply'd, That he had certain advice of it from Ceylon; but that nowithstanding this, he hoped the ambaffadors thould not leave Batavia unfatisfied. He at the fame time invited them to dine with him, where they were splendidly entertained, and drank to the health of the king of Portugal, and

The 18th of February the faid ambaffadors had anot, r audience; wherein they defired a politive answer to their propositions, the time defired by the governor to confult with the great council being expired. They urged, That fince the 14th of February fome yachts were arrived, which had brought the confirmation of the news of the peace lately concluded betwixt both nations;

excellencies would no longer deny them the defired trade.

the prince of Orange.

The governor-general gave for answer, That the faid yachts had touched at Fernambuco, from whence they had brought the articles of a ten years truce betwixt his Portuguese majesty Don John IV. and the

therefore they did not question but their

high and mighty the states-general of the Baldas, United Provinces, in respect of their territories in Europe, with exception however of the places and colonics belonging to the East and West-India companies; that they had also brought along with them the articles or conditions agreed upon betwixt their high and rineffes and Triftan de Mendoza 1': iguese ambasfador, concerning the india company: whence it appeared, that the fame ought to be first ratified by his Portuguese majesty, and sent back to the flates-general; and that the fame after that should not take effect before notice be given thereof in Brafil: and the fame being agreed upon in reference to the East-India company, and our ships which left Holland in September last, being expected every day in these parts with the ratifications of the faid treaty, it was thought convenient by the great council to expect their coming, and to regulate themselves according to the conditions agreed upon betwixt their respective masters; especially fince the faid ships would probably arrive before the feafon would permit the ambaffadors to depart for Goa, and confequently there would be no loss of time in this respect. The ambaffadors told them, That they

could not but think it strange, that since both nations lived in amity in Europe, they should act in a hostile manner against one another in the Indies. The governor-general reply'd, That since their respective mafters had thought it convenient it should be fo, till the ratification of the treaty by his Portuguese majesty, and that notice had been given thereof to them, they were obliged to take their measures accordingly. The ambaffadors answered, That they had promifed themselves a quite other answer; though in all other respects they acknowledged the honours and obliging entertainment they had received, defiring that a copy might be given them containing an exact account of all the transactions, during their flay here, betwire their excellencies and them, by which it might appear that they had not been defective in their zeal and industry to bring this matter to the defired effect. This was promifed by the governor-general, with this addition, That to give them all imaginable fatiffaction concerning the truce, they would also give them a faithful copy of the articles thereof, not questioning but that the ships would arrive in the mean while; but if they should happen to stay longer, beyond expectation, they would confult all proper means to give them what fa-tisfaction they could. They thankfully received this answer, extolling once more the obliging entertainment they had met with at their hands; they dined with most

CHAP. XIV.

The goth of March the faid ambaffadors mbess. had another audience; in which they delivered a memorial to the great council: which being read, the governor-general told them, That what was alledged in the faid memorial was a matter of fact, and agreeable to what had been entered in their records; but that they would not have them defpond concerning the arrival of the thips, which he was forry flaid to long behind ; but that notwithstanding this, he hoped they should not depart without satisfaction. The ambaffadors reply'd, His excellency would be pleafed to remember his promite, of not letting them depart without fatisfaction, or obtaining the end of their commitfion, in case the thips should not arrive.

The governor-general returned for anfwer, That by faying so, he did not intend to confent to the truce, which was beyond his power, at least till the arrival of the faid ships; but to give them all the poftible marks of his good-will and effeem, and that they should be dismissed with all the marks of respect they were able to pay them. That fince his mafters had thought fit to limit the beginning of the truce to the time of its being ratified by his maje-fly of Portugal, and being returned into Holland, and thence to the East-Indies, they were absolutely obliged to wait for the arrival of it, left it should seem as if they thought themselves more understanding in this point than the flates-general.

One of the ambaffadors made answer, That they were perfuaded his excellency the governor-general was fufficiently authorized to make peace and war at his pleature in thefe countries, the same tending to the advantage of the Dutch nation; and that this coffation of arms could not but be acceptable to the states-general, who had to lately concluded a peace with the king of Portugal. He further told them, That the viceroy of Gos was always authorized with fuch a power; but in a more peculiar manner at this time, having received express orders for that purpose by a cirvel from his majetty.

At last the ambassadors perceiving that the great council remained itedfast in their resolution, they thought it unfit to push the matter any further for that time, reiterating their former requeft, of having a copy granted them concerning their transctions here; and defiring, that fince the feafon began to open the paffage by fea to Coromandel, they might be difmiffed forthwith, in order to profecute their journey by land to Goa before the winter, the same being impracticable afterwards, by reaton

of the frequent rains. The governor-general Baldeus promised them entire satisfaction upon both these heads, and that a ship should be got ready for their excellencies; but that however, he could not forbear to tell them, That in his opinion they would do better to tarry a little longer, in expectation of the beforementioned ships, and the ratification ex-pected to be brought over by them. They replied, That having received express orders from the viceroy to return to Goa with the first opportunity, they were obliged to obey, unless his excellency would lay his commands upon them to the contrary. The governor-general answered, That it was not in his power to command them, what he had faid being only by way of advice a but if they were refolved to the contrary, they should not be in the least detained: that if they thought fit, advice might be fent thereof to the viceroy by the ship that was then just ready to fail for Coromandel 3 or if they difliked this proposition, one of them might tarry at Balavia till the arrival of the ratification, whilst the other return'd to Goa. This expedient being approved by them, it was agreed that the Franciscan father should go back to Goa by the way of Coromandel, and the other stay at Batavia, till the arrival of the ratification.

Then the ambaffadors defired the releafe- some part ment of certain Miffices and Negroes that question were prisoners among us; which it ing soon the amount granted by the governor-general, e asked fadors. the fame favour in behalf of four other perfons who had been clapp'd in irons on occasion of some mutiny at Batavia, in which they were the ringleaders; which was also granted, under condition that they thouid depart the country with the Francifean father. They also made the like request concerning Francisco de Souza de Castro, who (at the request of the governorgeneral) being released out of his prison by those of Achin, was delivered up to the Dutch; he had likewife leave given him to depart with the Franciscan father, provided

he paid his debts before his departure. The first of April the two ships called the Tyger and Naffaw, which had left Holland the 16th of September last, being arrived at Batavia, the faid ambaffadors appeared once Another more in the great council, intimating, That they being informed that at the time of the departure of these ships out of Halland, the ratification of the articles of his Portugueje majesty concerning the East-Indies was not arrived; at which they were much furpriz'd, as not knowing what might be the reason thereof; they defired to know whether his excellency had not received any more particular intelligence, which might induce him to grant the defired ceffation of arms. The governor-general reply'd, That he

Baldeus, had put it beyond all doubt, that the ratification would have been brought along with these ships; but since it had happen'd otherwise, it was not in his power to grant the required truce. The ambaffadors ask'd, Whether they should both depart? or whether his excellency thought convenient that one of them should stay behind? The governor-general told them, That they were at their own disposal; but that fince they expected every day the arrival of their winter-fhips, which infalliby would bring over the faid ratification, he judged it might be best for them to continue a little longer at

Hereupon they refolved once more, that the Franciscan father should go back over Coromandel to Goa, whilft the other should stay at Batavia for the arrival of the ratification. Accordingly a written certificate was given to the ambaffadors concerning their zeal and industry in compassing their commission, figned by his excellency the governor-general Anthony van Diemen, by Cornclius van der Lijn, John Maatzuyker, Justus Schouten, Cornelius Witzen, and Peter Boreel, in the castle of Batavia, April 9. 1642. To the Franciscan father the council gave the following letter, directed to the viceroy of Goa.

Most Illustrious I and!

Alterreto ... Diego Mendes de Britto, gentleman of the king's houshold, and the reverend father, brother Gonfalvo de S. Joseph, your excellency's ambaffadors, " being come in our road the 28th of Janu-" ary aboard the Dolphin, were honour-" ably received by us the next day. They delivered to us your excellency's credential letters, dated in Goa the 6th of De-" cember of the last year; as also the letters of his Portuguese majesty to you, concerning the truce betwixt Portugal and

" the United Provinces. The before men-

tioned ambaffadors have not been remifs Baldate. in their zeal, industry, and duty, to prefs in their feveral audiences the obtaining of a truce; which we would willingly have granted, had not we received certain advice by some ships arrived the 14th of February, by the way of Fernambuco, and others arrived the first of April here, of a truce concluded betwirt his majetty of Portugal and the flates-general of the United Provinces , wherein it was expresty agreed with his majesty's plenipotentiary Tristaon de Mendows Fartado, among other points, that the truce agreed upon for ten years in Europe, should be of the fame validity in these parts, yet so that the same should not commence before that his Portuguese majesty should have fent back his ratification into Holland, and the same be publickly proclaimed afterwards in these parts, as will more fully appear to your excellencies out of the encloted letters. Thus being obliged to follow the directions of our lords and mafters, we could not proceed further in this business till the arrival of the next thips from Holland; which being expected " daily, with the faid ratification, we did advise your ambassadors to stay (or at least one of them) for the coming of the faid thips, as theonly means not to render your excellency's embaffy altogether fruitles: accordingly Mr. Diego Mendes de Britto intends to hasten his journey to Goa, immediately after the first further notice of the faid ratification, which we hope " will prove agreeable to your excellen-" cy's fentiments. We recommend your excellency to God's protection. Dated in the cattle of Batavia, the 8th of " April, 1642.

Subfcribed,

The governor-general for the United Provinces in the East-Indies.

CHAP. XV.

A Nibony van Diemen governor-general, and the members of the Rescheros. 44 great council of the East Indies under the " jurifiliction of the United Provinces, make whereas by two feveral letters, dated the 16 22d of February, and the 15th of March, " 1642, brought over by the ship the Salamander, we have been advertised, That the 12th of June 1641. a firm at alliance and truce has been concluded for ten years betwirt the most potent Don of John IV. king of Portegal, Algarve, and " lord of Guinea, and of the conquests " made on the shore of Etbiopia, Arabia, " Perfia, and India, on one fide, and their " high and mightineffes the states general " of the United Provinces on the other fide. " including all the before-mentioned king-"doms, countries, provinces, iflands, and other places on both fides of the equi-" noctial line, (without exception,) all fuch "as now actually are, or for the future " may be under the jurifdiction of the faid "king and the states-general; during which " space of ten years successively all hostilities " betwire their respective subjects shail cease " both by fea and land, without limitation "or exception of any places, perions, or "circumstances, as by the articles of the " faid truce does more amply and fully "appear. It is therefore that we are com-"manded to furcease all manner of hostili-" ties from this day for the next succeeding " ten years, according to which all our fub-" jects shall regulate themselves; and to "take effectual care that nothing may be "transacted any wife contrary to the true "intent of the articles of the faid alliance " and truce, but to maintain the fame 14 inviolably. And that nobody may plead ignorance in this case, we have ordered "these presents to be published, enjoining "every body, under severe penalties, not " to infringe any of the before-mentioned " articles, as they will answer the same at their peril. Dated in the castle of " Batavia, Octob. 4. 1642, and first pub-" lished the 7th of the same month, under

Anthony van Diemen.

By order of his excellency,

" the great feal of the company in red

Peter Mesdach, Secretary.

However, this truce was but ill observed by the viceroy of Goa, especially in the territories of Gale, in the isle of Ceylon, which induced the Dutch general and great council to send him this following protest.

By letters from our commiffary Peter Baldaus:

Of the truce betwint his Particular ma. The Freeh of the truce betwirt his Portuguese ma-fent to the jefty and the states-general of the United count d'A-" Provinces) we dispatched to Goa, to veirus. give notice thereof to your excellency, we have been informed beyond all expectation, that upon his arrival there, and his carneil request to your excellency, (purluant to our orders,) to withdraw the army under the command of Don Philip of Majearenbas from the territories of Puntegale, under our jurifdiction. your excellency has been pleated to fliew to much aversion to comply with his demands, though founded upon un-deniable and just grounds represented to your commissioners in the several con-terences held upon that subject , that tuquese "he finding his presence useless at Goa, presented he was forced to return from thence that the without being able to encomposs his just Dutch judefigns, and (purfuant to his orders did not ex-received from us) to denounce before tend withhis departure, the continuation of the out the

war to your excellency, till fatisfaction walls of might be obtained upon this score. And fince the unjust detention of the territories of Gale tends to our confiderable detriment, we declare, That upon perufal of the writings fent to us by your excellency by the hands of our commissary, we can make no better construction of the whole matter, than that your excellency's intention is, under this framed pretext, to render the truce concluded betwixt our respective masters invalid, and of no worth. It is therefore that we think ourselves obliged to approve every thing that has been transacted upon this head by our commissary, and to make use of such means for the justification of our rights, as God has put into our hands, and are altogether fuitable to the laws of nations. And as upon these considerations, we have sent back this fleet, by which your excellency will at once receive this Protest, and be made fensible at the same time of our refolution of maintaining our just cause, which will questionless prove the occasion of new differences betwixt " his Portuguese majesty and the statesgeneral of the United Provinces, as also of much effusion of blood, of vast expences, and many other inconveniences; we call God to witness, and declare and protest by these presents, that we are innocent, and are not anfwerable for the direful confequences of " this breach of the truce, which we were " ready to have punctually observed on our fide, purfuant to the inten-

Baldæus, " tion of our mafters, had not your excellency bereaved us of all hopes of adjusting matters by an amicable compofition for the recovery of our rights in the country of Gale, unjustly detained by " your excellency.

> Dated in the Castle of Batavia, the 5th of August, 1643.

> > Signed, Anthony van Diemen, Francis Caron, Justus Schouten, Cornelius van der Lijn, John Maatzuyker, Solomon Sweers.

Thus matters remained in suspence betwixt the Portuguese and us, till the year 1644. when Mr. Maatzuyker, being authorized by their high and mightinesses, as also by the general and great council of the Indies, to treat with the count d'Aveiras, viceroy of Goa, concerning a firm truce, and to adjust the remaining differences for that purpofe, (yet upon appro-Portuguefe bation of their respective masters,) the same and Dutch at last concluded a truce the 10th of Noin the In- vember, upon the following conditions.

The condizions.

"BOTH parties declare that this prefent agreement, intended for the composing of such differences as " have hitherto occasioned much blood-" fhed, and obstructed the so-long-defired peace, fhall in no wife be deemed, or be prejudicial to the rights and fovereign-" ties either of the most illustrious king of ". Portugal, or of their high and mighti-" nesses the states-general of the United "Provinces, as the fame are established (by " the truce agreed upon betwixt his Portuguese majesty, and the said states-gene-" ral) in their respective cities, castles, for-" treffes, towns, harbours, and feas in the Indies; and that this agreement shall be " inviolably observed on both sides imme-" diately after its fecond publication at

II. "Since the happy effects of the truce have been obstructed hitherto by certain "differences arisen about the just division of the limits in the ifle of Ceylon, it is agreed that the decision thereof shall be entirely remitted to the respective masters and lords of both nations, and in the mean while a full ceffation of arms and all hostilities to be kept inviolably, 44 and all forts, territories, and other mat-66 ters, to remain in the fame state as they were at the day of the publication of " these presents at Goa; so that not the " leaft alteration or innovation is to be

made either in building, rebuilding, or Baldens, mending any thing, much less in making any preparations either for a defensive or offensive war.

III. " But that whilft the before-mentioned differences remain undecided, the products of the country may not be neglected or loft by reason of the differences betwixt the possessors, it is agreed that the fame shall be divided into two equal shares betwixt the Portuguese and the Dutch, yet so that the same shall be deposited (remain in custody) with " the laft, till the decision of these differences by their respective principals in Europe: whereby they oblige themfelves at the fame time to a full reflitution in case the same be agreed upon by the faid principals. And the faid ambaffador declares and protefts, that the word deposited, inserted at the request of the viceroy (for the better adjusting of matters) shall not in any wife be interpreted as prejudicial to the possession and title of the states-general to these lands and their products. And to avoid all contests concerning the gathering of these fruits, it is agreed the Portuguele shall have full liberty to gather, without any moleftation or hindrance, such fruits as grow in one part of the lands in difpute, viz. that part which is next adjacent to their fort; as on the other hand, the Hollanders shall enjoy the same freedom in gathering the fruits in that half part adjoining to their fortrefs. The fame is also to be understood of equally fharing the administration of justice in these parts, lest malefactors may be encouraged, and crimes pass unpunished, by reason of the uncertainty of the administration of justice; publick proclamation hereof being to be made in this ifle by the respective governors of both

IV. "Raja Singa the king of Candy shall be comprehended in this truce, (accord-" ing to the third article,) with all his

 kingdoms, provinces, and pofferfions.
 V. "All proprietors, owners, or farmers in the villages, fhall have full liberty to return to their poffessions and farms, of what nature foever, with their families, provided they return within the space of fix months, either in person, or send their deputies, and pay the usual taxes and duties to those under whose jurisdiction they live, without any trouble. And that no inconveniencies may arife in point of confcience, it is agreed, That liberty of confcience shall be allowed, and the free exercise of religion in all parishes or villages, except in the fortified places be-

ified places belonging ** longing to the Hollanders, till the beforementioned decision be arrived out of Eu-

VI. "The labourers of the isle of Ceylon, called Sebalias, employ'd in peeling of the cinnamon, shall have liberty to work with both parties, yet not without the consent of that party under whose jurisdiction they live; and the better to maintain the truce, neither party shall be permitted to entice these labourers of Ceylon, or any other of the natives out of one another's service, without mutual consent, but shall be obliged to send them back to their respective dwelling-places.

VII. " All the goods feized on account " of, or during these differences, shall be " reflored, or elfe the value thereof paid " in money, provided they were actually in the poffession of either party, and not " otherwise; upon which account the Dutch " ambaffador promifes to pay here at Goa, or at Suratte, in the next following month of January at farthest, the sum of one hundred thousand Spanish reals, to be accounted for according to the true value thereof they bear at Batavia, as the payment of the money shall be made, according to the course of money in those places where these goods were taxed; to be understood of fuch goods as, notwithstanding the payment of the before-faid money, " are found to remain as yet unfatisfied for from the 22d day of February, 1643. " being a twelve-month after the ratifica-" tion of his Portuguese majesty was sent to

"the Hague.
VIII. "In case during this truce any differences should arise betwirt both parties,
this agreement shall remain firm and inviolable, and every thing remain in the
fame shate, till the decision of the respective principals; and in case the nature of
the matter admits of no delay, the same is
to be referred to the determination of certain arbitrators, to be chosen by both
parties; and whilst the same is in agitation, the pretended party to remain inpossession till the point is decided by the
faid arbitrators.

IX. "This prefent agreement is not in the least to be prejudicial to such judgments or decisions as have been made or given betwixt contending parties, or may be given for the future by our respective principals; but the same shall be regarded and taken as valid in all respects by both parties, notwithstanding this agreement, intended only for the removing of differences till the same can be approved of by our respective principals; which agreement for the ceasing of all manner or hostilities, and maintaining a firm truce in the iste of Ceylon, is promised by

" both parties to be published immediate. Baldaus. " ly, and inviolably observed both in refpect of the governors and subjects, as his excellency the viceroy engages the fame for himself and his successors, generals, and governors; and my lord ambassador for the states of the United Provinces, and the East India company, purfuant to the authority granted him by the most noble Anthony van Diemen, general-governor of the Indies. In confirmation whereof this agreement is autho-" rized and confirmed by a folenmoath taken upon the gotpel in the prefence of the most reverend archbishop and primate of Goa, Don Frey Francijco de Martyres, and Don Alekonso Medis, patriarch of Ethiopia, members of the privy council of his majefty, and in the presence of the other privy counsellors of Goa, who have given their full approbation and confent thereunto, as alfo in the presence of Wollebrand Gleynz chief director in Perfia, Abraham Fierens, minister of the gospel, John Pot-"tey fiscal, Andreas Frifius secretary, Tho-mas Kuyk head factor; who, together with his excellency the viceroy, and his excellency the ambaffador, did fet their " hands to it; Joseph de Chaves Coto Ma" jor, his excellency the viceroy's fecreta-" ry, having taken care to make the " draughts thereof.

Signed thus,

"Several draughts of this agreement having been made both in "viin and "Portuguese, it is agreed betwire the vice- roy and the ambassador, That in case any doubt should arise about the interpretation of certain words, recourse is to be had to the Latin, which being the original, is to be interpreted according to the plain signification of the words, without any collateral construction: in confirmation of which this declaration

Baldaus." was thought fit to be made. Subscribed " a fecond time on the same day by the " under-written perfons.

> Conde d'Aveiras, John Maatzuyker, Fr. Francisco de Martyres Archbishop and Primate, Alphonfo Medis Patriarch of Ethio-Francisco de Melo, Don Manoel Pereira, Anthonio Saria,

Joseph Pinto Pereira, Wollebrand Gleynz, jun. In the year 1645. January 10. the division of the limits in the isle of Ceylon was agreed upon in the city of Columbo, Don Philippo Mascarenhas, successor to the count

Anthonio Monis Baretto,

d'Aveiras, being then viceroy of Goa. THE countries betwixt Columbo and Negumbo shall be divided into " two equal fhares, according to their feveral diffricts, (called Corles,) as far as the fame can be done, to prevent the confu-" fion which might otherwise arise from the division of the antient jurisdictions: but in fuch places where the fame is not to be done, this division is to be made by fharing the villages; fo that confidering there are feventeen districts betwixt the two before-mentioned forts, feven thereof are to be annexed to the jurisdiction of Columbo, viz. Herra Corla, Omapauduna Corla, Quatigora Corla, Biligal Corla, Galbare Corla, Apitigan Corla, and Pernacur Corla, lying altogether towards that fide. To the fort of Negumbo are to be annexed eight districts, viz. "Pitigal Corla, Diomede Corla, Urupula "Corla, Carvagal Corla, Vili Corla, Ma-"dura Corla, Hieriela Corla, and Mangur Corla; the rest to be divided into two equal shares, Alicur Corla by the river Dandagan to be the common boundary of both nations; fo that part which lies to the north shall belong to Negumbo, and to Columbo what lies on this fide. "The province of Catugambala Corla is to be divided by the same river, together with its three leffer diffricts, Udacaba Pa-" to Mienda Pato, and Jetigala Pato; fo that Jetigala shall fall to the share of Ne-"gumbo, and Udacaha to Columbo; but Mienda Pato shall be divided into two equal parts, in proportion to its villages, fuch villages as lie next Jetigala Pato to be under the jurifdiction of Negumbo, " and those on the side of Udacaba un-der Columbo. The Portuguese shall re-" main in the possession of Putelaon and

" Calpentyn; but the river of Alican is to Balda be the boundary betwixt Columbo and " Gale; fo that part lying on the other " fide of the river shall remain to the " Hollanders; but the other part on this fide, together with the river and harbour, to the Portuguese, in the same manner as they were formerly possessed of it; under this condition however, That the Hollanders living here, or in any other parts, shall have the free use of the faid river in fishing, or exporting and inporting their merchandizes without paying any customs. And whereas by the feventh article of the agreement made at Goa it was agreed, that the labourers (called Schalias) who peel the cinnamon, shall be employ'd by both parties, to prevent all further differences for the future upon this head, it is agreed, That the Hollanders shall every year, in harvest time, fend one half of these labourers out of the villages of illi and Cofgure, under their jurisdictio... on the other side of the river Alican. to affift, as formerly, the Portuguese in peeling of cinnamon, under condition that the cinnamon thus peeled by them in the Portuguese territories, shall be laid up in a certain place upon the river Dandagan, to be divided once every year in two equal shares betwixt the two parties, provided that each party pay the usual price to the Schalias for the peeling of their share of cinnamon. This division is to take place, and to stand firm till the same be otherwise decided by our respective principals in Europe, with this referve nevertheless in regard of the Hollanders, who being ignorant hitherto in the true fituation of the country, may eafily be deceived, in this point; and therefore ought to have the liberty to appeal to better judgment, and defire a recompensation of their losses. But in case the parties should disagree upon this head, this shall not occasion any rupture, but the truce shall not withstanding this remain in as full force, according to the intent of the ninth article of the before-mentioned agreement. Don Philippo Mascarenhas the present viceroy, and Mr. John Maatzuyker, do also engage to cause this treaty of the division of the limits to be published immediately, for the general benefit of all fuch as have any concern therein, that the inhabitants of this ifle may no longer remain in ignorance under whose jurisdiction they live; and for the due performance thereof, have confirmed the fame with their oaths, and fubfcribed the draughts thereof both in Latin and Portugues yet so, that in case of any doubt, recourse is to be had to the Latin original."

Baldens, ifland, under the command of Anthony Fer-~ nando, a most impious wretch, who having forfaken both his religion, and the fervice of his native country, turn'd Mahometan, affuming the name of Abdala; and being well verfed in maritime affairs, was in The Portu-great favour with Sebajus. This renegado having landed a good body of men in this ifle, left no ftone unturned to make himfelf master of the fort erected there by the Portuguese: but being bravely defended by Emanuel Paffangie, a native of Genoa, defcended from a great family, and famous

for his brave actions, Abdala, hearing of the return of the victorious fleet, was glad to leave both the fort and the ifle. The fort was not long after demolished by the Portuguese themselves; who had been taught The reason by experience, that too great a number of fortreffes confumed al! their profit, and exposes them besides to no small danger; like a hen who has more chickens than she can

protect with her wings, often loses one by the rapacious kite. The country of Canara is very fertile in

rice and other necessaries of human life; its inhapitants, commonly called Canarins, are very robust, and fit for all manner of hard labour. The chief cities near the fea-shore, are the city and kingdom of Onor, not far distant from Goa, where the Portuguese had alfo a fort, it being formerly a place of confiderable traffick. Next to Onor lies Batecalo, about twenty five leagues from Goa, the king whereof became tributary to the crown of Portugal under the reign of Emanuel; but refusing afterwards to pay the usual tribute, Sequeria sent Alphonso Mencs with fome ships to block up the harbour, which foon reduced the king to obedience. Afterwards the queen of Batecalo entertaining the pirates in her harbours, and refufing likewise to pay the tribute, Soja failed thither with forty nine ships and one thousand five hundred land-men; and after he had caft anchor in the harbour, fent his messengers into the city to require the payment of the tribute, and the turrendering of the pirates. She being frighted at the

fight of to powerful a fleet, furrendered

four of the parates thips; but ende vouring

for the rest to detain the Portuguese with

fair words, thefe landed their men, not a

little incommoded by the arrows shot at

them by the inhabitants from the cocoa-

trees; but having put themselves in order

of battle, they advanced towards the city, where they were (in the absence of the

queen) fo warmly engaged by the inha-

bitants, that the combat remained doubt-

ful for fome time, till thefe being worted,

they fet the city on fire, with the loss of

twelve men only on their fide. In this

action one Almeyda, a brave Portuguese, Balde feeing his comrade inclosed on all fides by the enemy, fought his way through them; and having releued his companion, withflood the whole force of the enemy, till he was relieved by a body of the Partu-guese. Afterwards they made incursions into the country, which foon obliged the queen to confent to the payment of the tribute.

Barcelor, Baranor, and Mangalor, being places of no great confequence, deferve no particular descriptions; wherefore we will proceed to the country of Malabar, which Middle (according to common computation) begins about fifty leagues to the fouth of Goa, the extension and extends to the cape of Comoryn, to the utmost borders of India, on this side of Ganges. This whole country being full of rivers, is confequently of an easy passage; though most of the rivers here are so shal. low, that they are not capable of bearing any ships of bulk or burden. The largest rivers are Bergera, (a great receptacle for to rive. pirates,) Panane, and Cranganor, the common boundaries of the kingdoms of Calecut and Cochin: thefe, as well as the river of Cochin, are about eighteen or nineteen foot deep at high-water. The whole country of Malabar is divided into five kingdoms, viz. Cananor, Calecut, Cranganor, Cochin, and Coulang, unto which fome add the kingdom of Trevancor, the least fertile of all, and the two petty kingdoms of Porca and Calecoulang.

In former ages Malabar was subject to The arm one fovereign prince, who kept his court at flate? Calecut, now the refidence of the great Monda Sammoryn. This king having, at the per-Sammo fuafion of fome of his courtiers, undertaken "50,11 a voyage over the Rea Sea, to visit Ma-emper bomet's tomb, and to be thorowly instructed in that faith, died in his return from thence; and leaving no iffue, the whole empire was divided between his efquire, fword-bearer, and fceptre-bearer: the first taking for his share Cananor, the second Calecut, and the

third Cocbin. The nights are very cold all along the The clinut. coast of Malabar, with very thick fogs, especially in January, February, and March, when the days are excessive hot. They have every day a tea and land wind; the first begins every morning at nine or ten a clock, and holds till funfet. This coast is scarce navi- And its gable from June till November, the best font.

time here being from April till June. Their winter begins in May, and continues till November.

The chief products of Malabar, are pep-Probat. per and cardamum: Cochin affords great quantities of pepper; but Cananor yields the best, especially in the inland countries,

alabar, are pep-Probain affords great Cananor yields nland countries, whence

Paldens, whence the Moors and other merchants from ~ Carnatica and Visiapour use to fetch it in confiderable quantities. The pepper of Calecut is leffer of grain than those of Cananor and Cochin. This commodity is generally cheaper at one place than another. They buy it by the canda, at the rate of three hundred and ninety or four hundred fanams a canda, a fanam being worth about ten pence of our money. In the year 1640. The price rose to four hundred and fifty fanams. The pepper delights in shady places, the ftem is weak like those of the vincs, and uses to be upheld by stalks like our hops: each flem bears commonly fix bunches, every one a foot long, refembling in colour to our grapes before they are ripe. They are gathered green in Ostober and November, and dry'd in the fun upon mats, when they turn black. Befides the pepper and cardamum, this country produces also ginger, and borborri of a faffron colour. Formerly these two commodities used to be fold for five Man it a fanams a man; it affords also some aloes, but in no great quantity. Befides thefe, Malabar affords very few commodities, ex-* Found in cept a few bezoar-stones, * found about Carichibious nanor, falt-petre, gummilacca, (though the man,) and abundance of wax and

pens hig The The whole country is covered with innuog, and merable cocoa-trees, besides such other trees as generally grow in the East Indies. The reshared commodities carried to, and to be fold in Malabar, are amfion or opium, much in use here, especially among the Nairos, when they are to fight, to intoxicate their brains. Ambergreese is also in great esteem among the Malabars, and transported thither from the Maldive islands. I have seen an ounce of it fold at Cananor for fix reals. Malabar confumes also abundance of cloves, nutmegs, and mace, as also allom, china-root, lead, tin, brafs, copper, brimitone, cinnabar, tearlet and crimton clothes, red damasks, benzorn, and coarte porcellain.

The whole coast of Malabar abounds in fishes, and at Goebin they have most excelent cods. Belly provisions are also here in great plenty, and bought at an easy rate; for they abound in oxen, fwine, and poultry. The cocoa-trees furnish them with drink, which if not used to excess, is tolerable wholesome. Out of this liquor they distill their arrack, much courted by the common foldiers and seamen, to their great detriment.

The first is the king of Cananor, not in respect to much of his power, but of

his fituation next to Goa. His refidence Buldanes, is about three or four leagues in the country from the river of Baligatas; the extent of his kingdom is from Montedely to Bergera; he maintains a confiderable number of musketeers and archers, who are very expert in managing their feynmetars.

Cananor is a populous city, inhabited Cananor, chiefly by rich Mahometan merchants, who live without, yet under the cannon of the fortifications. They had formerly a confiderable traffick to Suratte, Cambaja, and the Red Sea, whither they used to fend yearly twenty five or thirty ships; but this place is much decayed in trade of late years,

and is likely to be worfe. About two leagues to the fouth of Ca-Termapananor lies the city of Termapatan, under tanthe jurisdiction of a Mahometan; it is ftrengthened to the land-fide by a good wall. The rebellious pirates of Bergera do confiderable mischief to the king of Cananor and his fubjects, who, as well as the other nations trading in these seas, are forced to buy passports of them for their fecurity. They used formerly to infest these Pirates of feas with forty frigates at a time, but are Malabar not so potent of late years, fince the Dutch have frightened the Portuguese out of these parts; fince which time they have now and then attempted the Dutch, as they did with the ship called the Dolphin, but got nothing but blows. Their chiefs are Mabometans, and the foldiers partly Moors, partly Pagans.

Cananor lies about forty leagues to the north of Cochin, having a spacious and fecure harbour: the country thereabouts abounding in pepper, cardamum, ginger, mirabolans, tamarinds, &c. Peter Alvarus Capralis, commander in chief of the fecond fleet fent by Emanuel king of Portugal into the Indies, after having given a vifit to the king of Cocbin, and the great Sammoryn, came also to Cananor; where being kindly received, the king fent an ambaffador along with him to the king of Portugal. Al-The Portumeyda did erect here (with the king's con-guele build fent) a strong fort for the fecurity of their a fort at Cananor. commerce; which being afterwards most vigoroufly attacked by those of Calecut and Cranganor, was bravely defended by Laurence de Britto, to his immortal honour. And upon this occasion it will not be beyond our purpole, to give you the reasons which induced the Moors to enter upon this war, which was accompany'd with many

most remarkable actions

The

Reasons why the Malabars entered into a war with the Portuguese.

The Portuguese having made themselves mafters at fea, not only on the coast of Ethiopia, but also of India and Arabia, would not permit the inhabitants of these countries to fend out their ships without passports obtained from them; for which purpose they kept a strict eye over all the Malabars, in a most peculiar manner. A certain Portuguese, captain of a man of wer, having attacked a veffel of Cananor, which he fupposed to have come from Calecut without a pass, he caused the master thereof, and another person of note on board her, to be sewed up in a cloth, and fo threw them overboard; which being done not far from Cananor, the dead carcasses were cast ashore there. The inhabitants knowing the perfons, and understanding their fate, were so exasperated at the Portuguese, that they cry'd out for vengeance, and affaulted the fort. Almoyda offered them fatisfaction, and cashier'd the captain; but in vain, the Moors continuing obstinate, and resolving to revenge the death of their countrymen

upon the Portuguese in the fort.

Laurence de Britto being sensible that he must expect a formal siege, resolved to stand the brunt bravely; and sent his messenses

to Almeyda, to defire prompt fuccours. In the Balders, mean time the king of Cananor was not idle, but having intrenched himfelf near the harbour, all along the fea-fide he erected certain forts, to cut off the communication betwixt the city and castle. At the fame time being reinforced by twenty thoufand men, fent from Calecut, they now re-folved upon a formal fiege. There was a certain fpring betwixt the city and caltle, which being the only one whence the Portuguese garrison could be supplied with fresh-water, this occasioned frequent and bloody skirmishes; so that they were forced to purchase their water with much effusion of blood. Laurence Britto had with him The from in the fort a certain mathematician, named was after Thomas Ferdinand, by whose advice they waris to digged from the fort underground to the in the firm fpring, and by pipes conveyed it to the frame, place where they had occasion for it; so that after having supplied their own wants, they flopped in the next falley the fpring; fo that the Moors were forced to remove their camp from thence; but they in the fortenjoy'd the benefit thereof. They then began their attack on the other fide, and by the help of facks filled with cotton, advancing to the

Raldeus, ditch, filled it with faggots, and made a fierce affault; but being bravely repulfed by the Portuguele, and forced to retreat, thefe fally'd out upon them, and made a great flaughter of the barbarians. These finding that force was not likely

to do their bufiness, resolved to reduce it by famine, knowing that the winter feafons would cut off all hopes of relief to the belieged. On the other hand, the Portuguese made many fuccefsful falleys upon them; in one of which a Castilian, named Guadalajara, charged with one hundred and fifty men, a flrong body of the enemy, killing above three hundred of them upon the foot, and taking fome of their great cannon. Soon after it happened unfortunately for the Portuguese, that a fire arising in the fort by the carelefnets of a flave, fome part of much their magazines of provisions was contam'd, in the whereby a great fearcity being occusioned in the fort, many negroes run over to the enemy, and gave them a full account of the condition of the garrison, who were now forced to feed upon cats, rats, mice, &c. At last heaven was pleased to commiterate the miserable state of the Portuguese, by fending a prodigious quantity of locusts from the fca, (a thing not unfrequent in those parts,) which served them both for food and refreshment. The spring beginning to approach, when the Sammoryn fearing the befieged might be shortly relieved by their countrymen, redoubled his fury against the fort; and having fent them divers confiderable fupplies of men, (which had increased his army to fifty thousand men,) he refolved to try his utmost to reduce them by force, (the Portugueje being

in the mean while fupply'd with provisions

by a certain prince of the country, an enemy Baldous, to the Sammoryn.) De Britto having receiv'd intelligence that the enemy were preparing for a general affault, took care to guard all the avenues both on the fea and land-fide. The Moors affaulted the Portuguese with their utmost fury, promising themselves an affured victory, by reafon they continually relieved their men with fresh troops: but the Portuguele received them fo warmly, that after a finart fight they put them to the rout, and purfuing them with great flaughter, the king of Cananor thought it Peace with his best way to make peace with the Portu- The king of Cananor.

Thus much of Cananor, whilst in the hands of the Portuguese: the next thing which falls under our confideration, is how it came to fall into the hands of the Hollan- How Canaders. These having made themselves ma- nor was reflers of Cranganor, Cochin, and Coulang, duced by failed 1663, from Cochin with a confiderable the Durch fleer, and a good number of land forces. under the command of Jacob Hustar, Peter du Pon, Henry van Rhede, and divers other brave officers, for Cananor. Having landed their men, and foon made themselves mafters of the city, (which was without defence,) they battered the fort with their great cannon, but without any great fuccefs, the battions and ditches on the land-lide being cut out of the rocks, and the fortifications to the fea-fide impregnable. However, after a fiege of few days the Portuguese confidering, that by the taking of Co- Cananor chin all hopes of relief were banished, they surrendred furrendred upon honourable terms; and the Dutch. Dutch having put a garrifon of two hundred men in the fort, entered into a strict alliance with the king of Cananor, 1664.

CHAP. XVII.

A Description of Calecut and Panane. The Arrival of Vasco de Gama. His Treaty with the Sammoryn. Panane fortified, befreged, and demolished by the Portuguese. Alliance betwint the Dutch and the Sammoryn. The Portuguese Fort in Calecut attacked by the Sammoryn, and defended by John de Lima.

THE fecond kingdom of Malabar is that of Calecut, under the jurisdiction of the Sammoryn: it begins about three or four leagues to the fouth of Bergera, and ends at the river Cranganor; its whole extent being in length thirty two leagues, and twenty in breadth. This king is the most potent of all the Malabar kings, having a confiderable number of Nairos under his jurifdiction, who are very expert both in handling the bow and fire-arms. He

has made confiderable encroachments upon An. 1502. his neighbours of late years, the revenues the Samof his new conquests amounting now to moryn three hundred thousand Fanams yearly, to the field The Sammoryn, who reigned 1662. Was, fixty thouwhen I faw him, not above fifty years of fund men; age, and yet much impaired in his intellec- and 1529. tual parts by the excessive use of Opium, thousand a drug much in request among the Malabars.

the fortenjoy'd hen began their I by the help of lvancing to the

Baldaus, the crown is not inherited by the fon of the king, but by him who is next of kin to his mother or fifter; for they looking custom of upon that as the furer fide, they have fardizing of the crown. Thus the king who reigned 1642 was fucceded by his uncle on the mother's fide, and he was to be fucceeded by his fifter's fon. The Sammoryn monopolizes all the pepper of the growth of his country, none of his fubjects being allowed to fell it to any but his factors.

Betwixt Cananor and Calecut lies the town of Panane, feated upon the fea-shore: here the Dutch came 1607, to treat with the Sammoryn; but he being then in the field against the Portuguese, the admiral sent three deputies to him with a letter from prince Maurice of Nassau. In this place the Sammoryn kept his residence at that time, when Don Vafco de Gama came into these parts. He having cast ancher before Calecut, dispatched immediately a mestenger to the Sammoryn, to give notice of his arrival, and to let the king know that the renown of his great name having reached the ears of the king of Portugal, his majesty had entrusted him with a letter, which he being defirous to deliver in person, therefore defired leave to wait on his majesty.

The Sammoryn being extremely pleafed Bulden; with the compliment, fent immediately certain pilots to conduct the Portuguejo fleet Gam. into the harbour of Capocate, where there Panae. was much better and fafer anchorage; from whence he was conducted with extraordinary pomp to the Sammoryn.

For Don Gama being got ashore, attended by eight gentlemen richly attired, Hungwas received in the Sammoryn's name by the tion. Catual, (or he that manages all foreign affairs,) accompanied with a vast number of guards, hautboys, drums, and litters, and thence carried through Calecut to Panana (where the Sammoryn then refided) under fuch a vast concourse of spectators, that feveral were crouded to death. At court Hirmy Gama was welcomed by the Caimales, (or time as chief courtiers,) and afterwards by the high prieft of the Brabmans dreffed in white callico, who taking Gama by the hand, conducted him to many spacious apartments (at the door of each whereof flood about ten fentinels) into a spacious hall, the walls and floor whereof were covered with rich tapeftry, and carpets of filk and gold; thechief men of the kingdom fitting round the hall upon wooden feats, artificially wrought one above another, like the feats in an amphitheatre. The Sammoryn himfelf was

Baldeus, feated (according to the custom of the country) upon an Alkatys, or carpet, dreffed in white fine callico, brocado'd with flowers of gold, adorned with divers rows of diamonds of great value: in his ears he had stately pendants of precious stones, and on his head a cap (after their country fafhion) covered with diamonds, pearls, and other precious stones; his bare feet being likewife adorned with rings fet with all forts of precious stones.

One of the king's attendants offered his majefty a golden veffel with arrack and betel, which the *Indians* chaw almost continually to preserve their teeth and gums, and treat their guests with it as we do with wine, strong liquors being not much in use here. *Gama*, after having paid his obeifance

to the king, began thus:

the Sam-

moryu.

CHAP. XVII.

"EManuel, the prefent king of Portugal, my mafter, moved by the renown of the greatness of your majefty among the kings of Malabar, has sent me with credentials, to enter into a strict league with you, in order to settle a firm correspondence and commerce betwith both nations; which my master would have been willing to have performed in person, had not the vast distance of your majesty's dominions prov'd an invincible obstacle to his generous intentions".

After which having delivered his prefents, the king answered by his interpreter:

The lings "THAT he had not the least doubt of the good intentions of his brown there Emanuel, king of Portugal, having fuch convincing proofs thereof been fore his eyes, by honouring him with to follow the line was willing to enter with them into a first league and amity; and that they fhould enjoy the benefit of a free commerce in his territories."

Then the king having asked them feveral particulars concerning their voyage, thipping, and traffick, order'd Gama to be conducted to the lodgings prepared for his reception.

to the lodgings prepared for his reception.

The news of this embaffy foon came to endeavour the ears of the Moorifh merchants in those is observed that the Portagues would do them consistent that the Portagues would do them consistent that the Portagues would do them consistent to hinder the consummation of this treaty; for which purpose having purchased the favour of many of the courtiers by money, they infinuated into the king, that Gama was no more than a great pirate, who endeavoured to get a footing in the king's dominions, which in time might prove his

ruin; whereas he might reft fecure in his do-Baldæusminions by incouraging his fubjects in their traffick with the exclusion of foreigners. These infinuations proved so effectual, that the Sammoryn began to give a favourable ear to them, and had, perhaps, proved of very ill consequence to Gama, had not a certain African, a native of Tunis, who understood Portuguese, and had formerly converted with them, discovered the danger to him; who thereupon, without further delay, Gama guis got aboard his own ships with his attendants, privately and having weighed his anchors, kept at aboard, a greater distance from the shore; whence he writ to the Sammoryn.

THAT the ill defigns of the Moors til luter.

inim, he had thought fit to retire aboard, to and to defire his majefty not to be diverted from his promife by their falfe infinuations, affuring him that he would reap much more benefit by the friendship of the king of Portugal, than by the Moors and Arabians."

The Sammeryn promifed the meffenger to make a strict enquiry after, and to punish severely these offenders, who had infringed the law of nations; and in his letter to the king of Portugal affures him,

"THAT the arrival of the Portuguese in The king's his dominions was very acceptable to answer to him, provided they might regulate them." felves fo, as not to give any occasion of diffurbance there; and that the league he wasentering upon with his majesty, might not prove prejudicial to the good correspondence he had hitherto entertained with divers other nations."

Gama having received this letter, fet fail for the isle of Anchediva, where having furnished himself with fresh provisions, he returned to Portugal, to give an account of his transactions to king Emanuel. The samous Vasco de Gama died 1524, being the first who discovered the passage into the East Indies by the cape of Good Hope.

And upon this occasion I cannot pass by in silence what is mentioned by Ferdinand Lopes de Castanbeda*, viz. Tha* Gama, with *His, In I. fome of his retinue, being at Calecut, and l. 1.0.16, entering into one of the pagan temples, paid their reverence to the images, as taking them for the same they had left in their own churches in Portugal; a convincing proof that superstition and idolatry very near refemble one another.

Panane being well fortified by the Sam-Panane. moryn with two forts, erected on both fides of the entrance of the harbour, the Portuguese notwithstanding this resolve to attempt it. They no sooner appeared in fight of the harbour, but a certain number of the

Mahometans

w

Baldeus, Mahemetans affociated themselves in one of the pagodes, and with direful execrations Anach'd by engaged to one another to defend the city, the Portu- or die in the attempt. Triflan d' Acunba,

the Portugueje general, detached a certain body of his best troops, under the com-mand of Laurence and Nonnius, in small galleys, to lead the van, being to be fol-lowed by the great ships: these entered the harbour with unipeakable bravery, notwithstanding the enemy's fire, who sent their great and fmall fhot very thick upon them from both fides of the shore, but without any confiderable effect, most of their bullets paffing over their heads, because the soldiers kept close, lying upon their bellies in the galleys. The enemy feeing them, enter'd the harbour, leap'd in whole troops into the water, attacking them with incredible fury, in hopes of boarding them: but the Portuguese stood to it with so much refolution, that at last they forced the In-The fors to the shore, made themselves matters of the two forts, and fet fire to all the ships in the harbour, which were richly loaden, as also to the city. In this action a certain Portuguese enfign, with his foldiers, did wonders, and the Mahometans fought like lions; but one of their commanders, a fel-

low of a huge bulk, being flain by Laurence, Balden, the relt betook themselves to their heels. The Indians loft five hundred men in this Prochusengagement, and the Portuguese about and fine twenty two. After which Almeyda and diams. Acunda failed to Cananor, from whence the first scered his course to Cocbin, and the fecond for Portugal. About Panane grows, befices cardamum, the best pepper, and is fold here at a very reasonable rate.

Thus much of Panane: we will now proceed to give you an account of Cale-Caleest cut, the capital city of Malabar, and the refidence of the Sammoryn, where Steven va der Hagen, the then Dutch admiral, in 1604. entered into a ftrict League to league with that king, who granted a Dutch as free commerce to the Dutch throughout the Sam-all his dominions. Many years before morya. the Portuguese had obtained the same liberty of the Sammoryn, who had affigned them certain habitations in that city; fo that they began to flourish in their commerce, and the Portuguese priests were very fuccessful in the conversion of many of the pagans. This exasperated the Moors and Arabians, who inticed the Nairos (always greedy after prey) to fall, to the number of four thousand, upon the

taken.

Pedro Alvarez Capral, the Portuguese general in those parts, being informed of this barbarous attempt, and finding that the Sammoryn had not been altogether ignorant of the matter, to revenge the death Tour dash of his countrymen, burnt ten of their merwith his great guns, and killed them above fix hundred men. The fame treatment thefe barbarians received afterwards from Meneles. We will not in this place pretend to give a particular account of all the differences and warlike exploits of the Portugueje here, and of the famous actions of Albuquerque, Henry Menefes, James Sylveria, Capral, &c. we will only mention in this place, that the quelefire fort at Calecut, by the connivance of Nanbeadar, the old Sammoryn's fifter's fon, (who favoured the Portuguefe,) the kings of Gana-

nor and Cochin were fo nettled thereat, that

they did not defift till they had engaged the Sammoryn to attack it.

It being then in the winter feafon, when the Portuguese could scarce expect any relief, and the fort provided with a garrifon of three hundred men only, they were driven to great diffress. A certain renegado, a native of Sicily, who had ferved as an engineer in the fiege of Rhodes, directing the Moors in their attack. Hereupon John de Lima, governor of the fort, did all he could to defend himfelf, in hopes of the approaching fpring; and having extended his fortifications (by means of great casks filled with fand) to the shore, sent notice of his diffressed state to Henry de Meneses, who without delay fent one hundred and forty land foldiers aboard two ships, commanded by Christopher Jusart and Edward Fonseca, to his relief; but the last being becalmed near the shore of Calecut, and the other not having above eighty men aboard, John Lima did not think it advisable to land with fo fmall a number, as being not fufficient to break through the enemies works into burn of the fort. However Justart being refolved the Portu- to venture at all, landed in a boat with thirty volunteers, who fought their way

> four of their men reached the fort, which in the mean while was affaulted by the barbarians, who were fo warmly received by the Portuguese grenadeers, that they were glad to retire in great confusion to their works. Soon after Fonfeca arriving with his ship, convey'd a letter, fastened to an arrow into the fort, intimating his arrival,

through the enemy, and with the loss of

and defiring his inflructions how to ferve him. Lima fent an answer, That he thought it not advisable to expose himself and his having recalled Sampajo, obliged him to Vol. III. 7 E. give

men to the same danger as Jusars had done, Baldens but that he should return with all speed to Fonices Menefes, and follicit a fuccour of five hun-ordered not dred men, with a good quantity of ammu- to land. nition, wherewith he did not question but to defend the place. Fonfeca being returned to Cochin, and having delivered his meffage to Menefes, he dispatched immediately Anthony de Sylva, with fome fhips for the relief of the befieged, whilst he was making all necessary preparations to follow with a much greater force in the fpring.

The Sammoryn fearing the worth, left no flone unturned to oblige the befieged to a furrender before that time; and the beforementioned Sicilian having done his utmost endeavours with mines, mortars, and battering pieces, but in vain, he refolved to reduce them by famine, which he might questionless have effected, had he had only a finall fquadron of thips to block up the harbour. But the belieged being from time to time supplied with provisions and refreshments by imall boats, which entered in the night time, they held it out bravely till fpring; when Menejes arriving with fifteen The fors hundred Portugueje, landed his men, and relieved, having put the Malabars to the rout, with the lots of three thousand men on their fide, (among whom was also the Sicilian,) the Sammoryn was fo terrified thereat, that to prevent his country from being ravaged by the Por uguese, he clapped up a sudden peace; and the Portugueje judging the fort too chargeable to keep, did afterwards de-And domomolish it of their own accord; in the spring-listed, ing up of which many Malabars (greedy after prey) were blown up into the air.

Notwithstanding this peace, the Sammoryn let flip no opportunity of doing mifchief to the Portuguese, being encouraged thereunto by the differences arisen betwixt and Gama, and Sampajo and Majearenbas, among the the Portuguese generals, as betwixt Meneses Differences about the viceroyship, which had almost Portugue proved fatal to the Portuguese assairs in the Indies. This is evident from a letter writ by Christopher de Sousa to the said Sampajo; in which he represents to him the danger unto which the Portuguese (a small number in comparison of their enemies) were exposed daily in the Indies, by his difference with Mascarenbas about the viceroyalty, exhorting It'm not to have recourse to violence, but th arbitration of fuch perfons as were competent judges; telling him, That in case of refusal he must not expect to be obey'd by him. Which coming from a person noted for his courage, liberality, and generofity in these parts, did not a little abate the haughtiness of Sampajo; and Mascarenbas returning into Portugal, was favourably received by the king, who

Baldans, give full fatisfaction to Majcarenbas for the imprifonments, affronts, and damages, he had fuffained upon that account. For the more ample relation of which, we refer our felves to the Paringueja historians. From

Calecut, we will turn towards Cranganer, Balden, in order to give you a description of its origin and fituation, and by what means it tell into the hands of the Hollanders.

CHAP. XVIII.

A Description of Cranganor: How it was befieged, and taken by the Dutch: Its Excellencies. The Isle of Vaypin. Cochin fortified: Its Inhabitants, Buildings, Plenty of Provisions, &c. Is besieged the sirst Time by the Dutch, who raised the Siege.

The river and city of Crancanor.

CRANGANOR lies five leagues to the north of Cocbin, and twenty to the fouth of Calceut, upon a fandy hill. On the fouth fide of the entrance of the river, is built a small fort called Paliport; a mile above which, higher up the river, lies the city and fortress of Cranganor, a place strongly fortissed by the Portuguese at divers times; for in the beginning they had only a tower, which they afterwards strengthened by a wall, and at last enclosed the whole by regular fortisseations of earth. The king of Cranganor keeps his residence not far from Cranganor. He that then reigned was a young, susty, and tall person, a declared enemy of the Portuguese, as well as the Samanary.

In the year 1661, after the Dutch had made themselves masters of Coulang, and by strengthening the same with fortifications, and a good garrifon, had fecured the fouth fide, they thought it expedient (before they attempted the conquest of Cocbin) to get also a firm tooting on the north side at Cranganor, especially since they feared they might be obliged to pass the winter thereabouts, it being in December. Accordingly we landed our men; but found (beyond expectation) the fortifications in fuch a state, as not to be attacked without great cannon. Above fourteen days being fpent in raising batteries, making of trenches and breaches, but to no great purpose, and the approaching feafon obliging us to carry on the fiege with all possible expedition, it was refolved (upon intelligence given by a certain person, concerning the condition of the place) to attack the point next to the river on Sunday, Jan. 15, 1662. very early in the morning.

And taken

The fignal being given accordingly by a cannon-shot, our forces advanced under the favour of the fmoke of our great artillery to the bulwark, which they took with fword-in-hand, chasing the Portuguese thence to the jesuits church. In this action the Dutch captains, Poolmann, Schulenburg, and Simon Werding, as also licutenant Syl-

vefter, acquired immortal honour, being flain as they were mounting the breach, with feventy eight common foldiers, and many wounded.

On the Portuguese fide above two hundred Lemain christians were killed, besides a great num. similar of the Nairos 1 and among the rest, Urbano Fialbo Fereira the governor of the

The Portuguese then hung out a white flag, desiring a parley upon reasonable conditions, which were granted them; and by virtue thereof the Portuguese foldiers transported into Europe. During this siege we found the nights very cold, though the days were almost insupportable by the excessive heat. And after the conquest thereof, being ordered to preach the thanksgiving sermon in one of the parish churches, (of which there were seven,) I pitched upon a text in Deuteronomy axiii. 14.

Deuteronomy xxiii. 14.

The Hollanders judging it at that time convenient to furrender the place into the king's hands, the fame was done accordingly; but regained and refortified the fame after ands, when they found themfelves engaged in a war with the Sammoryn, who made frequent excursions as far as Cochin, a thing so common among these barbarians, that no settled peace can be expected with so many kings.

And upon this occasion I cannot sufficiently commiserate the condition of the inhabitants of the countries about Cranganar and Coebin, who being guided by ignorant Romish priests, are in great danger of falling by degrees into paganism again, the district of Cranganar having formerly been so considerable for the great numbers of christians of St. Thomas (as they are called) inhabiting there, that a Portuguese archbishop had his residence in that city. Crangas It is the general opinion here, that St. Thomas mas the apostle coming first to Sociora, anishin issentially the processing of the converted a great number to the christian here.

Is befored by the Dutch.

forming and missing Aldens, faith. From hence taking his way through Coremandel into China, he returned to Maliapour, where he fuffered martyrdom. But of these christians of St. Thomas we shall have occasion to say more hereafter, our present purpose being to fay something of the state of affairs in the Portuguese times.

First then, at our arrival at Cranganor, we found there a noble college of the jesuits, with a stately library belonging to it, the structure itself being not inferior to many in Europe ; besides the church of the Franciscans, they had a stately cathedral, adorned with the tombs of the archbishops of this place. Without the wall of Cranganor, was the Tuesday college of Chanotte, famous for the rejort of the christians of St. Thomas hither, who exercifed their religious worship here in the Syriac language; and having erected a school for the education of their youth, had feveral mafters and priefts of their own; of

which more in the description of Cocbin. This language being in high efteem among the natives here, and used sometimes also by our faviour and his apostles, not only a printing-house, but a seminary has been erected at Rome for the cultivating thereof, and propagating the same among

the youth.
The Syriac Thus, 1622, a Syriac dictionary was publoguage lished at Rome by John Baptist Ferrarius, a native of Siena; and the Syriac grammar of Georgius Ameira, a famous divine and philosopher of the college of the Maronites, born near the mount Libanus. And 1628. Abrahamus Ecchelensis obliged the world with his Introduction to the Fundamentals of the Christian Faith in the same language. Whence it is evident that the Roman clergy exceed ours, in their zeal of propagating the Roman religion; though on the other hand, it must be allow'd that their plenty furnishes them with fufficient opportunities of performing of those things, which the reform-ed ministers for want of means are forced to let alone. I have seen divers books printed with the Portuguese characters, in the M .labar language, for the instruction of the Paruas; one whereof I keep by me to this day; though at the same time I must confels, that in case we should follow the same method in printing with our characters, though in their language, it would not have the same effect, they being much bigotted both to the Roman clergy, and the Portuguese language; so that I have met with some of the Paruas, who spoke as good Portuguese as they do at Lisbon. For the rest, the products of Cranganor are the same as in the other parts of Malabar, except that now and then they meet with some gold dust, but in no great quantity.

Betwixt the river of Cranganor and that Vaypia. of Cochin, lies the isle of Vaspin. When the Portuguese, though at present it is not near

Dutch, in February, 1662. belieged Cochin Baldeus, the first time, they erected a fort upon the bank of the river, from whence they battered the place, the river being there not above a musket-shot over. This fort was called the New Orange; and here we found a goodly edifice, formerly belonging to the bishop of the place, as also a very large church, in which I preached the 29th of Jan. 1662. The isle itself is tolerably fertile, under the jurisdiction of the king of Cochin, whose dominions extend from the river of Cranganor, six leagues south of Cochin, the whole length being about ten leagues. The kings of Cachin have always kept firm to the Portuguese interest, ever fince Triumpara, being conquered by the king of Calecut, fought for refuge among the Portuguese, who restored him to his

private life before his crown. Cochin is a very antient city; but was not Cochin.

kingdom, though he afterward preferred a

fortify'd till 1504. in the time of the two Albuquerques, who fet fail 1503. from Belem in Portugal; and after many imart engagements with the Sammoryn, Alphonfus returned into Portugal, where he obtained the firname of The Great, his actions being described in a peculiar treatise published at Lisbon 1576. by John Batreira. Soon after the Portuguese built a church there, and entered into a league with the Sammoryn, and the fortifications were confiderably augmented by Edward Patieco, and a wall erected by L. Vafco towards the fea-fide. In some years after this city began to increase so considerably, that it might compare with fome of the best in Europe, its length being near two English miles.

At first the christians and mahometans Christian lived promiscuously in the city, which oc- and makecasioning frequent disturbances, Albuquerque ed first 10geobtained from the king Naubeadera, that ther. each should have their peculiar quarters af-figned them to live in. In and about the city of Cochin lived also formerly some Jews, who even now have a fynagogue allowed them without the fortifications; they are neither white nor brown, but quite black. The Portuguele histories mention, that at a certain time certain blasphemous papers against our faviour, with fome fevere reflections against the jefuit Gonfalous Pereira (who afterwards fuffered martyrdom at Monopatapa,) being found in a box fet in the great church for the gathering of alms, and the fame being supposed to be laid there by some European Jews, who now and then used to refort thither privately, this gave occasion to intro-duce the inquisition into Gos.

Cochin may for its bigness juftly challenge the fecond place after Gea among the Indian cities formerly in the possession of the

Baldwus. fo big as the city of Batavia. Its fituation lies at ten degrees of north latitude, bordering to the welf upon the fea, and the river has about feventeen or eighteen fathom water at high tide 3 but its entrance is very difficult in the winter-time, being commonly choaked up by the fands which are carried thither by the ftream in the winter-feafon 3 which, however, are again removed by the violence

of the current in the fummer-time. About Cochin, as well as all along the coast of Malabar, they have every day two forts of winds, viz. the land wind, beginning in the evening; and the sea-wind, at ten in the morning. Cochin is not accounted so wholesome as most of the other places seated on the coast of Malabar, by reason of its situation in low and marshy grounds, but abounds both in fish and stellar them the season of the many brooks and adjacent little islands in the river, wherein many of the Portuguese have built themselves very pleasant summer-seats.

The river runs on the back-fide of the best houses of the city, where they catch fish with casting-nets, at which the Chinese, inhabiting here, are very dexterous. Formerly this city could boast of divers stately churches, since demolished by the Dutch. The jesuits church and college facing the sea-shore, had a losty steepie, and a most excellent set of bells: the college, which was three stories high, and contained about twenty or thirty apartments, being surrounded with a strong wall. The cathedral was also a noble piece of architesture, adorned with two rows of pillars, and a losty strate.

lofty fteeple. The church and convent of the Aufiin friers ftood upon the bank of the river; and the church of the Dominicans, with their convents, were two rare pieces of workmanship, beautified with a double row of pillars of most excellent stone. The church and monastery of the Franciscans is the only that remains standing as yet, but has no more than two brothers left, who are allow'd the free exercise of their religion.

The best houses of Cochin have their court-yards and gardens belonging to thens, enclosed with very thin, yet strong and high walls, so that the neighbours cannot overlook one another. The fituation of the city is much more in length than breadth, without any channels in the streets; however, that end towards the sea-fide is much broader than the other, as may be seen by the annexed draught; which also representing an exact view of its fortifications, we will refer the reader to it.

The Malabar Cochin is feated fomewhat lower, and built after the Indian fashion, with very broad streets: it is very populous,

and the royal palace is built with bricks Baldone, and mortar after the European way, with partments very spacious and lofty; near which stands the Pagode, with a very large ciftern adjoining to it.

Anno 1662. in February, at the time of our first landing before Cocbin, the Nairos inhabiting hereabouts (notwithstanding we positively declared we were no enemies of the king, but only of the Portugues assembled in great numbers in this palace and the Pagode, and from thence assaulted our forces; which obliged us to drive them from thence, with the slaughter of sour Fowler, hundred on their side, they sighting very drassing desperately, by reason they had beforehand intoxicated their brains with very large dose of Opium. The old queen of Cocbin being the serious taken prisoner in the fray, by Henry wan takes ye. Rhede an ensign, was kept in safe custody some for some time after.

Afterwards we began to form our attacks against the Portuguese Cochin in three several places; that on the land-fide near the church of St. Thomas, (which ferved us for a chapel and hospital,) being commanded by the general in person; that along the sea-side, by Ysbrand Gotsken; and the third, near the river by the commodore Roothaus. After fome time spent in making of trenches, and railing of batteries, it was thought expedient to furprize the enemy on that fide near the river. The first Sunday in February of sufficient being appointed for that purpose, captain fault with Peter Wash was ordered to begin the assault Cochin. with a certain detachment at four a clock in the morning : but it being after fun-rifing before they could reach the place, the Por-tuguese took the alarm; and being timely fustained by fresh troops drawn thither by the ringing of the bells, gave fuch a warm reception to the Hollanders, that after a most obstinate engagement, they were forced to found the retreat, with the loss of divers of their best men, and among them the beforementioned captain, who was killed by two musket-bullets. The general Ryetos van Goens and the commodore Rootbaus were also both in great danger, the first receiving feveral fhots through his hair, the last being likely to have been cast into a deep well.

Notwithstanding this disappointment, the trenches were carried on with all imaginable speed, though not without great difficulty, by reason of the marshy grounds, which cost us a good number of men, more than we could conveniently spare at that time, when our forces were not a little weakened before, we having left at least three hundred sick and wounded at Coulang, and a considerable garrison at Cranganor, and in the fort of New-Orange on the point of the isle of Vaypin. We continued, however, to batter the town incessantly with

CHAP. XIX.

Accordingly our cannon, ammunition, and other moveables, being fent aboard upon floats, the general made a fafe retreat in the night-time, without beat of drum; and the better to cover his defign, had gained a certain Jew by money to make the clock of St. Thomas church strike assufually: to which also contributed not a little the ingenious invention of a certain gunn, named Henry Boerdorp, who went the rounds all night long, and calling, Who is there? Stand, and that in a different tone, deceived the enemies centinels, that they had not the least suspicion of our retreat; for the deceived the deceived the senting senting to the suspicion of our retreats for the deceived the senting senting senting senting senting senting senting senting senting senting senting senting senting senting senting senting senting senting senting senting senting senting senting senting senting senting senting senting senting senting senting senting senting senting senting senting senting senting senting senting senting senting senting senting senting senting senting senting senting senting senting senting senting senting senting senting senting senting senting senting senting senting senting senting senting senting senting senting senting senting senting senting senting senting senting senting senting senting senting senting senting senting senting senting senting senting senting senting senting senting senting senting senting senting senting senting senting senting senting senting senting senting senting senting senting senting senting senting senting senting senting senting senting senting senting senting senting senting senting senting senting senting senting senting senting senting senting senting senting senting senting senting senting senting senting senting senting senting senting senting senting senting senting senting senting senting senting senting senting senting senting senting senting senting senting senting senting senting senting senting senting senting senting senting senting senting senting senting senting senting sen

Dutch foldiers faw the artillery and baggage going on board, they were not a little diffatisfied thereat; but being appealed by commodore Roothaus, who told them that it was done only to fecure them againft the enemy, who intended to make a general falley, they were afterwards glad to follow their officers directions in the retreat

It was almost noon before the Portuguese were convinced of our retreat, as suspecting the fame to be only a stratagem to draw them into an ambush; but when they faw us weigh our anchors, they expressed their joy with the discharge of their cannon round the walls. The Dutch general having left a fufficient garrison for the guard of the fort of New-Orange, another at Cranganor under the command of captain Verspreet, and constituted Peter du Pon, a brave foldier, commander in chief of all the forces in those parts, failed to Coulang; which place being likewise provided with all necessaries, he took his course towards Batavia, with an intention to give Cochin a second visit in the fpring; which he did accordingly with better fuccess.

CHAP. XIX.

The Isle of Formosa surprized by the Chinese. Cochin besieged a second Time by the Dutch, is forced to surrender; the chief Articles of the Capitulation, The City made more compact, and strengthened with regular Fortistications. The Roman Catholick Bishop of the Christians of St. Thomas comes to Cochin. His Original Bull of Indulgence.

BY this time we were fufficiently inform'd of the miserable state of our countrymen in the sife of Formosa; (which the Portuguese would often upbraid us with during the siege.) A compleat account whereof would be perhaps too tedious, and looked upon as beyond our purpose; therefore I will only for the satisfaction of the reader, insert a letter written by the reverend Mr. John Kruys, minister of the gospel there in the fort of Zealand, and afterwards at Negapatan on the coast of Coromandel, (where he died,) and directed to me and Mr. A. Breyl my fellow-minister in these parts.

"A FTER my arrival here the 6th of Othober with my family, I was fizized with fo violent a fever, as disabled me to write to you, yet did not hinder me to remember my hearty service to you by Mr. Roos, captain of our ship, and the factor Mr. Reuf. Whether the same was brought to you, or not, I am Vol. III.

ignorant as yet, having for some time after been so dangerously ill with my diftemper, that my recovery was almost despaired of; but am now by God's peculiar mercy fo far redovered, that I went first to church on Thursday last, and preached twice the Sunday following, and intend to visit the sick to morrow. and to administer the holy facrament on Sunday next. To give you a particular Miserable account of the late miserable state of the condition. ifle of Formofa, is both beyond the Formofa. compass of a letter, and my present strength; and though a tremble at the very thoughts of it, yet will I mention the chiefest transactions: The first affault of the furious Chinese was made against the castle of Sacam, whereabouts, after they had cut fome of our foldiers in pieces, they took my eldeft fon and my wife's brother, who, though very young, " had one of his arms cut off. The next "day our ship, called the Hestor, being

Baldaus. " engaged with a vast number of Chinese Joneks, was blown up, and in her some of our best foldiers, among whom was " also my father-in-law Thomas Pedel. The " fort of Sacam being, after a defence of " a few days, forced to furrender forwant of tresh water and other necessaries, the " ministers, officers, schoolmasters, soldiers, and in general all the inhabitants " of the flat country, were forced to make " the best terms they could for themselves. "The fquadron of ships commanded by " Mr. Kauw, (after it had for a smail " time rejoiced our drooping fpirits,) being difperfed by tempests, and the ship " the Urk forced upon the fands, and taken by the enemy, the fame was neither feen nor heard of in five or fix weeks " after. To be fhort, the whole country being over-run by the Chinese, our " foldiers every where routed, Koukerken " laid in ashes in fight of our fort; such " of our countrymen as had not fecured themselves by a timely slight, fell into "the hands of the mercilefs enemies, who facrificed the reverend Mr. Hambroek, with his fon, and divers others in Tilo-cen, to their fury; as also Mr. Peter " Mus minister of Favourlang, and Mr. Arnold Winsheim minister of Sinkan, who " had their heads cut off, and their wives, " with many others, carried into flavery. " By this there being great want of neces-" faries in the fortress, the foldiers died "daily of the bloody-flux, scurvy, and " diopfy; fo that in nine months time, ha-" ving loft above one thousand fix hundred men, both by famine and the fword, we "were forced (for the preservation of our lives) to capitulate. Who can without " tears remember the unexpected destruction " and ruin of fo many families, and of near "thirty ministers, partly in their lives, part"ly in their fortunes, (among whom I had my share, having lost all that I had gathered in fifteen years time,) the loss and dishonour of the company, with the unfpeakable miferies, among which I reckon mine none of the leaft, as the loss of three parts of my library? all which we ought to look upon as the effects of "God's just indignation, on account of our manifold fins. I have no more to add, than that it is none of the least among my other afflictions, that matters " are both fo ill represented, and worse taken at Batavia.

Subscribed,

Your affectionate collegue, to ferve you,

Joannes Kruyf.

But it is time to leave the miserable in Baldaus, the ifle of Formofa, and to come to the fecond fiege of Cochin. Anno 1662; in September, Jacob Hustart, late governor, of the Moluques and Amboyna, and afterwards refiding in the fame quality in Ceylon and Malabar, fet fail from Batavia with a good fquadron of ships, Ysbrand Goske commodore, for Cochin, leaving Nir. Ryklof Van Goens at Batavia, by reason of his sickness, but followed foon after. In November we The ferral began to batter the place most furiously, fire of being willing to reduce it before we could Cochia receive the news of a peace concluded betwixt us and the Portuguese, (which we expected every day,) and having the last year received certain instructions from the governours of our company to allow free commerce and liberty of religion to all fuch Portugueje as would fubmit to us, we pro- Probability posed to the besieged, That they should be ma left in full possession of their churches, (ex-the befored, cept one,) provided they would receive a Dutch garrison. This was not ill relished by fome; but Ignatio Sermento the governor refusing to comply with it, we resolved to lose no time to reduce the place by force.

Accordingly it was refolved in a council of war to affault it on the river fide at low tide; and to render the passage the less difficult, a great number of facks filled with Unforth fand were prepared to be thrown into the ful attempt river. But this attempt proved unfuccefs of the ful, our people meeting with fo hot a reception there, that they were glad to think of retreating. But as we had no time to lofe, fo we foon pitched upon another, which was carried on with better fuccess: for that brave commander Peter du Pon being ordered to affault the bastion on the bank of the river, he executed his commiffion fo fuccessfully, that (though not without great refiftance) he broke through the enemy, and maintained himself in some of the adjacent houses against the whole force of the enemy, till being feconded by fresh troops of his own, they put out the white eag, and fent their deputies to capitulate upon the following conditions.

THE Franciscans to enjoy the free exercise anidary of their religion under the protection of the states. The clergy to have free liberty to of Cochin carry away all their images, church-ornaments, relicks, &c. and what else belonged to them. The governor Ignatio Sermento and his family, together with all the officers, to be received civilly by the Dutch. The garrison to march out with enfigns displayed, drums beating, with bag and baggage; and to be conducted in Dutch vel-tels to Goa, except such of the soldiers as were in immediate pay of his majesty, who were to be transported to Portugal.

Baldens, Such of the inhabitants as were willing to fixy behind under the juridiction of the Dutch company, to have free liberty to remain in their full possessions. And that care should be taken of the sick and wounded.

All which was punctually performed, and the keys of the city delivered to our general, who foon after entered victorious on horfeback in great pomp, and ordered a folern thankigiving to be made in the great church lately belonging to the jefuits for the conquet of fo important a place; which was one accordingly.

Being thus become entirely masters of Cocbin, after it had been one hundred and fifty years in the possession of the Portuguese, the Dutch general made it his chiefest care to issue his orders not to molest the Portuguese, but to observe punctually the articles of the capitulation. The next was to demolish a certain part of the houses and churches of the city, in order to draw it into a more narrow compass, and to render the fortifications the more regular, the former requiring too great a number of men to defend them. The king of Cocbin being crowned, and divers of the neighbouring petty princes obliged to become his tributaries, several strict alliances were made with the neighbouring kings to the fouth of the tiver of Cocbin.

About the fame time foliable Santia Ma-Baldens, ria, of the order of the Discategated Carmelites, sent by the pope in quality as a bishop of Roman among the christians of St. Thomas, came the Christian in Europe) to Cochin to sa-tions here, lute our general, and was very kindly re-comes to ceived by his excellency. He had two forts Cochin.

of enemies to contend with during his flay in these parts: first of all, with the Portuguese, who could not brook that any other but their countrymen should be exalted to that dignity; and that not by the pope, but by their own king; the other was the Archidabo, (as the Portuguese still him,) or chief head of the christians of St. Thomas hereabouts, who being a negro, would neither submit himself nor his flock to the Romiss jurisdiction.

Concerning the christians of St. Thomas, we shall speak more at large anon. But to return to the bishop, brother Joseph de Sancta Maria, he was sent from Rome with a bull of indulgence, granted Jan. 16. 1660. in the sifth year of Alexander VII. pope of Rome, subscribed by the cardinal Barberini, Joseph Caetanus, &c. the true original whereof being in my custody, and containing many things tending to the elucidation of the affairs of the christians of St. Thomas, (of whom we are to treat immediately after.) we thought it not beyond our scope to oblige the reader with the translation thereof.

Franciscus, Bishop of Portua; Cardinal Barberini, Vice-Chancellor of the boly Roman Church, and Protedor of the honourable Fraternity of the Church of St. Jerome.

Josephus Cactanus, Keeper of both the Seals of his Holiness, Referendary and Prelate; Carolus Antonius à Putco, Knight; Franciscus Cinus, Sollicitor-General of the Court of Rome; Johannes Baptista Valentis, Abhot; Petrus Bassanus, Carolus de Comitibus, Pompejus Scrinus, Marianus Vecchiarellius, and Joh. Bapt. Ciosanus, Commissioners:

The bull of

"WISH to our dearly beloved brothers and fifters in Chrift, of the most reverend fraternity of the apost te of St. Thomas, of the church dedicated to that faint, without the walls of Cochin, founded by legal authority, eternal falvation in the iord.

" The more than ordinary inclination you have flewn to piety, charitable works, and other holy exercises, have " induced us, who, according to our duty, " are to take care of the falvation of the " faithful, and promoting of piety and re-" ligious exercises, to receive into and unite with our fociety your fraternity intended for the exercise of pious and chafitable works, and by these presents re-ceive you as such, and thereby make you partakers of all the indulgences, authority, and other spiritual gifts granted us by pope Paul V. of happy memory. And the reverend father, brother Johannes de Sansia Maria, frier of the order of the discalceated Garmelites, president of your fraternity, having in your name ear-neitly follicited for the faid reception, and a grant of the indulgences, we the abovementioned prelates and commissioners, relying upon the authority of pope Cle-ment VIII. of happy memory, and his grant of Nev. 7. 1604. and moved with a holy zeal and christian love for the promoting of the true religious worship, we do, by virtue of these letters, receive your fraternity, founded according to the apostolical and canonical institution, with the approbation of the most reverend

into our communion and fociety, purfuant to the apoltolical authority granted us for that purpole; and therefore impart to the taid fraternity, and to all its members, all the indulgences and other fipritual gifts, specified and granted to our fociety by the faid papal bull of Paul V. to give encouragement to your fraternity for the performance of all forts of pious works, and the obtaining of eternal falvation (by God's mercy) after this life.

[N. B. The bull of Paul V. being very long, fulfome, and not material, was not thought fit to be inferted.]

"And it being our full intention, that all the indulgences, and other fpirimal gifts granted us at large, as before faid, for flowly be enjoyed by your fraternity and its members, purfuant to the infittution of pope Clement VIII. of happy memory, we will and command, that these our letters shall have the same authority, (when produced,) as if they contained the original itself. For the confirmation wherefor, we have ordered this letter to be signed by the secretary of our society, and our seal, together with that of the protector thereof, to be affixed to it. Given in Rome, at the usual place of our affembly, in the year, after the nativity of our faviour Jesus Christ, 1660. of the XIIIth indiction, the 16th of January, in the fifth year of the reign of our holy father Alexander VII."

The Voyages, Miracles, and Death of St. Thomas the Apostle. The Doctrine of the Christians of St. Thomas; of the Greek, Syriac, and Georgian Christians; of the Russians, Nestorians, Jacobites, Coptes, Abyssines, Armenians, Maronites. A good Correspondence betwixt the Eastern and Western Churches very necessary.

Baldeus. T is the general opinion, that the apoftle St. Thomas did come into the Indies, arthonist but especially into these parts: his first be arrival coming was in the ifle of Socotora, (at the entrance of the Red Sea,) where he converted many to the christian faith; it being certain, that to this day many of the inhabitants stile themselves Christians of St. Thomas, which also induced Xaverius to touch at that island in his voyage to the Indies, and, if we may credit John de Lucena, His formal would fain have staid there. From Socotora mu. St. Thomas failed to Cranganor, whence, after he had converted many to the christian faith, he went to Coulang. Upon the rocks near the shea-shore of Coulang stands a stone *1/100this pillar, * erected there (as the inhabitants re-pun 1662. port) by St. Thomas. From Coulang croffing the high and dangerous mountains he travell'd into Coromandel, where having likewise planted the seed of the gospel, he sailed into China; where, after he had preached the gospel to the infidels, he returned to Maliapour to confirm some of the new converted christians in their faith, and

there fuffer'd martyrdom.

Vol III.

Maliapour (afterwards called St. Thomas by the Portuguese) was at that time a famous city in Coromandel, where this holy man would fain have built a church, but was prevented by the Brahmans, and their king Sagam. They relate a very miraculous thing of St. Thomas: The fea having cast up a tree of a vast bulk, the king, who was desirous to use it in the building of a house, had employed a great number of men and elephants to bring it from thence, but in vain, the wood being not to be moved from Our of St. the place : St. Thomas standing by, told the Thomas's king, That if he would prefent him with the piece of wood, he would carry it alone to the city, (then ten leagues from the fhore.) The king looking upon him as a mad-man, told him, He should do with it what he pleased. Whereupon St. Thomas tying his girdle to one of the branches, and making the fign of the crofs, drew the whole tree after him with a great deal of cafe, followed by a vast number of people; and coming to the city, erected a stone cross there, telling the spectators, That whenever the sea should rise up to that

place, God would fend certain strangers Baldens. from far diftant places to fettle the chriftian religion here; which the Portuguese would have to be verified at the time of their coming there.

St. Thomas having by this miracle, and the conversion of a vast number of pagans, arrived to a great authority among them, this fo incenfed the Brahmans, that one of them killed him with his launce upon a hill near the city, where he used to perform his devotion. They had before that accused Another mihim falfly of a murder; but St. Thomas ha-racle. ving refuscitated the child from death, he declared his own father to have been his murderer; which had fo powerful an influence upon many of the chief men of the country, and the king himfelf, that they received baptism. Some say that St. Thomas was killed at Calaminha, by mittaking this word for Calurmina, i.e. upon a stone; Calur fignifying in the Malabar language a stone, and mina upon, St. Thomas having been flain upon a rock: whence it is, that if to this day you ask one of the christians of St. Thomas, where St. Thomas fuffered martyrdom, they will tell you, Maliapour Calurmina, at Maliapour upon the stone, where he was stoned, and at last run through with His death.

They tell you of a certain cross made by his blood, and a vast number of miracles wrought by it, for which I will refer my felf to Lucena, Oforius, and Baronius. ** Tom. I. The christians of St. Thomas teach their 1557. children in their very infancy these following heads concerning St. Thomas. St. Thomas was the man who first abolished idolatry; it was he who converted the Chineje and Negroes; it was he that baptized them, and taught them the true faith, and to profess God the Father, the Son, and Holy Ghost. They also tell you, that he converted the three kings of the east, (one of whom, called Perumal, they fay was king of Ceylon,) and that St. Thomas's body was transferred from Maliapour to Edessa in

Mesopotamia. But fetting aside all these uncertain relations, the most secure way (founded upon no fmall probabilities) is, that St. Thomas was actually in these parts, and converted a

CHAP. XX.

Baldæus, great number of people to the christian faith: which contradicts that bold affertion of the Roman catholicks, that all nations have received the christian faith from Rome; it being beyond all question, that at the time of the arrival of the Portuguele in those parts under de Gama, the inhabitants declared themselves to be christians from most ancient times, desiring the protection of the king of Portugal against the pagans, and in token of their obedience prefented him with a filver fceptre gilt. Nay, Vain boofts the church of Rome cannot boaft of that of the honour, even of all parts of Europe itself; fince the kings of England and Scotland, Lucius and Donaldus, embraced the christian faith one hundred and twenty four years after our faviour's nativity, without having the leaft communication with the church of Rome; whence Tertullian rightly fays, Britannorum loca Romanis inaccessa Christo subdita funt. And Cyprianus fays to

the same purpose, two hundred and forty

years after the birth of Christ, That the

vine-branches of the gospel bave spread them-

felves beyond the extent of the Roman empire.

Thus Dorotheus, bishop of Tyrus, under the

reign of Constantine the Great, positively as-

ferts, That the chamberlain of queen Can-

dace did introduce the gospel into Ceylon

and the Happy Arabia. The christians of St. Thomas remained many years in the primitive purity of the christian religion, till in time, for want of The christi- good pastors, they began to be infected Thomas with some pagan superstitions, and were in deeny'd and most imminent danger of losing the remafterwards nants of the truths of the goipel, had not restored to Martome, a native of Syria, taken care of ther primitive parity, the decay'd flate of christianity in these parts; and being feconded in his endea-

vours by divers other teachers out of Syria, Babylonia, Chaldea, and Egypt, the Syriac language was introduced, and the former purity of religion restored among them, till in time the Nestorian herefy got footing in Syria, and was from thence transplanted hither, as is sufficiently evident from the records of the Malabars.

This Martome (fignifying in their language as much as lord Thomas) being much respected by the kings of Cranganor and Coulang, and by the christians of St. Thomas in general, was declared by them their Had their head : and the bishops of Cochin, Coulang,

own bishops and Cranganor, being afterwards fent for out of Syria, these introduced the Syriac language, and acknowledged the patriarch of Alexandria or Babylon for their metropolitan, till at last they submitted to the pope of Rome; for the supreme ecclesiattiledge the jurifdiction of the Portuguese) did, 1562, acknowledge the supremacy of the pope of Rome, provided they might continue in the former Baldar. free exercise of their religion, which was confirmed in the fynod of Goa, where they would not content to the least alteration of any of their church-ceremonies. But after the decease of this bishop, his succeffor, 1599. embraced, with the rest of his clergy, in another fynod, the Roman

The christians of St. Thomas inhabit for Where the the most part on the coast of Malabar, configured about Cranganor, Cocbin, Coulang, Tra inhabit. vancer, and some in Coromandel, amounting in all to a confiderable number. Before they were united with the church of Rome, they were infected with the Nestorian herefy, as fome are still to this day; whence it is that they deny the two natures in the person of Christ. This Nestorius was bishop of Constantinople, and Eutyches Archimandrit was abbot in the fame city. His doctrine was received at first in the council of Ephesus, by the interest of Chrysapius, (to please Eudoxia the empress,) lord-chamberlain to Theodofius the emperor; but Chry-Japius being flain at the infligation of Pulcheria, the fifter of the emperor, the same was afterwards condemned in another fynod of Epbesus, held in the year 431. two years after the death of St. Austin, wherein Cyril bishop of Alexandria presided, as the before-mentioned council of Epbefus, and the doctrine of Eutyches was condemned in the council of Chalcedon, 451.

For the reft, the ancient christians of St. Their le-Thomas did administer the holy sacrament from. in both kinds, using falt, bread, and the juice of raisins instead of wine. It was a very ancient custom among them, not to baptize their children till they were forty days old, except in case of imminent danger of life. They used no unction, neither any images, except that they had croffes in their churches. Their priefts were forbid to marry a fecond time. They were declared enemies of Cyril of Alexandria, a great antagonist of the Nestorians, but reverenced Nestorius and Dioscorus as faints. They did not acknowledge the fuperiority of the pope of Rome, and used the Syriac New Testament in their churches.

As divers religions have been broached Many felt of late years in Europe, fo there are many in the East. fects of ancient standing in the East. The chiefest of these are the Greeks, who ac-1. 18. 649. The third fect is that of the Georgians, 186 649. The third fect is that of the Georgians, 2 The Ge inhabiting the ancient Iberia between the Euxine and Cafpian feas. Some would have them to be called Georgians, because, as they say, they reverence St. George as their patron; but erroneously, the Georgians having been mentioned both by Pliny and Mela, long before St. George was known. They are of the same religion with the Greeks, and have eighteen bishops of their own, besides a metropolitan.

4.78eRuf. The fourth feet is the Ruffians, who likewife profess the Greek religion, denying with them the proceeding of the Holy Ghoit from Father and Son, the main point in question betwixt the eastern and western

churches. The Ne The fifth feet of the Nestorians follow Aorians, the heretical doctrine of Neftorius, and live for the most part among the Pagans and Mahometans in Babylon, Assyria, Mesopotamia, Parthia, Media, &c. Nay, Paulus Venetus affirms, that they are found from the north fide of Cataja to the most foutherly parts of the Indies; so that on the east side beyond the river Tigris scarce any other christian sect is to be met with: the reason whereof they alledge to be, that Cofroes king of Persia, a declared enemy of the emperor Heraclius, forced all his subjects to embrace this doctrine. The patriarchal feat of the Nestorians is at Muzal, a city of Mesopotamia upon the river Tigris, now subject to the Turks; notwithstanding which it has forty thousand christians, and fifteen churches. Some of the Nestorians did submit to the Roman jurisdiction under Pope Julius III. who was created pope 1550, and reigned five years. And the patriarch Abdiefu, who was invested with the episcopal dignity by pope Pius IV. was present at the council of Trent.

6. The Ja- The fixth is that of the Jacobites, having got their name from one Jacob, a native of Syria, and a follower of the doctrine of Eutyches 530. according to Nicephorus and Damascenus. They inhabit for the most part in Syria, Alepto, Cyprus, Mesopotamia, Babylon, and Palestina, whence the patriarch of Jerusalem is also a Jacobite; but the patriarch of the Jacobites resides at Caranut, an ancient noted city in Mesopotamia. They acknowledge but one nature in Christ, make the fign of the crofs with one finger only; they mark their young children with the fign of the cross by means of an hot iron; use both baptism and circumcision, and reject the purgatory, it being their opinion that the foul remains with the body

under-ground till the day of judgment; and *Baldous*, that the angels are composed of a fiery and lucid substance.

The feventh are the Coptes, or Egyptian 7. The chriftians, being rather the name of a na-Copies, tion, than belonging to any peculiar religion: they are the fame with the Jacobites, the word Copbti being the fame with Ægopbti; for notwithstanding the doctrine of Eutyches was condemned in the council of Chalcedon, and Dioforus patriarch of Alexandria depoted upon that score, the same took deep root in the eastern parts, and more especially in Egypt. These Egyptians (according to Tecla Maria, an Abyline priest) agree in point of doctrine with the Abylines, and acknowledge the jurisdiction of the patriarch of Alexandria, whose residence is now at Cairo.

dence is now at Cairo. The eighth feet is that of the Abysfines, 8. The Aor Mediterranean Ethiopians, being generally byffines. Jacobites, whence their king (called erroneously by some * Prester John) is stilled the *Prestegan
Prince of the Jacobites. They reject abso-matherists

well as Control of Charles and a still a so of a certain lutely the council of Chalcedon, and will al-Agatick low it no place in their writings. To their prince : patriarch they give the name of Albuna, i. e. form will have it a our father, who must be a native out of the Persian territories of Alexandria, and of St. Anthony's word. order; for it is observable, that all the patriarchs and bishops in the East, are either of the order of St. Bafil bishop of Cesaria and Cappadocia, or elfe of the order of St. Anthony. The patriarchs of Constantinople, Antiochia, and Armenia, are of the order of St. Basil: those of Alexandria and Ethiopia, as also those of the Jacobites and Maronites, of St. Anthony's order; but the patriarchs of the Nestorians are promiscuously of either of these two orders. The Abyssines have for their head the patriarch of Ethiopia: they are rebaptized once every year, on the 12th day, as indeed are most of the other eaftern christians. They follow the rules of the Old Testament in reference to clean and unclean things. It is observable that, contrary to the cuftom of all the other eaftern christians, (except the Armenians,) they use unleavened bread in the holy facrament: though fome affirm, that this is only done on Thursday in the holy week, and that at other times they use leavened bread. All perfons, both ecclefiaftical and civil, take and receive the facrament standing; and that always in the church, the king himfelf not being dispensed with in this point: the priest gives the bread, and the deacons the wine; and that day the facrament is received (which is generally once a week) they are forbidden to fpit. They baptize both with fire and water; befides which, they circumcife their children on the eighth day; and that both fexes, not according to the manner of the Jews,

Balden... but after the mahometan way; whence it feems as if it were rather a custom than a point of religion. And if we deduce their original from the antient Ethiopeans, Herodotus tells us, that they used to practise the fame in very antient times; if from the Arabians, the matter is fufficiently evident, the Arabians being descended from Ishmael, though they are generally ambitious to trace their origin rather from Sarab than Hagar. For the rest, they reject purgatory, and prayers for the dead; as also all traditions, looking upon the word of God as the only rule of faith; but, with the Jacobites, allow no more than one nature in Christ. Of the religion of the Abyssines, Damian a

o. The Ar-

have given a more ample account. The ninth fect is that of the Armenians, in great efteem among the Mahometans, by reason of their traffick and riches; though fome alledge another reason, viz. That an Armenian did fortel Mahomet's future greatness. In the year 1656, a certain Armenian merchant, named Goja Salomon, a very grave and fober perfon, travelled in our company to Macassar, where we were to treat about a peace with the king, and he to fetch fome money due to him from the Danish company, who gave us feveral needful inftructions concerning both the ecclefiaftical and political affairs of the Armenians. They antiently belonged to the jurisdiction of the patriarch of Constantinople, pursuant to a decree of the council of Chalcedon; but afterwards having withdrawn themfelves from the Greek church, fet up two patriarchs of their own, viz. one in the Greater, the other in the Leffer Armenia. We were told that they administer the sacrainent to the very infants; whereas the Russians don't allow it to children under seven years of age. They declare positively against the purgatory and transubstantia-tion. They rebaptize such as turn to their religion from the western churches: they don't allow any happiness to the souls of the deceased till after the day of judg-

Goes, Athanas. Kircher, Alvarius, and others,

The tenth fect is that of the Maronites, 10. Marohaving got their name, not from the famous heretick Maron, (as William Tyrius and Prateolus falfly imagine,) but from a certain holy man, in certain antient records, mention being made of the convent of St. Maron, the friers whereof were called Maronites: fome of them inhabit in Aleppo, Damascus, Tripolis, Syria, and Cyprus; but their chief feat is the mount Libanus, whose whole Libanus in compass being computed of seven hundred leagues, but in most places rocky and barren, is inhabited by about twelve thousand families of the Maronites, who pay to the

grand feignior feventeen crowns per annum

apiece for every head that is above twelve Baldeus, years old; and a crown a-year for each piece of ground of fixteen spans in the square. The mountain is of fuch a height, that it may be discovered at forty leagues distance. The patriarch of the Maronites has eight or nine fuffraganean bishops, he himself being always a frier of the order of St. Anthony, and refides fometimes near the mount Libanus, in a convent of St. Anthony, fometimes at Tripolis. The Maronites are at present under the jurisdiction of the see of Rome; See Will. and pope Gregory XIII. (the fame who Bel. Sacr.

caused the alteration of the new stile to be 1, xxii, c. 8. inferted in the almanack) erected a college of the Maronites at Rome. The Maronites agree with the *Greek* church in this opinion, I hat the Holy Ghost proceeds only from the Father, that every foul was created in the beginning. They look upon a female infant as unclean for eighty days after its birth, and the males for forty, which is the reason they don't baptize them before that time; and administer the sacrament to the children foon after they are baptiz'd. They don't carry the facrament in procession, and allow not of a fourth marriage; but don't ordain any priests or deacons without they are married before; and allow a parent the power of annulling the marriage of his fon or daughter, if the farne be done without his confent. Beatitude they do not believe till after the day of judgment. For the reft, they follow the opinion of the Monothelites, that there is but one nature in Christ. 'The Maronites had united themselves sour hundred years ago with the fee of Rome; but when Saladyn, king of Egypt and Syria, did conquer those parts, the Maronites relinquished the Roman communion, till they were reunited to

we have spoken before. Among all these eastern sects, there are sew who teach any points contrary to falvation, except those of Nestorius and Eutyches; for they execrate the adoration of images, reject purgatory, allow marriage to the clergy, administer the facrament to the laity in both kinds, deny transubstantiation, and do not acknowledge the jurifdiction of the

onius tells us in-before Esth of Alexandria, communic Communic VIII. cast the in Pope.

Baldaus, in order to subject himself and all Egygt to the papal chair; but the same proved abortive, and proved no more than a complement in the end. See Thomas a Jefuit, l. vii. 6. Whence it is evident, that setting aside the doctrine of the Holy Ghost proceeding from the father only, they are subject to not near so many errors as the Roman catholicks.

The eaftern christians exercise their religious worship in different languages. Some are of opinion that all the primitive chriftians, for one hundred and twenty years after Christ's nativity, viz. till the reign of Hadrianus the emperor, used only one language, viz. the Hebrew, but without any certainty. Certain it is, that the Armenians have a translation of the bible into their own language; which by fome is attributed to Chryfostom while in exile. Alvares affirms, that the Abyfines have translated the bible in their own language, and fo have the Ruffians, or Muscovites, contrary to what is practifed by the Romans; for pope Pina V. put the bible among the prohibited books. And Erasmus, in his letter to Charles Utenhofer, tells him, that Lewis Berquin was, 1529, burnt at Paris, for no other reason, but his having afferted, That the bible might be translated into the vulgar tongue, and read by the common people; notwithstanding St. Ferom and Chrysostom had employ'd themselves in the work.

The other eaftern christians perform their religious fervice in the Greek, Latin, and Cheldean languages; and use divers liturgies, as those composed by Petrus, Jacobus, Sixtus, &c. Whence it is evident that it would be no very difficult task to fettle a good mutual correspondence betwixt them and the protestant churches of Europe, which mibikeeas-has been too much neglected hitherto, though we have had feveral opportunities given us by the e .ftern christians to embrace to useful a design. Thus (as Camerarius tells us) the Greeks of Constantinople did encourage the Bohemians and Hustites against the Roman Catholicks. Joseph, patriarch of Constantinople, sent one Demetrius a deacon, to Wittemburgh, to confer with the divines there concerning an union, who carried a Greek copy of the Augustan confession back with him to Constantinople. At the f-nod of Thorn in Poland, 1595. certain deputies fent by the Greek christians appeared to exhort to a unity, and endeavour a reconciliation betwixt the Calvinists and Lutherans. And in the year 1616. Cyril, patriarch of Alexandria, fent one of his priests to George Abbot, the famous archbishop of Canterbury, in order to have him instructed in the university of Oxford in the true principles of the protestant churches. Neither ought we to pass by in silence the confession of Cyril,

patriarch of Constantinople, of his adhering Baldensto the doctrine of Calvin, which drew upon him the hatred of the jesuits, who could not rest satisfied till they had underhand procured his death, 1638.

His Letter writ upon that Subject to a certain Friend of his, and preferved by the learned Andrew Rivet, is as follows:

PERCIO ho voluto feriver a V. R. e protestarvi che mi siate testimonio fe jo more, que jo more Catholico Orthodoxo, nella fede del N. S. Jefu Christo nella dottrina Evangelica conforme la Confessione Belgica la confessione " mia e le altra delle chiefe Evangelice che " foni tutti conformi. Abhorrifco li errori delli Papisti, e le superstitione delli Greci, provo e abraccio la dottrina del " dottore meritiflimo Giovanni Calvino e de tutti che fentono con lui, in questo voglio che mi fiate testi nonio, per che con fincera conscienza così tengo, così professo " e confesso como anco la mia confessione mostra, e recommando a vos questo depolito, cafo che morfli, di farne partecipi Tutti li fratelli Christiani Ortho-"doxi: e mi recommando alle preghiere di V. R."

Alli 15-25. Marzo.

Cyrillo Patriarcha di Constantinopoli.

Which translated into English runs thus:

"Herefore I was willing to declare to Letter of you, and defire you to be my wit-the patriness, that in case I die an Orthodox Ca-arch of Constantitholick, and in the purity of the faith nople, taught by Jesus Christ, agreeable to the Confission of faith of the church of the United Provinces, mine being altogether the fame with theirs, and with the other evangelical churches. I abhor the errors of the Roman church, and the superstitions of the Greek, but approve and embrace the doctrine of the most worthy John Calvin, and of all those that have the fame fentiments with him. I call you " to witness, that I believe, confess, and attest the same by these presents, recommending this my confession to your care, in order to communicate the fame (in case of my death) to all truly-be-" lieving brethren, and myfelf to your prayers.

March 15-25.

Cyril, Patriarch of Constantinople.

Baldaus. As the preceding letter is a convincing proof of the stedsastness of Cyril, in his adhering to the doctrine of Calvin, fo out of what hath been faid before, it is evident that most of the eastern christians have an aversion to the Roman religion. And I remember that Benjamin the Jew, in his travels, makes the same observation, in particular, in respect of the patriarch of Constantinople. In the year 1664, being at Cochin, I addressed myself to Mr. Jacob Hustart, our general, to grant leave to the archdeacon, or chief of the christians of St. Thomas in ecclefiaftical affairs, to come thither, in order to have a free conference with him: which being readily granted, he fent his letter to the archdeacon for that purpole;

but he excused himself, alledging, (and not Balder without reason,) That we having given so extraordinary a reception to the Roman bishop, Joseph de Sansta Maria, he could not appear in perfon among us, without his pre-judice, to my great diffatisfaction, being extremely forry it was not in my power to perform my promise made in my letters to the states-general 1662. And upon this occasion I cannot, without praife, mention the generous zeal of the states-general, who at their own charge did order to have the New Testament and our Catechism translated in the tongue used among the modern Greek christians, the same being very different from the antient G - ek language.

CHAP. XXI.

A Description of the Kingdom of Percatti, and Calecoulang. Coulang twice taken by the Hollanders. The Nature and Manner of living of the Nairos. The Paruas made Christians. Extraordinary Zeal of Don John King of Portugal.

The kingdom of Porca.

HE kingdom of Percatti (called by fome Porca) begins about four or five leagues to the fouth of Cochin, and extends to Coulang, its whole length being about twelve leagues.

The Dutch

In the year 1642, the Dutch appeared the first time in this place, and treated with the then king of Siam, Baatchery Vaubaar, (who was not above twenty three years of age,) concerning a free trade with pepper. Which the king was very glad to accept of, being three years past engaged in a war with the Portuguese, who had seized upon part of his dominions, and would have erected fome fortifications there. He delivered to our deputies a fealed letter, directed to the general and great council of the Indies, in which he requested, that we would at least once a year fend thither a ship freighted with such commodites, as before that time used to be carried to Cananor and Calecut: whereupon an interpreter was fent aboard the next day, to defire a paffport from his majefty for fuch of our thips as passed that way, which was gran-

The king who reigned here 1664. of whom Mr. Jacob Hustart and I had audience at that time, was about twenty four years old, a very active and well-limbed person, his hands, feet, and ears adorn'd with jewels of a great value. Formerly they used to transport their pepper from hence to Mocha; Factory of but fince that time the English have traffickthe English, ed there in that commodity, who had their factory just upon the fea-shore. The greatest strength of this king consists in about five hundred fmall galleys, wherewith in the rainy feafon, when the rice-fields lie under water, he used to make his excurfions from the utmost point of the cape of Comoryn as far as Panane, and especially to annoy the king of Cochin. He proved a troublesome neighbour to the Dutch company, till by the terror of their arms they brought him to fubmission, having in the fiege of Cochin fided with the Portugueje against us.

Deeper into the country live abundance of christians converted by the Portuguele: they get their livelihood by managing and gathering the pepper; which they are obliged to fell to the king's factor, a Brab-

The air of this country being accounted The sires extremely unwholesome, hence it is, that who is min most of the inhabitants are troubled with fwelled legs; the cause whereof they attribute to the nitrous water, which they use for their common drink: blindness is also an ordinary diftemper here. For the reft, the ground is exceeding fertile, and very fit for tillage; so that most of the inhabitants live upon husbandry, especially of rice.

The next adjoining kingdom is that of Calecou Calecoulang, of no great extent: here the long.

Dutch company has had their factory many years ago, which used to buy up a great quantity of pepper in these parts.

The Nairos, pafe land

Raldons, fixteen leagues in length. The city of Conlang was first built by the Portuguese, being much of the fame bigness as Puntegale in the ifle of Ceylon, having no less than feven churches, fome very good houses, and many thousands of trees, especially towards the fea-fide. This city is reckoned one of very while-the wholeformest on the whole coast of Malabar, by reason of its pure air, and most excellent springs. The Portuguese at their first coming erected only a strong house, to defend themselves in case of necessity against the inhabitants; notwithstanding which, they were at a certain time furprized by them, and all cut to pieces; which barbarity was aftewards revenged by Laurence Almeyda, fon to Francis Almeyda, who burnt twenty of their ships richly loaden.

In the year 1503, one brother Rhoteric, a Dominican trier, coming into these parts to propagate the gospel, did convert many of the pagans, and encouraged the chriflians of St. Thomas inhabiting here to per-

fevere in their faith.

treache.

The inhabitants are generally very bar-The inhabarous and treacherous, of which they have given feveral times fufficient proofs to the Dutch. At a certain time they affaulted the city by night, and had almost carried it by furprize; and at another time captain Henry Gluwing taking the fresh air with fome officers without the gate, were treacheroufly murdered by them.

In the time of the Portuguese there stood a certain Pagode about four leagues without the city, famous for its riches throughout the Indies, which induced Sofa to plunder it. unite pandered notwithstanding there was then a peace beregure in revenged the loss by killing about thirty of the Portuguese; and Sosa having tent a large vessel full of fanams (their coin) to John king of Portugal, the fame was by the advice of the pope fent back to the king of Coulang, by whom it was placed again in the faid Pagode.

Tis Dutch In the year 1661, when the Hollanders came to these parts to beliege the city of Coulang a Coulang, they were forced to have three banng left imart engagements with the Nairos, who, ubifo.e. to the number of feven or eight thousand men, armed with fcymctars and muskets, and being intoxicated with opium, fell upon them like desperate men; in which action Mr. Dublet, our under-factor, loft his life.

And upon this occasion we ought not to The Naires, pass by the Naires. These are the gentlemen of Malabar, descended for the most part either from royal families, or Brahmans, and are for that reason exceedingly haughty, proud, and bold: if they meet any of the common people in the streets, they cry out, Po, Po, i. e. Give way, Give way. They feldom appear without their fcymetars and

fhields, which they leave at the door when Baldaus (by a peculiar privilege) they go to give a private vifit to one of their neighbours wives, as a fign that no body must enter there in the mean while to diffurb them. They are all bred to the war, even from the feventh year of age, when they begin to anoing their limbs with certain ointments. to render the nerves pliable, which makes them very active and nimble, and the best wrestlers in the world. They are not only well acquainted with the use of bows and arrows, but also with muskets and great cannon; for I have feem them give a falvo with the same order and dexterity as our best-disciplined troops in Europe; and they are of late years arrived to that perfection, that they make their own gun-barrels, gunpowder, and matches. They commonly engage naked, having only a piece of stuff wrapp'dabout the middle: being very nimble they often turn their backs, but foon return to the charge, when they find the leaft opportunity of having an advantage against their enemies. On the hilts of their twords they wear certain pieces of metal, which making a noise as they nove, serves them for a certain mulick: they are very dextrous in defending their bodies with their fhields; and confequently are better at handy blows than at firing, for they commonly fire too high. Among the Nairos, those who call themselves Amok are the The Amok. worst, being a company of desperadoes, who engage themselves and their families by oaths, to revenge fuch injuries as are done them. They are often feen at Batavia. The power of the kings of Malabar is generally esteemed by the number of the Nairos under their jurifdiction. If any of their kings should be murdered, they would facrifice all to revenge his death. As they are naturally fierce, and addicted to all manner of luft and pride, fo they are declared enemies of the christians.

Scarce were the Dutch mafters of Coulang, but their fleet, confifting of twenty three ships, great and small, were surprized by so The Dutch violent a tempest, (which lasted three days,) fleet in that they thought to have been all loft, as great danlying at anchor under a low shore, and loss, therefore exposed to the utmost fury of the winds. The ships names were, the Ulieland, Sea-borfe, Haddock, Bantam, Flushing, Marygold-flower, Cat, Tertolen, Red-Lion, Erafmus, Sluyce, Achilles, the Romer, Flower-Valley, Walnut-tree, the House of Switten, the Elburgh, Stadthouse of Amsterdam, and the Exchange of Amsterdam; the four laft being lately come from Holland freighted with provisions, such as meal, bacon, cheese, wine, oil, and mum, befides a good number of land-men, many whereof were ill of the bloody flux. During this florm we fent

13

Baldaus, our fervent and constant prayers up to heaven for the delivery of our fleet, on which depended all our fafety; for the Stadtboufe of Amsterdam was in fuch distress, that she gave one fignal after another for relief, having above fix foot water; the Erasmus had loft all her anchors, but by good fortune got clear of the fands; the Sea-borf: had taken fire, but was foon extinguished; fo that we came off with the lots of three floops only. The fury of the tempest beginning to allay on the third day, just at the very time when we were coming from prayers out of the church, and by midnight the fame being quite ceased, a folemn thanksgiving was ordered to be kept the 23d of November, 1661. when I preached upon the The fleet text of Pfal. lxvi. 12. By this time it being fails for Cochin. judged fit for our fleet to depart, a convenient garrifon was left in the place under captain Kocks and Mr. Nybof, for the defence of the fortifications of the city, which were

lately made of earth.

The kingdom of Trevancor borders upon Trevancor, that of Coulang : all along the fee-shore inhabit the Paruas, who being for the most part christians, you see the shore all along as far as Comoryn, and even beyond it to Tutecoryn, full of little churches, some of wood, others of stone. These people owe their conversion to Franciscus Xaverius, he being the first who planted the principles of christianity among them; they being fo much taken with the reasonableneis of the ten commandments, that they received baptifm in great numbers, though an accidental quarrel betwixt a Paruas and a Mahametan proved a strong motive to their conversion: whence it is that John de Lucena fays, As the differences arisen betwixt the Jews and the Egyptians, proved the means of the delivery of the people of God, and of the recovery of their spiritual and temporal liberty; so by God's direction, a quarrel which happened betwixt a Paruas and a Ma-

> their spiritual and temporal flavery. The Paruas being forely oppressed by the Mahometans, one John de Grus, a na-tive of Malahar, but who had been in Portugal, and honourably treated by John the then king of Portugal, advised them to seek for aid at Cochin against the Moors, and to receive baptifm. Accordingly fome of the chief men among them (called Patangatys in their language) were fent upon that errand to Cochin; where being kindly receiv'd, they (in honour of him who had given this advice) took upon them the firname of Crus; a name still retained by most persons of note among the Paruas. In thort, being delivered from the Moorifb yoke, and the pearl-fishery (which formerly belonged to them) restored to the right

hometan, proved the delivery of the first from

owners, above twenty thousand of them re-Balden, ceived baptism.

But though they were baptized, most of them being descient in the knowledge of the true fundamentals of the christian religion for want of teachers, they had in a little time scarce any marks of christianity left among them, except the ecremony of baptism; as Maifeus, John de Lucena, and Michael Vas in his speech to Franciscus Xaverius sufficiently testify. For the Portuguese being too eager in baptizing these people, provided they could say by heart the Creed, Our Father, and Avenary, and being unprovided with teachers to instruct them, they soon returned to paganism; so that upon this score the Romisso priests need not talk so big as they often do.

talk fo big as they often do.

John the then king of Portugal being Careofthis fentible of this defect, did all that in him bing of lay to remedy this evil, by fending divers Portugal young feholars to the univerfities of Sala-for the manea, Paris, and Conimbria, to be educated and fitted for the missions into the Indies. About the same time Ignatius Loyola, the founder of the jesuits order, began to

dies. About the fame time Ignatus Loyola, the founder of the jefuits order, began to be famous at Rome, for having with his fociety made a vow to preach the gospel throughout the world: whereupon the king of Portugal ordered Peter Mascarenbas, his ambassador there, to confer upon that head with Ignatius, and to desire fix Millionaries for the East Indies; two being only granted, Simon Roterigius, a Portuguese, (who had studied at Paris at the king's charge,) and Franciscus Aspileota Navarrus, stirnamed Xiverius, were selected for that purpose: but the first being seized by a quartan ague, and forced to stay at Lisbon, Xaverius (after ha. Saveius ving received pope Paul's benediction) set Indies.

He was no fooner come thither, but having underflood the deplorable state of the Paruas from the mouth of Michael Vas, he did not rest satisfied till he might deliver them out of their darkness: for this purpose having had several conferences with John Albuquerque bishop of Goa, and Marin Albuquerque bishop of Goa, and Marin Alphonso de Sousa the viceroy, he obtained leave to go among them; for though he appeared there in the quality of the apostolical nuncio, yet would he pay his due respects to the civil government.

He left Goa in the beginning of Novem-Cameraber, 1542, in company of Franciscus du Man-magitacias, and two young interpreters educated Parus. in the college of St. Paul; and coming among the Paruss, applied all his care in having the chief fundamentals of the christian religion translated into the Malabar language, or in instructing the schoolmasters in the right way of educating their youth. Reldeus. christian religion in the Indies, will best appear out of his letter written 1546, to Don John de Castro, his viceroy of the Indies, as follows:

CHAP. XXI.

To John de Castro, Viceroy of India, all

loth king "YOU knowing what an abominable portuthing idolatry is in our eyes, the " the fame shall for the future not be tole-" rated in my dominions. Being informed " that in the country about Goa the pagan " temples are fuffered and frequented both in publick and private, as well as divers " forts of pagan divertions, we command you once for all to have the same demo-" lished, burnt, and rooted out; and that all imaginable care be taken to prevent " the importation of idols, either of wood, " metal, earth, or any other matter. The " heathenish sports shall be abolished, and " the Brabmans not in the least encouraged, " and fuch as contravene this our mandate " shall be severely punished. And confidering that the pagans may be brought over to our religion, not only by the hopes of eternal falvation, but also by temporal interest and preferments, you shall for the future not bestow any offices, " or any other places in the custom-house, (as has been practifed hitherto,) upon the heathers, but only upon the christians. We understand also, that you commonly press the Indians for our fea-fervice; in which case we would have you shew as much favour as you can to the christians; and " if necessity will not allow you to ex-" cuse them from that service, to encou-" rage them with good pay and rewards: " In which point you shall consult with Michael Vas, a person well known to us for his piety and zeal in propagating the christian religion. Being further " informed, that oftentimes negro flaves, " that might be instructed in the principles of our religion, are for filthy lucres fake fold to the Mahometans, the fame shall be strictly prohibited, and care taken against all manner of usury. In the city of Bazain you shall build a church, and dedicate it to St. Joseph, and pro-" vide for the fublishence of the vicar and " his affiftants; to accomplish which you may employ fomething out of our revenues, and the three thousand pardaus formerly employed to the maintenance of " the Mahometan mosque and their service, " fhall for the future be allotted for the " subsistence of the priests, and such other perfons as give a helping hand towards " the conversion of the infinels. Among the new converts, or all fuch as have

" hitherto, or for the future may be brought Baldeus. over to the christian religion, by the care of Michael Vas, you shall distribute 66 yearly nine hundred quarters of rice out of our revenue: it being our will, " that all the agreements made with the " christians of St. Thomas, concerning the weight, measures, and price of their commodities, shall be inviolably obferved. And understanding neverthe-" less that the contrary is practifed in and about Cochin, in the pepper-trade, we command you to affift these christians, and to take effectual care they may not be damnified, but treated with all mildness, as becomes christians. You thall " also follicite the king of Cochin, not to permit any forcery, or fuch like things to be transacted, by the sale of pepper; and being informed that the faid king bereaves fuch of his fubjects as embrace christianity of all their means, you shall earneftly intercede with him on their behalf; and we will also write to him for that purpose. We could wish hear tily, that the business of Socotora (which you have recommended to our care in your letter) might be fettled fo as to deliver those miserable people out of their flavery, provided the fame could be done without exasperating the Grand " Seignior, under whose jurisdiction they live. You may upon this head confult with Michael Vas, and act in the matter according to your difcretion. It being alfo come to our ears, that the Paruas .. e sometimes but very indifferently used by our officers, who force them to fell " their pearls (got by fishing or diving) at what rate they please to take them; this you shall not allow of, but permit them to dispose of their commodities at the best price they can get. You shall make an exact enquiry, whether the inhabitants of the fea-shore might not be protected, and our revenues fecured without a fleet; fo that the ships employed in that fervice might be made use of upon other occasions. You shall consult and debate with Franciscus Xaverius, whether it were not practicable, for the better increase of the christians, that the pearl-fishery might not be permitted only to the christians, with exclusion of the Mahometans and Pagans. And as Extraormany among the Paruas, who have dinary care embraced christianity, meet with very of the Paill treatment from their Pagan friends and relations, and are despoiled of all, these you shall affift out of our revenues, according as Michael Vas shall judge it conve-

"We have further understood that a " certain royal youth has escaped from his

Raldeus, " father or uncle to Goa, in order to be baptifed: as his conversion is of great moment, so you shall be very careful of his person, and of his instruction and education in the college of St. Paul, and provide for his entertainment in cloaths, attendance, and other matters, fuitable to his quality: he having notify'd to us in his letter, that he is the legal heir of the crown of Ceylon, you shall make due enquiry after that matter, and write to us your fentiment thereof. The furious attempts of the tyrant of Ceylon against fuch of his fubjects as embrace christianity, oblige us to command you to take a flow and fecure, but a fevere revenge of " him, to let the world fee, that we are ready to give all imaginable protection to those poor creatures, who have re-nounced their pagan and diabolical idolatries. It being a general rumour here, that the images of our faviour and the virgin Mary are made and fold by the pagans, a thing unfeemly, and unbecoming the christian name, the same ought not to be allowed of. The cathedral churches of Cochin and Coulang, which have been building for a confiderable time, being (as we hear) going to decay, we command

to be finished, and covered with a good Baldau, roof, to keep out the rains. It is also our pleasure that a church dedicated to St. Thomas shall be built in the street of Noroa, and that the church of St. Cruz, lately begun to be built at Calapor, shall be brought to perfection. In the ifle of Cioran you shall order a church and fome meeting-houses to be built, for the conveniency of the new converts to be catechiz'd in, and to be instructed in the word of God. We could also wish with all our heart, that idolatry might be banished out of Salsete and Bardes; but in this matter you must proceed with caution, for fear of exasperating the minds of the people; which end may be most conveniently obtained, by shewing them with all imaginable mildness their gross errors, and how, instead of the true God, they pay their devotion to infenfible images and idols. For the fame reason you shall not neglect to confer with their principal men upon this head, and to encourage such as embrace christianity by your favour, prefents, and otherwise. It is our will that a peculiar regard shall be had to this our letter, and the con-" tents thereof punctually observed."

CHAP. XXII.

A Description of Tutecoryn, and the Pearl-Fishery: That City taken by the Hollanders. The Isle of Rammanakovel. Adam's Bridge; the Shape of his Foot imprinted in a Stone. Tindi. The taking of Megapatan, which is befieged by the Naike; reduced to great Extremity by Famine: Once more attacked, and maintained.

HE Paruas ever fince this union with the Romish church, are such zealots on the Romish church, are such zealots in the Rothe Romish church, are such zealots mith super- hopes of ever bringing them over to our fide; their ignorance in religious concerns being fuch, that besides the use of their beads, and making the fign of the crofs, they know nothing of the true fundamentals of the christian religion they pretend to profess. In the year 1661. I was ordered to take a journey from Tutecoryn to Coulang, to visit the churches along the fea-shore, and endeavour to introduce a reformation there; but my endeavours proved ineffectual by reason of the great number of popish priests yet remaining in that country; and suppofing a reformation could have been introduced, there were no ministers to maintain it in so large a tract of land, where the Paruas were for the most part great favourers of the Portuguese, and blind azelots in their religion, of which I had

fufficient proofs before at Tutecoryn. For the Dutch being become mafters of that place, 1658. I was foon after employ'd in the business of reformation, but without success; for when I preached in Portuguese, scarce any one of the Paruas durst enter into the church, but remained in the porch for fear of the Romish priests living among them; for though these priests did not then live in the city, nevertheless the inhabitants would carry their children a great way into the country, to be baptiz'd by the

pearls quit co jacent their i tents n until t Raldens other ornaments by us, they must look upon us as enemies to their religion. I replied, That we were no enemies of images, but only of the worshipping of them, as appeared by feveral histories of the baptism of our faviour, the conversion of St. Paul and others, remaining in the churches. To be fhort, I found that the whole knowledge of the Paruas (both young and old) confifted in being able to fay by heart the Creed, Our Father, the Ten Commandments, and the Ave

After my departure the reverend Mr. John shimre Fereira Almeyda, a native of Lisbon, was rang the for a whole year employ'd in the reformation of the Paruas, but with less success than myfelf, they having conceived an Odium against him, as one who had quitted that religion, and whose effigies upon that score was burnt at Goa.

Totecoryn In the year 1658. in January, we fet fail taken by the from Negumbo, and in the beginning of February landed near Tutecoryn, after some relistance from the natives, who fet the city and their fmall galleys on fire, and fo retired deeper into the country. Tutecoryn is properly no more than a large village, without walls, ditches, or gates; it has three spacious churches, and abundance of goodly houses built of stone, which afford a good prospect at sea. Hereabouts they make the best lime in India. The Dutch company has been feveral times endeavouring to erect fome fortifications here; but the Naike, or lord of the country, not willing to confent to it, they have hitherto been contented with a factory in one of the three churches; where always refides a factor and under-factor, with three affiftants,

and fix or eight foldiers. The Pearl. Near this place is the famous pearl-fishery, whereof there are no more than three in the east, viz. one near Ormus, the second in the bay of Ainam, on the Chinese coast, and the third in the bay betwixt cape Comoryn and the isle of Ceylon, wherein are also comprehended Manaar and Aripou. The pearls are found in certain oifter shells, (which are not good to eat,) and are taken by diving lev in, eight, nine, or ten fathom deep, fometimes not without great danger. The pearl-fishery is not allowed every year, lometimes the oister-banks being covered with fand, and fometimes the oisters not being come to their full maturity. To make a trial of the laft, they take out a few, and by the quantity and quality of the pearls taken in them, judge whether it will quit cost to fish, or not. If the fishing be resolved upon, the inhabitants of the circumjacent parts come in great numbers with their families and boats, and pitch their tents near the fea-fide, where they remain until the fishery is over. The Dutch com-

pany has a certain share in what is taken Baldæus, for their protection, the rest being fold publickly in the markets of Tutecoryn and Calipatnam. The Paruas also dive some- The Paruas times for certain hours for a kind of fea-though christians, fnails, called Chancos, whereof they make never diverings, that bear a good price at Bengale. Sefore they

The pearls of Tutecoryn and Manaar are bave made neither in colour nor brightness comparable jurations to to those taken near Ormus on the Persian prevent coaft. The pearls are questionless nourish-their being ed both by the fea and river water, as being fharks. often found at the time of low tides in the rivers. Abundance of pearl dust is from hence transported into Europe, where it is used in the cordial medicines. The large pearls are valued according to their bigness, shape, and whiteness. Much cloth is made at Tutecoryn, the weaving-trade being very confiderable here, which, together with the plenty of eatables, rice, fugar, &c. makes this place to be much regarded by the com-

This tract of land is subject to most fu-The climase rious winds in October, November, and De- of Tutecocember; and in the winter feafons to heavy rains. It is very fandy near the fea-shore, and has nothing but falt-water, which produces fcabs, and other cutaneous diftempers, as I can teftify by my own experience. During the months of January, February, and March, the nights are extremely cold, by reason of the thick fogs, which fall constantly at that time, the days being at the fame time so excessive hot, that there is no touching of the ground without their shoes, called Seripous by the inhabitants.

And upon this occasion I cannot pass by

without making this observation, That notwithstanding the nearness of Tutecoryn and Comoryn, they at the fame time have very different feasons : for in April, May, June, Different July, August, and September, those inha-the north biting on the fouth-fide of the faid cape, and fouth enjoy all the bleffings of the fummer feafon, fide of the whilst those living on the north-side are at mountains. the fame time subject to all the inconveniences of the winter; this fide being then constantly peftered with tempeftuous winds, whilft on the other fide the air is ferene and calm; the difference of which must needs be looked for among the mountains, the receptacles of winds, rains, and fnow, the fame being obferved in other parts of the Indies, as well as in Africa. For it Africa were not mountainous, it would be altogether barren and uninhabitable, no more than the countries under the Torrid Zone, which if they were destitute of mountains, would also want rivers, (the fources of them being all in the mountains,) nor hard rains. Thus it is observable, that about Columbo, Gale, and Mature, abundance of rains fall at different times, because that part of the isle of

Baldaus, Ceylon is mountainous; whereas near Maunaar, Jasnapatnam, and the other places, where there is a flat country, it rains only in Ostober, November, and a little in December, all the rest of the year being without the least rains; the defect whereof is however fupply'd in fome meafure by the fogs or dew; the fouth winds which blow then from the cape of Comoryn, prevent the rains on that fide. The inhabitants of Peru are very fenfible of this difference; for whilft the inhabitants of the mountains are often rejoiced with fudden showers of rain, those of the flat country, and effectally near the fea-fide, neve feel an min, but only a thick fog or d

fion the dif ference of

The mounty Whence it was the fact according as tamsecca- the mountains to do to the winds and rains on one fide to the other, they produce the difference of feafons in ' fe parts; this is very perfpicuous on the cape of South Point of Africa, where fuch violent gushes of wind are fometimes fent forth out of the concavities of the mountains, that they are able to overturn all that meets in their way. I remember that travelling once that way, I had enough to do to keep myfelf and my horse upright; and at another time a coach belonging to the Dutch company there, was overturned by fuch a gush of wind, They take it for an infallible fign of an approaching tempest on the care of Good Hope, when they fee thick cloud appear on the top of Tablemaintainand. The fame is obferved in most other mountains under the Torrid Zone; for the inhabitants near the Equinostial Line have their due rainy seaions twice a-year, viz. in fpring and autumn, occasioned by the gathering of the clouds in the mountains, the pinacles of which reaching very high, ftop the courfe of the air, (which in those parts moves constantly from east to west,) which thereby being condenfed into clouds, these produce of necessity either sudden winds or rains on one fide, and bleffes the other fide at the fame time with a ferene air and happy climate, the tops of these mountains being in these parts like a partition-wall to summer and winter: for the further elucidation whereof, I will refer myfelf to the most ingenious lord Bacon, and des Cartes.

From Tutecoryn towards the ifle of Rammanakoyel are to be feen divers churches of the Paruas, as at Baipaar, Manapaar, &c. where Xaverius planted the christian doc-The ifle of Rammanakoyel abounds in cattle, having got its name from Bramma or Ramma, and the Malabar word Koyel, i. e. The Temple of Ramma; for near the fea-fide is to be feen the pagode of the Teuver, or lord of the ine, which they fay contains an incredible treafure. The foundation is ftrengthened and fupported with flones of a vaft bigness to-Ball wards the fea-fide, to break the force of the raging waves, when the fouth winds The ifle is however but indifferently fertile, being in fome parts very fandy, which is very troublesome to the eyes when the winds blow very hard. The lord of the ifle has built a ftrong caftle opposite to the coast of Coromandel, and the country under the jurifdiction of the Naike. In the year 1662. I and lieutenant Herman Egbert/z travelling that way, were feized upon by the inhabitants, and committed priforers, being forced to live without victuals or drink for a confiderable time, till a certain inhabitant of Manaar coming that way, and knowing me, releafed us out of our captivity. The cannon of the caftle commands a certain strait passage, which leading to Ma-Strait ta: naar, Jafnafatnam, and Negapatnam, the face was fame may be stopped at pleasure by the the the ife lord of the ifle, by finking only a few flones in the channel, whereby the navigation that

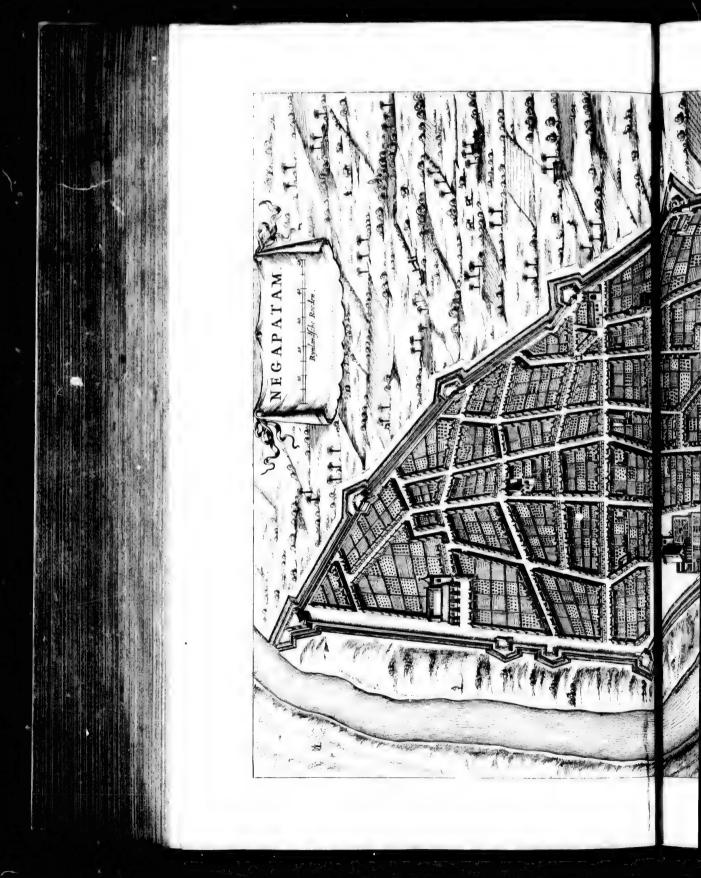

way is at his abfolute disposal.

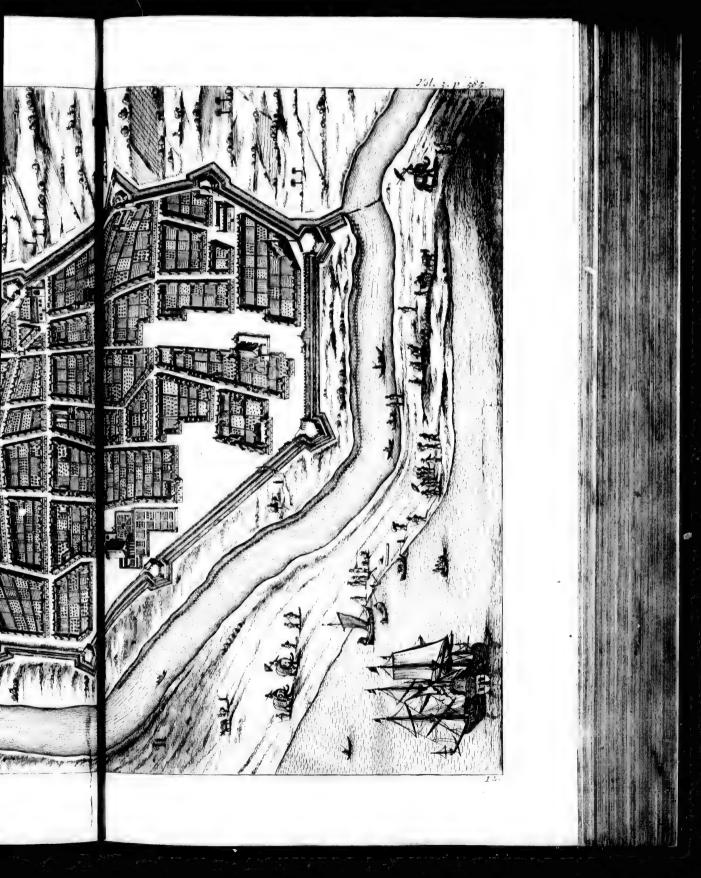

Not far from hence is that they call Adam's Adam's-Bridge, being a ridge of fands and Budge. rocks extending as far as Manaar, being fometimes paffable in fmall boats. In the description of Ceylon, we shall have occasion to speak something more of this Adam's-Bridge, and the Adam's-Mount. Certain it is, that the Cingaleses, as well as the Siameles have some knowledge of Adam; for the latt fliew you the print of a foot (faid to belong Adam's to the first man) in a rocky mountain of feet street in a yard and an half in length, three quarters meles, broad, and a quarter deep, edged round about with filver, near which is built a most magnificent temple, much frequented by the Siamese priefts, and other inhabitants of the circumjacent country, it being their opinion, that the least drop of the water gathered The big in this print of the foot, and dropped upon water. their heads, cleanfes them from their fins: for which reason they never use it without a great deal of reverence, no body daring to enter the temple without ten, twelve, or more wax candles lighted, according to their respective abilities; and when they return, they take fome of this holy water along with them in bamboe-canes, for the use of their friends, that have not the opportunity of coming thither in person. The king himfelf goes once every year on pilgrimage, with all his Mandarines, (or great courtiers,) to this temple, where they use this water at the time of the full moon, and conclude the night with dancing and drinking. Some of the Siamese priests did, by special leave from his majesty, shew to certain Hollanders, 1654. in March, a plate of gold, of the fame length and breadth as the before-mentioned Adam's-Foot, with fixty eight figures engraven upon it, which

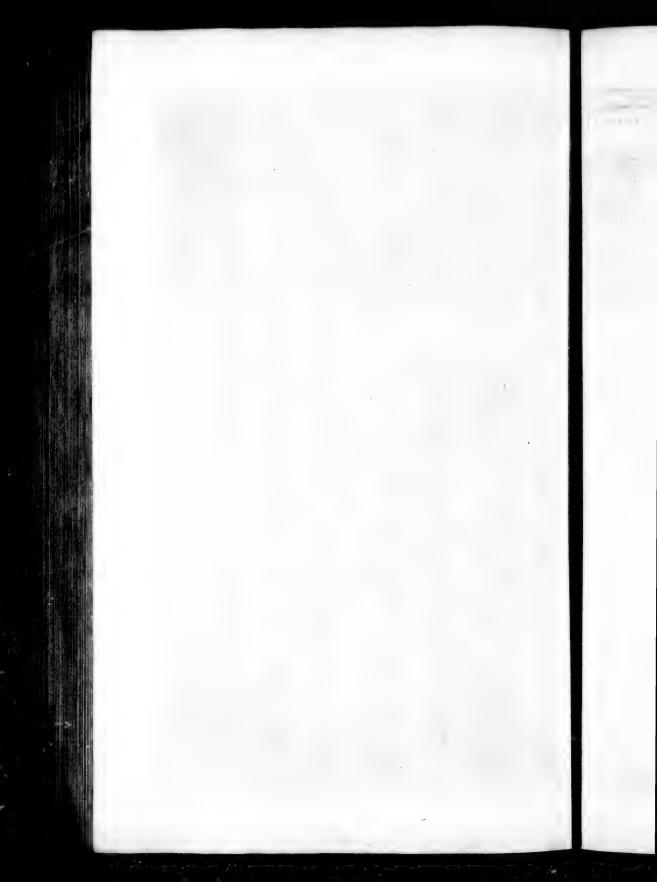

Снар. ХХИ.

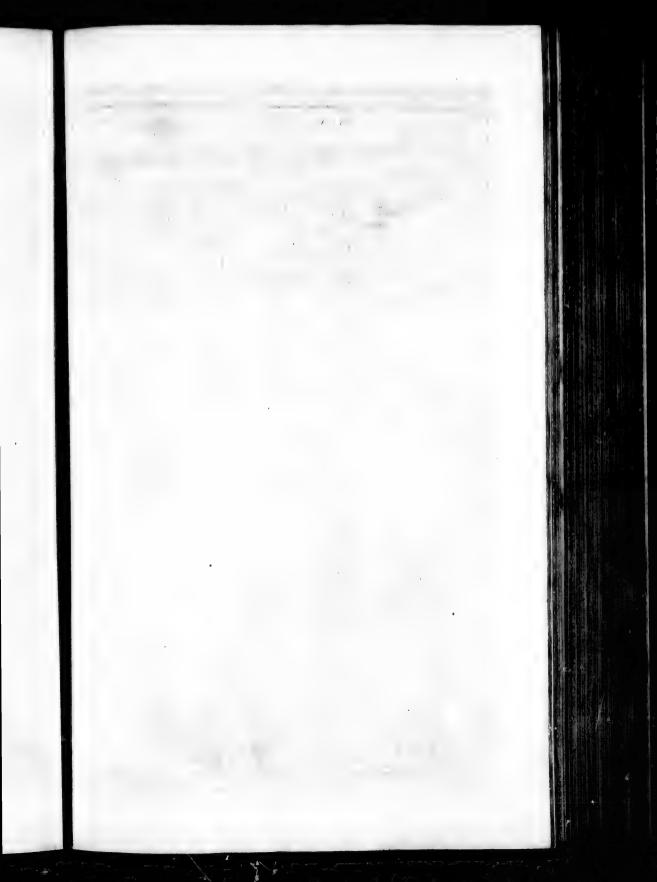

t bigness to-15 in a fouth winds at indifferentth indifferents very fundy, the eyes when The lord of the opposite to I the country Vaike. magure part, a ring on her finger, divers rojes, a fut.
chain, an arm, a hed of gold, a chair of the fame metal, an elephani's tooth, a royal palace, a golden sword-belt, an umbrello, a royal banger or seymilar, a fan made of the leaves of the terry-tree, t fan made of a peacock's tail, a royal crown, a priest with his mendicant pot of iron, a chain of precious stones, a red couslip-flower, a double one of the same kind, a white one and a double white one of the same kind, a cup full of water, a pot full of water, the fea, the world, a forest beyond the world, the purgatory of the Siamele, the bighest mountain of the world, the sun, the moon, the evening-ftar, the great God of the beavens, the god of the four winds, two thousand servants of the four winds, a sea-fnail, two sishes of gold, the seven chief rivers, seven mountains with precious stones, feven royal ladies, the king of beasts, the king of the caimans or crocodiles, an enfign, another of paper, a chair or litter, a fan with a long bandle, a mountain in an island, the king of ferpents, the king of tygers, a leaping borse, a large elephant, a white one of the fame kind, a water-ferpent, a casuarlus, (a bird like an estrich,) the are of the white cows, an elephant with three heads and as many tails, a ferpent, a flip of gold, an angel, a cow with a fucking calf, a certain bird, balf a man and balf a bird, a female of the same fort, a singing bird, the king of the peacocks, the king of the cranes, a bird called Krapat, a bird called Kuyshit, six beavens, fixteen forts of beavens.

Concerning all which the priefts give you their interpretations. The before-mentioned Adam's-Bridge extends to Tellemanaar, the furthermost point of the isle of Manaar, of which more anon in the description of Ceylon.

We will now take our turn in the fouthern parts of Coromandel, subject for the most part to the Naike of Madure and Tan-Tondy up in war. Tondy is the first place next to the missionst territories of Tafnapatnam; and I remember myfelf, that fetting fail one morning, about eleven of the clock from Jafnapatnam, we were within fight of the shore by four in the afternoon, and the fame night, at nine of the clock, cast anchor before Negapatan. From Tondy they transport yearly many hundred heads of cattle to Jafnapatnam; near the first stands a certain Pagode, called Kailiemeer, a very high structure, in the road to Negapatan, or Negapatham, i. e. the City of Serpents, Nega fignifying in the Malahar language a ferpent, and Patnam a city; because the country hereabouts abounds with a certain fort of venomous ferpents,

fuch reverence among the Pagans, that if Buldawis they should happen to kill one of them, they will look upon it as an explable orime, and to forebode fome great misfortune.

This city was taken by composition, with-The city of ont striking a stroke, by John van der Laan, Nega and Lucas van der Dussen, commanders of the Dutch forces, 1638. the last of the two being fince made governor of Cochin, and the other forts on the Malabar coaft, subject to the Hollander's. The Portuguese were Mastered by permitted to depart with their goods, far the Dutch.

milies, church ornaments, &c. in certain ships appointed for that purpose by the Dutch company. The city is feated near the shore, has no convenient harbour, as indeed the whole coast of Coromandel is deflitute of them; its buildings are very flately, especially the church, which affords a very goodly prospect towards the fea-fide; the land winds are excessive hot and stifling here, as on the other hand, the seawinds are refreshing both to men and beasts. It is observable, that whilst the land-wind blows, they gather water in stone vessels, which keeps very cool; the worst is, that these winds prevent people from sweating, which makes the heat the more insupportable. The same is to be observed at Masulipatan, where they are fo stisling, that ma-

In the year 1660. July the 14th, I fet fail from Jasnapatnam to Negapatnam, to introduce the reformed religion there; and accordingly preached the first time the 18th, both in Dutch and Portuguese, and administered the holy facrament to twenty perfons, and baptism to several children. Mr. Frederick Frontenius and myself had The protoffpent forme time there in feetling the pro-can reli-testant religion, Mr. John Kruyf, formerly must intro-minister in the eastle, called the Scelandia Negspatin the isle of Tajowan, was constituted mi-nam. nister at Negapatnam, who after his death was succeeded by Mr. Nathaniel de Pape, a person of indefatigable care, who in a very finall time has made confiderable advancements in the Portuguese and Malabar languages, who by the encouragement, and under the protection of Mr. Cornelius Speci-

man, governor of the coaft of Coromandel,

and famous for his late victories obtain'd

against the Macassars, and the king of the

ifle of Celebes, has fettled and fpread the

doctrine of the gospel in the circumjacent At the time of our first arrival, we found Mifery the affairs of Negapatnam in no finall con-about Negapatnam. fulion; the city having been just before be- gapatnam. fieged by the Naike, who, after a vigorous falley made by the befieged, had been forced

to effect with the loss of three or four hundred men. Befides this, the king of called by the Cobres Capellos, which are in Vifiajour had not long before the flege made

Baldaus, an inroad into the country, and by deftroyving all the fruits of the earth, and whatever else he met with, occasioned such a famine, that the poor country wretches being forced to fly to the city for want of rice and other eatables, you faw the streets covered with emaciated and half-starved perfons, who offered themselves to slavery for a fmall quantity of bread; and you might have bought as many as you pleafed at the rate of ten shillings a head; above five thousand of them were there bought and carried to Jasnapatnam, as many to Co-

lumbo, besides several thousands that were Baldaus transported to Batavia.

In the year 1669, the Naike was again embroiled with the Dutch company; but being bravely repulfed, was glad to be at quiet. Without the gates, on the northfide of the city, stands a very lofty Pagode, called China, near which is a fummer-feat, with very pleafant gardens and orchards, formerly belonging to Francisco d'Almeyda, an antient rich Portuguese, now living at

CHAP. XXIII.

A Description of Carcal, Trangebar, Trinilivaas, Colderon, Porto Novo, Tegnatapan, Tirepoplier, Chengier, Sadraspatan, Madraspatan, St. Thomas, Paliacatta, Carnatica, Penna, Caleture, Petapouli, and Masulipatan.

Carcal.

WO leagues from Negapatan lies Carcal, where, as well as in most other fouthern places, Adrian van der Mey-den, head-factor of our company, did crect a factory fome years ago; but fince we have been mafters of Negapatan, the factory of Carcal is not regarded. The chief commodities here are certain stuffs, especially those called rambotyns, much in request among the Japonese.

Cold ron.

From Carcal to the Danish fort, called Trangebar, are about three leagues: it has four bulworks, and the garrifon confifts for the most part of Topasses and Negros, under the command of one Eskel Andres. The inhabitants confift of Portuguese, Pagans. and Mahometans: their traffick is vir inconfiderable, their chiefest advantage arising from the excursions they make upon the neighbouring Mahometans, with whom they are in constant enmity, by reafon of the ill usage they have ever received from them. About two years before our departure thence, one Simon van Medenblick had got a commission from the Danes, and took a rich Moorish vessel, and killed the whole ship's crew. I have often wondered why the Danes should not more encourage their trade in the Indies than they do, fince they have the fame, or rather a better opportunity for fo doing than the English.

From Trangebar you go by the way of Trivilivaas to Colderon, where there is a very dangerous fand-bank. From thence you come to the place called the Four Pa-Port, No godes, and fo to Porto Novo, or Newbaven, about four or five leagues from Trangebar. At Porto Novo inhabit fome Portuguese: their trade confifts chiefly in a certain hard

wood called Hunter's-wood, Coco-nuts, Arek. Cair, &c.

About a league from Porto Novo Stands Tegnam. Tegnapatan, where the Hollanders have tan likewise a factory. Next to this lies Tirepoplier, upon a river which is navigable, Tirepope within half a league of the Dutch factory, lier, The road lies at eleven degrees one fourth of northern latitude, having feventy feven fathom water, with a grey fandy ground, very fit for anchorage, not above a mile from the shore. There is fafe riding at anchor here (as all along the coast of Coromandel) during the fouth Mouffon, but very dangerous in the north Mouffon. The castle Trepoplier is tolerably strong, according to the fashion of the Gentives. The factory formarly belonging to the Dutch was within the caftle, where is also a stately large Pagode, with a high stone-tower flat at top, which ferves the mariners for a guide. The mines of the old castle, belonging formerly to the Portuguese, upon an ascent near the fea-shore on the north-side of the river, are also seen a good way at sea. The country hereabouts is generally fandy, and fometimes rocky. Tirepoplier is under the jurifdiction of the Cristappaneyk, whose residence is at Chengier, about two days journey to the fouth of Tirepoplier.

The city of Chengier is very populous, Chengier and three times as big as Rotterdam, feated in a most pleasant valley, near a delightful river, to the fouth of it: it is fortified with double stone-walls, and has four high rocks without, upon three of which are as many strong forts, and upon the fourth a Pagode. The first of these rocks is inclosed with a very strong wall, the second with

Baldeus, four walls, and the third with no less than feven, with as many gates all of stone, and kept by a confiderable garrison; the ascents to the forts being cut out of the rock, and fearce acceffible by reason of their steep-ness and straitness. On the top of these rocks are most delicious springs, fresh-water ponds, and gardens. Befides which there is another fortress upon an unaccessible rock without the city, commanding the avenues towards it on that fide. The Naike's palace stands betwixt two of the before-mentioned rocks, most pleasantly situate, and well fortified. Great cannon are a kind of rarity here, and those few they have, (like those in the siege of Negapatan, 1658.) are made of long and broad bars of iron joined together with iron hoops; their bullets are of stone, and cut round.

The Naike was, atour first arrival in these parts, very obliging to our deputies, whom he treated very iplendidly for fourteen days together: and after he had given them a still view of his prodigious wealth, confissing in most sumptuous apparel, filver, gold, and jewels, as also of his wives, concubines, and forces, both horse and foot, he dissinis defense on the news of steragio being on his march against us.

The Naike being almost arrived to the age of dotage, one Trinvingelaya (who had emasculated himself) was administrator of the kingdom, a cruel and bloody-minded person, very covetous and implacable in his hatred, who, by his severity against criminals, had rendered the country free from robberies and pillages. This Aya, or administrator-general, was very urgent with our deputies to agree with him once for all for the yearly sum of one thousand eight hundred rixdollars in lieu of the customs, offering to us the government of Tegnapatan, the free exercise of the christian religion, and full power to rebuild the ruined cattle of the Portugues.

The country hereabouts abounds in rice, falt, fruits, and other eatables; notwithflanding which, by reason of the vast number of the inhabitants, they must be supply'd with provisions from abroad. Their chief commodities to be exported are linen and woollen fluffs, much in request among those of the Moluques, Amboyna, Banda and other Malajan places. But great care must be taken these stuffs agree with their patterns, especially in the goodness of the colour, wherein they are very deceitful. The commodities imported and exchanged here, are nutmegs, mace, pepper, fandalwood, Chinese filks, velvets, fattins, embroidered and wrought carpets of all forts of colours, raw filks, Patana girdles, musk, cinnabar, quickfilver, (but no porcellain

or Chinese camphire,) brazain, 'tin, lead, Baldaus.

From Tirepoplier you go over Poelezere, Poelemoer, and Alembrue, to Sadraspatan, Sadraspawhere the Dutch have a factory, and from tan. thence to Madraspatan, otherwise Chinne-Madraspapatan, where the English have the fort of tan. St. George, garrifoned with Topatzes and Mistices; and from whence they fend their fhips every year, as well as from Surat. St. Thomas is a city belonging to the Portu. S. Thomas. guese, fituate in Mai. apour, at twenty three degrees one half northern latitude, about a days journey from Paliacatta; but taken from them about eight or nine years ago by the Moors. It is an ancient trading city, their chief traffick confifting in coloured thuffs, their weavers here being famous throughout the Indies, as well as their dyers: they are transported to Malaga, Java, the Molugues, Siam, Pegu, &c. The excellency and laftingness of their dying are attributed to a peculiar quality in their water, the fprings whereof arise out of very white fandy ground, without the least mixture of clay.

Paliacatta, i. e. the Old Fort in the Ma-Paliacatta; labar language, is feated at thirteen degrees twenty two minutes of northern latitude, five long leagues from St. Thomas. About fix leagues into the country, in a direct line from the harbour of Paliacatta, you fee a ridge of high mountains extending from fouth to north; on the fouthern part you fee an interstice or valley, where in antient time flood the castle of Rama Geridorgon; in lieu whereof was afterwards built the fort Geldria, where the Dutch The Dutch governor keeps his refidence. It is not very for Gellarge, yet fortified with fome bulworks, fufficient to refift the power of the neighbouring Moors. Mr. Anthony Pavilion, counfellor of the Indies, had at that time his refidence there as governor, after Mr. Cornelius Speelman; and the garrifon confifted of about eighty or ninety men. The road is very good at The road of half a league from the shore, where you Paliacatta. may ride fafely at anchor at feven or eight fathom depth during the fouthern Mouffon; but not in the northern Mousson, when the waves breaking forth with great violence out of the bay of Bengale and the Ganges against this shore, render anchorage very dangerous.

About three leagues and a ha! from the road is a certain fand-bank, extending from the river into the fea for a league together, where there is no anchorage within four and a half, or five fathoms water. Two leagues to the north is the point of Sicerecourdi; from whence jets out into the fea a fand-ridge for above two leagues and a half, near which there is no fafe anchorage within fix and a

hali

in boats.

Baldeus, half or feven fathoms water. Near the bar there is from fix to ten fathoms water in the fouth Mon/son at high tide; but the boats or lighters that carry the merchandizes must keep under the fouthern shore, there being abundance of shelves under the northern thore. About a good cannon-shot within the mouth of the river, within reach of the caftle is a good winter-road for the Indian thips. This river lies at least five leagues to the north-west into the country, by the city of Armagon and the forest of Sicerecourdis from whence Paliacatta is furnished with wood for building and fuel, whereof there is great scarcity in the barren grounds round that city. A small brook runs also by the fort, where we used often to divert ourselves

> The canal leading to Paliacatta is almost dry during the fouth Moulion; but overflows the country for two leagues round in the northern Mouffon. The grounds about Paliacatta are very nitrous, fandy, and unfit to produce any thing ingreat quantity; which is the reason that they must be supply'd with most forts of provisions (except fish, whereof they have plenty) from other places. The fortifications being built upon fenny grounds, which reach for four or five leagues round, have been often in danger of being swallowed sup by the waters in the rainy season, and were therefore not maintained without vast charges. Under the cannon of the fort of Geldria lie two villages, one to the fouth, called Diramamy, built upon a fmall ifle, the other on the north-fide within reach of a musket, called Coupon, and inhabited by christian fishermen, being converted to the christian faith in the time of the Portuguese.

We will now proceed to the kingdom

of Garnatica, extending fixty Badagarian leagues (one whereof is equivalent to three Dutch miles) from fouth to north, and forty from Paliacatta to the coast of Malabar. In this country it was that the three Naikes, or chief lords of the crown of Velour, keep their refidence, who pay a certain yearly tribute to that crown, viz. the vitipanaike of Mudure, the king's basonbearer, two hundred pagodes (each of which is worth fix Holland guilders) per annum; the christapanaike of Chengier, the king's betel box-bearer, as many; and the naike of Tanjouwer, his umbrello-bearer, (who is lord of Negapatan,) four hundred per annum. These dignities being hereditary time out of mind, the countries of Madure, Chengier, and Tanjouwer have been annexed to them, under condition of a year-

ly tribute, and are besides this obliged to give their personal attendance at the coro-

nation of the lawful fuccessor of the before-

mentioned kingdom.

Further to the north (about a day's Baldeuvoyage) from Paliacatta, lie Penna and Caleture, betwixt which places is found Penna. the best essaye-roots, which are also to be found in the iffes near Jafnapatan: it is a fmall troot no bigger than a little fprig of about a fpan in length, used by the dyers. The way to try its goodness, is to break it to pieces, and to fee whether it be very red within, or elfe to chew a piece of it; and if you perceive a nitrous tafte in it, it is very good. To try the true dye thereof upon callicoe's, you may fqueeze some lemmon juice upon it, and let it dry in the fun; if it be not true it will change pale. There is also a five-cornered fruit, called carunboll, the juice whereof being sharper than that of lemmons, is likewise made use of in trying the true dye of the effaye-colour. For this nation being very cunning in their way of dealing, oftentimes make use of a dye called fordaco instead of the effaye, and of the bark of a certain tree growing in Orixa; but may easily be distinguished by the colour, being fomewhat darker than the true effaye, and if rubbed with water, will tinge it. They have a nice way of refining and trying the gold here; and the Dutch company coin abundance of golden pagodes here, with the king's stamp upon them. Abundance of nely, rice, gingely-feeds, oil, butter, coarse cloths, iron, honey, and yellow wax, is brought hither from Orixa and Majulipatan, the whole voyage thither and back again being commonly performed in four months. From hence to Arracan. Pegu, and Tanaffery, you pay eight or ten per cent. for freight of pepper, fandalwood, stuffs, steel, and iron, and make your returns in gold, rubies of Ava, gummi-lacca, long white-pepper, lead, &c. Betwixt Tanaffery and Occeda, towards Malacca, are the harbours of Tanangar, Sencaza, and Perach, opposite to Achem, whither they trade with valt profit, and bring back abundance of tin, a commodity much in request withthe Moors, wherewith they tin their copper veffels.

Petapouli is fituate at fixteen degrees of Petapouli north latitude: as you fail eaft-and-eaft to the north towards this road, you fee an ifle at a league and a half distance, made by the north branch of the river covered with cocotrees, an infallible guide to the road, where at a league's distance from the shore, there is good ancherage at fix fathom water in a fandy bottom. This is the securest harbour on all this coast during the north Mousson, by reason of a point of land jetting out for three leagues in the fea to the north of the ifle, and enclosing as it were the road by a demi-circle; whereas in the fouth Mouffon, the fea is very boifterous, and the waves very turbulent here.

The kinga dom of Carnatica,

The three Naikes.

paldens. The bar of Petapouli has fome shallows scarce passable but by small vessels. The city lies a league within the river, which is pretty large, and runs up into the country till it joins its waters with the river Meca.

Petapouli is of no great extent, inhabited by fome Moors and Perfians of note; but for the most part by Gentives, subjects of the king of Golgonda. As hereabouts grows a kind of effaye-colour, exceeding all the reft, called Tambrevelle, to the painted and dyed stuffs of Petapouli exceed even those of Mafulipatan. The root grows like a small fprig of a foot long, the colour whereof is fo deep that they are obliged to mix it with the effaye of Arrical and Ortacour, to make it the more lively. This effaye-root grows in the ifle made by the river over-against the city, whereof the governor has the monopoly, and pays a certain yearly fum for it to the king; which, as it is paid most commonly in dyed stuffs and cloths, fo he employs the weavers himfelf; and for that reason will not easily permit them to be fold to the merchants, (at least not without his confent,) who transport them from thence into Persia. Here good indigo is to be bought, but much dearer than at Majulipatan: from hence we also transport cotton-yarn, white stuffs, and feveral other commodities to Holland.

Majulipatan is a city feated near a large river, where the English and Dutte have their factories. It is very populous, and the refidence of a governor, who pays a certain yearly tribute to the king of Gol-

condar, which he fqueezes out of the inha-Baldæus. bitants, especially the Gentives, who are forely oppressed by the Persians and Moors here, who farm all the weaving trade from the great persons; wherefore there is scarce any trafficking here with profit, unless you have a patent from the king, which is not easy to be obtained, because the governors (who pay one hundred and forty thousand pagodes of annual tribute to the king) constantly oppose it; and it is a difficult matter to approach the king (who keeps his court at a great distance thence,) without purchasing their favour, or some other great mens at court. For the rest, this city is a place of great traffick, where most of our commodities, as also those transported hither from the Molucca's, China, &c. are fold at a very good rate. Here is also ... great concourse of merchants from Cambaja, Suratte, and other places under the jurisdiction of the Great Mogul, as also from Goa, Orixa, Bengale, and Pegu. Here is likewise a considerable traffick in diamonds and rubies: the first are digged in the kingdoms of Golgonda and Decam, near the city of Byfilaga beyond Suratte, each stone weighing above twenty five mangelies or carats, belonging to the king of Byfilaga, the rest to those that have farmed the mines. There is a certain mountain, called Cotfa Vuyttbia, in the country of Decam, which affords the choicest diamonds. Borneo, but especially the city of Succadana, are likewise very famous for

C H A P. XXIV.

An Account of most Sorts of precious Stones, as Diamonds, Rubies, Smaragds, Saphirs, Amethists, Jaspers, Sardonicks, Agates, Granates, &c.

THE most notice of an product by the is the diamond, called Adduct by the impregnable. THE most noble of all precious stones Greeks, from asapas &, i. e. impregnable. Pliny, and others of the antient naturalists, being of opinion, that it is neither to be broken by the force of the hammer, nor penetrable by the violence of the fire; which however has fince been fufficiently contradicted by experience, though the same is feveral times used in the same sense in the *Zechvis. scripture.* It is likewise called Adamas by h. he Latins, Deamant by the Germans, Adabians, Jutan by the Malajars, and Hiera and Jua by the Indostbans. The beauty of a diamond confifts in its hardness, transparency, and luftre; though to speak the truth, there are but few diamonds without fome defects, which however pass current among

those who are no nice judges of it. Lead is reckon'd to be exactly three times as heavy as a polished diamond.

There is a certain kind of diamonds, called Bofobiers, which are not by a third part fo valuable as the reft, though fometimes they exceed for brightness all the other forts; but if they incline to a reddish or yellow colour, they are not worth half fo much, they being only valued according to the weight of the carats, without any multiplication. To try the goodness of a The good-diamond you must cut one diamond with missiand valuation of the powder thereof be of diamonds. an assume it is right; but if white, otherwise; for all other precious stones except the diamond afford a white powder; and the more the powder of the diamond approaches to a grey, the more precious

Baldæus, it is. They have another way of trying the diamonds, by making them red hot, and afterwards quencling them in cold fresh water; and if they do ot crack, they are true and good. The true value of the best diamonds (provided they are clean, and of a just thickness) is computed thus: The just value of a good diamond, weighing a carat, (each whereof is equivalent to four grains,) is eighty gilders, or thirty two rix-dollars. Now to know the just value of one or two carats, you must multiply two with two, the product whereof being four, this must be multiplied with the value of a diamond of one carat, viz. eighty gilders, the product whereof amounts to three hundred and twenty gilders; fo that according to this computation, a diamond of twenty carats is worth thirty two thoufano gilders; and, according to the fame proportion, one of an hundred carats, no lefs

than eight hundred thousand gilders. The ruby, called Rubinus, or Carbun-culus by the Latins, Mameuikam by the Malayans, Battamora by the Siamese, and Laal by the Indostbans: it will endure the fire for a confiderable time. three feveral forts of rubies; some are of a high-red and brilliant colour: those of a dark-red colour, though they carry a very fine lutture, yet are not fo much valued as the former. The oriental rubies are called Espinelles; those of Germany are very hard, but inclining to a dark-brown, and therefore of less value, notwithstanding which they are true rubies. They feldom exceed the bigness of a good pea, and are very thin, and the stone-polishers make them thinner still, to increase their lustre. The Espinelles are of much brighter colour, but not fo hard, and confequently of less or more value, in proportion to their hardness, some being as hard as a faphir.

The carbuncles are adulterated with Sanforms kinds, daracha, but these false colours are foon discovered in the corners of the polished stones. which do not receive these colours. The oriental carbuncles are likewife of two different kinds; some are of a dark-brown colour, the others are bright, and carry lustre like fire; and these are the most pre-cious. The rubies are appraised like the diamonds by carats, one, two, three, or more; with this difference, that the rubies, though of the fame weight, are fomewhat bigger in proportion than the diamonds, and without the least clouds, or other de-

> The fmaragd, or emerault, called Tamarul by the Arabians, and Jasche by the Indians, is one of the precious stones, called Σμαράγδ by the Greeks, and Esmaraude by the French. They are of three different kinds. Scythia and Egypt produce thefe

Rones, as well as the East Indies. They Balding endeavour to imitate them at Paliacatta and Bisnagar in glass. Those of Scytbia are accounted the best; those of Peru are the next in goodness, of a dark-green colour. very hard, and more transparent than those of the East Indies. These last are harder than those of Peru, but much less regarded. Those of Peru are of a pale colour, and brittle. The general opinion is, That in case an emerault should be found excellent in all its parts, viz. in colour, shape, and transparency, it would be comparable to a diamond of the fame bigness, nay, would Thir va. even furpass it in value, by reason of its lue.

The faphir is called Mila by the Arabians, The faper and Millam by the Malayans. They are of two forts: those of a dark-blue colour are the best; those of a pale colour resembling the diamonds, the worft. They are found in Malabar, Calecut, Cananor, in the kingdom of Bisnagar, in the isle of Ceylon; but Siam and Pegu produce the best.

The hyacinth, called 'Taxw39 by the The has Greeks, is a red stone, not unlike the car-timb. buncle, but does not endure the fire. It is found in Spain. The jewellers fell fometimes the stone called Ethiopis for a hyacinth: they are of two kinds; one red, the other inclining to a yellow.

The amethift, called 'Author & by the The mai Greeks, is of a purple colour; those that this. are found in the East Indies are preferred before the reft.

The Jaspir, so called by the Latins, and The july lastie by the Greeks, is of two different China. kinds; fome being of a lovely green colour. like the emeraults, and of such a bigness, as to ferve for materials for drinking-cups; fome have the green mixed with white a fome are of purple, others of a rofe colour, with variety of flowers in them; others are dark-brown and blew, with white veins; fome are marble on one, and jasper on the other fide.

The fardis has got its name from Sardi-The furth. nia, where it is frequently found, as well as in Epirus. There are three feveral kinds, and were by the antients diftinguished in- Apoc. to the male and female. That the fardis xxii. 10. is different from the fardonic, is evident out Exod. of the holy fcripture.*

The Sardonick, called English by the The look Greeks, has got its name from Sarda and nick. Onyx, or its refemblance to a human navel.

The Agate is found about Suratte, but is The again of no great value, unlefs it be curioufly chequered with figures.

Amber, called Succinum by the Latins, Amber. "HARRIEN by the Greeks, and Alambre by the Portugueses, is a kind of a gum or rosinous fubstance, found near Koningsberg, and some other places in Prussia; in great esteem

by the Latins, Amber. Alambre by the gum or rolinous gsberg, and fome in great efteem among

eneral. It is often chequered with various figures, and has the virtue of attracting ftraw, paper, and fuch like light matters.

The Granate resembles in colour to the coral. There are two forts, the Indian and Spanish; the last are very red and bright; those found in Ethiopia, are scarce to be diftinguished from the hyacinth, except that their luftre is fomewhat less than that of the hyacinth.

The stone called Olbos de Gatos, i. e. Cats-eyes, by the Portugueses, is in much greater effeem among the Indians than the Portugueses; who are of opinion, that if you rub linen-cloth with them, it will be fire-proof: but this I have found contrary to truth by my own experience.

The Hematites, or blood-stone, ('Aspalitus by the Greeks) has got its name from its dark-red colour, and its virtue in quenching of blood. It is found in New-Spain, and reputed by them a kind of Jaspir; the Indians make beads of them, and wear them about their necks: they also lay them in water, and afterwards hold them close in their hands, and look upon this as an excellent remedy to ftop the superfluous monthly times of the women, or any other flux of blood. This stone is also found in Ceylon and Cambaja where it is called Silakenea.

The Nephritis, or Kidney-stone, has got its name from the word Neggle, i. e. a kidney, because it is worn by the Indians against the pain of the kidneys, and therefore in great efteem among them. It is found in New-Spain; and the greener it is, the better it is.

The naturalists tell us, That the stag, when tormented in his bowels by certain poifonous worms, runs up to the neck in water, at which time the flimy tears which adhere to the corners of his eyes are coagulated to the bigness of a wallnut, which thence have got the name of Hartst-ones ; which taken in wine, are looked upon as a fovereign antidote against all manner of poisons and infections.

The Serpent-stone is found in the Indies, of The Ser. pent-flone, a dark-brown colour, with a white fpot like an eye in the middle. Some will have them to grow in the heads of the ferpents; others are of opinion, that the water-ferpent hung up by the tail, with her head hanging downwards, fo near to a veffel full of water, that fhe may lick it, does fpew out this ftone; which tied to the belly, is accounted an excellent remedy against the dropsy. The Spaniards call this stone Piedro della Cobra, and the Portugueses Pedra de Cobra, being commonly of the bigness of a shilling, less or more. The true Serpent-stone is found in that kind of ferpents, called Cobra de cabelo by the Portugueses, and Serpens Pilosus

Raldons, among the Japoneses and the Indians in by the Latinists, being the most virulent of Baldons. all ferpents. They try the goodness of this stone, by putting it into fair water, which if it bubbles, it is accounted true; another trial is, when it flicks close to the lips, or to the wound, unto which it will adhere till it has drawn out all the poison, when it falls off like a leech, and is thrown into milk : of this I saw the effect my felf with good fuccess in a negro slave stung by a ferpent, belonging to our head-factor at Jafnapatnam, Sir Jorephas Vojeb. The Brab- Acons mans make a certain composition (which sitton of they keep very fecret) in imitation of the the Sernatural Serpent-Stone, the chief ingredients pent-stone. whereof are supposed to be the head, heart, *InFlora liver, and teeth mixed with the Terra figillata. Chinenti. Concerning the true virtues of the ferpent + Lib. 9. ftones, you may confult Michael Boimus, * Mundi fubreran. and Achanafius Kircher.

The stone called Pedra de Porco, i. e. Hogs-Hogs-stone, by the Portugueses, grows in the stone. Vefica Bilearea of the hogs about Malacca. It is of a ruddy colour, and fometimes grey, greezy or oily at the touch like venice-foap, and of a bitterish taste. When they will use this stone, they put it in water, till it acquires a bitterish taste, and so give the water to the patient, for the cure of pestilential and other fevers. They are highly efteemed

in the Indies. The Toad-stone is found in the head of a Tondcertain kind of Toads, of the bigness of a stone. good bean, of various colours, but most enclining to a green, smooth and shining on the out-fide, which is bony, but the infide of a flony fubflance: they are reputed an excellent remedy against the stone in the kidneys, poifon and infirmity of the stomach. To get this stone, they take a very old toad, put it in a vessel full of holes, and so bury it in a dunghil near a pifmires neft, till the pifmires have confumed the whole fubitance of the toad, except the stone. They try the goodness of this stone, by laying it before a tortoife, which if it is ready to swallow it, it is accounted a true stone.

Of the Bezoar-stone something has been Bezoarfaid before in the description of Cananor, be-stone, ing accounted a great antidote, but efteemed much more in former times than of late years. The bezoar-stone is found in the ftomach of certain goats in Persia, and the isle of Borneo, called Pazan. It is of a very folid ruddy substance, growing in different parritions, like our onions, which are eafily difcernable when the stone is broken: they are of divers colours; fome inclining to an olive colour, others to a dark-green; fome sound, fome of an oval figure; the fmoothest and largest are accounted the best. They are also found in the ifle, called Iba de Vacas, i.e. Cow-Island, about fix leagues from Jafnapatnam, but in no great quantities; for I remember that

Baldeeus, Mr. Anthony Pavilion told me, That out of reventy or eighty goats, which he ordered to be killed, he had but a few flones, and these but indifferent ones, and very brittle. The Malayans try this stone thus: They rub it five or fix times with mortar, and if it changes the mortar into a yellow colour, it is accounted true. Those of Banda tell us, that they find the bezoar-stone in the heads of certain apes. The Indians and Chinese mix it with rose-water, and use it against poison, melancholy humours, and quartan agues. They also make use of it as a prefervative; for they purge twice a year, viz. in March and September; and for five days after take from ten to thirty grains of bezoar in role-water. They fell this flone by weight; one of three hundred, two hundred and fifty, one hundred and fifty, or one hundred and forty carats, is accounted equivalent to three times the weight in gold, each carat reckoned at eight Duteb flivers. One of an hundred, ninety, or eighty carats, to one and one half the quantity of gold, or at fix flivers the carat. One of feventy, fixty, fifty, or forty carats, to one and one fourth of gold, or at four stivers the carat. The leffer ones in proportion of one fourth of gold, or two flivers and half the carat.

Oriental

There are oriental and occidental bezoarand occulen- itones; those of the east, especially of Perfia, much exceed those of the West Indies. Arabia, Malabar, Japan, and China produce these stones, and the mountains of Peru in the West Indies. The Persians call this stone Belzoar, i. e. The Lord of Poilon; and the Arabians, Hagiar Corrabone. Formerly it used to be fold in Holland at the rate of eight gilders per ounce. If the outward rind or skin be taken off, the next appears fmoother and brighter than the first. The bezoar-stone has no pit, but a concavity containing a certain mealy fubstance, the virtue whereof is faid to excel the ftone itfelf. Those taken out of the goats living in the mountains, are accounted better than of those feeding in the valleys. These stones are found in certain bags of a hairy fubflance, growing within the concavity of the fromach, of a span in length, wherein the flones lie in a row like buttons on a waftecoast, as a certain Portuguese tells us. They have also another way of trying the goodness of this stone: they take a needle with a thread, and having dipped the fame in the juice of a venomous herb called Balleftra, they draw the needle and thread through the leg of a dog or some other living creature, leaving the thread in the wound till the dog faints away. This done they give him a certain quantity of bezoar-powder, which if it recovers him, the bezoar is good; if not, it is looked upon as adulterated.

Of feveral other trials we have fpoken in Baldeus the description of Cananor.

Among those commodities, which are the indige, transported from Masulipatan, the indigo being none of the leaft, it will be requifire we should say something also of this precious merchandize. The indigo is of different kinds, and grows in divers places: the broad indigo grows about two leagues from Amadabath, the capital city of Gujuratte, especially in the village of Chirchees, from whence that kind of indigo has got its name. The indigo is a fhrub growing up to man's height, with fmall hard twigs, like the blackberry trees: its bloffom refembles that of the briars, and the feed that of the Fanum Græcum, called Dujenegre by the French. They fow it in June and July, and cut it in November and December.

The indigo of Chirchees grows three years Indigo of fucceffively after its first fowing. The first Chirches, year they cut the leaves about a foot above the ground; which being dried in the fun for twenty four hours, they are put into barrels full of falt-water, of a man's height, and kept down to the bottom by laying great stones upon them, the better to squeeze out the tincture. The water being ftirred often for four or five days, it is let out into great casks, where it is ftirred and trod continually by tain persons, till the water ene indigo fettles to the botthicken tom, in a e manner as they manage the butter in *Holland*. The fediment be-ing separated from the water, and strained through thin cloaths, is spread upon the ground (first covered with white ashes) to dry. The country people adulterate the indigo with a certain earth of the fame colour, or with oil, to make it feem the becter upon the water. The fecond year the indigo grows again on the stalks that were left in the fields, which is accounted better than the Gingy, or wild indigo. If you intend to preserve the feed, you must let the stalks dry the second time, and afterwards gather the feed. The indigo of the third year's growth is of little value, and confumed for the most part by the inhabitants of Gusuratte in dying their linnen and wool-

The chief figns of the goodness of the in-Itigula, digo, are its lightness, and feeling dry betwixt the fingers, its fwimming upon the water, and, if thrown upon burning coals, its emitting a violet-coloured smoke, and leaving but little afhes behind. The ground which has born the indigo must lie fallow the fourth year, unlefs you would fow it with fome kitchen-herbs.

Hereabouts also grows the indigo, called Aniel de Biant, by those of Gusuratte. They fow it in June in light and fandy grounds, and it grows chiefly in June, July, August

e indigo, called Susuratte. They fandy grounds, , July, August, Rilians, and September, the ordinary rainy months here, which, together with the heat of the fun-beams, brings it to maturity, it being certain, that too much rain is pernicious to this shrub. Great care is to be taken that the grounds be well cleared from thorns and thiftles. The buyers of indigo ought to be cautious how they buy it; for if it happen to be not very dry, they may lofe three pound weight in ten in eight days

raladigo The Indigo Laura, or Indigo de Bayana, is of three different forts; the first crop is called Voutby by those of Gusuratte, the second Gerry, and the third Catteel. The first is cut in Oslober, the fecond about the middle of November, and the third in January. The first is of a light blue colour, and held against the fun, and squeezed with the nail of the thumb, shews a violet colour. The fecond, called Gerry, the nearer it approaches to a violet colour, the more valuable it is. The third, called Catteel, is the worst of all, of a ruddy colour, and fo hard as fcarce to be broken to pieces.

The goodness of the indigo is tried in the following manner; about nine or ten a-clock, in a clear fun-shiny morning, they take a piece or two, and after they have broken it in pieces, hold it against the sun, to see whether they can discover any fand in it: they also squeeze with their nails some of the colour out, which the nearer it comes

ir with water and fire: They throw a piece Baldeus. of indigo forty or fifty times fuccessively into a cask filled with water; and the longer it fwims upon the furface, the better it is deemed. They also cast a piece of indigo upon burning coals; and if the fmoke or flame appear of a high violet colour, the indigo is good.

It is fowed in feveral places: the Indigo Good indigo Laura about Agra; in Fettapour, twelve is also made in Coro-cos from Agra; near the city of Byana, mandel. thirty Ces from Agra, (where is the best ;) near the city of Baffaune, thirty eight Cos from Agray near the city of Kindowen, for-ty Cos from Agra. The country people are obliged to carry their indigo into the next

Next to Melidipatan we must also say fomething of Bimilij atan, where the Dutil have had a factory a confiderable time ago; and from thence, as well as most other parts of Orixa, transport abundance of rice. peafe, and other provisions, into other parts. The whole country hereabouts enjoys a wholesome air, though in one place more than in the other: for though the heats are exceffive, nay, almost intolerable, yet are the same in a great measure qualified by the cool fea-winds; fo that the reafon of the many diffempers and pale countenances, which often attend the Europeans in those parts, is not fo much to be attributed to the unhappiness of the climate, as to their to a violet, the better it is. They also try own intemperance and debaucheries.

CHAP. XXV.

The Manner of Living of the Hollanders in the East Indies: Their Use of Tea and Chocolate: Their ordinary Drink; Manner of Sleeping. A Description of the two Rivers, the Ganges and the Nile.

Street A S the manner of living of the vulgar fort among the Dutch in the East Indies is none of the best, so we will be satisfied with giving an account of those of the better fort. They commonly rife with the fun, fleep after fun-rifing being accounted very unwholesome here in the morning. Some have a custom of washing their heads, nay, the whole body with cold water, immediately after their coming out of bed; others do it with luke-warm water, three or four times a-week; the last of which I have found the best by experience. They commonly shift their linnen every day. Brandy, or any other firong liquors are not much used by the wifer fort in the morning, unless it be a spoonful just before dinner, and a little at night before they go to bed.

The tea (always used fasting by the Chinese) has got a mighty ascendant over the Hollanders of late years. The best grows in China, being a shrub, rising not very high above-ground, especially in the province of Kiangnan, near the city of Hocicbieu: the leaves are dried, rolled up, and preserved for use. Father Martinus Martini, in his Chinefe Ailas, gives us the following account of the tea. The leaves are very like those of the Rbus Coriaria, called Sumach by the Arabians, and ges by the Greeks, of which it feems to be a species, though it does not grow wild, but is planted, being a fhrub with finall twigs. In the beginning of the fummer it buds out a light-coloured bloffom of an agreeable fcent; after which come green buds that turn black at laft. They How pres take a leaf, and after they have warmed it pared. in an iron pot with a gentle hear, they lay it upon a clean mat; and having well rolled it, put it again over the fire, till it be thoroughly dried, and twifted together; when they put it up in tin or leaden veriels, to preferve it from the moift air, which would toon corrupt it. The tea being of different forts,

Baldaus, confequently bears a lower or higher price, according to its goodness. Its chief virtues are to disperse the gross vapours of the head and stomach, and confequently to exhilerate our spirits. The Chinejes, as they are never troubled with the gout; to they attribute the fame to the tea; and Kircher afcribes to it a diuretick quality. Its tafte is fomewhat bitterifh, and not very agreeable at first, but well enough afterwards. The Turks tell us wonders of their Causea, or coffee, and the Spaniards of their chocolate; but it has been found by experience, that the first increases the gall, and the last inflames the blood, and nourifhes too fall; whereas the tea is much more moderate in its nature; notwithflanding which its immoderate use hinders the concoction of the flomach, (efpecially if taken after dinner,) and too much dries up the moistures of the body; which is the reafon the Chineses never take it after meals. The Chinese tea is, both in goodness and price, much superior to the Japonese. I have found by experience that four or five cups of the extraction of the fresh leaves of the tea makes one light-headed; and I remember, when the best tea was fold at the rate of twenty four gilders per pound in Holland.

The ordinary drink of the Hollanders is a mixture of water and fugar boiled together. Some fill certain earthen vessels over night with water, and add to it three or tour glasses of Spanish wine, which, exposed together all night in the dew, turns white, and affords a pleafant liquor: but is a little too cool; for which reason some put a certain quantity of mum in the veffel. The Brunfwick mum is both more pleafant and per for the is, that it is excessive dear, a cask being somewholefome here than in Europe; the worst dollars. Among the wines, those of Spain are most in request: its true, they sometimes inflame the gall; but against that they make use of Rubard and Gremor of Tartar. The French and Rheniff wines are not ftrong enough in these hot countries, where the stomach requires more lively cordials, as a little brandy, or a moderate thare of canary. Their

> ordinary food is goats, fleep, fowl, hares, peacocks, and tuch like.

The Hollanders most generally take their afternoons fleep here, as the Italian; and fome other Europeans do in hot countries; a thing fufficiently commendable in the Indies, where the heat of the fun beams invites the inhabitants to pais away the middle of the day (when they are unfit for bufiness) at their ease. They have also a constant custom of washing their mouths after dinner. About three or four a clock in the afternoon they take their tea, and after that a walk; the evenings and nights being pretty cool and very pleafant here, especially when the moon shines. They

fup commonly about feven or eight a clock, Ballden: but very moderately, and go to fleep about ten or eleven upon quilts, feather-beds being Feating. not used in the Indies: but care must be taken bed not to cover well your belly, hips and legs, for hid datase fear of the cramp, especially if you lie exposed to the open air in moon-shiny nights, the neglect of which often proves fatal to the foldiers and feamen, after they have heated themselves with arrak, or other strong li-

Thus much of the manner of living of the Hollanders in the East-Indies: concerning the different clans or families of the Indians, the manner of living, aufterity and prerogatives of the Brabmans, their Vedam failts, marriages, feafts, burials, Mr. Abrabam Rogerius has given to exact an account, that it would be needlefs to repeat them here. The foundation, strength, and magnificence of their Pagodes, especially of those dedicated to Wifnou and E. wara, with their revenues and idols, are likewise most exactly described by the fame author: and among other things, that their Pagodes have no other light but what they receive through a hole on the top; that they are divided into three feveral vaults, supported by stone pillars; the first whereof stands open to all goers and comers; the fecond has two ftrong doors, which are kept open in the day-time, and guarded by a certain number of Brahmans; the third part is always kept close, being the refidence of the idol, before which hang lamps, which never cease to burn. But of the religious worship of the inhabitants of Coromandel, Malabar, and Ceylon, we shall treat more at large in the third part of this treatise.

And fince we have had occasion to speak fo much of the places between the rivers Indus and Ganges, commonly known by the name of India on this fide the Ganges, we must also say something concerning these two rivers. The Ganges exonerates it self the river into the sea of Bengale, called otherwise Sinus Ganga. Gangeticus and Sinus Argaricus by Ptolomey, dividing the most easterly part of the Indies from the western parts; the first whereof comprehend Bengale, Arocan, Pegu, Malacca, Sumatra, &c. According to the opinion of St. Austin, St Jerom, Ambrose, and many others of the antient fathers, the Ganges is the fame which is in the holy fcripture called Pison; but Cornelius a Lapide has fufficiently demonstrated that Pison cannot be the river Ganges, no more than Gibon the Nilus. The general opinion is, That the fource of the Ganges is in the mount Caucasus, as those of the Euphrates and Tigris are in the Armenian mountains; and that of the Nile among the Mountains of the Moon, near the cape of Good Hope, on the African coast; though father Kircher puts the original rife of the Nile in the country of Agaos near

The fource arifes in a plain on the very top of the mountain, furrounded with delight-"Nile ful trees; but does not gather into a rivulet till at the foot of the faid mountain; and being augmented by the accession of divers other brooks, gathers into a lake of thirty leagues in length, and fourteen in breadth. From hence it purfues its courfe, and by various turnings and windings returns near the place of its fource, whence passing through the rocks and precipices, it continues Licellits courfe into the middle of Ethiopia. . Ifaac Vollius derives the rife of the Nile out of no. Gorome, a province of the Abylines, and Emps fays, that among other titles that king makes pencipsule of this, King of Goyome, where the Mile has its rife. The antient Egyptians had to great a veneration for the Nile, that they beltowed the title of the arm of Ofiris upon it: for as the pagans numbered the rest of the elements among the gods, to they had no lets opinion of the waters, especially in the great rivers. Hence it is that the inhabitants near the Ganges call it the heavenly river; and are of opinion, that the waters of that river cleanse them from their fins; nay, those of Bengale are so superstitious in this point, as to carry their fick and dying friends to this river, where they lay them up to the middle in water: and for such as have no opportunity or strength to be carry'd thither, they are perfuaded, that if they wash themselves with any other water, and at the same time think upon the said river, faying, Ganges, purify me, they shall have be cleaned from their sins. + Servius ob-

> perstition; the water of the Ganges being fold among them in bottles at a very good price, as we do our fpaw-waters; and they pay a confiderable cuftom for it.
>
> Hence it is, that the Perfians look upon it as a crime to do one's need into the river, or to throw carrion into it, nay, even to fpit

into it; and that they have attributed fuch

heathens, that the water would cleanfe them from their fins: which feems to agree with

va. what is related of Pilate , and of the Phis-min to rifees and Jesus in general. The Mahome-hat nii tans are, to this day, not free from that fu-

full priling qualities to the waters of many Bestiteus, rivers. When the water of the Nile is carried; in order to be facrificed upon the altar, the people pay their reverence to the vestal that contains it, by profrating themselves upon the ground in the fame manner as the Malabars do to the water of Romelecuro, near the Pagode, called Ramanakovel, to which they attribute likewife a peculiar vir tue of purging them from their fins

Kircher puts the fource of the river Ganges in the mount Thebeth, where, he fays, is a large fea; whehee arife the four capital ri vers of India, viz. the Indas, Ganges, Ravi, and Athec. The Indian pagans deduce its origin from Dewendre, or the heavens; from whence it defeends into the Dewendre Lecon, or fublunary world; and thence into the earth, as may be feen in the beforefaid Abrabam Rogerius. They farther believe, that if they cast the bones of their deceased friends into the Ganges, their fouls will enjoy the blifs of Dewendre for as many thoufand years as the bones remain fingle years in that river; it being their opinion, That though this water has not the power to introduce them to future blifs, yet it is a guide to heaven through the feven fublunary worlds, which they believe every one must pass through before he can enter the heavens. They have each its proper name, but are comprehended under one general name, viz. Dewendre Locon; and among them, that of Bramma Locon, or the place where Bramma governs, is next to heaven a and none are fuffered to enter there, except fuch as are paffed from heaven to the earth, and thence again through the before-mentioned fublunary worlds. It is beyond all doubt, that many, both among the Terus and Gentiles, have affigned certain places for the fouls to dwell in, befides heaven and hell; in which they are imitated by the purgatorymongers, and fuch as believe a feparate place for the antient fathers and innocent children.

Before the river Ganges puts a stop to our voyage, and the description of the places mentioned in this treatife, we must add fomething concerning the Malabar lan-

ASHORT

INTRODUCTION

TO THE

MALABAR Language.

THE Malabars write upon the leaves of the wild palm-trees with iron pencils a their letters are very antient, and diftinguished into, (1.) Short or running letters ; (2.) Long ones ; (3.) Vowels ; (4.) Confonants; (5.) Dipthongs; (6.) Letters used only in the beginning of a word; (7.) Such as are used only in the middle; and (8.) Such as are used only in the end; as will more clearly appear out of the annexed cuts. And feeing that the Malabar letters have hitherto not appeared in publick print, either in Holland or Germany, it will not be amiss to alledge the reasons thereof, and to shew that this language is no less worth our care now-a-days, than the Hebrew, Chaldean, Arabian, Perfian, Samaritan, and other lan-

Buages.

The main reason why the Malabar language has remained fo long unknown to us, is, because that country was not conquered by the Dutch company till in the years 1661, 1662, 1663. from the Portuguese; and it is not their custom to send any ministers into those places, where they are not sovereign masters. 'Tis true, I affished at the sieges of Coulang, Cranganor, Cocbin, &c. and, 1658. at the fieges of Intecoryn, Manaar, Jafnapatnam, and Negapatan; but was immediately after ordered to Pjepbina in the kingdom of Jafnapatnam, where I had the overlight over twenty four churches. During the space of near four years, that I staid here alone, I was fenfible what obstacle the ignorance of the native language was to my good intentions; for though many of the christians here were well enough versed in the Dutch and Portuguese languages, yet some belonging to the more remote churches, who had been but senderly instructed in the principles of the christian religion by the Roman

missionaries were strangely at a loss till I Balders, got a good interpreter, who being well skilled, both in his mother-tongue, the Malabar, and the Portuguese languages, did me great services for eight years together. His name was Francis; and was chiefly with his affiftance; that the fundamental points of our religion, being comprehended in a small treatise, were translated out of the Portuguese into the Malabar language, which has been fince printed, 1671. at Roterdam, by John Borstins. The multiplicity of bufinels in fo weighty a concern as the falvation of fouls, having been no fmall hindrance in encompaffing fo difficult a lan-guage as the Malabar, I was forced to be contented with what part thereof I could attain, and those sew intervals of time I had left, whereof I have given fome specimen in the following pages and cuts. I cannot upon this occasion pass by in silence the confiderations which might induce us to propagate the Malabar language with more care, than has been done hitherto; it being certain, that if our religious worship could be firmly established in those parts, (whereof the knowledge of the language is one of the chief means,) it would be very inftrumental to reconcile not only many of the inhabitants, but also even of the Indian princes themselves to our interest; a piece of policy well understood by Emanuel king of Portugal, when he introduced the Roman catholick religion by the help of the jefuits in the Indies.

I rest your Servant and Friend in Jesus Christ,

Some Rules for the attaining the Knowledge of the Malabar Language.

HE first declension among the Malabars comprehends the nouns only of the Masculine Gender which terminate in the singular number in n, and in the plural in r. They have their singular and plural numbers like us, and name their cases as follows.

The Nominative Genitive Dutiei,
Dative Tritei,
Accufative Cbadurti,
Vocative Panchami,
Ablative Xaßi.

An Example of the first Declension.

Sing. Nom. Vanan, fullo, the fuller of cloth,
Gen. Vananureja, the fuller,

Dat. Vananuew, to the fuller, Accus. Vananer, the fuller, Vocat. Vanane, O you fuller, Ablat. Vananiratil, of the fuller,

It is observed that they have four forts of ablative cases.

- 1. The Localis, as the last mentioned,
- 2. Caufalis, vananale, because of the fuller, 3. Socialis, vananore, with the fuller,
- 4. Comparationis, vananil, in comparison with the fuller.

Plur. Nom. Vanar, fullones, the fullers, Gen. Vananareja, the fullers,

Dat. Vanarcul, vanaruccu, to the fullers,

Accu. Vanarei, the fullers, Voc. Vanare, O ye fullers,

Abl. 1. Vanar iratil, vanar iratile, of the fullers,

- 2. Vannaral, vanarale, because of the fullers,
- 3. Vanarore, vanarorum, with the fullers,
- 4. Vanaril, vanarilum, in comparison of the fullers.

An Example of Conjugation in the Affirmative.

The Prefent Singular Tenfe.

I nan you ni he he avan Vichwadiguirran, I believe, Vichwadiguirran, he believes, Vichwadiguirran, he believes, Vichwadiguirran, it believes, or Vichwadiguirdu, it believes,

The Plural.

we nangal Vichwadiguirron, we believe, you ningal Vichwadivirgal, you believe, M. F. Vichwadirrargal, you they adugal [men or women] believe, N. Vichwadirradu, or Vichwadiguidu, the things believe.

In the Negative.

The Present Singular Tense.

I nan,

δεc.

as before.

We nangal,

Vichwadichren illei, I do not believe it,
Vichwadierei illei, you do not believe it,
Vichwadiezan illei, he does not believe it,
Vichwadiezal illei, they do not believe it,
Vichwadierad' illei, it does not believe it.

The Plural.

Vichuvadicrem illei, we do not believe it,
Vichuvadicrirgal illei, you do not believe it,
Vichuvadicrargal illei, they do not believe it, [Mafc. & Fem.]
Vichuvadicrad' illei, they
[Neut.]
Vichuvadiguid illei, do not believe it,

The present Tense of Honour, i. e. when you speak to persons of quality in the affirmative.

Vichuvadierora, we (our majefty, highness, &c.) do not believe it. Viehuvadierir, you (your majefty, &c.) do not believe it. Vichuvadierare, they (their majefties)

In the Negative.

do not believe it.

Vichwolderon illei, we (our majefty) do not believe it.
Vichwoadierir illei, we — do not believe it.
Vichwoadierar illei, they — do not believe it.

Whence it is evident that the Malubar language is very difficult to be learned; effecially by reason of the vast number of words whereof it consists, one and the same thing being frequently expressed by divers words or names. Thus not only every day in the week, but also throughout the year, has its peculiar name. It is surther manifelt from hence, that the Indians are not so unpolished as some Europeans represent them; and that they treat one another (especially persons of quality) with singuiar civility and respect.

The Imperfect Tense.

Vichuvadierane apo Vichuvadieren, I believed. Vichuvadiereye apo Vichuvadierom, we did believe it.

The Perfect Tenie.

Vichuvaditen, I have believed,

Vichuvaditom, we have believed.

The Preterperfect Tenfe.

A ducu mune vichuvaditay, I had believed, A ducu mune vichuvaditon, we had believed.

> The Future Tense. Vichuvadipen, I will believe, Vichuvadipon, we will believe.

Our Father in the Malabar Language.

DESCRIPTION

Of the Great and most Famous

ISLE of CEYLON.

CHAP. I.

The Situation, Extent, and Discovery of Ceylon,

HE isle of Ceylon (the Taprobana of the antients, according to John de Barros) has got its name among the Portuguese, as well as the other Europeans, from its capital city, called Ceylon, known among the natives by the name of Laukauwn.

This ise extends from the fixth to the tenth degree of northern latitude. Formerly its circumference was reckoned to be about four hundred leagues, though fince that time the fea has washed away about forty leagues on the north-fide of it. In antient times it was questionless (as we shall fee anon in the description of Manaar) annexed to the continent. The figure of this isle represents (according to Maffaus) an egg; but in my opinion resembles rather a Westphalia ham; whence, without doubt, the Dutch fort near Jafnapatnam, has got the name of Hams-Heel.

In Extent. The before-mentioned Maffæus affirms that its circumference is at this time not above two hundred and forty leagues, its length feventy eight, and the breadth forty four. But the Dutch, fince they have been masters of it, after the taking of Columbo 1656. and of Manaar, and Jafna-painam 1658. have more exactly computed its compass to be three hundred and fixty leagues. It has many excellent harbours, cities and fortreffes; and is divided into feveral provinces, as may be feen by the title of the king of that island, who stiles Tolle of the himself Raja Singa, emperor of Ceylon, ting of Ciplon, king of Candea, Cota, Ceytavaca, Dambadan, Amorayapore, Jafuapatnam; prince of Ouva, Mature, Dinavaca, and the four Corles; great duke of the feven Corles, Ma-

tale ; earl of Cotiar, Trinquenemale, Bate- Baldœus. calo, Velase, Vintana, Drombra, Panciapa-The siles to, Veta, Putelaon, Valare, Gale, Belligaon; of dike and marquis of Duranura, Ratienura, Tripane, earl have Acciapato; lord of the sea-ports of Alican, bren intro-Columbo, Negombo, Chilau, Madampe, Cal duced by pentyn, Aripiture, Manaar, and of the fishe-guese. ry of precious stones and pearls; lord of the Golden Sun. All which places, cities, and fortreffes we shall have occasion to treat of

The ifle Ceylon abounds also in excellent rivers, fuch as Chilau, Matual, Alican, Mature, Batecalo, Trinquenemale, and others. It produces various forts of precious stones, and is extremely fertile, especially in cinnamon. Here are also found the best elephants of the whole Indie:

This ifle was first discovered by the Chi-ry by the nese in the following manner: Certain Chi-Chinele. nese having suffered shipwreck, were forced ashore on that island, where they professed their king to be the Son of the Sun. The inhabitants of Ceylon adoring at that time the Sun, as the Malabars do to this day their Efwara, i. e. the Sun, they were so well pleased with their new guests, that they elected the captain of the Chinese Jonke, or veffel, their king; whence the prefent kings Pedigree of of Ceylon trace their origin, and have taken the kings upon them the title of Lord of the Golden Sun, this first Chinese king having stiled himfelf, The much-beloved fon of the always-moving Sun. From this king Lankauw Pati Mabadascyn deduced his origin, who took upon him the name of Well-beloved lord of the whole isle. His fon was Lankauw Singe Madahascyn, i.e. the well-beloved Lion of the ifle ; and after him, his ion Marafinge Mabadaseyn,

Baldaus.i. e. The well-beloved conqueror of the lion. This king left behind him two fons; the first named Lankausv Patti Mabastane, or the eye-apple of the country; the fecond Rad-gora Adafeyn, or, The well-beloved king. These two quarrelling about the succession, falling to the flare of Radgora Adaleyn, and all the rest to the eldest. The posterity of these two kings ruled for a considerable time after, the eldest ion always succeeding before the others. Among these ankauw Patti Mahastane dying in the seventieth year of his age, left a san named Marandonna Madgora, i. e. The conqueror of the eve-apple; who came no fooner to the crown, but he engaged in a heavy war against his uncle by the father's fide, which was ended

at last by a marriage betwixt Marandonna Baldaye Mahastane, the son of Madgora, and Malabande Wandige. They left a numerous iffue of fons and daughters, and among the rest one named Fimala Darma Soria Adafcyn, i. e. The conqueror of the whole kingdom, (born after his father's death,) who no fooner came to age of maturity, but he attacked all the neighbouring princes that refused to submit to his jurisdiction; and having by degrees subdued them all, and established himself in the throne, by the death of all such as had opposed him, he married at last Rokech Wandige, i. o. The beautiful queen, his fifter's daughter, by whom he had a numerous iffue of fons and daughters, from whom the prefent kings are defcended,

CHAP. II.

The first Arrival of the Portuguese in the Isle of Ceylon, under the Command of Laurence d'Almeyda.

WHILST these intestine wars were carrying on in Ceylon, Laurence d'Almeyda, by the command of his father, was imploy'd in cruifing upon the Mabometans, who were then transporting their effects from Malacca and Sumatra over the Maldive islands into Arabia. The Portuthe island, and knowing that it was best fishing in troubled waters, aid turn their arms against it, and after many bloody engagements, made themselves masters of all the places which produce the best cinnamon, which they used to transport in vast quantities into Europe.

Kaja Singa Adafeyn, reigned Adafeyn, in Ceylon. The general opinion is, that he of the Forwas a king's fon, and nephew to the king uguest. of Cora, though I have often heard at T. of Cora, though I have often heard the Portuguese, and some of the Hollanders, say, that he was no more than a barber, who being well skilled in divers languages, and of a warlike inclination, aimed at the crown; and, at last, was so fortunate as to reduce the whole island (after he had killed all the great men) to his obedience. This king being a declared enemy of the Portuguese, he befieged Columbo with a powerful army, and reduced them in a short time to such extremity for want of provisions, that the garrison knowing the governor to be averse to come to a capitulation, they at first broke out into injurious words, and at last refolved (unless they received relief from Goa in a week's time) to kill their officers, and to furrender at difcretion. But the governor being advertised of their design by one of his pages, did all that lay in his

power to keep the foldiers in obedience with fair promife, till the arrival of the fo Columbo long wished-for succours from Goa; which relieved, having defeated the Indian fleer, they forced them to raise the siege.

This Raja Singa Adafeyn having made himself master of the whole kingdom, except Gale and Columbo, forced the emperor Mahadascyn to fly the country; who in his pursuit scattered his treasure of gold and jewels upon the road, thereby to stop the pursuit of his enemies. Raja Sing a being thus become mafter of the empire, conftituted Vinne Lamantia, one of the late emperor's favourites, governor over the highland countries, whose son, named Don John, afterwards obtained the sovereignty. This Vinne La Vinne Lamantia finding himself in a con manta dition to cope with his new pretended mafter, took up arms against him; and having ja Singa brought over the greatest part of the country (grown weary of the tyrant) to his fide, was proclaimed emperor, under the title of Vinne Ladarma Soria, i. c. The deliverer of be Empire.

This war being carried on with various fuccess for a considerable time, the Portuguese got time to breath, and induced Raja Come to Singa to come to a composition with Vinne composition with Vinne composition with Vinne composition with Vinne composition with Vinne composition with Raja Ladarma Soria, offering him the whole singa. treasure he had taken of Mabadascyn, the late emperor, provided he would refign the whole fovereignty into his hands.

Whilst they were treating of the peace, Vinne Ladarma had a fon born him, (who, bearing his father's name, fucceeded him in the empire;) but he was scarce a year old, when Raja Singa, not thinking himfelf feCHAP. IL

Baldaus. condition, that both should marry Portuguese ladies, and the inhabitants take an oath of allegiance to the king of Portugal.

Don John in the mean time feeing Don exalperared at the Politip preferred before him by the Portu-Portuguese guese, conceived a mortal hatred against them, but thought sit to dissemble it, till he should meet with a favourable opportunity of shewing his resentment. With this

intention he took care to have Candy forti-Baldaus, fied fo, as not to fear any thing from Raja Singa, and the royal palace (lately demolished by that usurper) to be rebuilt with more iplendor than before, for the reception of the new king; though at the fame time ne confulted with a certain famous forcerer, how to remove the faid king by poifon, which he effected afterwards.

CHAP. III.

Don John succeeds him. He routs Raja Don Philip poisoned. Singa; who dies foon after. His Secretary Janiere takes up Arms against Don John.

THE Portuguese fearing, not without reason, the approach of Raja Singa, had fortified Gannoor, and fent John de Mele in company of certain religious men to Manaar, to bring them fresh supplies of men, arms, and ammunition to Candy, the inhabitants whereof were all difarmed by the Don Philip usurper, having first introduced Don Philip in great pomp, and placed him in the roy-al palace with the general applause of the

But he scarce tasted the first fruits of his greatness, when Don John (taking the opportunity of the absence of the chief of the Portuguese) got some poison administred to him, which not having the defired effect, he gave him another dofe, which put an end to his life; and by promifes of great rewards, and other inticements, brought most of the inhabitants of Candy over to his fide, who declared him their emperor, and gave him the title of Vinne Ladarma Soria, after his father, mentioned before to have been murdered by the command of

Raja Singa.
The Portuguese foreboding themselves no good from Don John, whom they knew to be their enemy, fent messengers after messengers to John de Mela at Manaar, to represent to him their dangerous state, wherein they found themselves not mistaken: for no fooner was Don John feated in the throne, but he fent a herald to the Portuguese in garrison at Gannoor, who upbraiding them with perjury and perfidious defigns, ordered them in the emperor's name, to quit their posts within five or fix days, which, if they refused, they must expect no quarter. The Portuguese finding themfelves unable to refift his power, and despairing of the defired relief, thought it and forced their fafest way to come to a capitulation she Portu- with Don John, who granted them a free guele and passage with their swords only, being forc'd not only to leave all their booty, but also their

bag and baggage behind them.

The very next day John de Melo arrived with fuccours from Manaar, but too late, whilft Raja Singa was advancing towards Candy, threatening a most severe revenge to the inhabitants of that country. Don John finding himself now destitute of the affistance of the Portuguese, and understanding that his enemy had pitched his tents near Walane, was forely put to it how to cope with fogreat a force; but being obliged either to fight or quit his advantage, he re-folved to engage the enemy, cost what it would: for which reason, having afresh taken the oath of allegiance from the inhabitants, and furnished them with arms, (such as they could get in haste,) he advanced towards them in order of battle. Raya Singa being not a little furprized at his boldnefs, fent him word, That be bad best take Messages warning by bis father Vinne Ladarma So-Don John ria's death; and that in case be resused to submit to bis mercy before it was too late, be must expect no other treatment than to be cut in pieces. Unto whom Don John smiling, fent for answer, That be would take care to Histelius put it out of his power; and if his father had dufwer. been as cautious of bim as be was resolved to be, be need not have come to so lamentable an end; to revenge which be was come to this place; exhorting him at the fame time to implore his mercy before it was too late. Raja Singa was so exasperated at his message, and the aversion he found in the inhabitants of the country, that he declared, He would punish with death all that should oppose bim; and fo ordered his whole army to march to to Donlan, with an intention to furprize that place before Don John could come its relief. Don John, though he knew himfelf much inferior in number, yet refolved to follow him close at the heels; and to put the better countenance on the matter,

Raldaus marched in great pomp, with most : 'endid umbrellos born before him, and fuch other royal enfigns, as the kings in those countries use in their wars. Raja Singa feeing Don John thus bravely advancing towards him, refolved either to vanquish or to die gloriously in the enterprize, could not forbear to break out into these words, Verily Don John is a courageous warrior, and I prefage that one day or other he will afcend the throne. O Raja Singa! where is thy noble boldness? where are all thy great and ambitious designs? where thy fortune which no body could refift! I am afraid of a fudden change: O changeable fortune, why hast thou turned thy back towards Raja Singa, who was

once thy favourite!

Thus the fignal being given, the battel begun, wherein Don John and his forces gave way at first, the better to bear the first affault of the enemy; but afterwards Don John at the head of his guards charged them fo furiously, that (notwithstanding Raja Singa did all that could be expected from a great captain) they were forced to give way, and at last to feek for their fafety in their heels: and fo he returned victorious to Candy, having loft no more than feven hundred men in the whole engagement; whereas thelofs of Raia Singa amounted to above three thoufand, who was so dejected at this defeat, that he struck voluntarily a thorn into his foot, and refuling to have his wound dreffed, it gangrened, and put an end to his days at Stetevaca.

He shewed not the least remorfe upon his death-bed for his cruelties, except those committed against the priests of Daldowanse, This whom he caused to be burnt alive; for being asked by the tyrant, whether the murder he had committed upon his uncle, mother-in-law, and brothers, could not be forgiven, they answered No; Well then (said the ulurper) I am now at liberty to do what I please, and so committed them all to the fury of the flames, except the high prieft, called Tireanco, i. e. God's vicegerent, by the Cingaleses. The priefts of Paraneydeyo, being asked the fame question, forewarned by the disafter of the others, gave for answer, That a person guilty of such a sin could not enter into heaven; but if truly repenting, he might by their intercession he brought to remain betwixt beaven and earth, without being fenfible of they torments of bell. This answer was fo pleafing to Raja, that he dismissed them unmolested, telling them, That he had ordered the priests of Daldowanse to be burnt, because Rija's n. they would make God delight in evil; but you, mule for who make him a merciful God, I will always that adding, look upon as my friends. Just before his death, he fent for the before-mentioned Tireanco, or high-prieft, defiring him to forgive the

siderable presents at the same time; he re-Baldaus. fused the last, but pardoned the crime, and fo returned to Candy, where he died in the hundred and twentieth year of his age.

Don John had no sooner received intelligence of Raja's death, but he put himself at the head of his army, to take possession of the whole kingdom. But the chief secretary of Raja Singa having got all his mafter's treasure into his hands, and thinking himself in a capacity to cope with Don John, got Janiere himself proclaimed king, under the name wswers the of Janiere Wandaar, and at the same time crown. follicited for fuccours by the Portuguese. Neither was it long before Pedro Lopes de Seeks for Soufa arrived from Goa at the head of by the Portwelve thousand five hundred Portuguese, tuguese. besides a good number of Mistices and Indians, which occasioned no small consternation in Don John's army, who had been lately spectators of the ravages committed by those of Gale and Columbo (with the affiftance of the new king) in the Low Lands, and therefore had all the reason to fear so strong a force of the Portuguese ready to join with his enemies. However Pedro Lopes finding the Low Lands laid defolate, (the best of the country,) and consequently promiling himfelf but small advantages by his flay, was for returning to Goa, had he not been opposed by the rest of the officers, who alledged, That the best part of the late king's treasure remained as yet entire at Candy; and that in order to make themselves masters of the whole isle, they must take this opportunity of conquering the petty princes one after another, which they put in execution accordingly. For having partly by force, partly by promifes, brought the kings of the Low Lands, over to their party, it was agreed to affemble a ftrong army against Don John. The Quota's of the feveral princes to be furnished for this expedition was regulated in the following manner.

The king of Cota, fix thousand eight A great arhundred men, four war-elephants, fifty my raifed against Don other elephants, one thousand eight hun- John. dred oxen for carriage, and one thousand Colys, or pioneers. King Janiere Wandaar Ragora twenty eight thousand nine hundred and eighty men, twenty four war-elephants, two hundred others, five thousand oxen for carriage, three thousand pioneers. The kingdom of Jafnapatnam nineteen thoufand nine hundred men, ten war-elephants, forty of the common fort, three thousand oxen, and two thousand pioneers. The king of Cotiar feven thousand nine hundred and eighty men, fix hundred pioneers, one thoufand oxen, thirty war-elephants, twenty five others. The king of Palugan, five thousand eight hundred and ninety men, death of his brethren, offering him conone thousand pioneers, three war-elephants,

Baldaut, and twenty five others. The king of Batecalo nine thousand eight hundred men,
two thousand pioneers, two thousand five
hundred oxen, four war-elephants and thirty
others. The king of Panua, in conjunction
with some other princes, fifty nine thousand
eight hundred and ninety six men, two thousand
one hundred and forty pioneers, fix
hundred and thirty elephants, and sixteen
thousand oxen. So that the whole number
of these forces amounted to one hundred
fifty one thousand and eighty six heads,
among whom were one hundred thirty nine
thousand two hundred and forty six sighting men, and eleven thousand ieven hundred and forty pioneers, seventy five war-

elephants, one thousand other elephants, Baldaus, and twenty nine thousand five hundred oxen for carriage. The quota of the Porsuguese under Pedro Lopes amounted to one thousand four hundred and seventy four Portuguese, one thousand two hundred Missies, and one thousand two hundred and twenty four Indians, forty seven war-elephants, nine hundred and forty five others, and nineteen thousand nine hundred oxen.

The first thing they took care of was to secure their retreat, by erecking three forts, called Manikeroweri, Mapati, and Gannatari; which done, they directed their march with their joint-forces towards Candy.

CHAP. IV.

Don John draws out his Forces against Janiere and the Portuguese:

Attacks them with Success; but is routed at last. Donna Catharina declared Empress. Janiere murdered.

O N John having received intell gence of their march, was put to a great nonplus what courfe to take in this exigency of his affairs, his whole army confifting of no more than betwixt thirty and forty thousand men; but knowing them to be resolute and intirely devoted to his interest, he kept as close to the enemy as possibly he could, and in several engagements got the better of them; till at last being attacked with incredible sury by the Portuguese, they put him to the rout, and took the city of walane, with the loss of forty nine men only on their side, killing above fifteen hundred of the inhabitants; which struck such a terror into the rest, that the whole country submitted without the least opposition, except Dolleswagge, which they were not able to take.

Don John not being able to rally his fcattered forces, retired with his empress into the woods and deferts, where they were forced to feed upon herbage for some time; and the Portuguese being now masters of the country, required the Cingaleses to own the king of Portugal for their fovereign lord. These on the other hand desired that Donna Catharina, the daughter of Mahadascyn their legal emperor, might be brought from Manaar, and declared their empress. Don Pedro Lopes being well enough pleased with this proposition, yet willing to consult with Jamere about the matter, he found him not averse to it, his intention being to marry her with the confent of the Portuguese, who had underhand promifed the fame as a reward of his fervices done to them.

Accordingly a numerous train and fplen-

did equipage was sent to bring the new em-Donna Capress to Candy; but one of the ships sound-thanaring at sea in a storm, one hundred and sitty brught soldiers, a great number of slaves, and two from Machels with money were lost with her: one Portuguese and two negroes only had the good fortune to escape of the whole ship's crew, who heard the captain of the ship, whose name was Percre, take his last strewell in these words, O brave Percre, is it a Pontathus thy state to be swallowed up by the seas species but since it is God's will, patience: Christ re-shops.

In the mean while all imaginable preparations being made for the reception of Donna Catharina, she was preparing for her departure from Manaar: as she was carried along in her litter, or chair, one of the poles of cane happened to break, which the new empress looking upon as an ill omen, she cried out aloud, Stop, stop, do not carry me any further, suprflivfor this portends some great misfortune. Un-one to which the governor of Manaar, who at-na Cathatended her person, replied, May it please your rins. majesty, we ought to consider that we are no beathens but christians, and must therefore despise such superstitions; God will be the sup-porter of you and your cause. Then the empress bid them take another pole, and soon Leaver after embarked with a fair wind, which Manar. carried her in eight days to Candy.

Here she was met by Pedro Lopes, the Portuguese general, and several of the Cingalese kings and princes, attended by a great number of nobles, who paid their reverence (according to the custom of the country) by laying their faces stat upon the ground: this they call Sambaja. The empress

Pedro Lopes, the everal of the Cinttended by a great paid their rever-ftom of the counes flat upon the nbaja. The empress

Bidens, arising out of her litter, returned them hearty thanks; and returning to her litter Herror- was accompanied into the city by Lopes and the before-mentioned princes with incredible pomp, and under the general acclamations of the people, who were infinitely pleafed with the gold and filver that was thrown among them as the cavalcade marched along; which was fo fplendid, that the whole charge thereof amounted to one million nine hundred thousand livres, the remnants of the treasure of the late deceased usurper, Raja Singa Adascyn. Donna Catharina, after having rested herself from the fatigues of the voyage for three days, was crowned with the usual folemnities, and put into possession of the empire.

About that time Don John came in the similar dilguise of a beggar into Candy, where he bigar, fet feveral houses on fire, in hopes of firing the whole city, but was frustrated in his defign, the fire being always quenched in good time, though it often broke out in divers places at once.

The Portuguese suspecting the matter, agod offered a reward of ten thousand Pagodes (twenty thousand crowns) to any that could take him dead or alive; which made Don John defift from his enterprize, and to return to his defert.

The Portuguese finding themselves now Vol. III.

in the quiet possession of the country, were Baldans, no longer able to difguife their natural vices, their pride, avarice, and infolence; which occasioned frequent complaints to the empress, but without redress; which obliged the inhabitants to enter into an affociation to deprive them of all subsistence, by cutting off their supplies of provisions. This obliged the Portuguese general to send, in con-junction with king Janiere Wandaar, two thousand Cingaleses and one thousand Portuguese, to the dukedom of Ouve, and two thousand Indians, and two hundred Portuguese to Halalmia beyond Candy, to fetch in rice and other provisions.

The Portuguese foldiers, though they were They come very well received by the inhabitants, yet mit great did they commit all manner of infolences in their quarters, even to the ravishing of their wives, killing their children, and fetting their houses on fire; so that the Cingaleses finding tnemfelves in a worse condition now than they were under their tyrannical emperors, entred into a conjuration to kill the Portuguese at a certain appointed time.

In the mean while Janiere follicited the Portuguese general Lopes, for leave to marry the empress Catharina; which he handsomely denied, alledging, that he could not confent to it, without special ord i from the king of Portugal; but that he would write

John

Raddeus, to the king about it. Janiere looking upon this only as an excuse, defired to let him marry his fifter's daughter; which being likewife refused by the general, Janiere conceived from that moment a mortal hatred against the Portuguese, and could not forbear to tell the general, That be did not exse Portuquele and Pell to have met with fuch a rewa. I for the fervices be had done them, swearing that they should have occasion to repent it. The Portuguese being somewhat exasperated at this un-expected reply, told him, That he ought not to take it amis, if he denied him what was not in his power to give, viz. Donna Catharina, the legal heiress of the empire, to him who had usurped the title of a king, merely by being got into the possession of the treasure of Raja Singa Adaseyn, but that he should be very ready to serve him upon any other occasion. Janiere being put out of all patience by these insulting Wasses, replied fmartly, I am fenfible of your design; you that came here as strangers, now you have got your ends through my means, are the first who would tyrannize over me. Then recollecting himself, he began to turn the discourse, diffembling his resentment; but the same night dispatched a letter to Don John in the desert, wherein he advertis'd mitague him of what had paffed betwixt him and the Portuguese general, offering him the empire, provided he would receive him as

king of the Low Lands; which Don John Balden approving of, they entred into a confederacy to rid their hands of the Portuguefe.

Things being thus fettled, Don John began to appear among the Cingaleses (already much exasperated against the Portuguese) reprefenting to them the danger they were in, and how he was refolved, in conjunction with Janiere, to drive them out of the island, which they readily accepted of, promifing all the affiftance they were able to give. But as Janiere sent frequent letters to Don John, it happened that some of them fell into the hands of the Portuguese, who being thereby fully convinced of the defign carried on against them, begun, not without great reason, to fear, that unless they confented to the marriage of Janiere with Donna Catharina, they would fcarce be able to maintain themselves in the isle.

A council being called for this purpose, The Porte-they were much divided in their opinions, guest sufome being for confenting to the marriage, Julie Alend to prevent farther mischief, and to have Don John murdered; whilst others were for hazarding all, rather than to confent to the match, and to have Janiere murdered, under pretence that he had laid a defign to murder the empress and the general; for which purpose some forged letters were to be produced, to justify their conduct.

CHAP. V.

The Portuguese leave Candy; are routed by the Cingaleses. The Empress taken Prisoner. Don John becomes Master of the Empire; Marries Donna Catharina. Jeronimo Oriedo deseated.

DON John was not wanting to turn the hatred of the people (which must needs ensue upon so barbarous a fact) to his advantage, and to represent the perfidious defigns of the Portuguese in the worst colours, offering them his assistance against these foreigners, as he had done before against Raja Singa; which succeeded so well, that they resolv'd unanimously to side with him, in order to drive them out of the country.

The Portuguese having received intelligence of the great preparations made against them, and that Don John was advancing with his army towards Candy, began now, but too late, to repent of the murder of Jamiere; and seeing their ruin at hand, unless they took timely care of their safety, they retreated from Candy to the fort of Gannoor, whence they sent to Columbo for relief. The Cingaloses having got notice of their slight, pursued them for closely, that many of them sell into their hands, especially of those detachments sent to Goa and Halalmia for provisions, slifty whereof they sent back with their ears, noses, and privy parts cut off, in revenge of the ravishments semmitted upon their wives and daughters.

The Portuguese were so terrify'd thereat, that finding themselves destitute of all hopes of relies, they resolved likewise to leave

Gannoor, and to retire to Walane, which they put in execution in 1590, on a funday; and the better to cover their flight, or at least to divert the Cingaleses from purfuing them, fet the circumjacent country on fire. But these preferring their revenge before all other considerations, followed them at the heels, and attacked them most furiously in four several parts at The Portaguese defended them-And rous felves most courageously; but being over-id. power'd in number, were forc'd to give way with the loss of many of their best iol-Pedro Lo-diers, either kill'd or taken prisoners, a per and D. Cathamong whom was the Portugueje general Lopes rina takin and Donna Catharina. The general died Prijoners. within three days of his wounds, after he had recommended his ion to Don John's care, who was afterwards by him (purfuant to his promise) sent to Cel mbo.

The Indians got a confinerable booty, befides a vast quantity of arms, cannon and ammunition, in this engagement; and Don John pursuing his victory with the utmost vigour, made himself master of all the forts belonging to the Portuguese; some by affault, the garrisons whereof he put to the sword; some by composition, which was punctually observ'd. All which struck such an amazement into the circumjacent kings

and

Baldeus and princes, that they appear'd in person Don John having been engaged with the Poringness. reflered to brought him confiderable prefents, and did the King. him homage with the usual folemnity of proftrating themselves with their faces to

Marries D. Catha-

Being thus fettled a fecond time in the throne, he thought it the fafeil way to fecure himself of the fidelity of his subjects by marrying Donna Catharina, (the being then but twelve years old,) which was celebrated with great folemnity for one hundred and ten days fucceffively a notwithstanding which the charges thereof did not amount to above five thousand Pagodes: but the prefents beflow'd upon many of the nobility (to reconcile them to his interest) to no let's than nine hundred fixty eight thousand seven hundred firty four Pagodes, four million eight hundred fifty nine thousand five hundred thirty eight Dutch guilders, making the fum of one million nine hundred forty three thousand eight hundred and fifteen rixdollars. His next care was to firengthen his frontiers by three flrong forts; and he built himself a palace, surrounded with feveral bulworks, wherein he imploy'd the captive Portuguese; who, to their great grief, were forc'd to see their ensigns display'd upon the towers of their enemies.

Don John having for some time enjoy'd guele Generonimo d'Oriedo was fent in the quality of Portuguese general to Ceylon, with a considerable number of land forces, compos'd of Spaniards and Portugueses, brought thi-

ther from Coa and other places on the Indi-Baldens an coast. Having by great presents brought over to his fide most of the princes of the Low Lands, he order'd feveral forts to be erected to ferve him for a retreat upon occafion. Don John was fo far from annoying his men in perfecting these fortifications, that he feemed to despite it, faying, Let them go on, I will find a way to pull down as last as they can build: but understanding that the Portuguese were advancing towards Walane, in order to surprize Candy (where they intended to creek a strong fort betwixt Triquenam and Palugan, to bridle the country) he attacked them in their march; fo that a most furious battle enfu'd, which re-tirmith main'd dubious for fome time, the Portu-D. Among their wounded was Oriedo the general, who was oblig'd to king Cota for his liberty, he having concealed him in some retired place, without which he had infallibly fallen into the hands of the Indians. Thefe, though not a little tired, with fo long and troublefome a purtuit, yet in their return made themselves masters of the new Portuguese forts, and cutting the garifons in pieces, laid them level with the ground. This victory prov'd fo confiderable to Don John, that during his life Oriedo either durft or could not attempt any thing further against him.

CHAP. VI.

Dominico Corré goes over to Don John: Befiges Gale, but is repuls'd. Simon Corré returns to Columbo. The Portuguese miferably massacred. Joris van Spilbergen comes to Ceylon.

Dominico Corre de-

Portu-

A Bout that time Dominico Corré, a re-nown'd foldier (known by the name of Goliab) being disoblig'd by the Portuguele, came over to Don John, having first cut off the nofes and ears of feveral monks who had offended him. He also enticed Corke Bandaar, a revolted prince, into Don John's camp, who caus'd him to be tormented to death, and bestow'd his principality upon Dominico Corré, to whom they gave the name of Idel Soria Bandaar. Whilit he was doing homage to the emperor, a very large tree that flood hard by, split in two pieces, without being touch'd; which the inhabitants (a superstitious generation) interpreted as an ill omen.

CHAP. VI.

There was nothing to be heard among them but, Kill the dog, kill bim, whilst Jeronimo d'Oriedo cry'd for mercy. Notwithstanding which, a whole troop of them were advancing with their drawn fwords against him, and had certainly killed him upon the spot, had not fome monks thrown themselves (to their no finall danger) betwixt him and them; and fpeaking to the foldiers, calling them gentlemen, and begging them for the love of chrift, not to act against the crown of Portugal in the perion of their general, appeafed their wrath ; though even then the general was forced to hide himfelf in a convent, till the tumult could be entirely appeared, which was not till fixteen days after.

Notwithstanding the barbarous usage Do-Conegon minico Corre had met with from the Portuquele, his brother Simon Corré went over to them, pretending to the emperor that he intended to advance towards Columbo to revenge his brother's death. He was very honourably received by the Portuguese, who not only bestowed the government of a province upon him, but also marry'd him to a Portuguese lady, whom together with his son (begotten in this marriage) they kept as pledges of his fidelity, whilit he was imploy'd in carrying on the war against Don John. However, having got intelligence that the Portu-

guefe had formed a defign against the life of Baldans. the faid Don John, he gave notice thereof to him, defiring him to be upon his guard.

The emperor being willing to be fully fatisfy'd in a matter of fuch moment, applied himself to one Emanuel Dias, who being formerly a foot-boy to the Portungefe general Lopes, was advanced by the faid Don John to the dignity of one of his gentlemen of the first rank, and had received many other favours at his hands. Emanuel Dias, willing Emanuel to contribute what lay in his power to his Diaspermatter's fatisfaction, proposed to go to Co-tends to lumbo, under pretence of having deserted his to the Porfervice, but in truth to dive into the real de-tuguefe. fign of the Portuguese. Accordingly he arrived at Columbo on easter-day in the year 1602, where he proposed to Don Teronimo Oriedo feveral ways of murdering Don John; and that with fo much affurance and feeming probability, that he was highly carreffed by that general, who agreed with him concerning the method how the defign should be put in execution. For this purpote five Portuguese were pitched upon to thare the danger and glory of fo brave an action, (as they stilled it,) among whom were three captains, viz. Christian Jacobo, Alberto Primero, and Caspar Perere. Emanuel He deceives Dias being promised no less a reward than she Portuthe crown of Candy, play'd the hypocrite fo guele. artificially, that he took a folemn oath up-

Vol. III.

Baldaus, on the crucifix to be true to his trust; and of he was difmissed to Walane with a good fum of money, from whence he returned to Candy.

There he gave an account to the emperor how measures had been concerted betwixt Don Jeronimo and him; That a certain body of troops should be posted near the fort of Walane, to be ready at hand to surprize that place as foon as they hould receive the fignal of the murder of the emperor being put in execution; for which purpose those who had undertaken that task were within a limited time to appear near Candy. Hereupon the emperor advanced fecretly in the night time at the head of a good body of troops to Walane, where the before-mentioned accomplices appearing according to agreement, well armed with Japonese scymetars, called Trassados, they were kindly received by Emanuel Dias, and introduced into the emperor's presence; but soon after were seized by his guard, and the fignal given at the fame time from the fort of Walane. So that the Portuguese believing every thing to have fucceeded according to expectation, advanced with all possible speed towards the fort, where they questionless would have met with fo warm a reception, that few of them would

have returned home, had not a certain Ser- Baldaus. vant, who had deferted from the enemy, discovered the whole matter to them; which made them retreat with all speed towards Columbo, leaving all their baggage and fome arms a prey to the enemy. Emanuel Dias got a vast reputation by this bold enterprize, and was rewarded with vast prefents by the emperor; but the five Portugueses were after a long captivity put to a most painful death. Joris Spil-

About this time the Dutch general, Joris bergen Spilbergen, coming with two ships on the coast Ceyloa. of Ceylon, went to Candy on purpose to salute the emperor in the name of the states of the United Provinces, and his excellency prince Maurice of Nassau; and was favourably received by Don John, and difmissed with considerable presents. Having left Erasmus Martens and Mr. Hans Pempel, two very good muficians, there, he returned highly satisfied, September 3, 1603, by the way of Metecola to Acben. But the 1603. Portuguese were not a little distatisfied at his arrival there, as fearing that in case the Dutch should enter into a confederacy with the emperor, their stay would not be long in that island; which proved true afterwards, they being quite chased thence in the year 1658.

Sebald de Weert comes to Ceylon. Great Dissatisfaction betwint the Emperor and him. Is murdered. Don John falls fick, and dies: His Qualifications.

Sebald de Weert somes te

Difference

SEbald de Weert and Vibraads van War-wick came foon after into Ceylon, where they entered into agreement with the emperor. Afterwards they failed to Achen to affemble more forces, and landing at Matecola with seven ships the 26th of April, 1603. De Weert gave notice thereof to the emperor, who defired him to come and put an end to the conferences begun before for the confummation of the treaty. De Weert coming into the emperor's presence, was asked by him why he had fet the Portuguese prisoners at betwine the liberty; which, as it had been done unadvifedly, so he made the best excuse he could upon that fcore; which being not fatisfactory to the emperor, caused in him no small sufpicion; the fame was much augmented by Is any more, what his ambassador (who had been with the ed by she vice-admiral De Weers at Achen) related to him, that during his stay with the Dutch he amba gader, could not observe but that they were friends of the Portuguese, whereof they had given fufficient proofs, when they fet the Portuguese officers, that were their prisoners, above him at the table. He further added, that

he had received information from credible hands. That the vice-admiral intended to invite the emperor and the chiefest men of his court, aboard his vessel to a banquet, but in effect, to detain them prisoners, and make themselves masters of the country: That he had thought it his duty to give this caution to his majesty, that he might not trust the Dutch, and thereby with the rest of his princes be drawn into the fnare, to the irreparable ruin of the whole country.

Don John finding the ambaffador's reafon's not to be ill grounded, and having conceived no small jealousy at the vice-admiral's discharging the Portuguese prisoners, contrary to his promise, it was debated in council, whether they ought to treat with him any further, or break off the treaty already begun. After various deliberations, it was agreed to endeavour to perswade the vice-admiral to fail with his fleet to Gale, in order (according to mutual agreement) to beliege that place, whereby they would not want opportunity to judge of his conduct in referrence to the Portuguefe.

Sebald

weus. Sebald de Weert soon after invited the ~ emperor aboard his vessel; which he rewest fused, alledging, That the chief men of the empire did not approve of a thing never known before. De Weert feeing the emperor resolute in his refusal, defired him to do him the honour of coming only to the fea-shore to view his ships; and that he had ordered a tent to be pitched there for his reception. The emperor not only refused also this offer, but his suspicion was increased, the before-mentioned ambaffador, whispering him in the ear, Are you now fensible, my most gracious Lord, that I was in the right, and that they intend to catch you in the fuare? And the Dutch vice-admiral De Weert being not a little diffurbed at fo flat a denial, told him frankly, That since his Majesty did not think fit to come either aboard bim, or at least to the Shore, he was refolved not to fight for bim against the Portuguese. Don John, though not a little exasperated at so bold a reply, yet dissembled his Anger, telling him only, That he should, pursuant to his

promife, fail to Gale with his fleet, whilft he Baldaus. would take a turn to Candy to vifit the emhaving taken a journey to the frontiers; and that from thence they would hasten with all their forces to the fiege. Sebald de Weert being somewhat heated with strong liquor, replied undiscreetly, That certainly the em- De Veen press could not be in distress for a man; and speaks with that be was resolved not to fail to Gale, or to boldress. fight against the Portuguese, before the emperor had done him the honour of viewing his ships. Don John, who was naturally a cholerick person, was so incensed at this answer, that he left the room, and in going out faid, Bind the dog: whereupon four of his gentlemen advanced to lay hold of him; but he endeavouring to draw his fword, and making a noife to call his attendants to his affiftance, (who were left near the fea-fide by the emperor's order,) they laid hold of him Which from behind, and one of them splitting his proves the head with a scymetar laid him dead upon bis death, the ground.

The prince of Ouve being the only perfon who durft give an account to the emperor of what had happened, he appeared fomewhat diffurbed thereat, asking him, Why they did not make him a Prisoner, according to his order. Whereupon the prince telling him, that it was impossible to be

done, because he stood upon his desence, Don John replied, Nay, since be sought for and of his bis death, let him have it, and let his Attendants dants follow their Master; which was put in execution immediately, scarce any one of those that came ashore with him escaping the sury of these barbarians, except a boy, Baldeus. named Isaac Plevier, a native of Filsingen,
who was still alive, and in the then emperor's service, Nov. 22. 1614. Some sew
also had the good fortune of escaping by

fwimming to the ships.

The emperor foon after went to Candy, from whence he writ these few lines in Portuguese to the commanders of the Dutch vessels; Que behem vinho, noa he hon. Deos fes justitia; so questeres pas, pas; sequires guerra, guerra: h. e. Who drinks wine is not good: God shews his justice: If you desire peace, you shall have peace; if war, war.

Don John However Don John, did not survive long fall site of this barbarous action, being seized with so warning

However Don John, did not survive long of this barbarous action, being seized with so violent a burning sever, that to cool himself he was kept in cold water, without any relief: He also drunk frequently of the water of the brook called Hal Graduje, betwict Ouve and Matarette; which being so cold, as not to be held in the mouth without shivering, yet could not in the least quench his thirst. He often bewailed the barbarous murder of the Dutch, but said that De Weert had no more than what he deserved. Thus languishing for some time in continual agonies, he was in no condition to dispute of his affirm, but ended his life in mistry, 1604. He set behind him one son, named Mahassimus Adascyn, and two daughters, one named Soria Mahassascyn, i. e. Beloved Smalight, the other Cather Adascyn, i. e. Beloved Pauses; all three born from Doma Catharina, called by the Cingalese Mahabandige Massascyn, i. e. Beloved Empres.

as his whole life fufficiently testifies: He was Baldeus tall of stature, and well-limbed, black, and rustical in his speech. He had gathered a Hin Chavast treasure of gold and jewels, and had radio. founded many forts, palaces, and publick-inns, called by the Cingalese Ambolan, i. e. Resting places. He kept a strict hand in the government; and as he never pardoned crimes, fo he was very liberal to all fuch as behaved themselves well in their civil or military stations, on whom he conferred honours and riches. He was a compleat flatefman, and stood firm to his engagements with all foreign princes, except the Portuguese; upon whom looking with a jealous eye, he had conceived a mortal hatred. As he despised all religions, so he allowed the free exercise thereof to all without distinction.

The corps of the deceased emperor was bright no fooner interred with extraordinary magni- small finence, but the great men of the kingdom finence, but the great men of the kingdom finence, but the great men of the kingdom of the kingdom finence of ouve, who publickly fet up for the empire, but was opposed by Cenuwierast, brother-in-law to the late emperor, who pretended to be regent for his nephew, (his brother's fon,) till he fhould come to age of maturity. Donna Calbarina well forefeeing the ill confequences that might ensue upon those pretensions, declared herself regent of her young fon, and by taking off the heads of some of the most full prefeed lords, removed the prefent danger, and appealed the troubles that threatened

her ruin for fome time.

CHAP. VIII.

Divisions among the Great Men in Ceylon. The Prince of Ouve murdered by Cenuwieraat, who marries Donna Catharina the Empress.

of Dan John, fent messengers after messengers to Goa, to advertise the viceroy of this welcome news, and to desire his advice in this juncture. The said vicesoy being of opinion, that they ought to engage from alliance with Donna G. barina, (as a mosan to make themselves masters by degrees of the whole ifle,) the same was proposed accordingly; but rejected by Donna Casharina, who told them, That she would remain sovereign mittress in her territories, However the princes of the Low Lands being forely oppressed by the incursions and ravages committed in their territories both by the prince of Ouve and the emperor's brother-in-law, hearkened to the enticements of the Portugues, and entered into a confederacy with them.

The empress being not a little disturbed at these intestine commotions, stearing the should be facrificed to the prevailing party, called a general affembly of all the lords of the empire, who all appeared accordingly in person, except the prince of Ouve and Ouve and Considerate at alastyn, who thereupon were by Considerate at alastyn, who thereupon were by considerate at the empress, appear a and their estaces conficated. Catharina: but Cenuwieraat having got feent of this defign, refolved to be beforehand with him; to accomplish which, he difurbed his thoughts, shewing to the prince of Ouve upon all occasions most singular marks of his respect and friendship. But having in the mean while itempthened his interest, by ingaging most of the great men to his side, he took his opportunity, when they were both going to take their leave of the empress: for coming at the outward gate, the prince of Ouve would have given the precedency to prince Cenuwieraat, as descended from the imperial blood; which he refusing to accept of, told him, That it was his due, by reason of his age: so that; after some time spent in compliments, prince have went in first, and was instantly in though the back, and laid dead upon the ground by Cenuwieraat, who said no more than, Traitor, thou hast thy reward; and so retiring to his people, left the city immediately.

immediately.

Those belonging to the prince of Our hearing of the murder of their master, run hearing of the murder of their master, run image through the streets, crying out, Treason, Treason; which put the city into such as alarm, that the people (believing the empress was killed) cut all to pieces they met with, so that the streets were every where filled with horror and slaughter; which would have continued longer, had not Donna Catharina, by shewing herself to the people, somewhat appeased their sury. However, they not ceasing to exclaim, and uttering most horrid threats against the prince of Cenuwieraat for the murder of prince Ouve, the empress, to prevent surprise ther mischief, thought it her safest way to prohibit, under pain of death, that any injury should be done to prince Cenuwieraat, declaring that what had been done was by her own orders; which somewhat settled the minds of the people.

But her thoughts were very different from what the shewed to the people, having conceived such a horror at the fact, that she resolved not to let it go unrevenged upon the prince Cenuwieraat. He being advertised hereof by his friends, kept constantly upon his guard, not neglecting in the mean while

to have it represented to the empres, (not Baldaus, without good reasons,) that he had been forbed to undertake this fact for his self-preservation, and the welfare of the kingdom, nat clear, her majesty, and his brother's children; it impelf, which had so good an effect upon the empress, that by the mediation of certain great Maria the men, a match was concluded betwirk the empress and him, as the most proper means to restore tranquillity to the empire. At his coronation he took upon him the name Camapati Mabadastyn.

He no sooner saw himself established in

He no fooner saw himself established in the throne, but he applied himself to the Hollanders, in order to enter into an alliance with them against the Portugues, as will appear out of the sequel of this his-

CHAP. IX.

Letters from the States-General of the United Provinces and Prince Maurice, sent by Marcellus de Boschhouwer to the Emperor of Ceylon.

THE letters from their high and mightinesses and his highness the prince of Orange to the emperor of Ceylon, were

Most Potent King!

The Letter "That pleased the almighty God, of the through his mercy, so to bless our hater greater "arms, taken up for the maintaining of the ratio the rights and privileges of our native counempirer of rights and privileges of our native counempirer of try against the king of Spain and Portutry against the king of Spain and Portu-" gal, that after a bloody war carried on " forty two years fuccessively both by " fea and land, the faid king being con-"vinced of our unanimity, power and conflancy, supported by the itrength of our
friends and neighbouring allies, has " thought fit to make us the fame offers, for which we had been obliged to com-" mence a war, viz. to declare us a free 66 people, independant from his power; " and that he was inclined to enter upon a treaty of peace or truce with us for a con-" fiderable number of years. Which offers (after mature deliberation) having been accepted by us, a treaty was fet on " foot accordingly with the faid king of " Spain and Portugal; which being brought " to a conclusion the oth of April last past, " a truce was agreed upon for twelve years " next enfuing; by virtue whereof all the subjects of this state are not only at li-· " berty to carry on their traffick, commerce, " or navigation, in all the kingdoms and " countries where they used to enjoy the "fame before the war, but also in all other countries, kingdoms, or princes, 44 and with all other nations or provinces, without exception; and with this provifo, That neither the king of Spain and " Portugal, nor his officers and subjects, shall, in respect of this traffick hitherto " carried on, or to be carried on for the tuture, moleft or be troublefome (either " directly or indirectly) to our subjects, or "those belonging to any king, prince, or other superior power, with whom we have any commerce; and that your majetty, as well as all other kings, princes, states, and nations, as well in the Indies as in other parts, shall be comprehended " in the faid twelve years truce, and not 66 be molested or attacked on account of 66 their friendship and commerce with us.

But if (contrary to our expectation, and Baldeus, the folemn promise made by the king of Spain and Portugal, confirmed by his hand and feal) it fhould happpen that your majefty's fubjects and countries fhould be involved in any troubles with the faid king, either by fea or land, by reafon of their friendship, alliance, or commerce with us, your majesty may rest assured, that we shall want neither will nor power, neither ships, ammunition, nor forces, as well of our own, as of fuch other kings and princes our allies, as are guarantees of the faid treaty, and have engaged to fee the fame executed in all its particulars, and confequently in respect of your majesty's dominions, as well as of all other countries and dominions, both in the Indies, and elsewhere, to protect and defend your majesty's dominions and subjects against all aggressors, who upon that account shall molest them. We do not doubt, but that fome of the king of Spain and Portugal his creatures and officers, will be apt to infinuate in-to your majefty, his subjects, and other kings, princes nations, and republicks, a quite different fentiment of the faid treaty. But we affure your majesty by these presents upon our faith, without any tergiversation, unto which your majefty and fubjects, and all other kings, princes, nations, and states, may give entire credit, and desire that your majesty will be pleased to rely upon it accordingly, to the firm fettlement of a mutual and good correspondency, navigation, and traffick, betwixt our fubjects; we on our fide will not be wanting to entertain the same with the utmost sincerity, confiding in the omnipotent God, the king of kings, who knows the depth of the hearts of men, that he will be pleafed to take both your and our fubjects into his protection, and increase their well-being through his power and mercy. Dated in the Hague, Sept. 15. 1609.

Mest Potent King!

man " OD protect your majefty, and give you all the bleftings upon earth. uners the ce We have for a confiderable time been engaged in a war against the king of " Portugal, in order to oppose his ambi-" tious defigns, the fame motive having " induced your majesty to defend your do-" minions against his attempts: the Al-"mighty God has been pleased to bless " our arms with fuch fuccefs, as to oblige our enemy to a twelve years truce; which, by the mediation of feveral neigh-" bouring kings, has been brought at laft " to a happy conclusion: but finding that
the faid king did continue his warlike
preparations, and imagining that the " fame was intended chiefly, in order to tack your majesty and some other princes " in the Indies, our allies, (after being be-" reaved of our affiftance,) we thought it " absolutely requisite, not to agree to the 44 faid truce, unless your majesty were in-"cluded therein, together with the rest of our friends and allies. Whereupon the fame was concluded at laft, under con-" dition, That we, and all our friends and " allies, should enjoy full liberty to fend " our fhips into what countries we plea-" fed, without any molestation from the " Portuguese; and that in case your majefty, or any other of our confederates, " should be attacked by him, we should " deem the fame as done to our felves: to accomplifh which we shall be rea-" dy upon all fuch occasions to be affif-" tant in revenging any damages done upon "that score to your majesty, or any other of our allies. We have some reason to " suppose, that the intention of the faid Baldaus. king is, to separate by this artifice your majesty from our interest, which ought to be a mutual caution to us, to be upon our guard for the future; for fince the occasion of dividing us by force of arms is removed, they will not be sparing to attain to their end by fraud and other finister means. It is therefore, that we have ordered our governor-general to treat with your majesty, and to find out fuch means as may be most proper to prevent their intrigues, and to unite us against those whose word and faith we dare not altogether rely upon. We did not think fit to stipulate in the said treaty, that his subjects should be ex-uded from the traffick of Ceylon, but left the same to your majesty's discretion,

not questioning, but that according to your wifdom and understanding, you will act in that respect, so as that nothing may be transacted that may tend towards the diffolution of our alliance; which we hope the almighty will maintain by his

bleffing, to the honour of his holy name, and the welfare of your majesty, and our beloved subjects."

Dated in the Hague Octob. 5. 1609.

Maurice de Nassau.

The fuperscription was as follows:

"To the most illustrious and most noble emperor of Ceylon, king of Candy, "Trinquenemale, Jafnapatnam, Sette-"Corles, Manaar, Chilaw, Cota, Ba-" tecalo, Punte-Gale, our beloved bro-" ther in the wars.

These letters were no sooner brought in the Greybound yacht to Goromandel, but the director of our East-India company there, named John van Wesick, ordered immediately Marcellus de Boschbouwer, our Marcellus under-factor, aboard the ship called the Boschhou Black Lyon, to Ceylon along with Peter wer font to Both, a native of Amenfort, commodore, Ceylon. bound likewise for that island.

CHAP.

Marcellus de Boschhouwer comes to Candy. His Treaty and Agreement with the Emperor of that Isle.

Marcellus de Boschbouwer coming ac-cordingly, March 8. 1612. to Candy, had audience of his imperial majesty Cenuwieraat Adascyn, unto whom having delivered the before-mentioned letters, the emperor received him with all imaginable demonstrations of joy, placing him on his fide on a chair of gold, clad in a white garment: whereupon the treaty being begun, immediately the fame was concluded May 11, following, upon the following conditions.

I. This confederacy shall be kept inviolably, and fland firm for the future.

II. All hostilities shall cease, and a general amnesty be granted.

Baldaus. III. In case the Portuguese should attack his majesty, the states-general shall be obliged to assist his majesty with all their

> IV. His majesty grants leave to the Dutch to erect a fortress at Cotiarum, provided the king of Cotiarum may enjoy his customs and other revenues.

V. The emperor obliges himself to furnish bricks, lime, and other materials, for the building the said fortress, as also labourers, to be paid by the company.

VI. His imperial majesty shall take care to have ware-houses of stone or brick erected at Candy, for the fecurity of our company against fire.

VII. His majesty shall take our ships and seamen under his protection, and defend them to the utmost of his power against the Portuguese, as the Hollanders shall be obliged to do the same, in respect of his ma-

jesty's subjects.
VIII. His majesty obliges himself to transact nothing in all military affairs that have any relation to our company, without the knowledge of their officers; for which purpose two Hollanders shall sit constantly in his council of war, to be present at all debates, and other matters to be transacted

IX. He engages himself to have all the merchandizes of the Dutch carried upon beafts fit for carriage to Candy, and fuch commodities as are bought there, to be carried back to the fea-shore at Cotiarum, at his own charge.

X. In case any vessels, sloops, or boats, fhould happen to be cast away on these coasts, his majesty's subjects shall be obliged to fave as much of the goods as they can, without any reward, for the use of our company.

XI. The Dutch shall be permitted to export their merchandizes, without exception,

XII. All and every one of his majesty's fubjects shall be at liberty to traffick with our company.

XIII. His imperial majesty obliges himfelf to purchase any rarities, or other uncommon commodities at fuch a rate, as may bear a proportion, in respect of other commodities agreed upon with our company in their exchanges.

XIV. His majesty engages to deliver yearly all the cinnamon that is to be got to our company; to be paid either in money or in merchandizes, according to the usual exchange.

XV. It is agreed, that not any forts of merchandizes shall be delivered to such perfons as are entered into contracts of commerce with the Hollanders, before the natives of Holland are fatisfied in this point;

and in case the contrary be proved, their Baldans, persons and goods shall be detained till they have made good the faid contract.

XVI. His majesty shall not allow free commerce to any of the European nations, without peculiar confent from their high and mightineffes and his highness the prince of

XVII. I I is majefty obliges himself to furnish timber and other materials, for the building of veifels, yachts and boats, to be delivered upon the shore.

XVIII. All prisoners taken on both sides shall be released.

XIX. All the officers of the Dutch company shall be exempted from his majefty's jurisdiction; and if any of them happen to commit any trespass, they are to be punished by the heads of the Dutch company, as his majesty's subjects shall enjoy the same benefit.

XX. His majesty obliges himself to difpose of all his precious stones and pearls to the Hollanders; as they on their side engage to fell all their extraordinary jewels, precious things, and other rarities, at a reasonable rate; but in case any difference should arise upon that account, the same fhall not be alledged as a reason for the diffolving of this confederacy.

XXI. For the same reason his majesty and the states-general shall maintain this alliance inviolably, and affift one another upon all occasions.

XXII. All acts of hostility committed on both fides, shall be buried by a general oblivion.

XXIII. No body, except his majesty, shall have power given him to coin money, or to enhaunce the value of the coin, beyond what has been agreed betwixt his majesty and the Hollanders, in proportion to the money transported hither from Holland ; and if any of his majesty's or our subjects are found to have coined false money, they are to be punished with death.

XXIV. His majesty and the Hollanders shall agree upon the most proper methods for fettling both the larger and leffer coin,

for the promoting of traffick.

XXV. Such coin as shall be adjudged current by both parties, shall be changed every three years by turns, once & Candy, and the next three years in one of our

XXVI. The coin shall be either enhaunced or lowered, according to the prefent exigency of affairs in time of war.

XXVII. All the Indian nations shall be free to come and traffick in their own veffels in his majesty's dominions, without paying any cuftoms, for the space of three years next enfuing.

XXVIII. After

Rideus. XXVIII. After the expiration of the term of these three years, I's majesty shall

be at liberty to enter into a treaty with the plenipotentiaries of their high and mightineffes, concerning the rate of cuftoms of all commodities.

XXIX. His majesty agrees, that their high and mightinesses, and his highness the prince of Orange, shall enjoy one moiety of all the customs; for which purpose certain commissioners and clerks shall be appointed by the confent of both parties.

XXX. All the prizes taken on the coaft of Ceylon, shall be divided, share and share alike, betwixt your majefty on the one fide, and their high and mightinesses and his highness the prince of Orange on the other fide; provided that what prifoners are taken shall be ransomed, but never put death.

XXXI. All factors, or other officers belonging to their high and mightineffes, and his highness the prince of *Orange*, shall give passes to such of your majesty's subjects as intend to traffick in those parts; as his

majesty shall do the same; without which Baldaus. they shall be liable to be seized, and their goods confiscated.

XXXII. His majefty, their high and mightinesses, and his highness the prince of Orange, shall be obliged to take effectual care to have the roads and paffages, both by fea and land, in the ifle of Ceylon, to be kept well and clear from highwaymen and pirates; for which purpose his majesty obliges himself to furnish timber, for the building of galleys and other veffels, for the clearing of the feas ; and in case any highwaymen or pirates are taken, they shall be punished with death.

XXXIII. His imperial majesty, their high and mightinesses, and his highness the prince of Orange, do promise to keep this confederacy inviolably, to the utmost of their power, nor to fuffer the fame to be violated by their subjects; to inflict severe punishments upon fuch as shall go about to violate it; and give full fatisfaction for all damages

fuffained upon that account.

CHAP. XI.

Marcellus de Boschhouwer defires Leave to depart; which the Emperor will not confent to: Has confiderable Dignities bestowed upon him: The Portuguese rob and murder the Dutch at Cotiarum. The Emperor convenes the States of the Empire. The Portuguese routed near Jafnapatnam.

Bolishou THE articles of this confederacy being we defined thus concluded Mr. Boschbouwer defined it bimis leave from his imperial majesty to depart, with the elephants that were ready to carry certain commodities to Tegnapatan, for the use of the Dutch factory there; from whence he might go to Paliacatta, to give the Dutch governor of that place an account of his negotiation. But the emperor and his council were not willing to confent to his difmiffion, alledging, That fince, according to one of the before-mentioned articles, they were obliged not to transact any thing in warlike affairs, without the knowledge and confent of the Dutch, it was requifire he should stay with them for that purpose. These reasons prevailed fo far with Mr. Boschbowwer, that he refolved to stay; and the emperor heap-His great ed favours after favours upon him, having fired upon created him prince of Migonne, Kockele-Corle, Ananagepora, and Mrwitigael, knight of the order of the Golden Sun, prefident of the council of war, the fecond person in his privy council, and lord high admiral, and he knew to well how to improve the emperor's good opinion of his person, that scarce any thing of moment was undertaken without his advice.

Vol. III.

In the year 1611. June 20, the Portu-Portuguele gueje took the field with a body of one murar and thousand Portugueje, and three thousand In plunder the Dutch. dians their allies, under the command of Simon Corré; and having got a certain Candineje for their guide, they marched through unknown ways to Cotiarum, where they furprized the Dutch belonging to Mr. Boschbouwer, put them all to the fword, and plundered the place, and then retired with all speed to Sette-Corle, for fear of being overtaken by the emperor's forces.

For the emperor had no fooner notice of their march, but he fent a body of five thouand men, commanded by Marafinge Atfile, an old experienced captain, and under him Mayndappo and Vire Segre, two brave noblemen, to Cotiarum; but coming too late, they purfued the Portuguese day and night, till they overtook them near Sette-Corle, killed twenty three Portuguese, fix hundred Indians, fet several villages on fire, and returned with many priloners, and a good booty to Candy.

About the fame time an envoy of the king Difference of Palugam came to court, reprefenting that betwinting John Sangati his mafter's brother, and king brothers. of Podere, was entered into an alliance with

harbours into their hands, and afterwards to carry on a war against his imperial maefty with their affiftance. Hereupon the king of Podere being fummoned to appear at court at a prefixed time, he fent an envoy to clear his innocence with the emperor, unto whom he represented the perfidiousness of the king of Palugam, who had killed his own brother at table, for no other reason but that he might be fole mafter of the whole kingdom, offering besides to remain there as a hostage for his master's fidelity. The emperor, though not very well fatiffied with the king of Podere, by reason of his not appearing in perion, yet confidering that what had been alledged by his envoy, concerning the murder of his elder brother, was no more than truth, and that certain differences were arisen lately betwixt them about the customs of the river of Palugam, one half whereof was allotted by the estates to the king of *Podere*, he difmissed the envoy well satisfied, resolving to suspend his judgment, till time should unfold the mat-

The empt. The emperor having bent his thoughts reconvenes upon a war, he convened the effaces of the the effaces, empire, viz. Idele king of Cottarum, Celle

Wandaar king of Palugam, Comaro Wandaar king of Batecalo, Corre Witty Raelbamy prince of Ouve, Marcellus de Bojchbouwer, prince of Migonne, Meter Raelbamy prince of Vellene, Jallago de Ralle prince of Cotomale, Mewater Rale prince of Mewater, Wik Venefinge earl of Quatre-Corle, John Sangati prince and lord of Podore, Cole Rale duke of Ode, Jattenore brother of the prince Jalagode, Gael Heberad governor of the county of Harcipate, Corope governor of the county of Odogo d'Askeri, Wanategere governor of the province of Malere. In the fame affembly appeared also the governors and commanders in chief of the lesser provinces, and the ambassador of the king of Jasapatnam, the king of Patania being the only one, who, though summoned by a pecu-

frivolous excuses for his nor appearing there. Among other matters of the greatest moment, it was refolved in this affembly to raife an army of fifty thousand men, one half whereof was to be employed in the fiege of Puntegale, under the conduct of the prince of Ouve; the other against Walane, under the command of the prince of Migonne: and in case they met with good success, both armies were to join and attack Columbo. For the carrying on of this enterprize, four millions five hundred thousand livres were to be raifed. Concerning the differences betwixt the king of Palugam and his brother John Sangati, they were both enjoined, under pain of death, not to hurt one

liar letter, dated July 16. 1611. made feveral

Baldeus, the Portuguese, in order to deliver all his another, till the matter could be further en-Baldeus.

A high court of judicature was also settled, to examine and decide all such matters as before that time used to be determined by the emperor and his privy council. The judges of this court were the prince of Migome president, the prince of Ouve, the prince of Velaren, and the prince of Cotto stake cognizance of criminal matters, without the approbation of this high court, from whence no appeal was to be allowed. The prince of Ouve, the prince of Migome, the prince of Velaren, the prince of Cottomale, and the earl of Quatre-Corle, were appointed members of his available with control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of

members of his majesty's privy council.

It was also further decreed, That not only liberty should be granted, but also houses and lands allotted to fuch feamen as would fettle in his majesty's dominions; by which means they proposed to get in time a fufficient number of able feamen to man their galleys, of which three were ordered to be built immediately, with some other vessels, to cruise upon the Portuguese on the coast of Orixa and Bengale, &c. It was also agreed, that no quarter should be given to the Portuguese and their confederates, unless they were women or children; and that a pardon should be published for all deserters that would return within fixty days into his majefty's fervice; which was done accordingly at Candy, July 23. 1612.

Whilft these things were transacting ad-Portugues vice was brought that the Portuguese were harch to on their march towards Jafnapatham; parts whereupon the empereror having fent part of his forces, defigned for the expedition against Walane and Gale, to observe their motions, they attacked the rear of the Portuguese, who imagining no otherwise than that the whole force of the emperor was on their back, were foon brought into confu-drehum. fion ; but finding their mistake, rallied again, and retreated towards Columbo, making themselves masters in their march thither of the dukedom of Migonne, where they committed all manner of cruelties. The Modeliar, or governor, being accused of having betray'd his trust, sent a letter to the prince of Migonne, wherein he de lared, That after having fustained three affaults, he was forced to furrender; adding, That they were ready to shake off the Portuguese yoke with the first opportunity that offered, though the Portuguese had taken most of their wives and children, (and among the rest the governor's wife,) along with them, as hostages and pledges of their fidelity to Columbo. They fent also a present to their prince, as a token of their obedience. The letter was dated August 30. 1612. by the command of the chief Visego Modeliar.

CHAP. XII.

The Death of the Hereditary Imperial Prince: His Funeral. The King of Panua rebels, is taken Prisoner; and killed, with all his Ad-

BOUT the same time the hereditary imperial prince Mabastanne, son of the late emperor Don John, died after a fickness of fix days. The occasion of his death was varioufly reported; but the general opinion was. That he had been poisoned by Cenuwieraat, his father-in-law, to make way for his eldeft fon Comara Singastanne, to succeed him in the empire. Certain it is, that his death was generally lamented; the guards were doubled all round the imperial palace, and great preparations made for his funeral; which was performed the 23d of August, in the afternoon. .. The empress especially gave most evident marks of her grief, calling him at parting, Her own precious flesh and blood, ber only bopes, life, and satisfaction, vowing to revenge his death, and not to take any rourishment, that she might follow her son. She did afterwards fall into a fwoon, and was fain to be removed out of the room by her two daughters, who also were melted in

The corps of the deceafed prince being exposed to the view of the people, they broke out into most lamentable exclamations, crying, Where is the traitor that murdered our prince? we will tear bim to pieces: So that the emperor fearing a general in-furrection, got the prince of Migonne, and the prince of Ouve to tell them, That the prince was not poisoned, but died of a fever; which fornewhat appealed the tumult. The corps being put into a mourning hearfe, adorned with gold and precious stones, was carried to the place of burial in the following

First of all went the prince's musicians, clad in black Gingam, or linnen; then the musqueteers and pikemen, three in a rank: these were followed by the shield-bearers and halberdiers with their halberds downwards: after these came forty war-elephants, guided by as many gentlemen; and eight Persian horses led by eight knights of the Golden Sun; and after these the grooms of the bed-chamber all richly attired. Then came the fcep-

ter and crown, carried each upon a black velvet cushion, and the prince's arms. These were followed by the corps, attended by eight of the greatest lords of the country; then the empress's Palankin, or litter, attended by fixteen with fans, four umbrello's, and eight betel boxes, as also a nosegay of gold to be worn by the emperor only. After these came the emperor supported by the princes of Migonne and Mewater, followed by the chief lords of the empire and the governors of the provinces. They passed along the streets under ieveral arches made of fine ftuffs and plaifter-work. The corps being deposited on the place of burial with a deal of folemnity, the priefts muttered out certain prayers, and the common people expreffed their forrow by frequent mournful

The place of burial (called Hona by the The place Cingalese) was a four-square raised from the of burial. ground feven fleps high: it was level on the top, and adorned with feveral rows of trees. In the midst of it was the grave, into which the lords who had carried the corps threw a great quantity of fandal-wood, and fweetfcented fpices; and having put the corps upon it, covered with the fame fpices, as high as a man could reach; they also poured in among it three large veffels full of oil of cinnamon, and another with butter. Over the grave was erected a large canopy rifing up like a pyramid of feven foot high; under which flood the lords whilst the ceremony lasted; which being over, the prince of Migonne took a bundle of straw, which was given him by the prince of Amme, and a golden chafindish with fire, and two lighted torches; and being attended by the prince of Amme, and two genrlemen of the bed-chamber, fet fire to the spices and corps His corps in the grave, under the most dreadful eja-harm. culations and outcries of the people, which lasted till the corps was quite burnt to ashes: which done, the whole train returned to court to condole the empress and her daugh-

court that the king of Panua had joined

his privy council fent his letters, dated the 23d of September, to both these kings, to

make their personal appearance at court within fixteen days, under the forfeiture of

all their estates, and banishment. The king of Cotiarium happening to be ill at that

time, he fent his uncle to know the reason

of his being fummoned to court; and there-

upon appeared in person on the 9th of Offo-

ber following, giving fuch proofs of his innocence, that he was foon cleared by the

emperor. But the king of Panua knowing

himfelf guilty, did not think fit to appear ;

to that it was refolved to reduce him by force, his defection naving put a stop to

the expedition against Walane and Gale. Ac-

cordingly the princes of Migonne and Ouve.

at the head of an army of thirty five thou-

fand men, marched, Jan. 1. 1613. directly

towards Panua, with a refolution to destroy all with fire and fword: but the inhabitance

finding themselves not in a condition to oppose so formidable a force, sent deputies with

presents to the princes, desiring they might be spared, as having no hand in this desec-

tion; which being granted, they were a-

merced in four hundred and fifty feven thou-

fand Larynes, (befides their yearly tribute,) amounting just to two months pay of the

whole army, and to give hostages for the

The long of the Pertuguese against the emperor, and that have such the king of Cotiarum intended to follow his

hauguste footsteps, the emperor with the advice of

king's appearance at court in five or fix days Accordingly he was no fooner come there, but being brought before the privy council, his acculation was read to him in writing, viz. "That he had entered into an engagement with the Portugueje against the emperor, and was to have married the young princefs Hantan Adascyn, and with her, as a dowry, the kingdoms of Batecalo and Palugam: That he had despised the emperor's order in not coming to court; and hired a certain ruffian for five thousand Larynes to murder the emperor, with a promife of twenty thousand more, and " certain possessions, after the same was ac-" complished, as appeared both by his own " hand-writing, and the confession of the ruffian." Which being so evident against him, that he had fcarce any thing to reply, he acknowledged himself guilty, craving the emperor's mercy, in regard of his being descended from the imperial blood, and of the many fervices done to the crown by his

galdens. In September advice being brought to most submissive letter to the emperor, im-Baldaus. ploring his mercy to fave his life, and to condemn him to a perpetual imprisonment. About fixty two persons, found to have been his accomplices in this confpiracy, were fent to other prisons, and afterwards punished with death.

The 20th of March being the day ap-His trial. pointed for the trial of the king and his accomplices, fifty lords of the empire appointed for that purpose, after a full hearing, found them all guilty of high treason, and accordingly pronounced the following fentence: That the king of Panua should be be Sentence. beaded; and the reft be thrown before the elephants, and all their goods and estates be confiscated. This fentence being figned by his imperial majesty, was put in execution accordingly the 24th of March following in the forenoon.

Accordingly a feaffold covered with white Execution. (the royal colour here) being crected in the castle of Meddema Honore, the king was brought thither, and feated himfelf upon a gilt chair. He at first appeared undaunted; Behaviour, but being deprived of all his dignities, in the view of the people, and the fentence read to him, he began to bewail his unfortunate condition, asking frequently whether there were no hopes of a pardon? Being rold no, he fuffered himfelf to be undreffed by fome of his gentlemen of the bed-chamber, (who were all in tears,) unto whom he made rich refents of jewels, and ordered his chancellor (. So had not had the least knowledge of this delign) to bind up his eyes. In the mean while the king took fome Betel and Arek, and then faid, Why do we flay? Un-speech fortunate I, what am I reduced to? Then taking three turns round the scaffold, he fat down, and taking a little Betel, told the spectators, I am a king descended from the imperial blood; but fince I must die, this is my only request, That my dead corps may not be left to the management of vile persons, but be bonoured with a royal sepulture. Which being promifed by some of the lords there present he seemed to be well satisfied; and having asked their pardon for what had paffed, he had his eyes tied up, and laying his head upon a block, it was fevered from the body, which (at the intercession of the said lords) had a royal fepulture allowed it by the emperor.

After his death Samatway, the king's His fuetefuncle, being with a general approbation de-for. clared his fuccessor, marched at the head of an army of fifty thousand men, the 8th of April to Panua, to take possession of that kingdom, which he found involved in no fmall troubles, there being a strong party who opposed his succession: But one hundred and twenty five of the ringleaders being cut

Baldans, to pieces by the new king's forces, the reft thought fit to submit. So soon as he found himself in the quiet possession of the kingdom, he fent back the forces, as also the arrears of the annual tribute, besides consi-

derable presents. The Portuguese not long Bald, after fent their deputies to entire those of Panna with vast promises, to engage with them afresh; but these were sent back without being heard.

The Emperor fus down before Walane. The Prince of Migonne equips a Squadron of Ships. The Empress falls fick, disposes of her Affairs.

white with a good army, formed the fiege of Walane, and took the castle by assault; but his foldiers being too intent upon the plunder, the Portuguese recovered themselves, and beat them from thence. The emperor being highly exasperated at this miscarriage, caused one hundred and five Cingalese to be hanged, which proved of the worfe confequence; because the Portuguese receiving fresh succours soon after, he was forced to

Raifes the

raife the fiege. In the mean time the prince of Migonne of ships some had not been idle to equip some galleys and Fustes, (finall vessels,) to cruize upon the Portuguese, between the cape of Comoryn and the isle of Ceylon. The same set sail the 16th of May out of the harbour of Cotiarum under the command of a nephew of the prince of Ouve as admiral, and Wandige Nay Hanni vice-admiral. The first galley was called the Candy, one Sanderappo captain; the second called the Holland, Kistena captain , the third the Migonne, one Dingappe captain; the fourth called the Fortune, one Ordia captain ; fifth, the Good Luck, one Marafinge captain; fixth, the Faithful, commanded by captain Sande-rappo. These ships returned the sixth of March, 1613. with a great booty, amounting to near fix hundred thousand livres. For they had taken two Portuguese vessels near Chilan to the north of Negumbo and Manaar, called Patajios, and three Fuftes, belides twenty barks which they fet on fire. Not far from Calecut and the cape of Comoryn, they took another ship, whereof they threw (according to order) the Portugueje overboard, forced another ashore, and took a Moorifb vessel richly laden coming from Ormus, and bound for Cochin, and another Portuguese ship coming from Bengale. The Portuguese and Mistices, of all which they threw into the feas, keeping only the Portuguese women and Nogres. In the road of Panaca, they met with another Portuguese thip riding at anchor, deferted by the ship's of Cotiarum. His majesty ordered the

booty to be distributed among the officers

and feamen.

In July 1613. the empress Donna Catharina being with child, fell dangeroufly ill The minu of a fever : the fent for the prince of Migonne fall fit. and the prince of Ouve, unto whom (after having taken an oath of fecrecy from them) she discovered the whole sentiments of her heart, and (with the emperor's confent) constituted them governors of her children. She had conceived such an immoderate grief at the death of her eldeft fon, the prince of Mabastanne, that she would scarce take any sustenance. She declared, that nothing troubled her more, than that before her death she should not see the downfal of the Portuguese in Ceylon; and would often, with a great deal of eagerness, enquire whether the expected fuccours were not arrived out of Holland. Such was her grief, as I told you before, about the loss of her fon, that the would fcarce reft day or night; which had questionless proved the occasion of this diftemper: and the was no less troubled how Takenton to dispose of her children after her death; she of her th bequeathed to them all her jewels and trea- drawl fure the had been gathering for a confiderable from the fire and the same for the had been gathering for a confiderable from the fire and the fire and the fire and the fire and the fire and the fire and the fire and the fire and the fire and the fire and the fire and the fire and the fire and the fire and the fire and the fire and the fire and the fire and the fire and the fire and the fire and the fire and the fire and the fire and the fire and the fire and the fire and the fire and the fire and the fire and the fire and the fire and the fire and the fire and the fire and the fire and the fire and the fire and the fire and the fire and the fire and the fire and the fire and the fire and the fire and the fire and the fire and the fire and the fire and the fire and the fire and the fire and the fire and the fire and the fire and the fire and the fire and the fire and the fire and the fire and the fire and the fire and the fire and the fire and the fire and the fire and the fire and the fire and the fire and the fire and the fire and the fire and the fire and the fire and the fire and the fire and the fire and the fire and the fire and the fire and the fire and the fire and the fire and the fire and the fire and the fire and the fire and the fire and the fire and the fire and the fire and the fire and the fire and the fire and the fire and the fire and the fire and the fire and the fire and the fire and the fire and the fire and the fire and the fire and the fire and the fire and the fire and the fire and the fire and the fire and the fire and the fire and the fire and the fire and the fire and the fire and the fire and the fire and the fire and the fire and the fire and the fire and the fire and the fire and the fire and the fire and the fire and the fire and the fire and the fire and the fire and the fire and the fire and the fire and the fire and the fire and the fire and the fire and the fire and the fire and the fire and the fire and the fire and the fire and time; as also certain legacies to all her fervants, and restored all her slaves of both fexes to their liberty.

Her fickness increasing daily, she was carried from Welmantotte (her ordinary refidence) to Modeni, where, in the presence of the emperor she charged her eldest fon to revenge the late deceased prince's death upon the physician, who, she said, was the author thereof: but as she was sometimes not well in her fenses, so this was not much regarded. In the mean while the emperor took care to prevent all disorders which might be occasioned by the empress's death, by reinforcing the frontier garrifons, and doubling the guards in other places. The empress having pretty well recovered her fenses, sent for her five children, Comara Singaftanne hereditary prince of the crown, and his two brothers Janiere Astanne and Lamait, and the two princesses Mahadaseyn and Hantan Adaseyn: she

Ralden chafped them one after another, with tears min her eyes, in her arms, and kiffing them, faid, See here, you dearest part of my own seeks and blood, your mother that has brought jou into the world, but must leave you in a little time. Then she called to her the two hefore-mentioned princes, unto whom the delivered her children in these words: I now deliver to you the dearest pledges I have ; take care of them as of your own eyes, and retaliate upon them the many obligations you have received at our hands. Then turning towards the emperor, she told him, You are the occasion of my death. Which so sensibly touched him, (he loving the empress extremely,) that foon after it threw him into a violent distemper. After that she scarce spoke to any body, except the prince of Owve, unto whom she declared her forrow, for having adored and facrificed to the pagan idols, contrary to her better knowledge, having been educated a christian, telling him, That she faw the devils ready to strangle her. The prince of Migonne (upon whom

the fixed her eyes all the while) answered Baldens: her, That the infernal spirits had no power over a christian, provided they heartily re-pented of their sins, that therefore she ought to rest satisfied, and to implore God's mercy for ber soul, for Jesus Christ's sake. She re-turned for answer, I am a christian, and would willingly pray, I defire you to pray with me. The prince of Migonne prayed aloud, Our Father, and the twelve articles of the christian creed: unto which the empress replied in Portuguese, O Christi ajuda mi! O Christ help me! Soon after being carried back to Welmantotte, the spoke her last words: O my dear princes and princesses, faid the, where must I leave you? My lords, (pointing to the prince of Migonne and prince of Ouve,) perform your promises, farewel, I am departing, O God, take care of my soul: and so she expired the 20th of July 1613. in the thirty fifth year of her age, and was buried the twenty first, with the same pomp, and in the fame place, as the prince her fon

CHAP. XIV.

The Emperor falls very ill: Affembles the Estates. The Transactions of that Affembly.

THE emperor finding himself worse and worle, would needs be carried to a fmall city, called Dilege, where he appointed the flates of the empire to meet Aug. 18. in order to fettle the fuccession of the crown. The members of this great asfembly (according to the schedule read to the king) were, Idele, king of Cotiarum; Celle Wandaar, king of Palugam, Comaro Wandaar, king of Batecalo, Samarway, king of Panna; Namacar, the king of Jafnapatnam's ambaffador; Coriwitte, prince of Onve; Marcellus, prince of Migonne; Materael Hani, prince of Velaren; Jalagode Rale, prince of Catemale; Mewater Rale, prince of Mewater; Jane Sengati, prince and lord of Podere; Wiek Venefinge, earl of Quatre-Corle; Gael Henerad, governor of the earldom of Harfipate; Corope, governor of the earldom of Odogodas; Kerry Wanafegre, governor of the province of Matele; Attapatte, governor of Wluat Gamme; and Pasgrame Halvenrale, governor of Atapeli and Wilwele; besides a great number of other noblemen, unto whom his imperial majesty made the following speech.

My Lords,

THIS prefent affembly being occafined by my ficknefs, (perhaps
the fore-runner of my approaching end,)

I first of all defire you to forgive me all

miscarriages I have committed, the same having been done without my know-ledge, and feeling my felf very feeble, and decaying in itrength, I thought fit to take effectual care about the fucceffion, to avoid all contests that reight likely arise after my decease. You cannot be forgetful what diffurbance arole in the empire after the death of my brother Vinne Ladarma Soria, which ought to ferve us as a caution to prevent the fame at this juncture, by committing the tuition of Comara Singastanne, the eldest hereditary prince of the crown, to fuch as you shall judge best qualified for so high a trust, with a full authority to manage the administration of all publick affairs during the prince's minority; the choice whereof " I recommend to your present care."

The lords being not a little surprized at this proposition, gave in their opinions in writing, wherein they pitched upon the prince of Migonie and the prince of Ouve, who both excused themselves, pleading their inability, and desiring his majesty to chase some more able persons in their steads. The emperor reply d, sighing, And are you then so backward in doing methis piece of service? Can you be so sorgetful of all the obligations I have beaped upon you? They answered, That they were ready to facrifice their lives and

Baldæus, estates for his majesty; but that they were afraid, their shoulders were too weak for so great a burden. Well then, reply'd the emperor, we will leave the choice to my fon the prince, wherewith the whole affembly was fatisfied. The emperor then ordered the king of Cotiarum to bring in the prince; which being done accordingly, he told him, Son, make your choice from among all these kings and princes of two perfons, such as you love hest, who shall be administrators of the emtire after my death. The prince answered all in tears, Good father ! and will you die, dear father ? pray do not leave me! which words drew tears both from the emperor and the whole affembly. The emperor answered, I do not know how foon my time may come to leave you; wherefore I would have you pitch upon two persons, such as you love best next to my self. Well then, reply'd the prince, I love the prince of Migonne, and likewife the prince of Ouve, and next to him the prince of Velaren. I am fatisfied, faid the emperor, bring them to me, that I may furrender you to their care. Accordingly the prince having led the two before-mentioned princes to the emperor, he told him, These shall be my governors now, and when come to maturity my chief counsellors. The emperor returned for anfwer, not without fome emotion, My dear fon, fee here your father, whose life, perhaps, will not be long; you are but young, therefore be always advised by these two princes. A torrent of tears which trickled down his cheeks having stopped his voice, he ordered himself to be carried out of the assembly, enjoining only in a few words all the lords there present, to persist in their fidelity, which they unanimously promised to do, and in token of their entire submission, saluted the emperor with the usual Sambaje, or reverence, according to the custom of that country

The next day the royal patent, to invest the before-mentioned two princes with the administration of the empire, was read in the assembly. Cenuwieraal, by the grace of God, emperor of Ceylon, king of Candy, Settevacca, Trinquenemale, Jasnapatnam, Sette-Corles, Manaar, Chilaon, Panua, Batecalo, Palugam and Jale; Prince of Ouve, Dennevaque, Passadon-Corle, Velaren, Coronale, Mewater and Ventame; duke of Willegame, Cale, Ody and Jattenore; earl Quatre-Corle, Harkepattee, Odogodascary, Crawnity and Batagedre: Peace to all those

that read these presents.

"BEING much indisposed, and consequently in no small danger of life,
we thought fit to convene all the great
men of the empire to consult the welfare of the publick, and of our dearly

beloved fon Comara Singaftanne, (whom Baldane, God preferve.) It is for this reason that we have appointed two princes administrators (after our decease) not only of the empire, but also of our hereditary prince during his minority, with full authority to govern the realm; the two princes cholen for fo great a truft, being the prince of Migonne and the prince of Ouve. declared fuch by the unanimous confent of the affembly. We do by these prefents furrender to the faid princes all our kingdoms, provinces, and dominions, to be governed by them, during the minority of our dearly beloved fons; and as we are very glad to have been able (in our life-time) to prevent all intestine commotions by this settlement, so we require and defire the two beforementioned princes to take upon them the government of all our dominions till our recovery; or in case of my decease, till the hereditary prince comes to an age of maturity, or his brothers, in case he should happen to die before that time: we therefore command by these presents expressly, that no body else shall presume to take upon him the administration and tuition of the beforementioned princes and princesses, but shall obey the faid two princes without the least opposition, under forfeiture of their lives. These two princes shall take effectual care of the education of the young princes and princesses under proper tutors, and to fee the eldest prince, when come to age, quietly fettled in the throne; and in case of his decease, Janiere Astan to succeed, as after him Lamostanne, the third is to be the next heir to the crown; but in case all the said princes fhould die without iffue, our dearly beloved daughter, the princess Mahadascyn, and after her her sister, the princess Hantan Madascyn, shall succeed them in heir due turns. But in case these also should leave no children behind them, the empire shall devolve into your hands, and you shall be at full liberty to chuse, with the unanimous confent of the great settlemen men of the empire, fuch a person of the of the emimperial blood as you think the best Pire. qualified for the welfare of the empire, which I leave to the wisdom of this affembly. In the mean while, every one (after my decease) shall be obliged to be accountable to the two administrators for all the revenues of the respective lands without failure, upon pain of death

and loss of their estates. The two ad-

ministrators shall have a due regard for

all fuch counfellors as were in our life-

" time, and not turn them out, unless they

" to put others in their places.
"All mandates shall be iffued by the " two administrators in the name of the " whole empire, and the hereditary prince; " according to which all the great men and nobility, without exception, shall appear at court when required, and obey them in all other respects: they shall also " be obliged to take the usual oath of al-" legiance to the hereditary prince, and " his two administrators, and to promise " to perfift in their fidelity, and not to " fuffer any alliance or engagement to be " made with our enemies the Portugueje, " or any rebels, under what pretence foe-" ver. They shall be obliged to affift in " the reducing of all fuch (though of the "next kindred) as pretend to diffurb the publick peace: and laftly, all the kings and lords shall take an oath, That " after our decease they will raise no " disturbance in the empire, but will sub-" mit quietly to the present disposition, under forseiture of their lives. For " which reason our grant written in golden " letters, is to be delivered to the princes " of Migonne and Ouve; purfuant to which " they shall have full authority to govern " and protect in our and the hereditary prince's name our dominions, and to ad-

minister justice both in civil and crimi-

" nal causes. We therefore order and com-

" mand all kings, princes, dukes, earls,

" clergymen, nobles, governors, and heads Baldæus.

" of provinces and cities, captains, presidents, counsellors, admirals, chancellors, and all other persons in our service, as deputies, administrators, farmers, in-habitants, foldiers, citizens, and others inhabiting the cities, villages, or any places whatever, all and every one in particular, to receive and acknowledge the before-mentioned two princes, adminiftrators, and governors of the realm, till the hereditary prince came of age, and to take the oath of fidelity to them, and shew them the same respect as to our own person, and, as becomes faithful and true fubjects, to behave themfelves in all respects according to the true intent of this patent. We also annul by these presents all laws or conflitutions which may feem contrary to the true meaning thereof; and to give it all the authority and weight that can be, have in conjunction with the hereditary prince, and the princes, dukes, and lords of this affembly, figned it with our own hand, and ordered the great feal to be affixed to it. For the fame reason we have also commanded the same to be registred in all the courts, councils, and treasuries of our empire, that no body may plead ignorance of this our last will."

Dated at the Imperial Court at Digelege, 19 Aug. 1613.

CHAP. XV.

The Hereditary Princes are carried to Cockele-Corle. Gael Heneraed is routed; and being summoned to Court, is made Prisoner, and executed.

The faid patent being published by ministrators, as well as the rest of the cibrate estates, took the oath of allegiance to the minum, hereditary prince; which done, the administrators upon their knees returned his majesty thanks for the honour he had beflowed upon them, wishing him a long and happy life. His majesty lifting them up, ordered them to fit down by him, and disclosed to them some of his treasures which were buried under ground, besides several other matters relating to the administration of the state.

Then the three princes and two princeffes being called in, he exhorted them to follow the directions of their governors; Vol. III.

and taking the eldest prince in his arms, My dearest son, said he, I wish you and your brothers and sisters all imaginable prosperity: and then turning to the princes of Migonne and Ouve; Receive, fays he, from my bands these my dearest treasures, which I commit to your care; and thus delivered them up to the two administrators, who took care to have them convey'd in the night-time to the dukedom of Cockele-Corle They are for their better fecurity, charging those carried to who conducted them, upon their lives not Cockeleto divulge whither they were carried: which done, the affembly was diffolved the

Baldaus.ness of the emperor, but they left no stone unturned (notwithstanding the miscarriage of their delign upon Panua) to raise new troubles. For this purpose they had found means to bring over to their fide the fon of Gael Heneraed, governor of Harcipate, pre-fident in the dukedom of Cockele-Corle, who all along had supplied them with provisions at *Walane*, and had engaged several of the nobility to raise divisions, thereby to give opportunity to the Portuguese to make themselves masters of the kingdom. two princes administrators having got some notice of the matter, they refolved to find out the bottom of this defign. For this purpose the prince of Migonne marched the 15th of September at the head of a good body, under pretence of changing the garifons on the frontiers, but near Ode and Jatteno met Heneraed's forces, who being not a little furprifed at the fight of the prince, pretended they were ordered for Cottamale upon some particular business. The prince being now more than ever confirmed in the matter, ordered their chief commander to be brought before him immediately, who being fearched, a letter of Gael Heneraed was found about him, viz. That all things looked with a good face towards intercepted the accomplishment of the design concerted betwixt them. That he had confulted with his Son Abecque, prefident of Cockele-Corle, and that they had agreed with many of the nobility to murder the princes and princesses, and likewife the princes of Migonne and Ouve, the iffue whereof they should know as soon as it was put in execution. He fent them in the mean time, a certain quantity of powder, ball and provisions, advising them to be upon their guard, because the garison of Candy had been reinforced confiderably of late, which feem'd

The prince gave immediate orders to feize the commander, who standing upon his defence, was cut to pieces: His foldiers and pioneers attempted to fave themselves by flight; but being purfued were most ed's forces flain, except a few that faved themselves in the woods. The prince dispatched a mesfenger immediately to the governour with orders to come immediately to court, hav-He is sum. ing particular occasion to concert some mat-

as if some design were in band against them.

ters of moment with him.

He who knew nothing ofwhat was paffed, appeared accordingly the 17th of September at the court in Candy; where being well re-ceived by the prince, they talked of feveral matters relating to the government; upon which occasion he gave him repeated affurances of his fidelity, telling him, That he was ready to venture his life for the welfare of the empire. The prince of Migonne had much ado to diffemble his anger, only

told him, We have nevertheless received cer-Balden tain advice that you batch treason against the crown, and are entered into a confederacy with the Portugueses our enemies, contrary to the oath you have so lately taken. He de-clared his innocence with many affeverations, defiring that he might be confronted with his accusers: Whereupon the prince of Ouve told him, We could wish you innocent, but are too well informed of your treachery, and fo ordered him to withdraw (after fome further excuse) to be disarmed, and his perfon to be secured.

The captain of the guard coming to feize him, he faid, Friend, you are wrong; and fo made the best of his way towards the gate, in hopes of making his escape; but the captain asking him, Are you not the go-vernor Gael Heneraed? he answered, Yes. The captain reply'd, Then I am not wrong; I beg your pardon, being obliged to execute his majesty's orders. So that seeing there was no hopes of escaping, he defired to be brought before his majesty, or before the prince's administrators. The captain told him, That he had no fuch orders. Whereupon fome of the governor's foldiers put themselves in a Hin selfen posture of defence; but were all made pri-rates, foners, and put to death the next day, being thirty two in number. Another party attempted to escape by night; but fifty of them were taken and committed to prilon. which made his case worse.

In the mean time the two administrators The empttook care to have the emperor's children ror's daltransported to another castle, and sent or-dem carrie ders to all the governors to stop all the ed to and foldiers of Heneraed, unless they were provided with a paffport from his majefty.

The 22d Heneraed was examined in the council; where at first he boldly deny'd every thing alledged against him; but soon after confessed the whole, and begged mercy, alledging, That what he had done was out of discontent, because he had not been promoted to a higher station. He did not deny that twenty fix noblemen had been con-Heirexcerned in this conspiracy, yet refused to amind name them; but feeing the Brabman, who had made the first discovery appear, he said, No question but you will soon know their names now; however, I will not discover them. The Brahman declared, That Gael Heneraed had caused two gentlemen to be murdered, because they refused to have a hand in this conspiracy. The twenty six noblemen being apprehended, confessed the fact; and the 25th being appointed for their trial, Tried and they were all condemn'd to death. Four of his chief counsellors were drawn with hot pinchers, had afterwards their hands cut off, and their bodies quartered, which were hung up about the caftle. The unfortunate governor, who had been a fpectator of the miferable exits of his accomplices, being likewife burnt

with red hot pinchers at each corner of the Baldaus, ftreets, was broken alive upon the wheel, and afterwards thrown before the elephants, one of which threw him up to a confiderable height, and afterwards catching him again, crushed him to pieces with his teeth. The rest had the good fortune to escape to Columbo.

CHAP. XVI.

A Battle betwixt the Emperor and the Rebels. The Portuguese propose a Treaty of Peace; which is refused. They march towards Candy; but are routed.

SOON after the princes of Migonne and Ouve, together with the earl of Quatre-Corle, took a progress to Cockele-Corle, being followed by two thousand men, and honourably received by the inhabitants; they fettled matters upon the old foot, and made fome alteration in the coin, giving strict orders not to raise the money above the prefixed value,

In the year 1614, there happened a bloody engagement betwixt the imperial forces and the rebels, wherein four thousand men being killed on both sides, and the last finding themselves too weak, retreated in the night time, and follicited the Portuguefe for help. The emperor remaining thus mafter of the field, ordered his camp to be ftrongly fortified; and keeping only two thouland men, and one thouland pioneers for his guard, he fent his general with the whole army to cut off the retreat of the enemy. The Portuguese, having got notice thereof, gathered fecretly a body of one hundred Portuguese, and five thousand na-The Por. tives; and marching through unpaffable ways, furprifed the outguards, and entred impresente the camp without much opposition, every one feeking how to fave themselves by a timely flight. In this action the price of Migonne was wounded with a lance in his right leg, and the prince of Ouve in the right arm, and five hundred were flain upon the

> fpot on the emperor's fide. Anno 1614. March 14. Don Munno de Feriera, brother of the earl of Fere, arrived at Columbo, in the quality of viceroy of Goa, to relieve Don Jeronimo d'Oviedo. He brought along with him about one h red thirty two Portuguese, besides a good number of Miftices, to reinforce the garrisons, with positive orders to endeayour, if poffible, to procure a peace with the emperor of Ceylon.

of June, Don Francisco de Menezes his en-Proposes & voy to Candy, with full power to treat with peaces the faid emperor upon the best terms he could. Accordingly the faid envoy delivered to the emperor a letter from the general, and another from the viceroy of Goa, written in the king of Spain's name, the chief contents whereof (belides fome compliments) were,

"That his catholick majesty being averse The king to the effusion of human blood, was in-of Spain's clined to enter into a treaty with his ma-letter. jesty, in order to settle a firm and last-"ing peace; for which purpose he had granted full power to certain persons of note to treat upon that head, defiring " that his majesty would be pleased to accept of them as fuch, and give them a " favourable reception.

Goa, Feb. 22. 1614.

The general's letter was much to the fame purpofe.

The emperor having proposed the matter the 13th following in council, it was re-folved they should bring in their propositions in writing, which being done the 18th of the same month, were as follows.

1. The king of Spain is willing to en-Articles ter into an amicable treaty with the em-proposed by

2. The peace to be concluded either for eyer, or for a certain space of years, to be kept inviolably, and all hostilities to cease both by water and land immediately.

3. Each party to keep what they are in possession of at present.

4. His imperial majesty shall renounce his alliance with the Dutch, and engage himself never to enter into any other with Pursuant to these orders he sent the 3d them for the suture, or any other state at Baldæus.

enmity with Spain and Portugal, and to permit no other European nation to traffick there.

5. Both parties to be at liberty to traffick in what commodities they please, without entering into any articles upon that head

6. His majefty shall grant liberty for the free exercise of the Roman catholick religion in Candy, and the building a church and convent, with convenient habitations for two or three hundred persons, both of the clergy and laity.

His majefty shall fend one of his hereditary princes to keep his court at Columbo, in lieu whereof they will fend a person of quality to stay always near his majesty.

8. His imperial majefty shall reftore all the jewels, money, prisoners, slaves of both fexes, cannon, &c. taken in the last war.

These propositions being read and deba-Are rejedtted in the council, it was refolved not to enter into any further treaty with the Portuguese, as fearing, not without reason, that fome treacherous defign (as often had happened before) lay concealed under this pretended treaty. An answer was therefore returned to the Portuguese envoy, Jun. 20. That his imperial majefty was not inclined to treat with the king of *Spain*, before all the lands and lordships taken from him were restored: That however the Spaniards fhould remain in possession of Gale and Columbo, with the territories thereunto belonging; but that his imperial majesty would by no means renounce his alliance made with the Duich, but keep the fame inviolably. Furthermore his majesty required a full compenfation of all the damages he had fuftained in this war, and was refolved to have custom paid him of all goods exported or imported.

The Portuguese finding them so resolute, guese prowould fain have made a considerable abatement in their pretensions; for which purpose they proposed a cessation of arms: which
being likewise rejected, the envoy returned
the 8th of June without essenting any thing,
with a letter from the emperor, directed to
the Portuguese general, containing in substance, That be was resolved not to violate his
outh with the Dutch; and that being sensible
no faith ought to be given to the Portuguese,
be intended to pursue them by force of arms;
and that they might make their account accordingly.

dingly.

The Portuguese not a little exasperated at guese for resolute an answer, marched with an army of twenty five thousand men towards Candy. The emperor's army consisted of twenty nine thousand men, and meeting just near Walane, Aug. 6. a smart engagement

enfued, in which the *Portuguese* were worst-Baldaus, ed, two thousand one hundred *Indians*, and forty *Portuguese* being slain on their side, drebeates, with the loss of seven hundred men on the emperor's inde. The *Portuguese* saved themselves from a total defeat, by the favour of the adjacent woods.

This victory occasioned no fmall joy at Candy; where the prince of Migonne and the prince of Ouve, who had led the van, were received with more than ordinary respect. Soon after a deserter came to Candy, who gave them an account of the whole condition of the Portuguese camp, which might have been entirely ruin'd, had the Cingalese purfued their victory. He told them, that before the battle, they had not left above three hundred men at Columbo, which had occasioned such fears and tumults in that city, that the fame might have been eafily furprized with a moderate force; and that upon the return of the general from the army, he had ordered feveral to be hanged upon that account.

upon that account.

The 29th of August, the emperor decla-Thrimpined, That he would marry the daughter of the main the late empress by her first husband, alledge rise by ing. That he had debauched her before, suggisting. That he had debauched her before, suggisting, That he had debauched her before, suggisting to the match; but the prince of Migonne opposed the same, telling the emperor with a great deal of freedom, That to commit incest was directly contrary to the word of God; and that for that reason he could never approve of it, but was obliged to put his imperial majesty in mind of his falvation. These words having drawn tears from the emperor's eyes, he promised to lay asside all, thoughts of that nature for the future, and to converse with her no otherwise than a father might do with his daughter.

The 5th of Oslober, those of Candy defeated convoy of nine hundred Portuguese, that were marching with provisions and ammunition to Candy, but had not the same success in another enterprize; for having laid an ambush of five hundred men, to intercept the Portuguese general, as he was coming from Columbo to Walane, the Portuguese having got intelligence thereof, sent a stronger body, which surrounded them, The Portuguese, who hid themselves among the dead, hundred till the night gave them an opportunity to Candinch make their escape.

Towards the end of the year 1614, the inhabitants of Batecalo having murdered the ambaffadors of the king of Palugam upon the road, a furious war enfued betwixt them, in which the last worsted (with the assistance of the prince of Ouve) the king of Batecalo, who was himself treacherously murdered, and his kingdom bestowed upon the king of Palugam.

feizes Boichhou-

Baldaus, charge he had been at in the equipment of this squadron; for which reason he seized The Danish upon all Boschbouwer's effects abourd his vefcommodore fels, after having taken care of his burial, which was performed with little pomp; but that of his fon of three years of age, (who being born at Copenhagen, was godfon of king Christian IV. and died likewise in this voyage) was done with more folemnity. The feizing of Boschbouwer's effects being performed in the harbour of Trinquenemale by Gule Gedde, he fent his widow at her request to Candy, stripp'd of every thing, except what fhe had faved privately by the affiftance of fome friends, from whence after a flay of feven years, fhe was by the emperor Zenerat, (at the request of general Roland Crape) fent with some servants to Tranquebare.

After the departure of Boschbouwer's widow for Candy, the commodore Gule Gedde fer fail with part of his fquadron from Coutjare, in order to join the rest of his ships at Batecalo, and to follicite once more fatisfaction from the emperor; but in the mean while, one of his ships that was left at Trinquenemale being feized upon by the ship's crew, and afterwards split upon the rocks, the feamen and foldiers got with their boats to the coast of Coromandel, where some of them took service among the Portuguese at St. Thomas, the rest among the Dutch at Pa-Resums to liacatte. Gule Gedde having but small hopes Denmark, of fuccess, and fearing that some of the

other ships might follow their example, thought fit to weigh anchor, and take his

next course for Denmark.

The Portuguese being infinitely glad at the departure of these unwelcome guests out of Ceylon, now bent all their thoughts how to exclude all other nations from the traffick of that country: to encompass which, they judged it the most proper means to erect a fort near that harbour, the place whereof (after a narrow view taken of the ground, and various debates) was pitched upon at the north-west point of the bay, upon a neck of land jetting out into the fea, on the backfide of the Pagode of Trinquenemale, the walls whereof would be of confiderable advantage to them.

Accordingly the faid fort being begun guese erest 1622. was carried on with all imaginable a new set vigour to bring it to persection, before the emperor of Candy (with whom they were at peace then) could have any notice of it. For no fooner was that prince advertifed of this treacherous defign, but he protested against it, and sent a considerable force to demolish it; but being repulsed by the Portuguese, these continued the fortifications, being an irregular triangular fortress, which they furnished with great cannon taken out of the sea, belonging formerly to the Danish ship that was cast away near that Baldaus,

Whilst the Portuguese were embroiled with the Cingalese upon that account, a certain Radye of the Malabars entered the kingdom of Jafnapatnam with a confiderable force, in hopes to recover the same from the Portuguefe, who had lately conquered the fame: but Philippo d'Olivere their general, an old Rom the experienced captain, received them to brave. Malabers, ly, that few of them returned into their na-

The Portuguese having thus once more Build two rid their hands of their enemies, yet not more form thinking themselves secure, unless they strengthened their conquests by some additional fortifications, ordered certain new works to be made, which afterwards were changed into a royal fortress with four baf-The foundation whereof was laid, 1624. but not brought to perfection till the year 1632. being lined with white

But to establish themselves the better in this island, they concluded a peace (by the mediation of certain clergymen) with the emperor, who was willing to embrace it, till he could find a more convenient opportunity of revenging himfelf for the many affronts they had put upon him; one of the Mairput main conditions of this peace was, That the with the Portuguese should not build any other forts impaw. or fortifications in any place of the empire, but might remain in possession of what they had at present.

Notwithstanding this agreement, which was fo advantageous to the Portuguese, finding that the European nations had still a free access into the kingdom of Candy by the river Palliagamme, (otherwise called Batecalo,) they were contriving all possible means to fecure that paffage to themfelves.

To accomplish their end with all imagi-Commun nable fecrecy, they pitched upon a Miftice, of the Paran experienced engineer, who, being of a legueta dark colour, was sent in the disguise of a Gusuratte Jogy, or mendicane frier, from Columbo to Batecalo, who fettled himfelf in the village of Samanture; from whence having taken a full view of all the circumjacent country for two years together, he pitched upon a fandy place, about two leagues one half from the village, for the erecting of the defigned fort; but finding, upon ftrict enquiry, that the channel leading that way from the mouth of the river, was the greatest part of the year choked up with fand; and that confequently there would be no conveniency of getting fresh water there, he was forced to go about fix leagues lower down the river, where meeting with a fmall ifle of a league in circuit, and not above a mile diftant from the main channel, convey'd thither directly from the

These, at their arrival, having fecured themselves by throwing up fome intrenchments inclosed with palifadoes, to work they went with all expedition to perfect the intended fortrefs, which was of a quinquangular figure, with three baftions.
The king of Candy had no fooner intelli-

CHAP. XVII.

gence thereof, but he fent a good body of troops thither to prevent their delign: they made shift to land in the island, but were forced to retreat without effecting any thing, and leave the Portuguese to perfect their fortifications; which they did foon after, being well provided with all forts of materials for

fuch a purpose. The emperor finding himself thus by no straight less than leven expital forts, built on all Englishe the best avenues of the isle, reduced to such "Colum straits by the Portuguese, that without their confent he was not in a condition to keep the least correspondence with any foreign nation, refolved to try his utmost to draw these thorns out of his slesh. For this purpose he thought fit to try the inclinations of the Cingalese inhabiting at Columbo; and finding them ready to revolt by reafon of the many indignities received from the Portuguese, he engaged them to his par-Things being thus fettled, the only thing remaining was, how to entice their general Constantine de Saa to take the field, by which means they might find an opportunity of going over to the emperor. Knowing therefore that Don Michael de Noronba, Conde de Linbaros, the then viceroy of Goa, had lately wrote an affronting letter to the faid general, wherein he told him, That he was more fit for a merchant than a foldier, and that he regarded more his own profit than the king's glory, and his conquest, they infinuated into him, That fince both his expeditions against Candy had proved unsuccessful, it would not be amis (to retrieve his honour) to try his fortune against Ouve, promifing to appear in the field with all their power; which they did accord-

Constantine de Saa, the Portuguese general was fo highly pleafed at this proposition, that he not only gladly embraced it, but also sent a challenge to Comarra Singe Hastanne, prince of Ouve, eldest son of the emperor Zenerat Adascyn, who sent him The Porty, word, that he would expect his coming like guile take a man of honour. Accordingly the Portune field. guese general took the field the 30th of August with one thousand three hundred of his own countrymen, one thousand seven

hundred Missices, and eight thousand Cin-Baldens. galese; and the prince of Ouve being joined by his two brothers, Vysiapalla and Raja Singa, made up an army of twenty three thousand men, who (according to the advice of the emperor their father) kept at a distance, feeming to avoid an engagement. The Parsuguese being much surprized at their being fuffered to pass the mountains of Ouve without the least opposition, marched directly to Badule the capital city of that dukedom, Budule, which they took and plundered with all the circumjacent country, and fo retired again towards the mountains, the princes being all the while spectators of their ravages, with a refolution to watch their opportunity of taking a fevere revenge, so soon as the Cingalese (according to their promise) should

desert the Portuguese. These things were not so secretly carried on, but that Constantine & Saa got some fcent of the matter. This made him fummon before him all their chief officers, unto whom he represented the reasons of his fuspicion, but in very obliging terms, thinking it his best way to dissemble, yet to use all imaginable precautions against them. They positively denying what was alledged against them, he continued his march till night, when finding the enemy to keep closer to him than they used to do, and being confirmed in his former suspicion by fresh intelligence, he ordered the Cingalese (contrary to what they used to do) to pitch their tents in the center of the camp, and the next morning with break of day for the whole army to fet fire to all their baggage, (except wearing apparel,) the better to fur-ther their march. They had fcarce marched a few hours, when the princes coming up pretty close with the Portuguese army, the eight thousand Cingalese joined with their countrymen, and with their joint-forces at- Are attacked them in the flank at the descent of a tacked in mountain, firing upon them very furioufly their march through an adjacent wood, whereabouts a great number of the Portuguese were flain, the Cingalese falling in pell-mell among them with their fcymetars and pikes, especially after a fudden from had rendered the And route Fortuguese firelocks almost useless, without which they might probably have made a tolerable good retreat. Constantine de Saa their general had his head cut off by one of the rebellious Cingalese, which he prefented to Raja Singa upon a drum, whilft he was washing himself in a neighbouring brook. To confess the truth, de Saa deferved a much better treatment, both in refpect of his valour, and the many good offices he had done to the fame Cingalese at Columbo, who now so basely betray'd him and his whole army.

CHAP. XVIII A Description of CEYLON.

Baldaus. It is not eafy to be imagined what a con-· sternation this general defeat occasioned among the Portuguese in the ifle of Ceylon, and especially at Columbo; for the desence whereof there were scarce any troops left behind, except a few of the most antient Columbo among the inhabitants. This encouraged believed by the emperor to fend his youngest fon Ma-the Cinga bastanne, (afterwards named Raja Singa,) to lese. form the fiege of that place, which he did accordingly 3 but was so bravely received by

Lancerotte de Sefies their governor, that af-Balden ter a whole month's fiege, he was forced to retreat without effecting any thing. The belieged being afterwards reinforced from Goa with four hundred men, (among whom were three hundred Caffers,) with a confiderable quantity of provisions, ammunition, and other necessaries, began to hold up their heads again, and bid defiance to the

CHAP. XVIII.

The Emperor dies. Intestine Divisions betwint his two Sons. The Portuguese at War with the new Emperor; make Peace with him. The Hollanders invited, by his Majesty's Letter to the Governor of Paliacatta, to come into the Isle of Ceylon.

The older SOON after, viz. 1632. the old emperer dies. Soon happening to die, left the empire betwixt his three fons, viz. Ouve to Commarra Singa Hastanne his eldett son, Matele to Visia Palla Hastanne his second, and Candy to Mabastanne the youngest, who, beeft son seizes the name of Raja Singa Adascyn, to the no fmall diffatisfaction of his eldest brother Comarra Singa Hastanne, whom he knew so well how to amuse under different pretenfions, that the matter remained undecided as long as he lived; and, immediately after his death feized upon the province of Ouve, which Vifia Palla in second brother (who claimed one half for his fhare) took so heinoufly, that matters came betwixt them to an open rupture.

The Portuguese having by this time received divers supplies from Goa, and pretty well recovered of their late difgrace, re-The Portu-folved to improve this opportunity to their gin a war advantage. For which purpose entring the agamst the Low Lands, they forced most of the princes there to fide with them, but durst not venture to attempt the paffage of the mountains. They pitched their tents therefore near Allago, as the most proper place to keep the adjacent country in awe: but Raja Singa, the new emperor, furprized them in their Are beaten. camp, and forced them to retreat with all haste to Columbo.

The Portuguese now finding themselves unable to cope with the emperor, thought it requifite to come to an agreement; for which purpose having sent their envoys to Makepeace. Candy, a peace was concluded accordingly; but foon broken again on the Portuguese fide, who let flip no opportunity to improve their advantage, notwithstanding the faid peace.

Raja Singa being thus fully convinced, that no firm peace was likely to be fettled with the Portuguese in Ceylon, diffembled his refentment; but in the mean time refolved to invite the Hollanders to force them out of the ifle; and accordingly fent the following letter, dated Sept. 9. 1636. to the governor of Paliacatta.

I Raja Singa, emperor of the isle of Ceylon, king of Candy, Settevaca, Danbadany, Anorayapore, Jafnapatnam, prince of Ouve, Mature, Dinavaca, Quatre-Corle, great duke of Sette-Corle, Matalte, earl of Catajar, Trinquenemale, Batecalo, Valefebuitena, Dumbra, Panoa, Patoveta, Putelaon, Vasfare, Gale, Billigaon, marquis of Duramira, Ratenura, Tinipane, Axcepaon, lord of the ports of Alicaon, Calcture, Columbo, Negombo, Chilao, Madampe, Calpentyn, Ariputure, Manaar, and of the pearl-fishery.

Hough I do not question but that The Dutch fame has already made known to invited anyou the good fuccess of our arms against to Cevina the Portuguese, yet did judge it absolute-perori luly requifite to give a more particular ac-tir, count thereof to the governor of the fortress of Paliacatta. First of all the emperor did regain from the Portuguese the two fortreffes of Walane and Forago, as likewise the city of Marua Goma, with five hundred Portuguese inhabitants, and a good number of monks of divers orders. Don Nuno Alvares Perere being then their general, thought thereupon " fit to make peace in order to recover "the prifoners taken by the emperor's " forces. About eleven years after the conclusion

Raldeus." conclusion of the faid peace, Constantine de " Saa, being made their general, did trea-" cheroufly furprize Jafn. patnam, and built " the forts of Batecalo and Trinquenemale, giving no other reason for their so doing to the emperor, than that having certain intelligence, that some of their European enemies were coming to fettle there, they were forced to erect these fortifications " for their own defence. About a year after the frier they had left their holtage at Candy, being eleafed by the emper-" or, (according to his parole,) they made a powerful irruption into the empire: and after their retreat the emperor happening to die, I had scarce ascended the throne, but within eleven months after they made another incursion; but encountring them near Ambatana, we forced them to retreat with confiderable lofs. Seven months after they invaded the dukedom of Ouve, where we routed them in a fmart engagement; and the rebellious natives having deferted them, " and joined with us, (according to their " duty,) compleated our victory : their general, a major-general, and the governor of " Dinavaca, being flain upon the fpot, with four hundred foldiers, and their colonel of " the artillery, their governor of the feven Corles, and Matura, with three hundred " foldiers, many captains, and enfigns ta-" ken prisoners. Since that time we took " the fort of Mantea Ravane with one " hundred Portuguese soldiers with their " captains, and another fort in Sofragaen, with three companies, befides that two " other fortifications of theirs were demo-" lished. It was much about the same time " that I kept the city of Columbo invested " for thirty days; but finding my felf ill, " I returned to Candy, leaving the command of my forces to Mara Tana Wan-" daar, who, within fifteen days after my " departure retre ting thence, thereby gave an opportunity to the enemy to protract "the war for a year and half, and after-"wards deferted in perfon to the enemy. " I did also fall into the enemies dominions, and having entrenched my felf near Ga-" netena in the four Corles, I did confider-" able mischief, so that the new governor " of Columbo, Diego de Melo de Castro, " (formerly governor of St. Thomas,) fent " thither from Goa, was forced to fue for " peace, which I granted to prevent the " miteries and calamities of a long war, " the faid general having fworn by the " name of his God, and in his king's flead, " to deliver up the forts of Trinquenemale " and Batecalo, and to release all prisoners " on both fides. Thirteen months after the " conclusion of this peace, the governor of Vol. III.

" Batecalo did fide with certain rebels, in Baldaus. order to affaffinate one of my governors, aiding and affifting them also in robbing a bark belonging to me, and committing divers treacherous acts in many parts, as well of our own kingdoms, as those of other Indian princes; therefore I have taken a resolution to rid my hands of these enemies, and to declare my felf a brother in war with the king of the Hollanders, as long as the fun and moon shall rejoice us with their light, and the viceroy of Jacatra and the governor of Paliacatta shall be willing to assist me, in hopes that this confederacy with the Dutch nation will answer my good intentions and sentiments of them. I the king let the governor of Paliacatta know, that during the feven years fince my accession to the throne, I have made the best enquiry I could who was the most potent king in Europe, in order to oppose the deligns of the Portuguese: and being at last informed that the king of the Hollanders was not only a scourge to their king, but also supported by the strength and power of feveral other kings his confederates, I took a firm refolution (relying upon the fidelity of the governor of Paliacatta) to declare my felf a brother in war to the king of the Hollanders as long as fun and moon shall continue in the firmament. "Tis true, fome treaties of this kind have been made formerly betwixt my predeceffors and the viceroy of Jacatra, and the governor of Paliacatta; but these having proved ineffectual, it feems as if it had pleased God to bring the same to perfection under my reign, in hopes that the governor of Paliacatta will with all possible care second our endeavours, whereof we give him affurances upon our royal word, that they shall be at liberty to erect a fortress either at Cotiar or Batecalo; for which purpose they may employ a squadron of five ships, (a force sufficient to ballance the present strength of the enemy,) who may be fecure of our affistance, either by my felf in person, or by my brother. All the cannon or booty taken by them shall be at their own disposal; and they shall be provided with all forts of materials requifite for the building of a fort either at Batecalo or Cotiar. I further engage my felf by my royal word, to repay the governor all the charges he shall be at in equipping the faid fquadron to be fent to my affiftance, to which of the before-mentioned harbours you please. If the governor approves of these propositions, let him send a vessel to Trinquenemale or Cotiar, in order to

 - perfection, he shall be well rewarded for
 his service according to his dignity and
 merits: but if it be beyond his power,
 - 46 let him dispatch this messenger with all " fpeed to the viceroy of Jacatra.

Dated the 9th Raja Singa Imperador. of Sept. 1636.

A certain Brahman being dispatched with Baling this letter, the fame lived for fix months undiscovered among the Partuguese at Justiapatnam, before he could meet with a conveniency to be transported to the coast of Coromandel; from whence he purfued his journey by land to Paliacatta, where he delivered Raja Singa's letter to the then governor Charles Reyniers.

CHAP. XIX.

A Treaty; and Letter in return of that of the Emperor's. The Dutch Deputies in Ceylon are honourably received. Their Transactions: and return with the Emperor's Ambassadors. The Portuguese endeavour to render the Dutch suspected. The Emperor's Answer to the Dutch Admiral.

Harles Reyniers, the governour of Paliacatta, (afterwards general of the Indies) had no fooner received this letter, but he fent the fame to Batavia to the general and great council of the Indies, who after mature deliberation refolved to fend perf the count fon fitly qualified for fuch a trust aboard the Falcon yacht, in order to enter into a strict amity and commerce with the emperor, and to procure a confiderable cargo of cinnamon; whereof immediate notice was also to be given to the Dutch fleet before Goa.

It is to be observed, that sometime before this letter was brought to Batavia, the general Anthony van Diemen, and the council of the Indies, had already taken the affairs of Geylon into their confideration, having ordered the beforefaid Mr. Reyniers to make all poffible enquiry, whether it were not feafible to get fome fhare as well as the Portuguele in the cinnamon trade. One John Thiissen, a master of a vessel, (afterwards governour of Malacca, and now a member of the council of the Indies,) who had been a prisoner in Ceylon, having also lately given the faid council an exact account of the condition of the ifle, it was refolved 1637. to fend him forthwith with three yachts, the Falcon, the Voorburgh, and the Leffer Hollandia, and the Ruttem frigat, to the coast of Coromandel; where coming to an anchor before Paliacatta the last day of August, and their commissions being opened. he was, in conjunction with the factor Andrew Helmont, constituted envoy to the emperor of Ceylon.

Accordingly the 21st of Ostober they took veys fent to their way towards Tegnapatnam, where having furnished themselves with two negroes

acquainted with that country, they fet fail for Ceylon, where they arrived within five or fix days after, and cast anchor near the village of Calmony, or Calarme, about feven leagues from the Cabo de Fradres, i. e. the Monks Cape. They fent immediately one of the two before-mentioned negroes afhore, to get intelligence what part of the country they were in s which being done by a certain fignal, (a fire made upon an adjacent hill,) they fent him, after his return, in company of the other negro with a letter of recommendation from the factor Chrimma to the emperor of Ceylon, under promife that they were to return in fixteen days; which they did accordingly, bringing along with them not only certain hollages, and among them a certain Hollander, who, living at the emperor's court, was willing to accompany them, and gave them very good intelligence, but also the lord hightreasurer of his majesty, and John Alberts another Dutchman, a native of Embden (who having deferted from Mr. Anthony Car's thip, had nince ferved the emperor in the quality of a court-martial) in order to conduct our envoys to the imperial court.

Accordingly they fet out on their journey from the village of Samanture, and in four days arrived at Pangergame in the country of Vintane, where they were introduced the fame night by the light of torches into the Hate Me emperor's presence, who then kept his rest- dieses of dence at one of his pleasure-houses on the the emptother fide of the river Mavilgange. Their ". reception was very magnificent, as will appear anon by the entertainment given to Mr. Gerrard Hulft, whereof we shall have occafion to give a more ample description. The

Rallous, credential letters written by the governour of Paliacatta, and delivered by the envoys to his imperial majefty, were as follows:

To the most potent emperor Raja Sin-

Most Potent Emperor!

Latter from sa 1 OD protect your imperial majesty. Your majesty is not ignorant of the Your majefty is not ignorant of the least to long and tedious wars we have for fo many years last past carried on (by the Crien. 45 bleffing of God) with good fucces, both 45 in Europe and the Indies, against the king " of Spain and Portugal; and how at this " time we keep Goa, their chief city in the " Indies, blocked up with fo numerous a " iquadron of men of war, that they are " not in a condition to relieve any of their "fubjects from thence. We have underflood by your majefty's letter the many " outrages, infolencies, treafons, and wars, " carried on by the Portuguese against your " majesty since their settlement in your ter-" ritories, contrary to the engagements, " treaties and confederacies made betwixt " you and them; all which they have treacherously broken, in order to make "themselves masters of your empire, and " to impose the most miserable slavery up-" on your subjects. Our general of Jaca" tra being informed of these designs, and " your majesty's most commendable intentions to free your country from fuch un-" welcome guests, and to secure your sub-" jects against all violences, by sweeping " out the very remnants of the Portuguese: " the general, I fay, being extremely re-" joic'd at this refolution, and more efpe-" cially that your majefty defired our affift-" ance, did give immediate orders for the difpatching of these envoys, to treat with " your majesty, and to declare to you the " fincerity of our intentions towards your " majefty and your fubjects, in the fame " manner as the effects thereof have been " fufficiently approved by many of your " neighbouring princes and nations. If your majefty will be pleafed to allow us " the exportation of fome cinnamon, we " oblige our felves to affift your majefty " with muskets, powder, ammunition, " and other arms; so that in case you will " order two or more ships cargoes of cin-" namon to be got ready for our use against " May next, we either will pay ready money for it, or exchange the fame for ammunition or other merchandizes, as your majefty shall think fit. So foon as our envoys are " affured of your majetty's refolutions upon "this head and of your intentions to " enter into a further treaty with us,

" they shall (according to orders) fet fail im-

mediately to our fleet before Goa, to Baldaus. confer with the admiral how foon and how many ships may be detached out of his fleet either for the transportation of the cinnamon, or your majefty's aid, according to the present exigency of affairs. We defire therefore your majesty to give these envoys, fent with a most sincere intention to your majesty, a suitable reception, and a savourable audience: and afterwards to difpatch them with all convenient speed, to further their arrival at our fleet before Goa, before the Mouffon be paffed, which otherwife might prove no fmall obstacle to our defign. We acknowledge we ought to have prefented your majesty with some foreign rarities (according to custom;) but being ignorant of the condition of your country, and in no small fear that these envoys might perhaps be detained by the Portuguese, we hope your majefty will excuse the same for this time. We pray, most potent emperor, that god may grant your majesty health, prosperity, and victory over your enemies.

Dated in the fort Geldria, the 20th of Octob. 1637.

Subscribed,

You majesty's most deovted fervant,

Charles Reyniers.

The emperor, whilst the envoys were Transaction making their propositions, stood with the one of the crown on his head, and a feymetar in his envoys. hand, his head, arms, and legs adorn'd with jewels, rings, and chains of gold. He enquired after the flate of affairs in Holland. the health of the prince of Orange, and whether the envoys had a full power to treat with him. Unto which they answered, No: but that the admiral of the Dutch fquardron before Goa had. So they were conducted to the apartments prepared for their reception, to reft themselves after so fatiguing a jour-

The next day, being again admitted into the emperor's prefence, he asked them feveral matters concerning the prefent state of affairs in Europe: The Portuguese having made it their business to represent the Dutch as an inconfiderable Mob; and the emperor nevertheless having, by the great naval strength that appear'd of late years in the East-Indies, conceived a quite different opinion of their strength than what had been whifpered about by the Portuguese, was very glad to find the truth to prove agreeable to his former fentiments, concerning the power of a nation with whom he was going into a strict confederacy against the Portu-

Baldens, guefe. The next following day they began to enter upon a treaty about the cinna-mon, and the fort of Batecalo. Whilft his majefty held frequent conferences (twice a day for a whole week) with our deputies, a letter was fent to the king or The Portus prince of Mateli (the emperor's brother) guete en- by Diego de Melo de Castro, governor of

guele en-deavour to Columbo, wherein he complained of the in-

dispatch.

miral.

render the tended breach of the peace, stiling the peace. Hollanders rebellious subjects of the king of Portugal, who had incurred the hatred of all the other Indian princes. He added, That the emperor was guilty of this rupture, whereof be had given notice in a letter to the viceroy of Goa. His majesty defired that the faid letter should be translated into the Dutch, and be delivered by the envoys to the admiral before Geas and told them for the reft, that he was too well acquainted with The empe. their ways, to give ear to these calumror's cour- nies: That he would endeavour to ately to the muse them with compliments, till he he could find an opportunity of fur-prizing the fort of Mankeware in the Low-Countries, near the fouth shore of the

isle. He writ also a letter to the admiral Westerwold, and ordered three deputies to go along with our envoys to take a view of the fleet before Goa, and to give account thereof to him. The 27th of the fame month his ma-

jesty thought fit to dispatch the envoys: Palankyns, or litters, were ordered for their journey, with fome elephants for their baggage, and a convoy of twenty Lascaryns, under the command of a colonel to conduct them, with orders to defray their charges in all places through which they passed. It was further remarkable, that whilft the governor of Paliacatta's letter was delivered to his majesty, and the envoys made their propolitions, he arose from his chair, and remained standing all the while, an honour never done to the Portugueses. The Dutch envoys set sail

December, with the three before-mentioned deputies aboard the Falcon yacht, and coming up the 19th following with the Dutch fquadron before Goa, they delivered to Adam Westerwold, their admiral, the following letter from his imperial majefty.

the 4th of the next following month of

TAVING fent a letter in Septemthe empeber to the governor of Paliacatta, rer to the Dutch ad-

of November, 1637. but the envoys not being instructed infliciently to treat with me, but the fame being referred " by the general of Jacatra to the admi-ral of the fleet, I thought fit to fend " certain deputies to treat with your ex-cellency. The before-mentioned governor having made men on also of the transportation of a certain quantity of cinnamon, your excellency, if you please, may fend five men of war to attack the fort of Batecalo, and fome other veffels to other harbours, in order to take in all the cinnamon that is to be had there. I am informed that you intend to flay before Goa till April next, and then are to "return to Jacatra, in order to return af-terwards with all possible speed to the harbour of Columbo; and thence to detach three ships to the harbour of Batecalo, in order to make themselves mafters of that place. I will at the fame time advance with my forces to Columbo; and in case god be pleased to bless our arms with victory against our enemies, I dare affure you, upon my royal word, that the city shall be preserved for our mutual uses and that we will enter into a contract with you concerning all the pepper and cinnamon in the isle. It is therefore that I judge it advisable to come with your whole strength, in or-

der to accelerate our confederacy, which may be as durable as the fun and moon:

But if this should not be convenient,

CHAP.

Baldaus, the Dutch veffels did what they could to advance closer to the enemy; and at last having got the advantage of the fea wind, they were for boarding the Portuguese ships, having sent the Texel and Dolphin frigats, two fire-ships, to get in among them; but these setting it before the wind, avoided that danger. The Dutch admiral Westerwold, did his utmost in his ship the Utrecht to board the Portuguese admiral; which he perceiving, retreated towards his squadron, which made the Dutch admiral fet it with all the fail he could make upon their viceadmiral, which he did with fuch fuccefs, that the Portuguese was forced to cut his fails and cables to get rid of his enemy, whilst the whole Portuguese squadron plied the Dutch admiral with their cannon, who thereby received confiderable damage, efpecially in his rigging. Our flip the Vere would have boarded the St. Bartholomew, but they got clear of one another; yet not without receiving a good broad-fide from the ship the Hague; and the Flissingen finding the Portugue/e admiral engaged with these two ships, she laid the Bartholomew aboard, and with the affistance of the Hague A Portu. plied her fo warmly, that fhe was fet on fire, guese thip the rest of the Portuguese ships retreating in with two the mean while towards the shore. Such Dutch vef- was the violence of the slames, that notwith-

flanding all the endeavours that were used, Baldeut, the Hague was also set on fire, and soon after the Fliffingen, and were all three confum-

ed by the flames.

The Portuguese in the mean while taking the advantage of the confusion, made the best of their way towards the road of Goa, being purfued for one league and an half by the Rotterdam, Vere, and Texel, close under their forts; the relt of our ships being bufied in faving the men from the danger of the fire, and in repairing their masts and rigging; so that the victory remained on our fide, which would have been very con-fiderable, had the fame been not allay'd by the burning of the two before-mentioned

The loss of the Dutch amounted to thir-Lafanish ty five men, among whom were captain fides. Herman Wolters Baak; belides fifty wounded, among whom was the factor James Nolpe. The loss on the Portuguese fide amounted to seventy eight Portuguese, and one hundred and fifty Mistices and negroes. Don Lewis de Castelbranco, and father Laurence de Merinda, a jesuit, were taken prifoners, with ninety Portuguese, and forty nine Mistices we negroes, being faved by the fame boats that came to fave their own men, and exchanged afterwards for a captain and a factor, and eight other

William Jacob Koster fent to Ceylon by Admiral Westerwold. The Portuguese march to Candy; are totally routed by the Emperor. The Dutch besiege Batecalo.

ADuch THE 23d of January, 1638. the Falto Batavia, with advice of the late engage-ment, and fome merchandizes, as also the fick and wounded to be disposed in the hofpital there, our fquadron confifted only of feven capital ships and two yachts. But the Dutch admiral perceiving the Portuguese to make not the least preparations of attacking them a fecond time, it was refolved in a council of war, to fend Mr. William Jacob Kefter commodore, with the Texel, the Amflerdam, and Dolphin, mann'd with one hundred and eighty men and feventy foldiers, to the ifle of Ceylon, to give notice to the emperor of the intended fuccours against May, and in the mean while to offer his affiftance in the fiege of fome fort, or other, belonging to the Portuguese; for which purpose the admiral writ the following letter to his imperial majefly.

> Adam van Westerwold, counsellor extraordinary of the Indies, and admiral of the Dutch steet, wishes the most patent emperor of Ceylon, king of Candy, &c. all hapsings and prosperity, with the utmost offer of his fervice, for the throwing off the intolerable yoke of the Portuguese.

Most potent Emperor!

To Durch 14 W HIII.ST the illustrious general and council of the Indies, under sense of 14 the jurisdiction of the United Provinces, Crium.

were employ'd in equipping a fquadron of fixteen ships, to be fent from Batavia before Goa, in order to annoy our " common enemies the Portuguese, and to prevent their fending any carracks or galleons, during the late northern Mouffon to Porty 1, the ship the Husdwynen arrived at datavia from the coast of Coromandel, with letters from the governor of that coaft; wherein was inclosed your majesty's letter, dated at Candy, Sept. 9. 1636. The faid general and council of the Indies, having understood by these letters, the many treacheries and outrages committed by the Portuguese in your majesty's dominions; and that you were pleased to crave their affistance for the defence of your country, and rooting out our common enemies, offering for that purpose to have either Batecalo or Cotiar (which of the two we should pitch upon) fortified at your own charge for our use, as likewise to give satisfaction for all the charge we should be at in the equipment of fuch thips as thould be fent to your affiftance : these propositions having been well weighed by the general and council of the Indies, it was refolved by them, purfuant to the good inclinations they have to your majefty, to comply with your defires. And it appearing by your majesty's letter, dated November 21, 1637, and fent to me by the Falcon yacht, that you still perfift in " the fame laudable fentiments, I took im-

Baldaus. " mediate care to fend a veffel and two vachts, to advertise your majesty of our coming under the commodore William Jacob Koster, the second member of my council, who is to treat with your majesty concerning our intended defign, and to concert measures which of the Portuguese forts may be most conveniently attacked at our arrival, and where your majesty's forces are to rendezvous, in order to affift in the taking of the faid " forts; for which purpose a certain quantity of ladders of bamboes, besides some other materials, must be got ready. Your majesty's deputies who come with these ships, will be able to give you a more compleat account by word of mouth, concerning our intentions. If the blockade of Goa " be raised by the end of April, I intend (purfuant to the orders received from the general and council of the *Indies*) to fet fail in person with three of my biggest ships well provided with men and ammunition for Ceylon, to confer and treat more amply with your majesty concerning our projected design. I hope your majefty will according to your promise, order two ships cargoes of cinnamon to be got ready against our arrival. I wish your majesty a long life, and victory against your enemies.

The before-mentioned commodore Kofter Koster 47- having set fail accordingly, March 17. from Goa, with the three ships, the Texel, Little Amsterdam, and Dolphin, came to an anchor the 2d of April following, near Trinquenemale, a harbour on the north side of the ifle of Ceylon, where the emperor's deputies being fet ashore, in order to deliver the admiral's letter at *Candy*, and give notice of the arrival of the Dutch ships, they understood, that the emperor immediately after the departure of the Falcon yacht, had caused a good quantity of cinnamon, wax, and pepper, to be laid up for our use. The Portuguese had no sooner notice thereof, but they fent a letter to his majesty, asking the reason, Wby be bad ordered such a quantity of merchandizes to be laid up, which, pursuant to the contract stipulated betwint them, belonged only to them? The emperor returned them no other answer, than That be baving promised the same to his friends the Hollanders, he would try who should dare to oppose it.

This resolute answer so nettled the Por-

The Portu-

guese pus tuguese at Columbo, that being now fully convinced of the confederacy betwixt the emperor and the Dutch; and that they must foon expect to be attacked at Batecalo, they were put to the greatest nonplus, what refolution to take in this prefent exigency

of affairs. Some confidering, that having Baldeus, fcarce been able to cope with the emperor alone, they would not be able to relift his efforts when fustained by the Dutch, were of opinion to embark all their treasure, men, and artillery, to demolish the fort, and set fail for Goa.

But the braver fort rejecting this propolition as base, and inconsistent with their king's honour, refolved, rather than thus to quit an iffe, which they had fixed themfelves in with the lofs of fo much blood and treasure, to venture the utmost, and die in the attempt. Damijao Bottado, who had laid the first foundation of the fortress of Batecalo, proposed, among the rest, That they ought to gather all their forces, and march up to Candy, before Raj. Singa could be joined by the Dutch.

This advice being approved of, they They march marched in March 1638. under the com-town di mand of their general Diego de Melo, the Candy, before-mentioned Damijao Bottado, and the major-general Sorde, towards Candy.

The emperor having got notice of their march, retired from thence with all his people, leaving the city to their mercy, which they took without any opposition 3 Take and and having plundered and burnt the fame, 6000 it, directed their march to the mountains of Gannor, or Gannero, where they pitched their tents, their whole force confifting of two thousand three hundred Portuguese and Mistices, and fix thousand negroes

This it was that the emperor had follow looked for, who immediately ordered the road to Walane, and all other places through which they were to pass, to be stopped, by laying great trees cross the roads. The enemies finding themselves reduced to these straits, the Cingalese unanimously revolted to bear ftraits, the Cinguege unanimously revealed to the emperor; fo that the Portuguege fee-of by the Cinguese. ing not the leaft hopes of escaping by force of arms, had recourse to two friers, one a Franciscan, and the other an Austin monk, who were fent to endeavour to obtain them a free passage from the emperor to Columbo. But the emperor gave them fuch an answer, that the friers thought it their fafest way not to return to their camp; so that the Portuguese finding themfelves past all reprieve, the general de Melo asked Bottado what was to be done, and which way they fhould efcape the danger into which they were drawn by his rash advice, who gave him no other answer, than that they must die together.

The emperor Raja Singa in the mean while kept close in his camp, watching all the opportunities of attacking them with the utmost advantage, which foon happened; for a violent storm of rain (which he knew would render the PortuHAP. XXI.

him draw out his troops against the enemy; and putting the musqueteers in front, he ordered them after the first discharge to retire, and give way to five thousand bownen of Mangel-Corle, who being sustained by as many pikes, did break in with such furth furth furth furth furth furth furth minto disorder, and immediadate arely after to the rout, with the slaughter of all the Portuguese, except a very sew who obtained mercy at the conqueror's hands, amounting in all not to above seventy perfore.

The emperor was a spectator of this engagement from a tree near the bank of a river, which ran betwitthim and the mountain of Gannoor, whither they brought the heads of the Portuguese sain in the battle, a pramid which were heaped up in form of a pyramid simultibe before him. All the great officers of the Portuguese lost their lives near the mountain of Gannoor; and among them their general de Melo, whose sword was afterwards

presented by the emperor to the admiral Baldaus. Westerwood.

In the mean while matters having been concerted with the Modeliar, or governor of Mattaclape, concerning the Portuguese fortress of Batecalo, they set fail thither ; Siege's and having landed one hundred foldiers, and Batecalo. as many feamen in two troops, they foon raifed two batteries with the affiftance of the natives, one on the east, the other on the fouth-fide of the fort, upon each of which were mounted four brafs demi-culverines; and the emperor having left the gross of his army under the command of his brother the prince of Mateli to invest Columbo, joined our forces before Batecalo, April 14. in person, with a detachment of two thoufand men. Commodore Kofter being received by his imperial majesty with all posfible marks of honour, they immediately en-tered upon a debate, how to attack the fortress with the utmost vigour upon the arrival of the rest of our ships.

CHAP. XXII.

Adam Westerwold's Arrival in Ceylon. Batecalo taken. A Treaty betwixt the Emperor and Mr. Westerwold.

THE admiral Westerwold having set fail the 22d of April from before him Bb Goa, arrived at Batecalo the 10th of May with the ships the Maestricht, Harderwick, Rotterdam, Vere, and the Enchuysen yacht, having on board eight hundred and forty men, officers, foldiers, and mariners. The next following day having landed his men, with fix great pieces for battery, the fame were mounted immediately, in order to fa-cilitate the paffage of their forces into the ifle upon which the fort was built: this being executed accordingly the 18th, and five hundred men brought over under favour of the cannon, while play'd inceffantly for four hours upon the Laringuese, they put out the white flag immediately, and fent two deputies to capitulate with the Dutch admiral, which was foon done upon the latealo following conditions: That they should furmendered render the fort immediately, and be permitted to march out without arms or baggage. The Portuguese and Mistices, to the number of one hundred and eight, with their wives and children, to be transported in a Dutch veffel to Negapatan, but the natives to be delivered up to the emperor; which was ex-Storn pu- ecuted accordingly, fifty of them (who had "firmst of murdered one of his majetty's gentlemen) the being empaled alive, and the rest fold for flaves with their wives and children. VOL. III.

The fort of Batecalo is feated in an ifle of A defripabout two Dutch leagues in compafs, three treads. leagues within the mouth of the river of Batecalo, which has given it its name. It was fortified with high flone walls and three paffable baftions, upon which were mounted eleven iron and brafs cannons, befides fome leffer ones, with a fuitable proportion of ammunition. We found in it rice fufficient for two months; but their fresh-water being about a musket shot without the fortrefs, the dutch had made themselves masters of that spring. Commodore Koster was made governor of the fort, with a garrison of one hundred Dutch soldiers.

After the taking of this fortress, the admiral Westerwold made an alliance with the emperor of Ceylon in the name of their high and mightinesses the states-general of the United Provinces, his highness Frederick prince of Orange, and of the honourable East-India company, with the approbation of the general and council of the Indies, upon the following conditions:

I. A Firm and stedfast amity shall be Alliance maintained betwist his majesty and betwist this fiberous the his subjects and the Dutch nation and their Ceylon and East India company, who shall assist his the Dutch majesty upon all occasions against the Portugues.

8 A

II. As

co two as will de the model

Baldæus. II. As often as any place or fort is taken by the Dutch, with the affiftance of his majefty, from the common enemy, the booty to be divided share and share alike.

III. After the taking of any forts, the *Dutch* shall provide the same with necessary garrisons and aumunition; and if anything be wanting to compleat the fortifications, the same shall be done at the charge of his majesty, as it shall be thought requisite by the *Dutch*.

IV. His majefty obliges himself to pay punctually every month their soldiers and officers

V. As also to build in the conquered places or forts (where no houses are before) a house of stone, (as the *Dutch* shall think fit,) to be used for a warehouse, as also a magazine for their arms and naval stores.

VI. In case his majesty designs any thing against the common enemy, the same is to be consulted with our chief officers.

VII. For the fecurity of the rivers, his majefty is to furnish a certain number of galleys and galley-slaves, which are to be provided with foldiers and ammunition by the Dutch.

VIII. His majefty and his subjects oblige themselves to make full reparation of the charges the *Dutch* have been at in equipping the present fleet, yachts, vessels, &c. and furnishing them with men, foldiers, of Baldeau, ficers, ammunition, provisions, &c. or of cuch other ships as the general and council shall for the future send to his majety's affistance into Ceylon, with their necessary men, ammunition, provisions, &c. the charges whereof shall be reimbursed in cinnamon, pepper, cardamum, indigo, wax, rice, and such other commodities as are of the product of his majesty's dominions, except the Mata or Wild cinnamon.

IX. His majefty, in respect of his friendship and good inclinations to the Dutch
mation, allows them free passage and traffick
in all his dominions, in the isse of Ceylon,
in all his cities, towns, villages, seaports,
roads, bays, rivers, &c. with their vessels,
yachts, boats, &c. to buy, sell, or exchange,
import or export, without the least molestation, or paying any customs under any pretence whatever. His majesty's subjects shall
not be permitted to sell the Dutch any cinnamon, pepper, wax, and elephants teeth,
except what is fold by the emperor's order;
who engages himself, that in case he should
have occasion to sell four, ten, twenty, or
more elephants, he will procure them the
like number at the same rate as they were
fold.

X. His majesty, and all the great men of the empire promise not to allow their subjects

nen, foldiers, of Baldaeu; filons, &c. or of meral and council to his majetly's he their necessary iffions, &c. the eimbursed in cinm, indigo, wax, nodities as are of s dominions, ex-

amon. pect of his friendns to the Dutch affage and traffick he isle of Ceylon, villages, feaports, with their vessels, fell, or exchange, the least molestams under any prefty's fubjects shall e Dutch any cind elephants teeth, emperor's order in case he should ten, twenty, or procure them the rate as they were

I the great men of t to allow their fubjects galdaus. subjects to traffick either with any European or Eastern nation, either by sale or exchange, in such commodities as are of the product of Ceylon, much less to permit the ships of these nations to tarry in the harbours of Ceylon, but to oblige them to depart forthwith. However the neighbouring nations of Daucy and Tanjouwer may pass and repass freely with their vessels.

CHAP. XXII.

XI. His majefty obliges himself to fend yearly to Batavia one or two ship-loads of cinnamon, pepper, cardamum, indigo, wax, $\&eta_c$ as a reimbursement of the charge bestowed in the equipment of the vessels sent to his affishance; and in case the said cargo should amount to more than the charges, the surplus to be paid to his majesty, either in ready money, or such commodities as his majesty shall think fit.

XII. His majefty having granted full liberty for the *Dutch* merchants, to travel, traffick, buy, and fell, the inhabitants shall be obliged to furnish them with beafts fit for carriage, for the carrying of fuch goods as they have bought either to their warehouses, or aboard their vessels. Furthermore, the said merchants or other *Hollanders* shall remain under the jurisdiction of the respective commanders or lieads of their own nation, as the natives of *Ceylon* shand under the subjection of the emperor.

XIII. No body, without exception, that trades with the *Dutch* here, shall have freedom to fell any such commodities bought from them to others, before the *Dutch* have fully received their quota; and in case of contravention, the *Dutch* shall have a power to feize his person, and to compel him to produce the said goods. Furthermore, in case any of the natives stand indebted to the *Dutch* for a considerable sum, they shall be subject to the same treatment; with this proviso nevertheless, that in case any of his majesty's subjects be taken into custody by the *Dutch*, notice shall be given thereof to the emperor or his governor.

XIV. No body, of what quality whatever, shall pretend to raise or diminish the coin, otherwise than has been agreed betwixt his majesty and the *Dutch*; and such as contravene this article on either side, shall without mercy be punished with death and consistation of their estates to his majesty's

XV. In case a Hollander should fly into his majesty's dominions, the same shall be delivered up; as on the other hand the same shall be done on our side, in case any of his majesty's subjects shelter themselves in our dominions.

XVI. After the conclusion of this treaty, neither his majesty, nor any of his subjects, shall maintain any secret or publick com-

merce or correspondence with the Portuguese, Baldaux. our common enemies, much less to traffick with them under any pretence whatever, but look upon them as their constant declared enemies: and in case any of his majesty's subjects shall be discovered to have sold them any commodities, the transgressor shall be punished with death.

XVII. His majefty shall not suffer any priests, friers, or clergymen to dwell in his dominions, but oblige them to depart as the authors of all rebellions, and the ruin of governments.

XVIII. In case any Dutch shipsemployed in his majety's service shall take any prizes from the memies, the same shall belong to the East-India company, with this proviso however, That the said company shall alone bear all the damages sustained by the said ships in any of these engagements.

XIX. In case the *Dutch* furnish any great cannon for the fortresses, or otherwise for his majesty's service, the same may be freely taken back, if occasion requires, without any hindrance, and be brought aboard of ship, or otherwise, where it shall be thought most convenient.

XX. Transacted and concluded thus, in the pretence of his imperial majetty of Ceylon and of Adam Westerwold member of the council of the Indies, and commodore of the squadron of ships on the coast of Ceylon; as also of William Jacob Koster, vice-commodore of the said squadron, at the royal palace, in the country of Batecalo, May 23. 1628.

Additional Article.

The Dateb oblige themselves to shew all possible favour and affistance to such vessels, as shall go from hence with his majesty's, or any of his governors passports to other harbours.

Signed,

Raja Singa Imperador; Adam Westerwold, William Jacob Koster.

Sealed with his majesty's and Mr. Westerwold's seals.

Pursuant to this agreement his majesty ordered four hundred balls of cinnamon, eighty seven quintals of wax, and three thousand and fifty nine pounds of pepper, to be delivered to Mr. Westerwold, in part of the reimbursement of charges they had been at, promising to deliver the rest, as soon as it could be brought together at the seaport of Samature; and to hasten the rational Rasissanian of the said alliance, his majesty sent of the said two ambassadors to Balavia, in company alliance.

Baldwas of Mr. Westerwold, with some presents to the general and council of the Indies; who being honourably received and treated there, were afterwards fent back with letters and presents for his majesty, with the yachts the Griipskerk, Faulcon, and Venlo, bound for the coast of Coromandel.

The emperor's army, in the mean while, being about twenty thousand strong, continued before Columbo; and the Portuguese Balden having been very unfoccessful in divers fal. Silvers, it was more than probable that this Columbo place (though the capital city of the Por. bifurd. iuguese in this isle) would be forced to sur-render upon the arrival of the expected Dutch fleet under the admiral Anthony do

CHAP. XXIII.

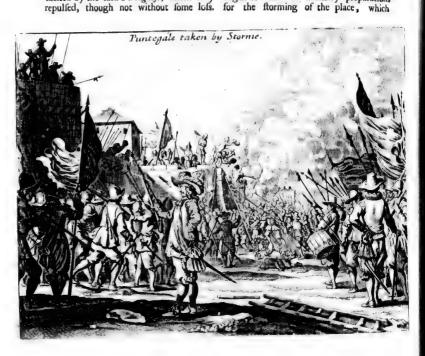

Puntegala taken by Storm by William Jacob Koster. Caleture befieged.

HE 8th of March, commodore Kofter being come to an anchor about noon in the bay of Puntegale, under the enemies cannon, he landed his men before night on the north-fide without any reliftance. Intelligence was brought by fome negroes, that they expected a reinforcement in the city of two hundred and fifty Portuguese from Columbo; notwithstanding which the Duteb divided their forces into three bodies, and advanced close under the fort: the 9th early in the morning, they were at-

tacked by the faid Portuguese, whom they

Nevertheless they kept our forces in con-flant alarm, those of Candy being the 11th of March advanced no further than Billigamme, fix leagues from Gale; but (through God's fingular mercy) three of our ships, viz. the Harlem, Middleburgh, and Breda, coming on the fame day to anchor in the bay, and landed four hundred men, as well foldiers as feamen, we were foon exempted from all fear.

The 12th finding they had made a fufficient breach in the bastion of St. Jago, they began to make all necessary preparations for the florming of the place, which

THE CITY OF GALE

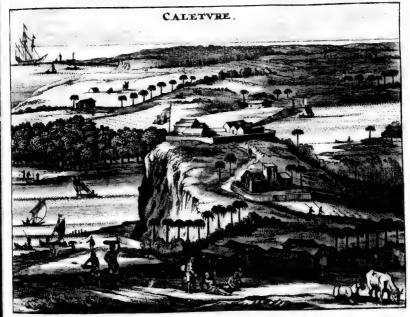

CHAI Baldæus. Raldaus. was done accordingly the 13th with such undaunted bravery, that, after an hour and half's flout refiftance, it was taken by affault. This city was afterwards, viz. 1663, and 1664, rendered almost impregnable by the Dutch by feveral additional fortifications; and this day is ever fince celebrated yearly

by a folemn thankfgiving.

Mr. Kofter (who was treacheroufly murdered by the Cingaleje, as Sebald de Weert was by his own imprudence) was fucceeded by John Thiissen, who is yet living, and has rendered himself famous for his many services done to the company in those parts. In his itead came John Maaizuyker, fince governor of the Indies, who has served in that thation fifteen years. He was fucceeded by Jacob van Kittenstein, in the presidentship of Gale; (the affairs of the company hitherto not admitting of the quality of a governor here) who died afterwards at Batavia, and was succeeded by Adri-an van der Meyden, in whose time Caleture, Columbo, Manaar, and Jafnapatnam, were taken. He was succeeded by Rylof van Goens and Jacob Hustart ; by which time the company having confiderably enlarged their limits in this ifle, a governor was conflituted at Columbo, the city of Gale being left to the management of a commander in chief, the first in that station being one Tsbrand Gotsken, a native of the Hague,

a brave foldier, fufficiently known for his Baldæus. fignal fervices done at the fieges of Columbo, Manaar, Jafnapatnam, and Cocbin, whereof he was governor afterwards, and fince chief director in Persia. Adrian Roothaas his fucceffor is a perfon who has rendered his name famous by fea, especially in the Le-vant and before Goa, as the former had done by land.

Gale has a commodious bay, fit for an-Adeferiachorage, except that with a fouth-west wind gale. the fea runs very hollow there. At the very entrance of the harbour lies a dangerous rock, near to which all fhips must pass, and against which the Hercules, one of our ships was stav'd to pieces. There is no coming into the bay, unless you pass by the water-fort, which is well provided with cannon for the fecurity of the harbour. The fortifications of the city it felf confift only in three bastions, the rest being so inclosed with the sea and rocks, that there is no approaching to it, even with the smallest boats. On the top of a rock, which jets out into the fea, is a lanthorn, and an iron cannon, wherewith they give warning to the fhips; and near it you fee the company's flag displayed. The city is well built of stone, very high, with goodly houses, a stately church, pleasant gardens, and most delicious springs; the mountains which furround it, affording a pleafant prospect;

Vol. III.

Baldæus, over which you pass through roads cut out of the rocks, called by them Gravettes.

About a days journey from Gale stands the fort of Caleture, in a most delightful country, near the entrance of a large and broad river, on the fea-shore, surrounded by a double strong wall of earth. It was reduced by the director-general Gerard Hulft, Off. 15. 1655. in the following manner.

Dutch.

Having rendezvoused his forces, confisting of five hundred ninety three men near Bentotte, and being joined the 28th of September by fome more troops under Christopher Egger, Leonard Wiltschut, and Melchior van Schoonbeek, they directed their march towards Caleture. But being informed that the enemy were refolved to make a vigorous defence, and our artillery being not yet come up, it was thought advisable to detach captain Abraham Cous and Jurian Gevels with five companies, to fecure the pass of Oucatte over the river, thereby to prevent the enemy from receiving any supplies, till the arrival of our ships, that were expected every day with more forces.

The 29th we took a view of all the avenues leading to the place; and guards being placed in all convenient posts, the factor Renier Serooskerken and Mr. Yibrand Godsken were dispatched to our ships, to send

us the necessary artillery and ammunition.

The 5th of October advice was brought by two of the natives, that the garison, consisting of three hundred men, was but flenderly provided with provisions, their whole store consisting only in 50 * Parras, and two fmall packs of dried fish; and that they were forced to live upon Canfies, or water and rice.

The 6th of October after we had mounted

Parras is

fome great guns upon our batteries, a cer-† A Topas tain † Topas, who had been secretary to is the son of captain Marcello Fialbo, came over to us, who discovered to the general Hulft the whole strength of the enemy, and the names of their officers; adding, that four or five days before his departur, there were about 210 Parras of rice in the store-house, whereof they distributed a certain quantity to each foldier every day, and to the king's
* Caffers negroes, called * Caffers, a quart a piece: Are Negros That they had no Lascaryns in the place, Angola. That they had no Lascaryns in the place, Angola. ten days, though they feemed resolved to defend it to the last extremity, in hopes of being relieved the next week by Caspar

Figeiro.

The fame day major John van der Laan brought word, That all was well fecured on his attack; and captain James Swart, and the factor Abraham Hartman brought up, with fixty feamen, the two great can-nons that were left behind. Captain

Dianteiro was also detached with forty Dutch Baldaus, foldiers, and a good number of Lascaryns, to the pass of Wellikande, and the general Gerard Hulft, with Mr. Adrian van der Meyden, having taken a view of our batteries, did go to take a view of the pass near Palletotte, where, as well as on the other fide, they found every thing to their fatif-faction, feven hundred fifty fix men being imployed on that fide.

The 7th of Ostober they went up the river as far as Wellikande, to see whether the enemy could receive any supplies of provifions by the brook, or from above by the way of Anguratotte and Tiboene; but found it not feasible, by reason of the shallowness of the water. However, five ferry-boats were fhewed them in the narrowest places of the river, where, having placed some Lascaryns, they committed the management thereof to Mr. John van der Laan. The 11th of Oslober, a mortar of a large fize, and a twelve pounder, were mounted on the battery; and Mr. John van der Laan came to tell the general, that the fecond battery would be ready to play on his fide the fame night.

The 14th, in the morning, we faw a Portuguese lieutenant and drummer, with a white flag, coming out of the fort, sent by Anthonio Mendes d' Aranha, their commander in chief, with the following letter.

"Having for feveral days past dischar Thy off"

Gedour trustasa captainoughttodo, to capture, but, and finding you not fo furiously imployed to day, I thought fit to take this opportunity, to try whether you would treat with me according to the cultom of war; for which purpole, I have fent you a trulty person. In the mean while all hostilities shall cease on our side, hoping the fame from you. We recommend you to God's protection. Caleture, Oct. 14. 1655."

Anthonio Mendes d'Aranba.

A ceffation of arms being agreed upon, Martin Sholtes, an enfign, was fent back with the Portuguese officer, to treat about the conditions, whilst a messenger was dispatched with a letter to the Dissave (or deputygovernor) of Saffra Gamme, to defire him to have it rumour'd abroad, that the Portuguese in Caleture, had lately been supplied with provisions; in hopes thereby to amuse Caspar Figeiro, (who stood with his forces near Moutapelle,) not to haften to their relief.

The capitulation was foon after concluded upon the following terms:

HE foldiers to march out with their Aniela of matches not lighted, balls in the the capital mouth, and enfigns display'd; the offi-latin.

Gerard Hulft. Adrian van der Meyden. Jobn van der Laan. Antbonio Mendes d'Aranba. Jobn Alonzo.

The 15th, early in the morning, the Portuguese officer returned with the articles; to-

wards noon the garrison, confisting in nine Baldeus, companies, making in all, two hundred and fifty five men, marched out of the fort, and having paid their reverence with their ensigns as usual, the soldiers were disarmed. The companies were the following: The royal company, commanded by the captain-major Marcello Fialbo, consisted of thirty one Portugues, that of John Anthonio Felbaon of twenty seven; that of Pearo de Barbos of twenty eight; that of Manuel Rodrigos of twenty eight; that of Diego Frois of thirty six; that of Jacomo Padraon of twenty eight; that of Manuel Mendes of twenty seven; that of Levis Alvres Periero of twenty four; and that of Leonardo de Silva of twenty fix: in all two hundred fifty five.

Besides the persons of note living in the place, with their families, that were conducted to Callamoende, and fifty more that were with the governor Anthonio Mendes d'Ararba, (asterwards our prisonersat Jasnapatnam,) that were carried to Gale, the otner superior officers were sent to Macoene, and the relt kept under a good guard in the fort.

Immediately notice of this victory having been given to the emperor Raja Singa, general Hulft and Mr. Adrian van der Meyden took a view of the fortifications of the place, whereat they were not a little furprized, and found therein, ten enfigns, five great guns, four brafs ones, ten eight and five pounders, and one iron eight pounder, forty barrels of gunpowder, two hundred and four bamboe canes filled, feven hundred and ten bullets, one hundred and eighty muskets, fixty two pikes, feven chefts with musket balls, another barrel with larger bullets, fit for musquetoons, one hundred and fixteen amunition pouches, five musquetoons, fome fiery bullets; fixty spades, and eight hatchets.

Engagements near Paneture, and near Montual; both to the Disadvantage of the Portuguese.

Thread Solvend Godskens being constituted goGodskens vernour of Caleture, with a company
naid to seep garifon there major John van der
Galeture. Laan marched the 16th from the other
fide of the river, towards Paneture, being
followed by the general and Mr. Van der
Meyden with the rest of the forces. In
the dusk of the evening, we came up with
the Portuguese, whom we faluted so briskly
with our firelocks, that they thought sit to
retreat, leaving seventeen dead, and all
their ammunition, with their standard, be-

hind them. On our fide, we had fifteen

wounded, besides Arent Jansz van Norden,

an enfign. According to the report of one of their captains, who was taken prisoner, they consisted of six companies, commanded by Dominges Sermento, captain-major of Montual, detached towards Caleture to secure this pass till to morrow for Caspar Figeiro, who was on his march at the head of six hundred men, to attempt the relief of that place. Whereupon it was thought convenient to make a halt betwixt Paneture and Galkisse, near a good spring, and there to expect the coming up of the rest of their forces.

The

The fame night, the moon fhining very Baldaus. bright, a priloner was brought into our camp, who being a native of Antorf, and well versed in the Dutch tongue, told the

general, That he had ferved the king of Poringal eleven years; and that Figeiro would doubtless be with them by day-light.

The 17th, being Sunday, word being brought that the Portuguese were at hand, Dutch and major John van der Laan and captain Kous Portuguese were posted with five companies, and two field-pieces, on a convenient place, to receive the first shock of the enemy; whom, after a general discharge of their fire-arms and cannon, they received fo warmly with fword-in-hand, that they were foon brought into confusion, and pursued as far as to the church, called Nossa Senbora de Milagres, i. e. That of our Lady of Miracles, with a flaughter of one hundred and fifty on the enemies side. Among our troops major Van der Laan was wounded in the cheek; and a gunner, two common foldiers, and a ferjeant

A fecond engage-

The 18th of October happened another engagement betwixt us and the Portuguese, near Montual. Our forces attacked them in their entrenchments, from whence they fired furioufly upon them; but no fooner had they broke through their works, but they threw down their arms, and made the best of their way to Columbo, leaving all their ammunition behind them, and twenty two killed upon the fpot; whereas we had not fo much as one wounded on our fide. We left two companies as a guard of the church of St. Sebastian; and advancing nearer towards Columbo, a body of Portuguese retreated in boats from Montual to Columbo, leaving the pass open to us, where we found three iron guns, and fome cinnamon, and put a guard of fixteen foldiers in it under a ferjeant.

Here we received intelligence, That of the whole body commanded by Caspar Figei-ro, confisting of fix hundred Portuguese, and fent from Columbo to the relief of Caleture, not above one hundred and fixty were re-

turned to that city.

The 19th, before noon, fome Portuguese being got into a coco-garden, some of our foldiers forced them to retire; but those of the city firing upon them, killed one of our ferjeants, and wounded Hans Christophers, a lieutenant, and two common fol-diers. The fame day the general was certified, by letters from captain Kous and lieute-mant Wilsteinst, that they had already told above three hundred flain of the Portuguese upon the roads; and that daily more heads and prisoners were brought in. They fent at the same time a waistcoat of Caspar Figeiro, wherein was the following letter:

Y OU are not ignorant of the resolution taken the 12th of October concerning your endeavours to relieve the Influences fort of Caleture. All the forces we have to Caleture. Higgin, been able to gather for this expedition confist in four hundred and twenty men, which we hope will prove fufficient, through the bleffing of God and your good fortune and conduct, to make you return victorious. We leave the manage-

ment of that affair to your approved experience, it being impossible for us to foresee all the circumstances and accidents that may attend a business of this nature. It must be your care to get frequent intelligence of the posture of the enemy, and how to bring the provisions laid up for the relief of the place at Belantotte into the fort; the fuccess whereof you shall notify to us with the first opportunity, that we may fend fresh supplies of rice both for your use, and of the garrison in the fort. If you can meet with any provisions in the country, you will not " fail to feize them for your convenien-

cy.
"In case you should prove successful in the relief of Caleture, you must join your forces, and the captain-major of the place must submit to your command. We do not question but you will not be wanting in your duty in a business of fuch vast moment, whereon depends the preservation and welfare not only of this

city, but also of the whole isle.
"If after the relief of Caleture you find, that for want of provisions, or for other weighty reasons, the fort is not to be maintained, you shall agree among your felves what is fittest to be done for his majester's interest, whether it be not the best way to bring the fortifications into a narrower compass, and leaving only one hundred and fifty men for the defence thereof, to join the rest with your

" If you find it impracticable to bring any supplies into the fort, you shall entrench yourself at a convenient distance, and from thence give notice to Anthonio Mendes d'Aranha the governor, that he shall nail up all the cannon, destroy all the ammunition, and make the best of his way to your camp, thereby to preserve such brave troops, on whom, in fome measure, depends the defence of this city."

Columbo, Oll. 13.

CHAP. XXV.

A famous Highwayman taken. The Beginning of the Siege of Columbo. The Emperor offers the Dutch his Assistance: His Letter to the Dutch General.

BOUT the fame time arrived three Apabamies, and as many Haraties,+ End with fome Lascaryns, | from the imperial frame, court; and the Dislave of Saffragamme, formall, with letters from Mr. Foris Hervendonk our illiarya refident at Candy, intimating that he had been commanded by his majesty to notify Office a his being ill of an ague; and that he hoped muse before long to be with all his nobility at Columbo. In return of which, another letter was fent to his majesty, to notify our vic-

tory over the enemy.

The fame day advice was brought that winter the famous highwayman, Francisco Anthunes, was fallen into the hands of fome of our Lascaryns; wherefore a detachment was ordered to bring him into the camp; but either through the cold and inconveniencies of the journey, or rather out of fear, he died by the way, and was buried.

About the same day a thanksgiving-day may was also appointed to be held the 28th of Ollober, to return thanks to God for having bleffed our arms with fuccets, and begging his mercy for the future.

The 21st the general, with some other officers of note, having taken a view of the fituation of the city of Columbo at Quia de Lobo, ordered all forts of materials to be brought thither from Montual, for the raifing of a battery, and hired fifty pioneers for that purpose.

The 22d the Diffave of Saffragamme appeared in person in a house formerly belonging to Diego Melo de Castro, governor of Columbo, offering certain supplies of men from his majesty, which was thankfully re-

The 23d another battery was erected near the church of St. Sebastian.

Two days after came into the camp the emperor's Diffave of the four Corles at the head of feven hundred men; and the fame evening the general received a letter, writ with his majetty's own hand, and brought by one of his own post-men. It was curioully perfumed with all forts of fpices, and on each fide you faw the figure of a woman, with her hands folded, lifting her eyes up

Vol. III.

to heaven, being an answer to Mr. Adrian van der Meyden's letter writ to his majesty from Batecalo. The king feemed not well fatisfied, that the fuld letter had not been wrapped in white linnen as ufual; and that fome of his titles had not been inferted; yet he testified his satisfaction about the arrival of the Dutch fleet, alledging for the reft, "That pursuant to the promise made him by Mr. Facob Kittenstein, and the agreement with him and Adrian van der Meyden, the city was to be delivered into his hands: but that as he made no great account thereof, he was fatisfied, provided they would allow him the honour of the conquest, which he would acknow-" ledge upon all occasions." In the conclusion of the letter he told them, "That he

had ordered lodgings to be prepared for "them in all the places through which they
were to pass."

The 26th we were bufy in mounting the cannon upon a battery, and had four men wounded, and one killed. The fame day we received a supply of ammunition and provision, brought aboard the Lion yacht to Puntegale. Sunday the 28th, after fermon, a deferter with a negro came into the camp from the city, who having made his escape through the fens, told the general, That Caspar Figeiro was by the governor of Columbo welcomed with these words: You de- Welcom ferve to be banged; and that he had alledged Figer many falshoods in his desence, and among the rest, That he could not attack us, because sve were so deeply entrenched near the sea-

The fame day the emperor's Diffave of the feven Corles arrived in the camp with five hundred men, who, together with the other Lascaryns, were employ'd in carrying ammunition.

The 29th a deferter came over to us from A noted dethe city: his name was Herman Lucas, a na-ferter gives tive of Hertogenbush; who having former-of the conly deserted our service at Gale, in company attion at of one named Walraven, had obtained the Columbo. name of John de Rosa among the Portuguese; but having had the misfortune of killing

ceived by the general.

inbo.

And

Baldæus, another at Columbo, was fled to Candy, where he pretended to have been fent by the governor, to view the outworks of the place. He gave the general an account of divers remarkable passages, and among the rest, that he had been present in the engagement which happened the 17th; and that of that whole body, not above one hundred and fifty Portuguele returned to Columbo, where there were as yet nine companies, amounting in all, with the citizens able to bear arms, to eight hundred men; that the governor was highly concerned at the lofs of thefe troops, and the enfuing fiege, especially since some of the citizens shewed no great inclination to fight. We play'd the same day very furioufly upon the city, and the battery raifed against St. Sebastian was likewise brought to

> perfection. The next following day a certain Portuguese prisoner was brought into the camp; he was fent from Milagre, and had lived fourteen days upon grafs and herbs in the woods. The 3d of November a carpenter and cannoneer were killed by a cannon-shot upon the battery raifed at Quia de Lobo; and the fame afternoon the floop, called the Delft, arrived from Caleture with powder. About the same time a deserter came to us out of the city; but being lately come from Goa, he could tell no great matter. The fame evening the ship, called the Brownfish, arrived with letters from Laurence Pit, governor of the coast of Coromandel, having on board forty four thousand five hundred and forty four pounds of gun-powder: she brought also advice, that the yacht the Popkensburg was fafely arrived at Gale, but that they had no news of the ship called the Haddock. The fame night we were bufy in raifing a battery near the fea-shore.

The 4th of November, early in the morning, news was brought to the general from Negumbo, Thar, according to the report of certain inhabitants of Annarolundane, twelve swelve fail fail of thips were discovered off of Chilaon ; being difes whereupon immediate orders were given to the commodore Edward Hauw, to use all possible endeavours to get intelligence thereof: the fame was also recommended to the head-factor of Gale, Jubs Kroon, and to be upon his guard. The time afternoon, a cannon bullet from the baftien of St. Stepben, paffing through a gallery of the church of Quia de Lobo, whilst the stregeons were dreffing fome wounded foldiers, a foldier was killed, two others had their arms shot off, and three more were dangeroufly

About the fame time Tenecon Apubamy, came in the quality of the emperor's meffenger, with a breast shield of gold, befet Baldon with precious flones, and fastened to a gold chain, and brought the following letter from his majesty to the general.

R AJA Singa, the greatest monarch The emperators and most potent emperor of the emperor of the emperor of Country without health to Greatest without the Greatest with the Greatest with the Greatest with the Greatest with the Greatest with the Greatest with the Greatest with the Greatest with the Greatest with the Greatest with the Greatest with the Greatest with the Greatest with the Greatest with the Greatest with the Greatest with the Greatest with the Greatest with the Greatest with the Greatest with the Greatest with the Greatest with the Greatest with the Greatest with the Greatest with the Greatest with the Greatest with the Greatest with the Greatest with the Greatest with the Greatest with the Greatest with the Greatest with the Greatest with the Greatest with the Greatest with the Greatest with the Greatest with the Greatest with the Greatest with the Greatest with the Greatest with the Greatest with the Greatest with the Greatest with the Greatest with the Greatest with the Greatest with the Greatest with the Greatest with the Greatest with the Greatest with the Greatest with the Greatest with the Greatest with the Greatest with the Greatest with the Greatest with the Greatest with the Greatest with the Greatest with the Greatest with the Greatest with the Greatest with the Greatest with the Greatest with the Greatest with the Greatest with the Greatest with the Greatest with the Greatest with the Greatest with the Greatest with the Greatest with the Greatest with the Greatest with the Greatest with the Greatest with the Greatest with the Greatest with the Greatest with the Greatest with the Greatest with the Greatest with the Greatest with the Greatest with the Greatest with the Greatest with the Greatest with the Greatest with the Greatest with the Greatest with the Greatest with the Greatest with the Greatest with the Greatest with the Greatest with the Greatest with the Greatest with the Greatest with the Greatest with the Greatest with the Greatest with the Greatest with the Greatest with the Gre pire of Ceylon, wishes health to Gerard Hold, Hulft, admiral of the seet, belonging to the most faithful nation of the Dutch.

" By the letters fent to me from the governor of our fortress of Gale, I have understood, that immediately after your arrival with the Dutch fleet there, you have made yourfelf mafter of the fort of Caleture; and that one half of the Portugueje prisoners were fent aboard a ship, the rest being reserved for our service. The news of your faccess in the engagement betwixt Caleture and Columbo, without any confiderable lofs on the fide of our faithful Hollanders, being likewife received by me with fingular fatisfaction, Henr immediate orders to all my Diffaves (governors) and chief commanders to bring into the field all the forces of our empire. In the mean while I received an Ola (letter) from the Dissave of Saffragamme, dated Off. 23. wherein he informs me, That having been fent for by your excellency, you enquired after my health, telling him at the fame time that you were come to no other end, than to deliver the cities of Columbo, Manaar, and Jafnapainam into our hands 3 which done, you would in person appear in our imperial majesty's presence. I have been very ill for many days past, which however has not prevented my taking the necessary meafures for the raifing of the forces of the empire. No fooner had I received the welcome news of your excellency, but I was in a manner immediately restored to my former health, being now twice as strong as before, and able (through God's mercy) to affift in person in the intended expedition, which I intend to begin the 2d of November. I have fent with " this letter one of the officers of our court, to enquire after your excellency's health, and to bring you a prefent from me; which I hope your excellency will value, not fo much in regard of its value, as in respect of the love and good inclination " of the giver."

Dated at our imperial court in the city of Candy, Oct. 29. 1655.

CHAP. XXVI.

Resolutions and Instructions concerning the intended General Assault upon the City of Golumbo.

with four great brafs cannon, having began to play againt \$S. Stephen's baftion, a general council of war was called of all the chief officers, in order to confult, (after having implored the divine affiftance,) Whether it were convenient to venture a general affault upon Columbo: the general having open! declared, that every one there prefent fhould be at his full liberty to difcover his real fentiments concerning this great undertaking; it was agreed by unanimous congruing ient, that feeing the alacrity of the foldiers, begreat it was convenient to attempt a general affault.

Soon after the general dispatched a trumpeter, bearing a slag of truce in his hand, to the Portuguese governor, Anthony de de Souza Coutinho, with the following letter:

The Dutch " THE fuccess that has attended our geneal; arms in the taking of Caleture, and grams of the defeat of the troops under Caspar Eigeiro, near the shore of Panature, together with the advantages obtained already in the fiege of Golumbo, may, as I fuppose, sufficiently entitle me to demand, without vanity, the delivering up of the " city, in the name of his imperial majesty RajaSinga, and the most noble Dutch East-India company. I hope your excellency will not put a wrong interpretation upon this demand, when you confider, that pursuant to the tenor of your own letters fent to Don Anthonio Mendes d'Aranha, " and Caspar Figeiro, the first dated Sep-" tember 30. and the second the 13th and 15th of October, (both which are fallen into our hands,) you were then sufficiently fenfible, that the defence of Columbo depended on the prefervation of the forces in Caleture, and those under the com-" mand of Caspar Figeiro. It is upon this force that I am of opinion, I do not put the least blemish upon your courage, fince being bereaved of thele means, you " have nevertheless given such ample proofs " of your zeal and bravery in the defence " of this place. My request is only founded upon this, To avoid the effution of inno-" cent blood, the almost necessary confe-" quence and and unavoidable fate of all " places taken by affault, it being sufficient-" ly known, that the fury of the con" quering foldiers is not eafily flopped upon Baldwis." those occasions.

Nov. 9.

Gerard Hulft.

The trumpeter returning a little while after, told, That coming near to St. John's bastion, the letter was taken from him by a Portuguese officer; who affured him that the governor should return an answer the next day: hereupon the cannon being ordered to play as before, three companies under the lieutenants William de Wit, Henry Gerriss, and Christopher Egger, were sent to Montual, in order to be put on board the two yachts, the Ter Goes and the Eralinus.

The 10th of November an answer was fent to the general upon his letter.

"AS God Almighty disposes the The goverchances of war according to his not inpleasure, so he may as well declare now foer.
for our side, as he has done for you before:
the place you require belongs to the
king of Portugal, my master, who having entrusted me with the same, I must
be accountable to him for it. The reafons alledged by your excellency are not
fufficient to move me to lay aside the
defence of this city; not questioning, but
that time and experience will convince
you, that our condition at present is much
beyond what you imagine. I recommend you to God's protection.

Nov. 9. Antonio de Souza Coutinho.

After the receipt of this refolute answer, the general thought fit to give the following instructions for the intended general affault.

"The yachts, viz. the Maid of Enchuy-Influentions" fen, commanded by Volkert Advian Strem, for the ge(who afterwards rendered himfeli to hanneral afmous in the north, during the English said.
wars) and the Workum, Avent Groenfeld
commander, shall approach into the bay,
as near to the water- fort as possibly they
can; for which purpose they shall be provided with one hundred and ten chosen
feamen, five thousand pounds of gunpowder, and with shot in proportion.
The yachts shall anchor in any part
of the bay, where they can belt annoy
the water-fort, and under favour of their

CHINDO

Baldaus, " cannon land their men. For this purpofe the yachts the Ter Goes and Erasmus, shall keep within cannon-shot of the other two yachts, and have aboard, befides their " inip's crew, one hundred landmen each, " viz. the companies of William de Wit, Henry " Gerritsz, and Christopher Egger, in order to land, in conjunction with the men of the other yachts. The boats, tenders, and other small vessels, shall keep near the " before-mentioned ships, viz. the tender " the Amsterdam with her floop, near the " Ter Goes, and the floop the Wefel the boat of the Marygoldflower, with her "floop the Delft, and the tender the Naar-"den with the rest. The tenders the Hair and Brosonfish shall keep near the shore, " to be ready upon all occasions to carry " advice where it shall be thought necessia-" ry. In fhort, all the boats thall attend " the veffels that are engaged against the " fort, in order to fave their men, in cafe " any of them should be funk or disabled. " When the companies standard is fixed " above the red flag, this shall be the fignal of landing: if the faid standard is set up " on the mainmast-yard's arm, it shall be " the fignal for the boats to come to fuccour " the ship, she being in danger of finking. "When the prince's standard is set up on " the ramparts, it is a fign that we are " masters of that part of the fortifications,

when the attack, either upon the castle or fort may cease, till the faid standard be " fet up in captain Kkylenburgh's quarters, " near the fea-shore; this being intended " for a fignal, that we are also masters of " the town on the land-fide, when the of-" ficers in their respective attacks may either " flop or go forward, according as it shall be thought convenient by the majority of

" Whilft the flips the Maid of Enchuyfen and Workum are under fail to enter the 66 bay, all the reft of the ships shall weigh their anchors, and put up the red flag, as if they would enter the bay, but keep " without cannon-shot. So soon as the " forces are landed, all the officers, foldiers, and feamen, thall obey Mr. Adrian Roo-" thaus, as their jupreme commander.

" Whilft the fhips and men are engaged " against the water-fort, the city is to be " affaulted at the fame time, near the fea-

shore, at the bastion of St. John, and on Baldaus, the land-fide near the gate of Rajuba: the attack upon the baltion of St. John shall be commanded by captain Kous, and the other by captain Knylenburgh, either of them to be feconded, as occasion requires, by Mr. John van der Laan, the companies of Kuylenburgh, Govert Quartel, Jurian Gevel, Andrew Steckens, Lambert Steenbagen, Hans Christopher, Joachim Block, Melchior van Schonenbeck, and John Moll, with thirty fix Javanese, and half a company of Bandanefe, to be employ'd in the affault of the first bastion : the scaling-ladders shall be carried and fixed by the Bandanese, Javanese, and Mardykers, mixed with fome Dutch feamen, armed with hand-granadoes. pikes, and hangers. The bastions of Clergos and St. Philippo, near that of St. " Sebaltian, (at the gate of Rajuba,) shall " be attacked by the companies of captain " Westrenen, lieutenant Wildtschut, John "Hartman, John Cooper, Hardenbergh Roggenkamp, James Alenbier, Diedelof van der Beek, Henry Broekbuysen, John Coertsen, with the Javanese, half a company of Bandanese, and the company commanded by captain Ruyscb.

" Captain Westrenen shall command the " attack against the bastion of Clergos, and captain Ruysch that of St. Philippo to be feconded by fresh forces, as occasion requires. The Bandanese, Javanese, and Mardykers, in conjunction with the Dutch " feamen, shall fix the fealing-ladders, and " the Lajcaryns of Ceylon be employed in " carrying off the flain."

About the fame time we received intelligence, that the Portuguele fuccours were arrived at Goa; and that they intended to come to the relief of Columbo: word whereof was fent immediately to Gale to be upon their guard, for fear of a furprize. The 11th of November, (the day appointed for the general affault,) it being calm, so that the fhips could not enter the bay, the fame was deferred till the next day, though we did not cease in the mean time to play more furioufly with our cannon than ever before; and we observed that the enemy had taken in their red flag upon the baftion of St.

A General Assault both by Sea and Land made upon Columbo; but without Success. Letters from Raja Singa to the General. Dutch Prisoners come out of Columbo.

as occasion reder Laan, the , Govert Quar-Steckens, Lambristopher, Joaldaus. THE 12th, by break of day, the Maid an Schonenbeck, of Enchuysen, and foon after the Worty fix Javanese, andanese, to be the Erafinus, thundered most furiously against the first bastion: the water-fort, from whence they answered be carried and them very briskly. Immediately after the Javanese, and affault was begun on the land-fide in three h fome Dutch feveral places: the general in person with ten companies attacked the gate of Rahand-granadoes, he baltions of juba, and the bastions of St. Philippo and near that of St. Clergos; and major John van der Laan with nine companies, those of St. John and f Rajuba,) shall panies of captain Couras; whilst James Lippens with two comildtschut, John panies of foldiers, and fome feamen, paffed r, Hardenbergh the fens in feven Chinese Champans, or boats, enbier, Diedelof in order to attack the city where it was least roekbuysen, John

fortify'd. But the belieged fired fo furiously upor our men, especially with their firelocks, that the feamen could not be brought forward to fix the fealing-ladders; which the general perceiving, he advanced in person with fome of the bravest officers, and fixed the fealing-ladders to the cortin: but having received a wound in his left thigh, he was forced to be carried off. In the mean while news being brought that they had entered the breach on major Van der Laan's attack, he returned to his flation (before his wound was dreffed,) but found things in fuch a confusion, that he was forced to retreat, the major and his forces not being able to maintain themselves in the breach, retreating at the fame time, after they had in vain attempted three times to recover it. Lieutenant Melchior van Schoonbeek, a High-German by birth, and of a noble family, was the only person who got upon the bastion of St. John; but for want of being feconded, loft his life there like a brave foldier, his head being afterwards stuck upon a

pike by the Portuguese upon the same bastion. The forces under captain Lippens, having not without some resistance from four Manchous, or boats, paffed the fens, got into the city; but the captain being forely wounded, made shift to retreat with some few, the rest for want of timely fuccours being all made prifoners of war. The yacht the Maid of Enchuysen was so forely battered from the fort, that being ready to fink, her crew was carried off by the floop the Langerack; but the Workum cut her cables, and got out of Samber of the bay without any confiderable lofs. The hand number of the flain on our fide amounted to VOL. III.

two hundred, and three hundred and fifty Baldens. wounded, not including the to scompanies of John van Hardenburg and Roggenkamp, and the feamen commanded by John Lippens, that were made prisoners in the city. The fhips the Ter Goes and Erasmus, who had aboard the foldiers that were to affault the wtter-fort, not being able to get near enough by reason of the wind, soon got out of the bay.

N this unfortunate day the general Letter from received a lett r from his imperial the emperor majesty, testifying his good opinion of ral. " his excellency, not questioning but that " after the taking of Columbo he would de-" liver the faid city into his hands, pursuant to the agreement made with Mr. Wester-wold. That he defired to have such of his rebellious subjects, as should fall into our hands, delivered up to his diffaves, either alive or dead, in order to punish them with the same severity, as he had done those at Batecalo; and that he had " ordered his governors to ravage and de-" stroy all the villages in the Low Lands." He fent at the fame time enclosed a letter from the Portuguese governor, Antonio de Souza Coutinho, dated October 27. at Columbo, to the emperor, the chief contents whereof were,] " That he could not forbear to put " his majesty in mind of the ancient friendthip betwixt him and the Portuguese, which he was forry to have been interrupted by the Dutch making themselves mafters of Caleture, and having routed their forces near Paneture, by laying fo close and vigorous a siege to the city of Columbo, that they were in great danger " of being forced to furrender. Wherefore they craved his majelty's affiftance against the Hollanders, who, after they were mafters of the city, would certainly not deliver up the fame to his majesty, but lord it over his subjects; which his majefty, according to his wifdom, might eafily fee how much it would tend to his

CHAP.

Buldwus.enemy, in a bravado, put two of our enfigns upon the bastions of St. John and St. Philno. At the fame time advice was brought, that the ships the Avenborn and Campen, richly laden from Perfia, were arrived at Gale in their voyage to Batavia. For which reason the yacht the Brownfish was dispatched to Gale, to carry fome letters thither, to be fent further to Batavia, as likewife a letter to be fent by land to the emperor Raja Singa. The yacht the Popkensburg arrived also with gunpowder, and other neceffaries for our camp.

The 19th, a letter from the emperor Raja Singa was delivered by his diffaves to the general, wherein he condoled him about his wound, and the ill fuccess of the late affault, telling him, That he was employed day and night in making preparations to join him with his forces, and defiring not to venture a fecond affault before his arrival. A letter of thanks being ordered to be written to his majesty, the yachts the Workum some Ships and Popkensburg, with a frigate, were dif-

tent asemi- patched to Negumbo, to cruife to the north of that harbour, to get timely intelligence

of the enemies approach. The 26th fome cannon-shot being heard at a good distance it was generally believed to be the fignal from the fortress of Negumbo, to advertise the arrival of the Portuguese fleet. Whereupon Mr. Adrian van der Meyden took two companies of foldiers and as many feamen out of the church of Quia de Lobo, (where they had their post,) and marched directly to Montual, in order to embark them there, to prevent the enemies landing. The general, notwithstanding his wound, followed thither in person, and sound them ready to

embark, which was however deferred for Baldens, that time, till they should receive more certain intelligence. Only the yachts the Mars and the Fliffingen, with fome officers aboard them, were commanded to cruize off the northern point of Montual.

Much about the same time arrived the Roman yacht from Suratte, with fixteen loads of wheat. The officers reported, That a Portuguese fleet, confishing of thirty frigats 4 whole a Portuguele fleet, confirming of thirty man for of was entirely destroy'd by a tempest near portugues Wingurla; but that no body knew from loft, whence they came, or whither they were bound 3 and that the cannon we heard some days before, was discharged by them as a fignal of their diffress to the Workum and

Popkensburg.
The 29th capt in Kuylenburgh, who died of the wounds he received in the late affault, being honourably interred, the 1st of December two ferjeants came into our camp, who being formerly taken prisoners at Anguratotte by the Portuguese, had taken the opportunity, as these were flying from Manaar to Tutecoryn, to defert and hide themfelves among the Moors of Kilicare, from whence they were brought in one of our vessels hither. On the other hand a certain feaman, named Claas Claafz, did fwim crofs part of the bay into the city.

The same night a new trench was opened against the bastion of St. John, and carried on with all imaginable diligence. The yacht the Roman was fent a cruifing to get intelligence, whether any of the enemies fhips could be discovered at sea, as the Flushing yacht was dispatched to the coast of Mulabar, and the Erasmus sent out in her flead a-cruifing.

Anthony Amiral de Menezes taken Prisoner. Want in Columbo. The Continuation of the Siege.

Want in Columbo.

THE 7th of December we got intelligence, that most of the inhabitants of Columbo, for want of rice and other provisions, had been forced to lift themselves among the regular forces; that in the late affault they had taken feventy or eighty of our prisoners; whereas their whole loss did not amount to above twenty or twenty five Portuguese; among whom were, however, two perions of note, viz. Anthonio Barbofo, and Felicio Leefio, lord of Macvene. That they had mounted the cannon taken out of the Maid of Enchuysen upon their bastions, and were buty in making divers retrenchments, in hopes of being foon fuccoured from Goa; and that their whole

force confifted in feven hundred Portu-

A Description of CEYLON.

Baldous. " I have not heard fince what is become of " the messenger. The three Pado's are well arrived at Goa, and the five mef-" fengers fent thither; the fixth, fent ! v " Anthony d'Abreu, did not stay in the " leaft in this fort, but tarried two days " at Negapatan, and brings along with him " full inftructions concerning the relief of " Columbo. I have not been idle in my " flation, both in adviting how to raife " men for our fervice in the Indies, and in " contributing all that lay in my power, of " my own accord, which by fome others 44 has not been done without reluctancy 3 " effecially in giving my affiftance in " equipping some vertels of bulk, and gal-" leys well-manned, for the relief of the " city. I have hitherto heard no news " from the fleet at cape Comoryn, fent for " that purpose. I wish they may reach the " ifle of Manaur, when we thall have op-" portunity to debate the whole matter " with the commander in chief, how to " contrive matters for the defence of the " place: you may reft affired, that no-" thing fhall be wanting on my part, that may tend towards the accomplishment of " its relief, which I heartily wish may take " effect, it being my opinion, that a good " fleet is the very means now to preferve that place, till we receive our supplies " from Goa. Perhaps it may please God " to destroy the hereticks in this fiege, and to abate their haughtiness, occasioned by " their late fuccefs, caufed by our neglect; " it being certain, that the same might " have been foreseen a considerable time " ago. Orders are given to have a good " quantity of matches made, which shall " be brought by the first pado that goes " from hence; the other two shall follow foon after, one of them being to be arm-" ed for the defence of the other : their " approach you will know by the fignals " agreed upon. Perhaps the governor of " Manaar may have got intelligence of our " fleet, and has given you intelligence " thereof. God preferve and deliver your " excellency from all danger."

> fafnapatnem, Anthonio Amiral de Menezes.

The Contents of another Letter were as follows:

Writ to your excellency under covert " of Sebastian Martino with the galliots of September, when I little dreamed of what we heard afterwards at Cocbin, " and on the cape Comoryn, concerning the " prefent danger of the city, and of the lofs " of fo brave a captain as Anthonio Mendes " d'Aranba, with a good number of our

" choicest men. I have fince understood Baldaus: feveral other things of this nature, which

" have cost me many tears. We did all we could to make the cape Comoryn, but " the contrary wind prevented us: however, though we have failed in this, you may affure yourfelf, that the viceroy will not fail to fuccour the city of Columbo, with all his forces in the Indies. It is rumoured here, that Don Manoel Mascarenhas intends to leave this place, there

being very bad news brought lately from Jasnapatnam; but we hope, and pray to "God that he will be pleated to preferve " the city till February.

Novemb. 68.

Nicolao d'Olivera. 1655.

The reft of the letters were very near the fame, with this addition only, That the Portuguese set sail in October with fifteen frigats, but were forced back near the cape Comoryn, fo near that they had landed forme foldiers, who were marched by land to fasnapatnam, with an intention to come to Columbo, to give notice there of the equipment of fix galleons at Goa, intended for the fuccours of the city; and that in cafe the Dutch should block up that harbour, they would fight their way through them. All these letters were fent to his imperial majetty.

The 12th of December, two hundred ne- Two Lungroes being feen to falley out of the gate of dred negroes make a fal-Mapane, keeping along the fea-shore, three ley, companies were ordered to attack them; but they no fooner espied our people advancing towards them, than they retreated in haste to the city: however three of them deferted to us, and gave an account, That the reason of their coming out was only to fetch and cut fome faggot-wood for the repairing of the baftions of St. John, St. Stephen, and St. Philippo; and that they had made betwixt the two former a retrenchment, in case they should be forced to quit the baftions.

The fame day we finished our second re-The report doubt, and the next two Portuguese defer- of some do. ters confirmed the report of the negroes, ad-fersers. ding, That they much dreaded our mines; that the baftion of St. John was guarded by two companies, (of twenty five or thirty men each,) under Caspar Figeiro, the gate of Mapane with three, and the rest in proportion. At the fame time we faw a whole troop of half-starved wretches forced out of the town; but were made to return from whence they came, except a few Portuguese, who could give good intelligence about the condition of the

SIM FIM EZZIMIN

Baldæus. The 14th, in the morning, ten or twelve boats came out of the town to fetch faggotwood; but finding us prepare to attack them, they retired with precipitation, after they had wounded three of our men.

The 15th the general agreed with twenty pioneers to work continually (fix at a time) in the trenches, at the rate of twenty pence per diem, besides a good reward after they had finished the work. In the afternoon a battery of fix guns was ordered to be erect-

An unforcident.

The 18th a gunner having, out of careleffiness, doubly charged a gun upon a battery, killed three of our own pioneers, and wounded feven negroes; and in the evening four great cannon were not without fome lofs planted upon the before-mentioned battery.

The 19th we played thence most furioufly upon the baltions of St. John and Stephen, and two more cannons were mounted

upon it the same evening.

The 20th a new redoubt was begun, the trenches being then carried on within two rods of the counterfearp. In the evening we miffed Simon Lopes, who was again gone over to the enemy.

The 26th three negro carpenters coming over to us, reported that the Portuguese had

undermined the bastion of St. John, and Baldens, laid five large barrels with gunpowder in five divers places underneath it, having laid the train by the means of certain bomboecanes, which were to be lighted on the top whilst we were assaulting the said bastion, which was the reason that they had not difcharged their cannon from thence these two days paft. They added, that the fon of Anthonio de Souza Coutinbo, the governor of Columbo, being bufy in encouraging the workmen by his own example, received a wound by a musquet-shot in the head, of which he died soon after. A council of Refolution war was called, in which it was refolved to taken in a carry on the trenches with all imaginable mar. vigour, to prevent the enemy in perfecting his retrenchments before the breach of the bastion of St. John, and to fix our miners there.

The 27th the general gave notice to the diffaves of Saffragam and the four Corles, that he intended to fend an envoy to his majesty, to know his inclinations, whether he intended to appear in person in our camp, or not: he defired them to write to him upon the same subject, the time for attempting a fecond general affault drawing near; and that in case his majesty had the least doubt left of our fincere intentions, he would give him full fatisfaction upon that head.

CHAP. XXIX.

The Portuguese throw Stones out of a Mortar, We make a third Redoubt: Endeavour to lay the Gallery over the Ditch. A Spy hanged Letters from Coromandel.

THE 28th of December in the evening the Portuguese began to throw feveral flones out of a mortar into our works, which fomething furprized us at first, but afterwards we gueffed that it was Simon Lopes, who lately deferted our service, that had put them in the way of it. The next day captain John Hartman was fent with letters to the emperor at Candy, and we were hard at work to bring the third re-Another redoubt near the fea-shore to perfection, where we planted a mortar, and continued our approaches to the counterscarp.

A Chinese deserter, a native of Macao, reported, That they were indifferently well provided with provisions in the city, and that it was true that the governor's fon was dead. Letters were at the same time dispatched to Mr. Laurence Pit, governor of Coromandel, to fend us some ammunition, and to order the ships which, upon the arrival of the vessels from Tajouan, sail from thence to Batavia, to touch at Gale, to be employed in thwarting the intended fuccours of the Portuguese, or take aboard part of the Portuguese prisoners among us.

The 8th of January, finding the enemy bufy in planting palifado's in the ditch, fome feamen, armed with hand-grenadoes Portumade them foon quit that enterprize. But guefe forthe next following day finding the enemy lefter in to have made fome entrenchments there, a the duth, hole was ordered to be made in the wall; and captain Henry Gerard, the head gunner and ingineer, and carpenter, being or-dered to view the work, they reported that the enemy had planted a row of palifado's close to one another, extending to the fea-shore, which made them imagine that they expected the most fierce affault on that fide.

Six expert carpenters having offered their fervice for perfecting the gallery, a hundred crowns were promifed them as a reward; and it being refolved to fix the faid gallery the next day under fa-

dered but t tom t ing b in it : handditch. but the enemie Dutch baftion the pa to retr was th conven carpen prize.

ng offered ne gallery, ed them as lyed to fix under fayour Baldans, your of our great cannon and fire-locks, ~ a certain number of musqueteers were ordered to the extremities of the trenches: but the wall being thicker at the bottom than at the top, it was almost even-ing before they could make a breach in it; when attacking the enemy with their hand-grenadoes, they forced them from the ditch, where they posted twelve fire-locks: enemies cannon and fire-locks, both of the 7in Durch bastions of St. John and St. Stephen, and " the palifado-work, that they were forced to retreat, and the fixing of the gallery was thought fit to be delayed till a more convenient time, having loft only one carpenter and two negroes in this enterprize. John Roothaus the Dutch reer-admiral fent January 12. three negro prisoners from the fleet into the camp, who were taken coming with letters from Manaar, in order to carry them into Columbo; but they were of little moment, except what was contained in the following paffage, taken out of Lorenso Barboza's letter, directed to Don Francisco de Souza.

"Your fleet could not make the cape "Comoryn, because they came too late, and were overtaken by a violent tempest; the soldiers aboard were sent by land to Tutecoryn, and from thence by sea to Manaar. That they understood that great endeavours were used to equip a squadron of great ships and trigats, to be joined by eight galeons for the relief of Columbo; and that they had certain advice that the galeons were getting ready for that purpose: That the rest they would be informed of by the captain-major's letter to the governor, &c.

The faid prisoners reported, That Anthonio Amiral had brought a reinforcement of fix companies from Jafnapatnam to Manaar; and that it was reported there, that five galeons and twenty eight frigats were to come from Goa. and being joined with fome other veffels and forces at Manaar were to fail to the relief of Columbo: whereupon the general fent his inflructions to our fquadron to watch the coming of the enemy, but untie especially to our cruiters, the Workum, Dech Pen Popkensburgh, Mars and Erajmus yachts; thirty Bandanese soldiers, and as many Mardykers were also ordered aboard these veffels; and a negro deferter reported that those come from Maraar to Columbo were half naked, and had brought no letters; one of them being wounded; but knew nothing further.

The 15th of January some of our Vol. III.

Lascaryns brought in a spy, whom they Baldaeus. had taken under pretence of going into the city to sell tobacco; but upon the evidence of two Cingalese carpenters that he was a spy, he was hanged on a gibbet near the place where he intended to have got into the place.

The 19th letters were brought to the Letters camp, fent by Laurence Pit, then gover from Conor of Coromandel, intimating that we romandel might expect a supply of thirty five thoufand pounds weight of gun-powder with the yachts the Codfish, Rabbit, and Patience; that for the rest the company had loft fifty loads of rice, and two hundred . A certain fifty Ammenans of Areek + by an acci-mosure.

dental fire. That several private mer-+ Arees. chants having lately fent certain fhips Indian fruit, loaden with all forts of provisions, we of which need not fear any thing upon that ac-they make the fear in count. The Rabbit alone had a cargo freng tiof twenty fix thousand eight hundred twenty two pounds weight of gun-powder, fifty packs of Guinea linnen cloth, and ten loads of rice, valued altogether at twenty three thousand eight hundred fixty gilders.

It was further advised, That in all probability the king of Golconda was likely to be embroiled in a war with Mirza Mula his general, who had put ftrong garifons in the fortreffes of Gendecalte, Gronconde and Goeti: That the general Chan Channe was lately retired with the forces of Visiapour, confisting of eight thousand horse, and forty thousand foot, from Velour to Visiapour; but for what reason was not known. A copy was also fent of a letter, written by Leonard Johnson factor, Decemb. 8. from Wingurla to Batavia; whence it appeared, that they were making great preparations at Goa for the relief of Columbo. "But, added he, the Portuguese viceroy having sufficient intelligence " of our strength before Columbo, it seems " to me to be rather a bravado, than a real defign, unless it were (as some affirm) that the relief of that city was fo posi-" tively commanded by the king of Por-" tugal, that the viceroy would be forced " to attempt it, unless he were prevented " by the *Dutch* blocking up the harbour of "Goa before that time: That it was ru-" moured there that the Portuguese foldiers thould be obliged by oath, confirmed by the bleffed facrament, that in cafe " they were not able to worst the Dutch fleet, they should fet fire to their own ships: but he hoped that the city would fall into our hands before they could put their defign in execution. But as it were not fafe to despise one's enemy, so he would "take care to give from time to time in-telligence of what he could learn to the " director-general Gerard Hulft with all

hoped to purchase the diligence of some of the natives by money." The following Lift of the lift was annexed of fuch ships as were to be Portuguese employ'd in the said expedition: two carreins of racks, two large galleons, one lesser one, Common two carvels, fix Patacho's, or yachts, twenty light frigats, twenty four more from the coast of Sipaveneick, with some galleons and other boats called Singazeeles. His further opinion was, That the faid iquadron might be ready towards the end of Yanuary; and that the same was to be reinforced by some yachts from Chaul; that belieles the garrifon to be left at Goa, two thousand Europeans, not reckoning the Mistices and negroes, were to be embarked aboard the faid fleet. He advifed further, That two English fhips being fome days before come to an anchor before Goa, the viceroy had offered the captains a confiderable fum of money, provided they would fail along with the fleet to Ceylon's but that they refused to accept of the fame, and were failed to the northward.

Baldeus. " imaginable speed; for which purpose he

The 21st of January, two hours before break of day, the general being got aboard the Ter Goes, called a council of war there, wherein it was relolved to fend forthwith the ship the Codfish to Negumbo, in order to unlade her cargo (intended for Gale) there, in company of the Amsterdam and Marygold-Flower; and the Hare yacht was ordered to keep as close to the bay as possibly she could, to observe the small vessels that might pass and repais in and out of the city.

The 24th of January the Flushing yacht coming from Hingurla, brought letters from our factor Leonard Johnson, dated the 6th of January, intimating, That the viceroy of Goa, instead of sending the pretended fuccours to Ceylon, had now refolved to fend two carracks to Portugal, and three yachts to Mosambique; and that the defign of the relief of Columbo, feemed to be laid afide: in confirmation whereof he fent the following translation of a letter written by one of our fpies there.

To the Commodore of the Dutch Squadron Baldaus, near Wingurla.

"WO ships, (both arrived this year,) Lutter of a viz. Bon Jesus, carrying fixty five strains of the National Actions of the Strains of the St guns, and the Noffa Senbora da Grazia of fixty guns, are intended to be fent to Portugal, being now bufy in unload. " ing, and expecting only the return of our " fleet from Cochin, and the cape. It is supposed they will be ready to fail by the " end of the first month of the year. Three yachts more are ordered from Mofambique, being now taking in their cargo, belides another yacht, deligned for Macaffar. The carvel intended for China is not ready to fail, and it remains uncertain whether she will go thither. But, if the does, it will not be till next fpring. Hitherto we see no preparations either of men or ships for Ceylon; and they feem unrefolved, whether they had best fend " any relief thither, for fear they should fall into the hands of the Dutch. But if any be fent, it will certainly not be till " after the departure of the fhips for Portugal, for which the viceroy flews a great " concern being afraid they will be inter-" cepted by the Dutch before they can " reach Portugal.

Your Excellency's constant Slave.

Dated jan 6.

URAGAMI SINAY,

Hereupon it was agreed in a council of Dutch figure war, to order the ships the Ter Goes, Mars, font 10 God the Arms of Holland, Amsterdam, Flushing, Erasmus, Naarden, Zierik-see, Marygold-Flower, and the Hare, forthwith towards Gea, there to expect the coming of the ships from Trajouan, in company of those from Persia and Suratte. And that the yacht the Workum, Popkensburgh, Cod-Fish, and Rabbit, with fome light frigats and floops, should be kept for the blockade of the harbour of Columbo.

It was dated at Ba'ane, January 20, 1656.

> Raja Singa Rajou, most potent emperor of Ceylon.

Mr. Hartman returned, being prefented with a golden chain and a ring; and reported, That some of the emperor's Diffaves having brought him the news, that we had loft a confiderable number of men by fpringing of a mine, he was very glad to hear the contrary afterwards. The 26th of January, early in the morning, a letter was delivered from our head-factor at Gale, John Kroon, SomeDutch That the ships the Patience, the Bengale, the Black-Bull, and the Grey Hound from Tajouan by the way of Masulipatan, loaden with merchandizes from Perfia, and the Vlieland belonging to those of Suratte, were arrived there; and that he had ordered them to fail for Columbo. Two spies come lately out of the city, to view the condition of our attacks and batteries, were hanged two days after.

At the fame time letters were brought into the camp, dated the last of November, at Malacca, intimating, That the 14th, 15th, and 19th of November, 1655. the ships the Vlieland, Black-Bull, Arnemuyden, and the Sweet-Briar, were arrived there from Tajouan, their loading being valued at one million three hundred forty nine thousand four hundred and thirty fix gilders at the first hand; and that the Sweet-Briar, the Domburg, and Lion, were with a good quantity of tin of Malacca fint to Bengale. The cargo of these ships consists commonly of Japenefe filver, bars of copper, allum, gold, China tea, and fugar of Formofa, belides a confiderable quantity of tin of Malucca. Upon the coast of Malabar, and in Ceylon, (where they commonly arrive at the fame time,) they load with cinnamon, pepper, and cardamum. They generally make a long voyage; for they fet fail from Batavia to Japan and Tajouan in May, and come to Malacca in December: from thence they steer their course by the Nicebarcs to Ceylon, or Bengale, or Coromandel, (but never from these places to Ceylon, but sometimes return from Bengale or Ceylon to Malacca or Batavia,) and from thence by Malabar to Suratte and Perfia, and return in May to Ceylon, (and fometimes straitways to Batavia;) and fo further with their cargo (they have taken in at Suratte or in Perfia) to the coast of Coromindel, where being loaden with linnen cloth, painted callicoes, and other merchandizes, they return to Batavia in June or July. By letters from John

given, that the tin trade (the chiefest of that country) had been but very indifferent Advices from Mathat year.

But it is time to return to the fiege of Two defer-clumbo. The last day of January two vergive an Columbo. Portuguese deserters who had made thift to the cond let themselves down by ropes from St. Ste-tion of the phen's bassion, reported, That many of ety. their comrades were willing to defert for want of pay, but that they were strictly guarded; that the garrifon confifted ftill of fix hundred and fifty Europeans, and they had rice for two months longer; that they still relied upon the promifed fuccours of fix galleons. Soon after we faw a whole troop of half-starved wretches coming out of the town; but one hundred and twenty were forced to return without relief. The 12th of February about five hundred of them. men, women, and children, being forced to extremity of hunger, came to the general's quarter imploring his mercy-; but they were forced back into the town along the feafhore near the baftion of St. John. In the mean while the emperor fent the following letter to the general:

Raja Singa Rajou.

UR imperial majefty has former-The empe-ly (through God's mercy) been ror's latter victorious over our enemies in Malvane, val. where I routed their whole army commanded by Don Constantino; after which laying fiege to Columbo, I had my head quarters in the garden of Lewis Gomes Pinto. It then pleased God to afflict me with a diftemper, which the viceroy having got notice of, he defired me to return to Candy; which I did accordingly, leaving my brother Carnana Singa, king of Ouve, with the prince of Vijiapalla, to command the fiege, who put no fmall blemish upon our imperial family. Whilst they were employ'd in that fiege, the treacherous *Portugueje*, having at that time forced a multitude of starved wretches out of the city, they had mixed with them certain villains, who fet all our works on fire. Wherefore I hope your excellency will keep a strict guard; for I cannot forbear, for the love and good inclinations I bear to your excellency, to put you in mind, that the Portuguese are a most perfidious nation; and that even my forces are composed of divers forts of people; fo that your excellency ought to have a particular regard for your own person, which will be a fingular fatisfaction to me. For you must know, that there being variety of people in the ifle of Ceylon, who have ferved divers princes, and are used to raBaldaus," vages and rapines, these are generally " treacherous and not to be trufted by your excelle cy, though perhaps they 44 will endeavour to obtain your favour by

flatteries and pretences of friendship, they being fuch profligate wretches, as to be induced by the hopes of a fmall gain to undertake any base and treacherous act. The letters fent from this court to your excellency being generally written in an " unknown tongue, I defire you, if you find any defect or inconveniency in them, to give notice thereof immediately, to remove all obstacles and mitunderstand-" ings on our fide, it being our refolution, " that the peace made with you shall con-" tinue as long as the fun and moon furnish " us with light, as you, on your behalf, " have engaged it shall last as long as the world stands. I once intended to have " fent you an answer to your letter, dated Jan. 8. but understanding that your ex-" cellency had dispatched to this court a " captain of the guards, I thought fit to " defer it for some time. In former times, " whilft I was very young, I was encamped with my army in Malvane; but that " being many years ago, I did fend thither " certain persons to view the place, who affured me, that the place pitched upon " by the diffave of the four Corles was un-" fit for our reception, which was the rea-" fon I ordered my head quarters to be " fettled in the fortress of Reygamwatte. In " confideration of which, and other mifcarriages of the faid diffave, I have put " another in his place, with whom you " may confult in relation to fuch matters

Dated in the camp and Subtcribed, court ef Guirambula, 1-cb. 14. 1656.

> Raja Singa Rajou, most potent Emperor of Ceylon.

The general being extremely pleased with the emperor's approbation concerning the fending back of the poor starved wretches forced out of Columbo, thought fit to fend the following letter to the governor of Co-

" as tend to our fervice. I further iffued

" my orders to the didaves, and fent cer-

" tain perions to prepare my quarters with

"the utmost expedition; which done, I

" intend to be there immediately after.

FINDING that you fuffer the poor negro citizens, after that you have received all the fervices you received all the fervices you received all the fervices you prove that of could from them, to perifh for want of whereas you prevented " their defertion formerly by strict watches,

" you now permit them to go where they " please, in order to be rid of them, I

thought it my duty (for the discharge of Baldans, my conscience) to desire you to let the faid negro citizens know, that fuch as for the future come out of the city, shall be punished with death. This I thought fit to let your excellency know, in hopes of moving you to compassion. I remain for the reit, your excellency's fervant.

Dated in the Dutch camp before Coumbo, Feb. .5. 1656.

Gerard Huld.

The 17th of February the yacht the Saphir came into the road from Coromandel. and brought a letter from the governor Laurence Pit, dated January 29. at Paliacatta: her cargo confifted in rice and gunpowder, though not fo much as was expected, the full quantity of brimftone not being brought from Tajouan.

But notwithstanding the beforefaid warning given to the negro citizens, many of them coming every day into our camp, one of them was ordered to be hanged, to deter others from doing the like; fo that afterwards fifteen and more died every day in the city of famine, and a fcorbutick dropfy be- Faminein gan also to reign among the Europeans there. Columbo. The 19th a Missice deserter brought advice, that they had equipped a boat, which lay ready to fail against the next night for Manaar; whereupon orders were fent to commodore Roothaus to intercept her, if possibly he could. The 20th Mr. John Hartman came with the following letter from the emperor to the general.

Raja Singa Rajou. OUR letter, dated the 8th of Fe-The empbruary, I received the next fo!- ror's lutter ' lowing day, wherein you testify your de-" fire of being admitted into our royal prefence, in order to affure me in perion of the fincere intentions of the Dutch " company, to continue in their confederacy " with our imperial majefty, made from " the time of your arrival with your fleet in our empire. It has always been my hearty with to fee you in my prefence, which I hope will be fulfilled with the " arrival of your excellency in our camp 66 near Raygamwatte. You further mention " the misbehaviour of fome of our lafcaryns " under the diffaves; fo foon as our imperial " majefty arrives in the abovefaid camp, there forces and officers shall be relieved by others, and fuch as have not done their duty to the crown be punished, as 66 is practifed in the camps of other great kings and monarchs. Your excellency did also give notice, that you had sent away nine ships the fifth of this month. " God Almighty, Ihope, will blefs your ex-" cellency's defigns with fuccefs, according

" lency.

Raja Singa Rajou.

The faid Mr. Hartman was prefented by Baldaus. the emperor with a tame elephant, and told Hartman the general, that the emperor had given professed him some private hints, that the prince his with an elefon would take it as a peculiar obligation phant. if the general would honour him with a fmall prefent.

The emperor's diffaves coming the 21st of February to the general, in order to fetch the answer to the emperor's letter, they were told, That the letter was not finished, by reason of many things of moment to be inferted therein: but the general took this opportunity to advise with them what prefent might be most acceptable to the prince. They answered, They could not tell; but would confider of the matter. In the afternoon they received the defired letter, fealed up under the discharge of the cannon, as is ufual upon fuch occasions, when each of the captains is presented with a piece of fattin, and two of the diffaves with a red Roan cap, a thing highly valued by them, (called ToppyHonday in their language,) with a Japonese buckler, for one of the prince's

CHAP. XXXI.

The Besieged fire furiously upon the Besiegers. The Emperor's Envoys. Negro Deserters forced back. Letters intercepted. The Emperor presents the General with an Elk. A new Battery erected.

The light THE 22d of February the enemy upon the non from the baltions of St. Stephen and St. John, and killed us feveral men. His majefty being that day come to his camp at Regaminatte, to take a view of the quarters prepared for his reception, perceiving a more than ordinary fmoke, fent a meffenger to know the truth of the matter. In the evening, about supper-time, word was brought that certain deputies from his maon interfer jefly were arrived at a farm about two miles themp from the camp; and that they had fent a meffenger to fignify, that they were defirous to fpeak with the general that evening; which being readily granted, an enfign was fent thither with fome foldiers to conduct them to the camp, and to make an excuse, that the time of the night had hindered their reception to be fuitable to their quality. They told the general, That his majesty had received his letter with a great deal of fatisfaction; and that they were fent to tell his excellency, That his majetty was at present at Walewitty; and that as foon as his quarters were fitted up, he should be fent for; for which reason they were commanded by his majesty to order the diffave of Saffragamme to have the roads leading to Reygamwatte repaired. They would VOL. III.

willingly have returned the fame night; but it being exceffive dark, their quarters were affigned them in the camp till next morning.

The fame day Edmund Ruyfeb fent word, that a great number of poor wretches were coming out of the city: The men, to the number of fifty, were fecured at Milagre; but the women and children being brought before the general, he ordered them (purfuant to their former refolution) to be whipped back into the town near the baftion of St. John; this being looked upon as the most proper means to straiten the enemy, and bring them to our terms. Towards the evening the men with twenty more, who fince had joined them, being also brought into the camp, the general took two of them aside, and told them, That they must look upon it as a particular favour, to be fent back once more; but if they returned they must expect nothing but the gallows, unless they would engage with fome of the Aratches that had deferted our camp, to furprize fome baftion or other for They were likewife forced Deferters our fervice. back with a good whipping, and the 24th back into one hundred and fifty more had the fame the city. entertainment.

The 26th of February the diffave of the four Corles came to tell the general, that

Baldaus. r' ofe of Saffragamme were still busy in repairing the roads and bridges, and produced a letter from certain great men of the court, enjoining him to demand ten certain perfons, that had made fhift to get out of the city with the enemies troops, and shelter'd themselves in the adjacent villages, having deferted the king's fervice before. The general was not unwilling to grant his requeit; but withal told him, That if these persons of quality had been as forward in furthering their king's fervice as we, there would not have been to many deterters. The fame day a letter was delivered to the general written by one of our Aratches to the Vidane of Pasdun-Corle, as follows:

" Hangedera Lionayde, fon-in-law to Ranatonge Arachie, withes health to Vidane, and the three chieftains of the Anintercej- " three Pattos of Pafdun-Corle. 46 diately upon the receipt of thefe, you " shall without fail or delay gather, in the "time of eight days, out of all the circum-" jacent villages, fifty pingues of pullets, butter, pepper, atchiar, and earthen vessels; and with them, in company of all the heads, or Majorals, of the villages " of Anguratotte, come towards Horne, and " from thence into the imperial camp. " there to pay your obeifance to his maje "tv. Such as fail in their duty must ex " pect to receive condign punishment. You must not publish my name, what I do in 46 this respect not being by my own autho-" rity; but when you come to court, you " may then declare, that it was Hangedera Lionayde, Ranatonge Rale's fon-in-law, " who gave you this invitation."

> The Aratche, who had been the author of this letter, being feized and examined the fame evening by Mr. Adrian van der Meyden, and major Van der Laan, did not difown his hand, but refused to discover (though he was threatened with prefent death) by whose command he had writ it. The general being of opinion, that there was some mystery hid under this pretence, especially fince this Cingalese lived under the company's jurifdiction, and had received fignal obligations from them, commanded his head to be cut off, and delivered him up for that purpose to the provost, in hopes of extorting a confession from him by this means; but under-hand ordered him to be fecured only aboard the ship the Arms of Amsterdam, for fear, that in case he should be executed on a fudden, they might be bereaved of the opportunity of difcovering the

Letter for Fibruary 27. being funday, the general to the emperation for a letter to Raja Singa, to advertise his majesty what had passed with the Aratche,

and at the fame time enclosed the original Baldate of the intercepted letter. The fame day the distance of Saffragamme coming to the general to tell him. That the roads and bridges were now repaired according to his majety's orders; he was commanded by him to employ the fame people in pericéting the pallifadoes intended for the new redoubt near the gate of Rojuba, which he promited to do. The general also told him what had happened with the Arabes; which he approving of, the general further defired him to provide fome Bussess forely affliched with the scurvy; which he likewise agreed to.

Word being brought that four fifthermen were coming over to us in a Tony, or iftherboat, they were forewarned not to come into the camp, under the pain of being hanged, unlefs they could engage all the fifthermen to come at once. About the fame Amonthine a certain Moorifi veffel came into the veffeling road from Puntegale, with a paffport from what a particular from the Amonthine a certain Moorifi veffel came into the veffeling road from Puntegale, with a paffport from what a form the brought advice that the lands and villages of Gale. Under the jurisdiction of Gale were farmed out at fifteen thousand eight hundred and forty nine rixdollars, for the next year, to be baid by four quarterly payments and that Areek, which the company had taken at

atte of twenty four laryns the ammenam aff year, was now to be delivered at the rate of fixteen laryns. Five more flips arrived at the fame time laden with rice.

The last day of this month, finding that the enemy worked against us, near the gate of Rajuba, lieutenant Alenbier was fent with fix firelocks to fecure their workmen; but these faved themselves by an early flight, and our people returned without receiving any damage. About he fame time letters were brought by the yacht the Arnemuyden, dated the 17th of February, on the coast of Coromandel, others being also expected, da- Ships from ted the 11th, with the yacht the Godfilb, not del, arrived as yet, having aboard one hundred load of rice of *Bengale*, a good quantity of gunpowder, and fixty foldiers. The other veffels cargo confitted in eighteen thousand eight hundred and feventy feven pound weight of gunpowder, two thousand seven hundred and eight y one bullets of divers fizes, viz. two hundred and thirty one of twenty four pounds, feven hundred and fifty of eighteen, eighteen hundred of twelve, fifteen hundred ftone-bullets, and ten thousand pound weight of lead, befiles fome other merchandizes, and fixteen loads of rice, amounting to the value of fix thou find ninety eight gilders, on account of those of Ceylon only. At the fame time the Rabbit sailed out of the road, being ordered to cruise on the south point of Negumbo, and to be relieved every eight days by another ship.

Pretty late in the evening, three deputies from the emperor preferred the general with ed the fame morning in an adjacent wood, which was received with great reverence by minor. his excellency.

The general and Mr. Van der Meyden, hearing the beat of drum in the new redoubt. near the gate of Rajuha, they went thither in perfon; and in their way met with feventeen Lakaryns, and two Aratches, who being poffed in an outwork near the faid gate, had quitted the fame: they being ordered to be fecured in the head quarter, they went forward, and found that the alarm had been occasioned by the coming over of the Lafcaryus, whom they mittook for enemies. They reported, That the city was provided on many with provisions till May, their allowance,

unit of the wir. twenty five Mididos to a head, being Columbo given them for the month of April: they added, That it was whilpered about, that

the governor had embarked all his move-Baldæus, ables, money, and jewels in a boar, and fent them in the night-time to Manaar; which news was very unpleafing to us, because they had escaped the fight of our

The 6th, 7th, 8th, and 9th of March, we advanced bravely towards the gare of Rajuba: two Portuguese deferters, with some Lascaryns well armed, being examined apart, deposed, That the city could not hold out longer than towards the end of May, the remnants of the rice being very flony and unclean, nay, wet and corrupted. Hereupon the general ordered that a battery of two guns should be crected opposite to the utmost point of the bastion of St. John, the better to batter and lay level the flank of that of St. Stephen's, and under favour thereof to open again the trench leading to our mine, and fo working along the wall, to take poft upon the counterfearp,

CHAP. XXXII.

Many Deserters give Account of the Condition of Columbo. Gotskens fent Envoy to the Emperor. His Letter to the General; and that of the Besieged to the Emperor.

A BOUT that time divers Lascaryn demade heavy complaints that they were forced to feed upon corrupted rice : the last told us, that there were no more than forty left of our prisoners, and that such of our officers as were not flain in the affault, died afterwards of their wounds, except a ferjeant. He alfo discovered to us, that the belieged had carried all their guns from the baftions of St. Stephen, St. Philip, and Charges into their outwork, before the gate of Rajuba, in order to discharge the same the next following night upon our pioneers. Paul Meno, who was then upon the guard there, was thereupon ordered to let the labourers ceafe, till they had fpent their powder and ball in vain, and then to let them return to their work. In effect, they that very furiously the next night, both with their cannon and firelocks, upon our works; and by break of day the general went on horfeback to Milagre, to view the works of the diffaves on that fide, which he found to be well fecured by a ftrong fet of palifadoes, reaching from the fea-shore to the fens; and being guarded by four companies, these were thought sufficient to oppofe any fally of the enemy on that fide.

One of our foldiers being fome days before miffing, we understood that he had fought for shelter with his majesty for a crime he had committed; which at his majesty's request was remitted him, yet not

without being discharged from our service. The diffave who made this request, told the general, that the grapes fent to the emperor had been very well accepted.

The 13th of March a boy, who had de-Aboy deferted the Portuguese, came to the general, series brings and told him in private, that having been wee, let down from the battion Clergos with a rope, by fome Lascaryns who kept guard there, they intended the next night, with the rifing of the moon, to come all over to us, or else deliver up the bastion. The boy, according to his own defire, being foundly whipped, was fent back into the city, to take away all fuspicion of a private correfpondence with us.

To tecond his endeavours, a company of the guards was poffed in a convenient place; but the befieged fired fo briskly from the baftions of St. Stephen and St. Philip that night, that there was no opportunity of putting it in execution at that time. A Toupas deferter reported the next day, that the bastion of St. Stephen was guarded only by fixteen men, having questionless disposed the rest in other places, as being sensible that the gaining of that bastion would stand us in no great flead. Six La/caryn deserters confirmed the fame foon after; and two among them affured the general, that the governor of Columbo had fent a letter to the emperor Raja Singa.

Baldwus. The 14th Edmund Ruysch, whose quarters were at Milagre, fent word, that Henry Two Durch William Boogare a corporal, and Peter van foldiers go brussingen a common foldier, were gone over to the enemy. The fame day ten Lasca-

ryns well armed came over to us; and the fame evening, with the rifing of the moon, two cannon for battery was planted upon the battery against 81. John's bastion. His majetty having defired that fome perion of note might be fent to him, to confer with him in private, our factor Isbrand Gotskens, a native of the Hague, a person equally dextrous with his pen as the fword, was fent with all expedition thither. About the time time fome Lafearyns with their wives and children coming out of the city, were turned back again; a letter being at the fame time delivered to a certain boy for Si-A Letter to mon Lopes, lately gone over to the enemy,

the deferter intimating, that, If be would endeavour to Simon Lomake the negroes in the city rife, be should not only dejerve his pardon, but also a good reevard.

A falle as-Cola 1.bo.

At midnight we made a false attack, which put the whole city into fuch an alarm, that there was nothing to be heard but ringing of bells, and the noise of drums; but in half an hour all was quiet again. The next day his majefty fent three deputies, to know the reason of such sierce siring; which being told them, they informed the general that Isbrand Gotskens had not as yet had audience of the emperor, but would questionless be admitted the next day. A letler was also sent to the general from the emperor Raja Singa, wherein were enclosed twenty others, one from Antonio de Souza Coutinbo governor of Columbo, the other from the chief citizens of that city, both dated the 10th of March, in which they implore his majefty's affiftance.

RAJA SINGA RAJOU.

The empe- " F por's letter se

THE prefent opportunity has invited our imperial majesty to to the gene- ce dispatch these few lines to your excellen-" cy: two days ago, being Wednesday the " 15th of March, I broke up from Guiramibula, and marching along the other " fide of the river, by the way of Walewitty, " have fixed my tents in this place; from whence I dispatched immediately some of " my great courtiers, to notify my arrival in the camp at Reygamwatte, and to en-" quire after your excellency's health. I " commanded them at the fame time (having not as yet an answer to some of your " excellency's letters directed to me) to defire you to fend a person of note, unto " whom I might by word of mouth give " an answer to the faid letters. It being " night when I arrived in the camp at

Regamwatte, I could not order the dif-Balde polition of my forces till next morning, when the two enclosed letters were de-" livered to me, one from the governor, the other from the citizens of Columbo ; the contents whereof you will understand " from the originals.

of Regammatte, Mar. Raja Singa Rajou, most potent emperor of Ceylon.

Most Potent Emperor Raja Singa, &c.

Mmediately after our enemies did en-Thegen gage into this unjust war, which con to the man tinues to this day, I let your majesty per. know the reasons which induced me to follicite some supplies from your majesty; not questioning, but that you would not leave me in fuch an extremity, it being always the ambition of great monarchs to take the less powerful under their protection; though through God's mercy, we have hitherto not only defended this city, but also at several times given the enemy sufficient proofs of our bravery, in destroying and dispersing his forces, of which we have fent an account to your majesty. But perhaps these letters never came to your majefty's hands, being intercepted by the enemy; which feems the less surprising to me, since they have treated the natives of this island, (without any just cause,) that went out of this city like flaves, forcing many of them to retire back without the least mercy. The city of Columbo is an antient inheritance of the Portuguese, bestowed upon them by the kings and emperors, your predecessors, who always were ready to ho-" nour them with their protection; neither " do we want opportunity to make your majesty (if you please) sensible of the manifold services done by the Portuguese in this ifle, in case we did not believe the same to be still in the memory of your majesty, and many of your great ones. We do not know to have given the least reason of displeasure to your majesty; which makes us imagine, that you will be plea-" fed not to leave us in this extremity, in regard it feems much more reafonable to affift the Portuguese, your antient friends, than the Hollanders, your new guests. Time has already discovered the intentions of the Dutch; and experience will foon convince you, that all their aim is founded upon lucre and interest, which they diffemble for the present; but so soon as they are masters of this place, your majesty will too late be convinced of the truth of what I fay. I will

Jiegisinens 46 Mmediately after the Hollanders had laid fiege to this place, our magi-" firates and governors did give notice " thereof to your majefty, as likewife of " the enfuing general affault made by the " enemy both by fea and land; which be-" ing done in the day-time, we let them " advance into the city, but afterwards " made them glad to ask for quarter, which was granted them. According to " the confession of the Dutch themselves, " they were two hundred and forty flrong " when they passed the fens, the greatest part whereof with their boats fell into our hands, befides a ship of thirty guns " taken by us, and another much damaged, " which they had enough to do to carry off, " not to mention those that were flain in the fhips, and in the affault. Being afterwards advanced to the ditch, they fix-" ed their miners, and were bufy in bring-" ing over their gallery; but we forced " them to retire with confiderable lofs, " and took the gallery with the loss of one man only. There remains nothing now " but for your majesty to vouchfafe us your " favour, which we heartily with for and

" desire. From what has been faid, we Baldous hope your majefty is fufficiently convinced \square of our good will and zeal, in defending a place, bettowed upon us by your imperial majetty's ancettors; and that, if fupor ported by your favour, we shall never cease to perfist in the same resolution, in 46 hopes that your majetly will rather af-"fift the Partuguese, your ancient friends, than the Hollanders. God protect your majefty, and your dominions.

Columbo, Mar.

By order from

Diego Leitaon de Souza. chief fecretary. Manuel de Fonfeca. Diso de Souza de Cunha. Ruy Lofes Continbo. John C.elbo de Caftro. Bento Ereiro d'Abreu.

The 20th of March a negro pioneer came to us, who, having worked in the ditch, discovered the place to us; and that four Portugueje being taken as they were coming over to our camp, had been hanged: that our new 'sattery had killed two Canaryns and a gunner, and wounded feveral others upon the battion of St. Stephen. Concerning their provisions, they confirmed what had been told us before. The general went with the faid negro in person to the ditch, to fee the place where the negro had been at work, and perceiving three Portugueje close together in the ditch, he got upon the wall, and discharged his sufee twice at The general them; but foon got down again, without in danger them; which he had been in great danger, three kolled. bullets paffing immediately after that way.

C H A P. XXXIII.

Ysbrand Gotskens returns from the Emperor's Court: Gives an Account of his Transactions. Letters sent to Columbo. A Battery raised. A circumstantial Account from Goa, and its Condition.

About ABOUT noon a boy was taken in our works, where Paul Meno then kept guard, inquiring after our strength: and being asked why, he aniwered, That the governor of Columbo had tent him to enquire after it. In confideration of his youth and simplicity, he came off with a good whipping, and fo was fent back into the city. Major Van der Laan fent word, that the enemy having made a hole through the wall, played from thence directly upon his works, and had killed a negro; and the same night they played with a cannon upon the fame works, but without hurting any body.

The 23d of March towards evening, the Vol. III.

factor Ysbrand Gotskens having taken his leave the fame day of the emperor, returned to our camp, where he gave the following account in writing of his negotia-

" That in answer to five several letters Ysbrand written by general Hulft to his majesty, Gotskens "he had commanded him to tell the gene-count of his " ral, That having received a letter dated negotiation. " the 16th at Golumbo, he would let him "know the contents thereof. That his " majesty was well satisfied with the pro-" ceedings against such as were fled out of

" the city; which though it might feem

Ralde

Raide us, " formewhat cruel, yet was he contented to " have the blame thereof himfelf, as tend-" ing to his fervice, and the speedy re-" ducing of the city. That because his majelly was sensible that whatever pre-" fents he could make to the general of " rich apparel, and fuch like ornaments, "he was fufficiently provided with before, " he had thought fit to befrow upon him " the title and dignity of his Director-gene-" ral, and that for the future he fhould be acknowledged as fuch throughout his dominions. That he further defired the " general not to take it amifs, that after the diffaves had notified his arrival in " the camp of Reggamwatte, a guide had " been denied to the captain of the guard, " it being contrary to the cuftom of his " country for any one to be introduced at " court, without notice being given of his " arrival to the emperor.

" What the general had alledged con-" cerning the Mouffen, and the foldiers be-" ing fatigued by fo tedious a fiege, his " majesty was very sensible thereof, and " that when the general should come into " his prefence (which he hoped would be " within three or four days) they would " confer upon that point, and fettle the " matter to his fatisfaction: But his ma-" jefty being informed that his excellency " frequently exposed his person, and regarding him with the same tenderness as " his own eyes, had defired his excellency " for the future to take more care of his person, commanding all his officers of what quality foever, to be careful of him

" to the last degree. "What his excellency had alledged, " concerning his majefly's being conftantly employed in weighty affairs, and that " therefore he was unwilling to diffurb him " with frequent letters; His majesty re-I lied, that the subject of his excellency's letters being fuch, as most nearly con-" cerned his fervice, nothing could be more " acceptable to him, than to bellow his " time in perufing the letters of the most " trufty fervant that ever he had in his life, 46 defiring therefore, that his excellency " might superfede these excuses. That " what his excellency had alledged in his " behalf, concerning the mittake in com-" manding his forces at Reigam-Corle, as it " was intended for his majefty's fervice, fo " it was very acceptable to him, and needet ed no farther excufe; as was likewife " the punishment inflicted upon the author of the letter writ from Pajdun-Corle, " to deter others from the like undertak-" ings. Concerning the treaty made with " Mr. Westerwold, his majetty declared, " he would keep the fame inviolably, not-" withflanding that feveral generals of the

"Indies, and Dateb governors of the ifteBala." in Ceylon, had done many things which had given occaffon to no finall diturbances: but that as he cilled God to witness of his innocence, fo he was extremely glad to have meet with a person of homour in his excellency's person, who having done already considerable services to his crown, he intended to enter with him into a strict consideracy, which should thand firm as long as the sun and moon should furnish the world with light.

"It was therefore that his majefly was very defirous to know his excellency's intentions, whether, after the taking of Columbo, they fhould attack the kingdom of Jafnapatnam or the life of Manaer, and whether it were not convenition to the foliation of this forces under certain difflives thinks, 'mmediately: That he had received two letters from the before-mentioned places, which should be communicated to his excellency. His majefly also declared, That either next funday or thursday (which of these two his excellency should pitch upon) he would expect him at court, and that he would fend some of his courtiers to conduct him thitser.

At the fame time certain deputies from Two Inhis majefty brought along with them two International Columbia letters penned by Mr. Hullt our general, in International Columbia answer to those lent from Columbia to the emperor, and dispatched to his majesty; which being well approved of by him, and figned by his excellency in his majesty's name, were carried the next day into the city.

Soon after news was brought from Montual, that four hundred Portigues, commanded by four officers, had been feen near the sea shore on the other side of the river, but hitherto had not made the least attempt of passing the same. Abundance of the inhabitants of the inland countries, who perhaps had never had a sight of a man of war, or any well-disciplined forces, stocked thither (with his majesty's permission) to see them. About the same time we receive a supply dea reinforcement of sifty men from Pun-sifty men tegale, being all they could spare.

The before-mentioned letters fent in his comp.
majefty's name, and carried by fome of his chratebes and Lafearyns into Celumbo, were at first received with a general salute of the How their cannon and small arms; but being opened, him with the inhabitants sufficiently testified their re-resent fentment, telling the messengers, that in case their condition was not so desperate, they would play them another game before they returned; of which usage the messengers desired the general to make his complaint to the emperor.

The fame day arose a violent tempest, with rain, thunder, and lightning, which sugar killed one of our fentinels, and ftruck three musquets, in the church of Quia de Lobo, all to pieces. The emperor was fo complaifant, as to enquire the next day by one of his messengers, whether we had suffered any damage in our tents or works, and was answered, that God had preferred us from all the danger. The fame day, being the 25th of March, two Europeans came over to us; one of them, a native of Marfeilles, was overtaken by the way, and received nine wounds, fo that he narrowly escaped to our works, but died the next morning.

The 26th a ferjeant, a Mistice, can 2 over to us, and reported, That two more of the fame company watched only an opportunity to defert: That they had already diffributed to each foldier his quota of provisions, viz. a Parra of rice per diem, for the month of April: That they were much afflicted with the dropfy and the Beribery, a fwelling in the knees, which takes away the

ufe of their legs.

Soon after commodore Rootbaus fent in three fishermen, taken by our boats within mufquet-shot of the water-fort. The feamen had fifty crowns given them (the ufual reward for every Tony or fifther-boat) and twenty five more as an encouragement. Thele fishermen being the chief persons who supplied the city with provisions. Orders were also fent to the commodore, not to expose his seamen without an absolute necessity.

Some of our bett workmen were also confulted about the erecting another battery against the bastion of St. Jebn, in order to defroy their pallifido work in the ditch, and to facilitate the bringing over of the gallery. The general told the emperor's diffave, that he flood in need of four or five hundred pioneers and workmen; but he declined the matter, telling him, That when he came to the emperor, he would doubtless not deny his request.

About the same time a Portugueie mer-

the last came in a boat crofs the bay into our camp, in company of a Negro trumpefram, ter. They reported, That they were reduced to great extremity in the place; that no less than one hundred thirty had been buried yesterday; and that it most of the Portugueje had not their legs (welled by the dropfy, they had deferted long before this.

The 29th of March the enemy were preparing to attack the redoubt of Paul Meno two hours before day. But the Negro pioneers with the fentinel retreating in time, and giving the alarm, they retired, after having exchanged fome mulquet-balls without doing any harm. Four deputies arriving foon after to enquire the occasion of fuch finart firing, they were thewn the

works, and told, That we wanted four or Baldows. five hundred Colvi, or labourers. Three other fiftermen were also brought up by the feamen, who had the ufual reward given

At the fame time the Popkensburgh yacht News from arriving from Wingurla, brought the fol- Go advislowing advice:

That Don Rodrigo de Lobo, Conde de Se pom. credo, viceroy of Goa, and his fedretary, with three of his domesticks, having been poisoned, died within four or five days after. His death being concealed for fome time, Manuel Mafearenbas Homem, formerly governor of Coylon, was (purfuant to the king's orders) conflicted two days after viceroy in his flead : but the Fidalges, or gentlemen, not being fatisfied with his perfon, they expected daily a revolt (jut as it happened against him at Golumbe, 1652.) However, not long after the viceroy's death, the merchants of Goa begin to load all the yachts that were there, as also one galeon and a carrack, whilst the governor was but'v in equipping of men of war and other velfels, intended for Ceylon, offering twenty Seraphyns (or Dutch guilders) to every foldier that would lift himfelf. Our refident of Wingurla further advised, That they had fent from Gos one bundred fixty thips, and among them fixteen men of war, the 8th of February, to the north, to fetch provisions and fome other necessary commodities; and that the faid fleet had tarried four or five days in fight of Wingurla by reason of the contrary winds. That three Patachor, or yachts, were failed for Molimbiques but one being leaky, was forced to return to Rombaffa; two more to Minifar, two more to China; and one carrack and a galeon, viz. the Bon Jejus and Noffa Senbora de Gratia, fet fail the 19th of February for Portugal, aboard of which were carried the following gentlemen, being accused of certain crimes against the government, viz. Don Bras de Cajtro, late governor general; Don Lewis de Souza ; Don Pedro de Caltro ; Manuel de Souzo Cabraer, maiter of the artillery; Diego de Salvaar, captain major; Estevaon de Melo, late governor of Ballyn; Charles Hudjart, a rich merchant; Dr. Caldero; and Jeronimo Lobo de Falbetta. In the Ballyn (under the jurifdiction of Goa) remained prifoners, on account of being concerned in the declaring Don Bras de Casftro viceroy, Don Rodrigo Monfanto, a captain in the Buffyn; the Veador de Euzendus, or fur-intendant of the merchants; and Leon Corre.

He advised, That the before-mentioned carrack and galeon had aboard a very large cargo of statts and callico's, of cinnamon, indigo, pepper, bezoar-stones, cloves, &c. And that feveral of the richelt marchants of

ngers, that in cafe there.

o desperate, they

game before they

e the messengers

ke his complaint

Baldaus. Goa having imbarked all their effects aboard the faid two veffels, were gone privately a-

long with them to Portugal.

Two days before the yachts the Zierick-fee and Naerden arrived before Goa, foar Patamars, with a Portuguese, came to that place to bring advice of the desperate condition of Columbo; and that they stood in great need of the fo-long-expected fuccours. But the government of Goa finding a great aversion in the Portugueje soldiers, as well as the Negro feamen, to go to Ceylon, especially in this dangerous season, they pretended to have received letters from Don Anthonio de Souza Coutinho, governor of Columbo, with advice, That the Dutch had been forced, with the affiftance of Raja Singa, to raife the fiege; and to make this news pass for current, the new viceroy Manuel Majcarenbas Homem got the governor of Columbo's hand counterfeited, and ordered for three days fucceffively ringing of bells, illuminations, bonefires, and other demonstrations of joy to be made for its relief.

By the same letters from Wingurla advice was brought, That our ships designed for Perfia and Suratte, were failed from thence; and that according to the intelligence received from Ditsely, (a Mahometan city not far from Goa,) the fo-long-expected fquadron, confifting of between twenty and thirty fhips, was to fail within three days with men and

Patamars are Indian advice-boats covered all over for the carriage of lesters, which they tie round in wax cloths to the mafts. Patamars are also stying foot posts.

provisions for Ceylon: though this proved Baldaus, afterwards only rhodomontade.

timed on

He further added, That after the departure of the before-mentioned veffels bound to Perfia and Suratte, frequently yachts had been fent to the river of Goa, to get intelligence of the motion of the faid fquadron: that as far as they could learn, they flay'd only for the return of the before-mention'd fleet fent out to fetch provisions from the north; when they intended to force all the feamen, before they could fet foot ashore, aboard the men of war, in order to carry them, together with feven or eight hundred European foldiers, and good store of provifions, to the ifle of Ceylon, for the relief of Columbo. According to the governor of Wingurla's opinion, the faid fuccours could not be ready before April; and that if by that time they had no certain news at Goa of the furrender of Columbo, they would, besides the before-mentioned fquadron, gather all their naval and land-forces, and endeavour to penetrate, with the frong north wind, which commonly blows in that feafon, into the harbour of Columbo for its relief.

He further added, That there lay two galleons and a carrack at anchor in the river of Goa; one whereof, which lay near Marmagon, would scarce be fit to go out this season. Lastly, That the yacht the Roman lay ready to fail upon the first news he should receive of the going out of the faid fquadron for the relief of Columbo, to give us timely

notice of their coming.

CHAP. XXXIV.

Letters betwixt the Emperor and General. Several Deferters come over to us. The General invited to the Emperor's Camp.

HE 30th of March a good number of Portugueje passing the fens in two boats, called Manchous, attacked our forces in their works near the gate of Mapane; but after fome firing on both fides, were forced to retire in confusion. Soon after a certain captain of a village was taken by our people, who was fent out to fetch in fome fascines, intended to be made use of in strengthening the cortin betwixt the bastions of St. John and St. Stephen Two Tenys, or fisher-boats, were likewise brought in with five fishermen, and the feamen rewarded according to cuf-

Letter from

At the fame time the general writa letter stegeneral to the emperor, wherein he imparted to his majesty the news he had received concerning the intended relief of Columbo. In the evening two Portuguese, deferters that came from the baftion of St. Stephen, (having fent the fentiael upon an errand,) gave us a tolerable

account of the condition of the city; and the next day another Portuguese deserter bore the marks of their extremity in his countenance, which was very meagre. The feamen also brought in four fishermen more; who making up the number of fifteen in all, Fiften f they were fold for flaves by the found of flor trumpet, to reimburfe us the money that was flaver, given to the feamen for the taking of them.

The first of April the diffaves of Ouve and the four Corles came at the head of a troop of one hundred Lascaryns, divided into certain companies into the camp; and bringing along with them a letter from his majefty to the general, neatly laid together, they were received with all possible marks of honour. The letter ran thus:

" conduct your excellency with his bleffing, " that our imperial eyes may fee your per-" fon, which happy hour and day I expect " with joyful eyes; affuring your excellen-" cy, that whatever you shall propose to us

At Reygamwatte, April 1. 1656.

It was then confulted what method was most convenient to be taken, and what preparations were necessary in order to attend the emperor with the utmost splendor; his histoge diffave having (by his majefty's orders) appointed the next following wednesday In more for the general's reception. But before his departure he ordered two twelve-pounders to had on be planted upon the battery against St. John's ballion, where the next day a feaman was killed, and a foldier fhot by the same ball through the hat, without touching his head, xitm de or any other part. The same day sixteen Locaryns well armed, coming over to us from the bastion of St. Steven, were overtaken by fome Portuguese forces, with whom there happened a fmart skirmish before they could get clear, two of them being wounded. They were employ'd in our works near the gate of Rajuba.

" will be as acceptable to our ears as the

" most harmonious musick in the world."

In the afternoon the diffaves of *Ouve* and the *Four Corles* came with a numerous retinue to attend the general, leaving it to his choice whom of the two he would pitch upon to conduct him to his majefty. After fome difcourfe the diffave of *Suffragamme* was named by his excellency for that purpole, and ordered to get every thing in rea-Vol. III.

diness for their departure against the next Baldaus, morning. News was brought at the same time, that seven Canaryns were taken by some of the emperor's forces above Negumbo, coming in a fisher-boat from Columbo.

The 4th of April in the afternoon, advice being given that his majefty was come on horfeback to the pass of Welecande, the general was preparing to meet him there; but as they were just ready to take horfe, certain diffaves came post with a message from the emperor, desiring the general not to come till to morrow, because his majesty

was returned immediately.

Accordingly the 5th of April the general Thegene, fet out on his journey, in order to wait on ralferrouthis majefty, attended by the two factors, who journed Edward Ooms and Tibrand Gotskens; hey to the infical Lucas van der Dussen, Cornelius Valkenburgh secretary, James van der Rhee the interpreter, George Bloom, and Don John de Costa, accompany'd by the imperial distinces of Ouveand Saffragamme, and a company of firelocks under captain John Hartman; Mr. Adrian van der Meyden, major Van der Laan, the distave of the Four-Corles, besides several officers of note, conducting them as sar as to the pass of Nacolegamme, his majesty being then encamped upon the river of Reygamwatte.

The first testimony of respect showed to Honouralle the director-general of his majesty, was the reception of offer of three fine and well-accounted horses, the general.

for the courtiers to make use of them at pleafure. These were followed by five tame elephants, with their guides, who were or-dered to keep in the van. Then came a confiderable number of noblemen and officers, at the head of their respective troops, paying their respects to his excellency, and asking after his health. As they approached the imperial head-quarters they were met by some of the chief men of his majefty's court, accompany'd by a vast number of foldiers, umbrello-carriers, trumpets, muficians, eleven elephants, and two fine horses, with saddles, bridles, and other ornaments befet with gold and precious stones, to compliment his excellency in his maje-fty's behalf. Thus they marched on through a guard of fusileers and bowmen ranged on both fides for a quarter of an hour together, till they came to a house prepared for the general's reception, neatly furnished, the outward-rooms being hung with hanging of a white linen cloth, and the bed-chambers with gold stuffs. Here the general entered with his retinue under a falvo of firelocks, placed on the other fide of the river near the imperial palace. They had fcarce arrived here two hours, but his majesty's diffaves came to enquire after the general's health, being informed that his excellency was feized with an ague, which had made him refolve

Baldaus. to come to him in person, had he not received nearer advice, that his dearly-beloved director was on the mending-hand, of which he expected the confirmation with the utmost impatience. These compliments were returned by the general with the utmost demonstrations of respect and duty, telling the diffaves, That he was highly defirous to appear in the prefence of fo famous and potent a monarch fo foon as possible could be, his presence being absolutely necessary in the

Next day being the 6th, great store of provisions of the best kind were brought in boats for the general and his whole retinue. In the afternoon fome courtiers brought rai prepares word to the general in private, that his ma-for his re-jefty being seized that morning with a sud-turn. den illness, could (to his great affliction) not speak with his excellency that day. His excellency reply'd, That he was heartily forry his prefence was fo abfolutely necessary in the camp, that he could not without great hazard stay, fince it was uncertain how foon his majesty might recover; for which reafon he defired leave to depart for this time till a better opportunity, defiring that four horses might be laid by the way, which, as foon as his majesty thought convenient, might carry him with all speed to court 3 whereupon orders were given to John Hartman to prepare for the march; which was done accordingly the same night.

Soon after we understood that his majefly had been forced to have been let blood in the arm; and that he had shewed a great deal of forrow for the intended departure of the general, telling his courtiers, That being fentible how necessary his presence was in camp, he would either the next morning, or at furthest in the evening, admit him into his presence, in case he found the least abatement of his illness. In the mean while the general fent the following letter to his ma-

jesty:

Most Serene Emperor,

The gene-

THREE days being already passed fince I came hither by your majeto the em- " fty's command and defire; but not being able hitherto to appear in your maje ty's presence, I most humbly beg leave to return to the camp, the whole burden whereof rests upon my foldiers, pro-" mifing to be ready to attend your maje-"fty, whenever you shall think fit to fend for me; and living in constant hopes, " that in case some miscarriage or other " fhould happen in my absence, the same

will not be alledged against me, and put Baldaus upon me as a blemish to blot out the remembrance of my former fervice. God protect the emperor.

Your majesty's most humble fervant,

Gerard Hulf.

This done, the general ordered Ysbrand Gotskens and Don John de Costa, with some of his trufty Lascaryns, to take a view of the king's guards upon the road, with an intention, that in case he saw no certain prospect of going to court to day, (as indeed there was but little appearance he should, considering the emperor's indisposition,) he would privately go post to the camp. The 8th of April the following letter was delivered to the general from the emperor.

HE persons sent to enquire after The empt. your excellency's health, delivered reviewer to me, with a great deal of fatisfaction, to the grow your excellency's letter wrote on friday ral. last at four a-clock. I was extremely pleafed to hear you were in health, and retained the same inclinations for our service. It was on the other hand no fmall affliction to me, that you had flay'd fo long in my court, without being able to fee you. I affure you, that the fame has happened far beyond my wishes or intention; but it feems to have been fo ordained by God, that your excellency should be a witness of my illness, and at the same time have an opportunity of receiving the prefent fent to you by the prince, (born by God's providence for the welfare of my fubjects,) and deliver'd into my hands before my departure from Candy. Your excellency may prepare your felf against to morrow, when I will fend word for your appearance in my prefence; which done, you shall have liberty to return into the camp: when I will also issue my orders for the furnishing you with all things requifite for the accomplishment of such measures as shall be taken betwixt us. After my recovery I intend to come in person into your camp, for which reason I have commanded the diffave of Ouve to prepare my quarters there. No more, but that our imperial majesty does not cease to pray to God for your excellency's welfare.

CHAP. XXXV.

The General's most magnificent Entry: He is admitted into his Majesty's Presence. What passed at their Interview. The General's Return: His Unfortunate End.

Baldeus. A BOUT noon, just as the general was at dinner, we heard a noise of drums, as gover trumpets, and other musick on the other fide of the river; and soon after saw some of the chief courtiers of the emperor, with three of the choicest horses of his stable, adorned with most magnificent saddles, bridles, and other accourtements, to advance in very good order towards us; some perfons of the first quality marching before to invite his excellency to court. The general ordered immediately his guards to pais the river with the presents, with an intention to follow them in person with his whole train; where his excellency was complimented by the diffaves of Ouve and Masule, the

captain of his majetty's Guard du corps, and Balderic a great number of other courtiers. The whole cavalcade was ordered in the following manner: His excellency's guards led the van, fifteen enfigns and flandards being by the first ranks carried trailing upon the ground to shew the spoils of their enemies. These were followed by his majetty's horses and musicians, and then by five tame elephants: without the gate of the palace were ranged a vast number of musketeers; and passing over the bridge they found the guard in the outward-court ranged on both sides, through which they marched into the imperial palace.

The doors being shut after them, all the Hollanders there present were conducted through a large square into a spacious hall, (called by them Mandones,) on the west-side whereof they sound his majetly seated

in great pomp upon a chair of state, mounted fome steps from the ground. No sooner had they entered the hall, but all the great courtiers paid their reverence by falling stat with their faces upon the ground, and the *Dutch*

Baldaus, upon their knees, till his majesty was pleased to order them to rise by a nod. Then they began to approach the imperial throne, adorned with most precious tapestries of gold, (called by them Alcatives,) coming to the mid-dle of the hall, they fell upon their knees, a fecond time, according to the custom of the eastern nations, till his majesty was pleased to arise from his seat, and commanded the general to come nearer, who made

the following speech to his majesty:

His fpeech to

Most Potent Monarch! TOUR most humble servant approaches your imperial throne with " a most violent passion, in considence of " your generous inclinations and wont-66 ed clemency, which has encouraged me " to address myself to your majesty (whose 46 name is renowned throughout the world) with a most fincere wish, that God Al-" mighty will be pleafed to blefs your most " illustrious imperial majesty, and the prince, with a long and happy life for the welfare and protection of your fub-

jects.

I am come hither to renew and con-" firm the most fincere confederacy esta-" blished betwixt your most potent majefty and the Dutch nation; and to defire, "That whatever differences or diffurbances may have happened autherto betwixt your imperial majesty and our nation, may be buried in eternal oblivion, in order to establish an eternal peace and confederacy, which may be as durable as the bodies of the fun and moon. It can't 66 be denied but that feveral mifunderstandings have happened betwixt your majefty's officers and those of our company; but these ought now to be removed even out of our memory, at a time when we are fo profuse of the blood of our countrymen, to force our common enemies " out of this ifle, and ready to give your majesty every day new proofs of our sincerity and hearty inclinations towards 66 you.

His majesty appeared highly satisfied fed betwire with what his excellency had faid, ordering him at the same time to rise; which he seemed not to understand, and at the same time offered certain prefents, being, as he faid of little value in themselves; but nevertheless much regarded by the mo'; potent emperors and monarchs, to wit, some standards taken from those very enemies who had for many years together fo cruelly and barbaroufly oppressed his majesty's subjects, especially in the Low-Lands. His majesty then, fpeaking of the prefents fent to his excellency by the prince his fon, his excellency acknowledged the same with extraordinary reverence, pointing at the same time at a Baldeen. iewel he wore upon his breatt, prefented him before by his majefty; and to approaching the throne, he kneeled upon a cushion laid upon the step of the throne, and touching his majefty's hand, told him. That he thought it the greatest honour he ever was capable of receiving, to be admitted to kifs his majesty's hands.

The emperor took a Gargantinho, or col- Extraordi. lar of gold, which he threw about his down to the excellency's neck, and drawing his own general, ring from the first finger of his left hand, he defired he should extend his finger, and wear it in remembrance of his majesty, who put it upon his finger. His excellency was fo furprized at this extraordinary favour, That he had fcarce power to put out his middle finger of his left-hand, telling his majesty, That this finger having had the misfortune to be disfigured by his enemies, was now abundantly recompensed for his pains by the honour his majesty had been pleased to bestow upon him. Then retiring somewhat backwards, and ftanding upon a tapestry, he declared to his majesty, "That he was sent into this isse German "with full power by the general and proposens council of the *Indies*, to propose to general. "his majesty, whether he would be pleafed to continue the antient alliance, (made with Mr. Westerwold,) or have the fame renewed, and fome other articles added; affuring his majefty, That whatever should be agreed upon " fhould be kept inviolably on their fide." Unto which his majesty replied, " That " he was highly fatisfied with his propo-

Then the general giving a short account of their fuccess against the enemy, his majesty said, That he had heard of the fame to his fignal fatisfaction; and that he had a prefent from the prince his fon for his excellency: whereupon approaching the throne a fecond time, his majesty prefented him with a garter of gold, which to present he faid had been worn by the prince him-od with a

This done, our prefents being ordered to be brought in, Captain *Hartman* entered with fifteen of his ftoutest foldiers, each of them trailing one of the enemy's colours upon the ground; which being thrown carelefly down in the hall of audience, a white buckler, formerly belonging to the Portuguese governor Anthonio Mendes d'Aranba, was laid upon them, as also an Indian scymetar, the hilt whereof was of agate and gold curioufly wrought, which his excellency declared to be intended for the prince, wherewith to defend his subjects (when come to riper years) against all the enemies of the crown, not except-

Wherewich his majesty seemed highly fatisfied, that he put the fcymetar next to his throne.

CHAP. XXXV.

The prefents fent by the company to his majesty were as follows:

Two very fine Perfian horses, one Turky gun, two Persian bows, with their arrows and quiver richly embroidered, one Japonefe gown very rich; two greyhounds, two Perjian sheep, two rock-goats of Visiapour, one piece of Sandal-wood.

Those for the young prince were: One very fine Persian horse, two fuzees with very curious barrels, one filver bafin, wherein were laid two pieces of Perfian stuffs wrought with gold, two silver boxes of China, one hog-itone, called Pedra de Porce, one piece of fandal-wood, &c.

Whilft the prefents were delivered, his excellency begged his majefty's pardon for having detained him fo long; and as the time of his stay could be but short, he told him. That he had three things more to propose to his majetty, (whereof the want of the pioneers was one,) defiring, that he would be pleafed to hear the fame from the mouth of Tibrand Gotskens in private, he being the only person whom he had entrusted with the secret. The emperor then commanded all his courtiers to withdraw, defiring that our officers might be ordered to do the same: which being done accordingly, his excellency again approached the throne; and having by his interpreters, George Bloem and Cottemaley, difcoursed with his majesty a quarter of an legens hour, he defired leave to depart to the ni takin camp; which being granted, he was re-

> The same evening the general sent to the emperor by George Bloem two noted partifans, who had done a great deal of mifchief in the country under Gafpar Figeiro, to dispose of them at pleasure. Mr. Bloem was received by the emperor in a private room, and presented with a golden chain and

The 9th of April, early in the morning, nihesamp the general took horse, and came pretty early with his whole retinue to Nacclegamme; from whence he was conducted by Mr. Adrian van der Meyden and Mr. John van der Laan, with two companies, to the camp.

The General's Death notified to the Emperor; who fends his Envoys into the Camp. Mr. Adrian van der Meyden succeeds him. A Portuguese Captain comes over to us.

Baldans. THE fame night George Bloem, inter-The four ter to the emperor, to carry the doleful neisitable to news of the general's death, his majefly fent we may the 11th of April the diffaves of the five and feven Corles, to take a view of his corpfe. It being also agreed in a council of war, that the fame should be conducted by the factor Ysbrand Gotskens and captain John Hartman, under a guard of twenty fire-gious locks, to Puntegale, (nine German leagues with thence,) the same was done accordingly with Gale.

Servey: font a great deal of splendor. The same night from the his majesty sent the dissaves of Matule and Adigar, attended by divers other courtiers, to condole the death of his dearly-beloved director-general. They were very inquifitive, whether he was flain by some of his own people, or by the enemy, or by fome unexpected accident. Being flewn the place we of the where he received his wound, they crawled thither, trembling for fear upon the ground;

and defired that no body should set a foot in that place.

His corpse was deposited in a vault under ground at Gale, till 1657, when by order from Mr. Van der Meyden, it was interred with great folemnity in the church there near the pulpit, his arms, buckler, sword, and spurs being hung against the wall. In the year 1658, the said corpse being transported from thence to Columbo, was put into a stately monument there,

from whence they took a handful of earth,

was put into a stately monument there, with an inscription upon it, containing in substance, That be had purchased the conquest of Columbo by his death, for the honour of his native country.

After the decease of the general, the burden of the supreme command of the siege was laid by unanimous consent upon the by. Van see Mey ton sie Mey ton sie suprementation when the suprementation of Gale, who had the good formation the suprementation of the city reduced in the next fol-

to lowing month of May.

The 13th of April a letter was brought to the camp from Leonard Jobnson, dated to the fecond, at Wingurla, intimating, That twenty two frigats, under the command of surguels Francisco de Scixa Cabreira, with all forts of provisions, and eight hundred Portugues and Peter de Bitter being sent for, to consult what

first Goin= IES, Goman=

DIES

was best to be done, it was resolved (in or-Baldans, der to prevent their bringing into the city the intended succours) to attempt a vigorous affault upon the bastion of St. Stephen, for which purpose four brave officers were chosen, who, with eighty volunteers, (who had offered themselves for a reward of fifty crowns a-piece,) were to make the stephen.

The same evening the Finding yacht co-ming to an anchor in the road, soon after Adrian van der Maart, her captain, came ashore, and told the general, That about three days before, meeting with the Portu-The Flufthree days before, meeting with the Forth guest fiquation near Coulang and the cape ling yaths guest formerly, he had attacked one of their fri-Portuguese gats to fuccefsfully, that he faw her fink five. before his eyes, fixteen Portuguese only, with captain Simon Souza being faved of all that were aboard her; that foon after he had loft fight of them all, suprofing they were returned to the cape Como ", it being his opinion, that as the wind a god, they must before this have been near Columbo. In the night time, a certain Portuguese captain, one of the Fidalgos, or gentlemen, A Portu-who had been concerned in declaring Don guefe gon-Bras de Castro viceroy of Goa, came over toman to us, having been detained prisoner in the 10 ms. bastion of St. Stepken, and made his escape with four of his fervants through Don Francifco de Rolyn's house, by means of a boat. He entertained the new general for a confiderable time. It was in the mean time refolved to delay the affault upon the baftion of St. Stepben for two or three days. Our interpreter, George Bloem, returned also with the following letter of condolance from his majesty.

Raja Singa Rajou, most potent emperor of Ceylon, wishes health to Mr. Adrian van der Meyden, governor of the imperial fortres of Gale.

"YOUR letter, dated in the evening Latter of at feven a clock on monday, the conditions in the impersion that camp about midnight, and was de-impersion day about noon. The death of our director—general has caufed an exceffive affiction in our imperial heart. Whill our beloved director was at our court,

I was unwilling (according to the fingular love I bore to his person) to let him know my illness; but being now on the mending hand, I am forced to hear of 44 his death, which now we must commit 46 to providence, and fubmit to his will. " Our imperial majefty has likewife under-" flood by your excellency's letter, that you are invested with the same power as our beloved director-general was. It is a general received cultom in the courts of all the great monarchs, that in cafe a person of note, and in good esteem with them, dies, his fucceffor appears before the faid monarch, and receives his confirmation and bleffing at his hands. As you have always been ferviceable to us, it is our pleafure that you come to court, (in the fame manner as the director-general did,) in order to receive the honours due to your merits; being fenfible "that you have rendered us confiderable fervices, without having received any reward hitherto; wherefore it is my pleafure, that when you refolve to come, you give notice thereof beforehand what day you have pitched upon, in order to receive you with the same respect as the director-general, your predeceffor. doubt not in the mean while, but you will be very careful in your high station. At the closing of this letter, advice is " brought, that the Partuguese expect every day fuccours, which has made me give firiet orders to keep a strict guard, both " by fea and land."

In the camp and court of Reygamwatte, 15 April, 1616.

Raja Singa Rajou, most potent emperor of Cey-

In the night two Portuguese, three To-Lascaryn, passes, and eleven Lascaryn deferters, gave a doleful account of the miferable condipaffes, 1800 tion of the city, and of the fickness and Portuguese tion of the reigned there. The fixteenth deferent, mortality that reigned there. The fixteenth we played most furiously against the gate of Rajuba; and the general having fent advice of the expected fuccours in the city to the emperor, gave orders to commodore Roothaus, to keep the Fluffing, Popkensburgh, and Lion yachts in readiness, to pursue the enemy's squadron. About the More defer. same time a Portuguese captain came over to us, with eighteen Lafearyns and three Topasses: his pretence was, That having received an affront from the governor, he had taken this method to revenge himfelf. Diedelof van der Beek writ from Mapane, that the poor starved wretches in the plain betwixt our works and the city, butchered one another, two women having lately devoured their new-born babes. The 19th of Balde April a letter was delivered to the general from the emperor.

OUR excellency's was delivered to Titleton me after midnight a by which you rook declaring your readiness to serve me, the to the new fame was received with fingular fatisfac-gines. tion, knowing that your excellency, ever fince your landing in this ifle, has shewn a more than ordinary inclination for our fervice. Your excellency being now, through God's mercy, put into this high flation, it is expected you flouid give more fignal proofs thereof than before. You also mention the expected Portuguese succours, and the success of our faithful Hollander against them. I hope in God, that this victory will prove the forerunner of others. What I writ in my last, concerning your care in the camp, was not intended as if I questioned your conduct, but because it belonged to me to mention it. You further advise, that the enemy's squadron has orders to fail directly for Columbo , but confidering the ill treatment Manuel Mafcarenbas Homem, the present viceroy of Goa, met with at Columbo, (whilft governor there,) it feems to me most probable, that he has fent this fleet rather to be worsted by the Hollanders, than with a real intention to relieve Co-Lumba. "Your excellency fays, That one Nice-

" las de Moura, captain-major of the city, is come over to us: I defire you would give a good entertainment to all fuch as come to us with a fincere intention. The 66 other news has been very acceptable to me: God, I hope, will crown our endeavours with fuccefs. Your mentioning the late deceased director-general's name has renewed my grief; and as I loved him entirely, fo I must recommend to you the jewels which were prefented He min to him (whilft living) from our impe-neral; rial majesty, that the same may be sent jewels to to into Holland to his next kindred; it/ being our will and pleafure to give up-Holland. on this occasion a convincing proof to our Hollanders of the most sincere affection we bear them. For though the unfortunate death of the faid director has robbed him of the opportunity to execute those designs he had projected for our fervices, yet his counfels, care, and watchfulness, will remain for ever in our memories. I am very follicitous to know what method you intend to take in reducing the city, whether by force or famine. It you intend to take it by affault, let me know of it two or three days 66 before-

Baldons. " before-hand fecretly. My illness has hi-" therto prevented me from profecuting my resolution of coming into the camp, to take a view of all the works of the Hol-" landers; however, I am refolved to come nearer to the camp; which, as foon as it is done, I will give you notice thereof, " and defire your prefence there, in order to concert measures with you before you return to the camp. No more, &c."

Reygamwatte, 18 Raja Singa Rajou, most potent emperor of Geylon.

P. S. " It is defired that the captain " who funk one of the enemies frigats, " and forced the reft to return back, may " come along with the general to the emperor, in order to make himfelf known to his majesty.

The fuperfcription was,

Raja Singa Rajou, most potent emperor of Ceylon, wishes health to Adrian van der Meyden, governor of our imperi-al fortress of Gale.

In the afternoon a ceffation of arms being ordered for some time, the following fummons were fent into the city.

hamms "Having by the prefent fiege reduced for moto commbo." extremity, and bereaved them of all " hopes of the fo-long-expected fuccours " from Goa, we thought fit to lummon the city a second time in the name of his imperial majesty, Raja Singa, and of the honourable the Dutch East-India company. For the fquadron fent the 11th of this month from Goa by the new viceroy Manoel Mascarenbas Homem (Conde de Secredo, " his predecessor dying the 13th of January) to the relief of Columbo, being pretty well provided with provisions, but very indifferently manned, was engaged so briskly by our people, that some of their frigats were loft, others much damaged, and the rest forced to retire in con-" fusion to Tutecoryn and Manaar. According to the opinion of your own captain Simon de Souza, and fome others, that are our prisoners, most of the men aboard them are likely to defert, for fear of falling into the hands of our thips that are cruifing thereabouts; and the reft will fearce be able, by reason of the Moussian, to reach this place. Perhaps you may flatter your felf, that the same Moussian will oblige our ships to leave before long, as well those parts as this bay; but if we refer the same that the same will be same the same that the same that the same that the same that the same that the same that the same that the same that the same that the same that the same that the same that the same that the same that the same that the same that the same that the same that the same that the same that the same that the same that the same that the same that the same that the same that the same that the same that the same that the same that the same that the same that the same that the same that the same that the same that the same that the same that the same that the same that the same that the same that the same that the same that the same that the same that the same that the same that the same that the same that the same that the same that the same that the same that the same that the same that the same that the same that the same that the same that the same that the same that the same that the same that the same that the same that the same that the same that the same that the same that the same that the same that the same that the same that the same that the same that the same that the same that the same that the same that the same that the same that the same that the same that the same that the same that the same that the same that the same that the same that the same that the same that the same that the same that the same that the same that the same that the same that the same that the same that the same that the same that the same that the same that the same that the same that the same that the same that the same that the same that the same that the same that the same that the same that the same that the same that the same that the same that the same that the same that the same that the same that the same that the same that the same t but if you rely upon this point, we de-clare our felves innocent of all the grievances and fufferings put upon the poor citizens, who will, befides this, be thereby put in danger of losing all they have; whereas at prefent they may expect ho-nourable conditions, which they cannot hope for hereafter. We recommend this to your excellency's confideration, and

In the imperial camp before Columbo, 18 April 1696.

Adrian van der Meyden.

The following letter was fent in answer to the former.

your person to God's protection.

"THE letter fent to me by the most The safety."

"In noble general Gerard Hulft, dated
"the 9th of November last, I answered at " that time; which, as it cannot be unknown to your excellency, fo the fame answer may serve to your letter; neither the change of war, nor want of provisions having given me sufficient occalion hitherto to alter my refolution, which is, to take care of and defend the 66 city to the utmost of my power, for the " fervice of the king my mafter. God protect your excellency.

Antonio de Souza Coutinho. Columbo, April

Being convinced by this letter, that nothing but force could reduce them to reason, the cannon were ordered to play again as

Baldens. Portuguese deserter related, That they had barricadoed up most of the streets, and planted cannon in them. About the same time the new general received the following letter from the emperor.

RAJA SINGA RAJOU, &c.

The emperor's letter to the general.

UT of your letter, dated the 19th of April, I have (with a great deal of fatisfaction) understood your good "health, and good inclinations for my fervice, as well as of major John van der
"Laan, and the rest of the chief officers. " Before the arrival of the late director-general (of bleffed memory) I had taken a " refolution within my felf to come and " take a view of your camp; but being " then prevented by my illness, I still con-" tinue in the fame refolution, not only to " view the works there, but also to be a " fpectator of the brave actions performed there for my fervice. My faithful Hol-" landers, who are come hither from far " diffant countries, have for feveral months last past endured many miseries, not without much effusion of blood; and as I am " ftedfastly perfuaded that both I and our " imperial family may promife our felves " the same and more for the future, so shall " I think it no trouble to come fo far into " the camp, to be an eye-witness (to my great fatisfaction) of the brave actions performed there for our imperial majesty's fervice. That no notice has been taken " hitherto by this court of the captain-major, is to be attributed to his being employed day and night in the company's " fervice. Some foolish people are much " deceived, if they judge that there can be the least reparation of interest betwixt our " majefty and the company, the wifer fort " being convinced that our interest is the " fame. The faid major John van der " Laan has done me confiderable fervice " ever fince his coming into this ifle; and " therefore I declare, That fince the late director-general appeared at this court, I "did lay afide all animofity, in confidera-tion of his great qualities and fervices; fo that now the faid major who has spill-" ed his blood more than once, and been " wounded with bullets in my fervice, " shall be made sensible of the love and "affection I bear him, whenever he comes into my presence. What you mention about Mascarenbas, is no less than the "truth, and an undeniable one, to con-" vince the world, that God will take re-" venge of fuch as offend their fovereigns, " which induces me to believe, that this " war, we jointly carry on against our

enemy, will be bleffed by God with fuc-Baldens, cefs. I was very glad to understand by

your excellency's letter, that the jewels prefented by me to the director-general have been fent to Batavia, in order to be transported from thence by trusty per-fons into Holland. The said directorgeneral having done me fuch fignal fervices, ever fince his coming into this country, I intend fo foon as the war is brought to a conclusion, to fend a letter with the first ship to the states-general of Holland, to give them an ample testimony thereof. The resolution taken in the council of war is very acceptable to me: but as your excellency in his high ftation has the chief management of fuch matters as tend to our majesty's fervice in your hands, so I am most inclined to follow your advice. The method proposed for the reducing of the city has been debated in our imperial council; but as the fame must be expresfed in a different language (which carries along with it a confiderable alteration) I will pass it by in silence, earnestly requiring you, that whenever the faid refolution is to be put in execution, to fend me advice of it, that I may affift you there in person. You are of opinion that it would be more convenient for me not to come into the camp, till after the taking of the city; but what business have I in the camp then, unless it be to fee the conditions performed; whereas the late director-general had given me his word, that the city should be deli-vered into my hands. In the letter I fent to your excellency, I defired that the captain who had funk the Portuguese fhip fhould come along with you to our court; and you having made no mention of him in your answer, I am at a stand to guess the reason thereof. The aukward answer of the Portuguese in Columbo to your fummons, shews them to be void of sense; and I, who am well acquainted with their bravadoes, look upon it as an infallible fign of their diffreis, being convinced, by my own experience in divers engagements, that when they were most at a pinch, they would brag most. I have for a considerable time confidered with my felf, whether I should write a letter to those in the city, but for fear of a haughty answer, I resolve to let it alone. No more, &c.'

The 12d of April,

Raja Singa Rajou, most potent emperor of Ceylon.

The

Baldaus. The following letter was inclosed, and directed to the Sabandaar of Gale, Don John de Costa.

TAVING been informed by feveral of our messengers sent from hence " with letters, That fince the arrival of the late director-general of bleffed memory, " you have given all imaginable fatisfaction in reference to his person, I intended to have fent you a prefent at that time; but that the faid director's departure (which was fo fudden, that my fervants did not overtake him before he came to Krabenbof) prevented it. But when the new general shall appear at court, you, as well as the reft of the officers, shall not be forgot. You have been an eye-witness of the respect paid by me here to the director-general, and when ever the new general makes his appearance " before us, the same shall (not without great reason) be increased, our imperial majetty having received more fignal fervices from his excellency, whereof I would " have you give notice to him at the first opportunity. If you fhould happen to discover any error in such letters as are fent from this court, you shall excuse them to the general. You shall alfo put him in mind, that we stand in need here of an anvil, and a pair of fmith's bellows; and as there is frequent occasion for writing, do not forget to " let us be furnished with some white paper; you may fend also some China ware. Farewel."

At the Court of Reygamwatte, April 23. 1656.

The 24th of the fame month, a Topas deferter, named Lazaro Henrico, who came over to us, during the fiege of Caleture, but signal afterwards run over again to the enemy, median (notwithstanding he was well entertained by the late director-general,) brought a letter from Manoel Fonfeque de Moniis, a merchant of Columbo, directed to major Van der Laan.

Mr. Van der Laan,

Beg of you to believe what I am going to tell you concerning the prefeat condition of the city. Be careful not to venture a ftorm, they having provided retrenchments in all pofts, well provided with cannon, befides four mines, to be difcovered to you by my fervant. The rice is fold ftill at three Seraphyns, and is very fearce. If you intend to haften the lurrender of this city, fend fomebody from Caleture hither, to convince them that they are ftill living there: this being the reason why they would not hither-

to hearken to any conditions. I fend my Baldeus, fervant with this letter to you, to flow the fame to the general, though it is rumoured abroad here that general Hulff is dead; but I don't believe it. The next thing I have to requelt, for God's fake, and as you tender our friendship, is to preferve and secure the bearer hereof, being resolved likewise to come over

to you, which I cannot do at prefent, being so narrowly watched; but hope to be with you in a few days. God grant you a long life."

Your Servant and Slave,

Manoel Fonseque de Moniis.

Whereupon it was refolved to fecure the faid Topas aboard a flip till further order.

Soon after Tibrand Gotshens was diffpatch-Gotshens ed to his majetty, to represent to him some sent to the matters of the greatest consequence, and to know his sentiments. It was not long before he returned in company of the dislayes of Sasfragamme, and the Four Corles, and the Gurupele Afobami, and gave an account of his negotiation to the general Van der An account Meyden; and among other things, That of his ne-his majesty was well satisfied with the resolution taken April 21. but seemed to be inclined to have the assault delay'd till sunday the last day of the month, when he intended to be an eye-witness of it.

The 23d of April, it being refolved to give the general affault the next following night, especially upon the bastions of St. Stephen and Clergos, and (in case they succeeded) afterwards upon that of St. Philippo, every thing was preparing for the execution thereof, and every one ordered to his post.

The following inflructions in writing were given to each commanding officer in chief, which they were flrichly to obey.

THOSE that are ordered to give the Infirmations affault upon the baftions, shall be for the inobliged to fix the scaling ladders themfelves, and use their utmost endeavours to make themselves masters thereof, and to maintain themselves there. In case the bastion of St. Stephen be taken, the commanding officer shall let the trumpeter found the tune William of Naffau, as a fignal that God has bleft us with victory on that fide. So foon as the affault begins from the redoubt, betwixt 8t. Stephen and St. John's bastion, the companies of John Hartman, George Gebel, Henry Gerard, and James Baker, shall be in a readiness to second them, as occasion requires. "During the affault, the Javanese, Ban-

"During the affault, the Javanese, Bandanese, Lasearyns, Topasses, with some Europeans, shall endeavour to pass the Is delay'd

Baldæus, " ditch, in order to force the enemy from " their works at the foot of the bastion of St. John, and shall be commanded by captain N. Scherf, Arent Johnson, N. de " Wit, N. Chample, and James van Driel. " Whilft the affault continues upon the baf-" tion of St. Stephen, major Van der Laan 66 shall with his forces attack the gate of " Rajuba; and in case God bless us with " fuccefs, no officer, of what degree foever, " shall prefume to grant leave or suffer any " of his foldiers to leave their colours, or " enter the city, being forwarned that the enemy have planted their cannon there, charged with fmall-fhot.

> Subscribed, by Command Dated Apr. 27 from the General,

> > Adrian van der Meyden, James van Rbee, Secretary.

Immediate notice of this resolution was another given to the emperor; but there happening no fmall differences and heats in the council of war that was held that evening about the execution of this defign, the fame was thought fit to be deferred to another time. Scarce was the council broken up, but a Lascaryn deserter coming from St. John's bastion, reported, That this evening they had reinforced the ordinary guard of the bastion of St. Stephen, with thirty of their choicest men, called Valiantons, or bravoes, by them, besides ten other foldiers; which made us imagine that a Javanese deserter, who had got perhaps some scent of the mat-ter, had discovered our design to them.

At the fame time news was brought of Three (hips the arrival of the yachts the Red Lion, Avenfrom Bata- born, and Pelican, who left Batavia in March. The 28th of April, the lieutenant Christo-pher Egger, James Viry, Martin Sholtes, and enfign Brewer, were fent in the night-The conditime to view the afcent to the bastion of St. sion of St. Stephen; they gave an account that they Stephen's had found them well upon their quard there had found them well upon their guard there. and the ground being fandy would afford no firm footing. The 29th of April a let-

ter was brought into the camp from Abra-

bam van der Mart, fent by the Lion yacht

from the isles of Tutecoryn, with the joyful Baldeus, news, That the Portuguese squadron being met by the Dutch the 19th off of Trutchia Gran Meny from the met by the Duten the 19th off of trucora-from the nadour and Caylpatnam, they were forced to Dutch flut. retreat betwixt the isles of Tutecoryn, where they were blocked up by our ships, and Van der Mart gave no small hopes of preventing their coming out again, provided he were reinforced in time with two or three nimble yachts. Letters were at the fame time delivered from the head-factor, Reynier Seroofkerke, concerning the preparations of the Portuguese; and that they intended to pass the Mouffon on the coast of Malabar: That the traffick of the company at Calecoulang was in a good condition; and that he intended to buy up a good quantity of pepper and other commodities against the year 1657. News was also brought from Bata-Afm via, That a fuccour of two hundred and of two hand twenty five men was fent from thence to ty five men Ceylon, who within a few days were to come from Bata. by land hither from Gale. At the fame via. time we received a letter written in Latin by the ferjeant Severin Dolander, which being thrown over the ditch, required a fpeedy

SEVERIN wishes his enfign health: 4 letting The message brought me by the fa-4 Dutch ther was very acceptable to me. Lion, besides two modore Roothaus. er was ordered to ters in Columbo.
YOURS

OURS we have received by the father, and understood your miserable " condition: these are the chances of war, " the best comfort you can have in this extremity with your fellow-prisoners. At your earnest request we fend you a bottle of Spanish wine, ten new-baked loaves, and a piece of meat and bacon; the effects and money deligned for captain Simon de Souza, who is kept among the prifoners at Caleture, are put aboard the the ship : and because one of the Portuguese soldiers did this forenoon call from the bastion of St. John to one of our sentinels, that the governor was willing to exchange ten of his men, that are our prifoners, for your ten, we have fent word to the governor Anthonio de Souza Coutinbo, that as foon as he will discharge you, we will fend back ten Portuguese prisoners from Caleture.'

May 1. 1656.

Adrian van der Meyden.

Accordingly the 2d of May, in the forenoon, a Portugueje captain, named Domingo Coelbo, delivered a letter to enfign Peregrin in our fervice, offering, that in cafe we would exchange eight Portugueje prifoners at Caleture for the ferjeant and feven foldiers, they would fend them to us; which was denied, and in lieu thereof offered feven common foldiers and one officer in exchange for them. About the fame time his majefty fent back a letter, which he feemed highly difpleafed at, with another as follows.

de sugry "
linter from 64
Courtiers last monday was deliverthumpror. " ed to them before funfet; what you relate of major Van der Laan's going to Mapane, to observe what past there, and that finding those that were come out of Columbo, to be supplied underhand with provisions, he commanded to fire among them, and to fecure the Modeliar fazondere, who had been accessary to the matter, has been very acceptable to me, as tending to my fervice. The letter delivered to me by Curupule Meynde, written upon half a sheet, I did not think fit to read, much less to answer, being filled with nothing but infipid fluff: if perhaps a fudden mutiny, or accident, or any other misfortune, had happened in the camp, I could have excused such a letter, in respect of the love and inclination I bear to the Hollanders, my most trusty servants; but every thing being in a very good condition, I cannot tufficiently admire what could induce George to write fuch a " letter. Truly the general (who has the fupreme command there) ought not to have been so careless in this matter, such

"a neglect being not very fuitable to the Baldaus.
conduct that may be expected from a perfon entertained in the fervice of a great monarch; wherefore I fend you this letter, together with the Ola [letter] in or-

der to have it read in the prefence of the general, and to let him know word by word the true contents thereof.

Thursday, May 2. 1656.

Confidering the nicety of the Cingalese and Malabars in this point, it must be confessed, that more caution ought to have been used in this respect.

Towards evening the Portuguese sent our Eight eight prisoners out of the city, half dead Dutch prisoners from for want of food, three of them being so one of Co. weak, that they could neither go nor ftand.lumbo. They unanimoufly deposed, That there had been a great diforder among the officers, which had prevented their marching to the bastion of Clergos, after they had entered the city, as they ought to have done, the fame being guarded only by fifteen men. But whilst they staid in expectation for orders from the sea-captain Lippens, (of whom they fpoke very indifferently,) they were attacked both in front and rear by a great number of Portuguese, and charged so furioully, that scarce twenty six of them escaped, without being either killed or wounded, after they had spent all their powder and ball. They added, That what had been Their as related of their having fell to plundering, was count not true; that they were fecured in a warehouse belonging to Lewis Tavera, where they had the fame daily allowance of rice with the king's foldiers; and that they had fed, as well as the rest of the inhabitants, upon the flesh of elephants, bufflers-hides, nay, upon dogs, cats, and rats: that most of the seventy four prisoners died for want of good food, and according to all appearance these eight would not live long. They further said, That as they were going out of the city, they saw a body of sour or sive hundred men, fome Europeans, fome negroes, near St. John's gate.

The 4th of May the emperor Raja Singa fent the following letter.

Bout three years ago captain Joris Aluner Harvendonk, with some other of-from the ficers and foldiers entring into our service; emperor. and their time being expired since, for which they had agreed with the company, I resolved with my self ssince I had no great occasion for them here) to send them to the camp. An account of what services the said captain had done me, may be seen in a letter written by him (according to my command) to the late

" director-general, immediately after his landing

forrow for the mistake in the letter I Baldaus,

CHAI

Areforsed O

nike bafun of St.

Baldaus." landing near Columbo. He had neither be-" fore nor fince the same sense he had when he writ that letter; which then induced me to a refolution to bestow certain fa-46 vours upon him before his departure. But his infolent behaviour having drawn upon him feveral chastisements, without " any hopes of amendment, I thought fit " to remove him from his station, and to put Francis Has (who happened then to " come as a meffenger with letters to our 44 court) in his place. This man having " lived for fome time among the Portuguese our enemies, seemed to have laid aside " all the modesty of the Portuguese, and addicted himfelf to all forts of villanies, which made me discharge him from my " fervice, and to reftore the before-men-tioned Joris Hervendonk to his former " place. I would not have my Hollanders entertain fuch an opinion of me, that I would let any one who has ferved fo " long in our imperial court, be difmiffed without a reward; for whoever gains 66 our imperial favour, shall never depart " unrewarded: but fuch as are not willing, " or cannot apply themselves to that study, " may be fure that they will be fent away " like this person. The reason why the " faid Francis Has staid in Candy, is not " unknown to your excellency; but as he is a Hellander, it is but just he should be " difmiffed at his due time. I will not fay " all concerning him what I could; my " diffaves will give your excellency a more ample account of him, or when your " excellency appears at this court, you will be further fatisfied in this matter. No " more: God protect your excellency.

At Reygamwatte, Raja Singa Rajou, most po-May 4. 1656. tent emperor of Ceylon.

It is beyond all question, that the differences arisen betwixt this Joris Hervendonk and Francis Has gave occasion to many disturbances; Hervendonk being accused of having, by his infinuations, been the occifion of Francis Hus's detention in Candy, even to the year 1656. from whence, perhaps, he may not be discharged whilst he lives. These and some other accidents had put the emperor's mind into fuch a ferment, that for three days together he shewed all the marks of a fevere displeasure, even to the best of his Courtiers, so as to turn even his face from them. But his majesty's letter delivered to the new general, May 6. feemed to leave him in a much better humour.

TOUR excellency's letter dated the 3d, was delivered to me on thurf-" day the 4th, wherein you express your

fent back with my last letter: as among all other foreign nations, our imperial majesty has chosen the Hollanders, as the fittest to be employ'd for the increase of our glory, fame, and empire, by reason " of their fidelity, (which render them very dear to me, beyond my own fubjects,) fo when they commit any mistake, it touches me fo fenfibly, in regard of the other nations that frequent our court, thar I cannot forbear to make them fenfible of their error, even upon the leaft " occasion, in order to their amendment for the future. If therefore your excellency will apply yourfelf to fuch things as tend to our imperial fervice, the same will be highly acceptable to us. Our beloved director-general, of happy memory, did, during that small time he continued in our empire, follow this rule with the greatest exactness imaginable: but being fratched away on a fudden by death, we were deprived of the opportunity of rewarding his fervices according to our " wish. And as the faid director-general " has not been wanting, in leaving certain marks of the methods and customs to be made use of in our fervice, so it will be no difficult task for your excellency to follow his footsteps. Your excellency mentions the refolution you have taken of attempting a fecond affault upon the city, by reason of the approaching feafon, which does not permit our ships to tarry longer with fafety in that road; and that the enemy is much lessened in his strength since the last assault: all which, as it is altogether reasonable, so I approve of it with much fatisfaction. On the other hand, our present illness is no finall affliction to us, which bereaves us of the opportunity of appearing there in person, and being an eye-witness of this engagement, and to be nearer at hand to fecond you with our troops, in case there fhould be occasion; but let come of it what will, we are resolved to be in the camp by next funday. If your excellency thinks fit to flay for our coming, it is well; but if not, and that an opportunity prefents of gaining the place without imparing our honour and reputation, I am fatisfied, living in hopes, that God Almighty will crown our endeavours with victory. Your excellency mentions, at the end of your letter, that you have exchanged eight of your people that were prisoners in the city (the remnants of seventy four) for as many Portuguese your prisoners. I am very glad you tent word of it, that it may not be alledged against " the Hollanders, that they treat with the " enemy without our knowledge. In the mean

> Raja Singa Rajou, most potent emperor of Ceylon.

This letter being read in council, it was resolved to give the affault the 7th of May about feven or eight a-clock in the morning, and to make the fiercest attack upon the 15 Dutch bastion of St. John; which was put in extraile ecution accordingly, Martin Sholles lieutenant of the fufileers of Gale (now captain in Gale) being the first who with undaunted courage mounted the breach, and being bravely feconded by his men, they entered even into the city; but being furrounded reforad on all fides by a great number of Portuguese, were forced to retreat to the bastion for of St. John, where at last they maintained their post, after having three several times repulfed the enemy, who endeavoured with all the force they could bring together to diflodge them from thence, (our men being constantly relieved with fresh troops,) till the evening, when the firing fomewhat ceafing, they took that opportunity of entrenching themselves with fascines and earth towards the fide of the city, being nevertheless still exposed to the enemies shot from the water-fort and the baftions of St. Stephen and Couras, which cost us many a brave

In the beginning of the affault the diffaves of Saffragamme and of the Four Corles came into the trenches with the Cingalese forces; and foon after his majefty fent likewife the

diffaves of Ouve and Matule, the Adigar Baldaus. Amracon, and Curupele Apobamy, at the head of a great number of Lascaryns: but thefe brought along with them more confusion than real affistance, the Cingalese being always better at making a noise and plundering, than fighting.

We had no fooner fixed our guards upon the bastion, but a negro slave (called Caffers) brought us advice, That in the last affault the enemy had, the captain-major, the city-major, and a good number of their best men wounded, and betwixt forty and fifty killed. We employ'd the greatest part of the night in fortifying ourselves with pallisadoes and earth-works on the bastion, in discovering the mines, and planting some cannon: to facilitate which, it was ordered that a falfe attack be made at two a clock in the morning, and with break of day we faw the prince's flandard difplay'd there in token of our victory; which, however, we had purchased at a dear rate, being even then much exposed to the enemy's shot from three battions. Upon a general mufter we found two hundred and ninety wounded, eighty fick, and eighty fix killed; fo that we had in all not above one thousand two hundred and eighty feven Europeans left fit for service. However, John Maatzuyker, a lieutenant, brought a supply of sevency five men into our camp, and thirty more from Candy; besides their lieutenant Didelof was posted with fixty six men at Milagre, and at Montual fixty eight.

Among the flain were the following of slain and ficers, whose names well deserve to be trans-the affault. mitted to posterity: Christopher Egger, Ju-rian Gebel, James Viry, James Scherf, Jurian Smith, Paul Meno, Warnaer van der Heyde. Among the wounded, major Van der Laan wounded by a splinter on his shoulder, and near the ear; captain Henry Gerard Gluwingb mortally wounded in four places; James de With wounded with a ten pounder in the thigh, of which he died afterwards; Martin Sholtes in the arm; John Cowper in both hands; James Alenbier in the leg; Paul Ketelaer in the hand; John Bartels in the belly; Herman Wynantz,

Our Cannon upon the Bastion of St. John turned against the City. The Portuguese offer to capitulate. Articles for the Surrender of the Place. The Ratisfication. The Portuguese march out of the City.

Baldieus.

THE 10th of May, having planted our cannon upon the baftion of St. John, ready to against the city, the general and major Van play from der Laan, came in the afternoon to take a the baftion view of them. Soon after we saw the enemated of St. John. my put out a white slag, and captain Manuel Cabreira de Pontes delivered the following lines to major Van der Laan.

"CAPTAIN Manuel Cabreira de Denies, the bearer hereof, comes to desire a passport for three persons of note to come into your camp, to treat with you concerning some matters of moment. God protect your excellency.

Columbo, May

Anthonio de Souza Coutinho.

Major Van der Laan having told him, That he would deliver it to the general, asked him, Whether he defired a formal paffport in writing, or would be fatisfied with his parole. The Portugues officer replied, That his parole was sufficient; so they parted, and all hostilities ceased.

Within two hours after, our people were ordered to call to those in the city, and to ask them why they did not fend their deputies; but they answering, That they would not come without a paffport, the same was fent with all possible speed; but it being then pretty late, they excused themselves, that it was not customary to stay a night out of a fortress at such a conjuncture. Whereupon we began to fire again, till next morning about eight a-clock, being the 11th, when the deputies came into the camp, viz. Laurenzo Feriera de Britto, late captain-major of Puntegale, Hieronimo de Luzena Tavares, late Viador das Fazendas, i. e. fur-intendant of the merchants in Columbo, and Diego Leitaon de Souza, secretary of the city, who delivered to the council the following articles:

Articles proposed by those of Columbo.

I. THAT a ceffation of arms shall be agreed on till the 20th of May next, in order to see the issue of the expected succours, which if it arrives before that time, and is strong enough to raise the siege, this treaty shall be of no effect. In the mean time, no correspondence or commerce is to be allowed on either side, except what is done by messegers; for the performance

whereof, hostages are to be given on both Baldaus, fides.

II. In case of a surrender of the city, the churches and images shall not be defiled, and the prics and friars shall have full liberty to take along with them, without any moletation, all the images, relicks, sacred vessels, silver lamps, and other church ornaments, belonging to the performance of divine service, not excepting the moveables belonging to each clergyman in particular.

VII. All gentlemen, cav liers, and the chiefest citizens and inhabitants, shall have liberty to challenge the fame conditions granted to the city-major; and, if any of them are inclined to remain under the jurifdiction of the Hollanders, they shall be left undiffurbed in the full possession of their houses, estates, villages, and every thing belonging to them, and be treated in all other respects like the natives of Helland. For the free exercise of their religion, they thall have a church, with a convenient number of clergymen allowed them; and if hereafter any of them shall think fit to go to fome other part of the Indies, they shall be at liberty to fell both their real and pertonal effates, or otherwife difpose of them without molestation. They shall also be provided with shipping at the publick charge, except such as have ships of their own, who thall be free to traffick where they pleafe, paying the ufual cuftoms.

VIII. All foreign merchants, both Europeans and negroes, that were come to Columb to traffick, shall be free to depurt with their vessels, goods, gold, filver, and other merchandizes, bought up here, especially the cinnamon bought for the king or the city's use, whether aboard a ship, or not. Provisions shall be likewise provided them for their money, and a sise retreat; and in ease they stand in need of seamen, they shall be supplied with them.

IX. The negro inhabitants, both married and unmarried, and even the foreigners, of what condition foever, shall enjoy the fame freedom granted to the *Portuguese* citizens.

X. All the Modeliars, Aratches, and Lafcaryus, that have hitherto been in the king of Portugal's fervice, (notwithflanding they bave left the fervice of the company, or of his majefty,) fhall be at liberty to depart with their moveables whither they pleafe.

XI. XIII. Simon Lopes de Bailo, a Portagueje by birth, but fince in the fervice of the Datch, shall be pardoned for his offence in coming over to us, and be free to depart in company of the governor. Likewife all Datch deferters that have taken service in the city, shall not be molested, but have liberty to march out along with our forces.

XIII. All fick and wounded foldiers, or inhabitants, shall be entertained there at the charge of the company, (if the superplus of the king's money proves infusficient,) till they recover their health, and afterwards provided with conveniences for their transportation.

XIV. Upon the furrender of the city, after the *Dutch* are put in possession thereof, their general shall take edectual care that no affiont or mitchief be done to the governors, other perions of note, foldiers, and

inhabitants, and their families, but the fame *Buldaus*. thall be protected by the faid general, as well within as without the city, against all violences from the king of *Candy*'s forces.

Sign'd, Anthonio de Souza Coutinho.

After mature deliberation in the council, the following articles were, in answer to the former, delivered the 12th to the three deputies, in the name of his imperial majety of Geylon, their high and mightinesses the states-general of the United Provinces, the governors of the East-India company, and of John Maatzuyker governor-general, and the council of the Indies.

THE city shall be farrendered this day Articles before noon, without any further de the Portuguie, upon the following conditions.

What was defired in the second article,

What was defired in the fecond article, in relation to the clergy, is granted, and two places shall be appointed for them to be in till their departure.

To the third article it is answered, That it is not in the power of the general to have the governors, &: transported at this time to Titlecoryn or Manaar, but that it shall be done with the first conveniency, or else to Carbin or Wingurla. But in case they have a mind to be transported to the other shore, the same shall be performed by some of the company's ships, within fifteen days after the date hereof. They are allowed to carry along with them all their slaves of both sexes, and those belonging to the governor's son, Christevana de Souza, in hopes that they will not take any but their own, as likewise all their moveables, gold, silver, rings, and jewels; and they shall be protected in their houses till the time of their decurring.

The officers mentioned in the fourth article shall be treated according to their respective dignities, and be protected against all harm. They may take along with them their gold, filver, clothing, and what else they carry about them; but as to their slaves of both sexes, they shall be considered according to their respective qualities. In what they carry about them, shall be comprehended beds and bed-clothes, hangings, tapestry, bolsters, quilts, &c. The officers and reformadoes shall march out with the usual marks of honour, and be transported to the coast of Coromandel, with as much of their moveables as their slaves or other fervants (allotted them by the general's favour) shall be able to carry.

The foldiers shall march out with their baggage, colours difplayed, matches lighted, ball in their mouth, and drums beating to the general's quarters, where they shall furrender their arms under the great stan-

8 M

Baldaus, dard, and from thence, with the first conveniency, be transported into Europe. Such as are married or born in the Indies shall be transported to the coast of Coromandel, and be maintained till the time of their departure at the charge of the company.

The officers mentioned in the fixth article shall partake of the same favour granted to other persons of note; the city-major and head-factor to be comprehended in the

All fuch as intend to fubmit to the jurisdiction of the Dutch shall be civilly and favourably treated, and remain in the quiet possession of their estates; but in case they have a mind to depart, their goods are left to the difcretion of the general.

The chiefest of the citizens and married Portuguese, with their children, who are not inclinable to stay in this isle, shall, at the time of their departure, receive the fame treatment as the officers; but the natives of the ifle shall be left to the disposition of the general.

The Modeliars, Aratches, and Lascaryns, shall receive the same treatment as the Dutch

All fick and wounded perfons, whether inhabitants or foldiers, now in the hospital, or any other place of the city, shall stay there till the recovery of their healths, and be furnished with what they defire.

All the officers, inhabitants, foldiers, and unmarried women, shall be protected by the general against all violences and oppressions.

The general does also agree, That if any fhips approach the city for its relief betwixt this and the 30th of May, notice shall be given them of its furrender, with orders to depart, and shall be protected, at least, till they are out of fight of Columbo. The 11th of May 1656.

Signed,

Adrian van der Meyden, Peter de Bitter. Ysbrand Gotskens. John van der Laan, Edward Ooms,

I Adrian van der Meyden, governor-general for the Dutch East-India company in the ifle of Ceylon, with the rest of the members of the council, promife and engage, by these presents, That, in case the deputies bring back this capitulation, approved as fuch by the governor Anthonio de Souza Coutinbo and his council, we will punctually observe all the articles contained therein, without the least limitation or exception; and further grant fuch favours as are in our power to allow of. In confirmation whereof we have, in conjunction with the faid depu-Baldaus, ties, figned the same in the Dutch camp before Columbo, the 12th of May 1656.

Signed on our fide by

Adrian van der Meyden, Peter de Bitter. Ysbrand Gotskens, John van der Laan, Edward Ooms. John Hartman,

On the enemy's fide by

Anthonio de Souza Coutinho. Francisco de Melo de Castro. Anthonio de Silva, Gaspar de Ronga Pereira. Laurenzo Fereira de Britto. Hieronimo de Luzena Tavares. Diego Leitaon de Souza.

In the morning about nine a clock the Ratifical deputies returned with the capitulation ap-tion of the proved and figned as before, with a letter capitale of intercession from the governor and deputygovernor for Simon Lopes, who had deferted our fervice. The capitulation being figned once more, and the council difmiffed, Yibrand Gotskens and James van der Rhee our fecretary of war, were immediately after dinner fent into the city, to demand the keys from the two Portuguese governors, and to take account of all the arms, ammunition, and provisions, as also to settle certain matters concerning the marching out of the troops purfuant to the capitulation.

Accordingly there marched out of the The Ports. place Anthonio de Melo de Castro captain-guese major at the head of the king's troops, confifting in fourteen companies, and thirty fix of Columcaptains, (called Rejurnadoes by the Portuguese,) with their ensigns displayed, drums beating, matches lighted, and ball in the mouth, marching through our forces ranged on both fides, to the general's quarters, where having furrendered their arms, they were conducted to the place prepared for their lodging that night. These were fol-lowed by the citizens, sick, wounded, and cripples. In the mean while their chief engineer discovered to two of our deputies four mines on the fide of the bastion of Rajuba, betwixt the bastions St. Stephen and Clergos, each whereof being filled with four barrels of gunpowder, the trains were removed, and fentinels placed near them.

This done, our forces marched into the The Dutch city, followed by the general major Van der the city. Laan, and the rest of the head officers. Near the fea-shore, not far from the bastion of Couras, the governor and deputy-governor

(both venerable aged Portuguese) came with their retinue to salute the general. After some compliments on both sides, orders were given to our forces where to take their posts, and to disarm all the Lascaryns in the city. Towards evening the prince's standard was planted in the water-fort, and the great cannon discharged round the place as a signal of our victory. Thus the city of Columbo, not inferior in strength to most of

Europe, fell into the hands of our nation, Baldaus. after she had been one hundred and fifty years in the possession of the Portuguese. In acknowledgment of which a thanksgiving-day was appointed the sunday sollowing, being the 14th of May, which was celebrated accordingly, and the thanksgiving sermon athanksgiving sermon garten in the church of St. Francis Wyn-groupsersenin the church of St. Francis, since called the Town Church.

An Account of the Siege of Columbo, taken from their own Journals, and (for the publick Good) communicated to the Author by Mattheus van den Broek, formerly a Member of the Council of the Indies, now Governor of the East-India Company. Faithfully translated from the Portuguese.

Atrue Account of the Siege of Columbo, carried on by Raja Singa, King of Candy and the Hollanders, till the Surrender of that Fortress under Anthonio de Souza Coutinho Captain General in the Isle of Ceylon.

N the month of September 1655. ten Dutch ships came to an anchor near Negumbo, two more being out at some distance at fea, having landed eleven companies of Europeans of eighty men each; and being joined by a good number of negroes, they marched to the pass of Betal, but, by reason of the violent rains, were forced to return to Negumbo. Mr. Gerard Hulft, the Dutch general, having reimbarked his forces with fome others taken out of Negumbo, failed with the before-mentioned twelve ships to Columbo, where much about the same time we had received a supply of provisions in three galliots fent from Cocbin by the brave and faithful Simon Gomes de Silva, governor of that place. Our governor Coutinbo took part of the rice, in order to carry it to Caleture, where they stood in great need of it, but was prevented in his defign by the shallow-ness of the river. The 22d of September we received another supply from Tutecoryn, consisting in twenty eight sail, under the command of Nicholas de Moura, the fleet being chiefly laden on the account of private

The enemy having left fix of their best ships before Columbo, sailed with the rest to Caleture; whereupon our governor gave orders to captain Gaspar Figueira de Serpe, then encamped upon the frontiers of the king of Candy, to come to Columbo, which he did accordingly October 7.

Without the city were at that time encamped the famous diffave Francisco Antunes towards Mature, and Alvares Rodrigo Boralbo, sent out with three companies to get intelligence of the enemy, who, from the 23d of September to the 15th of October, laid before Caleture, and had raised three batteries against it.

Our governor being fenfible of the condition of the place, fent thither a convoy of provisions, commanded by Nicholas de Moura, under a good guard of Europeans and negroes, landed by Manoel de Gil, diffave of Negumbo, who has so often fignalized himself in our king's service in the isle of Ceylon. This brave man attempting to pass the river with twelve of his choicest men, (the boat holding no more,) was fo warmly received by fome of the enemies forces, that, after they had killed feveral of his men with their fire-arms, he was forced to retire; the commander in chief followed his footsteps, contrary to the opinion of captain Domingo Coelbo de Alla, who would fain have perfuaded him to advance as near as he could to Caleture, to incommode the enemy in the fiege. Upon this occasion Alvares Ro-drigo Boralbo did considerable service, in fending intelligence from time to time of what paffed, till at last this whole body came back to the city.

It being then refolved to succour Caleture to the utmost of our power, and sour galiots being at the same time arrived from the viceroy of Goa, we made up a body of six hundred Portuguese, the command whereof was committed to Gaspar Figueira to attempt the relief of the place in conjunction with some Cingalese, notwithstanding the enemy's force consisted of three thousand Europeans, besides a good number of Bandanese and Cingalese sent to their affistance by the king of Candy.

Accordingly Gaspar Figueira encamped with his troops the 16th of Oslober two leagues from Caleture, having received advice before, that the enemy were already posselfed of the pass on this side, and had posted three companies there. Pursuant to

this

Conflerna.

froned by

under the command of Domingo Sarmento and Francisco Antunes, to attack the enemy in the night, which they did accordingly with incredible bravery for a confiderable time, but very indifferent fuccess; for instead of being engaged with three companies of eighty men each, (as they supposed,) they found the enemy much superior in number, to charge them fo furioufly both in front and flank, that they were put into confusion, with great flaughter, before they could re-Figueira being by this collect themselves. time come up with the rest of his forces, unadvitedly attacked the enemy a fecond time; but these opening their ranks on both sides, discharged two cannon among our forces, which occasioned such a consusion, that the enemy improving their advantage, once more put us to flight. Figueira and his lieutenant Manoel Cabreira were for trying their fortune once more; but finding the flower of their forces either flair, or difperfed, and no means left to make them return to the charge, they thought fit to retreat and bring off their wounded men; among whom were Schaftian Percira, and Joseph Antunes, the only two that escaped alive of eleven captains. Of the reformadoes, John Cordeiro, Manoel Fernandes de Miranda, Manoel de Santiago Garcia, with two hundred common foldiers came off alive.

Baldeus, this intelligence he ordered fix companies,

This ill fuccets caufed an unspeakable confernation in the city of Columbo, where this defeat there was nothing to be heard but outcries at Colum- and lamentations in the streets; the shops were that up, and the gates kept close, with ftrict orders that no body should appear armed without doors. The next thing to be done, was to give an account of their present ill condition to the viceroy of Goa; and the fame being (at their earnest request) committed to the care of Damian Vieira, a jefuit, and Mancel Saraiva, an inhabitant of Manaar, the last of these two went no further than from Columbo to Manaar, from whence he dispatched the letters to Antonio Amiral de Meneses at Jasnapatnam, a neglect that deferved a very fevere punish-

> By this time the hospital was filled with the fick and wounded foldiers, where brother Gol; al, an Austin frier, did both the duty of a devout, religious, and charitable layman. The number of those that died here for want of good looking after, being fearce inferior to what was loft in the engagement.

On the other hand, the Dutch had purchafed this victory with very little loss on their fide ; notwithstanding which, major Van der Laan (a mortal enemy of the Portuguese, and a zealous heretick) having received a wound in the cheek, took a most to do, being backed by an army of twenty

barbarous revenge from all the Portuguese Baldaus. he met with, who were all maffacred in the woods (fometimes twenty and thirty together) by his orders in cool blood, he having been often heard to fay, That if the This mag Portuguese were at his disposal, he would be looked cut them all off at one stroke. Their general salams, Mr. Hulft, being of a more compaffionate temper, ordered quarter to be given to the new-lifted forces; but this heretick told him, That they ought to be cut to pieces, in retaliation of what they did to the Dutch, whom they never gave any quarter : however, through the general's mercy above fixty of the new-lifted men had their lives given them. In this engagement the brave Francisco Antunes, who had rendered his name to famous in Ceylon by his many victories, also lost his life in a wood, who deferved to have had a Maufolæum erected to his memory.

Thus the enemy by this victory becoming matter of the field, afterwards foon made himself master of the whole island of Ceylon, the city of Columbo (after the loss of Caleture) expecting no less than to be reduced to the utmost extremity: for after they had endured for fome days all the inconveniences of hunger in Caleture, Anthonio Mendes d' Aranba represented to his soldiers, That they had rather try the utmost, than to perish for want of food, exhorting them to fight their way with fword-in-hand through the enemy. He prevailed at last so far with them, as to agree with him in his refolutions; but the appointed time approaching, they found themselves so enseebled for want of good food, that not being able to put their defign in execution, they were forced to furrender, upon condition that they surrender should march out with their arms, &c. of Caleture. Thus the king of Portugal lost at once a strong forcress, one of his most experienced The garriofficers in the whole ifle, and two hundred fon was kept and fifty choice men, through the milma-Gale,

The 17th of October the enemy marching The Dutch directly to Columbo, posted themselves in come before fight of the city near St. Sebastian, where Anthonio de Souza Coutinho, the then governor, together with Francisco de Melo de Caftro, ordered immediately fome works to be cast up, to hinder their approach: but the 18th they were fo vigoroufly attacked in these intrenchments, that they had enough to do to escape to the city, and to cut down

nagement of fome who preferred their own

interest before that of his majesty.

the bridges behind them. We then applyed our felves to the firengthening of our batteries, whilst the enemy killed all they met with without the city, and immediatly fell to the raifing of their batteries; which was no difficult task for them

galdeus, or thirty thousand men under Raja Singa king of Candy, and furnished by him with pioncers and other necessaries in abundance.

Our governor and Francisco de Melo de Castro did leave no stone unturned for the defence of the city; they vifited the magazines and armouries, and furnished with arms all fuch as were capable of bearing them, not excepting even the old men and schoolfigned to the following commanders: on the bastion of St. John, Manoel Correa de Barros; on that of St. Sebastian, Francisco Gorian de Fialbo; on that of Madre de Deos, John de Pavia de Quintal; on that of St. Conception, Domingos Peixoto; on that of St. Hieronymo, Alphonfo Carvalho de Souze; on that of St. Anthonio, Manoel Carva: de Maya; on that of St. Jacob, Manoel Nunes; on that of St. Austin, Luys de Paiva Quintal; on that of St. Laurence, Anthonio de Silva; on of that St. Crus, Caspar d' Aranja Pereira; on that of St. Francisco Xaverio, Manoel Caldeira de Brito; and on that of Galvoca, Dominges Pires; who all gave sufficient proofs of their bravery in their respective posts during the fiege, as did likewife father Damian Vieira a jefuit, especially in the attack upon the garden of Antonio de Mota, and fome houses standing upon an eminency at St. Thomas, in which, though they were repulfed the first time, yet the next day our forces, commanded by Alvaro Rodrigo and Manoel Caledira, being seconded by some companies posted on the other side of the ditch, made themselves mafters of it, being of no fmall conveniency to us, to hinder the approach of the enemy.

Notwithstanding this the enemy advanced apace under favour of their artillery, of which they brought great store daily from their ships. And on our side we found the bastion of St. John most exposed, we strengthened the same with masts, earth, and fascines; we made also a covered way from the wall to the brink of the ditch; the fame was done near the bastions of St. Sebastian and Rajuba, both clergy-men and lay-men, without distinction of persons, imploying themfelves in this work, and furnishing materials for fo ufefula work, especially Caspar Figueira de Serpe, who having great store of baskets, fpades, and other fuch like inftruments, facrificed them all for the publick fervice.

The 20th of October the enemy began to falute us with twelve great pieces of cannon from from three batteries, viz. three from that of St. Themas, five from that at Agua de Luphe, and four from that of St. Sebastian, from whence they fent eight hundred bullets, eighteen, twenty, twenty-four, and twentyeight pounders, in one day into the city. But though the enemies bullets did confiderable execution, some of the king's unfaithful fervants did more mischief by intro-

ducing adulterated coin, and engroffing the Baldausprovisions, under pretence of the king's fervice, for their own lucre's fake.

There were at that time not above one Number of thousand three hundred souls, young and old, prople in Europeans and Indians, viz. five hundred the city. that received pay, and among them, fome married, fome unmarried, fome children and Topasses; three hundred married people who served without pay, four hundred Lafcaryns, and about fixty labourers; the whole number of the Europeans not amounting to above five hundred men. The governor, Anthonio with the confent of the whole city, pitched d'Abreu upon Anthonio d' Abreu, an inhabitant of Ne-ent 10 Gos, gapainam, to be fent to Goa, to give an account of account to the viceroy of the city. He the condiwas favourably received by the viceroy, tion of Co-who told him, that he had already fent a lumbo. squadron under Manoel de Magalhais. Coutinho, to carry a fupply of provisions and men thither, brought together for that purp ne by Anthonio Amiral de Meneses at Manaar. But this convoy came no farther than the cape Comoryn, and could not make the cape, though some were of opinion it was rather for want of will; fo he returned to Columbo, where the viceroy being dead in the mean while, the whole face of affairs was changed, and Columbo loft for want of timely supply.

The before-mentioned three batteries being raifed above two hundred paces from our walls, they erected another against the baftion of St. John, within four hundred paces of it, from whence they battered us most furiously with three demi-cannon. Immediately after, one of our engineers, a Hollander by birth, named John de Rosa, deferted to the enemy: 'tis true, he was no great One of our conjurer in his art, yet did us confiderable engineers deferts. mischief. For the enemies batteries played fo furiously upon our out-works, that in two days time they were all laid level with the ground, and our baftions and walls were fo forely battered, that with much ado we could stop the breaches, which was done by continual and indefatigable labour, each foldier and officer employing the intervals they had, when they were not upon duty,

in working like the meanest labourer. The governor Anthonio Coutinho fpent day Care and and night in visiting the works, animaving conduct of his foldiers both in word: and his example, mer leaving his habitation, and contenting himfelf with a small tent near the bastion of St. John, where the enemies made their greatest effort. Afterwards he took up his quarters in a warehouse, scarce undressing himself all the time the fiege lasted, and employed much of his time in keeping an exact account of the stores, and distributing provisions with his own hands, without which precaution the city could not have held out half solong. Francisco de Melo de Castro

Baldaus, followed his footsteps, having not been seen without his clothes and arms for feven months together. The city-major Manoel Marques Gorjaon did affift them in his station, as did likewise Caspar Figueira de Serpe, the diffaves of the Corles of Negumbo, and of Mature, John Coelho de Castro, Manoel Gil, Manoel Seixas, and John Banha, who were prefent in all places where there was the most danger to encounter. The clergy, but especially the capuchins, were very affiduous in confessing the foldiers, in praying and doing all manner of good offices, without intermission; and some of them would not be backward in being upon the guard with the foldiery, and give the enemies ample proofs of their valeur.

The enemy thundered fo furiously against the bastion of St. John, that it appeared like a heap of rubbish; then they turned their fury against the horn-work of St. Ste-pben, and the adjacent point; but Manoel da Veiga, the commanding officer on the baftion of St. Stephen, Francisco Gorian Fialbo, John Ferraon d'Abreu, Gonzal Martinbo Piementel, Manuel Carvalho, and others of imployed in the defence of the works towards St. Sebastian, were indefatigable in repairing the breaches, and rendering the

baftions tolerably defenfible.

Hieronymo Lucena shewed the same care in the baftion of Madre de Deos, till he was relieved by Lewis Tavera de Cunba; and the wall which extended towards St. Sebaftian being found very weak, the general recommended the defence thereof to the four captains of the Galliots lately come from Goa. These ordered an intrenchment to be made there of a hundred and fifty yards long, one broad, and fix foot high. Father Damian Vieira, the jefuit, being imployed in furthering this work, a bullet taking away a great piece of the wall, struck him on the head, fo that he fell dead upon the ground; but foon recovering himfelf, he fell to his work again, his fervant constantly attending him with a fword and fusee, wherewith he did confiderable execution, being commonly one of the foremost in charging the enemy. Finding that the baftion of Xaverius (otherwife called Couras) began also to be forely battered by the enemy, the care thereof was committed to an old famous foldier, Manoel Radrigos France, who foon put it out of all danger.
The 29th of November the Dutch ge-

summened neral, Gerard Hulft, fent a drummer, with to furrer- a white flag, with a messenger into the city, to fummon our governor to a furrender, who delaying his answer till next day, the enemy fired most furiously with his cannon all that night; but the next morning we fent Diego de Souza de Castro, and Thomas Fereire Leite with an answer, the last perso-

nating a drummer, in order to get some in-Balder telligence of the condition of the enemy; but they were upon their guard, and therefore fent a captain and a lieutenant, attended by two foldiers, to receive our gover-nor's letter, wherein he told the general, That he wanted neither will nor power to defend the place to the utmost for his king's fervice, being still sufficiently provided with powder and ball, and other neceffaries; and to add the more weight to his words, we fired most furiously all that night.

The Dutch repaid us in the fame coin, fending us commonly a prefent of eight hundred cannon-ball, and nine hundred granadoes every day. The 12th of November they celebrated the feaft of St. Martin, the pope, by a new invention of fireballs, whereof they fent a good number into the city, and feconded the game by a general General affault. For early in the morning, three affault given up of their floutest ships appearing in fight of Columbo, the city, one of them, called the Maid of Enchuyjen, entered the harbour, carrying the red flag in her stern; and coming to an anchor within mulquet-shot of the bastion of St. Crus, gave us feveral warm falutes, under the found of drums and trumpets; but Manoel d'Abreu Godinho and Anthonio de Silva, the commanding officers on the bastion of St. Laurence, did ply them thick with their cannon, that having first brought by the board all her masts, they made soon after so many holes in her sides, that she was ready to fink, and a few of her crew made hard shift to escape in their long-boat. The other two thips feeing the other foill treated, did not think fit to follow her footsteps, but made the best of their way to the road, alledging in their behalf, that they were not able to come up with the other.

At the same time they attempted the affault on the land side. Mr. John van der Laan affaulted, with feven companies, the gate of Acouras, advancing boldly with fword in hand to the very faces of our people, the foremost of which began to give way, and in all likelihood the rest would have followed their example, had not father Autonio Nunes, a jefuit, with his drawn fword, threatened fuch as were ready to fly with prefent death, nay, his comrade, John Cordeiro, wounded one of his foldiers, as he was flying, with his leag rapier. Soon after Cafpar Figueira de Serpe coming with fresh supplies, this so animated our soldiers, that they not only stopped the enemies fury, but also made them give way in a little while after. In this action an enfign and ferjeant acquired immortal honour, and Manoeld' Almeyda, though a very old foldier, yet did not leave his post till he had received eleven wounds. Felicio de Seixas and Contrera de Seixas lost their lives with their

fieged.

in Dutch Major Van der Laan seeing there was no hjulfed. likelihood of fucceeding, founded a retreat, leaving the ground covered with the dead carcaffes of the Hollanders. The enemy received also considerable damage from the tower where Diego de Souza de Castro commanded, and no question much more might have been expected, had we been provided with good gunners; for it must be confesfed that we wanted not officers of courage and experience, but only fuch as understood the mathematicks and the art of gunnery; an inflance of which might be given in one of our gunners, who having double charged a cannon, did wound one of our captains, and two others, viz. Thomas Fereira Leite and Pedro Gonsalves Salgado; though for the rest, their fidelity ought not to be paffed by in filence, it having been observed, that not one of our cannoneers deferted to the eneforuguese my, but most of them lost their lives in

igened. the fervice.

The gate of Rajuba was attacked with eight hundred choice men by general Hulft in person, who endeavoured to mount the walls with scaling-ladders. As they passed the bridge, they were forely galled from the bastions of St. Stephen, St. Sebastian, and that of Madre de Deos, the defence whereof being committed to Rodrigo Boralbo, Anto-nio de Mota d'Oliveira, and Manoel Cabreira de Ponte, they gave fuch a hot falute with their firelocks from behind their pallifado works to the Hollanders, that many of them were laid dead upon the ground. A certain cannon of stone did them considerable damage, and would have done more, had it not burst in pieces. Three times they renewed the affault with incredible fury; and as often were they repulfed with an unspeakable bravery. At last, general Hulft, to encourage his men, cried out aloud, Soldiers, the prince's standard is set upon the bastion of St. John, (which in effect was not so,) and so with a curse, (Sante Diabo, i. e. holy devil,) he fnatched a ladder out of a fellow's hand, but finding no body ready to follow him, whilft he was encouraging his men, and fixing his ladder to the very gate, he was wounded in the thigh, and fo forced to retreat. On the fide of the lake, or fens, (called Lagoa by the Portuguese,) two hundred and forty men were imbarked in eight Chinese boats brought from Batavia for that purpose. They were met by Domingos Coelbo d' Alba in five Manchous, or barges, who fought with them couragiously for some time, but was forced at last to fuffer them to land, but retired into a pallisado work near Maria Telles, from whence

he, with Sebastian Caldeira, and five or fix Baldæus, more (the rest being run away) fired brisk-

ly upon the Hollanders, who at last finding a hole or gate near the house of Sebastian Caldeira, they forced their way, notwithflanding the brave refiftance made by Manoel Rodrigues Franco, Guardian de Varo, and Francisco Rebello de Palsares, who sent a good quantity of hand-granadoes and fireballs among them, the faid Guardian having received two wounds by mufquet-balls. The Dutch forcing their way into a narrow street, were there met by Manoel Fernandes de Miranda, who, though forcly wounded, yet continued fighting with his fword and buckler, till exhaufted of his strength by the loss of blood, he was ready to drop, and would infallibly have died upon the spot, had not Francisco de Lemos carried him off. In his place fucceeded Diego Leitaon de Souza, who discharging a musquetoon on the corner of a street among the Dutch, made them halt; the fame was done by father Damian Vieira, the jefuit, who with another mufquetoon made fuch a havock among the enemy, that thefe two stopped their farther progress, till Antonio de Leaon appeared at the head of a good troop of foldiers; he being provided with another mulquetoon, charged the enemy fo briskly, (as they were endeavouring to break into the backfide of fome gardens,) that they were forced to retreat back into the narrow street, where he maintained the fight (though his musquetoon, by reason of its being too frequently charged, ftruck him down to the ground) till Anthonio de Melo de Castro came with his whole company to his relief, when after fome firing, quarter being offered to the remnants of the Dutch, they accepted of the same; so that feventy four, though most of them wounded, were made prisoners of war, whereof eight only returned into the Dutch camp afterwards, the rest dying in the city, many whereof were converted to the catholick faith, by the indefatigable care of the jefuits, and especially of Damian Vieira.

This was the fuccess of the general affault begun early in the morning, and not ended till two in the afternoon, during which the governor Anthonio de Souza Continho and Francisco de Melo de Castro kept in person the guard, with some other officers of note, in the market-place, from whence they dispatched their orders, as occasion required. The city-major, Manoel Marques Goriam, did likewise appear in all places where the danger was nost pressing, and Castro Figueira was very careful in sending what succours he could spare from the batton of St. John. In short, the streets, breaches, the lane, and ditch, were all tainted with the blood of the Hollanders, and

~ drums, scaling-ladders, and dead carcases, their lofs being computed at no lefs than a thousand men, and among them many brave

Baldaus. the ground covered with colours, arms,

Loss on both officers. On our side we had not above thirty men killed, though the enemy, to diffemble their lofs, gave us a general falvo of at leaft a thousand musquets. The next day father Damian Vieira going without the walls, in order to bury the dead, was faluted by three firelocks from the enemy, which made him retire, and defer his charitable resolution till the next following night. We observed a black flag in one of their works, as a fignal, that they would give quarter to no body without exception, the fame order having been given them likewise before the affault begun. We got no less than thirty pieces of cannon out of the fhip that lay under the water-fort, which were planted on our works. Some refreshments were also distributed among the foldiers, though, to confets the truth, the publick stores being very low, every one provided for himfelf as well as he could, without any regard to some pro- the poor soldiers. However, about eigh-

vision taken teen days after father Damian (by order out of the from the general) went with fome Dutch prisoners aboard the vessel, where they found fome casks of wine, and fome meat and

bacon.

In the mean time the enemies were not idle, but daily increased their works: they made a covered way, within forty paces of St. John's bastion from west to the east, in form of a redoubt, upon which they planted fix great guns, viz. three against the bastion of St. John, and the other three against that of St. Stephen. From thence they carried on their trenches to the fea-fide, from fouth to north, closed with another redoubt, which being provided with two pieces of cannon, much annoyed the wall betwixt the bastion of Couras and St. John. This made the governor Coutinho order fome of the citizens to raise a kind of an intrenchment of about two foot thick and three high, behind it. From the fecond redoubt the enemy carried on their trenches into the open field; and at last added a third redoubt, from whence they could batter the wall betwist the baftions of St. John and St. Stephen; which being likewise forced to be strengthened by some works of earth and fascines, no body, not even the governor himfelf, were fparing in laying hand to fo useful a work, which being fear hundred ells in length, each division had its share allotted, in order to bring it the fooner to

Domingo Coelbo d'Alla, affisted by Caspar d' Aranja Pereira, John d' Andrade Machado, and Don Francisco Rolim, all inhabitants of

the city, did great service with their flaves Baldaus. in the Manchous, or boats, in protecting our workmen on that fide, as well as the diffaves; and, to be fhort, there was no body fo young, no body fo old, that was exempted from continual labour or watching.

The Dutch, on the other hand, carried on the trenches from the redoubt with fix guns, to the hill of Aqua de Lupe, and made another trench from the redoubt in the plain, which was to meet another redoubt thrown up on the front of the bastion of St. Stephen, beyond the lake or fens. They also raised another battery in the garden of Antonio de Mota, against the bastion of St. Stephen, and another near the beforementioned redoubt of fix guns, in a parallel with that in the plain, and another just at the foot of the bastion of St. Crus, which being so near the ditch, was likely to be a thorn in our eye, there being nothing but the ditch betwixt us and the enemy, fo that we could throw stones at them, and often talked with one another.

About the same time Caspar Figueira de Figueira Serpe, defired leave to lay down his com-lays deamy million, not to shun the danger or trouble his comof his station, but because many of the mission. gentlemen and fubaltern officers refused to obey his command; fo he was discharged, and Antonio de Melo de Castro, nephew to the late governor Francisco de Melo de Castro, who had behaved himself with more than ordinary bravery in his post during the

fiege, put in his place. As we shrewdly suspected the enemy to have a defign of undermining the baftion of St. Stephen, a cavalier was ordered to be raifed near it, in case the same should succeed. This was done by the contrivance of a certain Indian merchant, of the coast of Coromandel, who also ordered the redoubt, demolished since the last general affault, to be repaired. By the direction also of another certain merchant, (who was furveyor of our magazine,) a countermine was contrived, which did us great fervice. It was a most deplorable thing to have in fuch a fortress as this, not so much as one Port guese engineer, nay, not so much as a Coverent good carpenter of our nation, the defect ness of whereof can be attributed to nothing else one but to the covetousness of some of the king's officers, who put the money defigned for that use into their pockets, and at the same time put it to the king's account: neither were our fortifications in fuch a condition as they ought to have been; for whereas we had had fufficient time to inclose that part of the city near the fea-fide, called Galvoca (comprehending a third part of the whole) with ftrong walls, and to

render it impregnable, by reason of the

reason of the

natural

goldens.natural fituation thereof being accessible only in certain places in small boats, they had planted only fome coco and palm-trees there, which perish, and are washed away by the waves in a short time. Thus the bastions which ought to have been faced with stone, were only made of earth, which are not durable, and eafily spoiled by the warer-floods; the effects whereof were then obvious enough, from the hospital to the gate of the jesuits college, which comprehends a very large tract of ground. Besides this, the carriages of our great guns were fo rotten, that most of them after the first discharge broke to pieces; fo that we were forced to take the wood from the houses, nay, even out of the churches (as we did in that of St. Domingo) to make new ones.

My pen wants words to express the affronts put upon the holy images by the hereticks, whereof I will give you only one instance. They took the image of the holy apostle St. Thomas, and after they had cut off the nofe, ears, and arms, fet it up for a mark to shoot at; afterwards they knocked it full of great nails, and so shot it out of a mortar November 16. into our ditch, whence it was taken up and carried to the jesuits college, by father Damian Vieira, and two reformed officers, Manuel de Seixas, and Manoel de S., Jago Garcia. But the Franciscans laying claim to it, they carried it in publick procession to their church, and placed it upon the high altar. Father Francisco St. Mattheus folemnized the day with a learned

The 20th of November the holy Thomas bleffed us with the arrival of a certain Portuguese, a native of Aveiros, named Simon Lopes de Bofto, who for certain reasons being retired from Goa to Wingurla, had ferved among the Dutch in a very good flation in the camp; but finding his countrymen in diffress, left all and came over to us, and did us most singal service in the siege.

The enemy carried on their trenches from the foot of the baftion of St. Crus, to the edge of the ditch, with an intention to fix their miners under the bastion of St. John; but we made a countermine, and defended the ditch on the other fide with a good breaftwork, to fecure our people against the grenadoes which the enemy threw in without intermission. This post being recommended to the care of Domingos Coelbo, he strengthened the same by pallisadoes, from whence he commanded the passage over the ditch with his fire-arms; and Manoel Rodrigos Franco, and Manoel de St. Jago Garcia, would often skirmish with the enemy on their own bridges; two whole companies under the faid Coelbo and Diego de Souza de Castro being appointed to second them as necessity required.

Vol. III.

The 10th and 11th of January the enemy Baldaus. advanced to the ditch in two places, viz through the before-mentioned breaft-work, and fomewhat lower: from the first place they played with a great cannon; and on the other fide, having made a great breach through the wall, they threw fascines, logs of wood, baskets with earth, and fuch like materials into the ditch; and the better to cover their workmen, and afford an eafy paffage to their foldiers, they fixed their gallery: but Emanuel Guerreiro, at the head of his company, Domingos Coelho d' Alla, Emanuel de St. Jago Garcia, and Diego de Souza Castro, did receive them so courageously, that from ten at night till break of day, there was nothing to be heard or feen but firing, both at the enterance of the mine, and from the bastion of St. John, from whence Don Diego Vasconcelbos did confiderable mischief to the Dutch with his great cannon, who meeting with fo unexpected a reception, thought fit to retire with confiderable lofs, leaving most of their materials behind them, which were brought into the city. We lost only two men in this action; and the *Dutch* for ever after were not fo forward to come fo near us, but plyed us chiefly with their cannon-balls, ftones, and bombs; whereas we had but one mortar, which was ufelefs to us (for want of expert cannoneers) till Simon Lopes de Basto came over to us, who now and then faluted the enemy with flones out of that mortar, who answered us briskly though most of them broke in the air, and did no other mischief but to some houses that were miserably fhattered. One of the enemies bombs Bravers of

happening to fall entire upon the ground, Matthias Mathras d'Albuquerque, a native of Goa, Albuquer-dan ing hard by, took it up, and threw it into the next Dutch mine, with an unparalleled courage, with fuch fuccefs, that it blew up

into the air immediately.

The 28th of January four thips arrived from Gale, and foon after two more, which, with the fourteen that were in the bay before, made up twenty in all. The fame day the Dutch planted a cross upon the redoubt, called Conception, under the tripple discharge of their cannon and small arms. This redoubt had been made by the direction and affiftance of the governor, the mafter of the ordnance, and feveral of on best officers, and the diffaves. That day two new-lifted men, belonging to Don Rodrigo de Castro's company, deserted to the enemy; and Fernaon Martinho de Souza the governor's The goverfon, a gentleman who had given feveral nor proofs of his courage, was unfortunately flot killed. with a musket-ball in the head on the bastion of St. John, of which wound he died soon after. About the same time died also Anthonio Barboza Pinbeiro, one of our captains of the artillery, a person of indefatigable

Negross

Baldeus, care, and who had fignalized himfelf upon Mapnefe fields. The 6th one Dyke deferted, Raldaus, many occasions, both in the field and the

The 1st of February two other new-listed foldiers of Manuel de Veigas's company deferted to the enemy, and the 6th nine ships returned from the bay to Gale. By this time we began to be reduced to great extremity for want of provisions, a little measure of rice being then fold at half a Scrapbyn; fo that we faw the poor wretches (as well Europeans as Negroes) drop down dead in the ftreets: the Berbery, bloody-flux, and spotted fevers, being grown fo common, that few were free from them. To be fhort, we were in a constant conflict with three most dreadful enemies, the plague, hunger, and fword. To add to our affliction, the heat was fo exreffive for want of rain, (which usually falls in Ceylon,) that many were stifled for want of air, which made us drive about three hundred of these miserable creatures (unfit for service) out of the city on the 8th, who were forced to return by the Dutch the 9th. The 12th, five hundred Negroes were forced out of the city, but were fent back by the Hollanders the same day. The 17th we saw divers gibbets erected without our walls, on which they did hang divers of the miterable creatures that were forced out of the town. We had to many dead in the city, that we wanted room to bury them. The 19th two of our foldiers deferted; one whereof being taken, was hanged up immediately. 23d fifty negroes (the remnants of the laft five hundred) returned to the city. The 27th, the bridge made by the enemy on this fide of their trenches, was fet on fire from the bastion of St. John; but the fire was soon quenched. The 29th the befieged made a kind of a covered way, near the gate of

The 2d of March our city-major was fent in a fmall veffel to Manaar, to follicite for fuccours there, in case any should have been lately arrived from Portugal; for at Goa they thought of nothing less than Ceylon; for they did not want either men or ships to send to Macassar or Mosambique, but could find none for Columbo; for though the cinnamon was upon the king's account, by those of the rest of their cargo belonged to private persons, who would not venture their ships for the publick without extraordinary re-

Rajuba, from the bastion of Madre de Deos,

to that of St. Sebastian.

The fame day an advice-boat arrived from Gale, and we made the beginning of a Cavalier on the bastion of Madre de Deos; but finding that the enemy were raising a battery against it, it was not brought to perfection. Two Portuguese and nine Lascaryns deferted. The 3d the enemy began to open their trenches on the fide of the

and the 7th another did the fame, leaving the boat, where were fome Canaryns, who returned. The 11th another foldier belonging to Alvaro Rodrigo Boralbo's company, went over to the enemy who received that day a reinforcement of ten fhips,

The 12th early in the morning we found that the enemy had posted himself upon an eminency at the foot of the bastion of δt . Crus, just over-against our redoubt, and that they had carried on their trenches a good way into the field. A foldier of Manoel Cabreira deferted to the enemy. The 13th we fent away four Pachas, or advice-boats. The 14th we discovered three fails, with some floops, which occasioned great joy in the city, thinking that it had been the fo-long-lookedfor fuccours, but foon found our mistake. The same day two Dutch deserters and a boy came into the town. The enemy having strengthened their battery against the outworks of the bastion of St. Stephen and St. John, they laid, the 16th, one fide of St. Stephen's battion level with the ground.

The famine increased every day, a fig-Famine tree or a papey-tree was now fold for fifty increase. Pardaus: herbage we had none; fome roots there were, but miferably dry, by reason of the heat of the feafon, which caused a great

The 17th an Aratche and two Lascaryns went over to the enemy; and perceiving that they had raifed an eminency, in order to erect a redoubt and battery near the gate of Rajuba, we demolished the same by planting a twenty eight pounder against it. We had an advice-boat fent us from the northernquarter, and about mid-night the enemy alarmed us by a falle attack. Inc 20th five foldiers being taken that were going over to Four definitions. alarmed us by a falfe attack. The 20th five the enemy, four of them were hanged imme-grd, diately, the fifth, who had discoverd the rest,

escaping with his life.
The 21st we made a countermine about ten foot from the enemies, which was carried to the palm-trees planted on the fortifications; whilft Simon Lopes de Basto mafter of our ordnance, Manoel Fernandes da Miranda, Manoel de St. Jago Garcia, father Damian Vieira, and several other Portuguese officers, were employed in encouraging the workmen; one of our cannon-balls fell among fome grenadoes and other fire-works, which caused a great alarm in the whole city, and the brave John Pereira Corte Real a native of Negapatnam, who had fignalized himfelf upon a thousand occasions in the service of our artillery, here lost his life, being generally regretted by all who knew his merit. The 22d and 23d, the enemy continued to perfect their works near the gate of Rajuba, against which we played with a demi-cannon from behind the wall or St. Stephen's baftion.

Baldans. The 24th two meffengrs from the king of Candy brought a letter to the governor, and remains another to the inhabitants of Columbo, in more than a letter fent to that king at the letter fent to that king at the man felo mourning apparel, to intimate (according to the cuffornof that court) how much concern'd his maiefty was at the many injuries and af-

the cuftom of that court) how much concern'd his majesty was at the many injuries and affronts put upon him during the late war. They contained in substance, That the king fummoned them to a furrender, promiting all the inhabitants the free possession of all their estates, villages, &c. for their fustenance, as the only means to deliver them from the miferies and oppressions they now groaned under, alledging, That the fame were the effects of God's just vengeance for their ingratitude, thewn upon to many occafions to his imperial majesty, in return of the many benefits they had received at his hands, and not admitting his ambaffadors fent to them with propofals of an alliance. These letters were likewise subscribed by the Dutch general Hulft, which being read publickly, the messengers were difinissed with much respect, but were scarce got out of the city, when they were overtaken with a most dreadful storm of rain, thunder, and

The 25th Alvaro Rodrigo Boralbo killed a foldier as he was going over to the ene-

The 20th an auvice-tone make to get intelligence whether there were any The 26th an advice-boat was dispatched hopes of fuccours for Columbo; but all the news we could learn, was, That the vic roy of Goa (the only person we put our condence in next to God) was lately dead; which though it was doleful news for us, yet was it refolved to hold out to the laft extremity; which was performed to the greatest nicety, the Dutch never being able to become mafters of the place, till most of us were confumed either by the fword or famine. Advice was also brought us, That bonfires had been made at Goa, upon certain advice brought by fome negroes (under protection of the Dutch) taken at Putelaon in Ceylon, that Columbo was not in fo defperate a condition as had been represented, which they had reported upon the credit of a certain Dutch mafter of a vessel.

The 27th of *March* one of our ferjeants was devoured by a crocodile in the fens, his cloaths and arms being found afterwards. At this time a *Parra* of rice was fold at twenty five *Seraphins*, or gilders; and all our church-yards being filled with dead corps, we were forced to have another confectant for that purpose.

fecrated for that purpose.

The 28th in the morning the enemy had thrown up another redoubt near the wall of the gate of Rajuba. One of the inhabitants, a native of Cranganor, went over to

the enemy from the bastion of St. John, he Beldleus, ing forced thereunto by hunger, which was grown so excessive, that dogs, cats, and dogs fold at rats, and other such like things, were fold at a great a very high rate.

The 31th two foldiers and a Lafearyn went over to the enemy. The next moining we faw fome finall batteries raifed againft the redoubt of St. John's baltion, where our people had made fome entrenchments, raifed like steps of ten paces high, cover'd with a breaft-work, like a cover'd-way, called Meapaon by the Portugueje. At the same time we began to work on a countermine, within twenty paces of the enemy's mine at St. John's bastion. The same day above fitty of our fick died in the hospital, besides what were daily found dead in the houses and streets, the ammunition-bread being by this time become a most precious commodity.

The first of April one of the enemy's advice-boats came into the road. The second seven Lasearyns deserted, and ever after twenty or thirty a-day went over to the enemy. The 3d two Duteb yachts came into the road, aboard one of which was a surgeon. At the same time a Parra of rice was sold for fifty nine Seraphyns, or gilders; but the worst was, that there was not enough of it, and could not be purchased but with ready-money. The governor's steward (though without his knowledge) *refusing *Semper to part with any without ready gold, to the inseningreat diffeputation of his master, who, tores huthough a gentleman of great honour, yet manarum was highly blamed for committing a thing calamiratof such moment to the management of so

avaritious a perfon.

The 4th of April the enemy had raifed a new redoubt and battery, provided with two pieces of cannon, near the gate of Rajuba; wherewith they had fo battered our palifadoes, and other wooden fences, that there was no fafe paffing betwixt the fortifications and the wall on the other fide of the ditch. The enemy received a fuccour of two ships, and the next day four more. The enemy made their approaches with fo much circumspection, that they advanced to the ditch (where it was dry) with the loss of a few of their men, who improvidently exposed themselves to our fire-arms.

The 6th we began another countermine, and the 7th the enemy threw abundance of fafcines and faggots into the dry ditch, and fet fire to our palifadoes; which was foon quenched by the industry of our men; whilft the Dutch were employ'd on the other fide to cut a breach with pickaxes in the wall; but were foon chafed from thence by our firebocks, not without confiderable loss.

The 8th of April we began another countermine; which being fenced with a kind

he

Baldens. of palifado beams covered with earth, to re-In the enemies fire-works, was carried on under the conduct of the mafter of the ordnance Antonio de Melo de Castro, the serjeantmajor Antonio de Leaon, Diego de Souza, and Manoel de St. Jago Garcia. The fame and Manoel de St. Jago Garcia. The fame day at least feventy fick persons (most Europeans) died in the hospital; many of the negroes lay dead in the street for want of room to be buried in, which produced a most nauseous scent. The hunger was in-

tramity for creafed by this time to fuch a degree, that want of pro- they began to feed upon mens flesh; several mothers murdered their own children to feed upon, two whereof were executed. It was a most doleful spectacle to hear the poor miserable wretches cry out in the streets for bread; fome imploring heaven for affiftance,

> of their mifery, others expiring and breath-ing their last in the houses and streets. The 9th Domingo de Ramos forced a multitude of poor wretches out of the town; but these being driven back by the enemy, and exposed to our small-shot, perished either by them, or by famine upon the

> others curfing those who were the occasion

The enemy advanced this day briskly with their trenches, as we did on our fide in our retrenchments.

The 10th we fet fire to the enemy's gallery; which, however, did not fucceed according to expectation, for want of fufficient fuel 3 but father Damian Vieira, Manoel Guerreiro, and Simon Lopes de Basto, did kill many of the enemy upon this occasion.

The 11th we planted a cannon betwixt our palisadoes against their gallery i but they had strengthened it so well that we could effect nothing of moment. One of our foldiers run over to them.

The 12th we began two other mines with incredible labour, but indifferent fuccess, for Four selected want of skilful engineers. men were posted in the redoubt of St. John's bastion, who defended that post, which was within a few rods from the enemy's works, with a great deal of bravery, as they did in most other places, notwithstanding we were reduced to a very inconfiderable number, there being not above five or fix men left in some companies, as those of Diego de Souza de Castro, Manoel de St. Jago Garcia, and Don Diego de Vasconcelhos, who performed wonders in the defence of the baftion of St. John.

The 13th the enemy having received a reinforcement out of two yachts, they labour'd very hard in their mine on the baftion of John, under favour of their cannon, which play'd inceffantly. At that time fa-ther Damian Vieira killed a flout Hollander, who had the direction of the work, which advanced apace, though we ply'd them ve-Baldaus, ry warmly with our fireworks. Two of our foldiers deferted to the enemy.

The 18th we began to work on our countermine from the foot of the baltion of St. John towards that of St. Stephen, under the direction of father Damian Vieira, Simon Lopes de Basto, and John Fereira d' Abreu, whilst the serjeant-major Antonio de Leagn, Diego de Souza de Castro, and Ruy Lopes Coutinbo ply'd the enemy with the fireworks, and other combustible matter.

The fame day we got intelligence by an advice-boat, That the fo-long-expected fuccours, under the command of Francisco de Seixas Cabreira was come upon our coast ; it confifted of twenty one ships, and two galliots with provisions, one whereof was upon the king's account, the other of Simon Souza, a gentleman of honour, who took compassion of our present condition. They fet fail from Goa the 29th of March ; but as they were endeavouring to make the cape Comoryn, one of the galliots, in which was Simon de Souza, was attacked fo furioufly by News of the a Dutch veffel coming from Calecoulang with defeat of the pepper, that after having loft her mast she figured for lunk, Simon de Souza being narrowly faved Columbo with a few foldiers, and carried to Columbo. The Dutch thip then falling in among the rest, fought so manly, that she forced our ships to retreat into the harbour of Tutecoryn; from whence they could not come to Columbo till August; though if the faid fleet had arrived fafely, they had brought fcarce rice enough to ferve only for a little

About the same time father Damian Vieira, John Fereira d'Abreu, and Simon Lopes de Basto, went with some other officers, (called Reformadoes by the Portuguese,) into one of our mines. Father Damian, and lieutenant Nunes going about fix paces before the rest, to discover whether any of the enemies were at hand, and being miftaken by their comrades for Hollanders, these discharged their musketoons upon them i notwithstanding which the jesuit escaped a strange miraculously the danger, without receiving stape, the least hurt. This happy escape was artributed to the prayers of father Frey Luys, a Capuebin, to whom fuch as were going upon fome desperate enterprize used to recommend themselves.

The 15th Nicholas de Moura escaped out of prison, (where he was detained ever since the buliness of the count d'Obidas,) and with five Mistices went over to the enemy, as did much at the fame time a ferjeant and a foldier. About eighty paces from the gate of Rajuba, the enemy battered part of our wall betwixt the bastions of Madre de Deos and St. Sebastian, from a battery of five

The 16th we made a false alarm to try whether every one would repair readily to his post: two new-listed foldiers took this opportunity to defert, and being now def-titute of men to work in our mines, no body was excused from that service, from the

governor to the private centinel.

The 17th the enemy having fixed another cannon upon the battery, before the gate of Rajuba, they laid the wall level with the ground; our people being fo weakened by famine, that they were not in a condition to carry thither any fascines or earth to repair it. At the fame time Manoel Fragofa, a reformed captain, who had done fignal fervices in the Indies, and especially in Ceylon, went over to the enemy, because his pay (which was given to others who much lefs deserved it) was refused him, nay, he could not even get fustenance for his money, which put him upon this desperate refolution; two common foldiers, natives of *India*, deferted at the fame time. There common-died fuch a vast number every day in the hospital for want of necessaries, that many of the foldiery chose rather to abide with their companies, where they expired in fight of their comrades.

The enemy received a fuccour of two ships, a yacht, and a galliot, whereas the poor befieged had not the least relief in seven months.

The 18th Mr. Adrian van der Meyden, governor of Gale, fent us a letter, (their general being lately dead,) and to terrify us the more, presented all his forces in order of battle, betwixt his trenches; but our men, commanded by Alfonso Correa, John Ferraon d'Abreu, Manoel Pereira Matojo, Ignatio Fernandes, Simon Lopes de Basto, and father Damian Vieira, made a vigorous falley the next following night out of the gate Rajuba, when Francisco Asca, a reformed captain, took the opportunity to defert us.

The 19th Diego de Souza de Castro was fent with an answer to the governor's letter; and the fon of Manoel de Souza went over

to the enemy.

The 20th a foldier deferted from the baftion of St. Crus, on which fide the enemy had attacked us with the greatest fury ever fince their loss sustained there, under the command of Caspar d'Aranja Pereira, who fucceeded Manoel d'Abreu Godinho, after his post was affigned him, behind the wall, betwixt St. John's and St. Stepben's bastion. The city-major having four bufflers left, The four which had drawn a waggon for a confide-lass four rable time, had them killed for the use of the garrison, who, after the meat was confumed, feafted alfo upon the hides, which they cut into finall pieces.

VOL. III.

The 21st the enemy had drawn a line of Baldiens. communication from the battery, near the gate of Rajuba, to the lake. At the fame A sand time five persons were wounded by one of hill five their bombs, and captain Manoel Guer-perfons. reire mortally, who had killed many a brave Dutchman with his fusce during this

The 22d the enemy having fet fire to our countermine, the brave Joan Ferraon d'A-bren, and Simon Lopes de Bafto, were the chiefest that gave their assistance in quenching of it, amongst a shower of bullets and hand-grenadoes. At the same time a Topas went over to the enemy, the only one that deferted of that kind, though we had a good number of them among us, who for the most part died with the Portuguese in

the defence of the city. The 23d, father Damian Visira, John d'Abreu, John Pereira, (inhabitants of St. Thomas,) Simon Lopes de Basto, Manoel Pereira Matojo, Sebastian Rodrigues, Ignatio Fernandes, Joseph Coelbo, and Manoel Fereira Gomes, got early in the morning crofs the fens, in order to furprize one of the enemy's works, but were fo warmly received, that they were glad to retreat, and fight their way through the Dutch, who had inclosed them on all sides.

The 24th a Tony was fent to get intelligence; the enemy fired most furiously from their battery against St. Stephen's bastion, and the gate of Rajuba, where the wall being laid level with the ground, the houses fuffered much by their cannon.

The 25th the enemy planted two pieces of cannon at the extremity of their trenches against St. Stephen's bastion; and Raphael de Torres, a prisoner for debt, escaped out

of prison.
The 26th the Dutch continued to play

without intermission upon the bastions of St. John, St. Stephen, and Madre de Deos. The same day nine Portuguese were buried in one pit, or grave, there being no place left to bury them in. A candil of rice was fold at that time for two thousand five hundred feraphyns, or guilders, and a candil of wheat for three thousand four hundred guilders, and happy was he who could purchase it; for you would see women throw their babes into the streets for want Great exof fuck and other fustenance, and others tremity in to part with their jewels for a flender Columbo. measure of rice, a commodity more precious at that time than all the precious stones. During this general calamity, the city-major Manoel Marques Gorian shewed himself a true patriot in all his actions, but especially in distributing what rice he had left among the foldiers, which it he had fold, must have amounted to a considerable fum of money at that juncture;

Baldaus. but he was willing to part with all, in hopes to preferve the place for his king.

At the fame time a falle attack was made

near the gate of Rajuba.

The 27th, one of our ferjeants belonging to captain 8t. Jago's company, deferted to the enemy. At the same time we saw them carry on their trenches from the battery raised against the gate of Rajuba, towards the bastion of St. Sebastian: their batteries continued applay without inter-mission day and night. The same night father Damian Vieira, with feven more, made a falley upon the faid trenches, and carried off most of the tools of their workmen. Simon Lopes de Basto took this opportunity of fending two fpies into the enemy's camp, who being discovered, had much ado to fave themselves, being forced to pass through a shower of the enemy's bullets: they returned the 29th, and brought advice of the death of general Hulft, and *He means the commodore * of the Dutch fleet.

Dirk Ogel, the fame time an advice-boat, + carrying commodore, three guns, came into our harbour, aboard † Called whereof was the fileal. An alaith was of the Lion, dered to be given at four in the morning, whereof was the fifcal. An alarm was orwhich brought the with the found of drums, trumpets, and news of the other warlike instruments, and a general defeat of discharge of our cannon and small arms. the Portu-

The 30th, father Damian Vieira, Simon guese sue. Lopes de Basto, John Pereira, Alphonso Correa, Sebastian Rodrigues, and Joseph Coelbo, went out to take a view of the enemy's works, and advanced within ten paces of them, which they found defended by a kind of breaft-work made up with hurdles; notwithstanding which, they attacked them with fword-in-hand.

The 1st of May the enemy defired to have their prisoners exchanged for some of ours, which being agreed to, the fecond we delivered up eight of their prifoners, the only remnants of those taken in the last general affault, in lieu of which we had as many of ours reftored to us: they then began afresh to play most furiously from their morears and cannon.

The 3d, at feven in the morning, father Damian, John d'Abreu, and Simon Lopes de Basto, went without the fortifications, to gather up the bullets near the bastion of St. Stephen, which used to be taken up by the enemy in the night time. Father Damian Vieira, Simon Lopes, and two more, made another falley, to level some of the enemy's works, but without fuccess. The same day two foldiers went over to the enemy.

The 4th, father Vieira, Simon Lopes, ful salley. Francisco Valente dos Campos, Antonio Ma-deiro, John Pereira, Manoel Pereira Ma-10fo, Alfonjo Correa, Manoel Fereira Gomes, Manoel Nuguera Freire, and Thomas Fereira Lete, made a vigorous falley, and with fword-

against the outworks of St. Stephen, St. Sebastian, and the bastion of Madre de Deos, with fuch fuccefs, that they ruined them entirely, and fet fire to the fascines, hurdles, and other wood-work that fustained them, notwithstanding the Dutch came with a confiderable body to the relief of their countrymen, but were repulfed, not without a confiderable lofs, and among the reft, one of their bravest officers, who was buried under a tripple falvo of their firelocks; fo that our people remained mafters of the posts, and returned victorious into the city.

The 5th, Ignatio Fernandes, Manoel de St. Jago Garcia, Sebastian Rodrigues, John Pereira de Lago, and father Damian Vieira, (who never staid behind upon such like occafions,) made another falley, but not meeting with any enemy where they expected him, returned without effecting any thing.

The 7th, about fix in the morning, (it having been rainy before, which is a rarity here at this feafon,) the enemy made an affault upon the bastion of St. John, defended by Don Diego Vasconcelbos, and two youths, Don Constantino de Meneses, and Diego Jaques, both under fourteen years of age, all the foldiers being fwept away by famine; for within these two months, above four hundred men died in our hospital, and our fo-long-expected fuccours being blocked up at Tutecoryn, we were past all hopes of fuccours; whereas at Goa, there was nothing to be heard of but divertisements. To be fhort, the enemy made themselves masters ** Martin of the bastion, after having killed the cap-schotes tain and the two youths, who defended the breach

themselves like lions, set upon by a multi-This done, they tude of Dutch dogs. turned the cannon against the city, whereby many of the Portuguese that were hastening to its relief, were flain in the streets. The fecond baftion, affaulted at the fame time by the Dutch, was bravely defended by Manoe. Figeiros, who with two pieces of cannon killed abundance of them; but being confrantly feconded by fresh troops, especially of the Cingalese, they sent such showers of arrows and bullets among our people, that they were forced to quit that bastion also.

From thence marching into the city, they were met at the entrance of a street by the commander in chief, Anthonio de Melo de Castro, Diego de Souza de Castro, father Anthony Nunes the jesuit, Sebastian Rodrigues, John Pereira, Vincente de Silva, Francisco Valente dos Campos, Alfonso Corroa, Sebastian Pereira, John Ferraon d'Abreu, Anthonio de Magalhanes, and an enfign under captain Alla: thefe, though few in number, but many in valour, charged the Dutch with incomparable bravery. The Portuguese Alexander Manoel Marques Gorjaon, making

ne Portugueje jaon, making Baldaus, the best of his way over the dead carcases, ~ that covered the ground, fingled out a Dutch captain of a gigantick bulk, who shot him with a piftol through the body; notwithflanding which, he run him through with this fword, and fent him immediately to Columbo, the other world; then pushing on his fortune, made the Dutch give ground, and having rallied his men, fecured the post for that time. The Dutch renewed the charge five times fucceffively, but were as often couragiously repulsed by Anthonio de Melo de Cajtro, and those few that followed him; and being refolved either to conquer or to die, they broke in with fword-in-hand amongst the enemy, and again possessed themselves of the first bastion, and soon after also of the fecond. The first who entered the last, was Anthonio de Magelhanes, who fought with an uncommon zeal against the enemy; for before they became mafters of our cannon, he ply'd them very warmly from behind the wall, (the only defence he had left,) fo that it cost them many a brave fillow before they could make themselves masters of it; and being now posted again upon the fame baftion, he was bravely feconded by two demi-cannons from the new bastion, and a fmart shower of fire-works, which fet the circumambient air into fuch a flame and fmoak, that at a distance it appeared like the mouth of hell.

> At the fame time the governor Anthonio de Souza Coutinho, and Francisco de Melo de Castro, did all that could be expected from brave men on the Couras, or the bastion of Xaverius, both by way of command, and by charging the cannon in person, and per-forming the duty of common soldiers. The fathers Philippo and Pedro de Castelbranco, both Austin friars, were not behind-hand with the rest, in giving their utmost affiftance for the defence of the place, being appointed to keep a watchful eye upon the enemy, whenever they were going to alarm, or amuse us with false attacks.

It must certainly be confessed, that this engagement was one of the most remarkable that ever happened in the east, confidering that a few, and these most wounded, fick, or weakened by famine, did engage a much greater number, continually fuftainnadible, ed by fresh troops, from fix a-clock in the the Portu morning, till eight in the evening, during which time the enemy was repulfed, not only once, but five feveral times, by a much inferior number, who having not the leaft relief or time to breath, were forced all that time to endure the danger and fatigues of the action, which coft the enemy above wounded and burnt by our fire-works. On our fide we loft also the flower of our forces, fome whereof were flain, others wounded,

disabled from bearing of arms for a considerable time after. Among the flain, were Diego de Vasconcelhos, who had given a thousand proofs of his bravery in this fiege father Antonio Nunes, the jesuit, a pattern of virtue, who fignalized himself not only

and burnt to that degree, that they were Baldaus

all along on the baftion of St. John, as well as in other parts of the city, by incouraging the foldiers, comforting the fick, and burying the dead: he was shot at the gate of the baftion with a musket-ball, received afterwards a deep cut, and at last slain by a hand-grenado, after he had killed feveral of the enemy with his musquetoon. At the same time died in the bed of honour (after they had given a thousand proofs of their bravery) Alfonso Correa, Vincente da Silva, Francisco Valente de Campos, Sebastian Pereira, and that brave fea-commander Sebastian a Abreu Godinbo, besides an ensign, a native of Bazain, belonging to captain Alla's company; Manoel de Seixas, an inhabitant of Columbo, and Anthonio Caminha d'Alzevedo, were forely burnt; Diego de Souza de Castro was mortally wounded with two bullets, notwithstanding which, he would not retire from the engagement till he received a deep cut. Manoel Caldeira de Britto Vidave was wounded by a musketball, as were likewise John Ferraon d'Abreu, Andreas de Seixas, Manoel Nugueira Freire, Manoel de Souza, and Manoel Segaldo. Lanrence Days, a native of Columbo, was wounded with no lefs than three musket-balls; Ruy Lopes Coutinho, Domingos Pires, inhabitants of Negapatan; lieutenant Arrais, captain St. Jago, Manoel Correa, commander in chief upon the bastion of St. John; Francisco Pereira, Simon Lopes de Basto, and many more were miferably burnt. Most of these received their wounds by the accidental fetting on fire of a veffel filled with gunpowder, through the carelessness of our own people. The reverend father Paulo was wounded, as he was furnishing the combatants with fire-works, as was likewise father Manoel Velles, who was touched by two bullets, without receiving the least harm by them; a grenado did also fall just before his feet, without doing him the least harm, as

Rodriges Boralho, at the gate of Rajuha. Father Damian Vieira, with his company did confiderable mischief to the Dutch from the church of St. Domingo, being bravely feconded by Caspar Aranja Pereira, knight of the crofs, and an old fervant of the king, (who fucceeded the city-major in his place,) with nine or ten of his followers, this being the place most exposed to the enemy. The commander in chief Anthonio enemy. The commander in chief Anisomio de Melo de Castro, no less annoyed them from the new bastion, and with their shot

he was bufy in defending his post with Alvaro

Baldeus, fo scoured the streets, that there was no safe passage for the Dutch and Cingalese.

The Dutch without the town, did on the other hand exert their utmost efforts against the old baftion, which being almost laid level with the ground, the wall without ferved for a breaft-work; and being continually fupply'd with fresh troops of the Candinese and others, put our men, but sew in number, most of them sick, wounded, or half-starved, and, besides that, but ill provided with ammunition, very hard to it on that fide. For by this time we had not only but few men, but also not above fifteen days provisions left, and scarce so much gunpowder as would fuffice for two charges of our artillery.

Confulta-

Things being come to this pass, it was afarrender, debated in the council, (confifting of thirty four persons,) whether it were not best to think of a furrender; thirteen were of opinion rather to die upon the fpot, than to treat with the enemy; but the most being of a contrary opinion, and nine of them positively insisting upon it, that it would be most conducing for the king's interest, that feeing the place was no longer tenable, to preserve the remnants of these brave sellows, who had behaved themselves so courageoufly, it was agreed to enter upon a

treaty.

Accordingly the 10th, Manoel Cabreira was fent with a letter to Mr. John van der Laan, concerning the conditions of the intended treaty; an answer to which being fent the 11th, Laurence Fereira de Britto, Diego Leitaon de Souza, and Hieronymo de Lucena were dispatched as plenipotentiaries, to demand a ceffation of arms till the 25th of May, against which time we expected the fo-long-defired fuccours. But the enemy, who were not ignorant of our present circumstances, would hearken to no other conditions, than to furrender the city the next day by twelve a-clock at noon, which if we refused, they threatened to give us no quarter; fo that we were forced to obtain the best terms we could, without any longer hefitation, the articles whereof being drawn up in hafte (for want of time) I had not the opportunity to peruse them 3 and therefore can only tell you upon this head, that Columbo was forced to furrender, though I cannot precifely tell upon what terms.

No fooner was the news of the treaty divulged among the people, but nothing was heard but dreadful outcries and lamentations. The ecclefiafticks (or at least the most cautious among them) hid the images and relicks, and unfurnished the altars, for fear they should be defiled by the hereticks, as had frequently been done before upon fuch like occasions. The Dutch having taken possession of the bastions, our garrison,

confifting of ninety foldiers and one hun-Baldæus, dred armed inhabitants, including officers, nay, even the lame and maimed, marched The garriout, fome with their fwords and muskets in ing of one one hand, and a flick or a crutch in the bundred

The Hollanders feeing these poor rem-out, nants, most of which appeared more like skeletons than living men, were aftonished at their bravery, in the defence of a place they had been forced to purchase with so much blood. Ten Dutch companies marched into the city, at the head of which appeared the general Adrian van der Meyden, and Mr. John van der Laan on horseback, not to reckon the Cingalese sent to guard the governor of Columbo's house; which was no fooner done, but a meffenger was fent to him to demand Simon Lopes de Basto; being not in a condition to refuse him, he ordered immediately the faid Simon Lopes, with a certain Aratche of Negumbo. and some Dutch deserters, to be delivered to him, who were all hanged on a gibbet foon after in fight of the Portuguese, who were forced to be eye-witnesses of the miserable exit of this Simon Lopes, who for the fignal fervices he had done them in the fiege, deferved to have had a monument of brafs erected to his memory. To the shame of those be it spoken, who ought to have endeavoured to afford him a much better recompence for his past services, and rather exposed him in a boat to the chance of the feas, than to a certain fhameful death.

The Hollanders were sufficiently sensible of the bravery of the Portuguese during this fiege, which lasted seven months, (without receiving the leaft fuccours or fupplies,) by the loss they sustained of their bravest soldiers and best officers, which amounted to three thousand men, besides the wounded and maimed; befides that, the charges of the fiege amounted to more than would

have built fuch another Columbo.

The general and Mr. John van der Laan were no fooner fettled in their habitations, but they gave liberty to the foldiers to plunder the place (contrary to their parole) for one day, which was extended to five by Mr. Van der Laan, viz. from the time of This is a their coming into the city, till the time we groft fal, e. marched out, which was performed by the dur batting hereticks with the utmost rigour; nay, been whilst our foldiers were embarking, and the time for inhabitants within three days after, they con-finaling, tinued their robberies even upon the feafhore. Almost all our people went aboard along with them, except a few who staid behind with the governor and deputy governor; and fome, that (by great promites) were engaged in the king of Candy's fervice,

which, perhaps, has happened by a fingular

providence of God, as a means to influence

Raldaus. that king's counfels, in order to expel the Dutch, one time or other, out of the isle of Ceylon.

Our people were transported to Negapatan, where they were most kindly received and provided with medicines, cloathing, and other necessaries by the inhabitants, till they received their pay: after the arrival of Antonio Amiral de Meneses, governor of Jafnapatnam, who at the fame time intreated Anthonio Mendes d'Aranha (who after having been detained a prisoner at Gale, was now come to Negapatan,) to go along with him to Jafnapatnam in the quality of his deputy-governor, as not questioning but that he should be the next, against whom the enemy would exert their utmost efforts; which he accepted of; though confidering the fatigues and miferies he had endured of late, he might very well have excused the fame, as well as the rest of the soldiers; who, notwithstanding this, half-fick, and half-starved as they were, did embark for one of the most dangerous places in Ceylon,

to give fresh proofs of their bravery.

This was the end of this siege, one of the most remarkable in all its circumstances that ever was heard of, confidering that a place of that bigness was defended by so slender a number for the space of seven months (without the least supplies) against a powerful force of the Dutch and Cingalese, who first defeated the Portuguese forces (composed of the flower of their men) in two fmart engagements; fo that the whole number of the *Portuguese* was at last reduced to two hundred souls. The account of this fiege being spread among the eastern moors and pagans by feveral persons, who had been eye-witnesses of the great actions performed there, did beget an incredible reputation of the bravery of the Portuguese among those nations, though the same proved unfortunate in the end.

Thus his majefty of Portugal loft a place, and with it a whole kingdom, three times

bigger than Portugal itself, and much richer Baldaus. and more plentiful, the very center of the world, the richest tract of land under the fun, and with it (probably) all that is in the possession of the Portuguese to the south of cape Comoryn. His majesty lost a considerable squadron of ships sent to the relief of Columbo. The first squadron intended for this expedition did come no higher than the cape Comoryn, the pretended fuccours from Manaar came to nothing: and the fecond fquadron promifed by the viceroy of Goa in January, did not fet fail till the 29th of March, and was forced to retreat

without effecting any thing.

The want of money was alledged as the Some pr-main reason of this delay, when it is suffi-teners for ciently known, That the king had both liering of fhips and money enough at Goa, which Columbo. could not have been better employ'd than for the relief of a place of fuch vast impor-tance. We know what vast sums Nuno Alvares Botalbo confumed at Mofambique; which was nevertheless not disapproved by the king of Castile; and why might not the same be expected from the king of Portugal? To conclude, Columbo, and with it, the whole isle of Ceylon, being lost for want of fuccours, all fuch as have deferved Address to well in the defence of that place ought to his Portube rewarded for their fervices, as those who jesty. have been neglectful in their duty for the prefervation thereof deferve condign punishment at his majesty's hands. And as nothing is more common, than that courtiers imploy their favourites in places of trust, (without any regard to merit,) and afterwards to conceal their mifcarriages from the king; it is for this reason, that we lay this account at your majesty's feet, raken from the journal kept at Columbo, and other authentick records, confirmed by the testimony of many persons of credit, both ecclesiasticks and laymen, that were prefent from the beginning to the end of this

CHAP. XL.

The Origin of Columbo. Arrival of the Portuguese: Their Engagements with, and Conquest of the Moors. They fortify Columbo. Raja Singa dissatisfied.

THE city of Columbo is an antient city, feated at fix degrees one half Columbo of north latitude, in a pleasant country, near a delightful river; which, questionless, induced the *Portuguese* to fix upon this place for their chief residence in this island. For Emanuel king of Portugal, having

been fully informed concerning the condi-

tion of Ceylon, ordered a fort to be erected there, for the better establishment of his affairs there, and to curb the emperor. Lup, de Britto being fent thither with a good number of foldiers and workmen, John Silva delivered the faid fort up to him. For Zowes who was lately failed with twenty ships and seven hundred landIs foon

rout the

Cingalefe.

Baldæus, men to Ceylon (after Laurence d' Almeyda, who fome years before entered into a confederacy with the king of Ceylon) had just before made an agreement with the governor of Columbo about a fettlement in that place, which he looked upon as the most proper for a fortification, both in respect of its fituation, and the plenty of the best cinnamon that grows in the whole ifle, being feated in the form of a crescent, and affording safe anchorage for ships, provided they are not

too bulky. Accordingly it was agreed to erect a for-

tification there, under pretence of securing the commerce of the Portuguese, but in effect to curb the king and the natives. He who reigned at that time in the ifle being a Brabman, was not a little jealous of the Europeans; but being fenfible to what pitch of greatness the king of Cochin was lately ar-

rived by the affiftance of the Portuguese, he Treaty be. gave his confent, though not without some twixt the reluctancy, and confequently was of no long Portuguese continuance: or the Saracens who were and the Cingalete. Chafed thither from the continent, and had fettled their traffick in this ifle, found means, by the promifes of great fums of money, and of their affiftance, to entice the king and court to oppose the defigns of the Portuguese, who intended to entlave them, under pretence of fettling their commerce; for which purpose they raised some works, and having mounted fome iron cannon upon

> ashore, without suspecting any harm. Zoares coming ashore with his workmen, in order to raife the intended fortifications, was furprized to find fome forts erected by the Cingaleses; and having received certain intelligence, that the same had been done at the initigation of the Moors, he eafily gueffed that nothing but force was likely to establish the Portuguese in Ceylon. Accordingly hav-

them, feized fome Portuguese that came

The Portu- ing landed his men, he attacked the enemy, who at a diffance formewhat galled his forces with their arrows; but after they came to a close engagement, the Cingalcie were quickly put to the rout, and purfued by the Portuguese with confiderable loss: the Portugese had many wounded, but sew killed, among the last was the brave Patieco, lately

come from Malacca.

Zoares having allowed one day only to his people to refresh themselves, began the next morning an entrenchment, reaching from the harbour to the fea-fide, without the leaft opposition: within this he ordered a fort to be erected, whereupon having mounted his cannon, and strengthened it by a wall that furrounded it, he foon made the king repent of his inconstancy, who fent his envoys to Zoares, asking pardon for what was paffed, and defiring that the former alliance might be renewed: but Zoares refused to

hearken to these propositions, demanding Baldeus, fatisfaction for the affront, and a yearly tribute to be paid to king Emanuel; which the king of Ceylon (who dreading the Portuguese) not daring to refuse, it was agreed that he fhould pay to Portugal an annual tribute of one hundred twenty four thousand pound Force the weight of cinnamon, twelve rings fet with a yearly the most precious rubies and saphirs, and six tribute. elephants, under condition that king Emanuel should affift the king of Ceylon and his fucceffors, both by fea and land, against all his enemies.

The treaty being thus concluded, Zoares continued his fortifications; which being brought to perfection with the affiftance of the Cingalese, he left John de Silva, with a good garrison there, and Anthonio Miranda Azevedo with four ships to guard the coast; which done, he returned in December to Cochin, where he was received with all imaginable demonstrations of joy. Lup. de Britto (before mentioned) fucceeding John de Silva, brought along with him abundance of workmen and bricklayers, who made a kind of mortar of the fea-cockles, and lined the fortifications with a strong wall, deepned the ditches, and added what works they thought necessary for the accomplishment

This created no finall jealoufly (not with-hill diout reason) in the Cingalese, which was in-gested by creafed by the infinuations of the Moorifh the Cings merchants, who told the king, That their efe. prophecies were like to prove too true, fince he was now made fenfible, that these soreigners had not only excluded all other strangers from the traffick of this isle, but also had made him a tributary of Portugal, and shortly would make him their vasfal, if he did not in time hearken to the counfel of his friends.

These infinuations had the defired effect: for the king not only cut off all supplies of provisions and other necessaries from the fort, but the common people being also incenfed by these discourses, murdered several Portuguese, who ventured a little too far without the fort. De Britto at first dissembled the matter, finding he could no longer contain his foldiers (burning with revenge) he chose one hundred and fifty of his best men and with them affaulted the city of Columbo Britto (which lay near the fort) just about noon, furprizes when most of the inhabitants were afteen to avoid the heat of the day, and at the first alarum betook themselves to their heels, leaving the city to the enemies mercy.

De Britto feeing himself master of the place without the least opposition, forbid his foldiers to plunder, or commit any other outrages; but ordered the women and children to be tied to the posts of the doors, with an intention to convince the Cinga-

Portuguefe t bijuged in the fort.

ies mercy. after of the place forbid his folmit any other omen and chilof the doors, nce the CingaBaldaus, lefe that he was not come lib: an enemy to ~ destroy, but like a friend to preserve them. But as he had but little reason to rely upon their generofity, he thought fit to make a trial of their inclinations; fo he ordered fome houses that lay next the Portuguese fort to be fet on fire: this had the defired fuccess; for the Gingalese, out of the affection they bore to their wives and children, had gathered all their force, in order to relieve them at any rate; but finding their houses on fire, run first with all speed to quench the flame, whereby Britto got leifure to retreat in good order into the fort, and to provide himfelf against the intended affault, which however could not be done without fome lofs, above thirty of his men having been wounded in the retreat.

However Britto reaped no other benefit by this enterprize, than that the Cingalofe (exasperated to the highest degree) besieged Parluguese the fort with twenty thousand men; and winged in though they were often bravely repulsed, yet did they perfift in their refolution, in hopes of reducing the place by famine, because the approaching month of May (the first of the winter-feason) did bereave them of all hopes of fuccours. In the mean while the Cingalese did not cease to carry on their works to the very ditch, from whence they annoyed the Portuguese with their arrows, their number making up the defect of their force, which was not comparable to the Portuguese artillery and fire-arms. They also gathered up fix hundred bullets that were shot at them from the fort, of which they made the best use they could.

But what most troubled the Portuguese was, that they were to fetch all their fresh water without the fort, and that they were extremely haraffed with continual watching, However, they hoped to defend the place till the next fummer, in hopes of fuccours, in which they at last found themselves frustrated; Anthonio de Lemos coming only with one galley and fifty landmen to their relief, Seguera with the rest of the forces having

flaid behind.

The Cingalese in the mean time had found means to erect two wooden towers filled with earth, which being placed near the ditch, they intended to make use of to cover their pioneers, whilft they were bufy in filling it up. Britto was not a little flartled at this device, and finding himfelf now reduced to fuch straits, as to be obliged to venture at all, he ordered Anthonio de Lemos to draw as near to the shore as possibly he could, and to endeavour to ruin these towers with his great cannon, whilst he would make a falley with three hundred and fifty men, and attack the enemy with the utmost vigour. This was put in execution accordingly with fuch fuccefs, that the towers

were intirely ruined, and the Cingalese Baldaus. beaten out of their works.

Notwithstanding this defeat, the Cingalefe, encouraged by the Moors, who came to their affiftance with an hundred and fifty horfe, and twenty five elephants, refolved to try their utmost against the Portuguese. These elephants having turrets filled with men armed with cutlashes on both sides, did strike no small terror at first into the Portuguese, but afterwards turned to the disadvantage of the Cingalefe; for these beasts not able to bear the wornds that were given them by the Portuguese artillery, foon turned their backs, and put their own troops into diforder, with a great flaughter among the Cingalese and Moors; who now beginning to despair of success, raised the siege The siege immediately and the king sent his ambaifadors to Britto, to ask pardon for what was past, and to defire a reconciliation.

Thus we fee how the Portuguese have been forced to fettle, or at least to maintain themselves in Ceylon by the sword; and the better to attain their end, it was their confrant practice in the Indies to fow the feeds of divilion among those princes; an instance whereof is given us by Maffaus himfelf,

in his history of the Indies.

The king of Cota had three fifter's fons, who (according to the custom of the country) being his legal heirs, began to be very uneasy at the long life of their uncle, found means to remove him out of the way, and to divide the country betwixt them; but Parea Pandar, the eldeft of the three, having murdered the fecond, Maduyn the youngest began also foon after to conceive a jealoufy at his brother's proceeding, complaining that he was not rewarded according to his deferts, as having been the aduncle. Parea Pandar finding his brother Differences vifer and executer of the murder of their diffatisfied, thought it his fecurest way to brothers. fore-arm himfelf against him, and therefore fomented entered into a treaty with the king of Por- by the Portugal, to fettle the fuccession of the crown tuguese. upon his daughter's fon, (with the exclusion of Maduyn,) directly contrary to the cuftom of that country. Maduyn exasperated to the highest degree at this proceeding, denounced open war against his brother; and after having ravaged the country through which he passed, laid siege to Cota.

The elder brother disdaining to be attacked in his city, man hed out against Maduyn, and pitched his tent in an advantageous post: he had a troop of Portuguese in his camp, one whereof (whether hired thereunto by Maduyn, or by chance, is uncertain) shot him through the head. After his death, the Portiguese set his daughter's son upon the throne with the usual solemnities; but in confideration of his youth, and the

CHAP

Cogalesc

precer to t

Baldæus, weakness of his title, introduced contrary to the custom of the country, they much feared the hatred of the people, backed by the interest of Maduyn; they sent therefore for fuccours to Noronba, who foon after arrived with a good fquadron of fhips and three thousand men, under pretence of affifting the young king, (as Mafficus expresly tells us,) but in effect to make himself mafter of the treasure buried at Columbo, one hundred thousand crowns of which he carried off along with him.

In the mean while Maduyn fortified himfelf with all possible diligence in the city of Ceta-Vaca, nine leagues from Columbo, (according to Maffœus;) but Noronba having with little opposition taken and burnt the faid place, returned victorious to Goa. What further became of Maduyn, is not mentioned by Maffaus, or any other histo-

Thus we have feen the beginning of Columbo under the Portuguese, and its surrender to the Dutch 1656. They found about fix or feven loads of musty rice in the place, fome packs of cinnamon, good flore of Areek, fome good, forne not; twenty four light frigats, nine whereof were funk; one

thousand five hundred guilders ready money coined in the city; thirty three packs of clothes; twenty five bells of metal; fixty brafs, and fixty eight iron pieces of cannon,

one mortar, and fix leffer pieces; ten thou- Baldonia fand cannon bullets of different fizes and weight; fix thousand five hundred pound weight of good gun-powder, and one thoufand one hundred fifty bad; a good quantity of brimftone and intepeter. No foon-er were we in possession of Columbo, but Raja Singa shewed his distatisfaction by the following letter.

"YEsterday and the day before yester-Raja Sinday, it was reported at our court, ga's lane, 66 that there was a treaty on foot with the Portuguese about the furrender of the " city, fince which I have received intelligence, that the fame is brought to effect. " If it be true, you ought to have given " notice thereof to our imperial majefty, " which is the reason, I cannot as yet give 46 entire credit to it: But in cafe it should be fo, I defire to know with all possible fpeed the articles of the faid treaty. Whilst our beloved director-general was alive, I writ to him concerning certain matters he promifed should be perform-

From our imperial court at Reygam-watte, May 11. 1656. Signed,

" ed, which I desire you to remember."

Raja Singa Rajou, Most potent emperor of Ceylon.

CHAP. XLI.

Deserters severely punished. Raja Singa forbids all Commerce with the Hollanders. His Letter of Complaint. Divers Portuguese Ships Raja Singa ravages and plunders the Lands and Subjects be-Linging to the Company.

T was now thought high time to punish fuch as had deferted our fervice during the fiege. Among these Simon Lopes, a Portuguese by birth, who had fifty guilders per month pay in our fervice, and after we were repulfed in the general affault was gone over to the enemy, did lead the van, and was, notwithstanding all the intercesfions of the *Portuguese*, hanged on a gibbet. Two other *Europeans* (whose names we will pass by in silence) underwent the same fate; and another was severely whipped, and forced to fland with a rope about his neck for twelve hours under the gallows.

The next thing to be done was to take care of the transportation of the Portuguese, among whom the ecclefiafticks and inhabitants of Columbo were fent beyond fea to Mr. Laurence Pit our governor, who was to dispatch them further to the isle of St.

Thomas. About that time we received a letter from Raja Singa, wherein he fufficiently testified his diffatisfaction. Walraven Thomas our book-keeper fent word from Montual, that he had fent the corporal Hans Jacob Lambert, ten Mardykers, and a ferjeant to the pass of Nacclegamme, with orders to oppose the forces gathered thereabouts by the diffaves of Ouva, of the four and of the feven Corles; which not agreeing with the fentiments of the general and his council, they ordered the faid corporal to fend back the Mardykers to Montual, and not to ftop the paffage of any of the royal forces, for fear of giving any occafion of offence to the emperor,

Notwithstanding this, we soon found the Raja Sin effects of the diffatisfaction of Paja Singa, who having cut off all means of receiving fupplies by land from the Sabandar, Don

ces; ten thou-Baldens, tent fizes and tundred pound, and one thou-a good quanter. No foon-followby, but

CHAP. XLI.

a yaehti The 22d of March, the yachts the Mars isselfere and Lion came to an anchor in the road of Columbo, aboard one whereof was the vicecommodore Rootbaus, who (upon the receipt of a letter from our head-factor, Mr. Reynier Scrooskerke, intimating that a small yacht laden with provisions, upon the king of Cocbin's account, was gone from thence to Columbo) had left the yachts Fliffingen, Popkensburg, Sea-Coney, the Haddock, and the Roman, with two other vessels on that coast, who were supplied with fresh provifions by the inhabitants of Caylpatnam. The inhabitants thereof being very defirous to renew their commerce with our company, they were then equipping two frigats there.

About the fame time notice was given us, given is that Cannangere Aratchie, a faithful ferainth vant of the company, had (to our great diffatisfaction) submitted to the king of Candy, and that ninety of the Lasearyn deferters had taken the way of Angretotte. These proved the foreruners of many ensuing missfortunes. In the mean while Raja Singa urged stiffly the surrender of Negumbo and Columbo into his hands, under pretence that these places belonged to him, by virtue of an agreement made betwixt him and the late director-general Mr. Gerard Hulst, upon which account he writ the following letter:

UR imperial majesty being very defirous to introduce the Dutch na-" tion into our dominions, Adam Westerwold came on this coast with a squadron of fhips just as we had made our felves masters of Batecalo, when we thought fit to conclude a peace with him; which be-" ing confirmed by oath, was but stenderly observed by some officers afterwards; as for instance, by captain Eurobart Kocks, alias Coque, (who was afterwards killed by a foldier at Puntegale,) and commillary " Peter Kieft, who being tent as plenipotentiaries to our court, did confirm the " before mentioned peace by oath: purfu-" ant to which at their departure for Gale, " they took along with them one of our diffaves, in order to deliver into his "hand, the country of Mature. But at his coming there, they found means to render the fame ineffectual, by finding out certain difficulties, which made the

Vol. III.

faid diffave return to our court, to our Baldaus. great diffatisf ction. It was about that time that our beloved director-general did ome into our kingdom from Holland, with full power to act as he should " find it most suitable to our service, and to the establishment of a firm peace and friendship: pursuant to which, he defired us by word of mouth to bury all paffed mifcarriages in oblivion, promifing at the same time, in the name of the prince of Orange and the East-India company, full fatisfaction for the fame; as also that the fortresses of Negumbo and " Columbo (when taken) should be delivered into the hands of our imperial majesty, and certain Hollanders to be allotted in the faid places for our fer-" vice. It is upon this account that we fent our auxiliaries to affift our dearly-be-" loved Hollanders in the taking of Co-" lumbo; which being taken fince, they are become forgetful of their promife, and do continue to do fo to this day. Your excellency is left at your own liberty to do what you think fit, till notice of this proceeding can be given to the prince of Crange, and the honourable company: but I would have you remember that fuch as do not know God, and keep their word, will one time or other be fensible of the ill consequences thereof: I am sensible I have God " on my fide.

By way of Postscript was writ.

TWO letters have been difpatched from our imperial court. Your excellency has writ in Dutch to George Bloem, but without mentioning any thing relating to our fervice. Your excellency may write fuch frivolous pretences to whom you please, but ought not to impose them upon our imperial majesty; it being in vain to alledge, that the director-general had received his inftructions from Batavia, whereas he brought his full power along with him out of Hol-land. Such finister dealings, as they create no fmall jealoufy, fo I cannot fee with what face you can expect any further credit from us. I have taken care to have " this translated into Dutch, that you may have no reason to plead ignorance. George Bloem shall stay here, till I receive your " answer, when I intend to fend him back " with a letter. No more, &c.

From our imperial Court et Rey-

Baldens. Unto which was annexed the following account, not thought fit to be inferred in the imperial letter.

"HIS day, being the 22d of March, his imperial majesty having sent " for me, ordered the letter writ in Portuguese to be translated into Dutch, to be fent, among others, to your excellen-cy. When I shewed the translation to " his majefly, he told me, That after the arrival of the director-general in Cey-66 lon, he had fent word to him, That 46 feveral rebels sheltered themselves in " and about Columbo, especially one Cafpar Figeiro, who had done confiderable " damage to his majefty's lands; as also " concerning certain prefents fent to his " court by the viceroy of Goa; fome " whereof were fent only by the faid " director-general. His majesty further " defired me to give you to understand, " That it had been agreed not to recede " in the least from the literal tense of the " treaty, especially in what related to " that article concerning any city or place " taken with the affiftance of his majefty's forces; whereas your excellency " had not as much as taken the least care " (fince the taking of Columbo) to fend " to his majesty his rebellious subjects, " nor any of the prefents, except two Per-" fian cats, a ship, &c. delivered by me to his majesty. The not sending of "the rebels has been very ill relished here."

Raja Singa
is angry
with the
Dutch.

Our general took care to fend a most obliging answer to the emperor's letter; which, however, was so far from giving any real fatisfaction to Raja Singa, that, on the contrary, he conceived fuch a hatred against the Dutch, as made him engage with the Portuguese against them. notice having been fent to our council by Anthonio de Motte and Manoel Fonjeque de Moniis, two Portuguese, that they had been follicited by Raja Singa to enter into his fervice, with promifes of vaft rewards, and the full enjoyment of the fame revenues they had been possessed of before in their most flourishing estate, it was ordered that none of the imperial soldiers should be for the future admitted into the city, except fuch as should be fent in the quality of meffengers from the king, or any of his diffaves, to the general and council: thirty two men were also commanded to guard the passes near Caleture. Most of the Portuguese at Columbo, were sent under a convoy of a whole company to Gale; and upon a fcrutiny of the muster-roll, it was found that there were three hundred

men missing from among the Lascaryus of Baldaus, Matule, and many more followed their footsteps from atter.

CHA

The 30th of May, early in the morning, Three Porfour frigats being discovered near the tuguele professione, towards the fide of Galkiffe, we 8 Mis taken. took in our prince's flag, in order to entice them into the road. The commodore, who led the van, perhaps began to suspect the matter; and therefore steered his course to the north; but the other three were no fooner come within the reach of our cannon, but we fent out our fmall vessels to fetch their officers afhore These told us, That they left the bar of Goa the 22d with fix frigats; and that two of them being separated from the rest by a most violent tempest near Coulang, were either lost, or perhaps had faved themselves in some port or other, one of them having been teen without masts. They added, that a Portugueje caravan was come to an anchor in the river of Goa. These fix frigats had aboard fixty eight foldiers, befides good ftore of provisions, ammunition, and all other necessaries, intended for the relief of Columbo, in case the squadron under Francisco de Seixa should miscarry. Their cargo stood us in great stead, considering the fearcity that was among us at that time.

The 1st of June we took another frigat Annes, and a yach; the officers whereof being yaths and likewise brought ashore, told us, That the frigat tacity of Cachin had contributed a good sum kin. of money towards the relief of Columbo. Their letters being opened, contained nothing material, except that they were embroiled with the king of Cochin.

Certain advice was brought to the governor, That the day before, as the beforementioned ships of Cochin were passing along the shore of Galkisse, the imperial diffaves of Matule and Ouva had been feen to give them a fignal with a white cloth, and had taken abundance of pains to get aboard them, offering four hundred Larynes to the fishermen, if they would carry them aboard of one or the other; that they had got ready two boats, but durst not venture through the waves. Confidering the pains the emperor had lately taken to entice away fome of the best officers belonging to the company, and divers outrages committed by the king's Lascaryns in the park of the company; these together, I say, seemed to us the infallible forerunners of the enfuing broils.

For it was not long before Cornelius van der Duyn, deputy-governor of Mature, fent word from thence, that the king's officers and foldiers had forbid all the inhabitants thereabouts to furnish the Hol-

landers

he Lascaryns of Baldens,

Ballams.landers with provisions, or to obey their orders, but to retire into the king's dominions, where they fhould have full liberty to make their excursions into our dominions, as they had done already at Billigam, Mallimande, and Baigam.

CHAP. XLI.

To prevent fuch like outrages for the future, three companies of forty men each were fent out of Gale, two of which were ordered towards Accuras, to protect the inhabitants againft the inroads made by the king's foldiers, in the quiet possession of fuch lands as were granted to the company by the emperor; for by this time we began shrewdly to suspect, that most of the great ones were entered into a conscueracy with the king against us; this appeared by the tergiversations of the Adigar, who passing by the way of Angretotte to Mature, pretended he was come by orders from our general, which was a manifest salshood: some of their proceedings may be seen out of the following letter.

Attepitty Apubamy is come to Mallia manda, from whence he has fent " an Ola, or letter, intimating, that he was come by the king's special order, to " take possession of the country of Mature in his majesty's name, and to enjoin all " the inhabitants, not to supply the Dutch with any provisions, or otherwise. He " further faid, that he had intended to " have been with them before this; but " being now come with full authority, he " exhorts them to obey the emperor's orders, for the honour of his court, and of the diffave of Mature, which if they do, they may affure themselves of all " imaginable favour from the court. The diffave of Saffragamme has fent the diffave of Mature, to affift you upon all occa-" fions."

In Passaum-Corle and Caleture things went at the same rate, where they had taken Cotteneynde, his mother, and brother, Chesides many others,) prisoners, and carried them to the pass of Caleture. Their intentions appear by the following Ola.

" TUdoculle Mandonna Apobami makes known to all the Aratches, Lafcaryus, and the chief Majorals and colonels of Caleture, Macoene, and Barbaryn, That as soon as this Ola comes to their hands, they shall not keep the least correspondence with the Dutch, nor pay any duties to them, from the villages, (formerly granted to them,) or furnish them with labourers to work on their fortifications. Those that shall act contrary to the tenour of this, must

" expect to be feverely punished; where-Baldaus." fore come, and join with me."

Manoel Andrado (who fignaliz'd himfelf before Jafnapanam, of which anon) was likewife advertifed by a letter from his brother-in-law, That the king's forces had wounded a woman and a flave near the pass of Caleture; and that therefore he fhould keep a watchful eye over his Lajzaryns. About Negumbo they play'd the same game, and Raja Singa had made his addresses to Patangatti, the colonel of Coquielle, in hopes by great promises to bring him over to his party. On a certain tree near the church of Guia de Labo, was affixed the following paper:

"THE city of Columbo is now taken; Apper of and was according to agreement fixed to a to be furrendered to his majetly, but "". has not been performed; if any fatal confequences attend this breach of promife, we declare ourselves innocent thereof: but as we are well affured of his majesty's good inclinations towards the Dutch nation, so if you intend to fend any deputies to treat with him, you shall have liberty so to do, and a pass-port for them."

Our general and council finding them-Contents of felves under an absolute necessity of repre-theletter fent to Rafenting to Raja Singa the injustice of his ja Singa. proceedings in a letter, they told him, That these proceedings being directly contrary to their mutual intentions of annoying the Portuguese, and consequently tending both to his majesty and the company's prejudice, they defired that all hostilities might be laid afide, and inflead thereof their former good correspondence be renew'd. They defired Raja Singa to fend his answer, and with it an envoy, or one of his diffaves, unto whom they would deliver the fortress of Negumbo, after the fortifications are demolished. And to leave no room for any further pretences, the general acquainted the emperor, That in case his majesty would let him know what further fatisfaction he required at his hands, he would be ready to comply with his majesty's demands, provided the fame could be done without great prejudice to the company's fervice. But that in case his mainly thought fit to persist in his unjust oppressions of the Dutch, and others under our jurisdiction, he protested and declared, in the presence of God, and to all the world, That he was innocent of all the calamities and effusion of blood that needs must be the confequences of fuch proceedings, which

Baldaus, must oblige us (though much against our will) to have recourfe to fuch means as God had put into our hands for the defence of our subjects. With this letter they fent a faulcon and a sparrow-hawk, with a Perfian faulconer, as a prefent to the em-

Advice was brought at the fame time Ourages from Caleture, That the king's Lascaryns

committed were very troublesome to our subjects, who were forced to leave their habitations for fear of being carried away; and that they had wounded fome, and purfued them to the river-fide; that the two Aratches Cannangere and Pittikeri lay incamped near

Alican, and had furnmoned the country Baldens, thereabouts to join with them within three days; that ten of our Lascaryns, and forty two labourers fent from Caleture to Columbo, were carried away by a party of vagabonds. To prevent the like for the future, and especially to protect our workmen imploy'd in the peeling of the cinnamon, (called Chalias,) two hundred fol-Two hun. diers were ordered to Beniol, under the dred men command of Martin Scholtes, Peter Cham-in against ple, and Joris Hervendonck, who, for their better fecurity, were to be joined by the Lascaryns, under the captain of Gale-

CHAP. XLII.

A Feast appointed. Two Caffers come over to us. escapes from Candy. A Skirmish betwixt the Dutch and Cingalese. Robbers punished. News of the Portuguese Squadron. The Arrival of some Dutch Ships: Their Mistake. A strange Notion among the Indians concerning Columbo's being impregnable. Negumbo taken, and retaken.

T being now a month tince the fur-render of Columbo, a thankfgiving day was appointed, to give thanks to God Almighty for this great fuccefs, and to implore his mercy to blefs our arms for the future. The faid day is kept ever fince on the 12th of May.

Raja Singa did fend an answer to the Raja Singa's an/wer general's letter; but faid scarce any thing
to no purin relation to the matter in hand, declaring only his fatisfaction about the prefent, and defiring that the Persian faulconer might flay with him, which the general (to gratify the emperor) did confent to, at least till such time that the ships should be ready to return to Gamron. However, these civilities did not answer the end for which they were intended; Raja Singa ordering foon after his Lascaryns to take all the Dutch they could light on prisoners, and to cut off the nofes and ears of all the negroes, Cingalefe, Moors, and flaves that ferved the Hollanders; but the two hundred before mentioned foldiers itruck fuch a terror into the king's forces, that they retreated back, and gave liberty at least to a thousand of the inhabitants to return to their houses.

Raja Singa in the mean time continued now as before his hostilities, one of his parties having lately carried away a Duria and two labourers within half a league of Columbo, which obliged us to be continually upon our guard. The Dutch still reliding at Candy being afraid they

fhould be detained there against their will, writ to the general to haften the departure of the Persian faulconer with the hawks, in hopes that thereby the king might be brought into a good humour to let them depart.

About the same time a certain messenger named Chitty Maley, came to Columbo with fome hawks and other prefents for the emperor; fix hawks more with their faulconers were also brought from the coast of Coromandel for the fame purpole.

The 20th of July two Caffers came Two Cafover to us, one whereof having been the fers come king's trumpeter, the other a drummer, over to Min they reported that his majesty continued still in his camp at Reygamwatte, but intended fhortly to break up for Ruanelle, the diffave of Matule having been fent before already to take care of the highways. through which they were to pass. They further told us, That the emperor having granted to divers Portuguese certain goodly villages, this had created ill blood among the courtiers.

Our interpreter George Bloem was forced to continue there till he found means to make his escape in the night-time from our interthe camp of Reygamwatte, by means of a preter tony, or boat, wherewith he got to Mon-from the tual, having deceived his guards, by gi-campoftle ving them a good dose of strong liquors. emperor. Five other Dutchmen, who had deferted our fervice, continued with the king at court.

News

pablians. News was brought at the fame time, that some of the king's forces, having got intelligence that Mr. Rabel, a brave Cingalefe, a native of Mature in our service, was absent from Hakman, with a serjeant and most of the soldiers, having left only a guard of ten Europeans and sisten Lascaguard of ten Europeans and sisten Lascaguard of ten ender of a hundred men, attacked them on a sudden, in hopes to carry the place by surprize, but were notwithstanding so hotly received, that they were glad to retire.

Things began thus to grow worse and worse, without hopes of amendment, because we were frequently bit by our own dogs, I mean the perfidious Cingalese under our jurisdiction, who gave constant intelligence of all our designs, so that we could not send abroad the smallest party but the enemy had before-hand notice thereof; whereas we could never discover the least of their intentions, of which we were sufficiently convinced by divers intercepted letters.

The king's forces having furprized a ferjeant, named Peter Josyon, a native of Dantziek, with fome inhabitants of the country, and four foldiers wives, they carried them before the diffave of the feven Corles, who told them, That they had been long enough in the Dutch fervice, and must refolve now to be his majesty's slaves.

The 2d of August we received a letter from Laurence Haurense, our under-factor at Calettre, that feveral robbers had been feen about Beemboele, who had cut down the fruits of the earth; that Andrado being fent after them with some Lasaryns, had met only with two of them, who refusing obtinately to confess by whom they were fent out to cut down the rice, they had cut off their heads, and set them upon poles near the place where they had spoiled the rice.

The 13th of August being funday, the yacht called the Columbo came into our road, having left Tutecoryn the 11th: the brought letters from the commodore to the general, The Portus intimating, That the enemy's fquadron, puck-faus composed of lifteen frigats, had escaped his small, hands the other falls that the opposite the composite that the composite the composite that the composite the composite that the composite that the composite that the composite that the composite that the composite that the composite that the composite that the composite that the composite that the composite that the composite that the composite that the composite that the composite that the composite that the composite that the composite that the composite that the composite that the composite that the composite that the composite that the composite that the composite that the composite that the composite that the composite that the composite that the composite that the composite that the composite that the composite that the composite that the composite that the composite that the composite that the composite that the composite that the composite that the composite that the composite that the composite that the composite that the composite that the composite that the composite that the composite that the composite that the composite that the composite that the composite that the composite that the composite that the composite that the composite that the composite that the composite that the composite that the composite that the composite that the composite that the composite that the composite that the composite that the composite that the composite that the composite that the composite that the composite that the composite that the composite that the composite that the composite that the composite that the composite that the composite that the composite that the composite that the composite that the composite that the composite that the composite that the composite that the composite that the composite that the composite that the composite that the composite that the composite that the composite that the composite that the composite that the composite that the composite that the composite that the tunity of the night, and the advantage of the flats betwixt the ifles; that they were purfued by our thips as far as Pambanaar, which could not come up with them by reason of the sands. He further told him, That fuspecting the Teuver or governor of the country to have been corrupted with money, and to have given them a free paf-fage betwixt Manaar and Jafnapatnam, (which he commands by either laying in, or removing certain flones from the entrance thereof,) he had been obliged to return to Tutecoryn.

Voi III

We had at the same time advice of the Baldieus, arrival of our ships, the Amsterdam, the Avenborn, Sapbir, Haddock, Workum, Pelican, Patience, and Black Bull, upon the coast of Goromandel: but it was no small mortification unto us, that the Saphir (con-overfight trary to the general of Ceylon's orders) of the ship had left the prisoners and Portuguese foldiers (who, according to the articles of furrender, were to have been carried to Batavia) ashore near Negapatnam; and that the had not touched in the fouthern harbours, where there was a confiderable cargo of clothes and other commodities ready, which could not be disposed of otherwise: and by the first oversight, the enemy had been reinforced with eighty brave foldiers, contrary to the intention of the agreement.

We had at the fame time letters from the factor Adrian van Newland, dated in the Danish fort called Tranguebare, whereby we understood that the before-mentioned Portuguesh frigats were passed through the Streights (by the affishance of the governor) to Jasnapanam, from whence Anthony Amiral de Meneses (afterwards killed by one of our cannon-balls near Manaar) had sent his forces in boats to Negapanam, in order to gather a body (at the request of Raja Singa) in those parts, which, as the case then slood, might have proved very dangerous to us, had not God through his mercy prevented their designs.

During all these troubles, our general kept a watchful eye upon the enemy's motions, and ordered Mr. John van der Laan with three hundred men to sour the country: these differences continued for a confiderable time, viz. to the year 166z. and though some glimpses of peace appeared at certain intervals, yet is it certain that Raja Singa is not reconciled to us to this day, and perhaps never will whilst he lives.

We have hither to treated of Columbo; we now will pass the river at Montual, and take our course higher up to Negumbo. But before we come thither, I cannot forbear to fay a word or two concerning the general opinion of the Indians, viz. That opinion Columbo was impregnable. Hence it was concerning that the Portuguese boasted in all places, the french of Columb that the king of Portugal, and viceroy of bo. Goa, would never fuffer fo strong a fortress to fall into the hands of the hereticks, especially after we were repulsed in the first general affault. I happened to be then at Macassar, where the Portuguese father, and fome missionaries lately come from China, used to make this siege their sport; and one Francisco Vieiro, one of the richest merchants in the Indies, offered to lay vast wagers that it was not taken by the Hollanders.

8 5

The

Baldaus. The king of Celebes and Macaffar (the capital city of that ifle) had the same opinion concerning the strength of Columbo, he and most of his courtiers being much inclined to the Poringuese side. But within three months, just at my return to Batavia (after the conclusion of the peace betwist us and the king of Macaffar) we had the news of the furrender of Columbo brought to Batavia by Peter Bitter, to the general fatisfaction of the people.

But after this digression it is time to come to Negumbo; which lies about two leagues and a half, or five good hours walking, along the banks of the river to the north. I am not able to tell you the exact time of its beginning, the Portuguese historians being filent as to this point, being no more than a fort built for the conveniency of protecting the country,

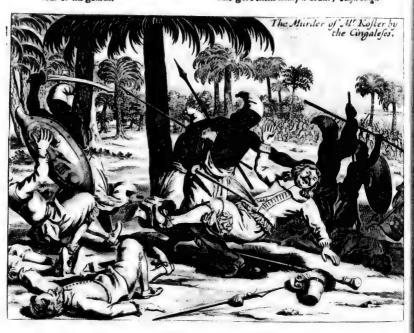

which abounds in cinnamon.

I told you before how Adam Wester-wold made himself master of Batecalo; after which Anthony Caan took, 1639. the fort of Trinquenemale, the most spacious harbour on the east side of Ceylon. Philip Lucas, the Dutch director-general in the Indies, took Negumbo the first time, Feb. 9. 1640, and foon after (as has been told before, viz. March 13. following) our commodore William-Jacob Kofter took Gale by florm; but was afterwards treacheroufly murdered by fome of Raja's people, with four of his guards.

For the faid Mr. Koffer coming to Baldans, Candy in person, was detained there with wain promises, without the least probabi- Ar. Koster vain promises, without the least probabi- Ar. Koster vain promises. lity of fuccess, till growing impatient, reache-he began to utter threats and very harsh dired. words (a great piece of imprudence) against some of the great ones at court; which coming to Raja's ears, he was difmiffed without the usual marks of honour, and conducted towards Batecale, but murdered by the way by the Cingalese, his conducters. This was the reward bestowed by Raja upon Koster, who had reduced Trinquenemale, Gale, and Mature, with all the countries thereunto belonging, to his

Certain it is, had Raja been fincere, we might with his affiftance eafily have made ourselves masters at that juncture of Columbo, when all their regular forces being fent to the relief of Gale, there were but a few old foldiers, priefts, and citizens left for the defence of the place. But Raja thought it better to play the trimmer betwixt two European nations, than to be in danger of being conquered by one, and for thought it his best way to give opportunity to the Portuguese to recover a little breath,

For the Portuguese having received a strong reinforcement from Goa, found means to regain the fort of Negumbo; which done, they fat down before Gale, but were bravely entertained by John Thyffen, who gave them many a brush; Raja Singa

to Goa, enterted into a treaty with the
Portuguese viceroy, John de Silva Telles de
Meneses, earl of Aveiras, concerning the
limits betwixt both nations in the life of
Ceylon; which being brought to a conclusion 1645, the said Mr. Masizuyker remained in those parts in the quality of
governor of Puntegale.

CHAP. XLIII.

Raja Singa treats underhand with the Portuguese: His Tame Elephants detained. Raja declares against the Portuguese. The Dutch lose Angretotte. Both the Portuguese and Dutch are reinforced. Engagement near Tiboene. Caleture deserted. Portuguese worsted both by Sea and Land. Manaar taken.

Raja fides meh the Portugotie,

R AJA Singa, at the instigation of the Portuguese, being grown very jealous of the Dutch being in pollellon of the feven Corles, connived at the obberies that were committed in those parts by his people, which at last obliged Mr. John Thyssen to proclaim open war against them; and accordingly Nicholas Jacobson Overschie, governor of Negumbo, and overseer of the Dutch !imits (who died afterwards at Voorburgh) caused all the king's tame elephants to be felzed; which so exasperated his majesty, that he drew all his forces together, and entered the feven Corles, where our people had the worst of it, because they sur-rendered without being reduced to the utmost extremity. However, after the return of Mr. Maatzuyker, Negumbo, Gale-Corle, and Mature, with the countries thereunto belonging, were foon fecured against all further attempts; the cinnamon was ga-thered and peeled as before, the wild elephants tamed, and every thing elfe fettled Roja Singa himself was appeased, who re-treated with his forces, though without doing any harm to the Portugues; an infallible figh that there was no ill understanding betwirt them.

Matters thus continued till 1649. when Mr. Maatziyker redeemed all our prifoners; and by a meffenger, fent with some presents, brought matters to an honourable composition. In the beginning of the year 1650, Mr. Rampot left Gale and Matter, to the great distatisfaction of Raja

Singa, who, however, was so far from breaking with us upon that account, that when we entered into a war with the Portuguese, 1652. Raja declared against them, laying hold of the opportunity that presented it self, by a late munity among the Portu-Matiny as guese soldiers, and chief inhabitants of Co-Columbe limbo, raised against Manvel Mascarenbas against Homem their governor, whom they had various taken into custody.

These mutineers having gathered what forces they were able near Columbo marched on a fudden with eight hundred European foldiers and as many negroes towards our fort of Angretotte, which they obliged Angretotte to a furrender the 8th of January 1653, lef by after a flege of eleven days, in which they the Dutch. lost a considerable number of men, ninety eight Germans, twenty four Javanese, and a greater number of Lascaryns were made prisoners of war, under condition that they hould be dismissed for a reasonable ransom. The fame afternoon a body of three hundred men were fent to their relief, who happened to come too late; though as the cafe flood, their endeavours would have proved in vain, confidering the enemy was twice as ftrong and advantageoufly posted; and we had not come off at fo cheap a rate, had not Raja Singa given the enemy a strong diversion near Cottegore, whereabouts they attacked the pass near Columbo with Rajamakee fuch vigour, that the governor and deputy-a diversion gover or were glad to fend for their forces from Reygam and Pajdum-Corle to oppose the Dutch. the imperialifts. These were no fooner re-

treated

Baldens, treated, but the Portuguese attacked our outguards near Negumbo, and poffeffed themselves of the four and seven Corles. but Raja Singa rallying his forces, marched from Ouva to Saffragamme (the capital city of the five Corles) the Portuguese diffave was glad to retreat with his forces to Gurbeville, and thereby gave us opportunity to join our forces, and fecure the countries of Gale and Mature.

In the mean while, viz. the 10th of remforced. May, the Portuguese in Columbo received a reinforcement of twelve frigats, with a good number of officers and foldiers from Goa, under the command of Francisco de Melo de Castro; our cruizers being scarce two days before (to our great misfortune) forced to retreat from their stations by threfs of weather into the harbour of Gale. Notwithstanding which they made no confiderable attempt against us, being contented to fecure only their workmen employed in peeling of the cinnamon, and other inhabitants of the country, against our

> Raja Singa finding that in 1653. in September, the Portuguese had received a fresh supply from Tutecoryn, whereas our four thips did not bring one fingle foldier to relieve the rest; that our governor Jacob van Kittenstein had obtained leave to depart; and that when commissary Ryklof van Goens touched with his four ships towards the latter end of October in Ceylon, in his way to Perfia and Suratte, without bringing us the least succours, he retreated with his half-starved tattered troops from Caravanella, through the feven and four Corles to

Candy, to refresh themselves.

The Portuguese finding themselves secure on that fide, did appear with all the forces they could bring into the field before Columbo, in hopes of drawing our forces out of the fort; but finding themselves frustrated in their hopes, they retreated in the beginning of 1654. towards Reygam and Pajdum-Corle, whence they fent frequent parties to take away our cattle, and to spoil the fruits of the earth. But major John van der Laan was always at hand with a good body to observe them.

The 20th of March our governor, Adrian van der Meyden, marched from Gale to Caleture; and being joined there the 23d by all his forces, he followed the Portuguese through Berberin, Dodangodde, and Tiboene, where he attacked them the 26th in the morning, in their advantageous post: An engage. The engagement was very fierce for a whole hour; when our forces feigned a retreat, in hopes to draw the enemy from his post: but they were too wife to follow us; they had more men flain on their fide than we.

After our forces had refreshed themselves a Baldaus, little while at Tiboen, we marched to Caleture, and the enemy retreated out of our dominions crofs the river to Columbo.

Soon after five galeons, with one thousand Five Por-Portuguese landmen aboard them, arriv-tuquese ing upon our coast, engaged three of gallies enour yachts called the Greybound, the Datch Rhinoceros, and Dromedary, and purfued reffeis. them to the flats of Negumbo, but took none of them, our veffels retiring under the cannon there, and the Portugueje to Columbo, having loft their captain-major and many others in this engage-

A council being called to confult what to do in this emergency, it was refolved to leave Caleture, and to employ our whole force in the defence of Negumbo, without which we were not in a condition to maintain that fortrefs, which was of the greatest confiquence to us. Accordingly Negumbo being well provided with what forces we were able to buther, the enemy (whose forces were confiderably encreased by the late reinforcements) marched from Galkiffe to Caliture, and thence to Alicaon, where they pitched their tents: to oppose which we brought into the field about two hunrded Europeans, eighty Javanese, and a good number of Lascaryns, wherewith we made a fhift to defend our country as well as we could.

About this time commissary Van Goens, Van Goens in return from Persia and Suratte to Cey-beats the lon, had the good fortune to beat the gallens. galeons near the cape du Ramos, and thereby to release twenty of our people made prisoners at Angretotte, who were fer ashore at Puntegale. This was the reason that the Portuguese could not spare many men for the use of their frigats, having fustained a confiderable loss of them in the late engagement with Mr. Van Goens near Achiera; neither were they so active in the field till the ensuing July, when we having received some reinforcements, appointed our rendezvous at Bentotte in fight of the enemy, having only a river betwixt us and them. We killed the Portuguese about thirty Europeans in divers skirmishes, and took from them divers boats; which made them not fo eager afterwards to attack our countries, in order to fpoil our cinnamon and Areek harvest, and the taking of elephants, wherein confifts the chief revenue of this ifle, belonging to the company.

The 13th of September, the yachts the some fur-Turtle-Dove, the Red-Lyon and the Had-brought to dock, arrived with fresh supplies and fifty the Dutch. foldiers. The fourth of December the yacht

Raldieus, the Kanien brought was pply of fifty four foldiers more; befides foldiers more; befides h, one hundred fifty nine feamen we. he out of four thips, (come with the weether Henry van Gent into Gale, to provide the nfelves with fresh water;) all which be joined with our forces, encamped at Bentotte. We embarked the 16th of December all our forces, fix hundred ninety ftrong, (including; officers) composed of feamen, land-folders, Javaneses, and Cingaleses, in twen-Dutch ty Catapaneels, or land-boats, and thus passed the river Alicaon,

But fcarce had we reached the opposite bank of the river, but we met with fo warm a reception from three hundred chofen Portuguese, and some Topasses and Cingalefe, that most of our Indian forces betook themselves to their heels: but being rallied again upon the bank of the river, returned to the charge; and being bravely feconded by the reft, forced the enemy to retreat, leaving one of their cannon of one thousand pounds weight behind them, fixty Paraguese flain, and many more wounded. They behaved themselves bravely; but were forced after this defeat to retire by the way

of Malvane to Columbo.

The Portuguese finding us not ready to attack Caleture, (after they had given the usual pay to the foldiers,) they broke up in the beginning of 1655, and furprised Raja's forces, under the command of the diffave of the four Corles; and being reinforced by some other forces from Jasnapatnam and Manaar, befides a good number of Lascaryns, they pursued the disfave of the feven Corles as far as to the straits of Candy, plundring all the country through which they paffed; which so exasperated the king, that he ordered all his forces to appear in the field; but his van being routed in April near Attapitin by Caspar Figeiro, the king quitted the field full of diffatisfaction.

It happened, to our good fortune, that the new governor and Portuguese admiral, Anthonio de Souza Coutinbo, (under wholegovernment Columbo was loft) coming with eight frigats and five hundred landmen into these parts, was the 18th of May forced towards the coast of Gale: we sent out two yachts, viz. the Lion and Kanien, who, coming up with them, took two, with all the men and provisions, and forced three or more four ashore; so that two or three of them got safe to Columbo; and Continhohimfelt wasforced to take his course round the point das Pedra to Jafnapatnam and Manaar; from whence he came with a good troop by the

visited with Anthonio Mendes d'Arangie the Baldaus. fort of Calesure, where he left a garifon of three hundred Europeans, and a good number of negroes; but refolved to keep Caspar Figeiro near his person.

By that time the director-general Gerard Hulft came in company of Mr. John van der Laan (a person well versed in the affairs of Ceylon) into those parts. About the middle of September three yachts were dispatched from cape Comoryn, in order to observe the frigats sent from Columbo to Tutecoryn for provisions, and either to take them, or to block them up betwixt the islands. It was also resolved to force the Portuguese to quit Caleture, whilst the enemy were yet under apprehension of the strength of the forces come along with the director-general, and lately landed at Negumbo; from whence he intended to give the enemy a visit on the other side of the river at Montual.

However, the Portuguese squadron, confifting of twenty frigats and some barks, loaden with all forts of necessaries at Jafnapatnam, and fome other places on the Indian coast, made shift to pass by with full fails within fight of Negumbo (where our ships lay at anchor) and to our signal regret got into Columbo. Mr. Hulft received at the fame time advice, by a fmall ad- Ano vice-boat, that a new viceroy was arrived vicero at Goa with three galeons, one yacht, and Goa with a good number of landmen. A council forme gabeing called, it was thought convenient leans to try whether these galeons might not be furprised near Marmagon, or Agoada, (two castles in the bay of Goa.) At the same time Mr. Hulft came with four ships and a good number of foldiers before Berberyn; where having landed and joined his forces with the rest the 28th of September, he foon after made himself master of Caleture, an account whereof has been given be-

But it is time to leave Negumbo, provided with a good garifon, (first by major John van der Laan, and afterwards by the head-factor Edward Hauw,) and to go towards Manaar. In the year 1661. I undertook a journey over land from Jaf-Diffance napatnam to Columbo, forty nine or fifty Jafnapatleagues distant from one another; which I nam accomplished in seven days.

From Negumbo you travel by the way of Cajuel to the river Chilauw, and fo through the countries of Madampe and Putelaon, leaving the ifle of Calpentyn to the left; then through Aripou (where the christians have a church) to Manaar; thence way of Putelaon, Calpentyn, and the feven to Wannias, the church of Mantotte, and Corles, in August to Columbo; where he was no fooner established in his dignity, but he after. We made this observation in this

The Por-

Baldeus, journey, that no cinnamon grows, except on the other side of the river Chilauw, Goodness of and beyond Jasnapainam. For the rest, all these before-mentioned countries have

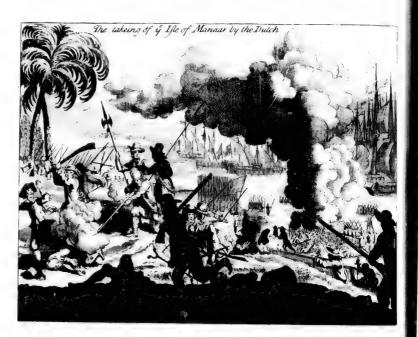

a very fruitful foil, (except Calpentyn, which is fomewhat barren,) especially about Madampe, but are destitute of inhabitants; the bufflers feeding here in vaft herds; which makes me believe, that it would afford plenty of every thing, were

it well cultivated.

We will now proceed to give you some account of the ifle of Manaar, which formerly adhered to the continent, as fufficiently appears by the fand-bank, called Adam's-Bridge. Next unto this lies the isle of Rammanakoyel, where is to be feen a rich and famous Pagode, belonging to the Teuver, or governor, who has a fort on the continent. At certain feafons there

is a paffage with small boats through some Baldens, depths of this Adam's Bridge, one whereof I had once occasion to pass myself.

The faid ifle was reduced by the Hel-Theight of landers, 1658, in the following marner, Manage 14. by Mr. Ryklof van Goens. The Portu-Dutch. guefes had made entrenchments all along the shore; which were defended by one thousand chosen men, and twelve frigats, to hinder the approach of our boats. Our great ships were ordered to advance as near as they could ; under favour of which, our boats landed the men. Serjeant Heny van Wel (fince a lieutenant) was the first who set toot on shore; and being bravely followed by the reft, were as couragiously received by the Portuguese, who did all that men could do to fecond their comrades: but our cannon from the ships, together with our small arms, made such

a havock among them, that they were forced to quit their entrenchments. Here it was that Antonio Amiral de Meneses, the Portuguese general, lost his life by a cannon-bullet, and Anthonio Mendes d'Arangie, a famous foldier, was mortally wounded, with many other brave officers.

On our fide we lost an enfign; and before our landing, (when the long-boat of

the ship Naarden was taken,) the brave lieutenant Block, which we returned them with full measure; all their frigats, as they passed by our squadron, being either funk or taken, with a great flaughter of their men. Major John van der Laan, (though he had a heavy fall before our landing, being a very large and fat person) did nevertheless behave himself upon this occation

CHAP. XLIII.

Portuguese After this defeat, the Portuguese not leave the thinking themselves secure in the fort Manaar, retired over the water to Jafnapatnam, leaving only Andrew Villoja with a very moderate force in the castle of St. George. They would not have escaped our hands at fo cheap a rate, had we not been stopped by the great rains and tempests.

The 22d Andrew Villofa, being deferted St. George The 22d Anarew villoga, being detered farmed villoy most of his men, was obliged to surrender the castle of St. George upon reasonable terms. We took about two hundred prifoners, both Europeans and negroes, and among them a Caffer, (or African negro,) who pretending to be a captain, was to flubborn, that he would not take up his arms, or arise from the ground, (as he was commanded to do,) without a good

The 24th of February I preached the thankigiving-fermon in the great church upon the text of 1 Sam. vii. 7. for the most fortunate reduction of this isle, whereof our general might fay with Cæfar, Veni, vidi, vici, being beyond all question one

of the greatest actions that ever happened Baldaus. betwixt us and the Portuguese in the Indies, confidering we were forced to attack the enemy's forces, composed of veteran European foldiers, and to chase them from their advantageous posts; and that only with eight hundred men, and confequently with the utmost hazard; being resolved either to overcome or die in the attempt, because we had quite drained the garrison of Columbo, leaving only a few, and those infirm persons, to guard that place, because we expected hourly the arrival of the fhip the Salamander, with fome hundreds of foldiers, and good store of ammunition and provision, having aboard the commodore Peter de Bitter, the factor Edward Ooms, and captain Peter Wasch. The fame having been detained by calms and tempefts for near fix months, and endured great hardships about the Maldive islands, The Salaarrived at last safely at Columbo ; but was mander foon after ordered by the governor, Adrian fupply of van der Meyden, to fail to Manaar; where Me the came to an anchor immediately after provisions; we had made ourselves masters of that isle, and were just then preparing to march to-wards Jafnapatnam. But before we leave Manaar, we must add something concern-

CHAP. XLIV.

A Description of Manaar. How the Christian Religion was planted, and might be further promoted there. A Description of the Country of the Wannias. Our March towards Jafnapatnam: We pass the River, rout the Portuguese, and take the Water-Fort.

MANAAR derives its name from tane, Ballaney, &c. they fpeak only Cin-the Malabar language, from the galefe. word Man, i. e. Sand, and Aar, a river, fignifying as much as a Sand-River, it being observable, that both the Cin-The Cinga-galese 1/2 Malabar languages are spoken in the 11le of Ceylon. The first is used beyond Negumbo, viz. at Columbo, Caleture, Berberyn, Alican, Gale, Belligame, Ma-"Ceylon, ture, Dondere, &c. But in all the other parts of this ifle opposite to the coast of Goromandel, and all along the bay, they fpeak the Malabar tongue; whence it feems very probable, that that tract of land (as the inhabitants of Jafnapatnam themselves believe) was first of all peopled by those of Coromandel, who brought their language along with them; it being certain, that in the inland countries, about Candy, Vin-

ing the true condition of this island.

The ifle of Manaar is fituate at nine Signation of degrees of northern latitude, its length be-Manaar. ing about two and a half German leagues, and one broad, including the falt-water river, (as you will fee in the map,) which reaches as far as the great church called Carcel. The castle is seated upon a canal able to bear fmall yachts, which draw three, four, or five foot water, and can go from thence to Jafnapatnam. This castle was strengthened with some additional fortifications, and furrounded with a deep ditch, after we had taken it from the Portuguese. The whole ifle has no Its shurshes more than feven churches, unto each whereof belong divers confiderable vil-

lages : the first is the City Church, next

Baldeus, that called Tottavaly, then Carcel, Erke- upt to confound; than to instruct them; for Baldeus V lampatti, St. Peter's church belonging to the fishermen, Peixale, and the last Tellemanaar, lying at the furthermost, and near the fea-fide.

Pearl-

This island was formerly celebrated for the pearl-fishery, as well as the city of Tutecoryn; but no pearls having been taken there for these ten years last past, the inhabitants are reduced to great poverty; whereas the fumptuous edifices, churches, and monasteries, with their ornaments, are fufficient demonstrations of its former grandeur.

In the year 1666, (after my departure,) our company ordered the first time the pearl-fifthery (or its removed again, with no ill fuccess; and access to a reveral letters they took a I have received it as the same confiderable quantity of pearls the fecond

time, in the year 1669.

The inhabitants of Manaar speak (be-The inha bitants of fides the Malabar) most generally Portu-Manaar guese, being long ago converted to the Portuchristian faith; for which reason they have guele.
Perfecution fuffered most cruel persecutions from the kings of Jafnapatnam, who baptized many of the new converted christians with m Manaar, blood, after they had received the baptism

with water. Many of them fled for this reason to Goa by land, being above a hundred leagues, and among them a young gentleman of royal extraction, who em-

braced christianity there.

It was Franciscus Xaverius who converted the inhabitants here, as well as those on the cape Comoryn, and the Paruas, as we have told you before in the description of the Indian coast, and in the account of his life. The faid Xaverius established among them certain teachers, called Canacappeis, who were to instruct the inhabitants in the first rudiments of the christian religion, as the ten commandments, the creed, our father, &c. which they did with indefatigable care and industry. These were succeeded by the jesuits, (called Paulites here, because they were fent into the Indies by pope Paul III.) who in their way of teaching both the old and young ones, did far exceed the Franciscans, and all other orders among the Romanists. And I am very free to confess, that I have frequently followed their footsteps in reforming the churches and schools in Manaar and Jafnapatnam, as far as they were confiftent with our religion, and confonant to

What me the genius of these nations; it being abthod is most foliately necessary that he who undertakes proper for this task, should be well acquainted with fion of rhefe the method to be used among these people in the infancy of their conversion, intricate questions and mysteries being more which reason it is most proper to teach them the naked truth of the gospel in as few points as possibly can be done, (the youth being very apt to retain here what they have been told,) to catechile frequently the young-ones in the prefence of their parents, thereby to excite in them a laudable emulation to follow their footfleps. St. Paul himself leads us the way, when he fays, That you must first lay the foundation of the doctrine of Christ, before you can raise the edifice of the church,

It is also absolutely requisite that the fame catechism that has been at first introduced among the native christians, should be retained without any alteration; which, as it would over-charge their memory, fo it would breed nothing but confusion inflead of profit. It was for this reason, The catter that when by order, from the fupreme ma-chifm ones giftrates, the reformation of these chur-miroduced ches was committed to my care, I reduced among the the chief points of the christian doctrine must not be into questions and answers, which were af-altered, terwards introduced into the churches of Jafnapatnam, Manaar, Gale, Columbo, Negumbo, and Mature, and received by the fucceeding ministers, by special command from the general and council of the Indies, and the governor of these places; and were afterwards confirmed by the general affembly of the clergy of Ceylon held at Columbo, 1659. from the 24th of February, till the 3d of March.

They had had enough of the mischiefs that enfued upon these alterations, introduced by new ministers into the ifle of Formofa, who instead of following the footsteps of Robert Junius and George Candius, (ministers of the gospel there,) would introduce certain novelties. I found it also absolutely necessary to have these questions and answers put not only in the Portuguese, but also in the Malabar tongue, feveral copies whereof were fent to our brethren at Columbo, Gale, and Negapatnam.

It is beyond all dispute that the Low Dutch tongue is not fo proper to propagate our religion here as the Malabar and Portuguese; and consequently, that the ministers of the gospel sent into those parts should rather apply themselves to these languages, than to impose their own upon the new converts, which always meets with great difficulty, and cannot be introduced without vast trouble and charges: besides, that it is much more reasonable one man should accommodate himself to many, than these to one man. It is furthermore requifite, that as the ministers ought to pay all due respect to the magistraces, so these should treat them with all imagin ble

Raldous. civility and honour, to acquire them the ~ more authority among the natives.

The ifle of Manaar abounds in fish to fuch a degree, that the inhabitants here (as well as at Negumbo) dry, and fend them into other parts in vast quantities. They

A median have here a peculiar fish (properly a fea-bad of fish calf) of an amphibious nature; the females have breafts, and give fuck; and the flesh, when well-boiled, tastes not unlike our sturgeon, and might easily be mittaken for veal.

But it is time we pass the river of Ma-

naar towards Mantotte. This river is not very deep, nay, on that fide where you come to it over the canal near the caftle, it is fo shallow, that you may wade through it with ease, the water scarce coming up to your knees, though it is fo broad, that it will take up half an hour before you can pass it. The country on the other The country fice is called the country of the Wannias. of the Wan- under the jurisdiction of our company; their churches make up, together with those of Manaar, no less than fourteen, and are under the inspection of the minister who refides in the ifle of Manaar, and duly visits them once a month, country, though it acknowledges the jurisdiction of our company, pays the usual taxes, surnishes them with elephants, &c. yet must they be mildly treated, it being their general maxims to disoblige neither Raja Singa, nor the company.

In the year 1658, in the beginning of March, (after the taking of Manaar, and providing it with a good garrison,) we marched into that country towards Jafnapatnam. Mantotte begins to the north of the falt-river, near the village of Peringaly, extending to the fouth along the feashore, as far as the river Aripouture, where Mousilipatte begins, near the village of Arigou, extending further fouthward to the mountains of Condremale, which face the bay, opposite to the isle of Calpentyn, and crois the country Mantotte, stretching to Settecoulang, fix villages whereof belong to Manaar, fix to Jafnapatnam, and five

The rest of Mantotte and Moufilipatte extends to the east to the great forest, (the boundary of the country on that fide.) Mantette itself has fixty four villages, Moufilipatte twenty four, and that part of Settecoulang fix, amounting in all to eighty All these countries are very fertile, especially in rice, which produces a hundred-fold crop; but the worft is, the elephants do great mischief in those parts

observes in the life of Xaverius, viz. that on the cape Comoryn, and all along that the fruit.

that are not very populous.
It is very remarkable what John de Lucena

tract of the East-Indies, whilst it is sum-Baldans, mer and dry feafon on the west-side of the cape, the winter and rainy feason appears Winter and on the opposite side. The same is to be sate in diobserved in the isse of Coylon, for whilst very part.

the winter continues about Jafnapatnam, of Ceylon. the Wannias and Manaar, during the months of October, November, and December, it is fummer in all the other parts. On the contrary, in the months of April and May, whilit it is summer about Jasnapatnam, which continues fix or feven months, it is winter and rainy weather at Columbo, Gale, and the countries thereabouts. In the low-lands, remote from the mountanous part of Coylon, there blow only two winds, but about Columbo, Gale, and fome other places, you have duly a day and night wind, as upon the coast of Coromandel. From April till October the wind blows constantly a brisk gale from the fouth, with a clear air and bright funshine; as does the north wind from November till April. In January, February, and March, it is generally very calm, with intolerable heat; but a dew falls in the night; which being very unwholesome, the inhabitants return with fun-fet into their houses: and were it not for these dews, and the ftrong winds which cool the air, the heat would be unsupportable here.

As we marched through the country of Our march Wannias, we kept a most exact discipline from Maand as we had no great plenty of provi-Jamapate fions, we allowed only a fmall measure of nam, rice every day to each foldier, rather than incommode the inhabitants; and finding our forces to be extremely tired by long marches, and confequently uncapable of engaging with the same advantage with the enemy, in case they should be attacked, it was resolved instead of marching up to

the head of the river through the fandy

ground, to pass the river in boats, though

it would require near an hour and a half for every boat to pass it.

The worst was, that upon our arrival Passage on the other fide of the river, we expected over the enemy ready to give us a warm receptwo hundred, or at most three hundred men at once over the river, and that the bank was very muddy; for I remember that fome years after two elephants paffing over to the Jafnapatnam fide, one of them fluck in the mud, and was killed by the inhabitants, nothing being more common than for the elephants to come cross the river to feed upon the fruits of the palmtrees, to come at which they trample the roots of the trees fo long with their feet till they loofen, and afterwards throw them down with their bodies, and fo ear

CHAP. XLIV.

Baldaus. However the first troop of our forces got over without any opposition; and no sooner had put themselves in order of battle, but received intelligence that the enemy were retreated from thence the day before, in order to expect us at the head spring of

the river.

After we had transported all our forces over the river, the inhabitants treated us very civilly, and furnished us with plenty of provisions and fruits. The first place we came to was the chief church of the province of Tenmarache, called Chavagatzari; where after we had refreshed ourselves with a good dinner, we marched forward the same day with two field-pieces to Navacouli, (two hours from Jasnapatnam,) where we encamped that night.

The next day (after morning-prayer) we marched on to the river, where we expected to meet with a vigorous opposition; but finding no refistance, we advanced by degrees towards the castle near the church of Sundecouli, where in the evening we had A skirmish a smart skirmish with the Portuguese, of

with the Portuguese whom we killed many upon the spot, and posted ourselves that night round about the before-mentioned church.

The next following day we advanced to

the city; which being without any forti-Baldaus, fications, we broke through the wall and houses; and pursuing the enemy from street. The stry of to street, under the suvour of our cannon, nam taken, which opened us the way, we advanced to-wards the castle. The 9th of March we made ourselves masters of the jesuits church and college at the west-end of the city, and the 18th following of the church and monastery of the Dominicans on the east-side: which made us give publick thanks to God Almighty for his blessings, the text being the 7th verse of the 20th Plaim.

The enemy being thus forced to quit their houses, had no other way left than to retreat to the castle, which they did in great diforder, many of the inhabitants of the country thronging in among the *Portuguese*; to that the castle was so crowded with people that they had not room enough to dispose them to any advantage.

But the better to straiten the cassle of Jasupasham, and take away from the garrison all hopes of relief, it was thought necessiary to attack a certain out-work, or redoubt, built upon a small isle in the middle of the river, not far from insentrance, which it commands. This fort was built by Anthonio Amiral de Meneses, and may justly

The fors Cays/ummoned to furrer-der

Baldaus be called the key of Jafnapatnam; and if Iuch another were made on the point of Calmon, no veffel could approach the castle without leave.

Accordingly we detached a good body of men to the ifle of Ourature, in order to attack the faid fort, in which at that time commanded one Hieronimo de Paiva with a good garrison. The isle of Ourature (where formerly the Portuguese had a cattle, the ruins of which are yet to be feen) lying at fome distance from this water-fort, we

were forced to raife our batteries against it Baldous. upon the ifle of Caradiva; but finding that by reason of the distance betweet us and them, and the strength of the wall, we could make no breach in it, it was refolved to affault the place by the help of certain veffels provided with breaft-works and cannon. But before we thought fit to venture at so desperate an attempt, it was resolved to fend the following summons to the commander of the fort.

T having pleafed Almighty God to bless our arms with such success, that funesder. " there is no possibility left for you to refift us, or defend yourfelf against our " attacks: it is therefore that we have thought fit to let you know (...s is usual upon fuch occasions) that we are come " to fummon the fort of Cays, in the name " of the states-general of the United Pro-" vinces, of the governors of the East-" India company, and his excellency John " Maatzuyker governor-general, and the " council of the Indies ; as by these pre-" fents I fummon the faid fort, not quef-tioning but that after you have given " fufficient proofs of your courage, you

will now confider how unable ou are to relift our force. Do not there-fore obstinately result God's will, and our strength, since we offer you such conditions as are generally allowed to brave foldiers. But in case you will be obstinate in making trial of our strength, we protest before God and the christian world, that we are innocent of all the fatal confequences and miferies that are likely to befal you; being refolved on our fide, (if God grants us victory,) to treat you after the feverest manner, according to the cultom of war, and not to hearken to any conditions. You " have given fufficient proofs of your

Baldaus. 66 courage to admiration; it is time there-" fore you should now act with prudence, and confult your fafety. We expect your positive answer within three hours by the bearer of this, or whom your ex-66 cellency shall think fit to fend to us, " who shall return fafely upon our word 44 and honour : fubscribing my self (as you think fit) either your friend or enemy."

From the camp,

The admiral and general of the Dutch forces, both by fea and land.

This letter being translated into Portuguese, was fent into the fort; the commander whereof remembring the old verse,

Fistula dulce canit, volucrem dum decipit auceps,

fent the following answer.

The answer of THAT the fort belonging to nobothereupon. ... THAT the fort belonging to nobothereupon. ... " his mafter, he was obliged to maintain the fame for his majesty till the last of drop of his blood. That he could do 66 no more than what pleafed God to per-

" mit him; but neither he nor his men " were to be terrified by threats.

This bold answer made us think of no-Baldaus thing else but force; so that we were preparing every thing for an affault; which would have cost us many a brave fellow, had not the want of fresh water in the fort obliged them to come to a capitulation. For having no other fresh water in the fort, but what was preferved in a large wooden ciftern, part whereof was taken away by the ships, that transported some women of quality with their riches from Jasnapatnam to Negapatnam, and the rest being spoiled by our bombs, they were glad to accept fuch articles as we were willing to give them, The fore which however were very honourable, the furrendard. foldiers being allowed to march out with all the marks of honour, and to be transported into Europe. The commander, who had a wife and children, was permitted to go to the Indian coast, or that of Coromandel. The 28th of April I preached the thankfgiving fermon for this furrender, upon the text out of the 48th Pfalm, ver. 8. Upon this occasion captain Gornelius Rob, the younger, (who died two years after at Amsterdam,) captain Peter Wasch, (who was killed afterwards before Cochin,) and Mr. Van der Rheede, gave most signal proofs of their courage. Since that time divers vaults for fresh water have been made in this fort, and in Manaar.

CHAP. XLV.

Jaluapat-

The condi-

sneral for About the fame time I received a letter ments befrom the reverend Theodoro Sas, (fince mimust be nifter at Malacca,) then in the Dutch fleet before Goa, intimating, That the 20th of January, in the fame year 1658. the Portuguese attacked us with ten galleons and fome frigats: the engagement lafted till night, without any confiderable damage on our fide. That on the 27th and 29th of the fame month, another combat en-fued, without any great loss on both fides. The 3d of February the enemy attacked us once more; but were chased un-der their castle. In all these three engagements the Dutch had no more than nine men killed, and a few wounded. The letter was dated aboard the Phenix, cruifing before the bar of Goa, February 11. 1658.

In the mean while our forces having to closely furrounded the castle of Jamapatnam with their lines and works, that they could not ftir even with the leaft boat, without being taken or funk; and being now deftitute of all hopes of reliet, they hung out the white flag the 21st of June on the fouth-east bastion. The capitulation was agreed upon the next following day, under these conditions: That the garrison should march out with their arms, colours flying, drums beating, &c. and take along with them one piece of cannon, and to be transported to Europe: the head-officers shall be civilly treated, and to be conducted to one or other of their forts, and the ecclefiafticks to the coaft of Coromandel. All gold, filver, and other precious moveables, shall be left to the difpofal of the conquerors; the inhabitants shall likewife be transported to what part of the Indies they like best, most of whom went afterwards by the way of Malacca to Batavia.

Accordingly John de Melo, Leonardo d'Oliveiro, Viador de Fazendas, and Anthonio Mendes d'Ararba, marched out of the caftle with the rest of the head-officers, Rodrigo Boralbo delivering the keys at the fame time to major John van der Laan; but they were so weak, that they did not think fit to carry along with them their piece of cannon, though they fpent two whole days in marching out. A confiderable number of foldiers laid down their arms and colours before the standard of the compa-

Vol. III.

ny, as did many of the inhabitants, (a-Baldæusmong whom was Caspar Figeiro, the vicourge of the Cingalese,) with their wives and children, negroes, forty or fifty ecclefiasticks, Franciscans, Jesuits, and Dominicans; notwithstanding that during the fiege (which lafted three months and a half) they had loft near one thousand fix hundred men by the fword and mortality.

Immediately after commodore Peter de Bitter was fent to Batavia, by the way of Malacca, to bring this joyful news to Mr. John Maatzuyker our general, and the council of the Indies. The 23d of June I preached a thankfgiving-fermon out of Exodus xvii. 15. which was continued every year on the fame day.

When we entered the castle, we found it all battered to pieces by our bombs; and fuch was the ftench, that for fome time no body could abide there. We took The saflie care to have the springs cleared, the dung repaired. removed, the churches, houses, and walls repaired; three hundred cocoa-trees were also to be planted, and many houses that flood too near the ditch of the caftle, to be broken down; and to incourage the inhabitants of the country to fettle here, the custom upon tobacco was taken off, and Facob Rhee our head-factor, a very underflanding person, constituted, pro tempore, commander in chief here.

Things being thus disposed, our forces were foon after transported to the coast of Coromandel, in order to reduce the city of Negapainam. We left but a flender garrifon at Jasnapatnam, composed for the most part of Portuguese, who had taken fervice among us; befides which there was a confiderable number of prisoners in the

Thefe, in conjunction with some of the Atreachenatives, (not without the confent of Ra-rous design ja Singa,) framed a plot against us. Their formed adefign was to murder all the officers in the Dutch as castle, whilst I was preaching in Portu-Jafnapatguese in the city; which done, certain nam persons of their gang should attack and kill the guard, and thus to make themselves mafters of the caftle.

It happened by accident, That whilft I was preaching, Don Manoel Andrado, one of our Cingalese captains and Modeliar, coming with eighteen of his followers (who generally attended him) to the church, remained in the porch, where he could hear as well as within the church. He was not a little furpriz'd (as he himfelf told me afterwards) to fee the Portuguese remain standing likewise without the church door, and laying their hands upon their fwords; yet not being able to guess the true reason thereof, this treachery was not difcovered Baldaus, discovered till some days after, when the whole design being laid open to Mr. Jalia state of Van der Rhee, he took care to double the guards, to shut the castle gates, and to secure all such as had a hand in the plot. The next thing was to fend for me by a letter, (I being then visiting the churches in the country.) Upon the receipt whereof I returned immediately to the castle; where with great astonishment I had an account given me of the whole design; how it had been discovered; and the traitors secured: for which delivery I preached a solemn thanksgiving-fermon in Lova-Dutch the 15th of September,

1658, out of the book of Esther, Chap. ix. Baldaus.

Not long after most of the traitors hat The traitors ving confessed their crimes, some were consumed. Of the confessed their crimes, some were consumed. Of the confessed the confessed the confessed the confessed the confessed the confessed the confessed the confessed the confessed the confessed the confessed the confessed the confessed the confessed the confessed the confessed the confessed the confessed the confessed the confessed the confessed the confessed the confessed the confessed the confessed the confessed the confessed the confessed the confessed the confessed the confessed the confessed the confessed the confessed the confessed the confessed the confessed the confessed the confessed the confessed the confessed the confessed the confessed the confessed the confessed the confessed the confessed the confessed the confessed the confessed the confessed the confessed the confessed the confessed the confessed the confessed the confessed the confessed the confessed the confessed the confessed the confessed the confessed the confessed the confessed the confessed the confessed the confessed the confessed the confessed the confessed the confessed the confessed the confessed the confessed the confessed the confessed the confessed the confessed the confessed the confessed the confessed the confessed the confessed the confessed the confessed the confessed the confessed the confessed the confessed the confessed the confessed the confessed the confessed the confessed the confessed the confessed the confessed the confessed the confessed the confessed the confessed the confessed the confessed the confessed the confessed the confessed the confessed the confessed the confessed the confessed the confessed the confessed the confessed the confessed the confessed the confessed the confessed the confessed the confessed the confessed the confessed the confessed the confessed the confessed the confessed the confessed the confessed the confessed the confessed the confessed the confessed the confessed the confessed the confessed

A certain jesuit, named Caldero, a native of Malacca, was beheaded. This unfortunate person being prevented by sickness from going along with the rest of the Portuguese clergymen, had not been concerned in this treacherous design, much less given his consent to it: but some of the traitors having given notice thereof to him by letters, wherein they stiled him the Father of their soult, he was unwilling to betray his countrymen, for which he paid now with his head: eleven more were langed, and afterwards exposed in the open country on trees; but the heads of

the ringleaders were fixed upon poles in the market-place.

The castle of Jafnapatnam is of a quadrangular figure, and strongly fortified with very high and thick walls. It is bigger in circuit than the castle of Batavia, being the capital city of the whole kingdom. Philippo de Olivero, after having deseated the Cingules near Abbiavolanti, not far from the great pagode, (the guese continuins whereof are to be seen to this day,) apar jattook the same from the emperor of Ceylon. > The face ament first administer edto the Indians bere,

Rillous, circumference, cut out of an entire rock, or, as the inhabitants will have it, opened by a thunderbolt; of which more hereafter, when we shall treat of the isses of Jasnapatnam. We took it after it had been forty years in the possession of the Portaguefe.

Tafnapatnam is divided into four provinces, which are very populous: its whole length is about fix German leagues, and its breadth three, being well inhabited and adorned with villages and churches. The whole number of the villages a-mounts to one hundred and fifty nine, of their own churches thirty four, befides the Dutch and Portuguese churches. Jaf-

napatnam, is on the northfide washed by Baldeus. the gulph of Bengale, and borders to the fouth of a river, which makes it a kind of an ifland, and exonerates it felf in two different channels into the fea.

The provinces of Jafnapatnam are Bel-Provinces of ligamme, Tenmarache, Waddemarache, and nam. Patchiarapalle. The province of Belligamme has fourteen churches, the chief whereof is Telipole, a large structure, with a The church double row of pillars; the house thereun-Telipole. to belonging is the work of the jesuits, beautify'd with a pleasant garden, handfome court, and most delicious vineyards, affording most forts of Indian fruits, and watered with feveral fprings.

In August 1658, the reformed religion was the first time (as in all other churches of Jasnapatnam and Manaar) introduced and taught here by me. The 12th of Janua-The farmer py, 1661. the holy facrament was the first formetimes no less than two thousand auditors in this church.

The farmer py, 1661. the holy facrament was the first formetimes no less than two thousand auditors in this church.

A certain Indian, named Michael Fonica, asked me once a very odd question, to fifteen, and before my departure to viz. When John baptized Christ, whether thirty. In the year 1665, we had above

one thousand school-boys, among whom were four hundred and eighty who could answer all the questions relating to the chief points of our religion. I have had

be baptized bim in the name of God the Father.

Baldaus. Father, the Son, and the Holy Ghoft? and being answered Yes, he reply'd, That thus Jesus Christ was baptized in his own name;

subich be could not well comprehend, told him, there was not the least abfurdity in the matter, fines Jesus Christ was not baptized upon his own account, or as God alone, nor as a bare man, but as being endowed both with the divine and human nature. That the Son of God could not be baptized otherwise but in the name of God; and that under the word God, was not only comprehended the father, but also the son and holy ghost: that Jefus Christ was the same in essence with the father and the holy ghost; and that there were no degrees in the deity; for though the father was the first, yet were the fon as well and truly God as the father and holy ghoft: wherewith he was well farisfied. For the *Indians* being generally very ingenious, they will ask many acute questions, as concerning the creation and end of the world, the immortality of the for!, hell, and such like.

Moit of the churches here have certain Theatres near the

scaffolds or theatres near them, especially that of Telipole, where the jesuits used to represent certain histories of the bible to the people on holidays.

About half an hour thence stands the Mallagam, church Mallagam, of good brick-work, with an adjacent house built upon two arches, and a handsome pair of stairs leading to the top of it. The church was begun by the Portuguese; but finished by the Dutch. It has two hundred schoolboys; but not above fix hundred audi-

The chierch

The church Mayletti is about five quarters of an hour from Telipole. Here are feven hundred fifty school-boys, all taught by one mafter, who has more work than the two at Telipole: the auditors of this church amount to one thousand five hundred, or one thousand six hundred. The church is a large structure of stone : the house belonging to it is lofty, with a balcony on the top of it, affording a very fine prospect into the main sea; so that it may well deferve the name of Belle videre. church is not above half a mile from the fea-fide. They abound here in fish, such

as crabs, foles, plaice, &c. as likewife in Baldau hares and partridges.

The church Achiavelli lies about two Church A. hours from Telipole: it is a large and lofty chiavelli. structure built of stone, capable of containing two thousand persons; it was not finished till in our time. The village lies Plassanextremely pleafant among the woods, well of the flored with vaft quantities of turtle-doves, which coo at certain hours three times a day, and ferve the inhabitants instead of a clock, to know the time of the day. They have also plenty of hares, stags, and wild-boars; but are also annoyed by the ferpents.

As divers old Brahmans live in this place, fo were the inhabitants not fo forward in embracing the christian religion; the antient Brahman, named Philippo, does not want the knowledge of the fundamentals of our religion; but is more inclined to the historical, than the doctrinal part. Among others there lived here a certain Brahman, a learned person, with whom I used to have frequent conversation, whilst I lived at Achiavelli: he was baptized at last in the 46th year of his age, and afterwards writ the History of the Life and Passion of our Saviour, in a lofty poetical stile, in the Latin Malabar, called Hanscreet, which is quite different from the common Malabar characters. The school here has about four or five hundred boys; and the church feven eight or nine hundred auditors.

About an hour from Telipole stands the The chart church Ondewil, in a great plain, with an adjacent large stone-house, formerly the habitation of a Franciscan fryar. The foil is very luscious here, and fertile in rice, Naceny, and other eatables. The school-boys amount to six hundred, and the auditors to nine hundred or one thousand.

Two hours distant from the castle is The count the church Batecotte, with a lofty adjacent house, flat on the top, and adorned with a pleafant garden, well stored with trees; the fields round about it are extremely fruitful, It is feated near the Salt River, and abounds in fish and all manner of other provisions. Of school-boys they have here about eight or nine hundred, and of auditors in the church near two thousand.

Church House

1

Bald The d Pane Pou,

The c

Baldaus, About fair an hoar from Bateette is the church Paneteripou, a neat and magnitude of the church Paneteripou, a neat and magnitude of fone, with a pleafant house near it built upon arches, with two spacious rooms and a gallery, fine gardens, and a delicious fish-pond, or cistern. The school is frequented by six hundred boys, who in my time had made such considerable progress, that they could resure the popish errors concerning purgatory, the mass, indulgences, auricular confession, &c. Mr. Andrew the school-master, and his usher, being persons very diligent in their stations. The inhabitants are very devout here, and at sermon-time seldom less than twelve or thirteen hundred come to

church.

The church Changane is not above a Changane good mile from Paneteripou, lying with this and Batecotte in a triangle, almost at an equal distance from one another. Both the church and adjacent house are built of stone, as is also Paneteripou: they are very conveniently built with a court before, surrounded by a brick wall; behind is an orchard of Cocoe and Portuguese fig-trees, besides Potatoes, Bananoes, &c. The school is frequented by seven hundred boys, who are carefully instructed by their school-master Vol. III.

About half an hour from Batecotte is named Ambrofio. The inhabitants flock Balileus. the church Paneteripou, a neat and magto church with for much zeal, that there is fearer room to contain them all.

Two hours from Jajnapatnam, and one The charch from Changane, stands the church. Ma. Manipay. nipay. About five hundred fixty children are educated in this school. It is scarce to be imagined, that at so small a distance there should be so great a difference betwikt the people, the inhabitants here being a malicious generation, superfictious, and still much inclined to paganism. The church is big enough to contain two thousand fouls, but seldom above seven or eight hundred come to hear the fermons. The house is built only of clay, and covered with palm-tree leaves. Just before the church is a fine pond or custern with fresh water, near which stood formerly one of their Pagodes. This place is inhabited by several of the family of Madapoli, who were concerned in the plot (lately mentioned) with Don Louys.

The church Vanarpone stands just under the educable of Jafnapatnam, most inhabited Vanarpone-by washers, Vanar signifying as much as a washer in the Malabar. It is not very big, nor has a house belonging to it.

The school-boys amount to two hundred,

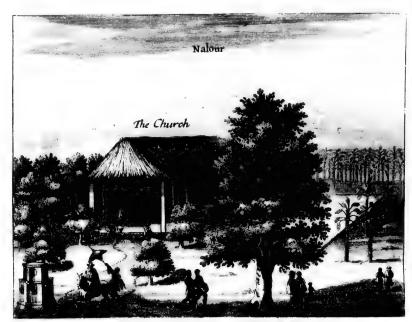

Baldeus and the auditors in the church to about bout an hundred printers of callicoes were Baldeus.

Threbureh

Just by Vanarpone is the church Nalour,
built only of clay, and stenderly covered.

Here alse stood tormerly a Pagade. The
school is frequented by bout five hundred
and ninety children, who are not so well

school is frequented by about five hundred and ninety children, who are not fo well verfed in the points of the chriftian religion as most of the rest, the people here retaining still a strong inclination to paganism, especially since some years ago about an hundred printers of callicoes were Baldee transplanted hither from the coaft of Coromandel, to the no small prejudice of the christian religion, though the company were no great gainers by it; since it is evident, that for want of good water at Jasnapasnam, the same cannot be brought to their true perfection, and therefore are much better bought and transported from the coast of Coromandel.

This is certain, that this generation is very mischievous to the christians here, it being frequent to see them appear in publick painted with Cinza, or ashes, (accounted holy among them,) and to carry their leads; besides that, the Moors have their publick schools allowed them of late years. I must consess that whilst Mr. Authony Pavilioen (at the time of my being there) was governor of Jasnapatnam, he did all in him lay to affist me (at my request) in stopping the progress of the pagan superstitions, and was not well pleased to see the callico printers introduced here, it being (not without reason) to be feared that in time they may (by promiscuous marriages) nerease to such a number as may endanger

both the church and flate, especially if they are allowed the burning of their dead, and some other pagan ceremonies they much infift upon.

It is further to be feared, that in time there may be a promifcuous copulation betwirk the christians and pagans, which must needs produce direful effects in the church. It may be objected, that severe punishments will put a stop to that evil, (some having already been punished with death upon that account;) but this does not altogether removed the danger: besides that, it ought to be considered whether such a severity be consonant to the word of God, or not.

Baldeus. The last church, not far from the city, is called Sundecouli, belonging to the Ci-The church vias, or chairmen and water-carriers. The church is a neat structure; but the inhabitants an idle and base generation. About four hundred and fifty children belong to

they generally go abroad a fifthing with Baldens. their parents. Seldom above four hundred come to church; whereas there are about fifteen hundred inhabitants. It is a pleafant place, deliciously feated among trees of a confiderable bigness. Thus far we the school; but seldom frequent it, because have spoken of the province Belligamme,

727

and its churches, unto which belong likewife Copay and Pontour, containing about eight hundred school-boys, and two thoufand fouls. The children in these schools are diftinguished into several forms, according to their respective degrees of proficiency; fo that those who have learned

(for instance) the Creed and Our Father, teach those that scarce know to say Our Father. Among these boys, they have fome they call Merinhos, who take an account of fuch as are absent, and return them to the mafter, or the head Merinbo.

CHAP. XLVI.

The second, third, and fourth Provinces, with their respective Churches, belonging to Jafnapatnam. The Isles of Jafnapatnam. Vast Number of Christians. The Author's Zeal in promoting the Christian Religion.

H.F. fecond province of Jafnapatnam is Tenmarache, which convince is Tenmarache, which contains five churches, with the villages thereunto be-Navacouli, couli, feated in a pleafant plain, abounding and covered with palm leaves. The school

in cattle and fruit, as the woods afford great store of apes and monkeys, and all sorts of venison and wild sowl. Both the church and adjacent house are only of clay, Baldælis, is frequented by four hundred children, and the church by feven or eight hundred autors.

The church An hour from March 1997

The church of Chavagatzery.

An hour from Navacouli stands the church of Chavagatzery, the biggest of the whole province, and the adjacent house very strong and well-built, having a pleafant prospect towards the sea, with fine gardens, well stored with all forts of Indian fruits: they abound in fish, for they

live upon husbandry and fifthing. The Baldeus, fethool is frequented by a thousand children, who are instructed by two masters and an usher, and the church by betwixt two and three thousand fouls.

The church Cathay is an hour from Cha-The chimds vagatzery, through fandy and difficult Cathay. ways, but full of ponds ftored with wild ducks; befides which they abound in fnipes, herns, Indian ravens, and all forts

of small birds. The church and house are only of clay, and covered with leaves, like that of Navacouli. The school has five hundred and fifty children, and the church eleven or twelve hundred auditors.

The church tors.

Betwixt Cathay and the church Waranni are fandy and difficult ways. The church flands in the midft of a finall wood of areek, coco, palm, banano's, mango's,

cajou, and guiavo-trees. This place affords, befides the ordinary melons, the most delicious water-melons in the Indies. The church is but slenderly built, and inclosed with a wall of earth, as is likewise the house; yet has it divers spacious apartments, and a handsome entrance. The school has about eight hundred children, and the church two thousand five hundred auditors.

Baldaus. The last church of Tenmarache is that the word of Illandi Matual, unto which belongs the The interest village of Negar Kojel, famous for a large pagode that flood there formerly. The church is only of clay; but the adjacent house of stone, unto which you ascend by

steps: it has three large apartments, a neat entrance, and a fair prospect. Hereabouts are great numbers of peacocks; and fometimes they fee fome elephants in this tract of land. The company also maintains here fome tame elephants, as in divers other places, they being separated at some distance for the better conveniency of their fodder. Unto this fchool belong about fix hundred and fifty children, and to the church eleven or twelve hundred

auditors.

The third province is called Waddemademarache, rache, having only three churches. It affords such plenty of patture, of cows, sheep, goats, fowl, pigeons, and partriges, that you may buy a sheep for eight pence or ten pence, fixty eggs for three pence, and four good pullets for a fanam, or five pence.

The thurch The first church is called Catavelli: the Caravelli. church and adjacent house are both of brick, the laft having a fummer-house on VOL. III.

the top of it, from whence you have a Baldaus. delightful prospect into the plain. The school has fix hundred children, and the church ten or twelve hundred audi-

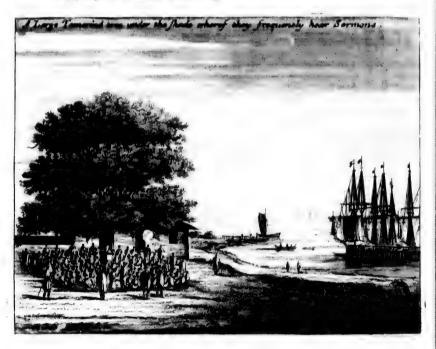

The fecond church is Ureputti; the village is inhabited by a fet of vagabonds and thieves, of the family of the Nalloas, not much inclined to religion. The school is frequented by fix hundred and ninety children, and the church by eight or nine hundred auditors, less or more. The children are taught here to make their letters in the

The church Parctiture is the finest and The church largest of this province, called by the Por-Paretiture.
tuguese Punta das Pedras, or the Rocky Point. Paretiture, fignifies in the Malabar tongue, as much as Cotton's Harbour, from the great quantity of cotton that grows thereabouts on fmall trees. Not long ago, whilft we were engaged in war with the English, a fort was ordered to be erected here. During the war with Portugal the Duteb carried off from hence one of their priests, and plundered Manaar at the skirmish be-fame time. Hereabouts also happened a swist she fmart engagement betwixt the Portuguese Portuguese and us, wherein we were hard put to it, on this 8 Z and place.

Baldens. and toft, among others, captain John Mogbiaten. During the fiege of Jafna-patnam, the Portuguese expected the land-

ing of their fuccours in this place,
The road is fo good here, that thips may ride tate at anchor for feven or eight months; but they must take care to depart before the northern Mouffon, which renders this shore very dangerous: fo foon as any fhips are discovered at sea, a slag

is put out on a long pole for their direc-Baldaus. tion. The church was much decay'd, but has been repaired of late. Just before the church stands a tall tamerind tree, which affording a very agreeable shadow in the heat of the day, the people are often in Great Num heat of the day, the people are often in the first thrift three thousand. Ealdens. This province affords a kind of wood, called Yager's-Wood, (or Hunter's-Wood,) which for its goodness is transported to the coast of Coromandel.

Two good hours from Poelepolay stands the church of Mozommale, in a wood, with an adjacent house, both well built; the school has about four hundred and fifty children, and the church nine hundred auditors.

The church Tambamme is the largest Tambam.

mt. The school has five hundred children, and the church nine hundred auditors.

Tet durch

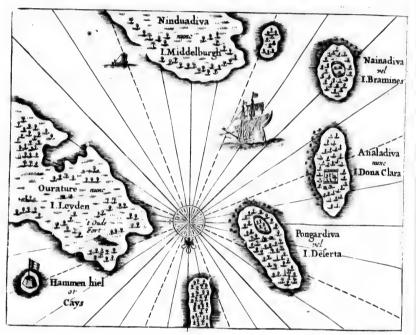

Mulipatto is the laft church, about a day's journey from Jafnapainam, near the head of the river, called Paffo Seco, or the Dry Paffoge, where we have a Palenka guarded with fome foldiers. The church-house is provided with port-holes for its defence; but the church is mean and finall. The school has no more than two hundred and fifteen children, and the church scarce three hundred and fifty auditors.

Thus far of Jafnapatnam, and its provinces, churches, and ichools: we will now pass over into the adjacent isles, which are fix in number.

The first of these isles is Ourature, which Baldaus. has three churches, viz. Aleputti, Welane, and St. John, or Ourature; all which Ourature have together about eight hundred school- of lamaboys, and two thousand fix hundred audi-patnam. tors. This ifle has been subject to great floods both before and in the time of the Portuguese, to fuch a degree, that the people were forced to fave themselves on the tops of the trees. Of this we faw an instance an instance in the year 1658, when a most furious of a flood. tempeft, accompanied by a hurricane, raifed the waters beyond the fhore to fuch a height, that it broke into the watergate of the castle, throwing down every thing that flood in the way; the tiles were all blown from the houses, the trees tore up by the roots, and unspeakable damage done, both to men and cattle, After the fury of the tempest was somewhat allayed, feveral fifthes were taken in the church-porch, which had been carried along with the water over the cortin. This ifle has plenty of fifth and The proflags: it produces also a certain smallduds of root, called Saye, used by the dyers to things, dye red cloths. They make also very good butter here, and have flore of larks, and fome fea-gulls.

Baldeus. The ise of Ourature and Caradiva are feparated by the river; in the midst wherethe specific of the fort Cays, (or Ham's-Heel,) of which we have spoken before. From this isse the elephants are embarked by means of a bridge, and transported to Coromandel and Bengale. This isse is supposed to produce the best Saye in the Indies.

It has a well-built church and house be-Baldœus, longing to it of stone: the church was finished in my time, as was that of Ouratures, which was set on fire by the Portuguese. The school is frequented by sour hundred and ninety children, and the church by ten or eleven hundred perfons.

The Defer Island. Somewhat further into the fea to the right, as you fail to the isle Pongardiva, lies a little island called Ilba Deferta, i. e. the Defert Island, by the Portugueje. This isle, as well as that of Carativa, abounds in serpents, and furnishes our ships with fuel.

Pongardi-

Pongardiva is a large ifle; but the ground being rocky, produces but little for the fuftenance of mankind, except flags, hares, and peacocks, in great quantities; they abound also in fish, and especially in large oisters, which are better to stew than to be eaten raw. The men are generally, much taller here than in any other part of the Indies. The school has two hundred children, and the church eight hundred auditors.

Analativa, The ifle Analativa is small, but proor D. Clara, cluces vast plenty of oisters. The inhabitants of both fexes amount to about eight hundred, and two hundred children. It has a little church and convenient house near it. It was formerly called *Donna Clara*, from a certain lady that lived there, and was miftress of it is the time of the *Portuguese*. They still shew there a chair wherein she used to fit, which is big enough to hold conveniently two persons at once.

The island Nainativa has got its name Nainativa from the great number of Jackals that are found there; of which more anon. It is very small, and inhabited by Brabmans turned christians, who lead very sober lives. The school has seventy children, and the church three hundred auditors. The church is very small, yet has an adjacent house sit to lodge strangers

Great tality is mong t

> Aremi abie/p

Baldacus. Nindundiva, or the Long Isle, from its length, which is about fix leagues, is Nindundi-called Ibla das Vacas, i. e. the Covo Island, va. or Isla by the Portuguese, because abundance of cattle are transported thither from Tondoy, which makes cattle so cheap there, that you may buy a good cow for four Dutch shillings, (or half a rixdollar;) but their

oxen and cows are not near so big as those Great mer-on the continent of Jasnapatnam. Often-tainy at times a mortality happens among the car-amg them-tle, because the ground being hot and dry, produces divers venomous herbs, which

produces divers venomous herbs, which they feed upon. The inhabitants are very poor, and live upon miserable diet: I remember that being once eight days in this ifle, I and my company could fcarce get provisions for our sustenance. The isle is of difficult access, because the shore is rocky, and has no bays, but only a few narrow creeks, where there is no coming in except in very calm weather; otherwise the sea beats with fuch violence against the rocks, that there is no coming near them, though there be fometimes five or fix fathom water. For which reason there is no coming at it except in the calm feafons, which happen twice a year at the change of the Mouffons: For the fouth-wind forces you upon the rocks, and with the north-wind the shore is too shallow to approach it. The Portuguese had formerly a fort here; the ruins whereof are to be feen to this day. They also brought some horses into this isle; which multiplying, in time produced a certain kind of horses that are very finall, but hardy, and very fit to travel on stony and rocky grounds: They live in the wilderness, and are taken by forcing them unto the bank of a river or pond, where they catch them in fnares or ropes. This isle produces also a certain kind of goats, out of which they take bezoarstones; but they are none of the best. It has about nine hundred inhabitants, and

one hundred and feventy children.

Attention in the free is no fresh water in all this is, except what is found in one place among the rocks, being above half a mile in circuit. If we may credit the inhabitants, these rocks were split by a thunderbolt, which occasioned these springs, some whereof have not above half a foot, others a foot deep water: the entire rocks arising betwixt these springs, have often cast men and beasts down the precipices.

There are some other islands near this shore; but being very small and not inhabited, (as the *Paletiva*, and the two brothers, since called *Hoorn* and *Enchuy-fen*,) are not worth our particular observation.

VOL. III.

In the year 1663. I and my collegue, Baldaus. Mr. John & Breyl, fent the following account to Mr. Maatzuyker, general of the Indies for our company, viz. that in Jafanapatnam were at that time fifteen thoufand and twelve children under the tuition of the respective school-masters there, being all natives, not reckoning those of Manaar and the country of the Wannias, Christians where, in my visitation 1655, in March in the Wannias and April, I found in those of Poenery, wannias Polveraicatti, to Peringale, Mantotte, Na-naar. natam, and Aripou, all churches belonging to the Wannias, and in the churches of Manaar, viz. Totavalli, Karfel, Irkelampatti, Tellemanaar, Peixale, the fishers and city churches, one thousand three hundred and fifteen children of the natives. Such as were come to age of maturity amounted in the Wannias to four thoufand five hundred and thirty three; and in the ifle of Manaar, to three thousand five hundred and twenty, not including two hundred and fourteen flaves lately converted, who had already learned certain forms of prayers. According to the Number of church-registers, (called here Patolas,) in the shrifting in year one thousand fix hundred fixty three, nam. there were of christian men and women in the kingdom of Jafnapatnam fixty-two thousand five hundred and fifty eight, not including the flaves, whereof there were two thousand five hundred and eighty feven: the numb r of the baptized children from 1658, till 1661, viz.. in three years and a half, in the church of Jafnapatnam, amounted to five thousand seven hundred and ninety nine children, and thirty fix that were come to age of maturity. During that time were married two thousand one hundred and fifty eight couples, not reckoning those baptized and married in the Low-Dutch and Portuguese churches. At the time of my departure the number of the children in the schools was risen to eighteen thousand, and that of the baptized children in 1663, to twelve thousand three hundred eighty seven. From the year 1651, till 1661. the whole burden of vifiting all the before-mentioned churches lay upon my shoulders, till Mr. Breyl was joined with me; who dying in his return to Holland (his corps being interred at the Cape of Good-Hope) 1665. Mr. Bartholomew Heyne succeeded in his place.

In the churches of Jafnapatnam the ten commandments, written in large Malabar characters, are hung up on a table, on both fides whereof are the Our Father, and the Creed. Every funday the people How the come to church about ten a clock, and religious after they have fung a pfalm, the school-worther master reads a serme, in the Malabar lander of A guage,

Baldens, guage; for which purpose a certain number of fermons are allotted to each church, to be read in the absence of the minister. This done they conclude with finging ano-

ther pfalm.

But the greatest trouble that belongs to a minister in these parts, is the instruction to be given both to young and old by way of mouth, which is best done by way of question and answer, which makes the deepest impression into the minds of these tender christians. Besides, as the Malabar tongue is so difficult to attain to, that none of our ministers dare pretend to the perfection of it; fo on the other hand, they may learn without much trouble, as much as is requifite for the instructing them The Dutch in the main points of our religion. Add munifiers in to this, that our ministers undergo much

the Indies more fatigue in their stations than the undergo more difficult Romish eccle fiafticks, who preach very feldom, and each church having its peculiar attendant, they are not obliged to travel from place to place as we do. Befides that, they bring the Portuguese language commonly along with them, which ours are forced to learn upon the fpot, not without great difficulty; not to mention feveral other disadvantages on our fide, fufficient to convince those who extol the merits of the Romish clergy upon that fcore, and vilify ours: these I would have confider, that at this time there are no more than two or three ministers belonging to all these churches, which had no

> Before my departure, I took care to have the next following pieces translated (the fame being revited by me before) out of the Portuguese into the Malabar, by Francis de Fonfeca, a member of the reformed churches.

> less than forty in the time of the Portu-

guefe; and we have three fermons every funday, and one in the week; besides the con-

frant vifitations of the churches in the coun-

" The gospel of St. Matthew: the lesser " catechism: instructions for communi-" cants: questions and answers out of 66 the new testament: short questions and anfwersconcerning the chief matters contained in the old testament. [This was not quite perfected at the time of my departure.] " Confolations for the fick: for-" mulary of baptism, both for children " and others: morning and evening prayers; as also devotions to be used both before and after fermons, and before and after meals: prayers for rain and a fruitful feafon: thankfgivings on account of " victories obtained against our enemies: prayers to be used in the army before an

engagement: prayers for criminals be- Baldeus, fore execution: formulary and prayers of marriage: fome pfalms of David fet in metre after the Malabar fashion: fome fermons, viz. upon the nativity of chrift, upon his passion, and death, refurrection and afcention; upon the fending of the holy ghoft, the circumcifion of our faviour, the history of the wife men of the east, the refurrection and day of last judgment; upon charity due from one christian to another, out of Luke x. Who is our neighbour? the rejoycing of the angels in heaven for the conversion of a sinner; upon the question of the pharifees, Matthew x... 38. and fuch like.

I had abundance of other fermons by me in the Portuguese language; but for want of a good interpreter (whom I mentioned before having his hands full with the rest) the same was fain to be deferred till another opportunity; though at the same time I never thought it convenient to overcharge these people with many books, pursuant to the opinion of Mr. John Maatzuyker our general, in his letter fent to me from Batavia, September 18, 1662.

could not without an extreme fatisfaction understand the happy condition of the churches in Jafnapatnam, and the effects of your industry. God almighty blefs your endeavours and zeal to the honour of his holy name, and the falvation of many thousand fouls. Being in great want of books for the churches and schools of this country, it is impossible to gratify your defire, especially fince many of these books are very ill managed by fome people. I hope you are pretty well provided by this time, but that your good intentions may not be disappointed for want of them. Though in my opinion reading and writing are things not fo absolutely necessary for the edification of these poor wretches, as that they may be instructed in the fundamentals of religion, which con-sists in sew points. For in case we pretend to propagate christianity by reading and writing, I am afraid it will prove both tedious and chargeable to the company. To promote this holy work we have fent three minifters; whereof two are gone with the thips to Malabar, and the third is lately arrived with the yacht the Achilles: they are all three young men, and not long ago came from Holland, and " confequently most likely to do confi-" derable fervice for a long time, provi-

CHAP. XLVII.

The Nature and Qualifications of the Inhabitants of Jafnapatnam. The Bellales; and their Manner of living. The Brahmans: Their Doctrines shown and refuted.

Qualifications of the Interest of Jafnapatnam; which done, inhabitants we will return to Batecalo, and fo leaving of Jafaspat- the ifle, we will turn ourselves another

> In Ceylon are divers clans, or families, as well as on the coast of Coromandel. The

generation of the Bellales is the chiefest here, fince christianity has been introduced, the Brabmans challenging the first rank among the pagans.

The Bellales wear a kind of garment The babits from above the navel, turning betwixt the of the Bellegs like a pair of drawers. They also lales.

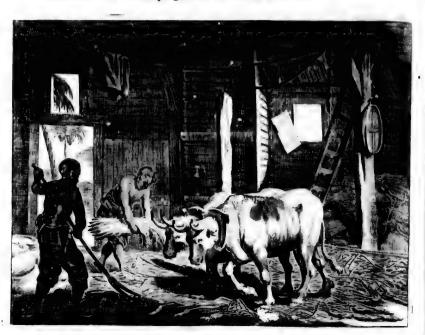

make use of Seripous (or soles) tied to the bottom of the feet with leather straps, the upper part of the feet being bare to prevent their fweating. Upon the belly they have a kind of a bag, (called Maddi,) being part of their garment rolled together,

wherein they keep their Areek and Betel, and some paper to make use of upon occasion. On the right side they carry a kind of a knife in a sheath, and an iron pen pointed with filver, as is likewise the fheath, in which they keep also a piece of

Baldans. steel to sharpen their knife upon. They make holes in their ears from their infancy s which being adorned with golden pendants, draw them down to their thoulders. Are rieb in They live upon husbandry, and are rich in cattle, fuch as cows, oxen for the plow, fheep, goats, and bufflers. Their habitations are both convenient and neat, with pleafant gardens, well planted with Betel, and furnished with excellent springs, which

furnish them (during the dry summer-Baldans, season) with water for the watering of the gardens. Their harvest is in January and February; their winter or rainy feafon being in November and December. In some places, viz. in the low marfhy grounds, they have harvest twice a year: they thresh Their man. their corn (after the manner of the Ifrael-ner of ites) with oxen not muffled: these tread the corn. the feed out of the ears.

During the rainy feafon it rains with fuch violence, that the fields are all overflown; and I remember, that in my time a confiderable part of the Cortin of the castle was washed away by the rains. This continues for two months; and it happens oftentimes, that for eight months after it rains not above three times, which is the reason that they are obliged even to water the coco-trees till they are fix years old. If you dig about two foot deep you meet The ground with rocky ground; fo that if you will

have a fpring, you must cut them out of the rocks with vast charge. Their way likewise butter; but not after the same

The before-mentioned Bellales make of making manner as we do in Holland. They take a kind of a mill made like a star at the bottom: this they roll betwixt both hands

(as we do with our chocolate) till the butter comes. Some of our Dutch women make also good cheese; but it is not regarded among the inhabitants; but butter is in great efteem among them, as well as among the Moors, nay, the family of Commety use butter like drink. Milk turned to curds (called by them Tayr) is also in great request with them, and used like a cooling medicine in fevers, and the small-pox,

which are very frequent here.

Their cattle they keep both day and How they night in the field; though towards night manage they drive them into a certain inclosure: their castle, they are never housed in the winter, but feed in the grounds where the corn first fprouts forth, and afterwards are fed with hay till harvest-time. If the cattle happen to break into a neighbour's field, the

Baldaus, owner is obliged to make good the damage. The Bellales are generally the richest of the country: they do not marry except in their own family, and commonly in the fpring, as the Romans did formerly in May, and the Persians in the spring. If it happens to be a fruitful year, they are the more inclined to marry: they are very Art littlitigious, and will go to law for a trifle, because they are constantly envious at one

The Brabmans.

The Brabmans living in Jafnapatnam, or any other part of the Indies, are for the most part men of great morality, fober, clean, industrious, civil, obliging, and very moderate both in eating and drinking: they use no strong liquors, wash or bathe twice a day, eat nothing that has had, or may have life, yet are much addicted (like all the rest of the Indians) to pleasure. Notwithstanding they are christians, they carry still certain beads, and (as Rogerius observes, fol. 71.) like those of Coromandel, never marry out of their families, but frequently their brothers and fiiters children; though elfe they are great enemies to inceit, but excuse this near alliance by the great value they put upon their generation, which they deduce from VOL. III.

Bramma, and fome learned men from Baldaus. Abraham and Ketura, whose children, according to Gen. xxv. 6. went into the eastern Front

Though they bear the name of christians, and know how to discourse rationally of the ten commandments, and the other points of the christian doctrine, they still retain many of their pagan fuperstitions. Retain
If you tell them of the christian liberty in some pagan victuals and drinks, they reply, That they superflation. are not ignorant of it; but as the effence of christianity does not consist in eating and drinking, fo they did not think Their vea-themselves obliged to seed upon such things for it. as are contrary to their nature and education, being from their infancy used to much tenderer food, which agrees best with their constitution, and makes them generally live to a great age.

They are not ignorant in the course of the flars, in calculating the eclipses of the in and moon; know the feven stars, which they call Arramien, i. e. Six-Fishes, because, say they, we see no more than fix. They understand also the names of the planets, and chiefest of the fixed stars; but this must be understood from the most

learned among them.

Though,

CHA

Though we shall treat in particular here-Raldæus. after of the errors of the pagans, yet can I not pass by here in filence, what I have ob-ferved my self concerning their opinion or the creation of the world, its age, and transmigration of the foul. In the year 1665. after I had catechized the people after fermon in the church of Paretiture, happening to discourse concerning the creation and age of the world, fome of the Indians af-formed, That the world had stood four informers thousand eight hundred and fixty four ing the be-gaming of years fince their Kaligam, or fourth pe-the world riod: for they have four periods; the first called Creitagam, the second Treitagam, the third Dwaparugam, and the fourth Kaligam. And whereas the Indians in Coromandel did, in the year 1639. compute no more than four thousand seven hundred and thirty nine years fince the creation of the world, I told them, That they followed the footsteps of the Chinese, who in their computations made no great account of one hundred years less, or more; which made them finile. I told them further, That there was no certain computation from the beginning of the world, except what was founded upon the holy fcripture; and that in the year 1665. (according to the Jewish computation,) the world had stood five thousand four hundred and twenty five years. Concerning the origin of the foul, I found them of the fame opi-Ibir be nion with the great Rabbi, viz. That all list contill they were to be communicated to certain of the foul. bodies. Unto which they have added the Pythagorean tradition of the transmigration

of the foul.

I remember that at a certain time, as I was walking with fome of them, and endeavouring to refute this opinion, they objected that it was impossible for a child to be born blind, dumb, or lame, without having received a foul that had been guilty of very gross fins. For, faid they, fince the child has not committed any fins, and God does not punish any body without finning, this must be attributed to the fins committed by the foul whilst yet in another body, and now entered into the child. Unto which I reply'd in our faviour's words, out of John ix. 1. when his disciples asked him concerning the blind man from his birth, Neither badthis man sinned, nor his parents, but that the works of God should be manifest in him. Whence it feems that the Jews were some-Jews, con- what infected with this tradition, mention gration of The words of Herod, Mat. xiv. 2. when he fays concerning Christ, This is John the

Baptist, be is risen from the dead, intimate Baldæus, the same; as likewise what the Jews said concerning Christ, Mat. xvi. 13, 14. fome that he was John the Baptist, some Elias, and others Jeremiab. Hence Elias, (commonly called Levita,) in his book Tisbi, and the other capalists of the Jews, were of opinion, that the fouls passthrough three diffinct bodies, which they pretend to evince from the words of Job xxxiii. 29. Lo! all things worketh God twice or thrice through one man. Thus the Jews affirm that the foul of Adam was translated into the body of David, and afterwards into that of the Messiab: which error having been introduced into Palestine by Antiochus's philosophers, the Jewish doctors did not flick to maintain that the fouls of finful men did transmigrate into the bodies of beasts, according to the degrees or beinousness of their crimes. Whereas it is manifest, that a rational foul cannot fix its habitation but in the body instructed with proper organs, whereby it exerts its operations; and the scripture tells us expressly, that the soul and spirit returns to God, who gave it; besides many other arguments I alledged to them upon this head against their opinion.

The learned Vosfius is of opinion, That This spinion this error took its beginning from the true received atradition of the refurrection of the dead, Druds, which was fpread even among the Druids in Gaul, according to Cafar, lib. vi. with this difference however, That the Pythagoreans affirm the fouls to transmigrate even into the bodies of beafts; whereas the first restrain it only to the bodies of men. which made them face death with an un-

daunted courage, according to Lucan.

Felices errore suo, quos ille timorum Maximus band urget letbi metus, inde ruendi In ferrum mens prona viris, animaque capaces Mortis, & ignavum est reditura parcere

Appian says of the antient Germans, among other things, That they despised death in hopes of another life: and Thomas Aviot, an Englishman, affures us, That the fame had been found in Virginia. fepb Acofta fays the fame of Peru and Mexico; and the fame is related of Guinea, of the Chinese, the antient Egyptians and Getes. The Pythagoreans say of Athalides, That his foul, before it entred the body of Pythagoras, transmigrated into three several other bodies, first into that of Euphor-bus, the son of Panthus in the Trojan war; afterwards into Pyrrbus; next into Eleus,

t Germans, ahey despised fe: and Thoires us, That irginia. Joed of Guinea. gyptians and of Athalides, the body of to three fevet of Euphor-Trojan war ; t into Eleus,

Baldaus, and then into Pythagoras. All the Indian pagans are infected with this erroneous opinion, as we shall see more at large hereafter: but what is more furprizing, is, That the Sadducees among the Jews, who had to much veneration for the books of Moles, should deny the immortality of the foul, when it is said in Gen. i. 16 That the foul of man was not created like material substances, but was purt of the Spirit of God. The fame fay all the Gentiles, as Hermes, Zoroaster, Chalcidius and Epicharmis. Cicero in Somnio Scip. fays, There is a near re-

lation betwint Ged and our fouls. Seneca Baldaus. in his letter to Lucilius, tells him, That the fouls are in beaven; and speaking of the deceased son of Marcia, he says, in meliori statu est, he is in a better state. The Turks, and Persians, and Mahomet, in his Aleoran, acknowledge the immortality of the Soul; which put these christians to the blush, who affirm, That the fouls of the wicked are annibilated; or what others affert, That the fouls rest in the matter till the day of

CHAP. XLVIII,

Marriages of the Ballales and Brahmans. Divers Circumstances observed upon that Account. Families, Degrees, and Handicraftsmen of Jafnapatnam. The Taking and Description of Trinquenemals.

N the preceding chapter we told you concerning the marriages of the Bellales, and how the Brahmans often marry Meriage their brothers and fifters children. Among some of the christians in Ceylon obtains a certain custom to this day, to tie the Tali or bracelet of the bride about the bridegroom's neck, a thing introduced by the pagans, and imitated by the christians: for, as Rogerius observes, the inhabitants of the coast of Coromandel look upon it as a ceremony to necessary towards the confirmation of the marriage, that whenever the husband dies, the Tali he wore about his neck on his marriage-day is to be burnt with him.

As maidens without a good portion are a very bad commodity here, hence it is that frequent collections are made to help the poorer fort to husbands. They are of opinion, that a fingle man is but half a man, nay, that those who neglect or lose any time in propagating their own kind, are not far different from a murderer and a destroyer of human kind, (according to the opinion of Plato, which was likewife encouraged among the Athenians and Romans;) which is the reason they often marry their daughters at ten and eleven years of age, and nothing is more frequent than to fee them bring forth children at thirteen or fourteen.

Weddings. After they have been three times proclaimed from the pulpit, the marriage ceremony is performed by the minister, the house where the wedding is kept being generally adorned with a kind of triumphal arch raifed without doors, made of fig-tree branches, flowers, pomegranates, and fuch like. The richer fort feldom fail to give a good entertainment to their friends, of venison, hares, partridges, fish, fruits, preserves, &c. and the evening is spent in dancing, finging, and divers other diversions. However, strong liquors are never made use of on such occasions, unless the Hollanders (who cannot well be merry without them) bring some along with These marriage diversions continue fornetimes four or five days faccef-

I remember, that during my relidence here, sometimes children of eight or nine years of age would have engaged in mu-tual promifes of marriage in mine and their friends presence; which I always opposed, fearing, not without reason, that they might repent their bargain, before they came to a marriageable age. For the rest they constantly observe this cuftom, That the female is younger than the They marry bridegroom, nay, they feldom will chuse a maid, that has already had her monthly times: this custom is so strictly observed on the coast of Coromandel, that if a Brahman's daughter remains unmarried till that time, she must lay aside all hopes of

it for the future. The learned Selden shews out of Rabbithe same Moses Maimonides, that the Jewish High-practiced by priests were not allowed to marry a mai-and Ro. den, unless the was under twelve years of mans. age; and the antient Romans commonly married their daughters at ten, eleven, or twelve years of age. It is sufficiently known what Moses says, in relation to the marks of virginity, Deut. xii. 17. which to this day is followed by the Moors of Fez and Morocco. If they happen to die without iffue, the woman's portion re-

Baldæus.turns to her friends, the rest to the hufband's. One laudable custom they have, which is, that fcarce ever children marry ry without here without the confent of their parents; the confent a custom not only agreeable to the express of their \$4- command of God, expressed in divers places of the scripture, and the practice of all ages, even among the pagans, but also confonant to the civil constitutions, and the decrees of the council of Lateran, and other councils, which declare a marriage betwixt Raptorem and Raptam invalid in

Divers

The tribe or family of the Chivias, use The tribe of formerly to attend the service of the king she Chivias. of Jafnapatnam, but now do all forts of drudgery, as carrying of water and wood for the Dutch inhabitants; they make use also of them for littermen, ten or twelve of them being fometimes imployed at a time to carry a good bulky Hollander, ten, twenty, nay, thirty leagues in a litter. However, as they are descended from courtiers, so they are too proud to carry any ordinary person, who must be contented to be carried by the ordinary Coelys, or labourers, who live all over the country; whereas the Cbivias inhabit in the district of the church of Chunde-

Of the Par-

Those of the tribe of the Parruas do not live in fuch great numbers in Jafnapatnam, as they do about Tutecoryn; they apply themselves to the sea, and especially in diving for fea-horse teeth and pearls. They generally fpeak Portuguese, and are an active fort of people.

Of the

The Chittiis live for the most part upon the linnen manufacture and traffick, the word Chitty fignifying as much as a merchant : they are a crafty generation. Each of these tribes do not marry into any other befides their own, nay, commonly in the fame family. Befides which each handicraftsman educates his son to the same trade he is of: thus a weaver's fon follows the weaving trade, as the fmith's fon does that of a smith.

Of the Care. The tribe of the Carreas live upon fishing, which they perform with monitrous large nets: they inhabit near the fea thore of Jafnapatnam, and the banks of the Salt River. Those of the tribe of the Mokkuas

are likewife fishermen. Of the Nal-

The Nallouas are generally flaves to the Bellales, and much blacker than the reft. Their business is to gather the liquor that flows out of the coco-trees, called Suyri, and Euwak by the Indians; to dig the ground, tend the cattle, water the trees, and fuch like drudgeries, as is commonly done also by the Coelys, or ordinary labourers. They are a naity generation; you

may fmell them at a good diftance, not Baldeus. unlike the Hottentots on the cape of Good

The Parreas are the most despicable of of the Parall, their employment being to carry out reas. dung and fuch like filthy things; they

feed upon rats and mice.

It is observable that the tribes of the Great difhigher rank, look upon the inferior ones forences in degree with a great deal of fcorn, thefe being ob- of the liged to falute the others in the streets miles. with deep reverence, and other ceremonies, to shew their submission. On the other hand, all the men, of what rank or quality foever, exercise a great authority over their wives, whom they rarely honour fo far as to eat with them, but commonly dine alone. None of all these tribes eat cow's flesh, which is the reason that that no cows are killed but by the Dutch, the cow being looked upon among the rest as a facred creature, as it was forthe rest as a facred creature, as it was in merly among the Egyptians,* of which *SeeExod, viii. 16.6 more hereafter.

Though their tribes are very numerous, 32, yet do they relate to some few families, from whence they take their original, like the branches from the stem of a tree. The fame was practifed among the antient Egyptians, who diffinguished their nation into four head-tribes, viz. the Priests, the Soldiers, the Artifans, and Handicraftsmen, and the sheep and cowherds. Just as nowa-days fome of the European nations are diffinguished into four estates, viz. Noblemen, Patricians or Gentlemen, Citizens, and the Common People.

For the reft, the generality of the inha- The inhabitants of the kingdom of Jafnapatnam are binams of naturally ingenious, and have a strong me- Jafmputmory; they are very fober and moderate name in their diet, and (except the Nallouas and Parreas) very clean in their apparel, not quarrelfome, but very free with their

Their general vice is fornication and adultery, effecially among the young men; as the old ones are much addicted to fuperstitions, as to the choice of certain days, (whereof fomething was faid before concerning Raja Singa,) the cries of birds, and fuch like things, used among the antient Romans. Hence it is that the Portuguese, in those parts, have a proverb to this day, I know not what unfortunate sight [Rosto Mosinho] did come in my way

Thus on the coast of Coromandel they Their futer. look upon it as fortunate, if they fee a fution. certain red bird with a white ring about his neck. John van Twift, in his description of Gusuratte, tells us of the natives there, That they look upon it as a good

They also reckon it fortunate, if they meet any body that carries meat, milk, and butter, or if a cock croffes the way.

CHAP. XLVIII.

It is certain, that the observations of the cries, and flights of the birds have not only been usual among the antient Romans, but also the Jews, with several other fuch like fuperstitions, predictions, asking advice from the Devil, the finding out of stolen or lost goods, &c. for necromancy was forbid, Ifa. viii. 19. Incantations, Alls xix. 15. observations of the cries of the birds, Ezek. xxi. 21. the choice of certain days, Estber iii. 7. & ix. 24. the confulting of woods, Hosea iv. 12. Befides which, the predictions from the different appearance of the water, air, fire, and earth, out of certain union of characters or numbers, (called Cabala,) chiromancy, astrology, inspections into the magick glafs, and fuch like diabolical illufions, described more at large by Peucerus, in his treatise De variis divinationum generibus.

Befides the artifans and handicraftfmen, Lawyers in Jafnapatwhereof there is great plenty in Jafnapatnam, they have certain perfons who apply themselves to the law; and in the high court of justice, composed of Hollanders and Indians, were fet always (be-fides the Modeliars) a certain person well versed in the laws and constitutions of his native country. They have also their advocates, who make very long speeches

in their pleadings.

Neither are they destitute of physicians, Their physifuch as they are; for, to speak truth, they are more than empyricks, who practife according to certain books and traditions, transmitted to them by their ancesors, and confirmed to them by their own experience. They know not what anatomy is, and very little of the nature of purging medicines, which are not often used in this hot climate: however, when a purge is to be given, (whether a po-tion or pills.) the composition is always made of fresh herbs; and if it works too flrong, they mix fome powdered pepper with water, and apply it to the navel in the nature of an ointment. I can tell it, by my own experience, That it is a good remedy against the belly-ach and

They have also good store of surgeons and barbers; the lait carry always a finall

looking glass along with them, their rasors Baldeus. are thicker on the back than ours; they not only shave your beard and head, but alfo pare your hand and toe-nails, and cleanse your ears.

Weavers are here in abundance. These Weavers. fit flat upon the ground, their feet being placed in a hole dug for that purpose,

whilft they are at work.

Callico-printers, or painters, are num-Painters. berless here, who have a way of preparing their colours, that they never go out by washing, though those printed at Jafnapatnam are not near fo good as those of the coast of Coromandel, and especially those done at Masulipatan.

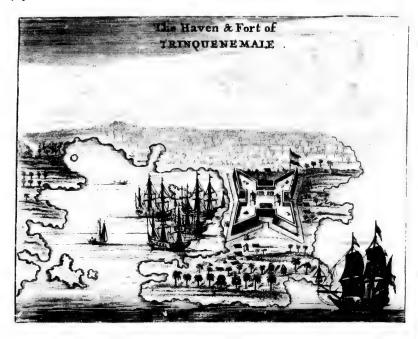

They are excellent workmen in ivory and ebony-wood, as likewife in gold and filver, and will come with their tools (which are but few) to work in the houses of the Dutch. They are exactly well ver-

fed in the effaying of gold.

They are as well provided with finiths, Other hancarpenters, and bricklayers, as most places dierastiin Europe, though a carpenter or bricklayer gets not above five or fix pence a-

Having thus given you a full account of the kingdom of Jasnapatnam, we will now go from thence along the fea-shore to Trinquenemale, taken 1639. by Mr. Anthony Caan; which might have been done before, whilft Mr. Adam Westerwold was in Ceylon, (there being no more than fifty men in garrison,) had not Raja Singa bent his thoughts upon Batecalo, or, as fome will have it, upon Matecalo, Trinquenemale has a most excellent harbour, (as you may fee by the draught,) nay, to fpeak the truth, the best and largeft in the whole ifle of Ceylon, there being more fecure riding at anchor here, than in the harbours of Belligamme, Gale, or

This place was feveral times relinquish. Trinqueneed, and rebuilt by our company, especial-male. ly during our war with the English, it being not thought convenient to leave to good a harbour, and fo conveniently feated for the interrupting all correspondence betwixt foreigners and Raja Singa, to the diferetion of an enemy; though the repairing of it, (during my stay in Ceylon,) under captain Peter Wascb, cost us abundance of people, that were fwept away by a phrenfical diftemper, which made them drown themselves in the sea. Some of their bodies being opened, certain worms were found in the fubstance of the brains, occasioned, questionless, by the violence of the heat, the continual labour, watching, and the feeding upon falt-provisions, but more especially by

Baldaus the cold night-fogs. After which time it was ftrengthened with fome additional strengthen fortifications, as appears by captain Pedwith 84-ter du Pon's letter, dated the 5th of Octational for tober 1667. from Macassar in the isle of offications. Celebes.

> Was once more ordered to fail " with fome forces to Trinquenemale, " to take once more possession of that "harbour and bay for our company, which I did accordingly with good fuccess; and having refortify'd the place with four bastions, and reduced "the circumjacent inhabitants to our fub-" jection, I left a sufficient garrison there, " and fo returned to Columbo.

> From Trinquenemale you travel by the way of Capello to Batecalo, the first place

conquered by the Dutch in this island, Baldans whereof we have given you the best acthat in case we should once live in peace with the king of Candy, (who is very old, almost doating, and much addicted to strong liquor,) our countrymen will be much better acquainted with the inland countries, than they have been hi-

According to the last letter I received from Tutecoryn, dated December 20. 1668. there had been lately an insurrection in the isle of Ceylon, so that they were forced to draw their forces together out of Saffragamme and Mannekewarre; but was appeafed fince, though the forces were not as yet dismissed.

Natural History of Ceylon. Their Pagodes, Convents, Monks, Manners, Habit, and OEconomy of the Cingalese.

HAving hitherto taken a view of those places of Ceylon that are under the jurisdiction of the Dutch company, we will now take a turn to Candy, the imperial refidence, as the most proper place to be informed concerning the real constitution of this isle and its inhabi-

The city of Candy.

The city of Candy is feated about thirty leagues from the fea-fide, and nine from Vintane up the river of Tring, vemale, about twenty-one leagues by land from Matecalo, and nine from the feashore, where the emperor has his docks for building and refitting his ships and gal-lies. The other cities of Ceylon being not described in any books, we must also pass by in filence here. All over the ifle you fee abundance of very fplendid *Pagodes*. The foundation of that of *Vintane* has no less than one hundred and thirty foot in circumference; it is of a great height, and gilt on the top; it is oval on the bottom, and arises into a four-corner'd point like a pyramid. The Great Pagode be-twixt Gale and Matecalo is also much cele-Their tem- brated, ferving for a light-house to ships as well as that of Trinquenemale. In the large high Pagode before mentioned stands an idol reprefenting a man with a naked fword in his hand, lifting up his arm, as if he were ready to strike. To this idol the Cingalese pay their reverence, and offer their facrifices upon all emergencies, or in time of fickness; for which reason they keep a basker in every house, wherein they gather fuch provisions as they are to facrifice. They believe that the world will not have an end fo long as that Pagode stands. Some worship an Elephant's Head of wood or stone, to ob-And idols, tain wifdom. They adorn their idols with flowers. These elephants heads are placed fometimes on trees in the highways, fometimes in little brick houses or chapels. You see also frequently in the high road certain heaps of stones, earth, or dung, upon which each passenger throws something as he paffes by.

Just by Belligamme I saw the figure of a man, at least fix yards high, cut in a rock about half a yard deep, who used to be worshiped by the Cingalese.

Near it is a high-peaked mountain, ac-Adam's counted the highest in the Indies, called mountain. Pico de Adam, or Adam's Peak; because they are of opinion, that here stood formerly the paradife, where Adam was created. They also tell you, that the print of the foot of Adam is to be feen to this day in the rock, the draught whereof is kept in the imperial court. Unto this rock a vast number of people flock from far distant places, to see this facred relick, though the mountain is of very difficult access, nay, (if we may credit Maffaus the jesuit,) quite inaccessible, unless by means of certain iron chains and iron spikes fastened to the rocks.

Some are of opinion that they reverence the chamberlain of the queen Candace in this place; who, according to fome historians, but especially Dorothaus, bishop of Tyrus, (a man equally famous for his learning and fanctity under Constantine the great,) preached the gospel in the Happy Arabia, Erythræa and

Taprobana.

There are also divers convents in Cey-Convents lon, and a great number of Brahmans and an priefts, who are in great veneration a- of Ceylon. mong the common people: they never eat any thing that has been living, or is capable of producing any living substance, as eggs, &c. Their friers wear yellow habits, with their heads shaven all over, for which reason they never appear in the streets without umbrello's, and beads in their hands, muttering out certain prayers as they go along. Their conprayers as they go along. Their convents have divers galleries and chapels, wherein are placed the statues of several men and women, who, as they fay, have led holy lives. These are adorned with gold and filver apparel, and attended with burning lamps and waxcandles day and night, placed upon al-tars, the candlefticks being supported by naked boys artificially carved. The friers have their certain hours for prayers, which they perform in these chapels.

They have also their publick pro Their pro-cessions: the head or abbot of the cossions. convent being mounted on a fine elephant, fumptuoufly harneffed with an umbrello over his head, marches along the ftreet in great pomp, under the

Baldeus, found of horns, trumpets, and other fuch fort of mulick, making an odd kind of harmony, accompany'd by a great number of men, women, and children; the maidens of quality dance all along before the elephant naked down to the middle, their heads, arms, and ears adorned with golden bracelets and jewels; the garments which cover their under parts are of different colours. They pay their daily devotions to a certain idol called

baja, by proftrating themselves upon ac ground, and alterwards classing their hands together over their heads. But concerning the religious worship of the Cingalese we shall have occasion to say more the following treatife, which in effect diners very little from the Ma-labars and those of Coromondel, except that they are not altogether such bigots, the emperor of Ceylon allowing liberty of confcience to all nations. The Cingalese are not so stubborn, but that many of them have been, without much difficulty, converted to the Roman faith, and fince that to the reformed religion.

The genius For the rest, the Cingalese are naturally of the Cine active and ingenious, and good work

men in gold, filver, ivory, ebony, iron-Baldaus, works, &c. arms inlaid with filver; eloquent, nimble, courageous, fit for warlike exploits; fober and watchful. They march one fingle man after another, by reason of the many narrow lanes in this country; their arms are a half-pike; their drums are fmall, but make a great noise, which may be heard at three leagues distance in the mountains; they are best in the pursuit of a routed enemy. Since they have converfed fo much with the Portuguese, and other European nations. they are grown fo cunning that they must not be too much trusted, nor despised.

Inceft is fo common a vice among iem, that when husbands have occasion to leave their wives for fome time, they recommend the conjugal duty to be performed by their own brothers. I remember a certain woman at Gale, who had confidence enough to complain of the want of duty in her husband's brother upon that account. The like happened in my time at Jafnapatnam; which had been likely to be punished with death, had not, at my intercession, and

CHAP. L.

The Cinguiste are in shape and manners not unlike the Malabars, with long hanging ears, but not fo black. The dress of the men is a veft, called Ropillo, of woollen or linnen cloth; their under-garment is a piece of linnen wrapped about the middle, and drawn through both their legs, like a pair of breeches. On their heads they wear a kind of red caps, fuch as we call rock-caps, which they look upon as a fingular ornament; and in their ears rings and precious stones. The hilts of their fwords or feymetars are commonly of filver, ivory, or gold, with flaming blades.

The common people appear for the most part naked, having only a piece of cloth wrapped round the middle to cover their privy parts. The women go with their breasts uncovered, being generally well-limbed. Instead of a head-dress, they have a way of tying their hair together like a cap: they wear golden or filver necklaces about their necks, and rings on their fingers

The Cingalese, as well as the Malabars, are much addicted to idleness and pleasures, and infift much upon their pedigree: they marry as many wives as they think fit, as well as the Mahometans, of which there Baldaus. live a confiderable number in this isle: they marry their daughters at ten or eleven years of age, a custom not to be rooted out among them, they being very fond of the virginity of their wives. They bury their dead after the manner of the pagans.

In their houses they are excessive neat ; Their accoand use instead of trenchards and tablecloths the leaves of fig-trees; their fpoons are made of coco-nutshells, and their drinking veffels of earth, with hollow pipes, through which they pour (like the Moors) the drink into the mouth, without touching their lips; for as the Cingalese and Malabars infift much upon their noble defcent, fo they will neither eat nor drink with those of an inferior rank, nay, many of them are so proud, as not to eat with

Fertility of Ceylon. A Description of the Cinnamon and Snakewood. A strange Tree.

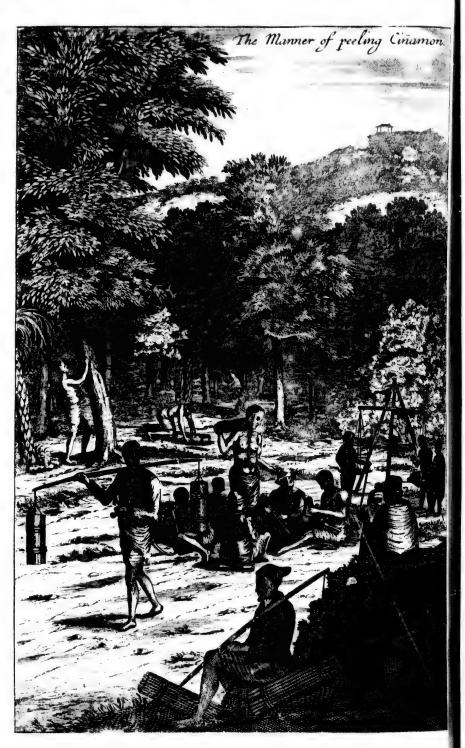

rice, and all forts of fruits, as ananas, cocos, the best oranges, lemons, and citrons, exceeding by far those of Spain and Portugal; fig-trees, cajouves, grapes, potatoes, quiavos, papajes, and pomgranates. You have here fresh grapes the whole year round, except in the three winter or rainy months. It abounds also in sugar-reeds, and mulberry-trees, which produce a good quantity of filk; as in ginger, pepper, cardamum, tobacco, wild palm-trees, affording vaft quantities of a kind of fug ; and the juice called Suyri, their ordina drink: they are ftored also with calabaistrees, cotton-trees, areek-trees, Portuguefe figs, mangos of divers forts, long pepper, melons, water-melons, onions, and garlick. Since the fettling of the Dutch here, they have also propagated, with good fuccess, cabbages, afparagus, carrots, and radishes: but the Helen, or the bride, in contest of this ifle, is the finest and purest cinnamon, which growing only in this island, no wonder if we have disputed the entire pos-

Vol., III.

HE ifle of Ceylon is very fertile in fession thereof for the many years with the Portuguefe.

This precious fe e is called by the A Cingalefe, Cureneo (40), and the tree in Curindo Gas, fome of which are of a great and bulk, their leaves refembling those of the tree. lemon-trees, but not quite fo broad; the bloffom is white, and of an agreeable f 63 which produces a yellowish fruit, nonth like a fmall olive; out of which the inha bitants press an oil, not much differing both in colour and virtue from that of nutmegs, but in fmell like the cinnamon

The cinnamon-tree has a double bark, the outward bark being taken off with a crooked knife; the inward rind is cut with a knife, first round the tree, and then in length, which being exposed to the funbeams in the fields, shrinks together into fuch fmall rolls as we fee them in Europe. The trees that are thus peeled, perifh, inflead whereof the fruits that fall upon the ground produce other cinnamon-trees, The wood is very white, and used by the

Cii

alder

Three for if comma-

be Sna

Baldaus, inhabitants for building. It is observable, that these cinnamon-trees do not grow all over Ceylon, but only in some certain places; for in the whole kingdom of Jafnapatnam, and the ifle of Manaar, none of thefe trees are to be feen, but only beyond the river Chilau, in the country about Negumbo, and the inland countries, as likewife near Gme, Titles grow together, but are generally teen in moved with other trees. Whilft I likewife near Gale. These trees seklom was minister at Gale, some of my slaves used now and then to bring some cinnamon-wood among the rest into the kitchen, which when put into the fire, emitted a very odoriferous feent.

It is further worth taking notice of, that whereas, according to the judgment of the naturalitts and physicians, the cinnamon is very hot, yet does the root of the tree produce not only a water fmelling exactly like camphire, but also the strongest-scented camphire itself. I have feveral pieces of it, which fmell to flrong, that I am fcarce able to endure it. Out of the cinnamonwood, whilft yet green, they diftil a water of an agreeable fmell, and very wholesome to our bodies. The natives make out of the outward bark of thefe trees curious cabinets: I have fuch a one by me of a confiderable bigness, which was presented me by major Peter du Pon, 1665. just upon my departure from Ceylon.

The East Indies produce three different forts of cinnamon; 1. Is the finest cinnamon, called Canel Fino by the Portuguese, being the fame that is taken from very young, or at least not very old trees. 2. The coarse cinnamon, called Ganel Grosso by the Portuguese, taken from very thick and old trees. And, 3. The Canel de Mato, or wild cinnamon, which grows likewife on the coast of Malabar, but is in no esteem; for whereas a Baar of Ceylonese cinnamon is fold for fifty or fixty rixdollars, the wild cinnamon yields not Though I have above ten or twelve. heard fome of the most ingenious of the natives affirm, That the wild cinnamon might be much meliorated, and made fit for use. The Dutch company is now, through God's bleffing, in the pofferfion of the cinnamon of all kinds, as likewife of all the spices, viz. of the nutmegs, mace, and cloves, except the pepper, which

grows in feveral places.

The Snakewood, or Lignum Colubrinum, grows most frequently in the ifle of Cey-

lon: it is white, inclining to yellow, very Baldaus. hard, and of a bitter tafte; it is in great request among the Indians, and accounted a good remedy against feveral distempers: they powder it, and rub the whole body with it to cure the itch: they also take an ounce of powdered Snakewood in water o tri use wine against the cholick, burning fevers, among the and other differences, but especially against the flings of the ferpents, of which there are many in this iff ind.

The Cingalese naturalists say, That the How 8-1 virtue of the Snake wood was first discovered discovered. by a certain fmall creature called Quil, or Quirpele, by the Portuguese, being of the bigness of our ferrets, wherewith we catch the rabbits. Of this kind the Indians keep many in their houses, partly for sport, partly to catch rats and mice with. This creature having a natural antipathy against Antipathy the fnakes and ferpents, whenever it is between the flung by them runs to the Snakewood, and and the after having eaten of it, is cured of its ferpent. wound. Marcellus de Boschbower, a person in great efteem in Ceylon, relates, That he has feveral times feen this Quirpele engaged with fnakes, and amongst the rest, one that vanquished a ferpent; but being wounded, run to the next wood, and having eaten fome of this Snakewood, returned in half an hour to the place, where its vanquished enemy lay extended dead upon the ground. The Cingalese call the root of this tree Nay Lelli, unto which they attribute a fingular virtue for the cure of divers diffempers.

There grows a strange tree in the isle of Ceylon, called the Root-Tree, pecause its branches turn to the ground like ropes; where taking root again, they produce a tree that spreads in a short time over a fpacious tract of ground. Ceylon produces also tamerind-trees of a confiderable bulk, the fruit whereof is accounted an excellent remedy against the scurvy and dropsy. There grows another tree in Ceyion like our Noli me tangere; for if you go to touch it, it moves backwards, and gives way to your hand.

For the rest, Ceylon is sufficiently provided with medicinal herbs, and they cure all their diftempers with green herbs, in the use whereof their physicians are better verfed, (by experience,) the many of our pretending furgeons, God Almighty having provided reme lies fuitable to the diftempers of each country.

CHAP.

Elephants

How they

take and

elephants.

CHAP. LI.

Great Number of Elephants in Ceylon: Are very pernicious: Divers Instances of it. How they take the Elephants. Their Bufflers, Tygers, Bears, Birds, Fishes, Crocodiles, and Porcupins, or Sea-

Baldaus. THE ifle of Ceylon abounds in all forts or other to fwim. This is done by putting Baldaeus. of four-legged creatures, birds, fishes, stones, and certain products of the sea, of each whereof we must say something.

Among the four-legg'd beafts, the elephant challenges the first rank: of these there are great numbers here; and so pernicious, that it is not fafe travelling without fome foldiers with their drums and kettles, the noise whereof frightens these creatures: they are most dangerous towards evening when they are hungry; for the Coelys, or littermen, often run away at the fight of an elephant, leaving those they carry to fhift for themselves.

I remember, that in my time, a Portuguese reformed minister, named John Fereira d'Almeyda, travelling with his wife from Gale to Columbo, the litter-carriers (according to their cuftom) ran away at the fight of an elephant; who did, however, not the leaft harm, but laying his trunk upon the woman's Palankin, or litter, went away: but things of that nature happen not always alike.

I observed once as I was travelling from Manaar to Jasnapainam, that the elephants had done confiderable mischief hereabouts; and during the rainy feafon had rendered the ways almost unpassable. We had the good fortune to escape narrowly the danger of an elephant who killed a certain negro, one of the commanders of the elephanthunters, in a place we had paffed not long

At Mature are vaft stables, where the wild elephants are tamed, and afterwards fold to the Moors of Bengale and Coromandel. They take the elephants near Mature in the following manner: they fix abundance of large stakes or trunks of trees in the ground, fo as to leave the entrance wide enough, but growing narrower within by degrees; in these they have certain traps, and the wild elephants being decoyed by the tame ones into these enclosures, are catched in the traps, or fnares, like as we do in our decoying ponds. They are very hard to be tamed, and require fometimes four whole months before they can be brought to lie down: all this while they must be carried twice a day to some river a wild elephant betwixt two tame ones, who take such care of the other, that they hit him from both sides with their trunks, till they make him pliable, and at last quite

It often happens that the young elephants are taken in following the old ones. These are very unlucky: I remember, that one time as feveral of us were talking together, one of these young elephants came slily and pushed with his back-side against one of our company, that he was ready to fall upon his nose.

They feed upon green herbs and leaves of fig-trees, coco, and other trees; neither do they refuse areek and sugar. At a certain time of the year an oil iffues out of the heads of the old elephants, when they run mad, and oftentimes kill their Carnak, or guides. Ceylonese elephants are accounted the largest and best in the Indies; and, if you will believe the natives, are adored by the other elephants.

Horses (great enemies of the elephants) Horses. were brought first from abroad into this ifle. The Portuguese having some years since sent horses into the isle de Vacas, they are multiply'd to fuch a degree, that you may fee them feed in herds of fixty, feventy, eighty, or one hundred.

Of bufflers they have a great store in Bufflers. Ceylon: I have feen whole herds of them of one hundred, and more, feeding in the countries of Chilau and Madampe, which were but indifferently peopled at that time. They have also hedge-hogs, oxen, cows, bulls, fheep, goats, ftags, does, elks, tame and wild boars, hares and partridges, peacocks and apes in abundance

The woods here produce also some ra-tygen and venous beaits, as tygers; though I never bears. faw any, but had a grey-hound given me by a Portuguese who bore the marks of a yger's claws on his buttocks. Bears I have feen, both in Jafnapatnam and Manaar: I faw once five or fix young ones drowned in Manaar by the inhabitants, who had found them at Mantotte, and thought fit to take this course with them, to prevent their increase.

They aboundalfo in Jackals, a creature very Jacksis. greedy after mens flesh ; for which reason they cover their graves with great stones; they fometimes take them with grey-hounds, but when they are hard put to it, they pifs, which emits so nauseous a scent, that the hounds cannot endure it. The flesh of the Jackals is given with good fuccess by the phylicians of the country to cure the confumption. Towards the evening the Jackals meet, and make a most dreadful noise, and will fome times fall upon paffengers. In my time a Caffer, who was in drink, had his teeth eaten out by the Jackals. The Jackal is not unlike a fox, and has exactly fuch a tail. The Malabars call the Jackals Adiviis. I faw but one leopard in the ifle of Ceylon; and not one unicorn or rhino-

CHAP. LII.

Crows.

Eiftes.

Ceylon affords vaft quantities of birds, called by the inhabitants by peculiar names. Crows you shall see by thousands about noon upon the houses; but they are so cunning as not eafily to be shot, except through a hole or fmall window. Towards night they leave the towns, and retire to the trees in the country, and in the morning early look about for prey. If one of them happens to be killed, the reft make a most All forts of terrible out-cry.

There are certain birds in Ceylon called Minhotos by the Postuguele, who often make bold with the young chickens: they have also owls that make a dreadful noise in the night-time. They abound in go se, herons, wild and tame ducks, peacocks, pigeons, turtles, partridges, parrocets of most delicious colours, peewits, swallows, bats, &c. Among the rest, here is a certain bird which builds his neft hanging on the branches of the trees. They have also abundance of fine finging-birds, nightingales, and larks in abundance; fea-gulls, water-fnipes, bees, fire-flies, gnats, and locufts.

Ceylon produces great plenty of fish, as cacap, plaice, crabs, pikes, king fifhes, fail-fifhes, craw-fifhes, haddocks, galleonfishes, sharks, orados, fardins, large smelts, bat-fishes, seals, oysters, muscles, shrimps, pampus, barbels, bomtos, corquados, &c.

Among the amphibious creatures, the Baldieus. Kaiman, or crocodile, called Lazarto by the Portuguefe, is very frequent here; some of Grosoulies. which are eighteen foot long. They have four feet with crooked claws, their skin covered with scales, which are so hard upon the back, that they are musket proof; to that they are not vulnerable except in the belly and eyes: their under-jaws are unmovable, but they have fharp teeth : their back-bones being without joints, they cannot turn fhort, whence the best way to escape them, is to get away from them by many windings and turnings. 'Tis generally believed here that the crocodile has a thone, or rather bone in the head, which given in powder is an excellent remedy against the stone. The bones of the sharks

Mr. Rochefort fays, That in fome of the rivers of the iffes of America are certain crocodiles that fmell like musk. I have with amazement feen crocodiles lying upon the water like logs of wood, with their eyes thut; and if they happen to meet with a prey, they leap at it on a fudden, like an arrow from the bow.

are accounted very good against the fame

diftemper.

Vincent le Blanc tells us a story of a burcr-matter's servant of Alexandria, who pasfing near the river-fide, was devoured by a crocodile which he took for a log of wood fwimming upon the water. They fay, that they have a white fat, which is an excellent remedy against sharp humours that settle in any part of the body. In Jafnapainam there are many crocodiles in the fens, ponds, and lakes; which if they happen to dry up in the fummer, they dig holes to live in; we were often vifited by them in our camp before Jafnapainam, but they did no mischief. The Chinese make a dainty dish of the young crocodiles.

In the isle of Manaar are great number: Percupines. of very large porcupines, or sea-hogs; they have very sharp teeth, and their flesh is fit for food; the females have breafts and milk; they come often ashore and feed

CHAP. LIL

Serpents of Ceylon: Remedies against their Stings. An odd Story of a Serpent-Catcher. Precions Stones, Products of the Sea. Amber-Grease; its Goodness.

Baldeus. SERPENTS are very common all over the ifle of Ceylon: the Sea Serpents are fometimes eight, nine, or ten yards long. The Land Serpents, called Rateatchers, are also very large, live on the tops of the houses, but are harmless creatures. The most dangerous are those called Cobres Capellos by the Portuguese, which frequently used to kill people whilft I lived in Jafnapatnam. So foon as any body is flung or wounded by these serpents, they apply the Adderstone to the wound, agams and give the patient some similar for fung. furgeon, Albert van Lambergen, writ to me 1666, that being flung by a ferpent, he became blind, but after some time recovered his fight. A parishioner belonging to the Church of Manipay, as he was mending the top of the church, happened to be wounded by a ferpent that lay hid among heap of leaves, and died foon after. a heap of leaves, and died foon after.

faw once two ferpents twifted round one Baldieus. another fporting under the wall of the fame church, which I ordered to be cut to pieces by a foldier. Such of the inhabitants as retain still some remnants of paganism, will not allow the serpents to be killed.

The Malabars call the serpents Pambo and Naga, and give their cattle and children their names, nay, they feed them because they should do them no harm. The ferpents come frequently into the houses, especially in the rainy season. During my abode at Jafnapatnam, two dogs were flung to death in the house; and I have feen them fometimes pass up stairs over the beds. Another time a ferpent passed so near my wife in the house, that he touched her leg with the tail, and was afterwards killed by the fervants,

Raldaus. There is also here a kind of adders, called vipers by the Portuguese; they are speckled, and very venomous. lived at Jafnapatnam, a certain High-German foldier belonging to the garrifon (commonly known by the name of the Serpent-Catcher) being fent for by Mr. Anthony Pavilion, governor of Coromandel, to take a certain Cobre Capel that was in his lodgflory of a ing-room. He came accordingly; and with his hat only before his face, laid hold with his other hand of the ferpent, without receiving the leaft harm: he did handle the creature afterwards in our prefence, and not only carried it away in his fnapfack, but also used to sleep near it. I suspecting some witchcraft in the matter, talked to him ferioufly about it; but he affured me, That nothing was done but

> whole mystery. Among the inhabitants of the coast of Coromandel, and the Cingalese and Malabars, are certain fellows, who have an art of making the ferpents fland upright, and dance before them, which they perform by certain enchanting fongs. Those that are to take an oath in those parts, put one of their hands into an earthen veffel, wherein is a serpent: if they escape without being wounded, they are supposed to swear true;

by natural means; and that he always car-

ried the head and heart of a ferpent about

him: wherewith I was forced to rest satisffied, he being not willing to discover the

but if not, on the contrary.

- Upon this occasion I cannot forget to against the mention some remedies used against the stings of serpents. First of all, it is requifite to bind the affected part, above and below the wound, to prevent the poifon from being communicated to the mass of blood; and afterwards hold it over, or as near to the flame as it is possible. I would have every body that goes to the East-Indies, to provide himself with some Orvietan, Theriac, Mitbridate, confection of Alkermes, balfam of Peru, Rue, Scordium, Scorzonera, Ang lic, and Contrabierva roots, these being great cordials and antidores.

They must keep to a cooling diet, and avoid purging and bleeding; but instead thereof make use of bathing, to open the pores of the body. The peel of lemons or citrons taken fresh from the tree, is accounted an excellent remedy, and falting fpittle applied to the wound. If you can take the ferpent that has given the wound, bruise the head, and apply it to the affeeted part. However, the Adderstone furpasses all the rest; but is often adulterated. The right one raifes no bubbles

upon the water, and flicks close to the lips, Baldeus, if put to the mouth.

The ferpents of Geylon are not altogether fo large as those of Java and Banda. At Batavia there was once taken a ferpent, which had fwallowed an entire ftag of a large fize, and one taken at Banda had done the fame with a negro woman.

Befides these serpents, Ceylon produces feveral forts of other crawling creatures, as Thousand Feet, called Millepie by the Porturuese, which are sometimes seven inches long; scorpions, spiders of a prodigious bigness, frogs, tortoises, toads, &c. Ceylon also affords divers precious stones, as Sa- Precions phires, Rubies, Topazes, Granats, &cc. flones. Some fay it also produces gold, filver, iron, and other metals; but that their kings will not allow thefe mines to be dug. This feems not improbable, it being certain that iron has been bought out of the country. It affords also chrystal in abundance. The commodities chiefly vended commodihere by the *Portuguese*, were coloured ties sold stuffs of all forts, velvets, filks, red caps, here. porcelain spices, Amfira or Opium, China root, camphire, musk, fandal-wood, lead, copper, tin, falt-petre, brimflone, gilt looking-glasses, glass bottles, painted callicoes of Suratte and Coromandel; all which are still in vogue here.

The ifle of Ceylon has besides fish, several products of the fea. Of the pearls and pearl-fishery we have spoken before, in the description of Tutecoryn, Ambergreese Ambers, is found here sometimes near the sea-shore, greese. in good large pieces, and of the best kind: they call it Panabambar in the Maldive islands. This precious drug was altogether unknown to Hippocrates, Dioscorides, and Galen; and to this day its true origin is a riddle to us, though fome will have it to be the feed of the whales, others a certain Its origin. fine earth, others a certain pitch or rolin, growing at the bottom of the fea, and forced thence to the shore by tempests. Certain it is, that it is generally found after flormy weather. Mr. John Huygan van Linschoten mentions a piece of Ambergreefe taken up near the cape Comoryn, 1555. which weighed thirty quintals. It is faid, That the birds are very fond of the fcent of it; and the prints of the bills of birds have fometimes been perceived in the Amber, and is accounted a certain fign of its goodness.

Mr. Rocheford, in his Natural History of the American Islands, fays, That the amber there, when first taken, has so nauseous a fcent, that the birds are drawn towards it as by the fmell of a carrion; he fays it

finells like rank bacon,

Baldens. The Amber is of different kinds; the black (the worst of all all) is found near the isle of Mauritius; next is the white, and the grey, the best of all. In some parts of America there is a kind of amber, they call the foxed amber, because it is swallowed and vomited up again by the foxes without any alteration, except that it loses something of its scent. The best ambergrease is of an ash-colour, like athes mixed with wax. It is adulterated with wax, rosin and pitch; to know the real goodness of it, you must thrust a hot needle into it, and by the smell of the moisture that adheres to it, you may judge of its goodness: you may also lay a small quantity of amber upon a hot knife; if it be good, it will melt im-

mediately like wax; and provided the Baldæus, knife be very hot, it will quite evaporate without leaving the least dregs behind.

Scaliger, Garcias, Monard, Fernandes
Lopes, Clufius, and Rocheford, have written of the ambergrease; its medicinal virtues we leave to the judgment of the phyticians.

The fea about Ceylon produces likewife whole coral-trees, some branches whereof curiously grown I preferve in my study. It affords also certain horns of sea-horses, called Chankos, which are frequently transported to Bengale, besides divers other forts of horns and shells, (but not so curiously twisted as those of Amboyna,) sea-aples, sea-stars, and such like.

THE

THE

IDOLATRY

OF THE

East-India PAGANS.

GIVING

A true and full Account of the Religious Worship of the *Indosthans*, the Inhabitants of *Coromandel*, the *Malabars*, and *Ceylonese*; with a Description of their Idols.

PART I.

CHAP. I.

The general Consent of all Nations concerning the Existence of God.

Divers Sects of the Brahmans. Their Opinion concerning the

Creation. The Idols Ixora and Quivelinga.

HE existence of a God, or su-Baldeus. preme being, is fo firmly rooted in the heart of mankind, that there is no nation in the world but what has acknowledged the fame. What is alledged to the contrary by fome of the Chiles, Tapujars, Brasilians, Madagascariaus; as also of the inhabitants of Florida, the Caribee Islands, and especially of the cape of Good Hope, must rather be attributed to the want of knowledge of those authors, than real truth. Of this I was sufficiently convinced, 1666, when I tarried three months at the cape of Good Hops, where I found these barbarians to perform their religious fervice in the night-time, which I had no opportunity to observe in 1665, when I came that way before. What is said of Diagoras, Theodorus, Cyrenaicus, Bion, Evemerus, Lucianus, Epicurus, and ef-pecially of Protagoras, Abderites, and Socrates, and their denial of the existence of God, being to be understood only of the plurality of Gods, which was always Vol. III.

rejected by the wifer fort among the pagans: Whence it is, that we meet with the titles of Ens Entium, the Being of all Beings, Ens primum, the First Being, Primus motor & vis motrix, the First Moving Cause and Substance, in their

This being laid down as a fundamental rule, we will proceed to give an account of the idolatry of the pagans inhabiting the coaft of Malabar, and the Indies on both fides of the cape Comoryn, viz. at Tutecoryn, Trecanor, Coulang, Caleculang, Cockin, Cranganor, Calecut, Cananor; as also on the coaft of Coromandel, and the ifle of Ceylon. According to Rogerius, the Brahmans are distinguished into fix sects, viz. Weishnowas, Seiria, Smaerta, Schaerwacka, Pasenda, and Tichedea; and the Benjans of Gusuratte into no less than fixty-three: But in the forementioned parts, the Brahmans are divided into four head-sects.

The first are the Cenrawack, who use side of the neither fire, nor candles, nor cold water, Brahmant o F

Baldieus, for fear it should contain some living creaures; they do not pass the streets, unless they be fwept before with a broom, which they always carry with them, for fear of treading upon any thing that is living. They believe neither God, nor providence, but that all things are produced by chance.

The feeond feet is called Samaraeth:

they actually believe a God.

The third Bifnou, who call their god, They have a fast, which begins in

August, and holds forty days.

The fourth feet is that of the Goegii, who have no habitations of their own, but fleep in the night-time in the churches; they walk generally naked, having only a cloth to cover their privities, and befmear themselves all over with ashes. They believe a God, (whom they call Bruyn,) the creator of the universe, who is in every thing, whether man or beaft, (though he cannot be fron by the creature,) gives lightto fun and moon, and annihilates what and when he pleafes. They fay, that fuch as die in their faith, go directly to their god Bruyn : They do not burn, but bury their dead. Whoever embraces their feet, is obliged to take near a pound of cow-dung, every day among his ordinary food, for fix months fuccessively, the cow being accounted facred, and her dung the purefithing among them. They are very superstitious: a cart, buffler, or als without a load, a dog empty-mouthed, a he-goat, apc, a goldfmith, carpenter, barber, taylor, imith, cotton-weaver, a widow, a burial, or fome body going to a burial, are altogether ill omens to them; as an elephant, camel, an horse without a burden, a cow, an ox and buffler laden with water, portends good

see Roge luck in their opinion. Some acknowledge Tax Texe- one Villion for their supreme god; but the Caron moit, one Ixora, We will first treat of vin Twin, Ixora, and afterwards of Villion and

Branina.

The Brabmans have a very odd opiorman to the creation of the world (of nancos which more hereatter.) They fay, that coming the this world will diminish by degrees, till me world, it comes to a drop of water, which is the Incretta, or Divinity itself: after that, it shall encrease again, when Ixoreita crying out aloud, Quen, quen, will make it turn again into a fingle drop of dew. This will make it revive again, first into a mustard-feed corn, then turn to a pearl; and, lattly, into an egg, containing the five elements. This egg, they fay, is to have feven diffinct shells or partitions, like an onion; whence will break forth the fire and air upwards, and the others down-

warda; and the egg being thereby bro-Baldaus, ken into two pieces, the upper part produced the heavens, as the under part did the earth; and because the egg had seven fliells, which by the divition thereof made fourteen half ones; the feven uppermost parts furnished the matter for leven heavens, as the feven undermost did for as many worlds. An unpardonable contradiction, when they themselves acknowledge their Bramma, and implore him, as the creator of beavens and earth; and how incongruous is it, to make the Ixoretta, or divinity, subj at to decreife?

They further add, that at the opening of the beforefaid egg, there appeared a thread drawn all along the middle, which joined the fourteen upper and under worlds: Ixeretta then taking his place in the high it iphere of the heavens, there arofe at the fame time, a mountain on the carth, named Calija; on the top of which, flood a triangular fubitance (Tricona Sacra) which produced a round fubstance, called Quivelinga, i. c. the members of ge-What Quineration of both fexes; which Quivelinga, velinga they fay, is Ixeretta, or the divinit; : for was. finding that all living creatures were procreated by the carnal copulation of men and women, they reverenced this Quivelinga, as the original of all created things, and adorned him in their temples with the best sweet herts and flowers. They have a certain religious order called Jogiis, who wear the figure of this Quiclings, either of wood or copper, about the neck, and offer him daily the bett of their victuals. Regerius speaks to the fame purpose of the Lingam, i. e. Membrum virile in muliebri, as the Ixora, or E/wara is represented in their Pagodes. St. Auflin * tells us fomething like this *L. z.z.t

of the Priapus, which used to be car-de vitale ried in procession, in honour of Bacebus, through the cities of Italy; and that the matrons ufed to crown his membrum virile with garlands. I have read in feveral authors of known integrity, and speak it upon the credit of divers people yet living, That the Canarins, and inha-Contrins bitants about Gos, do carry their brides ferther to fuch a Priapus, in order to deliver Priapus. them of their virginity. The whole matter whereof, I will, for modefty's fake, relate in Latin: Sponfa magno comitatu multaque cum pompa inter plaufus ac fonos musicos ducitur ad idolum, quod enea virga vel ferrea, vel eburnes prominente praditum conspiciour, & ad bane nudata veste sponsa a mate e vel a proximis consanguiness vehementer impellitur, quod cum abfque gravi dolore fieri nequeat, illiqui adfunt, cantando & saltando sponsa flebiles voces

Baal Phegor feems to have been the Priapus of the Jews. Jerome, in his commentary upon the prophet Hosea, says, That the Jewish women worshipped Baal Phegor, ob obscani magnitudinem membri,

quem nos Priapum possumus appellare.
The Brahmans will indeed not allow of this interpretation, alledging, that they adore under this, the circular figure, which is infinite; whereas the fignification of the word fufficiently contradicts them. Quiveling a being composed out of the word Linga, or Lingam, i. c. the manly yard, ad Quiven the same with Ixora; and the figure carried by the Jogii, exprefly represents the conjunction of the members of both fexes.

Quivelinga then (as we faid before) is Baldaus. of a circular "gure, which being inclosed \\
in three distinct rinds or shells, which they fav .re transmuted into three gods, viz. Bramma, Viftnum, and Quiven; the first and hardest produces Bramma, the second Viftnum, and the innermost Quiven. Quivelinga being thus despoiled of his shells, was burnt to ashes by fire, and fixed in the triangle. Quivelinga being thereby become a thing without fense or motion, it was requisite it should be guarded by fome body; which Bramma and Viftnum refuting to do, Quiven undertook the task, and constantly attending Quivelinga with prayers and facrifices of flowers, deferved thereby to be ranked above his brothers, and obtained the title of the reat god, as their poets call him. The Braimans fay, that Bramma, Viffnum, and Quiven, or I wra, are commissioned by the first being to rule the world in the nature of his viceroys. They fay Ixora refides in Calaja, Viftnum in the Milk-Sea, and Bramma in Sattiolagam, or the highest place in heaven; of which more hereafter,

CHAP.

the East-India Pagans.

A Description of Ixora: His Wives. Abstinency of the Brahmans. Divers Sorts of Eunuchs.

A Descrip- TNORA is as bright and white as milk, with three eyes; two whereof are placed as those of other men, and the third in the front, being fo full of fire, that it confumes every thing it looks upon. His to biguefs stature is immense; for Bramma being detirous to fee his head, foared up high into the earth, but could not reach it. Viftnum (whom they call the god of inventions and changes) having the fame curiofity to fee his feet, which reached deep into the ground, transformed himself into a hog, the better to dig up the earth, but could likewise not obtain his wish; for, fay they, Ixora is of fo vait an extent, that the ferpent Bategu (which is tiently re- fo long as to compafs the feven worlds with horns, and the feven feas) was not big clough to reaching up forve him for a bracelet. I heard a pagan once ridicule a Brahman, because he put

much larger than the serpent Bategu. Ixora has no less than fixteen hands, wherewith he holds the following things: * As Pan a beart, a chain, a fiddle, * a bell, porcelid his lain bason, capalla, i. e. Branmo's head, thate. a trident, a rope, an an, fire, gold, a drum, beads, a staff, an iron wheel, a ferpent, with a crefcent or half moon on his tore-

the figure of Ixora in his chamber; where-

as, according to their opinion, it was

head. His apparel is a tyger's skin, his cloak the hide of an elephant, furrounded with serponts †. He wears about his pean neck a collar of the skin of a certain more that creature, called Minulegas, on which is planter, faftened a bell, fuch as our oxen or fheep the form

He has also about his neck three chains; two the diberone whereof being intermixed with roles nature in and other flowers, affords an odoriferous flars, feent. The fecond is made of the heads flowers. of Bramma; for they fay, that Bramma ifies, &c. dies and revives every year; and that Ixora, gathering his heads as often as he dies, had made this chain of it. The third is made of the bones of Chatti, one of Ixora's wives; for it is to be known. that he has two wives, one named Grienga, or the Goddess of the Seas, whom he always carries in his hairlocks; the other this Chatti, otherwise called Paramesceri, who they fay dies and revives once a year; and as often as the dies, he takes one of her bones, which are put into this chain. He carries also the same beads as the Prahmans do, his whole body being befmeared with athes, and thus rides in triumph through Calaja upon an ox named Irixapatan, unto whom they offer certain

Baldaus. His attendants are called Pudas, Pixaros, and Pes. Pudas is represented like
a fat and short perion, with a large
paunch, without a beard, having serpents
hanging down, with their tails from his
head. He wears a bracelet on his left
arm, and two others about his thighs,
made of serpents, and a staff in his right
hand. The Pes and Pixaros are represented much taller, with burning torches
in their hands in the night-time.

They fay that Bramma has created the universe, Vifinum governs it, and Isora kills and puts a period to every thing. They further add, that Isora has communicated part of his substance to his wife Paramesceri, alias Parvati, and she again to him; so that they are both hermaphrodites; and Isora is sometimes represented as such; and Rogerius, Lib. II. says, That the Brabmans call their Isora, Ardbanari, i. e. a Manwife. There are, however, a certain fort of Brabmans called Tirimimpi, who are so far different from the rest, that they won't as much as cast an eye upon a woman; for which

reason as often as they pass through the Baldevith fitteets, they have certain persons, who bid the women go out of the way: thus the Hierophantes of Athens, and the pricits of the goddess Cybele among the Romans, used to deny themselves the use of venery, the first by castrating themselves, the others by certain drugs. The Jews districtinguish betwixt eunuchs made by God, were sund those made by men; the last are be-national to owe their original to the Perfians; and among the Jews they had certain persons, called Impingentes, because they used to run against posts and doors, rather than to look upon a woman.

Rogerius * mentions another fort of * Lib. II.

Rogerius * mentions another fort of * Lib.II, Brahmans, called Saufiazii, who renounce * 4- all worldly pleafures, abitain from women, and even the Betel, (though generally used all over the Indies) cat but once a day, have no fixed habitations, use nothing but earthen vessels, and live upon alms. The fundamental rules of their seet being to withstand lust, anger, covetousness, pride, the pleasures of the world,

and revenge.

A firici ors of Brahman

CHAP. III.

Contest betwixt Bramma, Vistnum, and Ixora, who is obliged to be a Mendicant twelve Years. A Child produced out of the Blood of Vistnum, occasions new Differences.

Baldieus. THE residence of Ixora is upon the silver mount Calaja, to the south of the famous mountain Mahameru, being a most delicious place, planted with all forts of trees, that bear fruit all the year round. The rofes and other flowers tend forth a most odoriserous scent; and the pond at the foot of the mount is inclosed with pleasant walks of trees, that afford an agreable shade, whilst the peacocks and divers other birds entertain the car with their harmonious noise, as the beau-tiful women do the eyes. The circumjacent woods are inhabited by a certain people called Mumis, or Rixis, who avoiding the conversation of others, spend their time in offering daily sacrifices to

It is observable, that though these pagans are generally black themselves, yet do they represent these Rixis to be of a fair complexion, with long white beards, and long garments hanging crofs-wife, from about the neck down over the breaft. They are in fuch effeem among them, that they believe, that whom they blefs, are bleffed, and whom they curfe, are curfed.

Within the mountain lives another generation, called Jexaquinnera and Quendra, who are free from all troubles, spend their days in continual contemplations, praifes, and prayers to God. Round about the mountain stand seven ladders, by which you afcend to a spacious plain, in the middle whereof is a bell of filver, and a square table, surrounded with nine precious stones, of divers colours. Upon this table lies a filver rofe called Tamara Pua, which contains two women as bright and fair as a pearl; one is called Brigasiri, i. c. the Lady of the Mouth; the other Tarasiri, i. c. the Lady of the Tongue, because they praise God with the mouth and tongue. In the center of this rose is the triangle (mentioned in the first chapter) of Quivelinga, which they fay is the permanent relidence of god.

Ixora being one time diverting himfelf in this Cajala, or Paradife, with Pudas, Pes, and Pixajos, let fall fome words, intimating him to be the greatest in all the world, which Bramma and Viftnum not

Contest be able to brook, a contest arose about the twist Ixo precedency; to decide which, Ixora told rs. Bram, and them, that which of the two could take Vignum. Vol. III.

a full view of him from head to foot, Baldieus, should be accounted the greatest.

Bramma hereupon got upon his bird Annam, (whereof more anon) and paffed up into the air, to get fight of Ixora's head, whilst Viftnum transforming himfelt into a hog, dug into the ground, to come at his feet. Whilft he was thus imployed, meeting with a most poisonous ferpent, he was fo startled at it, that he delifted from his enterprize. This ftory is related more at large by feveral of the

Malabar poets.

Bramma on the other hand, resolute in his defigns, foared very high into the air, when being met by three flowers, they asked him whither he was a going; he replied, to get fight of the head of Ixora: they told him, his labour was in vain, by reason of the vast distance; which made Bramma change his resolution; but at the fame time defired the flowers to tell Ixora, that he was prevented from coming fo high as his head by a sudden giddi-ness in his brains; which they promised, and did accordingly; but Ixora being fentible of the deceit, did with his Chacra, or feynetar, cut off one of the four One of heads of Bramma, and curfed the flowers. Bramma's heads cut Out of the blood of Bramma's head, of by Ixora. came forth a man with five hundred heads, and a thousand hands, named Sagatracavaxen. The day on which Bramma's head was cut off, was ever after looked upon as ominous, and named Pongalacha, i. c. Dies infestus; whence arose

done, It shall be at Pongalacha. The three flowers were curfed, viz. That one of them should grow upon a dunghill, and be cut down there; the other to be turned into a crow, and the

the proverb of a thing that is never to be

third into a cow. The Brahmans further fay, That Ixora to expiate the crime he had committed, by cutting of the head of Bramma, turned mendicant as the Jogii do, with Bram-ma's skull in his hand, till the fame should be filled with alms; whence arose that custom practifed to this day, that he who kills a Brahman, must beg alms for twelve years in the skull of the Brahman killed by his hands. Ixora therefore begged alms for twelve years; for though he received fufficient alms, yet by the fiery

CHAP.

PART I.

Read or rays that darted from his eye in his forebead, it was all confumed and turned to affice in an inflant.

One day as he was gathering alms among the beforefaid Mumis, their wives came running with whole ladles of blood to fill the skull; but not being able to furtain the glance of his eyes, they were to furprized, that they let flip not only their ladles, but also their clothes. The tyan at. Mumis feeing their wives naked, did fall o'e Mamis, pell-mell upon Ixora; one attacked him with an ax, which he feized and got up into the air; another would have killed him with a terpent, which he took in his hands, without receiving any harm; then they brought a furious tyger to devour him; this he killed and flead, and made a g.rment of the skin; then they fet upon him a wild elephant, who underwent the same fate, his hide serving him afterwards for a cloak; this ax, ferpent, tyger, and elephant, are the fame trophics he holds in his hands.

Vifinum willing to deliver Ixora, appeared to the Mamis in the flape of a most beautiful virgin, which occationed fuch a furprize to them, that the men (as their wives had done before) ted into a trance, and Ixora spilled his feed upon the ground, which Vifinum with his hand formed into a child.

Relieved by Inora being towards the end of the Villaum, twelfth year quite tired with his mendicant life, had recourse to Villaum, who

commiferating his condition, put out the Bilden fiery eye, that continued all the alms in the skull; which done, Viftnum wounded himfelt in one of his fingers, and filled the skull with the blood, which put an end to his pilgrimage, but gave birth to the order of the Jogii, who in the memory of Inora's pilgrimage, lead a mendicant life to this day.

Out of the blood of Viftnum a child Another was procreated, called Vareu, which oc-contoft. cationed new contests, Bramma challenging it as his own, because it was begot in his skull, Viftnum because it came forth out of his blood, and Ixora because it came out of his hands. To reconcile this difference, Devaindra, a king of the aerial spirits, perfuaded them to relinquish their pretentions by joint-confent; which they having confented to, Devandra educated the child at Devalogam, where becoming a famous bowman, he protected that place against Sagatracavaxen, who, as we told before, being the product of Bramma's head, had five hundred heads and a thousand hands. Afterwards Ixora returned to Calaja, his former refidence.

It is observable, that if one of their kings dies, they tie his hands and feet, when certain foldiers come to threaten him with their sticks; which affront, they believe, is a means to expiate the trespasses committed by him in his life-time against his subjects.

CHAP. IV.

The Children of Ixora. The Nativity and Constitution of Quenavady.

The Origin of Sura. Quenavady castrated. Contest betwixt him and Superbennia. His Habitation and Gluttony. Funeral Feasts of the Malabars.

Children of YXOR A had three fons and one daughter, the eldest resembling an elephant, the second an ape, the third had six saces and twelve hands. The daughter, who was as black as a coal, had the face of a hog. The eldest fon named Quenavady, was born in the wood by Piragu, with an elephant's head and face, the rest of his body being like other men; for Ixora walking one time with his lady Paramefceri towards the wood Piragu, she faw an elephant sporting with a semale of the fame kind, and so raised her appetite, that she defired Ixora to be both transformed into elephants; which being done accordingly, they eat of a certain fruit dy's origi- in the wood, which made them quite frenzical, fo that they made the fame

noife, overturned the trees, threw up the fand with their trunks, and did all the other actions of elephants, not excepting even their copulation. The female having conceived immediately, brought forth this child with the elephant's head and face, and foon after they refumed their own shape. Parameferi tried to give suck to this young monster, but being in danger of having her breast torn in pieces by it, she delivered it up to Ixora, who had it brought up in Calaja.

This Quenavady had the hand, teeth, A decreand face of an elephant, with large hang-time of ing cars, and ugly lips, with red pim-bind, ples all over the face: His hair is long, (like his father's,) tied about with a ferpent, or adder, with a crefeent or half

Bildicus, moon on his forehead, and four hands, befides the trunk; the rest of his body like other men, but shining like gold, with a large paunch tied about with a red piece of stuff: he wears also the girdle of the Brabmans, and on his seet divers gold rings and bells.

They tell youanother flory of Ixora, viz. That being one time inebriated with the Sury, or juice of the coco-tree, and having carnal copulation with Paramesceri, a fmall quantity of Ixora's feed was spilt upon the ground, and afterwards covered with earth by Paramesceri, this produced a palm-tree. Ixora coming foon after into the wood, and feeing the young tree, cut off the top thereof with his Chacra, or weathey of pon. The liquor which issued thence so well pleased Ixora, that he took a good quantity of it in his cup he always carried along with him; and having drank his full thare, tied up the tree, and fo returned to Calaja. He repeated this fo often, that Paramesceri finding him always return in drink from the wood, took the next opportunity to follow him

espied his wise behind him, cried out to Baldous, her, Calli, that is, you spe-thief; where-upon she answering, Calla, i. e. thief: the Malabars to this day call the said juice Calla. Isora being well pleased with the young tree, i.e stretched it with his hand higher and higher, and so turned it into a palm-tree.

It feems formwhat odd, that the Brabmans, who pretend fo much to fobriety, should make their fupremegod a drunkard, when they are so nice in this point, that they will never make use of our ink, for sear there should be some wine in it. Thus the Samoryn of Calecut killed his own the Brahbrother-in-law, because he was drunk; and mans athe king of Cochin did the same to a com-verse to drunken of drunken Nairos.

They further tell us of this Ixora, that he caused his son Quenavady to be case Quenavady to be case Quenavady to be case Quenavady to be case Quenavady armother's arms, touched her privy-parts with histrunk: others say, he actually enjoyed her; which is the reason the Maidbars say, that the elephants have no testa-les.

took the next opportunity to follow him thither; and finding the juice very acceptable, the tasted so long of it, till the was also inebriated. Isora, when he first

twelv

Support.

Bullic, twelve years, he moves out of his cars, as How more which being done must continue the firme; which being done twelve other years, he shakes the other car, to give them to understand, that he requires still more at their hands; if they hold on twelve years longer, he opens his eyes, and grants their

requefts. Ixora being at a certain time defirous to try the agility of his two fons Quenava-dy and Superbennia, offered a very fine fig as a reward to him who should carry the day. Quenavady having a very thick skin, and riding only upon a mouse, whereas Superbennia had fix faces, and twelve arms, and rid upon a peacock, being fusiciently convinced, that his brother would carry the prize, took his opportunity, whilst the other was riding round the Calaja, to turn short, and so officence lay hold of the fig. Superbennia having Quenava. taken his turn, purluant to the wager, and dy and Su. not finding the fig, did fall upon Quenaperbennia. vady so furiously, that he beat out one of his teeth: but Ixora giving Superbennia another fig, the difference was foonended. But not knowing what to do with the tooth, he gave it to Viftnen, defiring him to restore it to Quenavady; which he did accordingly, by putting it into a fig which he gave to his nephew, who, as he was going to eat the fig, found the tooth, which he turned into a nice writing-pen,

and kept it to write his poetry with. For the rest. nenavady is represented as very voracious; for they fay, he could devour the whole world; nor is he to be The Sugar- Satiated, but in the Sugar-Sea called Yexucadbil, which is of a vast extent, and always boiling-hot, having in the midst a mount composed of nine very fine stones, with a plain on the top, deliciously seated, in the center whereof, stands the tree Lucia, inclosed with a row of precious stones curiously wrought. In this enclosure, is a structure of the finest red coral, covered with precious stones: the doors whereof, as well as the avenues to the place, are guarded by a good force of the Padas, who spend their time in holy meditations and prayers in the company

of a good number of women, who fing to Baldary. the praise of God. Close about the tree -Luola are feats of gold, and a table made of the most precious stone called Bairacalle, upon which stand a bright thining moufe, and a rofe, in the leaves whereof are written fourteen letters or characters. This is the refidence of Quenavady, who rides upon the faid moule.

He has on each tide of him a most beautiful woman, who are continually employed to lade fugar mixed with honey into his mouth; and for fear he thould be tired with the same diet, good store of Affes, (Indian cakes,) fried in butter-milk, butter, and divers other provisions, stand al-ways before him. The hills near it, afford also figs, grapes, coco-nuts, and all other forts of the best fruits, as well as rofes and other flowers. The muficians that attend divert him with fiddles, trumpets, flutes, hautboys, and other mufical instruments; as many women are employed to make rich incenses, and to anoint his body with fandal-wood, civet, musk, and to offer all forts of odoriferous

The Malabars celebrate yearly the me- Funeral mory of their deceafed friends with great feeffs of pomp and vast charge, according to their the Malaabilities. The kings upon this occation, entertain the Brahmans, (who are in high efteem there, as being the interpreters of their Vedam, or law-book) magnificently, and distribute money after the feast. And, because in the Indies, but especially on the coast of Malabar, there are many petty kings, as those of Trevancor, Coulang, Calecoulang, Porca, Cochin, Cran-ganor, Cananor, &c. thefe feafts are frequent in those parts, and the Brahmans will be fure to partake of them, though they travel fometimes ten, fifteen, nay, twenty leagues for it, and take their full fhare; for though they value themfelves much for abitaining from flesh, fish, eggs, wine and other strong liquors, yet will they make themselves a full amends with fuch victuals, as are allowable by their constitution.

Baldens, abstain from sleth, fish, eggs, and wine. Next to him, comes Cenxes, whose origin is related thus : Paramefeeri, Ixora's spoufe, having anointed her body with oil and faffron, and washing herfelf in a pond, did form from the impurities of her body, a living man; Lora seeing him at a diftance, and believing him to be her lover, hattned thither, and struck with his weapon his head off at the foot of the mountain Calaja, which was turned into a coco-tree; whence it is, that the Indians fay, that the print of a man's face was fixpine of a tay, that the print of a man's face was fixforely afflicted at her fon's death, Ixora pleaded his ignorance; and to comfort her in her affliction, cut off the head of a white elephant, which he put upon the shoulders of her dead fon, and to reffored him to life again. He is represented with an elephant's head, and two hands.

Ixora had also another fon, named Siri Hanuman, by Paramesceri, which was born an ape. Ixora, it feems, was a most celebrated dancer, and used frequently to shew his activity in the presence of the celestial spirits, as well as his spouse Paramesceri, who was fo active in dancing, that one time when the had loft a car-jewel out of one ear, the took it up with two toes of her feet, and put it in her car again, to the incredible furprize of the spectators. The wives Hence, perhaps, arose the custom used among the ladies of the Nairos, who, whilst mong the latter of the mong the latter of the mong the latter of their idols, let usthes in brated in honour of one of their idols, let on a fudden flip all their clothes, and remain naked. But to return to Ixora: Having invited many of the celeftial spirits to fee him dance, Paramsceri happened to fee two apes sport together in the adjacent wood, the defired Ixora to transform both her and him into apes; which done, they leaped about in the wood, till coming to a bambo-tree, Paramesceri then conceived an ape. In the mean time the celestial spirits being come, according to invitation, and among them Jeena, Quinnera, and Quendra, and finding their hoft abroad, they fent the Wind (as the nimblest of all) to find out Ixora, who having told him his errand, they both refumed their former thapes.

Parasmesceri being now ashamed of her burden, requested the Wind to convey the ape into the womb of Anhema, one of the ladies of the celestial spirits; and so they returned home, where Ixora danced to the admiration of the whole affembly. Anbems afterwards brought forth an ape as white as Ix and himfeld, who being endowed with peculiar virtues by his father, performed many noted exploits; of which more hereafter in the history of Siri Rama,

Two odd stories they tell of this apet B Mark. First, That being one time very hungry, and taking the sun for a dainty bit, he called was endeavouring to leap up towards it, deritandbut was beat back by the iron weapon of min. Ixora, who gave him a good knock on the pate, but without any harm, whence he got the name of Hanaman. The other is, That meeting one time with a white elephant called Acrapadia, on which was mount d Devaindra, king of the celestial spirits, a quarrel arole be-twixt them, in which Hanuman was slain: his father, the Wind, being afflicted at his death, hid his face under ground, fo that the inhabitants of the earth being ready to perish for want of air in the extremity of heat, they addressed themfelves to Inota, who reftored Hanuman to life, and recalled the wind above

Thus the wind was adored as a god both by the Greeks and Romans. The Athenians creeted a temple to the wind, as Augustus did in France; the Phonicians did the fame. This ape has divers celebrated Pagodos erected to him by the Indians. We read in the Portuguese histories, That in 1554, when they plundered the famous Pagode upon the Adam's-Mount in Ceylon, they found an ape's tooth (the most facred relick of the pagans of Pegu, Ceylon, Malabar, Bengale, Coromandel and Bijnagar) enclosed in a box set with precious stones, which they carried to Goa; some of the Indian princes offered seven hundred thousand ducats to redeem it, but it was not accepted of, by reason the bishop

of Goa opposed it.

Another fon of Ixora was called Superbennia, with fix faces, and twelve hands; the occasion whereof happened thus: Paramesceri being one day employed in washing herfelf in a ciftern, fix weavers happened to pass by, who inflamed with luft, looked very withfully at her: this having the same effect upon her, she conceived the fame inflant; but fearing I_{X0} ra's anger, the threw it out with her fpittle upon the ground, which turning in an instent into a child with fix faces and Aconerptwelve hands, n.uch refembling in all other tion by fanrespects the fix weavers, they took it along 9. with them, and educated it in all manner of accomplishments. One time being engaged in a dispute with Ixora, he was so taken with his wit, that he received him for his fon, affigned him a place at Calaja, and prefented him with a peaco. kto ride upon.

Before I conclude this chapter, I must tell you one thing more of Quenavady. Returning one day pretty late at night from a banquet, when the moon was not very

Darida.

A descrip

Iron of

the new moon in August, with his umbrella in one hand, in the other a poem, and fome cakes under his arm, he ran unwarily against a post with such violence, that he fell upon the ground, and dropped not only his umbrella, but also his poem and cakes. As he was most concerned for the last, so he took a good bite or two of them before he rofe again, or looked for his book and umbrella. The moon feeing this pleafant spectacle, could not forbear laughing; which Quenavady perceiving, broke out into this curse, Who-

Buldens, light, it being only the fourth day after ever, O moon, fall fee thee for the future Baldwis, upon this day in August, shall be damni- fied in his privities. Hence it is that Quenavathe pagans will not flir abroad the 4th the moon, of August after fun-set, nay, even not on the 5th, for fear of partaking of this curse; and if any one is obliged to stay without doors, he covers his face, and even will not look into the water for fear of feeing the moon, though they fee the St. Thomas christians, the Fews, and Mahometans, look upon it at the same time without the least detriment.

CHAP. VI.

Ixora's Daughter; and the Origin of the Small-Pox: Fear of the Malabars of that Distemper. Their Pagode Amadyri plundered by the King of Cochin. She comes to Coulang.

A Certain giant named Rackada (of which more anon) having lived twelve years with Bramma, he received, among many other prefents, a book from him, and fome bracelets, as also the virtue of being invulnerable. The natives of Coromandel believe these giants to have been children of the Brahman Caffiepa, by his wife Aditi, just as the Jews say, that Lilith brought forth devils begotten by Darida finding himfelf thus placed above the common rank of men, by his strength bestowed upon him by Bramma, would needs challenge Ixora, who knowing his strength, fent against him a certain female, named Sorga, who cut off one of his heads; (for befides his true head, he had many others, but only in appearance.) But Darida returning the next day, reiterated his boafts, when Ixora engaged five holy women, called Chamundigal by the Malabars, in his quarrel, who cut off his false heads; but all to no purpose; so that Darida persisting in his infolence, Ixora confulted with Viftnum what to do in this exigency. Whilst they were debating the matter, Vijtnum fent forth from his body a certain matter, (called Bina by the Malabars,) which entering that of Ixora, passed again through the eye on his front, and falling upon the ground, produced in an instant a semale, which Ixora acknowledging for his daughter, gave her the name of Patragali Pa-

This daughter had eight faces, fixteen hands as black as a coal, with large round eyes, her teeth like the tusks of a boar. In lieu of pendants the has two elephants

in her ears, and ferpents about her body, instead of a garment; her hairlocks are peacocks tails; in her hand she carries a fword, a trident, a large porcellain ba-fon, another vessel called Capala by the Malabars, a scymetar called Mautegam, a hanger called Carutela, an arrow, a weapon called Cona, a rope, an ape with an iron wheel.

This monster was no fooner born, but the went to revenge her father's quarrel, and fighting for feven days fucceffively, the cut off feven of his imaginary heads; but finding all her endeavours in vain, and that Darida was not vulnerable as long as he kept the book and bracelets given him by Bramma, she applied herself to Sorga, intreating her to take upon her the habit of a beggar, and by that means endeavour to get the beforefaid things into her hands. Accordingly Sorga took the opportunity to ask alms of Darida, when he was at some distance from his house, who told her, That if she would go to his house, his wife would answer her defire; which if the did not, he would do it himfelf. Sorga then went to his house, and asked his wife for the bracelets and book in her husband's name, who freely delivering the fame, she brought them inflantly to Patragali. Darids having thus loft his best treasures, wherein Bramma had inclosed all his happiness, and thereby being bereaved of his former ftrength, was foon after engaged again, and had his true head cut off by Patragali.

Being is hexalted by this victory, the came strait to Inora, who being then just undreffed,

fhe brought Darida haures, wherein his happiness, of his former gaged again, off by Pa-

is victory, the ing then just undrested, Baldieus, undreiled, leaped into a ciftern, for fear of being feen by Patrazali, from whence he gave her fome flesh and blood; but finding her not fatisfied thus, he ordered her to hold out her bason, and cutting off one of his fingers, he filled it with his own blood; but Patragali continuing still unsatisfied, took one of her golden chains, (composed of small pieces, like pepper corns,) and threw it into his face, which raiting in his face great numbers of pimples, or finall ulcers, he cried out with great furprize, Bafuri, i. c. O you revengeful woman! and defiring her to defift, created two young men, named Birapatrem and Quetraquele, whom he bestowed upon her, and thus pacified her anger; but to rid his hand of her for the future, he presented her with a vessel of fandal wood, ordering her to go with it into the world, and to retide (though unknown) among the mortals, and to require vows and facrifices at their hands.

The pagans therefore imagining that of the pa-gans about it is Patragali fends the small-pox among the small-the people, leave the patient so soon as he is seized with it; and hence perhaps it is, that they have a certain idol reprefenting a female, with a child laying his arms about her neck, and imploring her ashistance. They deliver up these patients to the care of the Comaras, a fraternity belonging to the Pagode of Patragali: these offer the blood of some cocks and other facrifices to the goddefs in behalf of the fick; and for the reft give them only fome Canfies, or rice boiled in water; and leaving them for the rest to their own disposal, more die for want of good looking after, than by the violence of the distemper, nay, fometimes are killed by Comaras, who i herit all their moveables.

We told you before, that Isora called his daughter Bafuri, which to this day fignifies the finall-pox among the Malabars, which they fay is the fword of Patragali, and for that reason endeavour to mitigate her wrath by sacrifices, wherein they follow the footsteps of the antient Greeks.

The Pargonna They fay that Patragali has her chief pode of relidence in the Great Pagode of Cranga-Grangmor.

ner, called the Pagode of Pilgrims, from Baldaus. the vast number of zealots that flock thiter; and as this brings in a revenue of many thousand Fanams to the king of Cranganor, so the king of Cochin, who sain would have had a share in the booty, did post some forces on the passes, who robbed and plundered the pilgrims, intending by this means to oblige them to resort to the Pagode, built in the kingdom of Palurti, under his jarissidition. Thus the old king of Cochin did plunder The king of and rob the samous Pagode of Ammadiri Cochin as of all its treasure, at the head of a body robs a sain of all its treasure, at the head of a body mone Va.

of all its treafure, at the head of a body ment of ten thousand men, and afterwards laughe gode, ed at them into the bargain, saying, That he had taken it only as his inheritance, as being the son and heir of the idol; just as Dionysius, the Sicilian tyrant, did with Yupiter and Æsculapius.

But to return to Patragali; the was no Adventooner got out into the main with her west of Pavefiel of fandal-wood, but being attacked trigaliafter by fome filhermen and ape-hunters, was Ixora forced to return to Calaja, where finding Ixora overwhelmed with fleep, the overturned his bedstead; which awakening him, the told him her disaster; whereupon being endowed with new vigour by Ixora, the returned to her vessel, and having deseated the ape-hunters, and landed safely on the south fide of Corlang, (a city of Malabar,) the queen thereof sent for her to court, and entertained her there for twelve years as her own daugh-

The lord of Couleta (a country feven leagues to the north of Calecut) then defiring Patragali in marriage for his fon, the fame was concluded, and the taken home, where the lived for twelve years, without ever cohabiting with her husband, as boufting herfelf to be the daughter of Inra. Mandoza speaks of a certain idol in China, with a child hanging about her neck, which the jesuits would fain perfude the world to have been intended for the virgin Mary, though it seems much more probable, that it was intended for this Patragali. What Mr. Le Blune tells us of the semale idol of Calecut, seems very suspicious to me.

CHAP.

CHAP. VII.

Patragali's Father and Mother Suffer Shipwreck: She sends her Husband to fell her Fewels; and goes in quest after him. Nine several Adventures which happen to her. The rest of Ixora's Children: Their Adventures. What further becomes of Paramesceri.

Patragali's

Fterwards Patragali's father and A Feerwards Patragali's father and mother-in-law being embarked aboard a thip with all their riches, in order to traffick with them in foreign countries, they were attacked at fea by the ape-hunters, who finking their ships, they lost all their riches. Patragali then gave her golden soot-rings to her husband to fell them; who departed accordingly; but meeting upon the road a goldimith, (a highwayman of Pandy,) he under pretence of viewing the rings, entertained the husband, till by feveral by-ways they Patragali's brought him to Pandy. Here the pretended goldfinith (who had not long before stolen just such rings from the queen of Pandy) accused Patragali of the robbery; who was put in prison, and after-wards empaled alive on a palm-tree. The goldfinith's wife having an avertion to fo foul a fact, upbraided her husband with it, who killed and buried her near a well.

Patragali having staid fix days without hearing any news from her husband,

refolved to go in fearch after him.

The first thing she met with, was a adventures pigeon, which the asked, Whether she goes manifold seen her husband? The pigeon ref ber hus plied, she had seen him go that way, but not return. In recompence whereof Patragali gave her this bleffing, That she fhould never want water in February, (being the drieft feafon here,) and prefented her with a piece of her chain, which she threw about her neck: (the turtles have fuch a ring about the neck.)

Patragali following the way shewn her by the pigeon, met with another bird; of whom having enquired as fhe did before of the pigeon, the received the fame anfwer; which made her bestow a tult upon his head, being perhaps the fame we call the Presvet in our country, called Carpenteirs by the Portuguese.

Afterwards Patragali coming to a mango-tree, the asked the fame question; but receiving no answer, she curfed it, That for the future the dead corpfe fhould be burnt with no other wood; and that all veffels built of that wood should rot, and be worm-caten at fea.

Meeting next a cow, she was kicked

fented fo ill, that the gave her this curfe, Ballier That of her four teats one should be for the use of the Pagode, the other for the prince of the country, the third for the owner, and the fourth only for her calf; that they should make drums of her skin, and that confequently she should be subject to blows, both dead and alive.

The fifth fhe met with being a Naire, or foldier of Malabar: this fellow had dug a hole, and having covered the fame with fome twigs and fand, Patragali fell into it as the pasted along: the gave him this curse, That he should be called cow-ard all his life-time.

The next was a Naira, or a Nairo's daughter; who being asked by her, whether she had not seen her husband? she clapped her hands, faying in a fcornful tone, What are you running after your husband? I have not feen him. She gave her this curfe, That she should be married to a Nairo, a coward, who as foon as he turned foldier should leave her in forty days after.

She then coming to a jaquo-tree, she asked after her husband again: the tree bowing its twigs, furnished her with some of its milky liquor, (as this tree does, if you cut any of its twigs,) she bestowed this bleffing upon it. That its fruits should be highly effeemed by the kings and princes; and that though its ftem might corrupt, it should continue to bear fruit, (as in ctfect it does,) and that they should employ its wood in making their cymbals, called Tabelyne, and the statues of their idols.

The eighth she met with was a Polia, a man of mean extraction, who not going out of her way, (as they usually do,) the told him, That he should not be admitted into the houses of persons of quality from October till February.

The last she met with was a Parrea, likewife a person of low birth; but having paid her the ufual reverence, she admired at his civility, which made her ask him, Whether he did know her? He replied, that he took notice of her fwines tusks, and the elephants in her ears; which fo pleased her, that she told him, He should drink of the liquor of the palm-tree, (which by her hindermost legs; which she re- in effect they do when they gather it,) and

Baldeus, that he and his family should feed upon cow's flesh; then tracing the way shewed her by the Parrea, the found her husband empaled upon the palm-tree; which being too high for her, she obtained by her prayers, that the palm-tree broke, and fo delivered her husband, whom she brought to life again.

Patragali now burning of revenge to punish the murderers of her husband, addressed herself to Ixora, who having furnished her with a strong body of Rananos, or devils, (having been wicked menintheir life-time,) she entered the territories of Pandy, and at last killed the king and the goldsmith. His wife she revived from the dead; who having brought forth a fon, she granted him a privilege to work in the Pagodes, and to receive to himself the tenth part of all the gold he should make use of, the fourth in ten of what he should work for the king, and as much as he could get from private persons.

We told you before of the Pagode of Patragali in Crangavor, where, besides her statue, stands that of a large man in marble, which the Brahmans knock every day with hammers upon the head, to keep it from growing too big.
Thus much of Ixora's children, who

were, properly speaking, only four in number, (Superbennia being only an adopted fon:) we must also go on in the story of Pedigree of Paramesceri his spouse, and her origin.
Paramest Jecna Prajava, king of the Peringales, had four daughters, the eldest whereof was Paramefeeri, otherwife called Parvati; Saroffodi and Gojatris, the fecond and third, being married to Bramma, and Pagode Siri to Viftnum. Their father being defirous to fee his daughters in their full glory, invited Bramma and Viftnum to a most magnificent feast. Vistnum asking him whether he had invited Ixora; he answered, No, (Ixora being then in his mendicant state;) but afterwards considering the matter, he invited him at last; which Ixora took fo heinously, that he refolved to spoil the feast.

The day appointed for the feast being come, Siri-Pagode came in great pomp in a stately chariot, made of nine most precious ftones, most artificially wrought, herfelf being adorned with numberless jewels and pearls, and attended by a iplendid retinue of fervants and mulicians, Saroffodi and Gojatris, the other two fifters, appeared with the fame splendor. Paramefeeri in the mean while having obtained leave to go to the feaft from Ixora, he ordered her to put on her best apparel, and gave her his ferpents, his umbrella of peacocks tails, his chain of bones, his tyger's skin, and elephant's hide: thus equipped, the mounted upon

VOL. III.

an ox, and with a large attendance of Baldarias. drummers, and Pudis and Pixares, came to her father's palace, where being met at the gates by her fifters and the other guefts, these seeing her equipage much below what they expected, instead of welcoming her as they ought to have done, burft out into laughter; which fo vexed Paramesceri, that without more ado, she returned to Calaja, where she gave an account of what treatment she had met with, because her fifters appeared at the feaft in a most sumptuous equipage, their apparel being covered all over with precious stones and pearls, whereas she, who was the eldest sister, and married to Ixora, had been despised for ber mean appearance.

Ixora moved at the just complaints of his spouse, sent his son Quenavady to spoil the feast. Vistium being well acquainted with Quenavady's temper, ordered good store of cakes to be fet before him in the hall; which pleafed him fo well, that he foon forgot his father's orders. Ixora wondering at Quenavady's long stay, fent his brother Superbennia upon the same errand; Vistnum knowing him not to be diverted with trifles, fent out to him fome ingenious perfons, who entertained him fo well with fubtle difcourses and arguments, that he likewise neglected his father's commands.

At last Ixora finding both his fons to flay behind, ordered his daughter Patragali thither. Viftnum no fooner heard of her coming, but he commanded a most delicious banquet to be fet before her in the hall, through which she was to pass, which fo diverted her fenfes, that she foon forgot what the came about.

Ixora finding all these endeavours to prove ineffectual, refolved to go thither in person. Which Vistnum no sooner got notice of, but he told king Jeexa Prajava, his father-in-law, that not being able to cope with Ixora, he would retire with his wife; and Bramma doing the fame, the fun and the moon (two of the guests) staid only behind. Ixora coming to his fatherin-law's palace, upbraided him with the contempt he had put upon him and his wife Paramesceri, and so taking him by the hair, full of anger, there came forth at the fame inftant, a flout warrior armed cap-a-pee, (like the Mars of the antient pagans.) called Virapatren by the Mala-bars, who cut off Jecsa Prajava's head, the hands of the god of the fire, and beat out the teeth of the sun. What Rogerius fay concerning Jeena Prajava's having got a goat's head instead of the other, and that the moon also got a good banging, I could never learn either from their pagans themselves, or from the Portuguefe historics.

PART II.

CHAP. I.

The Idol Vistnum; and his Transformation into a Fish. Mat's Altar. Another Transformation of Villnum. An Account of the Milk-Sea. Cauram's Altar.

Baldeus. Viffnum's descent dence.

Istnum, the second in rank among the gods next to Ixora, is also descended from Quivelinga. He is of a black colour, with one head, and four hands; he refides on the Sugar-Sea, and governs the world fleeping. Instead of a bed, he repose upon a noted ferpent called Annatan, with five heads; two whereof ferve him for pillars, one for a boliter, and two under his hands. This ferpent, as they fay, being once in the humour to try the power of Viftuum, got a fixth head, which Vistaum no sooner faw, but he got another hand to by upon the head, and the fer-pent having got a feventh head, he got likewife another hand; fo that as the ferpent's heads did grow to the number of a thousand, his hands increased in proportion; whence it is that they look upon the ferpents as celettial spirits, keep them in great veneration, and never kill them, though they are often hurt by them. Thus the ferpents were reckoned by the ancient Lithuanians, Samogitians, Pruffians, and

Egyptians.
They tell us further, that Vifinum wears print on bis the print of a foot upon his breast: for breast. one Ricki Sirwelftena being defirous to know which of the three was the most Potent God, came to Calaja, and gave Ixora a good box on the ear, who transformed him into a stone; but having after twelve years recovered his life, he did the fame to Bramma, who let him go without doing him any harm. coming to Viftnum, and finding him upon his bed, he fet his foot upon his breatt, which Viftnum fixed there, fo that he was forced to continue there one hun-

dred years.

Vistnum's

Vistnum had two wives, one called Lexi-mi, alias Laetzemi, and Siri Pagode beforementioned. The first, Vistnum found in the Milk-Sea, in a role of one hundred and eight large, and one thousand and jans, killed him, and seized the law-cight lesser leaves; her chief business is book, divided into four parts; the first

to feratch his head. The other is called Baldwus, Pumi Divi, i. c. the Goddess of Heaven, in whose lap he lays his feet, which she

is to rub with her hands.

They attribute no less than ten several transformations to Viftnum, nine whereof, they fay, are accomplified already, but the tenth is to come. Father Kircher the jesuit * mentions the same to have been * China related to him by father Hen. Roth, an illustr.
Austin frier; and Rogerius says likewise bart? fomething of them : but as under thefe ten transformations are hid the chief myfteries of the pagan religion on both fides of the Ganges, fo we will treat of them Vistnum at large with this precaution, That thefe ten times pagans often give divers names to the formed, fame god, by reason of the great difference betwixt the languages of the Benjans, Gentives and Malabars : fo, though they acknowledge the fame Ixora, Bramma, and Vistnum, some of them called Ixora Mahex, or Mahadeuw, Bramma, Bruma, or Ram, and Viftnum Bexuo, &c. which feems to intimate as if they had a certain respect to the Trinity; just as the Chinese worship three divine attributes under the name of Pussa, and the Greeks placed the three Charities near the throne of Jupiter; and if the modern Jews were not quite obtlinate in the denial of the Trinity, they might be convinced by their own Rabbies, Rabbi Isaac, Rabbi Judas Nagi, and Rabbi Simeon.

The first transformation was into a fish, The first occationed by Raxiaxa, alias Adirem, transforwho having carried away the law-book matter way of the interior gods called Devagal, or into a lift.

Dewetas, hid himself at the bottom of the sa. The inferior gods making their complaints to Vifinum, he transformed himfelf into that ravenous fish the Shark; and thus diving to the bottom of the fea, laid hold of Raxiana, otherwise called Seremiaxen and Sancafoor by the Ben-

whereof

Baldwus. whereof treated of the fouls of the Bleffed; the fecond of the vagabond fouls; the third of good works; the fourth of bad works. But what Rogerius fays l. t. e. 5. viz. That the fourth part is loft, I could never be convinced of. The fifth is called Mat, or Mathia, though the Malabars and Benjans call it Zeexis. The Benjans tell us, that thefe books were ftolen from Bramma, but the Malabars, from the Dewetas, or inferior gods. The Benjans fay, that Bramma was transform-

ed into a fish, whereas the Malabars as-Baldaus. cribe it to Vistum. The Benjans call these ransimutations Altars; so that according to their supposition, Mar's altar being the first, has now stood two thousand five hundred years.

Upon this occasion, I must agree with Rogerius, when he says, l. 2. c. 3. That he could not dive into the mysteries of the transformations; because I am certain that it cost me a great deal of trouble, before I could attain to the knowledge

Baldaus, thereof; and that not without the affifvance of a certain Brahman, who coming from Bengale, fettled at Jafuapatnam . and as I frequently converted with him, to I often used to discourse with him concerning the animadvertions made upon this head by Rogerius. He being after-wards converted to the christian faith, and baptized in the church of Vanarpone, and our discourse running upon the transformations of Viftnum, he cold me, That this Vedam, or law-book, being inclosed in a Chanki, or fea-horfe's horn, the fame was found out by Viftnum: whence it is that they fay, the prints of the fingers are to be feen in thefe horns to this day; and that they have put the Saccaram, or fword, and the Chanki, or horn, into his hands, as you fee in the preceding draught;

though some ascribe the same to Bramma. But before we enter further upon the description of the transmutations, we must add certain preliminaries, as tending to

the explanation thereof. All thefe transformations were performed in four different times or spaces: The first, called Kortesinge by the Benjans, they fay, continued one million feven hundred and twenty-eight thousand years. The second Tretasinge, one million two hundred and ninety-fix thousand years. The third Dusperfinge, eight million and fixty-four thousand years. The fourth, Kallifinge, four million and thirty-two thousand years, being the same term of time we now live in; fo that according to their computation at Suratte, there were in 1657, at least four thousand seven hundred and fifty-eight years clapfed of this last term of time. For it is to be known, that the Benjans, and most other pagans, Egyptians, Chinese, and Japonese, differ several thousands of years in their computations from ours. And to convince you, that the Benjaushave the same years with ours, it is to be observed, that they, as well as we, divide their years into twelve months, amounting in the whole to three hundred and fixty days in the year; and to make amends for our odd days, they have thirteen months in every fourth year; yet fo that the thirteenth month hath no more than fixteen days. And it is further their opinion, that after the expiration of this last term of time of four million and thirty-two thousand years, the world shall be renewed. In which point they follow, in fome measure, the foot-steps of Plato, who allowed no less than this ty-fix thousand years before the fun could pass through the three hundred and fixty degrees of the Zodiack; though they make their Annus magnus, as the antient pagans called

The pagans on the coast of Croman- Vigal. del and Malabar, call thefe four terms of 1,3 Rueid, time, Critagom, Treitagom, Decaparagen, and Kaligom; where it is to be observed, that according to the computation of the pagans and the Gentives of Suratte, there are in this year 1670, clapfed four thoufand feven hundred and fevenry-one: whereasthofe of Coromandel compute four thousand seven hundred and seventy, being only one year's difference: but finding in 1665, that the inhabitants of Fafnapatnam computed then the four thoufand eight hundred and fixty-fourth year of the last term, I told them that they did not stand for one hundred years, lefs or more, whereat they fmiled.

But it is time we should now proceed The fecond to the fecond transformation. The thirty-transfor three gods and the Adires held an af- William. fembly in the Milk-Sea, to confult how to get into their possession the Ambrosia, called by fome Amurtam, and Amortam, by others dmratam. Some fay, That Ixora and Viftnum having called together all the good and evil spirits, entered upon a debate, how to find out fomething endued with fuch a virtue, as to make men live without victuals or drink, and without danger of death, or being tired. Whereupon it being agreed, that they should turn the mount Mahameru, (called Merousva by Rogerius,) like as the turners do, and inflead of a rope, make use of the ferpent Harugu, called Sefeka by the Brahmans, being of fo vaft a bulk, as to enclose the feven worlds and feas : accordingly they began their turner's-work; but finding the mount immoveable, they addressed themselves to a noted ape called Baly, (of whom more anon in the history of Siri Rama,) by whose affiftance the mount began to ffir; and meeting at the fame time with a beautiful woman named Dara, they bestowed her upon Baly, as a reward for his fervices. But continuing their work, the mount by turning round, tunibled into the fea; fo that being destitute of all means to recover it thence, they were forced to have recourse to Vistinum, who raking the shape of a Tortoife, dived to the bottom, and brought the mount up on his back. Here it was, that Villnum met with the beautiful Macha Leexemi, whom he married afterwards. But the mount being exceeding high, Viftnum took the shape of a bird, and flew round about it, till it was brought lower. This story feems to have fome relation to the fable of mount Atlas, and what is faid Heb, i. That God bears up the world.

Eaux remarkabie annum". Baldens, Croman- Virgil. obferved, ion of the itte, there our thouenty-one: npute four venty, be-but findts of Faffour thou-

Here h the beautie married afcing exceedBaldwus. The gods and the Adires then continuing their work, did light upon some poifon; which being too ilrong for them, they fent to Ixora; but were still in purfuit after the Ambrofia, which they intened to present to their great king Deva In-dra, (who was then very fick,) sirnamed Quiera Navam, because his whole body was covered with manly yards, in revenge of the adultery he committed with the wife of the great Rixi Quendama: For Deva Indra being extreamly in love with the faid lady, transformed himfelf into a cock, and coming to her house in the night-time, began to crow most briskly. Rixi thinking it had been near break of day, got out of his bed; and whilst he was going to an adjacent pond, to perform his usual devotions, Deva Indra took the opportunity to enjoy his wife. Rixi returning from his devotion, and perceiving the chest, transmuted his wife into a stone, and laid the other punishment upon her lover.

By this time the Adires having feized

upon the Ambrofia, without giving a share

to the gods, these made their applications to Vistmum; who, thereupon taking the shape of a most beautiful nymph, fat down at table with the Adires, when their attendants were just ready to distribute the Ambrofia among them, Being all extremely enamoured with her beauty, every one courted her for his spouse. To decide the matter, she told them, That they should put the Ambrofia into her hand, and with their eyes thut, and hands tied behind them, but their mouths open, receive every one their there of the Ambrofia; and that he, upon whom the should pitch for her husband, should be the last. This being done accordingly, she seized upon the Ambrofia, and carried it to the gods. But whilft they were all opening their mouths to receive the faid Ambrofia, Ravaben (who had affumed the shape of one of the gods,) shewed his boar's tusks; which Vistnum feein gave him fuch a powerful blow, that his head flew from his shoulders; whence the Adires, whatever shape they affume, always retain their tusks. However, Vistaum throwing the body and head into the air, the same were transformed into two planets, called Rabu and Quendaum. Rogerius calls them, Ragin and Ketou. which, in the Milabar, fignifies as much as Caput and Cauda, or the Dragon's-bead

and tail. But here, the Br thingn's commit

an error in aftrenomy; for they have no

planets, but a fixed fidus, confifting of thir-

ty-one stars on the north-fide without the

Zodiac; where the moon passing from

fouth to north, and again from the north to fourh, goes through this Ecliptick-line,

being the fame the fun paffes through eve-

ry year, and the moon every month in the Baldaus year; for when the takes her course from fouth to north, the place where the paties through the ecliptick-line, is called the Dragon's-head, as the place of the faid line through which the paties in her return from north to fouth, is called the Dragon's-tail. Hence it is, that (according to Rogerius) these pagins say, thit there is an antipathy betwixt fun and moon, and Ragou and Ketou; and when they see an eclipse of the sun or moon, that they are fighting with Ragou and Ketou, or that they are devoured by them.

The inferior gods employ part of the

Ambrofia they had got, in reftoring their great god to health, and removing the manly members from his body, instead whereof, he got as many eyes.

The before-mentioned poifon taken out of the mount Mahamery, being so virulent, that whatever it touched, was confumed to affes, was given to Ixora in the presence of Paramesceri his spouse, who dreading the effects thereof, clapped her hand to his throat, to prevent him from fwallowing it; and laying the other hand upon his mouth, for fear he should spue it out again, and fet the world on fire, mingling at the same time her prayers (Nels candamtre acxeram) with her endeavours, the poison forced its way through Ixora's car, and was in an inflant transformed into a devil, called Canda Carna Pixaxo. The prints of Paramesceri's finger lest three black spots on Ixora's throat, whence he got the firname of Nili Candaon, i.e. black throat, or black head.

The Benjans and Gentives give a diffe- Different rent relation of this fecond transforma-relation of the Bention. They fay, That the fea being fwoln jans and with pride, broke out in these words : Gentives. Who is it that can compare with the riches of the fe contained in my azure marble vaults? here formation. it is, the moon bas fixed her babitation; the water of Tammarith, which renders those that drink it immortal, is enclosed in my bosom! Theelephant with his seven trunks, and the seven-headed korse dwell in the depths, which produce black, white, and red coral in vaft quantity! The great god of keaven being exasperated at this vanity, commanded the giant and the fourheaded god Bramma, to go to the river Siam Boerwetty, near which lies the golden mount Meeperwat, feated in the center of the earth, and forty thousand leagues high; and to remove the faid mount into the fea, by winding the ferpent Signage about it, and thereby force the fea to cast out her treasure, which had rendered her fo vain-glorious. This being put in execution accordingly, the fea cast out the following fourteen things. 1. The money

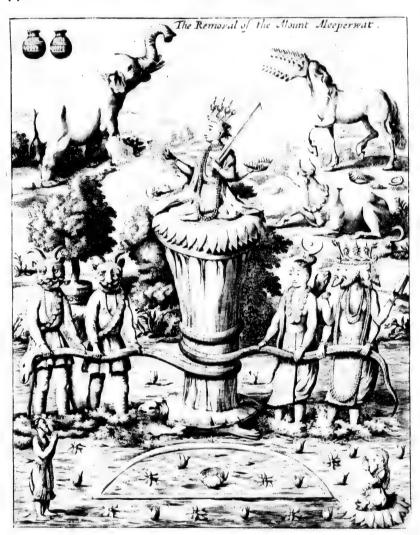

ne shape of a

it, till it was

feems to have

mount Atlas,

e God bears up

Baldons, called Lecfemy. 2. The most precious jewel Confenchmany, or the carbuncle which carries a lustre like the full moon.

3. The tree Paertfatig. 4. The vessel Silveren, with the water of Sora. 5. Doctor Dannewanter. 6. Indemademaen. 7. The white cow of plenty, called Camdoga.

8. The immortal water, called Amarth.

9. The elephant with seven trunks, Hiera Wannesty. 10. The beauteous semale dancer, Remba. 11. The seven-headed horse, T

Exmognora. 12. The bow Dennok. 13. The Baldent. horn Chiank. And, 14. The poifon Sabar. This done, the fea began to abate of its pride, the mount and ferpent had their peculiar places affigned them, and the treafures of the fea were diffributed to different places and perfons. Thus far of the fecond transformation, containing two thousand five hundred years of the first term of time.

CHAP.

Buildens, the flape of a hog, and digging with his frout through the earth, till he came to the Padalas, killed the robber, and taking the earth upon his tusks, fixed it in its former place. Hence it is, that in the Pagode, called Adi Warraka, in the city of Trimottam, not far from Singl, there is to be feen the head of a hog, which the Brahmans fay was the product of the earth, and is reverenced as the true idol of Viftuum, in memory of this transfor-

mation.

The Benjans and Gentives of Indofthan and Suratte, give us the following account of it. During the first term of time, fay they, the world was fo over-burthened with fin, that the serpent of a thousand heads, unable to bear the weight thereof any longer, withdrew herfelt from underneath it, whereby the world, together with men and beatts, were east into, and perithed in the depth of the fea. Bramma addressing himself to the great god, defired him to retrieve the world out of the abyts of the fea, which he willingly granted; whereupon Viftnum affuned the thape of a boar's head, with tusks as big as an elephant's trunk, white all over his body, with four arms and hands, having in one hand a great fword, called Godda, and in the other a book, as likewife a horn and round Ticker: thus transformed, he threw himfelf into the fea, being at first no bigger than a man's finger, but increased before he reached the bottom to fuch a degree, that in cafe the earth had been placed on the furface of the water, and he flood upon it, his head would have touched the stars. Coming to the bottom of the fea, he killed the dreadful giant Hirnaks, whose blood tinged the whole sea with red. Vistnum having trampled him under his feet, litted with his tusks the earth out of the fea, and placing the tortoife upon the water, and the terpent with a thousand heads upon the tortoife, he retired to his refidence, and Bramma, with one word, created a new generation of men. This transformation comprehends two thoufand and feven hundred years, in the first period of time.

This flory feems to intimate, that thefe pagans have heard fomething of the deluge, confidering especially that the Benans do live nearer to the borders of Perr and Armenia, than the rest of the Indians; there being also mention made of the giants, Gen. vi. 4. And it is very probable, that the antient pagans were not quite ignorant of the history of the deluge, which they afterwards ushered into the world, under divers peculiar deluges, as for instance, the Diluvium Ogygicum,

which happened in Action; and Dema-2011 hon's delage in Thefaly; and the Primetheir of the antient pagans, is by mutt criticks taken for the fame were hereby

But we come to the fourth tractions tion; yet before we enter upon the pants culars thereof, we must ald to all a more relating to the third transformation. The earth being reftored to its former station, Viftmum upon an exact view found it fomething inclining to the fourb; which Vijtuum not being able to remedy, he addreffed himfelf to a certain faint of very low stature, named Rini Agaffia, (Rogerius * calls him Agaftea,) who having laid * Lib. II. his holy book upon that part inclining to c. 19. the fourh, put it into a just equilibrium.

Viftnum walking with this Aza/lia near the fea-fide, the fea asked Viffnum, Who it was that walked with him? Viflant replied, He is a faint who is going to re-Hore the earth to its true ballance; where upon the fea, fcorning his low ftature, (he being not above the height of a joint of a finger,) wetted him with its waves; which allront being highly refented by Agassia, he took some of the sca-water in his hand, and beginning to drink, did not defift till he had drunk up the whole fea. Dewetas and Rivits feeing the fea thus exhautted, interceded with Agaffia not to rob the world of fo fingular a benefit, and prevailed upon him fo far, that he piffed one again all the water he had drunken before; and this is the reafou their philotophers alledge for the faltness

of the fea. Agaifful after having restored the ballance of the earth, took his leave of Viftnum, who to prevent the like for the future, ordered the great ferpent to vind

herfelf about the feven worlds and feven feas; and for more fecurity's fake, anpointed eight guardians to watch over it, called in the Malabar by the following names, 1. Indra, the king of the celestial spirits. 2. Vanni, the god of fire. 3. Padurpsti, king of the evil fpirits. 4. Arrurdi, king of the internal spirits. 5.1'irunna, the god of the fea. 6. Maril, the god of the winds. 7. Cal and the god of riches, called otherwife Englishmen.

S. Inananam, or Inora himical. Hence it is, that you fee frequently eight it is placed at the entrance of and about their

The fourth transformation, into half a lion and half a man, was occasioned that in During the first p riod of time, a certain war. giant, Hirrenkeffep, (as the Benjans call him, but the Malabars Remiaexen,) having been forced to abfoond for twel e years, on the account of Brimmer, afterwards made the following request to

giant's request, he foon made himself with matter of the whole earth; and overcome with pride at his fuecels, iffued out a mandate, That no body should be adored but himfelf, under the forfeiture of the lives of fuch as should contravene it. Things continuing in this state for some years, the Brahmans began to murmur, That they should be obliged to adore any terrefirial power, though never fo great, to

VOL. III,

Baldaus, the projudice of the celefical spirits : they refolved therefore, to make their suppli-cations to Vijtnum, imploring him, to deliver them from the oppressions of this tyrant; who gave them for aniwer, That the giant fould have fortly a fun born, who fould be their deliverer, and till then they must have

Within ten months after, Naeckfeu, the giant's wife brought forth a fon named Prellade, who, when he was five years old, was put to a school-matter; being one time fent for by his tather, his matter instructed him how to pronounce his tather's name in short writing, which was Irenia; but instead thereof, the boy faid, Ary, being the abbreviated name of Vift-num. The matter aftonished, put his hand upon his mouth, bidding him to forbear, for fear of being the occasion of his own death; but the more he forbid him, the

more the boy perfitted in faying, Ary, Ary, instead of Irenia.

The school-master not knowing what to do, brought him to his father, telling him, That his fon would not pronounce his name, which he had taken so much pains to teach him. The father asking him the reason, the boy answered, Your name is not the true name, but the other is the truth itself. His father asking further, What is truth? the fon answered, Vistnum, who fills the fourteen worlds, is the truth. What benefit, faid the father, do you receive from Vittnum? And what benefit, replied the fon, shall I receive by yours? The giant told him, Whoever repeats my name, shall be bleffed with riches, konour, dignities, and life. How, fays the fon, can you give life and riches? Yes, I can, replied the giant, and will convince you immediately, it being in my power to take away your life. That will fcarce happen, answered the fon, according to your providence and discretion. What is providence and discretion? asked the giant. That is the eternal divine name of Vistnum, replied the fon, the creator of the fourteen worlds. The father asking him, Where is this name to be found? The fon answered, In every thing, both in beaven and earth, every thing being filled with Vistnum. What, replied the father, and is Vistnum alfo in this pillar? Yes, replied the fon, and likewife in you and

me. The giant not longer able to contain Baldanis, himfelt, told him, Boy, because thou institlest thus upon the name of Vistnum, I will beat your brains out with this flick : but if thou suite pronounce my name, thou fleate netther die, neither be beaten. That will not le, fays the boy, for your name's fake ; because God has ordered it otherwife. But I will spoil that ordinance, replied the giant; and with that, ftruck with his golden flaff at the boy, who hiding himfelt behind the pillar, implored the name of Viftnum. The giant turning again with more fury than ever against the fon, struck with fuch violence, that the pillar burft, and produced a monster, balf a man, balf a lion, an hermaphrodite, with breatts both above and below, breathing fire and flames out of its noftrils.

The Benjans fay, That the giant did erect a red-hot pillar to tie his fon to, telling him at the fame time, Let us fee who can deliver you out of my hands. The fon then invoking the affiftance of Viftnum, the pillar burst, and forth came the monster. All the standers by were amazed at this spectacle, and the giant him-felf trembled for sear. Viftnum resolving to revenge his own quarrel, and at the fame time not to break the promife made by Bramma to the giant, laid hold of the giant, and hurrying him under ground directly under the threshold of his own house, and keeping him there till fun-set, tore his body in pieces, thereby fulfilling Bramma's promise, That he should not be killed within nor without bis house, neither in beaven nor upon earth, neither by beafts, birds, fword, wind, rain, bail. The giant's fon fucceeding his father in the empire, ruled with great applause, for many fucceeding years.

Thus ended the fourth transformation of the first period of time, called Kortefinge by the Benjans, comprehending in all one million feven hundred and twenty-eight thousand years; for though all these transformations were transacted within the time of feven thousand seven hundred years and three days, the rest, viz. one million seven hundred and twenty thousand years, three hundred and fixty days, must be supposed to have been the

intervals of these transactions.

CHAP. III.

The fifth Transformation of Villnum into a Brahman. Great Plenty under Mavaly. The Request of the transformed Villnum. Praffaram's Altar and Birth: He kills Reneca his Mother. Raja Inder's Cow of Plenty. Praffaram's great Actions.

Baidans. WHILST Mavaly (called Beiragie by the Benjans and Gentives) ruled the world, the inhabitants thereof were fo plentifully provided with every thing by his bounty, that poverty was a thing unknown among human race. Vifnum perceiving that as the case then stood, there were no different degrees, nor any dependance in the world, either on God or man, resolved to divest Mavaly (by fraud) of the government of

the world.

With this intention Vifinum affumed the shape of a Brahman, and appearing in a mendicant possure before Mavaly, he asked him, Who he was, and upon what errand be came? The pretended Brahman replied, Having heard of your charity, I am come to crave some alms. Mavaly answered, I who have granted the requests of many kings and princes, will not deny thee, let it be what it will, whether kingdoms, money, honours, or whatever else you can ask. The Brahman replied, My aim is not at such mighty things; but after all, for sear of denial, I beg of you to promise me, without exception to grant my request. Mavaly answering that he would, the Brahman begged him to consirm it with an oath.

Mavaly being just upon the point of confirming it by oath, the planet Venus (who flood just by) told him, And is it customary to fivear to the giving of alms? Which Mavaly being not in the least moved at, fwore to the Brahman, who told him, I am not covetous of kingdoms or provinces; my defire is confined to three foot of ground, where I may erest a but, where to lay up my books, umbrella, and drinkingcup; I beg you therefore to pour some of your water upon the ground. For it is a custom among these pagans, that when-ever they dispose of, or sell any thing, they confirm their promise or bargain by pouring some water upon the ground, part whereof the buyer catches with his hands, and drinks, in confirmation of the bargain; just as Jacob defired Joseph to lay his hand under his hips, when he was going to make him his promife upon oath, Gen. xlvii. 29. & xxiv. 2, where the hips (according to some interpreters) are

taken pro partibus generationis, in quibus Baldeus. circumcissionis signum dabatur.

Mavaly sold him, Ask a kingdom, and I will grant it. The Brahman replied, Were I a king, I must punish criminals, which I could not do without trofpaffing the rules of the order of the Brahmana; wherefore I defire no more, than three foot of ground, Mavaly replied, That will not be enough to build you a house upon. I want no bouse, faid the Brahman, baving neither wife nor children, I defire only three foot of ground, which you cannot refuse without being perjured. Mavaly telling the Brahman that he never broke his promife, and ordering Venus to bring him fome water, the defired him not to pour the water upon the Brahman, whom she looked upon as an impostor. Mavaly replied, Of what consequence can three foot of ground be? Take beed, answered Venus, for this is Vistnum himself, who is come in diffuse to deceive you. Mavaly returned, I bave not finned against Vistnum, and therefore have no reason to fear him. Notwithstanding which, Venus continued to perfuade him by many arguments, not to trust him: but Mavaly perfisting in his refolution, told her, Let come on it what will, if it should cost me my life, I will not break my oath. Then taking the vessel with the water, he bid the Brahman to hold up his hands, which Venus perceiving, the held Mavaly's arms, defiring him not to pour out the water; but Mavaly pushing back her hand, bid the Brahman a second time to hold up his hands. Venus then changing her shape, stopped the pipe of the vessel, which Mavaly endeavouring to loofen with a twig, he hurt Venus's one eye, whence the got the name of Chueren; then water coming out of the spout of the vessel, the Brahman did drink. This done, Mavaly ordered him to measure the three foot of ground where he pleafed. Vi/tnum having by this time reaffumed his own shape, he covered the whole earth with one of his feet, and with the other the paradife called Sorgalogam. Whilst Vijtnum was extending his foot, Bramma poured water upon it, which produced the river Ganges, fo highly celebrated

CHAP.

Raldons, among the Indians and other pagans.

Vifinum having thus measured two toot,
Marsaly told him he might also take the
third, which he did, by measuring the
inscrior region, called Padalas, and thus
became master of the whole world.

The Gentives add, that this Bruhman,
(whom they call Vanam, i. e. a black
dwar/, and Regerius calls him Barmasari,
i. e. a young Bruhman, by the name of
Lib. II, Wamara*) set his left foot upon Marsa-

ly's breast or head, and thus kicked him Baldeus. through the ground into the infernal region, whereof he made him king. But Mavaly's wife upbraiding Vistum with ingratitude, he carried her to her husband; and as a reward of his piety, befowed upon him the government of the place of darkness, Vistum himself remaining with him nine days to guard the entrance thereof. Rogerius calls this Mavaly a devil, named Belli, and fays, That whilit through the ground into the infernal re-

kicked him Baldaus. infernal reking. But fluum with to her huspicty, beient of the himfelf reguard the

fays, That whilit transfor-

Baldeeus, whilst the waters of the Ganges were flowving from above Ixora's head, and rifen out of the hip of a faint, fixty thousand men were brought to life. This fable had questionless its origin from the want of knowledge of the true fource of the river Ganges, for which reason they generally stile it the Heavenly River.

Mavaly being not fatisfied with his present station, made his complaint to Vistnam, who told him, That in regard he had been a charitable person, a man of truth, and without fin, he would constitute him king of the paradife. Mavaly making a deep reverence, (called by them Sambaja,) returned for answer, It is not my ambition to reign, being only affected with the hardships of my former subjects, who have no body now to provide them with necessaries, as I used to do. Viftnum replied, The poor shall ferve the rich, and be maintained by them; fo that he that will work, shall want for nothing. I will also constitute you the door-keeper of the paradife, fo that no body shall enter there without thy knowledge. But, replied Mavaly, how shall I then be able to judge at such a distance, how you deal with mankind upon earth? I will, answered Vistnum, ailign you a certain place in heaven, from whence you may overlook the earth; and fo made him door-keeper of the paradife.

Three forts Accordingly Viftnum distinguished manof people. kind into three forts, rich, poor, and middle-fized, which were to have a reciprocal dependance on one another; that fuch as had lived piously, and done acts of charity, should be received after their death, and live in plenty and splendor; but fuch as did otherwise, should, after their decease, be transformed again into flaves and drudges, to do penance for their former fins, till by their good works they should merit paradife, which they were not to enter, however, without Ma-valy's confent. He also constituted a feaft, (called Ona by the Malabars,) to be celebrated yearly in August, when they fpend feveral days together in feasing, and other forts of diversions, and appear in all their best apparel. The fixels

The fixth transformation happened thus: After the appearing of Hanamans, mentioned in Chap. v. Part. I. one Braman and Bramani being joined in wed-lock, did for a confiderable time lead a pious and contented life near the river Bewa; but the woman being barren, (a thing much despised among the Benjans,) they refolved to retire into fome defart,

thus for some time led a vagabond life, Balleus. they came to a certain Pagode, built in a forest, near which stood a very fine tree, under the shade whereof they reposed themselves for some time, and fent forth their prayers upon their bended knees. After fome time, finding their prayers ineffectual, the woman told her husband, That they ought to leave this shady place, and in lieu thereof to expose themselves to the injuries of the fun, rains, and storms, to try whether, perhaps, by this humiliation and penance, God might be prevailed upon to blefs them with children. They perfevered in this aufterity and continual prayers for fome longer time, but in vain; the woman growing beyond all patience, told her husband, That being quite weary of life, she defired him to fast with her, till thereby they could put a period to their miferable life. Accordingly having fpent nine days without eating or drinking, Viftnum appeared to them in the shape of a child, asking them, What was the occasion of their mortification and fervent prayers. The woman answered, All our prayers are directed to Vistnum, to bless me with such a handsome child as thee. Vistnum replied, And do you instead of gold and filver defire children, who commonly prove the toils of life? Bramani anfwered, All the riches and pleafures of this world are not so valuable to me, as a fon of my own, fo well shaped as thyfelf. Vifinum replied, Your prayers are heard; and as you have three feveral times mortified your bodies, fo three fons shall be born thee successively; and so he vanished.

Being both exhausted with fasting, they died foon after; but the foul of Bramani was infused into the body of the new-born Reneca, and that of Braman into the body of the new-born Braman, firnamed Siamdichemi, who being come to their riper years, were joined together in marriage; Reneca's fifter being at the fame time married to the great Raja Sestraarsum, who had a thousand arms.

Standickeni retired with Reneca to a folitude near the river Ganges, where they built a hut of straw, with an intention to live upon the fruits of the earth, and pass their time in praying to Vistnum.

It was not long before Reneca (pur-praffarm; furnt to the promife made by Vistnum) the fon of brought forth a beautiful fon, unto whom Renecas the gave the name of Praffaram, who being carefully educated under the tuition there to implore God's affiftance. Having of his father, did, in his twelfth year,

ther having received a certain cloth from Vistnum, which, keeping water as well as any earthen vessel, Reneca going to fetch water one time out of the river Gamges, the happened to fee the great Ra-ia Softraarfinn with his fpoute (her tifter) a hunting near the river-fide. Reneca asked one of his attendants, who it was? and being answered, that it was Raja Seftraarfum with his queen, the advanced towards them; but finding that her lifter took no notice of her, the fat down in a very melancholy posture upon the bank of the Ganges, complaining of the vaft difference there was betwixt her fifter and

Alas! faid the, the is a queen, and I a poor Brahman's wife; the is poffessed of riches, honour, and plenty, and I know nothing

but want and mifery.

She was then going to fill her cloth with water, but found it, to her great aftonishment, leaky; and being afraid to return home, staid abroad till after funfct. Siamdickenii, furprized at her long flay, looked out at the doors, and finding her fitting in a melancholy potture, asked her whether she had brought any water; but she answering, she had not, and giving him the reason for it, he told her, that he was certain she had uttered some exprofilions contrary to his zeal and piety; and being exasperated to the highest degree, commanded his fon Praffaram to cut off his mother's head with an ax. Praffaram would have excufed himfelt; but finding his father refolute, he was forced to obey, and cut off his mother's The father being highly taken with the obedience of his fon, told him, That he should ask him what he pleafed, and it should be granted him. Then, faid the fon, Resuscitate my mother from the dead. The father then taking fime of the fanctified water of the Ganges, beforinkled the body with it, and muttering out certain prayers, reflored it to life

Reneca could not forbear to make her complaints concerning the harth ufage of her husband, occationed only by fome weakn, fles and reflections upon her fifter's good tortune, reprefenting to him her picty, fidelity, and obedience, the had thewn upon all occations. These reafons were fo prevailing with the hufband, that he received her into his rms, and banished all revenge from his

Siraylaram (though not above twelve years of age) being by this time advanced to far in the knowledge of the

that could be laid before him. His mofelt to Raja Inder, king of the Bleffed Souls, for his further accomplishment, which the fon did accordingly. So foon as the fon had left him, he refolved to pay his devotions to Villium for twelve yearsfuccessively, fitting cross-legg'd with without intermission upon the ground (a thing much practifed among these pagans.) Thus 1659, I faw a certain Jegy, or mendicant, at Columbo, whose arms were grown together over his Head, by fitting in that posture.

Soon after it happened, that the beforementioned king Raja Seftraarfum, coming to give a vilit to his brother-inlaw with a great retinue, he was fo fait affeep, that all the noise of the hounds, horns, and drums, could not awaken him: his wife Reneca therefore having rouzed her husbaud, by sprinkling some warm water upon his his head, he arofe; when Raja faluting the Brahman, told him, Raja Sel-That the fame of his picty had induced transfum

him and his retinue to come to fup, and Brahman. to take a night's lodging with him.

The Brahman Standickeni being much concerned how to provide for fo many thousand persons, at last considered of the White Cow, called Cambega, belong-The cow of ing to Raja Inder, which furnishes those plans. that have her in their possession with everything they wish for. Having therefore defired Inder to fend him the faid cow, he granted his request; and the cow being fent down, the Bruhman defired Raja and his attendants to fit down at funper; which was ferved with fuch variety and plenty, that Raja, who was come upon no other account than to ridicule his brother-in-law's poverty, itood amazed thereat; and further to try his ability, asked him, to prefent him with force jewels; which the Brahman having prefented him with, (much beyond what could be expected,) Raja asked him for fome clothes and money for his people; which being likewise brought him by his brother-in-law, he refolved also to stay the next day; and being ferved at table with the fame plenty as before, he flayed alto the third day; when meeting with the fame entertainment, he was amazed Ringlen to find out whence all this plenty of pro-terral nd. visions, clothes, and riches, could come, in a place where he expected so little; especially, since he observed that all was brought out of the Brahman's hut, which was not big enough to hold half the quantity. This made him order fome of 1/3 fpies to take particular notice, whether there was not a vault under-ground, from whence thefe things were brought.

ther in the air, did no mischief, except Ballaus, that all the strength of Prassaram's arrow being lodged in that of Ram, he was thereby bereaved of all his advantage, being no more than a common Brakman for ever after, whereas Ram increased every day in power.

The Malabars say, That this transformation was made by Viftnum in the shape of Siri Parexi Rama: for the Rixi living The Malain the defarts, being no longer able to en-bars acdure the oppressions from the neighbour-count of ing kings, offer'd their facrifices to Vift-formation. num, defiring his affiftance against them. A certain famous Rixi, named Para 7ara, facrificing one day to Vistnum, he appeared in the shape of a child, and assisted at the ceremony of the facrifice; which done, Parexi Rama took up an ax, and killed forty-four kings, who used to intest the Rixi, and put them into the possession of their territories. Siri Pareni Rama being afterwards defirous to crect certain temples, and not finding fufficient room for that purpose, (because the sea then touched the mount Gatte) he offered his facrifice, when a fieve appearing to him, (fuch as they used to cleanse the rice with.) he found that as often as he did shake it, the fea retreated backwards from the thore; but whilft he was doing it a third time, Varrinem, the god of the fea, having transformed himself into pismires, (called by them Carreas,) gnawed the fieve in pieces. However, Siri Rama built one hundred and eight temples, and crected as many stones near them, from Mangalor to the cape Comoryn, much reverenced to

this day by the Indians. In the mean while the fishermen of that could making their complaints to Paread Rame, That by this means they had been bereived of their fublistence, he condituted them his guards of the temples he had built, with a fufficient allowance for their maintenance; fo that thefe fishermen being thus become Brahmans, they used always to wear a thread of a fishing-net about their necks whilst they were performing their facrifices, and introduced that custom among the pagans, for a new-married couple to go a fifhing with a linnen cloth instead of a net.

Parexi Rama being one time employed, The crigin in his folitude, in facrificing to the gods, of the mans. Siri Rama (or Vifinum) appeared in the shape of a man; which Parexi Rama taking notice of, his jealoufy was raifed to fuch a heighth, that he would needs enter into a fingle combat with him; but being prevented by the Rixii, they discovered themselves to one another, and entring into a strict friendship, Parexi Rama pre-fented his bow to Siri Rama, who returned to the Milk-Sea.

> Vistnum being thus brought into the world, in the shape of a Ram, was educated by the Brahmans in all manner of wisdom and knowledge. There happened to live at that time a certain Ragie, named Sannek, in the country of Stannak, who having fixed a prodigious strong How Ram bow in a certain inclosure made for that yet his purpose, iffued his proclamation to en-bruesytha courage all fuch as would venture to draw and break the faid bow, offering his daughter Sytha, with a great portion, as a reward to him who should accomplish it. This being likewise come to The Malathe ears of the Brahmans, Ram folli-bars /ay, cited his tutor to let him try his firength, That he which the master, not without some re-ing to faluctancy, having confented to, he went crifice, and along with him, under the notion of his invited the fervant, and coming to Rag. Sanneck's to oppose court, heard him offer the same reward the demons, to any one that could manage and break that somethe bow, telling them, that he who would to aissure the bow, telling them, that he who would to aissure the bow. enter the lift, should take the vessel with the e cere-Betel, which was offered by his own monies.

Immediately after he faw the beforementioned Rawan, with ten heads, take the Betel, and boafting of his ftrength, told them, that no body but him should pretend to Sytha. Then drawing the bow with his utmost strength, he let 1 p the finew, which striking his thumb off, he fell into a swoon. Divers other Ragies tried to manage the same bow, but finding their strength fail them, were forced

to desist.

The Betel being next brought to the Brahmans, among whom stood Ram, he at last obtained leave from his moster, to accept of the Betel, which he did accordingly, and entering the lift, found a tall mast, or poll, fixed in the center of the court, on the top whereof was a fish, and at the bottom a eistern, with water,

Buldwas fuch violence, that he not only shot the kow little beeft thou acquainted with my Bulds : rish into several parts, but also broke the

bow to pieces. The bride, rejoiced at his fuccefs, prefented him with a whole dish full of jewels, as did all the rest there present proportionable to their abilities: his parents being also sent for to partake of the honours done to their fon, they came with their other three fons, who married the three daughters of Raja Sannek, viz. Barrat married Onnemela; Lekeman, Sek-

by; and Setteroukan, Lala.

Ram then defired to return to his native country; which being granted, not without great reluctancy, he went back with his father, mother, and three brothers, with their wives, where his father delivered up the kingdom to him; but having received a wound in his thumb, whi h proved very painful to him, it was healed at laft by his wife; in acknowledge ment of which benefit he told her, that he would grant her whatever the would ask. She then defired her hasband to fund his three fons, Ram, Lekeman, (called otherwise Lastinana, and Settragua,) and Setteroukan, for twelve years into foreign countries, and to furrender the kingdom to her fon Barrat, (called Baratha, and Pareda by the Milabars.) Barrat on the other hand, was unwilling to accept of this offer; notwitflanding which, Rimber. Ram departed with his family and two brothers to the village of Baratpery, the Clanges twelve Cos from Month, but leaving a pair of his flippers behind, Barrat, who itill refused to encroach upon his eldest I rother's right, ulid to ficritice flowers, fundal-wood, and faffron, to them in his abfence.

Ram in the mean while travilling along the river Ganges to Peafease it wan, where, after a month's flav, whilst the brothers were bufy in creeting the huts, Lekeman used to go every day to gather fruit for their sublittence; he being a very handfome person, and get upon a tree to gather fome fruits, was espied by a certain woman, numed Souppennekhia, (and Charpana, i by the Ailabars,) the lifter of Rawar, and widow of one Vivali, (killed in Rawan's fervice,) who being come to wash harfalf in the Ganges, told him, That the looking upon hom as the hand-

River's efomest person in the world, she mist be me-with take-ferable for ever, unlist he would vouch diffet love her; which if he refured, the would turker leve into bath A, when he will just the territory with he in fingle conduct. ing into the body of a Fakier, he went straitways to Ram's hut, and with a doleful voice cried out to Lekeman, to fuccour his brother, who was in danger of perifhing by his enemies hands. Sytha, thunder-struck at this voice, begged Lekeman to fuccour her husband, who told her, That he believed this voice to be fiétitions, as not questioning that his brother, who had so lately flain ten thousand men, could be in a condition to cope with one. But Sytha imploring his affiftance with a flood of tears, he went accordingly.

In the mean time the Fakier, endowed with Rawan's spirit, having assumed the shape of a beggar, came to beg some alms of Sytha, who excused the matter; yet at last was prevailed upon to give him fome fruit that were left the day before; but as the was extending her arm towards the beggar, he catched hold of her hand, and pulling her over the circle, (under pretence of bringing her to the place where her husband was engaged,) He carries he carried her to the country of Lanka,

tha. in the ifle of Ceylon.

Places ber

As he was carrying her along, he met with the giant Siettank, of the tribe of the Raches, who begged some victuals of him in a threatening tone. Rawan having no provisions to give him, took up a stone, which he rubbing against his thigh, made a large hole, the blood whereof turned the stone into meat, which he gave the giant, who had no fooner cat it, bo. it turned to a stone again in his stomach, and oppressed him to such a degree, that he was not able to ftir or

Then Rawan, pursuing his journey, came to the mountain Resmokperwat, where he met with the apes with bears heads, called Hanuman, Suckerige, Anget, and Siamboemt; and Sythic dropping her ring, the same was taken up by Hanuman.

Rawan coming into Ceylon, and not in a garden daring to bring Sytha into his house, placed her in a garden under a certain tree called Sysem; and having appointed her a guard of twelve giants, he daily made his courtship to her; but she refused all his offers.

> In the mean time Ram returning homewards, and meeting with his brother Lekeman by the way, they both came to the hut, but to their great furprize found Sytha gone. Ram in a most violent rage upbraided his brother with leaving the hut; but having understood the reason, they resolved to go in quest of Sytha.

As they were passing through a very

long fubterraneous patrage, they met with Bald. as. a certain giant at his devotion, who being furprized to fee them, Ram told him, Ram and That the delire of finding out his spoule so in quest had brought him through this dangerous of Sytha. place, asking him, Whether he had not heard any thing of her. He answered, that he had feen a giant flying through the air, holding a woman upon his hand. Ram further enquiring what way they were gone, he answered, Towards the country of Dekendesa.

Ram verily believing this to be Sytha, bleffed the giant, and purfuing his journey to the mount Refinokperwat, met with the beforementioned apes with bears heads, where Hanumin proftrating himfelf at his feet, asked him, What brought him to this remote part of the world? Ram answered, To look after his spouse. Hanuman replied, I saw a giant pass through the air, with a woman fitting upon his hand, who dropped this car-ring. Ram infinitely rejoiced at the tight thereof, (knowing it to be his wit a.) asked him, What way they had taken? Hanuman replied, To the country of Lanka, Hanuman in the ifle of Ceylon; and at the fame gives an time offering his fervice for the recovery Ram of of his spoule, he entreated the ape Suc-sytha. kerige to affift him in this enterprize; promiting him, that in cafe they fuecceded, Ram should restore to him his wife and his estate in the valley of Kieckenda, taken from him by his brother Bael, But Suckerige remembered his brother's ftrength, how he had worsted the giant Rawan, and held his head two months under his arms, (before the government of the world was committed to him by Vistnum;) besides, several other giants told him, that Ram being only of a mid-

dle flature, was not likely to conquer him. Hanuman, however, perfitting in his perfuations, and extolling the power of Ram, Suckerige asked a token, viz. that he fhould shoot his arrow through some of the branches of the trees, whilst they were agitated by the wind. man having understood his request, spoke to his brother Ram, who bidding them that their eyes, he that at once with his arrow through feven trees, and at the fame time ordered Suckerige to challenge his brother Bael in his name; which being done accordingly, Bael appeared, and in a fcornful tone told Ram, That he would cut off his head at one ftroke; whereat Ram being exasperated to the highest degree, he drew his bow, fent his arrow through his body, and restored the valley Ram kills of Kieckenida to Suckerige, and with it Back his wife,

Ceylon.

Sytha.

Baldans. Ram having now taken a resolution to " flay with his brother in the mountain, fent Hanuman, Anget, Suckerige, and Sucking, chieftains of the apes, into the valley of Quiexinta, (as the Malabars call it,) not far from the valley of Kieckenda, in quest of his spowse. Hanuman being ready to depart with his company, gave him his ring as a token to shew to his spouse Sytha. Accordingly they set out on their journey, taking two different roads, two and two together; but not meeting with Sytha, they met at a certain place near the fea-tide, full of despair at their ill fuccess. However, Hanuman bid them have a good heart, telling them, that Ceylon lying opposite to them cross the seas, he would, according to the power granted him by Viftnum, fly over the fea into

Ceylon, where Rawan kept his relidence. Hanuman being at last, in disguise, arrived in the isle of Ceylon, met with ten Hanuman female giants that were appointed her guard by Rawan in the air: these refufing him paffage, he affumed the shape of a fly, and thus escaping their hands, advanced to the shore of Geylon; but being there met by a huge giant, who stopped his pattage, was forced to reassume his own body of an ape, and so to engage the giant, who feeing him to fight fo courageoufly, commended his bravery, telling him, That he should succeed in what he defired. Hanuman answering, That he came only to look for his mafter Ram's wife. The giant replied, She is Hears of kept by the most potent Rawan in a

garden under a fysem-tree. Hinuman then pursuing his journey, and being extremely tired, did fall into a fwoon upon the fea-shore; where having flept eighteen hours, and forgotten the name of the place affigned him by the giant, he transformed himself into a cat, and running through all the houses and corners of Ceylon, but without fuccefs, at last happened to light upon the top of Rawan's house, from whence clpying the tree where Sytha was kept, he advanced towards it; but whilst he was in doubt whether it were Sytha or not, he faw Rawan coming towards her, and renewing his courtfhip, offering all his territories and treasures, in case she would confent to be his wife; but Sytha replied, That being Ram's alone, the would never encourage his addresses, threatening to consume him by fire, if he persisted in his demands.

Rawan was no fooner gone, but Hanuman dropped the ring given him by Ram into Sytha's lap; who burst out into tears, imagining that Ram had been killed by fome of the giants : but Hanuman throw-VCL. III.

ing himself at her feet, told her, That Baldaus. Ram was in good health, and had fent him to look after her. Sytha still queftioning the truth, Hanuman told her, That the ring was given him as a token to her, yet not with an intention to bring her to him, but only to learn news of her. Then hatte away, replied she, and defire Ram to deliver me out of the hands of the tyrant Rawan.

Hanuman went his way; but confider- Hanuman's ing with himfelf, h would not forfake Attons a Lanka without leaving behind him fome Ceylon.

remembrances of his having been there, he returned to Sytha, asking her leave to gather fome truits, which the denied, telling him, That he would be unfortunate in his enterprize, if he fed upon any other feuit but what he found upon the ground. Well, faid Hanuman, and fo laying hold of the next fruit-tree, and tearing it up by the root, he cat the fruit; the fame he did to most of the other trees in the garden, except that where Sytha was placed. The gardiner feeing the next morning what havock Hanuman had made, told his mafter what happened, who being incented to the highest degree, ordered ten thousand giants to kill this ape. Hanuman seeing them advancing against him, laid hold of one of the biggest trees, and made such havock among these giants, that scarce one of them escaped.

Rawan no fooner heard of this defeat. but he fent twenty five thousand more to revenge the quarrel of their comrades; but these having undergone the same fate, he fent his youngest son at the head of twelve thousand of the choicest giants, Great who put Hanuman fo hard to it, that they flaughter made him reel feveral times; but his ants. strength being continually renewed by Ram's care, he at first slew Rawan's youngest fon, and at last the whole army.

Mandory, Rawan's spouse, did all that lay in her power to perfuade her husband to deliver up Sytha to Ram, for fear of losing his whole estate; but Rawan was fo far from hearkening to her counfel, that he issued a proclamation, that he who thought himfelf the ftrongest man in the ifle of Ceylon, should engage with the ape: but there being no body who durst compare for strength with Rawan's eldeft fon, named Inderfiet, (who formerly had vanquished Raja Inder,) he ordered him, That whenever he was a going to shoot his arrow, he should utter certain words taught him by Bramma, which had that effect, as to turn the arrow into a ferpent, and to entangle his adverfary.

Inderfiet thus hold with hopes, advanced at the head of his giants against Hanu-

R list

Baldens, man, who laid to bravely about him, that his comrades, told them what had hap-Balders. ~ he made the giants shrink, which Inderfiet perceiving, let fly his arrow against Hanuman, which being in an inflant tranfmake: 11/9 form'd into a ferpent, was tore to pieces of a bi-watched ar. by Hanuman; which Inderfiet feeing, he flew like lightning thro' the air to the holy Bramma, upbraided him with deceitfulness, and threatning him with no

less than the loss of his lite, unless he thew'd him the right way of vanquithing his enemy.

Bramma being put to fuch a nonplus, hastned to Hanuman, and casting himself at his feet begged of him not to oppose Inderfiet's arrow, as wanting not means to protect himself against his attempts, by divers other ways. Hanuman taking compassion of Bramma, granted his request; who then told Indersiet, that by his charms he had fo ordered the matter, as to render his arrow more effectual than before. Indersiet encouraged by his promife, fent forth his arrow against Hanuman a fecond time; which turning into a ferpent, stuck close to his limbs, that the giants had fufficient opportunity to exercife their weapons upon him, though he received no more harm by it than if he had been touched with a feather. However, they carried him before the ten headed Rawan; who asked him by what means he was become invulnerable. Hanuman replied, by Ram's bleffing, whose wife thou haft carried away; which if thou dost not restore forthwith, thy whole country shall be laid desolate.

Rawan exasperated at this answer, commanded ten thousand giants to kill him; but finding their endeavours prove unfuccefsful, he asked Hanuman, by what means he might be bereaved of his This flory strength; he replied, If you dip my tail feems to in oil, wrap it in cotton, and then fet it

relation 10 on fire, all my strength will vanish in an inflant. Rawan believing the matter, Sampson. put it in execution, notwithstanding which, Hanuman pulled the serpent to pieces like a piece of thread, killed most of the giants, and fet fire to the houses. This done, he took his leave of Sytha, who gave him one of her bracelets as a token, to shew Ram that he had seen her, charging him at the fame time not to look back till he had past the seas, else he would be in great danger. Hanuman firictly observed this rule till he came to the fea-shore, when approaching on a sudden to a great slame, he looked back, and the flame reaching his tail, he was glad to run into the fca, to extinguish

Then taking his courfe through the air, he passed the seas, and meeting with

pened; who thence made the best of their way to the mountain Refinek percent; and having shewed Sytha's bracelets to Ram, who immediately ordered Suckery, lord of the valley of Kieckenda, to immon all the apes under his jurifdiction to arms against Rawan; he accordingly appeared under their eighteen kings, cach whereof appeared at the head of twenty thousand apes, amounting in all to three hundred and fixty thousand apes.

Ram and his brother Lekeman marched at the head of this powerful army tthe fea-fide, directly opposite to the ifle of Coylon; where Ram having spent three days in fafting and praying, to open a pattage for his forces through the fea, but in vain, he drew his bow, threatning the fea to reduce it into fuch narrow bounds, that where then was nothing to be feen but water, the terrestial creatures should sport upon the pleasant fands without danger. The waves of the fea thereupon humbling themfelves before Ram, told him, That to open him a patlage through the depth, could not be done without a total destruction of a vast number of fishes; but that there was in his army a certain ape called Sichem, endowed with fuch a quality by his master the holy Narsy, that whatever stone he should only rouch, would fwim on the furface of the water like wood. Accordingly Ram ordered a vast quantity of stones to be brought from the neighbouring mountains, which being only touched by Sichem, and then A flone thrown into the fea, did fwim upon bridge of the furface thereof, and making a bridge thandred of one hundred leagues in length of leagues of one hundred leagues in length, at-cross the forded an easy passage for his whole/ea.

The inhabitants of Lanka, or Ceylon, being foon alarm'd by the noise of their drums, and other warlike infruments, Rawan's wife intreated her husband to take a view of that prodigious army from the top of his house; whom Ram no fooner spied at a distance, but with his arrow he shot off his ten crowns from his ten heads. His wife laying hold of this opportunity, exhorted him once more to deliver up Sytha to Ram, who, fays the, can with the fame arrow, which took off your ten crowns, also take off your ten heads.

But Rawan perfifting in his resolution not to part with Sytha, Ram told his brother Lekeman, that to leave nothing unattempted to reduce Rawan to reason, they would dispatch the ape Anget to him to demand Sytha; and in case of refusal, to tell him now, that they

Rawan being advertised of his arrival, called together all his giants, (among whom was his brother Behickbem;) and having caused ten statues o be made with ten heads like himfelt, he took his place in the midit of them: Anget coming boldly into the room, asked, What montters these were, and which of them was Rawan himself? Whereat Rawan being highly exasperated, asked, Who it was that daresaffront him thus? threatning to make him repent his boldness. Auget replied, Were I not bere in the quality of an ambaffador, I would try my firength with thee, being fent by Ram to let thee know, that he did not come with this army to destroy thy subjects, but to recover bis wife Sytha; which if thou refuseft to do, be declares himself innocent of all the offusion of blood that shall enfue. But Rawan answering, That he was resolved not to deliver her; Anges brought this answer to Ram.

At the fame time, Rawan's brother, with five of his chief counfellors, find-Ramer ing him not in a capacity to cope with so powerful an army, assumed the shape of aper and throwing themselves at the feet of Ram, craved his mercy and pro-

Rawan's

The apes of Ram's army taking them for spies, handled them very roughly at first coming into the camp; and Hanuman, or Hanneman, especially, would have diffwaded him from having the leaft concern with them; but were appealed by Ram, when he told them, That he knew them to be men of honour and probity.

By this time Rawan had armed ten thousand of his boldest giants to attack Ram's camp; but these being soon defeated, he fent eighteen thousand more; Rawan's who having undergone the fame fate, he he fent thirty thousand more; and these also succeeding no better, he fent fifty thousand more, who were all routed like the reft.

Then Rawan's eldest son entreating his father to let him engage alone against the whole camp of Ram, he could not confent to his request; but having convinced his father of the advantages he had lately got by the instructions of Bramma, he put him at the head of ten thousand of his choicest giants. With these troops being advanced to Ram's camp, he encouraged them to fight bravely, whilft he foaring up into the air, did hide himself behind one of the wheels of the chariot of the fun, till coming directly over Ram's camp, he fent forth one of his magical arrows, which turning immedistely into a ferpent, fent forth fuch a

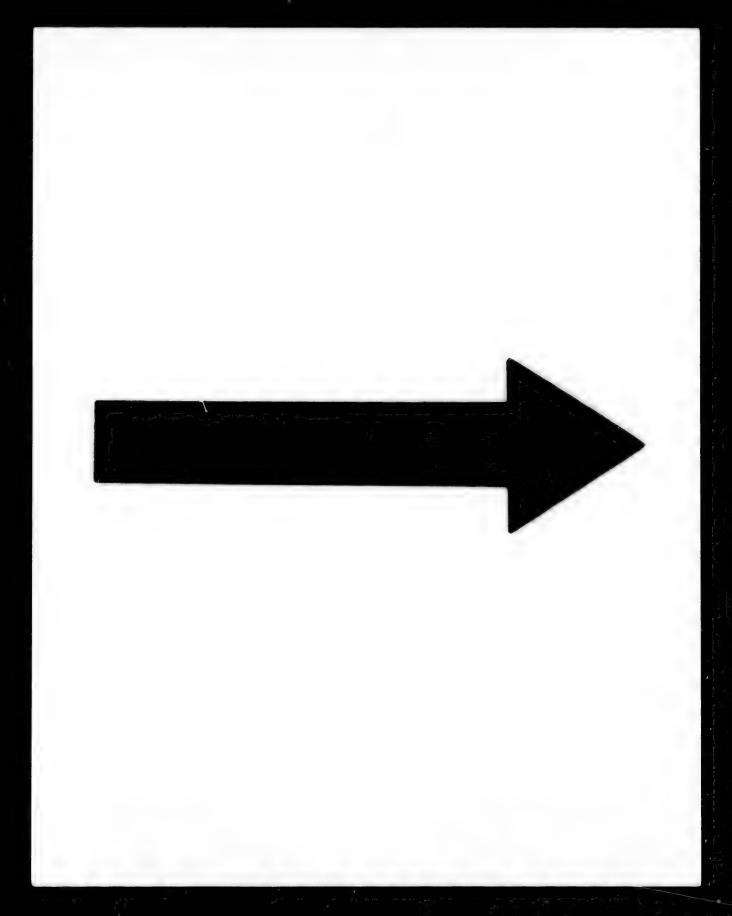

vaft number of other ferpents among the Baldaus, apes, that their arms and legs being quite ~ entangled, they were knocked down on all fides by the giants.

Ram not a little furprized at this difaster, asked Rawan's brother, what was best to be done; who told him, That if he would fend for his winged Garroude, the ferpents would vanish in an instant. Ram following his advice, Garroude no fooner appeared, but the ferpents vanished; and the apes fought it out bravely

with the giants.

In the mean while, Ram having advised with his council, how to attack Inderfiet, Rawan's cldest son, in the air, and Lekeman having offered his fervice, he got upon Hanuman's back, who carrying him up into the air, Inderfiet fent a shower of arrows against him; but these being repulfed by Lekeman's shield, and Inderfiet feeing him advance towards him, threw away his bow and arrows, and laying hold likewise of his sword and buckler, a most furious combat entued, which remained dubious for fome time; till Lekeman giving him a blow on his Rawan's neck, cut off his head at one stroke, elies for which dropt down before his father's feet. flam. Mandery, his mother, burst out into a most violent passion for the loss of her beloved fon, tearing her hair and breafts with her nails, and upbraiding her hufband with cruelty, injustice, and lascivioufness; but to little purpose, Rawan pertifting in his refolution of not deliver-Being resolved to make his utmost He seeks

efforts, he cra 1 the affiftance of his for affif-brother, a most famous giant, named his brother. Coukeringh, (or Kompacarna, as Rogerius * * C. 3. calls him after the Malabars;) this giant used to spend his whole life in sleeping, except one day, when he appeared in his full activity; and to spend his time in filling his belly with victuals for the whole fucceeding year. It being then in third month of his fleep, Rawan called to him aloud, Brother Coukeringh, rouze, rouze, and come to my affiftance, or elfe we are loft! Coukering b asking him, halfafleep, what was the matter; Rawan told him, That being attacked by a vaft body of apea under the command of one Ram, who had killed two of his fons, and no less than feven generals, with two hundred thousand giants, he had no other means left to reprieve himfelf and his subjects from destruction, but to implore his aid. The giant reply'd, Thou beeft unfortunate, Rawan, to have entangled thy felf in an unjust war against an army headed by the divine Ram; I have foreseen it in my fleep, that the fame will turn to

Baldaus, the destruction of thy felf and thy

Rasvan stood amazed, but full of defpair, told his brother, That if it was his fate (written in his forehead) to die by the hands of Ram, it was in vain to avoid it, defiring once more his affif-tance. The giant replied, My life is at your fervice : and fo ordering his chariot drawn by ten pair of atles, to be got ready, put himself at the head of Riwan's army composed of giants. Ram in the mean while, understanding that the great giant was coming against him, he appointed fome thoulands of apes to throw upon him the tops of the rocks; which they did accordingly, though in vain, the giant piercing the mount that was thrown upon him with his arrow, no withitanding it had one hundred leagues in compass.

This made Ram ask Bebickbem, Rawan's brother, by what means the giant Coukeringh might be vanquished. Bebickhem replied, You must retreat three paces ba kwards. That cannot be, anfwered Ram, because I am descended of the race of the Ketteriis, who dare not retreat under pain of banishment. But there is no other remedy, returned Bebickhem; but the best advice I can give you, is to descend from your chariot, and let the same be carried three paces backwards. This being approved by Ram, was done accordingly; so that whilst the giant was making a most horrid slaughter Thegiant among the apes, he shot his head off, which falling upon the ground, shook tingh fiam. the earth, as if a whole mountain had tumbled down, a whole river of blood, as black as pitch, gushing out of his veins.

Notwithstanding this, the trunk of his body continued to make a great flaughter among the apes; so that Ram being again obliged to have recourse to Rawan's brother, he told him, That if he fent out a party of apes, to get a blue cloth died with indigo, and therewith covered the body, it would become immoveable. In the mean while, the trunk of the giant continued to make great havock among the apes, but to little purpose, they being revived (by the aspect of Ram,) as fast as they were

By this time, the blue cloth being brought, was thrown upon the trunk, which in an instant remained as unmovable as a stone in the field. Rawan Rawan's feeing himfelt thus reduced to dispair, lass farise had recourse to the goddes Bowanni, unto whom he offered a sacrifice of fresh butter, fandal-wood, flowers, and spices,

imploring her aid against Ram with such Baldeus. fervency, That it is believed he would have obtained his request, had not the ape Hanuman defiled the facrifice by throwing one of the dead carcafes of the flain giants upon the altar, crected in a deep hole for this facrifice.

Rawan thus drove to the last extremity, put himfelt again at the head of his forces, and like a desperate person flew all the apes he met in his way, forcing all the hills before him the apes threw in his way, till Ram drawing his bow, that off nine of his heads. And then calling to him aloud, Rawan, faid he, Detift from blood-shed, return me my Sytha, and I will heal thy wounds, and restore thee thy heads and kingdom, without which thou wilt certainly lofe all. But Rawan replying, That it fate had fo ordained it, he would rather lofe his ten heads also, than Sytha. RamRawan fhot likewise his tenth head off: but per-flain 8 ceiving that the headless body laid still about him with its twenty-four arms, he threw some water upon it, and muttering out certain words, made it as immoveable

as a stone. Mandory was no fooner informed of her husband's death, but she threw herfelf at Ram's feet, bewailing his obstinacy, notwithstanding the many forcbodes of his fall, an unfortunate raven and a doleful owl having fettled upon his house, with very dreadful lamentations and outcries, the fore-runners of his misfortune. As I have, added the, been innocent of what has happened, fo I hope you won't His wife deny me my protection. Ram bid her married be fatisfied, ordering her at the same ther. time, to pals feven times through the fmoke of the fire kept at Tchie, to purify herself, and renew her virginity; which done, he would marry her to her husband's brother Bebickhem, who accordingly was put into Rawan's place. Then Ram being carried in his rofe-litter to the tree Sysem, where Sytha was kept a prifoner, the embraced him, returning him Ram meets a million of thanks for her deliverance, again with The next thing Ram did, was to revive Sytha, his apes slain in the late engagement; and fo marched back over the same bridge that had caaried him into Ceylon. Being come to the opposite shore, he ordered the stones to be carried to the place whence they had been taken, and marching to the valley of Kieckenda, he would there have taken his leave of Suckery; but he refusing to part with him thus, would needs accompany him with all his Returns forces as far as the village of Baratpoeri, home. where Ram was received by his father, mother, and brother, with great demon-

This left his place vacant in heaven. transformation happened with the begin-, ning of the third period of time; and, according to the relation of the Benjans, was thus :

One Ragia Kans living in the city of Mottera, twenty-five Cos from Agra, upon the river Siemmena, had a young tifter named Deuki. About three Cos higher up the fame river, lived a certain Brahman named Waffendeuw, in the city of Goggel; The faid Denki being arrived to a marriageable age, her brother Ragia Kans looked out for a husband for her; but meeting with none for his purpose in that city, he fent to the city of Goggel; where his messenger hearing of the worth and picty of Wassendeuw, the same was, at his recommendation, married to him when he was only nineteen, and she no more than twelve years of age.

The faid Ragia having understood that there was among his subjects a certain Brahman named Narret, well skilled in *See Vos. chiromancy, (a thing in high esteem flus, 1.2. among the pagans, *) he sent for him, Idol. c. 47 defiring him to look into his fifter's hands, Vol. III.

and to foretel, without diffembling the matter, what good or bad fortune was like to befal her. The Brahman having viewed her hand, told the king, That ac-cording to the lines of her hand, she was to bring forth fix fons, and one daughter; the youngest of whom will not only take away thy kingdom, but also thy life.

The king being not a little furprized at this prophecy, ordered the faid Deuki and her husband to be imprisoned in a strong castle; and that all the children begotten upon her body, should be killed immediately. Accordingly, the midwife brought the new-born babes to her brother, who beat out the brains of fix of them (viz. five fons and one daughter) against a stone. Afterwards understanding that she was with child with the feventh, he enclosed her in a room with iron doors, and appointed her a guard of one hundred foldiers, with strict orders, That the child, as foon as it was born, should be brought to him. Upon this occation, I cannot but observe, that this, as well as the ensuing part of the story of Kisua, seems to have a near relation to the history of the birth of our faviour, his flight into Egypt, the mur ler of the innocent children by Herod, Christ's miracles, and afcention,

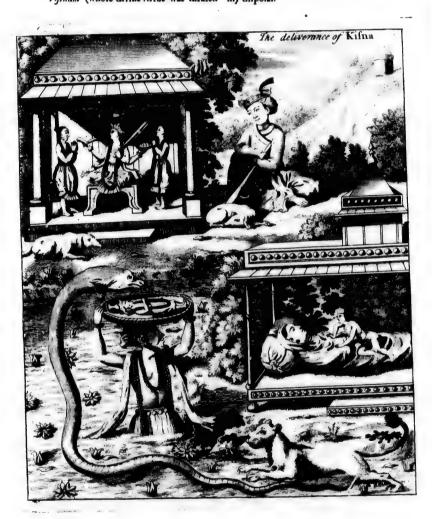

9 P

The

Baldæus. day of the decreasing mean,

The time of her reckoning being expired on the day * Asthen, of the month Souwanne, this unfortunate lady being overwhelmed with grief, the brought forth a fon about midnight, without the least pain, whose face was as bright as the full moon; but as the had occasion to rejoice at the birth of so fine a child, his sate put her into incredible affliction: but Vifinum (whose divine virtue was insufed

into this child) comforted his mother, Baldaeus. telling her, that he would find means to escape the hands of his uncle, and deliver herout of her prison. Then speaking to his on the other fide of the river Siemmeua, to the Brahman Nen, whose wise being lately brought to bed of a daughter, exchange me for her, and leave the rest to my disposal.

Baldæus.

Wassendeuw answered, How is it posible to remove thee out of a chamber fo closely guarded and kept, that not the least thing could pass in or out? Kifna (this was the child's name,) replied, the doors shall be opened to thee, and the guards fo overcome with fleep, that nothing shall stop thy free patlage. He had no fooner spoke these words, but the feven doors opened themselves, so that Wassendeuw took the child, and carried him off without the least hinderance. But coming to the river Siemmena, directly oppolite to Goggel, Kifna's father perceiving the current to be very strong, (it being in the midst of the rainy season,) and not knowing which way to pass it, Kisha comman led the water to give way on both fides to his father; who accordingly passed dry-footed cross the river, being all the way guarded by a ferpent that held her head over the child, to serve it instead of an umbrella. The Benjans call this ferpent Sickenaly. Coming to the Brahman's house, the door opened itself, and finding the Brahman and his wife afleep, he exchanged his fon for their daughter, which he carried along with him to the castle. In short, the water afforded him once more a free passage; and finding the doors of the castle open, and the guards asleep, he locked them after him, and delivered

the girl to his wife.

The guards hearing the child cry foon after, entered the chamber, fnatched it from the unfortunate parents, and brought it to Ragia Kans, who finding it a girl, upbraided the Brahman with want of skill, yet for fear of the worlt, was going to strike the head against a stone; but the child slipping out of his hands, slew up into the air, and told him, It was in vain to attempt to murder ber, since be that was to take away bis bead and bis kingdom, so revenge the death of his sive brothers, and a sister, was safe at Goggel. This said, it slew up high into the air, where it was turned into lightning by Vistnum, a thing never seen before in the world.

Ragia Kans not a little furprized at this accident, confulted all his friends, what he had best do in this emergency; but none being able to advise him to any purpose; whilst he was very melancholy, and ruminating upon the oddness of the thing, he understood that the pious Brabman Non, who lived at Gogges, had a most beautiful son, which put it into his head, whether it might not perhaps be he who was to take revenge of him for his tyrannics. At last, to make sure work, he resolved to have the child killed; but not

thinking it fafe to undertake so heinous a Ballieus. thing barctaced, (for sear of the common people,) he made his applications to his eldest sister Poetena, enjoying her, as she tendered his life, to go with some presents to this Brahman's house, and to endeavour to kill this child by anointing her teats with poison.

Accordingly coming with confiderable prefers to the child's mother at Goggel, the wifhed her much joy; and taking the child in her lap, the gave ample recommendations of its beauty; and then kiffing and playing with the child, laid it to her breaft: but this child being proof against all poifon, did suck away, not only all her milk, but likewife the blood out of her veins, till she dropt down dead upon the spot.

Ragia forely afflicted with this news, releated his fifter Deuki and her husband, asking his fifter's pardon for his having pretended to thwart the immutable decrees of destiny, and desiring that all things past might be buried in oblivion. However, as the child at Goggel lay confantly in his head, he advised with his Vizier, or chief minister, upon the matter: he told him, That there lived a certain giant named Sestafor, at Mottera, who had the gift of transforming himfelf into a cart and oxen, by which means he might carry the child into the air and murder it. The king, pursuant to his advice, fent for the faid Sectafor; who, at his request, croffing the river Siemmena, when he came near the city of Goggel, transformed himself into a little neat cart, drawn by two white oxen with gilt horns; and palling thus through the ftreets of the city, at last stopped near the Brahman Nen's door. One of the neighbouring women having just at that time Kisna in her arms at the door, set the child upon the faid cart, which was no fooner done, but Sectafor flew with the child up into the air. The mother amazed at this spectacle, cryed out aloud, O Vistnum, protect my child! her prayers were heard; for Kifna, when he faw himfelf high in the air, assumed the shape and thrength of a giant, and gave such a blow near the giant's heart, that he beat the breath out of his body; then reassuming his former shape of a child, got upon his dead carcase, and so fell down with it upon the ground. His parents being eye-witnesses of the deliverance of their supposed son, were so surprized thereat, that looking upon him as fomething extraordinary fent them from heaven, they facrificed to the gods, and gave abundance of alms to the poer.

Ragia Kans finding himfelf difapnointed in his hopes, had recourse once more to his most trusty countellors: one of them told him, That there was a certain Deyt, or giant, named Turnawent, who being endowed with the virtue of transforming himfelf into a whirlwind, the king engaged him on his fide, in order to carry the child into the air. Kifna, who heard the whirlwind rolling cross the river Siemmena, towards the city of Goggel, being then in his mother's lap at the door, rolled down upon the ground; whence the whirlwind fnatching him up into the air, his parents stood amazed at fo strange a spectacle, imploring Vistnum for his affiftance.

Kifna being carried to a vaft height by the wind, affumed the fhape of a man, and taking the giant Turnawent by the throat, turned his neck round; and then reaffuming his former fhape, got upon the dead careas of the giant, and fell down along with it upon the ground, just before his parents door, to the great amazement of the inhabitants of Gogzel, who could not but look upon this accident as miraculous, or that had fomething of divine

in it.

Kifna in the mean while remaining upon the giant's back, cried most vehemently; his mother laid him to her breast, but he not cealing to cry, she laid him in a hanging cradle; notwithstanding which, he continued crying, till his mother having recounted to him the story of Ram, (as related before,) he leaped out of the cradle, and taking the shape of Ram, with his bow and arrow, he ried out, Lekeman, let us go after Raman, and deliver Sytha. His mother being ready to prostrate herself at his seet, he soon reassumed his former shape, and increased miraculously, both in strength and wistlom.

It happened one time, that his mother did bring upon the table a golden difh with rice-milk, and fome herbs, dressed after the way of the Benjans, which Kifna seeing, he told her, He could not eat it, unless these things were all mixed together, which she did accordingly; but Kisna tasting it, desired her to separate them again; his mother answering him. The it was not in human power so to do, he laid his hand over the dish, and separated them immediately, to the associations.

ment of his parents.

His father being a Brahman of the cowherds, maintained his family by breeding of cattle; which, fince the bringing of Kisha into the house, was increased to nine hundred thousand.

His mether being one time bufy in

churning, he asked her for a little butter: Baldaus. she gave him a little, but not thinking that enough, he asked for more, which the retuting, he took the opportunity whilft five was gone out of the way, to take away fome. His mother returning, asked Kifna, What was become of the butter? He answered, That the cats and rats had cat it. But the mother not thus fatisfied, looked into Kifina's mouth, where the had a view of the whole world wi h its waters, forests, mountains, &c. in-closed in a blue circle. The mother aftonished at so strange a spectacle, yet soon recovered herself, when she saw Kisha return to his childish shape and game again; fo taking up a twig, threatened to strike him; but he running out of the town, the purfued him; but not being able to overtake him, he flood still at last, when she gave him three or four blows, urging him still to tell her what was become of the butter; he persisted in his former flory, that the cats and rate had eaten it. She took all the ropes belonging to the hundred and ninety nine thousand cows, endeavouring to tie them together in knots; but notwithstanding all her endeavours, the knots would not tie, till Kisua finding her much out of humour at this disappointment, he permitted the ropes to be knotted, and himfelf to be tied with the ropes; but his mother finding him cry bitterly, the releafed him foon after.

Another time his mother being gone to milk the cows, ordered him to hold a flick in his hand, to make the cows frand frill whilff she was a milking; but finding she had left her brass vessel, wherein she used to gather her milk, behind, and not daring to fend Kisha, he told her, He would soon find a way to fetch the vessel, without stirring from the place, and so extending one of his arms so far as to reach the vessel, he gave it to his mother, and so reassumed the shape of a

child.

In the mean while Ragia Kans being informed that the inhabitants of Gogged increased considerably in riches, (for Kifna's fake,) he ordered his governor to load them with heavy taxes; which being done accordingly, with the utmost severity, they advised with Kisna, whether they had not best remove with their cattle to the fertile valleys of the mountain of Perwet. Kisna approving their proposition, persuaded his parents to do the same; so that they transported all their moveables and cattle, to the most service will be about the mount Perwet, or Ooden Perwet, near the river Siemmena, Here they fixed their habitations in a

CHAP. VI.

Further Designs of Ragia Kans against Kisna by the means of certain Giants. Raja Inder and Bramma. Kisna produces a Pearl-Tree, and is made a King of the Cowherds.

R Agia Kans, highly exasperated at try, Rigia Kans intreated the giant Dathis removal of his subjects, fummoned a certain giant, named Bacaffar; who having the virtue of transforming himfelf into a hern, he fent him to carry away Kifiia; which he did accordingly; and having carried him up into the air, endeavoured to swallow him; but Kifna transforming himfelf into a fiery flame, burnt the hern to ashes, and he returned to his parents, without receiving the least harm. The news thereof having foon reached the cars of Ragia Kans, he fent another giant, named Wickeraak, who transforming himself into the shape of a boy, came to Kifua as he was looking after the cattle in the field, and engaged in a wrestling match among the other boys, not questioning by this means but to draw Kifna into the game, and so make an end of him; but Kifna (who was not ignorant of his defign) challenged him; and as they were wreftling, gave him fuch a kick upon his breaft, that he tumbled down dead upon the fpor.

Ragia Kans finding himfelf once more disappointed in his aim, fent the dread-ful giant Agasor, whose entrails were all This giant having laid himfelf close to the cowherds huts, opened his dreadful jaws, fo that the uppermost receded up to the skies, his teeth representing like coco-trees, and his throat like the entrance of the huts. Kifna knowing the deceit, drove his cattle to his own flables, but the rest went straitways with their cattle into the giant's throat; which the giant no fooner perceived, but he flut his teeth, so that the poor wretches finding themselves in the midst of fire and flames, applied themselves to Kisna, who was got among them on purpose to make himself an instrument of their deliverance. He bid them not to despair; and then extending himself with all his might, made the giant to burst in pieces, and thus opened a paffage for the rest to escape

This miraculous de "verance being foon fpread all over the neighbouring coun-

wanneel (who had the power of trainfinuting himself into a flame) to destroy Ki/na. Accordingly he came to the place where Ki/na and his companions were feeding the cattle, and fetting all (not excepting even the trees and grafs) into a light flame, the cowherds fl d to Ki/na (who was at fome distance) for help, which he promifed them in an instant; and fo advancing towards the giant, took and held him round the middle, till he forced him to fwallow all the fire again.

Ragia Kans, dinost reduced to d spair, had recourse to the giant Kifep; who having affirmed the shape of an ass of a prodigious bigness, advanced towards the cowherds, with a dreadful countenance; who being terrified at fo dreadful an afpect, left Kifna alone, who was fo far from being furprized at this menstrous fight, that he laid by his pipe, and advancing towards the afs, who came openmouthed upon him, endeavoured to take him by one of his hindermost heels; but the ass gave him so terrible a kick with his foot, that he threw him eight or ten yards high into the air. Kifna finding himself thus roughly handled, thought fit to assume the shape of a giant, and fo taking the afs by the hinder leg, did fwing him three or four times about his head, and then throwing him against the ground, fqueezed the breath out of

The god Bramma being not ignorant whether Kifna was not endowed with fome divine virrue, took his opportunity, and carried off all the cattle belonging to Kifna and the other cowherds; who running to Kifua, and imploring his affiftance, he bid them shut their eyes, which they had no fooner done, but he pro-duced the fame number of cattle they had loft. Bramma came about a year after, and brought back all the cattle, asking his pardon for what was past. Kisna told Bramma, That he had better keep within his own bounds; and causing 9 Q

Baldgus, the cattle he had produced, to vanish immediately, he kept them brought back

by Bramma. Another time, all the cattle just after they had been drinking about noon out of the river Siemmena, fell dead on a fudden upon the ground. Kifua furprized at this accident, and knowing that Garroude having lately diflodged the monstrous serpent Kallinaegh from her dam, called Rammane Drepek, he shrewdly sufpected that she had taken to this river, and infected the same with her venom; then getting upon a palm-tree, he affumed his white and black skin, and two more arms and hands; and fending for Gar-roude, ordered him to go to Bramma, and to demand of him the things taken out of the sea in the times of Couram, and left in his cuftody till his return. Garronde hastening to Bramma, brought back to Kisna the Chianke, or horn, the beauteous woman Leksenry, and the jewel Consenkmany. This done, he took the horn in one hand, a piece of iron in the fecond, another weapon in the third, and a flower in the fourth hand. Thus couipped, he leaped into the river, in the pre-fence of his companions and diving to the bottom, met with a fe of some of the attendants believe to the ferpent Kallinaegh, who as a what had brought him thither, for warning him to retreat in time, before he should be seen by the ferpent, which questionless would devour him in an inftant. Kifna replied, That being come on purpose to find out the serpent, he defired he might be showed him; which they refuting to do, he turned his eyes on all fides, and at last espying the serpent, he awakened him out of his fleep, bidding him to leave this river, unless he would pay for it with death. The ferpent Kallinaegh swelling with rage, slew upon Kisna, and beat him backwards; but he recovering himfelf, fqueezed the ferpent's head to that degree, that not knowing what to do, he twisted himself about his body; but Kisna increased the bulk of hisbody in such a manner, that the ferpent, ready to burft, was forced to let go his hold, being ready to drop down dead for want of ftrength. Kisha then got on the top of his neck, and putting an awl through his nostrils, rid upon him as if he had been on horseback. The wife and attendants of the ferpent finding him quite out of breath, intreated Kifua to spare his life, promiting to quit the river immediately. But Kallinaezh, not willing to consent to what they had offered, still endeayoured to get rid of Kifua; but finding all his endeavours in vain, and that Kif-

na's body increased every minute in Baldaus, weight, he was glad to approve of what had been offered by his wife. Kifua having pardoned his offence, told him, That he would double his strength, (because he had been engaged against a god,) and that Garroude should not any more disturb him in his den, provided he would leave this river, and for the future never hurt either men or beufts.

The ferpent, with his vife and attendants, having paid their reverence three times to Ki/na, left the river Siemmena; and Kifua ariting on a fudden above the furface of the water, reassumed his own shape, and coming ashore, blew his horn, by the found whereof all the cattle were

in an instant restored to life.

All these miracles wrought by Kifna had fuch an influence upon the cowherds, that they confulted all possible means to pay him due reverence. One among the rest told him, You know that Raja Inder, the king of heavens, and the bleffed fouls, keeps an annual feast in the mountain of Ooden Perwet, with the believers; and fince we have no less obligations to Kisua, let us make also a feast to his honour, and invite him to the faid mountain. This being approved of by a general confent, they prepared a most splen-did feast; which they celebrated with fuch demonstrations of joy, that the noise thereof coming to Inder's ears, and looking upon it with a jealous eye, called together the rains, (disposed in twelve peculiar places,) ordering them to pour down their waters upon the fields and cottages of these cowherds. They were ready to obey, and poured forth such pre ligious showers of rain, that the fields being all laid under water, men and beafts were upon the point of being drowned. The cowherds highly furprized at the oddness of the thing, (it being in the dry Mouffon,) had once more recourse to Kisna, who ordered them to get up to the top of the mount Ooden Perwet, till the rains ccased; and they had no fooner obeyed his orders, but he took the whole mountain, with cattle, men, and all upon his little finger, and lifted them up feven times higher than the waters could rife.

The rains finding their endeavours frustrated, returned to Inder, and told him, That they had poured down their waters feven days and nights without intermission, but in vain, there being a certain person in those parts who could lift the whole mountain with his little finger into the air. Raja Inder then perceiving his error, came to Kisna to make his excuse, and dismounting from his elephant, CHAP.

ger ing his clcint,

Baldæus, phant, begged forgiveness for having at-- tempted any thing against him, pleading his ignorance, and as a token of his repentance, prefented him with the Camdoga, or cow of plenty; which Kifita was pleafed to accept of, and pardoned his fault.

Not long after, Kifua coming home one day, found his mother bufy in putting fome pearls on a ftring; he asked her from what tree she had gathered them: but she answering, That she never knew pearls to grow on trees, but only in oyster-Kiling pra-thells; Kifina took one of the biggeft, which he had no fooner put into the pearliere, ground but they then the had no fooner put into the ground, but they faw a pearl-tree sprout forth full of the most exquisite pearls. The mother standing amazed, and ready

to worship him, he caused the tree to vanish immediately.

Soon after fome of the cow-herds and their wives, as they were walking in the forest, agreed to wash themselves in the river; Kijna espying them at a distance, Maker flore fecretly got all their clothes, and getting upon an adjacent palm-tree, had his sport to fee them coming naked out of the water, without being able to find their clothes. They were not a little furprized at first, but looking up, and seeing Kisus in the palm-tree, they desired him to restore their clothes; which, he told them, (to try the modesty of the women,) he would, provided they would come underneath the tree; but they excusing the matter, he threw the women their clothes.

Is chofen king.

At a certain time, Kifna taking a walk with the other cow-herds, they chose him their king; and every one had his place affigned him under the new king. There lived among them a certain charitable Brahman, whose wise (without the knowledge of her husband) paid her daily devotions to Kifna; who fent two of his messengers to let her know, that being disposed to make merry at her house with fome of his companions, the should provide fomething for their entertainment. The messengers meeting with the Brahman, told him the message; who told them, That he knew nothing of Kifna, neither would he make any entertainment for him. With this answer they returned to Kisna; who chiding them for their mistake, bid them speak to the woman; which being done accordingly, the no fooner heard the name of Kifna, but

making a low reverence, to work the Baldeus. went; and having dreffed five or fix good diffies with a handfome defert, the carried them herfelf to Kifna, begging him to accept of what she was unworthy to offer; which he did, and gave her his blefling, That as long as the lived, the should want for nothing, and that after her decease, her foul should not transmigrate * into * Thefe pa-

another body, but that being purified by gans look Kifns with his companions having building feafted plentifully upon what the Brab-whentheir man's wife had because the second with the second with the second with the second with the second with the second with the second with the second with the second with the second with the second with the second with the second with the second with the second with the second with the second with the second with the second with the second with the second with the second with the second with the second with the second with the second with the second with the second with the second with the second with the second with the second with the second with the second with the second with the second with the second with the second with the second with the second with the second with the second with the second with the second with the second with the second with the second with the second with the second with the second with the second with the second with the second with the second with the second with the second with the second with the second with the second with the second with the second with the second with the second with the second with the second with the second with the second with the second with the second with the second with the second with the second with the second with the second with the second with the second with the second with the second with the second with the second with the second with the second with the second with the second with the second with the second with the second with the second with the second with the second with the second with the second with the second with the second with the second with the second with the second with the second with the second with the second with the second with the second with the second with the second with the second with the second with the second with the second with the second with the second with the second with the second with the second with the second with the second with the second with the second with the second with the second with the second with the second w him, the should go directly to heaven. man's wife had brought them, as they not to onter

were returning home, met with fome into other milk-maids, unto whom Kifua told, That bodies. they must not pass by without paying toll to him, who was king of the place. The maids not thinking he had been in carnest, went on their ways; but Kifins with his stick breaking their milk-vessels, one of them was fo exasperated thereat, that the made complaint thereof to his mother; who calling him to an account for this outrage, he denied the matter; but his mother believing the contrary, told him, That he had broken the peace, and that it it should come to Ragia's ear, he might be punished for it. He replied, I did not know I had done them any wrong; but as for Ragia Kans's anger, I don't fear it, though he knew it to-morrow.

It happened not long after, That in a certain moon-shiny night, in the month Alfoor, (in which begins the new year,)
Kifna with fome of his companions were diverting themselves with their pipes in an adjacent wood; and Kifna, especially, played fo charmingly upon his flute, that the women in the village being awakened by the found of this harmony, came running into the wood to partake of their divertifements. Kifus asked them, whether they were not afraid to come into the wood at that time of night? They answered, That their ears and hearts had been fo touched with his melodious harmony, that they were not able to flay at home: fo Kifna gave them a tune or two, which fo furprized them, that most of them stood amazed, gazing all the while at his beauty, whilst others passed their time in dancing. This they continued till midnight, when having bestowed his bleffing upon the women, he fent them home, he and his companions passing their time in the same jollities all night till break of day.

CHAP.

CHAP. VII.

A further Account of the Defigns of Ragia Kans; who is killed at 103 by Kifna. New Decrees against Kifna, which prove ineffectual, His other Miracles.

Baidwas. R Agia Kans, being more and more alarmed at these miracles, sent for his chief minister, named Panjewello, and his two chief generals, named Sianoor and Moflik, to consult with them, how to rid his hands of Kifna. Panjeweile told him, that all clandefline means having proved to no purpose hitherto, ha knew no other way than to engage the strongest of all the giants, (named Keby) agains him.

Ragia approving his advice, fent accordingly the faid giant, who meeting with Kisia, asked him, where he was going. Where I please, replied Kisna. Ho ho, answered the giant Keby, I will take care of that; and so was going to lay his great paws upon him. But Kifua taking him by the throat, did not let go his hold till he had fqueezed the breath out of his body; which done, Kifna put his hand into his threat, and pulling his heart out, first laid it upon his mouth, and afterwards threw it to the ravens.

Razia Kans being now put to the last shift, a certain Brahman, named Naret, advised the king to in ite Kifna with his followers to a feast, and to to have him killed at table. Ragia approving his counted, first messengers to invite them accordingly; but they were fo far from granting their request, that they defined Kifua's parents not to let him go; who with tears in their eyes, begged him to stay at home. But Kifna refuting to hearken to their advice, ordered his chariot to be got ready; and taking his father, his eldeft brother, and mother, along with him, went forward to Goggel, upon the river Siemmena, opposite to Mottera.

Here it was that Akercer, one of the king's messengers, bathing himself in the river, and diving three times fuccessively (after the manner of the Benjans) faw Kisua under water, seated upon his throne; which apparition being feen by him again in the same state above water, he could not forbear to break out into thefe words: O boly Kifna! thou beeft truly god in human shape, because thou appearest both under and above water; a fign thou beeft present in all places, a qua-lity belonging only to the gods! pardon me for baving invited thee to this feast. Kisna told him, he was fentible it was not his fault, and dined with him the fame day

in a garden Akeroer had just near the Roll: bank of the river.

After dinner they passed the river, but had not gone far before they met the king's watherman with a pack of clothes on his back: fome of the company of Kifua having a mind to divert themselves, pulhed one another against the washerm.n, who giving them foul language, Kifua bid his companions to thresh him handsomely, which they did.

Ragia Kans exasperated to the highest degree at this usage of his servant, refolved to declare open enmity against Kifna. Not long after Kifna meeting upon the road a barber, he presented him (according to the custom of that country) a looking-glass to look in, and paired his nails; the barbers in the cattern countries always pairing the nails on the hands and toes, after they have shaved the beard. Kifna gave him his bleffing, telling him, That his foul should directly go to god, without being transplanted into another body.

As they were entring the city, they were met by a gardiner's wife, who used to serve Ragia Kans with flowers: this woman profrating herfelf at Kifna's feet, faid, O' divine man! baving never feen any thing so beautiful as thy felf, I offer to thee these slowers designed for Ragia Kans, thinking myjelf much more obliged to your divinity than his majefty, entreating thee not to dejpije my cottage, but to take up thy lodging there for this night. Then prefending Kijna with a garland of flowers, he took up his lodgings in the house, being welcomed by the husband in the most devout manner in the world, who declared himfelf unworthy of receiving fo great a gueft, and ferved Kifna and his company at table; who at parting, be-flowed his bleffing upon him, viz. That stowed his blefling upon him, viz. they should never want, and their fouls go directly to heaven.

Being advanced a little further, they met a poor cripple, or lame woman, having a veffel filled with spices, sweetfcented oils, fandal-wood, faffron, civet, and other pertumes. Kifna making a halt, the made a certain fign with her finger on his forehead, casting the rest upon his head. Kifua asking her what it was fhe would ask him. The woman replied, CHAP. V

Baldweit. Kifns then fetting his foot upon hers, and taking or by the hand, railed her from the ground, and not only reftored her limbs, but also renewed her age; so that instead of a wrinkly tawny skin, she got a fresh and fair one in an instant. At her request Kisha and his company lodged the following night in her house.

the following night in her house.

The next following day Kisha and break the his company walking through the streets from of Mottera, they were shewed the strong bow, which none of the giants had been at the manage; but Kisha broke the string of it at the first pull. Thence they

able to manage; but Kijina broke the firing of it at the first pull. Thence they walked towards the court, where the courtiers were expecting the coming of the king: these seeing a whole troop of country tellows, would not allow them entrance into the court; but pushing Kijina back roughly, he struck ten of them, (among whom were two colonels) down to the ground, so that they expired at his teet, and their souls were conveyed immediately to heaven, a favour he bestowed upon the souls of all

fuch as were slain by his hands.

Ragia Kans being informed of all these transactions, and almost reduced to despair, ordered a turret to be erected upon the back of an elephant, furnished with two warlike engines, to be managed by as many men. He ordered the guide of the elephant, that as soon as he saw Kisha coming to the castle, he should end out the elephant to trample him under seet, or else endeavour to kill him by

the means of the engines.

The following day Kisha going towards the court, the guides set loose the elephant upon him; but Kisha not only stopped him in his sull career, but also putting his soot against his trunk, pulled out both of his teeth; afterwards seizing him by the tail, swung him three or four times round his head, and then dashed his head against the stones. Ragia now finding himself reduced to the last extremity, and enraged with anger, addressed himself to his two renowned generals Kansjamdoor and Mostik, telling them, That since they had eaten his bread so many years, it was now time to shew their fidelity and bravery, and to deliver him from his mortal enemy.

Accordingly they having fent a challenge to Kijina, he appeared at the appointed time and place, where a most fierce combat ensued, which remained dubious for three hours; till at last Kijina threw them (one after another) with such a prodigious force to the ground, that the blood, and with it their fouls,

gushed out of their mouths.

During the combat Ragia Kans hap-Vol. III.

pening to look over the wall of the caf-Baldans. tle, no fooner faw Kifha, but he thought he heard a voice telling him, that he was the perfon who should at once take away his life and his crown. He was scarce returned into his apartment, when news being brought him of the death of his two generals, he commanded every one to betake themselves to their arms, to sight against Kifha, offering a great reward to any that could deliver him up into his hinds, either dead or alive. Accordingly the whole city rose in arms, Rossin a and engaged Kifha without the castle which be gates; but were not able to conquer this dy of min. myincible hero.

For Ragia Kans, having in the mean while ordered Kifna's parents to be whipped with Siambokken, or brafs feourges, in his prefence, Kifna (according to his omnificiency) being not ignorant of the matter, leaped over the wall into the palace; where finding Ragia Kins fitting upon his throne, he got hold of his head, and preffed it to the ground, till he broke his neck, and to confummate the matter, gave him three or four terrible blows, Kille Ragia

which beat out his brains.

The next thing he did, was to fend his eldest brother to deliver their parents from their captivity, who finding the guards fled, brought them to Kifna, where they received one another with mutual embraces, Kifna declaring his forrow for their fufferings upon his account, and these declaring themselves amply rewarded with the light of his person. Kisna having put Ongeseen Ragia Kans's father in his stead, returned with his parents, brothers, and companions to their usual habitations; where he put himself under the tuition of a certain Kisna unlearned Brahman, having chosen a certain der the tuipoor scholar named Sedamma for his Brahman. attendant at school, to carry his books and writings.

There lived at that time at Mottera a certain merchant, a relation of Kifna's mother, whose daughter called Conta, being married to Ragia Dandou, king of Estenapour, had brought forth five sons; the first-born whereof his father had obtained by his prayers to Inder the king of the celestial spirits, the second from Brama, the third from the wind, and the two last from the samous hero Essourceare.

The five brothers did at a certain time undertake a journey with their mother to Mottera, to vifit their grandfather, where they contracted fomething of acquaintance with Kifna, and frequently reverenced him. About the same time, the women of Goggel, and of the village inhabited by the cowherds, were very earnest

Kills an

Kills ten

Kills two generals. death.

Li fixteen

Baldous. in their folicitations for Rifia's return, without which they faid, they neither could, nor would eat or drink.

In the mean while, the five brothers having received the unwelcome news of Jensjanda their father's illness, were forced to rereference turn to Effenapour; and the fatal enit of Ragia Ragia Kans, and so many of his giants, being come to the ears of Jerasjanda, his brother-in-law, he refolved to revenge the fame to the utmost of his power. Accordingly having gathered a body of ninety five thousand chosen horse, he laid liege to Motters; but Kifus having by his frequent fallies quite ruined his army, took him prisoner at last; but knowing that he had by his constant prayers obtained from Bramma, that he should live one hundred years, and at last be killed by one Rhiim; he released his prisoner, who having foon gathered another army, belieged Mottera a fecond time, and was worsted again as before by Kifna. The fame he continued to do fixteen times, till all his people being flain in the wars; he pailed through all the corners of the world to raife new forces, and meeting with the famous giant Sialinder, he put him at the head of his forces, and fo

forced the siege of Motters a seven-

teenth time. The fituation of Kifna's house, was fuch as to be plainly discovered in the camp, as from thence he had a full pro-fpect of their army. Kifna having post-ed his brother at the entrance of his house, he happened to be seen by the enemies general, who mistaking him for Kifna, advanced towards the house: Kifna, who faw him coming at a distance, confidering with himfelf, that in case he should fall by his hands, his foul must go straitways to heaven, (a favour he thought him unworthy of,) run out of the back-door, making the best of his way to a cave of a certain Brahman, about four Cos from Mottera; this man had by his continued prayers obtained from Bramma, that if any one should disturb him in his devotions, the fame should be consumed Kisha being not ignorant of to afhes. this, and feeing his adversary pursuing him, entered the fild cave, and throwing a piece of cloth over the Brahman's head, sheltered himself behind it. The giant who followed his footsteps, foon after entered the cave, and finding the Brahman covered with a piece of cloth, gave him two or three found boxes on the ear, telling him, That he should take that as a reward for his care in hiding Kifna in his cave. Retreat, retreat, faid the Brahman, before I uncover my face, unless thou wilt be confumed by fire.

Then taking away the cloth, the giant Ball was immediately in a flame, and burnt to aftes. Kifna returned to Mottera, and having routed Ragia Kans brother's forces, he took him prisoner; but in respect of Bramma's promise, dismitted him foon after.

Ki/na in the mean while confidering that Jerasjanda was to live one hundred years, and that consequently he would not lay afide his deligns against Mottera, it happened that Willuchre, the fon of Bramma, being come from heaven to give Kifna a visit, and asking him what it was he would request of him? He unswered, Build me a city in all respects like that of Mottera; which he did accordingly the fame night in an adjacent island, being altogether like that of Mottera; except that this was of gold inflead of stone. Kifna being informed thereof by Williamre himself, over-whelmed the inhabitants of Mottera with fo heavy a Another fleep, that (unknown to them) he carri-miraele of ed them with all their cattel, and Ragia Kifna. Ongesten their king to this new city, un-to which he gave the name of Davarca, leaving Sedamma his old school-fellow and attendant behind him in a certain village, which fince has got the name Sedammapoer; which done, he returned with his brother to Mottera.

By this time the giant Sialinder, haing gathered a vast army, fat down be-fore Mottera; but Kifna and his brother after having killed a great number of the enemy, feigning a retreat, were purfued by Sialinder's forces, till com-ing to a high mountain, they vanished, and retired to the city Davarea; and Sialinder being thereby become mafter of Mottera, fettled his refidence there.

In the mean while Kifna's schoolfellow being married, was grown fo poor, that he was forced to fell his clothes to buy victuals. Being almost reduced to despair, his wife advised him to take a journey to his old schoolfellow Kisna, who, she did not question, would commiscrate his condition. How is this possible, replied the husband, being quire naked, and not fit to appear be-fore any body? Kifna, answered the wife, does not despise the poor; go, and take a handful of Kam* along with thee Astronom for a prefent.

The husband followed his wife's advice, and went to Davarca; who was no fooner entered the street where Kifna lived, but being discovered by him from a window, he came out to meet and embrace him; and carrying him into his house, ordered him to be washed, and provided with new clothes. Kifna asked him, CHAP

damma, I bad nothing to give but this; which my wife fent to thee, in hopes that the gods would not refuse the meanest pre-fent. Kisna received it kindly, and put it in a corner of a cottage belonging to one of his neighbours; and at the same inftant Sedamma's cottage was turned into a fpacious palace: his wife was much furprized at this change; but imagining that it was done by Kifna, the fearched all the corners of the house, and wherever the turned her face, found the contract of the search of the search of the search of the search of the search of the search of the search of the search of the search of the search of the search of the search of the search of the search of the search of the search of the search of the search of the search of the search of the search of the search of the search of the search of the search of the search of the search of the search of the search of the search of the search of the search of the search of the search of the search of the search of the search of the search of the search of the search of the search of the search of the search of the search of the search of the search of the search of the search of the search of the search of the search of the search of the search of the search of the search of the search of the search of the search of the search of the search of the search of the search of the search of the search of the search of the search of the search of the search of the search of the search of the search of the search of the search of the search of the search of the search of the search of the search of the search of the search of the search of the search of the search of the search of the search of the search of the search of the search of the search of the search of the search of the search of the search of the search of the search of the search of the search of the search of the search of the search of the search of the search of the search of the search of the search of the search of the search of the search of the search of the search of the search of the search of the search of the search of the search of the search of the search of the search of the search of the search of the search of the search of the search of the search of the search of the search of the search of the search of the searc fuch a vast quantity of gold and tilver, and of Ropias, that she had sufficient, wherewithal to provide herfelt with fervants, provisions, and every thing in proportion, to the grandeur of her palace. Sedamma being ignorant of what had happened, returned full of melanchely from Kifna, ruminating upon the road, whether he had not best leave his wife and children; but foon recollecting him-

felf, that he ought not to lay the whole Raldons. burthen upon his wife's shoulders, and despair of God's mercy, he made the best of his way homeward; but approaching the village, he was amazed to fee the change that had happened fince his de-parture, which made him fuspect he had miffed his way; but finding by fome undeniable circumstances that he was in the right, he went into the village, where finding, infead of a cottage of straw, a royal palace, he flood affonished, not knowing which way to turn, till being discovered by his wife out of a window, the fent one of the fervants to defire him to enter; which he did; and being kindly received by his wife and children, he asked the exact time of this fudden change; which happening (as far as they could guesa) precifely at the same time he pre-fented the seed, they paid their devo-tions to Kisna, distributed alms among the poor, and lived in great plenty for a long time after.

CHAP. VIII.

A King's Daughter in love with Kifna; fends him word of it. Kifna delivers fixteen thousand royal Virgins, and cures the Leprosy.

Sometime after Ragia Bhiemeck, king of Poerep, had a fon and daughter born him, the first named Rochemeya, the other Rochemy, who being grown up, the father was very delirous to have his daughter well matched before his death. Among others he confulted with upon this matter, there was a certain Brahman, named Naret, much celebrated for his wifdom and learning, who being defired by the king to inspect his daughter's hands, and to foretel him by the art of chiromancy who should be her husband, Naret having taken a full view of the li-neaments of her right-hand, told her, Bleffed virgin! who beeft ordained to be the spouse of the holy Kisna. The father rejoiced thereat to the highest degree, told this good news to his fon; who being of a contrary fentiment, replied, That be would never suffer so beautiful a creature to be married to a country clown.

It is to be observed, that the foul of Sytha, Ram's spouse, being transplanted into the body of this virgin, in order to be espoused to Kisna, this young lady was not infenfible thereof; for which reafon the had refolved to think of no body Is opposed else but Kisna; which her brother being by her bro-resolved to prevent, he sent to the giant,

the king of Mottera, that in case he was inclined to marry his fifter, he should come with all fpeed, his father intending to marry her to Kifna. The giant, ravished at this joyful news, ordered a most magnificent equipage of elephants, camels, horses, oxen, and chariots, to be got ready, and attended with trumpets, hautboys, kettledrums, and other mulical instruments, and a numerous retinue, fet out from Mottera.

No fooner were they come within two days journey to Rochemy's father's refi-dence, when she, not knowing what to do in this exigency, thought fit to give notice thereof to Kifna by a letter, which she ordered one of her servants to deliver to the first Brahman she met, in order to carry it to Kifna; the contents whereof were as follows:

"HOLY Kifna! worthy to be be-Rocheloved of me and all the world; my late or
being refolved to be no body's, but only to Kifin. yours as long as I have breath to draw, " I thought fit to let you know, that my old father likewise wishes nothing more than to fee that happy day; but my brother, who has more ambition than piety, having fent for the giant of

" Mottera to marry me, and being come

Baldæus." within two days journey of our refi-

" dence, I defire you to provide against their attempts, nothing being able to refift your divine power."

Your Highness's always devoted,

$ROCHEM\Upsilon$.

The fervant having brought a Brakman to the princefs, she, by a present of a golden dish filled with Ropias, and a promife of more if he performed his errand, engaged him to undertake the task. Accordingly he went full speed for five Cos, when being somewhat tired he sat down under a shady tree, to refresh himfelf with a draught of cool water, and falling asleep, was carried by Kisna to Davarca. The Brahman awaking out of his fleep, and finding himself at Davarea, foon gueffed the truth; and going strait to Kifna's house, delivered the letter at his feet. Kifna had no fooner read the letter, but assuming the shape of a man with four arms, and taking his bow and arrow, he got upon his cow with the Brahman, and so fet out on their journey from Davarca.

In the mean time the giant approaching to the refidence of his pretended fpoufe, was met by her brother, and conducted into the palace; and Kifna arriving foon after near the city, refted himfelf under the thade of a tree, near a pagode, whence he fent the Brahman to Rockemy; to give notice of his arrival; who rewarded him with vaft prefents for his fidelity.

Rockemy knowing that her brother was in the evening to make a cavalcade with her pretended bridegroom through the city, (according to the custom of the Benjans,) she resolved to lay hold of this opportunity to escape their hands: for this purpose, she entreated her father, That being now arrived to the age of nine years, the might offer her facrifice to the goddes Robani. The father having granted her request, she took a dish full of pearls, and with two of her attendants went towards the pagode, whither her pretended bridegroom and her brother would needs accompany her, but staid without the temple whilst she performed her facrifice; which done, she came out of the temple near the door, where the knew Kifna had placed himfelf; who no fooner faw her appear, but he took her up and carried her away.

At the outery of the maids, the predeherral tended bridegroom came with his whole
attendants to finatch her from him; but
Kisna received them so courageously with

his bow and arrows, that they were for-Baldens, ced to retreat with the loss of feveral thousands of their best men. Rockemy's brother seeing the bridegroom descated, would nevertheless try his strength with Kisna, and coming up with him, was going to cleave his head with his seymetar; but Kisna having disarmed him, threw him upon the ground, and after having given him some blows, tied him neck and heels together under his cart, and so made his entry into Davarca, where he was received with all imaginable demonstrations of joy. Rockemy's brother was released at her request; and Kisna consummated his mariage with great pomp in the city of Davarca.

Some time after it happened, That a very frong elephant being feized by a crocodile, in a certain ciftern or pond, where the elephants used to drink, a furious combat ensued, which put all the elephants that were spectators thereof into no small consustion. At last, seeing they were not able to affist their companions, and pressed with hunger, they went away, and left the poor elephant in the lurch. He seeing himself thus destitute, kept on struggling with the crocodile, send no prayers to Vistaum, to deliver him from the jaws of the crocodile.

But it being then the time of Kisna's Kisna deappearing upon earth, he heard his sivers as prayers after twenty days, and fending for from a Garroude to carry him immediately to the from a Garroude to carry him immediately to the crossile. pond, he threw his weapon at the crocodile, and cutting off his neck, released the elephant; who kneeling before Kisna, he told him, he should ask what he pleased, and it should be granted him. Nothing, replied the elephant, but that I may go immediately to heaven, being quite weary of this world. Kisna granting his request, took him into his Palankin, or litter, and carrying him to heaven, ordered Garroude to convey him immediately back to Davarca.

About the same time one Ragia Boettaenpat having two wives, named Somuta and Surifa, the first brought forth a son named Droe, and the other one named Rasepoeter: but Surisa being most beloved by her husband, Somuta, when her fon Droe was about five years of age, sent him very nearly dressed to pay his respect to his sather; who being extremely delighted with him, highly caressed, and fet him in his lap. Surisa having got notice thereof, sent immediately her son to the king, whilst she remained at some distance to observe what passed. But the king being so much taken with Droe, that he scarce looked at the other, Su-

Baldwus. rifa entered the room, and upbraiding him with ingratitude, made him fend away Dros, and take her fon in his lap.

Dree exasperated to the highest degree at this affront, went away without making his reverence; and making his complaint to his mother, told her, That he was refolved to retire into a defart, to fpend his time in prayers. The mother did all the could to diffwade him from it, but in vain; for taking the next opportunity of his mother's absence, he got privately out of the house. He had scarce travelled two Cos from the city, when being met by the learned Brahman Naret, he asked him whither he was going? He answered, As young as I am, I have taken a resolution to retire from the world, where I find there remains nothing but malice and envy: then relating all that happened to him, he told him, That he was refolved to pass his days in the defart.

Go on my fon, replied Naret, thou wilt be heard by Kifna. Then going forward, he came to a foreft, where feeing a mango-tree, he reposed himself under its shade, and spent three days and nights in tears, prayers, and fasting. Kifna moved with compassion at his tender age, appeared to him, asking what made him pray with so much servency? Droe prostrating himself at the seet of Kifna, said, O divine Kisna! my request to thee is, That the affront given me by Surisa may turn upon their heads; that she may be a slave to my mother; that I may succeed my sather in the kingdom; and after my death, he placed in some pleasant place you

shall chocfe for me. Kifus answered, Thy prayer is granted. Go, return to thy parents, Surifa shall live a flave to thy mother; thou shalt succeed thy father in the throne; and after thy death, I will place thee in the heavens in the form of a ftar, that shall remain for ever in the firmament, and ferve the ma-riners for a guide. Dros having paid his reverence to Kifna, returned full of joy to his father's palace. The old king, who had been almost distracted at his absence, received him with more than ordinary fatisfaction; and for ever after shewed so much affection to his mother, that Surifa was, in comparison of her, no more than a flave; and after fome years furrendered the kingdom to him. He ruled very fortunately for many years; and after his death, was placed among the stars, being the same the Benjans call to this day Droe Katara, i. c. Stella Polaris, or the North-Star.

It happened some time after, That Ragia Nerkaseur, a most potent monarch, having conquered sixteen thousand kings, Vol. III.

kept them close prisoners with their wives Baldans, and daughters: their offered their conftant prayers to Kisha for their delivery from this oppretion. Kifna confidering, that they having spent these three years in prayer, it would be high time to deliver them, fent for Garroude, whom he ordered to carry him to Nietskanda; where he was no fooner arrived, but he told the king Nerkaseur, That unless he released the royal captives, he must pay for it with his head. The king answering Kifna with threats, they prepared both fides for a combat: for Kifwa having killed those that were sent against him, the king himself, at the head of a strong troop, attacked Kisna with great fury, who killed every man of them except the Ragia, who, perfitting in his obstinacy, had at last his head cut off by Kifua; who releafed all the prisoners in an instant, and among them, fixteen thousand royal vir-Kifna de-

gins, who proftrating themselves at his trueristicet, he gave them leave to return to ten that their parents, or where else they pleased: gins, but they desired to stay with him, imploring his protection; which being granted by Kisna, he carried them to Devarea, where he built a straglio for their reception, wherein each lady had her own apartment.

In the country of Ammaramo, lived a certain zealous Ragia, named Amarich; who having published a general fast by beat of drum, (according to the cultom of that country,) the same was observed with the utmost strictness. It happened, that the Brahman Doerwasse passing that way the same day, he was invited by the said king to stay there till the next day after the sast-day.

The Brabman complying with the king's request, he sent for some of his chief Brabmans, to know the exact hour when they might begin to eat. These having consulted their books, and told the king, that the just time would be two hours after sun-rising he invited the before-mentioned Brabman against that time to a collation. But the Brabman missing the appointed hour, the king went to the river to wash himself; but finding after his return, that the Brabman was not come yet, he advised with sour of his Brabmans, what was best to be done; who rold him, That if he let slip this lucky hour, all his falling would avail him nothing, advising him at the same time to take only a little water, and a leaf of the tully-tree, till the Brabman should come.

This Brahman Deerwassa having a prophetick spirit, was not ignorant that the king had caten something in his absence,

Baldaus.and therefore went to the king, asking him, why he had put such an affront upon him. The Ragia was for excusing the matter, but to no purpose; for the Brahman going out of the doors, gave him this curse, That he might from head to foot be covered with boils, and the leprofy; which being fulfilled in an instant upon the unfortunate king, he prayed to Kisna to deliver him from this evil; but in vain, his evil increasing every day; so at last being quite tired with life, he resolved to put a period to it by fire. Every thing being got in readiness Kifna cures for this purpose, Kifna appeared to him, she leprofy asking, what was his request. He replied, to be freed from my distemper. Kifna cured him not only of his leprofy,

but also turned the same into a fiery Paldeeus. wheel; which following the Brahman Doerwassa wherever he went, put him into fuch a fright, that he offered his prayers to Ragia Inder, to deliver him of this fire; but Ragia Inder, telling him, That he must apply himself to him who was the author thereof, he made his applications to Bramma; from whom having received the fame answer, he implored the affiftance of Kifna, begging him to pardon his fudden passion, and to deliver him from the evil he had been pleafed to lay upon him. Kifna chiding him for his unruly passion, advised him to lay the same aside for the suture; and then delivered him from the plague of the fiery wheel.

CHAP. IX.

The Origin and Qualifications of Droepeti: She binds up the Wound of Kisna. Sussuster forced out of his Kingdom. Droepeti exil'd with her Brothers, and fed by the Sun: They come to Court: Their further Transactions.

It the country of Eftenapour, lived a certain Ragia, named Pandouw; whose wise was called Droendy. His brother, named Deuteraes being blind, had a wife called Sendary, and by her a hundred fons; the eldest whereof, was named Dersiende. In the country of Ransiaandors lived at the same time a certain king, named Drosper, whose daughter was reputed the most beautiful woman that ever was feen. Ragia Pandouw happening to die, left behind him five fons; the eldest of which succeeding him in the throne, one of the other four was put to school to a certain Brahman, to be instructed in all matters relating to their divinity. The daughter of Ragia Droepeti, being now come to a marriageable age, her father was not a little follicitous how to bestow his daughter to the best advantage. For this purpose, he sent his messengers to invite the neighbouring kings, and the chiefest Brabmans to a great feast; and caused a long poll to be erected, with a strong bow underneath, and a fish on the top, in the fame manner as we have mentioned before in the ftory of Ram.

Kifua appearing here among the rest, yet would not attempt the bow, having promifed his affiftance (upon this account) to a certain Brahman, named Aerssing; he managed the bow with that dexterity, gains Dro. that he shot down the fish, and received epeti by a fine necklace of pears from the hands thosens. of his bride,

One time Droepets seeing a cow pass through the fields with five bulls following her, she stood amazed at the novelty of the thing, as she thought; this coming to the cars of Camdega, the cow of plenty, she was so offended thereat, that she told her, She would make her Camdoga's to be thus pursued by five men. The curse. king entertained his guests with a splen-did feast; but the the bridegroom having made a vow, not to enjoy his bride till after his return home, they came no fooner to his own house-door, but being met by his mother, he told her, That he had brought fomething along with him. Then, replied the mother, Your two brothers must have each his share. That cannot be, returned Aerffing, for it is a woman. That fignifies nothing, answered the mother; what I have once faid is impossible to be recalled. Aersling full of grief, told his brothers what had happened; who abominating the matter, communicated the fame to Droe-It happened afterwards, that Kifna

having invited the Panspendaons with her mother, and Droepeti, to dine with him at Davarca, as they were walking after dinner in the fields, Kijha had a mind to cut fome fugar-reeds; but cutting his finger, all the standers-by called Kisna's fin for some linnen-rage, to tie it up: but get tied up Droepeti, immediately tearing a piece of with a pree her golden brocado'd gown, the tied it first. Buldens, about his finger. Kifua (according to his omnificiency) knowing how many threads there were in the piece she had torn off, viz. nine hundred ninety nine, he told her that she should have as many garments of cloth of gold as there were threads in it. They then took their leave; and rhough Kisua knew well, that Droepeti was still a virgin, yet he took no notice of it.

After their return home, one Senhem, brother-in-law to Droepeti, began to be much out of humour, alledging, That Suffiffer was not the rightful heir of the throne; for, faid he, Though Deuteraes, by reason of his blindness might be incapable of the government, and therefore Pandoww was put in his stead, yet after his decease Suffiffer, his son could not succeed him, the right of inheritance of the crown belonging to the eldest of the crown belonging to the eldest of the hundred sons of Deuteraes, and confequently to Dersiende his eldest son. This gave occasion to pitch upon some way to restore Dersiende to his right; and knowing that Suffusier was much ad-

suffuler and knowing that Suffufer was more and some stands play at dice, they looked upon the street who as the best means to encompass their design. Suffufer having been for some time a favourite of Kisna, grew so ambitious as to despise him at last. Kisna remembring this affront, whilst he was playing with Dersiends, so ordered the matter, that Sussuffuser lost all his ready money; whereby being egged on more and more to recover his loss, he at last threw at all, and lost his estate and kingdom.

It had happened fome time before, that Derfiende being in Suffifter's palace looked into Droepeti's apartment, which being paved with glafs, (a thing he never had feen before,) he took it for water, and would not venture to go in. Droepeti perceiving his error, told him, How, are the fons like the father? Is the whole family blind? which put Derfiende into such a rage, that he swore he would revenge it with the first opportunity.

Dersiende remembring his oath, whilst they were at play, proposed to set as much money against Droepest as he would desire; which being agreed to, Dersiende won that stake likewise. Things being come to this pass, he proposed to Sussippeter, that he would lay all he had got of him at one stake, provided he would engage, that in case he did win it, he would choose a voluntary exile for twelve years. Sussigns in hopes of better fortune, consenting to the proposition, they threw the dice; but fortune frowing again upon Sussigns, Dersiende remained in possession at the proposition of all.

By this time Dersiende remembring the

affront Droepeti put upon him in her Baldeus. apartment, ordered her to be stripped Dropeti stark naked, and to expose her to the ordered to view of her servants. The distressed be simpled. Drospeti reduced to this extremity, implored Ki/na's affiftance, to relieve her from the shame she was likely to undergo, putting him in mind of his bounty, after the had torn her garments for his fake. In the mean time the fervants being employed in undreffing Droepeti, they had no focner pulled off one of her garments, but another fuceceded in an inflant; which continuing thus nine hundred ninety nine times, they were feized is delivered with fuch an aftonishment, that they on-by Kissa. treated Dersiende to defist, lest Kifna should give him some severe proofs of his anger; which had fuch an influence upon Dersiende, that he dismissed her without

any further harm.

The time of the appointed exile now They go inapproaching, the five brothers, with their to exile. mother Sendary and Droepeti, left their native country; but beginning to want provision upon the road, Droepeti paid her devotions to the fun, to supply their wants. The fun commiterating their condition, filled them every morning a vessel with victuals, sufficient to feed one thousand men. At last coming to a certain village called Widoenougan, they lodged in the house of one Widoenougarre, where she left her mother, who was grown fo decrepit, that she was not able to follow them.

Thence wandering through vast deferts without meeting either with man or beaft, they at last came to a pleasant river, where whilft they were reposing themselves, they saw a certain samous and learned Brahman, named Derwafa, walking along the bank of it, at the head of one thousand Brahmans his followers; who being not ignorant (by his skill) who they were, after the usual falute, immediately addressed himself to Suffufter, telling him, That he and his company had a mind to take a dinner with him, which Suffusier approving, (trufting to the bounty of the fun, and the Brahman's piety,) he defired them to come, which they promifed to do as foon as they had washed themfelves in the river.

Droepets understanding what had happened, had recourse to the vessel; but sinding it empty, knew not what to do, but advised them to have recourse to Kifna's bounty. Accordingly they sent forth their joint and servent prayers to Kifna; but sinding no relief, and the time of the Brakman's coming being near at hand, they resolved rather than to be exposed

Baldaus. to fuch shame and confusion as this, to make a large wood fire, and therein to put a period to their miserable life. They went to work immediately; and having gathered a sufficient quantity of wood, Droepeti was shewing the rest the way, and these following to tread in her footsteps.

steps.

Kisna then feeing their constancy, stopped them; and asking what was their grievance, Sussigns replied, O Kisna! who knowest every thing, thou canit not be ignorant of what has happened to us this day! Kisna answered, Let me see the vessel that was presented you by the sun; which being produced, Kisna viewed it on all sides, and sinding a grain of rice on the brim, he cat it; and by its multiplying power, gave it such a virtue, that it not only fatisfied him, but also the Brabman and his thousand sollowers; who thanked Naccod, the youngest brother of Sussigns, (who was sent to bring them to dinners) that though they had not the least appetite to eat since they had been washing in the river, yet they thanked his brother for his good intentions.

This unfortunate company having thus the defarts, at last resolved to try their sortune at the court of king Weraart, of the tribe of the Ketterits, in the country of Messees. Sussister being the first that went to king Weraart, being demanded who he was, he asked the king, whether he had not heard of the sive brothers Panspendaons: The king replying, he had; he told the king, that he had served them as their historian; and that if the king would receive him in the same station, he would relate to him the adventures of that king, how he had lost his kingdom at dice, &. The king pleased with his proposition, ordered him to stay at court. The second brother encouraged by his success, addressed him-felf likewise to the king, telling him, that he had served Sassister in the quality of a cook; who ordering him to dress a dish of meat, he did it accordingly, and pleased the king so well, that he made him his head-cook.

The third, who was an excellent bowman, thought fit to lay his bow and arrows afide; and appearing in the prefence of the king without any weapon, told him, That he had ferved Suffiefer in his prosperity, in the quality of a Brabman; but being now forced to bear his share in the misfortunes of his master, he came to shelter himself under his royal protection. The king being taken with his discourse, received him into his fervice. The fourth, after having paid

reverence to the king, told him, That Bullbens, he had been gentleman of the horfe of Suffinfter, in which station he was received by the king. The fifth brother not knowing what to say in his own behalf, told the king, That he had been shepherd to him: in which station he was likewise received by king Weraart.

Droepeti being now alone, made likewife her applications to the king, alledging, That having ferved in the quality of a maid of honour in the court of S. ffufler, the hoped to be received among the ladies of the court; which was willingly granted her. Having thus continued two years in their respective stations, they began to revive their hopes of seeing their native country again, there being but one year more to the end of their exile.

end of their exile. But Dersiende finding the time of their exile near expiring, fent out certain famous wrestlers to try their skill with them. These passing through several countries, had vanquished many of the Ragias, and in fcorn, carried their pictures tied to their knees. Coming at last to king Weraari's court, they challenged, and killed the king's brother-in-law; and were for doing the same to the king; who rather than hazard his person, offered them his picture, to be carried in triumph upon their knees. But Sussuffer being informed of the matter, told him, That fuch a piece of cowardice being unworthy of the name of the Kettersis, he advised him to match him with his head-cook whom, as he faid, he had often feen wrestle stoutly at the court of Suffisher. The king extremely pleased at this proposition, asked the cook, whether he durst engage with one of these famous wreftlers; who having answered, Yes; and the appointed time being come, they went to it bravely, and held it for a confiderable time with equal advantage; till at last the cook found means to twist his arms back, and fetting his foot against his rump, threw him backwards, and killed him upon the fpot.

Derfiende had no sooner heard this unwelcome news, but he sent his uncle with two hundred thousand horse into king Weraars's country, to drive away all the cattle; which being done accordingly, and notice thereof given to king Weraars, he put himself at the head of six hundred thousand horse, and overtaking the enemy in a great plain, a bloody battle ensued; but his forces being routed, he was taken prisoner by the enemy.

The prince overwhelmed with tears, engaged the cook who had fo lately obtained the victory, to go in pursuit of

of the Baldeus, the enemy; who coming in fight of them, cryed aloud, Halt you robbers, release the king, or this day shall be your last. They laughed at this madness, till seeing him lay about him with his weapons amongst the hindermost, they turned their

arms against him; but the cook affisted by Kifia's strength, slew the the whole army, except one, whom he fent to Der-fiende, to carry him the news of this

defeat.

He had no fooner received these dismal tidings, but he told them, Certainly these are the Panspendaons; go and put thy felf at the head of fix thousand chofen horfe to revenge our quarrel. Accordingly, he entered king Weraart's territories, making great havock among men and beafts, without the least opposition, Weraart not daring to oppose his forces (that consisted only of two hundred horse) to fo powerful an enemy. Suffuser vexed at his cowordice, told him, That if he did not think fit to hazard his person, he should give leave to the prince and his governor the Brahman, to go along with what forces he had, in quest of the enemy: which the king not refuling, the prince and the Brahman went after the enemy in their chariot; and finding them in battle array ready to receive them, the prince was fo frightened thereat, that the Brahman was forced to tie him in the chariot, and cover him with a cloth. Then the Brahman attacked the enemy with fuch fury, that notwithstanding the inequality of their number, he flew them all (after a bloody engagement) upon the spot, except their general, who being made a prisoner, the Brahman gave him three or four found boxes on the car, telling him, That he should go to his king to carry him the good news, but have a care how he ever came there again. The Brahman was so humble, as to bestow both all the honour of the victory, and the booty upon the prince; who willing enough to accept of the fame, made his entry in a triumphant manner into the

Not long after king Weraart playing at tables with one of his nobles, made his boast of the late victory obtained by his fon, which Suftufter not able to brook, told the king, Toat what he boafted of did not belong to his fon, but to the Brahman. The king hearing him fay these words, threw the dice with such violence into the tables, that one of them flew into Suffufter's face, and drew some blood from him: Suffifter highly exafperated at this affront, confulted with his brothers and fifter to leave the court fecretly, and return into their native country, Vol. III.

the time of their banishment being near Baldons. expired; which they did accordingly.

The prince no fooner understood their departure, but he went immediately to the king, telling him, he was forry the king had taken so ill what Suffuffer had told him, it being nothing but the bare truth: for, faid he, it was not I, but the Brahman that obtained the victory; and it were they who have twice delivered our country and your felf from destruction. I advise you to take care what you do; for I affure you, they are the Punspen-daons themselves.

The king flood amazed at thefewords; And, is it possible, said he, that I who am but a perty king, should be served by them? And so ordering all his elephants, horses, and chariots, to be got ready, he followed them with all possible fpeed; and having overtaken them at last, he prostrated himself before Suffigser, faying, Most potent king! whom I am unworthy to ferve, pardon me for having received fervices from you contrary to my knowledge; pray return along with me, that we may not take our leave without a merry cup. I will afterwards provide you were camels, elephants, horfes, chariots, and what elfe shall be requisite for your journey. Suffuster being prevailed upon to return with the king to the city, they took their mutual leaves at a most solemn feast, with mutual demonstrations of friendship; and being provided with all necetlaries for their journey, returned towards their native cours-

But whilft they were upon the road, Suffusion Suffusion repenting of his former pride, Kina. frequently fent his prayers to Kifua, acknowledging his crime, for which he owned he had been deservedly punished by him: but the time of his twelve years banishment being now expired, he promised to serve him with all humility, if by his assistance he and his brothere might be restored to their native Is heard by

country. Kisna well satisfied with this kim. acknowledgment, appeared to them, asking what was their request. Suffigier answered, That Dersiende may be put out of the throne, and I be placed there in his stead, Kifua having promised him his assistance, said, That they had best send a certain poet (who stood hard by) to demand the kingdom of him. The demand the kingdom of him. poet went accordingly, demanding the kingdom to be restored to the true owners, the term of the twelve years banif. ment being now expired. But Dersiende answered, That he did not know the Dersiende

Panspendaons, and was resolved to keep results to his crown in spite of them; and so bid research

they were ready to throw themselves at Boldeus. his feet, if he thought he would grant their request; which being approved of, Kifna promifed to go along with them

CHAP. X.

Kisna lodges with a Brahman: Goes to the Court of Dersiende, who engages in a bloody Battle with Susfuster, and is roused. Droepeti is enjoyed by five Brothers. Kisna visits divers wicked Kings. The Conclusion of his Reign.

T Eftenapour lived a Brahman, nahis wife was called Prediwette, both persons very zealous in their devotions to Kisna; who being not ignorant of their zeal, resolved to bless them with a Kisna; visit. Accordingly he came to the cothaving profitated themselves at his seet, brought some rock-water (according to the custom of the country) to wash his feet. Kisna told them, I intend to dine with you; and fo laying himself down, pretended to fleep, with an intention to observe all that passed in the cot-

> Ragia Dersiende hearing of the coming of Kifna to this poor cottage before he had visited his court, forbid all the inhabitants, under pain of death, to furnish the poor Brahman that day either with money or provisions. The ther with money or provisions. The Brahman being in a great necessity, would fain have pawned his brass kettle and frying-pan; but no body daring to lend him any money, or give the least pro-visions, he returned in a very melancholy posture. His wife bid him not despair; telling him, that Kifna knowing their poverty, would accept of the will for the the deed; and so ordering him to go into the garden to gather fuch herbs as were there, and allowed them to eat, (for the Brahmans dare not eat all forts of herbs or roots, as, for instance, the beets, because they are red, and resemble blood;) which being done, she dressed them, and having awakened Kisna, offered it to him upon a Pysang leas: Kisna asked them, Have you nothing elfe? I supposed you would have made some cakes. The woman answered, That their poverty being such as not to permit them to do it; Kisna bid her look backwards, where feeing in a corner a fine basket of fruits and sweet-meats, the proftrated Kifna; you must fight for it. herfelf at his feet.

Thus feasting together, Kisna asked them after dinner, what they requested of him? The Brahman replied, Nothing, but that I may serve and love thee with a sincere heart; that I may never cease to pray to thee; and that when my foul and body must be parted, my zeal for thee may nevertheless continue with me. Kisna replied, All this shall be granted thee; Blefferhim and because thou hast preferred piety be-with ruber. fore riches, you shall likewise have your full share of them. He had no sooner spoken these words, but the Brahman's cottage was in an instant changed into a magnificent structure; and Kifna presented them with as much gold as vas fufficient to maintain them in great plenty

all their life-time. Kifna, after having once more imparted his bleffing to his hoft, departed, taking his way toward the castle of Der-Kifna goes fiende, it being then just three hours be-to the cours fore fun-fet, the usual time for the kings of Derin the eastern countries to give audience to their subjects. Kifna was received with a great deal of reverence by some of the court; but the king looking upon him with an indifferent eye, asked him, when he came into the city, and why he would not pay him a vifit before the poor Brahman? Kifna replied, Riches are of no value to me; the meanest cottage of a believer I prefer before the most fumptuous palace of a king. And why then, faid the king, would you come to court? I did come, replied Kisna, in the name of the Tanspendaons, to demand thy kingdom, the twelve years exile being now expired. The king answered, I know them not, neither will I deliver the kingdom. Kifna told him, That if he would not, he should at least allot a village for their maintenance. I will not give them the breadth of a foot, answered Derfiende. Then prepare your felf, faid

cry Wat The giant ing Caran kilmy tro

The

Baldaus. The Panspendaons hearing this answer, abattle prepared for a vigorous war; and having Abattle engaged king Weraart, and the potent Ragia Droepes (Droepesi's father) in their quarrel, with four other kings, they attacked Dersiende, who having drawn up his horse in a great plain, a sierce battle enfued, which lafted eighteen days, Kifua fighting in a chariot drawn by oxen.

In Derfiende's army was a famous warrior, named Caran, who having (by his constant prayers) obtained a prodigious strength from Kisna, did perform wonders in his chariot: Kifua espying him at fome distance, ordered Ersiende, (who fat with him in the same chariot,) to break the wheel of Caran's chariot, which being done accordingly by a strong arrow, Caran came down out of his chariot, but whilft he was bufy in mending the wheel, was by the fame Erfiende fhot with an arrow into the breast: He drawing the arrow out of the wound, cryed out to Kifua, And is this the reward thou givest me for so many offer-The giant ings. Kifna answered, Have patience; Caran kil- my will is to deliver thee out of this troublesome world, and to allow thee a place in heaven, whither I am going to meet all the believers; (my time upon earth being almost expired,) after I have purged the world of the wicked. Caran was no fooner flain, but the victory declared against Derfiende, whose forces were all flain upon the spot; (ar were king Weraart and king Droepet ca the other fide,) and among them Derfiende himfelf, with his ninety nine brothers. Thus the Panspendaons being restored to the kingdom, they payed their constant devotions to Kifua, who from thence

returned to Davarca. All this while Droepeti had lived without the knowledge of any man; but peace and quietness being now restored in the kingdom, the five brothers were concerting all possible means how to enjoy Droepeti, without incest. At last a joy Droepen, without including, pro-certain Brobman, named Wissuma, proposed the following expedient. year, faid he, has three hundred fixty days, which divided into five equal parts, each amounts to two months and twelve days. And it being your mother's will that the five brothers should have an equal share in Droepeti, Sussuffer must cohabit with her the first two months and twelve days, and the other four brothers fuccessively each his two months and twelve days: But to wipe off the stain of incest, Droepeti must after the expiration of each respective term of two

three times by the fire; whence it is evi- Baldates. dent, that the pagans afcribed to the fire a purifying quality; from whom the jews questionless took that doctrine, and the coman catholicks their purgatory. This being approved of by the joint-consent of the five brothers, it was further agreed, That he who should transgress his limited time, should be banished for twelve years. But Suffisfer willing to appeale the gods by facrifices, in confideration of the great effution of blood, occasioned by his restauration, consulted the Geogys, (a certain order of the Brahmans;) who advised him to institute a folemn feast, offer facrifices, be liber: I to the poor, and to maintain a certain number of learned Brahmans, to read and explain their holy writings. Suffuster obeyed, and performed every Suffuster's thing with all imaginable exactness, or-surface. dering a hole to be digged, which he filled with fugar, butter, fandal-wood, milk, rice, and betel, and offered rofes,

flowers, spices, and other rich incense. This done, he invited Kifna to a fumptuous feaft; and asking him, what acknowledgment he was able to pay him, for the many favours he had received at his hands, Ki, na answered, Take a white horse with black ears and a yellow tail, and fasten a paper on his head with the following lines written in gold characters. Whoever meets me, and lets me pass unmolefted, shall worship me and Kifna, who will reward their piety; but whoever flops me, let him prepare to fight. He further told him, That he should give him his brother Ersiende for his companion, his intention being to purge the world of Kifna vi-the wicked, during that thort time he world, to had to stay as yet upon earth. The purge it king obeyed, and having presented his from the brother with a chariot, and put him at wicked. the head of a good body of horse, he took his leave of Kifna, who went his way, the horse leading the van without

This horfe passed through many kingdoms, where every one that did read the inscription, payed reverence to Kisna. But coming into the territories of Sindera, who having received feveral figual obligations from Kifna, seized upon the horse, by that means to engage Kisna to conce to court. Accordingly Kifna (who He bleffes knew his intention) vifited him in his Sindera. court, where being reverenced and prefented by the king, he gave him his bleffing, and fo fet forward again to the king of Sudannewa,

a guide.

This king flopping the horse, wor-shipped Ki/na, alledging, That he did months and twelve days, purify herfelf not do it to engage with Kifra, but to

Baldaus try his strength against Ersiende. Kisna accepted his excute, Exfiende drew his Commité bow, and thot an arrow into his breaft.
Sudannewa, #50
The king litting up his eyes unto heaven, is killed by and tearing the arrow out of his wound, Erliende. cryed, O Kijna! dost thou thus reward thy adorers. My foul must now transmigrate into another body. No, answered Kifua, thy foul thall ascend to heaven

Comes to. and routs fazeral kings.

in an instant, and enjoy eternal blis. Hence he travelled to the impious king Anffalauw, who stopping the horse, and bringing his forces to fight against him, were all flain upon the spot. Next coming to king Sallauw, he followed the footsteps of Ansfalauw, and had the same fate. Afterwards they came to Mottera, the residence of the samous giant Ragia Jerafingh, who had been for-merly de cated, no less than eighteen times by Kisna. This giant having fortified Mottera with high and strong walls, drew out his forces into the field, himfelf being covered with a cuirafs, or armour, that was both fword and shot-proof. Both armies engaged one another with fuch fury, that the like had never been feen before, with fuch various fuccefs, that it remained dubious, who was likely to be the vanquisher, the night putting an end to the battel for that time.

Kifua being sensible that it would be a hard task to kill this giant, as long as he made use of this armour, got with Ersiende over the city walls, having transformed both himself and Ersiende into the shape of two old and tall Brahmans. In this posture they scated themselves near the Pagode, where the giant used to wath himself, who coming thither, asked them, What is it you two devout men defire? ask and you fall have it, be it what it will. Kifua replied, That kings were apt to promife much more than they intended to perform. The giant answered, That was never his custom, defiring them to ask what they pleased, it should be granted. The disguisted Kisna then asked the king to give him his hand, as a token of his fincerity, which the king having done accordingly, All that we ask of thee, said he, is, that whenever thou engagest again against Kisna, thou falt not put on thy for-free armour. The king, (though suspecting the matter) answered, Well, fince I have given my word it hall be done, provided that he who engages in a fingle combat with me, thall bring no bow and arrow; but if he * A kind fight with a Gors *, or try his skill with of Indian me in wreftling, I am ready to answer him.

Kifna and Ersiende disappeared without answering one word, and Ersiende's skill lying chiefly in his bow, he engaged

weaton.

Erfiende's brother, (a samous wrestier) Baldaus, in his stead. The combat was fo equal, that the night parting them, they referred the whole decition of the quarrel till next day; being both equally tired with wreftling, they tought with the Gors the next day; they engaged most furiously all the day, giving one another most terrible blows, but with equal advantage; fo that night approaching, they were forced to deter the final decision till the third day. Then it was that the giant exerting all his force, gave such frequent and terrible blows to Rhim, Erfiende's brother, that being ready to faint, he was knocked down feveral times. But imploring Kifua's affiftance, he was endowed with new vigour; fo that recovering his ftrength, he attacked the giant Ferafingh afresh, and at last laying hold T. e giant on his legs, tore him afunder, with his lecatingh entrails hanging down upon the ground. killed, Kisna's forces seeing this spectacle, at-tacked his army, and slew them all upon

the fpct.

Kifna in his return being met by Sufsuffer, was entertained by him in a garden without the city, Erfiende at the fame time prefenting him with a gerland of flowers. Kifua being highly tatisfied with him, faid, Defire what you think fit. But Erstende excusing himself, Kifua told him, That his time upon earth being near expired, be intended to grant him what-ever request be could make. Then, replyed Ersiende, bestow one of your wives upon me. Kifna answered, Take my chariot, and go to Davarea, visit all the chambers of my Seraglio, and which of the ladies thou findest without me, take her for thy own. Erfiende went instantly to the Seraglio at Devarca, and entring the first chamber found Kifna talking with the lady; then going to the fecond, he found him there likewise; and fo in the third, fourth, and all the rest. Being struck with amazement, he returned to the garden, where he had left Kifna, and proftrating himfelf, faid, O Kifna, thou beeft the true god, and present every where, pardon my errors! Kisua giving him his blessing, told him, He should persevere in his prayers, and so returned to Divarea.

Kifna afterwards feeing the cowherds vaft in. multiply to fifty fix Karool, (each Karool create of making one hundred Lak, each whereof the cousies one hundred thousand,) or five hundred. and fixty millions living fouls, and that they had increased as well in iniquity as in number, he was highly incenfed against them, declaring that he would root them out, not by his or other mens hands, but

Baldeus. It happened that a great number of ther, one of the company took up one of Baldeus, them being invited to a least where Kifna was also present, they were so full of wantonness, as to stamp upon the precious flowers called Maffion and Caffomba (affording a most delicious tincture for dying) with their feet. Not contented thus, it being a moon-shiny night, they contrived to ridicule the famous prophet Ruchi, whom they faw fitting very thoughtfully under a tree. For this purpose they put a basket under a certain man's clothes, dressed like a woman; and carrying her to Ruchi, asked her, Whether this woman was to bring forth a male or female child? He not minding them the first time, they pulled him by the arm, and asked him the same question in a very rude manner a ...cond time; when being, as it were, awakened out of his penfiveness, he told them, He should bring forth an iron bar, which should break all their skulls. He had no fooner faid these words, but the disguised man was feized with most intolerable pains, which did not cease, till he had brought forth an iron bar. Being amazed at so odd an accident, they had recourse to Kifna, who ordered them to go to the village of Perwatspatang, feated upon the river, where they should find a stone, wherewith they must rub the iron bar till it was reduced to powder, and then throw it into the river. They did as they were ordered: but no fooner had they thrown the powder of the iron into the water, but the whole river was filled with reeds, or finall canes, as if it had been a forest. They gave an

account of it to Kifna; who told them, It was well. It happened upon another festival, that the young tribe being merry toge-

these reeds from the ground, and striking another over the head in jest, he faw him drop down dead before his feet. The friends of the deceased taking up another such reed, struck the other young fellow over the head, who likewife falling down dead, his friends did the fame to them, and fo one to another, till they were all killed; according to the prediction of Ruchi the Brahman.

Kifna having now fulfilled his office in rooting out wickedness among men, fent for the Panspendaons and Droepeti, and their mother, to Davarca, where he told them, That having felected them as well as his wives from the rest, he would have them go to the mount Hemaat fiel Perwet, whence they should be taken up into heaven. Accordingly they went with Kisna's fixteen thousand wives to the said mount, the peak whercof nobody could reach but Suffifier; however, they were all together drawn up infensibly through the air into heaven.

Kifna knowing that his time was come to leave the earth, he took a handful of dust, and throwing it over the city, their golden streets and houses were in an inftant transmuted into straw, dirt, wood, and stones; which done, he ascended kissa afstrait to heaven. The pagans are unani-tendi to mously of opinion, that in case the whole fea was filled with ink, and the earth made of paper, and all the inhabitants of the terrestrial globe were only imployed in writing, they would not be fufficient to give an exact account of all the mira-7 he fame cles wrought by Kifna in one hundred is faid of years time, in the third period of the Chrif. world called Duaper singe, containing Joh. 21. cight handled fixty four thousand years 25. eight hundred fixty four thousand years.

CHAP. XI.

The ninth Appearance of Vistnum in the shape of Boudha, or Bodhe. His tenth Transformation into a flying Horse, called Kallenkyn. The Origin and Actions of Bramma.

The ninth appear-

HE Benjans tell us of Bodhe, that he has neither father nor mother he has neither father nor mother; that he is invisible; but whenever he appears, it is with four arms. He fpends his whole time in praying with a dejected countenance to the great god, (called Mahadeuw by the Benjans;) and that after having continued twenty fix thoufand four hundred and thirty years, without performing any miracles, his time is expired upon earth, being the time we now live in, according to the computa-VOL. III.

tion of the pagans. For pursuant to the computation of the Benjans at Suratte, there were in the year of Christ 1649 passed four thousand seven hundred and fifty years, and confequently twenty one thousand six hundred and eighty years to come.

What is faid of this idol concerning his being born without father and mother, and his invifibility, feems to have fome relation to what they may perhaps have heard of Christ, as his four arms in-9 U

Baldaus, timate his power, a thing frequently attributed to the pagan gods; just as the antient poets made their giants with a hundred hands. The jesuit Kircher attributes likewife four heads (but erroncously) to
this Bodhe, (called Bhavani by others,) and
says, That by his four arms they would
represent the four elements. What the
faid jesuit relates of Ramizander, the four
of Ball, who came from heaven to deliver. and potes made their grants with a nundered dred hands. The jefuit Kircher attributes likewife four heads (but erroncoufly) to this Bodhe, (called Bhavani by others,) and fays, That by his four arms they would represent the four elements. What the faid jefuit relates of Rantzander, the fon of Bal, who came from heaven to deliver his people from the oppression of the

giants and tyrants, feems to be a confir-Baldeus. mation of what we faid before, concerning fome obscure remnants of knowledge

Baldæus. gr w di th w fo

Baldaus. grees turn to all manner of impiety and wickedness for forty thousand five hundred and seventy years. Then, say they, this horse is to trample upon the earth with his right fore-leg with such a force, that the serpent Signagis being no longer able to bear the world, the Tortoise sinding the whole burden laid on her back, will run to the sea and drown the world; which is to be the conclusion of the god Vistnum. It being certain, that

The Crea-

Baldaus, that though most of the India pagans, and especially the Malabars, are black themselves, yet they have a peculiar effect for the white colour; as may be feen in the white cow of plenty, called Camdoga, and the famous white elephant of the king of Siam, mentioned in the first book. Thus Virgil describes Turnus's Lo. Ro. horse to be white. And of the strength, activity, and excellency of a horse, there are many passages to be found both in sa-cred and prophane history. The wings attributed to this horse, seem to be done in imitation of the Pegajus of the accient pagans, which was placed by them likewife among the stars. What they say likewise among the stars. What they say of the world's being east into the sea by the tortoile, appears to have some relation to Noah's flood. And it is observable, that according to the doctrine of the Malabars, before the last metamorphotis of things, there shall be such dis-orders in the world, that the whole race of families and tribes shall be confounded. They fay there shall but two pious kings be remaining upon earth at that time, viz. The kings of Vappi and of Mari.
Thus much of the god Ixora and Vift-

num: we must also say something of the third, viz. Bramma, who owes his origin to Quivelinga. Rogerius deduces his Origin of origin from a flower-pot; but the commemator upon Rogerius had fufficiently shewn, that Tamara is quite another thing. Though this opinion seems to agree in fome respect with what father Kircher fays in the ninth transformation of Viftnum, viz. That he was transformed into Lotum, being a certain product of the sea, and the opinion of the Egyptians, of Thales and the Stoicks, who acknowledged the water either the principal or the nourisher of every thing.

The chief things attributed to Bramtor of the ma by these pagans, are, That he has not only created the world, but also determines the duration and times of all created matters: and as they also acknow-ledge him the fon of God, and the supreme governor of angels, nay, even afcribe to him a human nature, fo it is evident that these attributes must have their origin from what they have heard (though perhaps confusedly) of Jesus Christ the Son of God.

They represent it with four heads, but fay he loft one by Ixora's means, to punish his pride. Hence it is, that the Brabmans now-a-days have no more than three books of the Vedam, the fourth, which treated of God, being loft.

For the first of these books treated of God, and of the origin and beginning of by the physiognomy of a person, what

the universe. The second of those who have Baldaus, the government and management thereof. The third, of morality and true virtue. The fourth of the ceremonials in their temples, and facrifices. These four books of the Vedam are by them called Roggo Vedam, Jadura Vedam, Sama Vedam, and Tarawana Vedam; and by the Malabars, Icea, Iceiyaa, Saman, and Adaravan. The lofs of this first part is highly lamented by the Beabmans. They also attribute to him the preservation of all created things; whence the modern Brahmans afcribe all the good or bad fortune which befals moreals here upon earth, to the direction of Bramma, who, they fay, has also prefixed every living creature his time of life and death. They further fay, That not only the

feveral worlds, but also the different families and tribes have their origin from Bramma. The fuper-aereal world, they The origin fay, came out of his brains or face; for of the these pagans acknowledge certain celestial surrers orbs, with Aristotle. The second world, worlds, they say, did come out of his eyes; the third out of his mouth, the sourch out of his left-ear, the fifth out of his tongue and gums, the fixth out of his heart, the feventh out of his belly, the eighth out of his privy-parts, the ninth out of his left thigh, the tenth out of his knees, the eleventh out of his heels, the twelfth out of the toes of his right-foot, the thirteenth out of the ball of his left-foor, and the fourteenth out of the air that furrounded him.

The Brahmans fay they are the product of his brains, and the Nairos or foldiers, of his feet; as the Enaftri (a fort of kings) are out of his arm; which is the reason that they never make the fame low bows before their kings, as their other subjects, but have the privilege of sitting down in their presence. Unto these sourcess worlds as many divers forts of people attribute their origin.

1. Such as are endowed with wifdom. Fourters 2. Those that are provident in their ac-fort of tions. 3. Those that are eloquent. 4. Such people. as are cunning and defigning. 5. Drun-kards and gluttons. 6. The generous and brave. 7. The idle and lazy. 8. Whore-masters and voluptuous per-fons. 9. Labourers, artifans, and handicrafts-men. 10. Peafants and gardiners. 11. The Parreas, and other forts of nafty people, who, they fay, came out of the heels of Bramma. 12. Thieves, nur-derers, and robbers. 13. Those that op-press the poor. 14. Those endowed with peculiar qualities, and an active spirit. They further say, they can judge

all god not he pie the worlds and the feven feas we shall fay

more pretently.

The Malabars fay, Bramma has two wives, Saroffedy and Quiatry, who are both barren. The first being his own daughter, has given occasion to a pro-verb among the Malabars, You must not do like Bramma. The equipage, or ra-ther carriage of Bramma is a certain bird called Annam by the Malabars; for these pagans attribute to every one of their gods a certain horse, or carriage, called Wahanam, which carries them from place to place. They further fay, That this bird Annam, it milk mixed with water be fet before him, he will drink the milk, without touching the water; an emblem of fuch as

Baldens, part of Bramma he was come from. Of know how to diffinguish good from evil, Baldens.

They relate many other fabulous things; or for instance, That Bramma after a period of many ages, is to die, and be revived; that he has certain deputies or affittants, the chief of whom is Dewendra, the head of all the governors of the feven worlds which are beyond our world, met below the heavens, or Bramma's refidence. In these worlds (fay they) the believers live after their death. They allow that fome things of leifer moment, fuch as herbs, cu-cumbers, &c. have been created by others; but that all things of moment owe their origin to Bramma, who loft one of his four heads, because he had told a lie to Ixora; and several such abfurdities more,

CHAP. XII.

of the Creation, Quality, and Division of the World, according to the Opinion of the Learned Heathens.

H. F. Benjaus and Malabars conftiflute God the creator of the Universe; for they frequently give God the title of Creator of Heaven and Earth. We told you in the preceding chapter, that they attribute the creation of the world to Bramma; whereunto we will now add, that they say the power of creating the world was communicated to him by Viftnum. They believe, with Epicurus and Metrodorus, more than one world, of which before; besides which,

seven seas, they make feven great feas. 1. The Mater-Sea, 2. The Milk-Sea, 3. The Cream-Sea, 4. The Butter-Sea, 5. The Salt-Sea, 6. The Sugar-Sea, 7. The Wine-Sea. The paradife they place in the Water-Sea; the priests and Gogyes belong to the Milk-Sea; the voluptuous in the Cream-Sea; the fortunese and in the Gream-Sea; the fortunate and bleffed in the Butter-Sea; the merciful in the Salt-Sea; those who are liberal in giving alms in the Sugar-Sea; and those that live in great plenty in the Wine-Sea.

Notwithstanding this general opinion, the Brahmans maintain that the was produced from an egg; of which opinion, it feems, were also the ancient Egyptians, the Thebeans, Orpheus, Plato, and the Perfians.

The Malabars look for the origin of all things in the privy-member of their god; which being too large, he could not enjoy his Wife Chatti; wherefore he was forced to cut it into eighteen pieces, which turned into divers forts

of arms; but the blood which islued thence, produced the fun, moon, and stars; and some few drops talling upon the ground, the roles, and other forts of flowers: but all living creatures, both rational and irrational, were brought forth by Ixora's cohabiting with Chatti.

The Brahmans further are infected Ridiculous with a ridiculous opinion, That the world opinion of is not round, but flat; and that confermans con-quently the terrestrial globe is not enclor corning the fed in, or furrounded by the air, but li-feure of mit its extent by the horizon that is ob-the world, vious to our fight: for they maintain, that the heavens are the uppermost half, and the earth the lowermost of the eggshell; whence it is, that they consider the heavens as immovable, and the mo-tion of the fun, moon, and stars (unto whom they attribute peculiar fouls) to be like the fishes at sea in the day, from east to west, and in the night from the west (not below, but along the edge of the horizon) to the north, and so again to the east. If you object, that, according to their improfition, the fun must never cease to shine, they answer, That to the north there is a vast ridge of mountains called Mahameru, or Merouma, behind which the fun, moon, and ftars, withdraw from our fight. They add, That the world rests upon an ox who, when he has a mind to ease himself, he throws the world from one of his horns to the other, which occasions what we call carthquakes.

They are also grofly mistaken in the Baldæus. computation of the extent of the earth, concerning which, the Brahmans fay, is from north to fouth a hundred thousand Joxena's; u: magniwhereas it is beyond all doubt, that the whole circumference of the globe amounts to no more than five thousand

> fifteen of these miles to a degree, of which there are three hundred and fixty. They alfo constitute no less than five elements, adding the heavens to the rest; in which point, they follow the foot-steps of Ariftotle, who calls the heavens the first element. These five elements, both the Brahmans and Benjans reverence like

four hundred German miles, reckoning

gods; because, say they, they enter into Baldaus. the composition of every thing upon earth; whence they allot every one of them his peculiar Wahanam, or horse. They have also invented no less than feven Padallas, as they call them, or fubterranean places, (not unlike the purgatory and Limbus Patrum of our modern Roman catholicks;) which inferior worlds are known among them by these following names, Adela, Bidela, Sudela, Taladelam, Sadelam, Mahadelam, and Padelam; and are inhabited by men, who receive no other light but what certain ferpents, carrying very bright stones on their heads, afford them.

CHAP. XIII.

The Opinion of these Pagans concerning the Soul, and its Transmigration. The Form, Structure, Splendor, and Revenues of their Pagodes, or Temples. Of the Ceremony of washing of these Pagans.

THE modern Brahmans, in imita-tion of the ancient Egyptians, Thracians, Druids, and Germans, believe that the fouls were not fuch from eternity, but created by God, and kept as part of his effence, till after the creation of the earth they were infused either into men The Pytha or beasts. Concerning the Pythagorean gration of (fo generally received among the modern doctrine of the transmigration of fouls, pagans,) we have had occasion to speak before in the description of Ceylon; we will only add in this place, what the Malabars say on this head, they are of opi-nion that this transmigration of the fouls from one body to another, is inftituted by God as a punishment for our fins, which continues till they are either con-veyed into heaven or hell. They fay there is a certain judge, named Chitra Putta, who judges of the actions of mankind when they lie upon their death-bed, and determines according to their past actions, whether the foul of the deceas'd shall transmigrate into a dog, cat, crow, cow, king, Brahman, scrpent, &c. So that in case a person in his life-time has done a notorious injustice to another, his foul shall be transplanted into the body of a slave of the offended party. The reason why they abstain with so much strictness from all forts of meat, is no other, than that they are afraid, as Tertullian expresses it, that in feeding upon a piece of beef, they may eat a piece of their father or grandfather.

These pagans have their Pagodes, or temples, erected to the honour of their idols. In the choice of the places, and manner of the building, they follow rather The buildtheir instinct, or pretended inspiration, ing of their than any general rule or method. These Pagodes. than any general rule or method. These Pagodes are, on the coast of Malabar, most commonly built of marble; and on the coast of Coromandel, of very large fquare stone: such is the most celebrated Pagode at Rammanakojel, a vast structure, and endowed with vast revenues, by the great conflux of pilgrims that continually refort thither; of which I have been

an eye-witness my felf.
The Pagodes of the Malabars are generally covered with copper, adorned with balls gilt on the top; within and without stand their idols with many heads and arms, furrounded on all fides with ferpents. The Pagode is enclosed by a brick-wall, for the reception of the people, who do not enter the Pagode, but perform their worship in the court, as the Yews did in the hall of Solomon. Hence it is, that the gates are well guarded, being commonly either of marble, or covered with brass, with the figures of elephants, tygers, bears, and lions upon them; and on the frontispiece many dreadful heads of lions, with hogs tusks, reprefenting the idol Patagali, Ixora's daughter.

These Pagodes are not only maintained by the presents that are constantly made, but have also a constant revenue from Their revethe customs of all commodities bought ""es.

CHAP. XII.

Baldons or fold, an exact account whereof may be feen in Rogerius, 1. 2. t. 10. These Reverence pagans have also a great reverence for Pagodes, their Pagodes; whence it is, that they will not enter a Pagode with their Seripons, or flippers: and they always have their eisterns at the entrance of the Pugodes, to cleanse themselves before they enter; just as the same is practifed among the modern Makometans in their Mosques, and as the Fews had the Brass Sea belonging to the temple, for the Levites to wash themselves in. Linscoten mentions, that the Pagan pricits in Calecut besprinkle those that are entering the Pagode with boly water, like our roman catholicks. The pagans in Coromandel have abundance of small Pagodes on these places, where they burn their dead, whereof I took particular notice at Negapatan; and in Bantam, the richer fort maintain frequently small chapels for their private use. Of the Pagodes in Pegu, see Casp. Balbi; of those of Japan, Caron and Almeyda; and of those

of China, Fordinand Pintho.
Their custom of washing themselves daily, feems not only to be introduced for the cleanfing and cooling of their bodies, but chiefly for the purifying of them from their fins; for as these pagans make a distinction betwixt venial and mortal fins, they regulate their washing accordingly. The first they are cleanfed of by dipping the head under water; whereas to purity themselves of the others, viz. (such as include the loss of life or family, and fall under the cognizance of the civil magistrates,) they dive the whole body under water. Their constitutions (being to them the same as our ten commandments) are,

r. That those of an interiour rank must not touch those of a superior quality, and the greater the difference the more is the diffance; whence the inferiour people cry out in the ftreets Tintelas, i. c. do not make your felf unclean, and those of superior rank Popo, give way; for if any of the common fort happen to touch a person of a high rank, he becomes unclean, and must wash himself with water.

2. Those that touch a dead carcass, nay, even any of the deceafed kindred, within fifteen days after, become un-

3. Those that touch a woman in childbed, or the child.

4. Or a woman that has her monthly times, till the fourth day.

5. All fuch as are become unclean, if they touch another, he becomes fo likewife.

6. If one that is unclean eats rice be- Baldaus. fore he has cleanfed himfelf, he lofes the advantage of his family, and commits a mortal fin.

7. Persons of quality commit a mortal fin, if they cat rice boiled by one of an inferior rank.

8. The fame it is, if he lies with a

woman of a low extraction. 9. The Brahmans, though all of the same tribe, yet are not permitted to eat with one another: thus if any one touches with his right hand (wherewith he eats) his neighbour, it is a venial fin, because that hand is unclean by touching the rice; the same it is, if the fig-leaf (which they use instead of a twine thread) touches his that fits next to him: but if but one fingle grain of rice should happen to fall upon the fig-leaf of the others, he must not eat it, without committing a mortal fin.

10. Immediately after dinner, or fupper, they take away the fig-leaves, and the least grain of rice that perhaps may be fallen upon the ground, which is laid up together in a certain place, because all the remnants are unclean. The place where they have eaten, they purify with cow-dung; and if the least grain of rice Cow dung should be left behind, he that touches it, wed for becomes unclean immediately on that purifying. part of his body which touched it, which must be purified by water. Thus if any body puts his finger into the mouth, nay, if two persons of a different rank meet at a ciftern, if but one drop of water that has touched the body of him that is of an inferior degree, happens to fall upon him of a fuperior rank, he becomes unclean, and is guilty of a ve-

Their ceremonies observed in washing Their cereare, first of all, they fancy that the stone " on the edge of the ciftern is Bramma, washing. the place where they wash is Vistum, and the cistern itself Ixora. They enter the cistern quite naked, (their privities being covered only with a leaf,) and write with their fingers the fyllable om in the water, and then with three fingers cast up a little water into the air, intimating, that Ikora, Viftnum, Bramma, have bathed themselves there; at the fame time pronouncing these words, Tot-. n quenca bitten pava, i. e. By the touching of this water, I have cast away my sin. Then parting the water with both their hands, they dip their hands in it, and thereby believe themselves cleanfed from all their fins committed by touching. Afterwards they cast some water with both hands towards the eight parts of the world, as a facrifice to the eight

he d C,

m Their reveat nues. 10

Ba' læus.

Сна

Baldaus.guardians thereof, fay the Siri Pagode, wash their faces three times successively, faying, Purify me. This done, they throw likewise some water towards heaven, as a facrifice to the fun; and having washed their hands and feet, take a finall quantity of the ashes of cow-dung in the left hand, which being mixed with a little water, they fay Sudamaga, i. e. be clean. Furthermore, as they suppose the left hand to be the earth, and the right the heavens, and the inside of the hand the place of propagation, they lay the right hand close upon the left, saying, Let this be the end of the world; and as they be-lieve that at the end of the world, Ixoretta is to be transformed into an egg, they imagine that the concavity betwixt their two hands reprefents the faid egg; whence (after having paufed a while) they take away the right hand, faying, Heaven and earth are separated; and then write with the forefinger of the right hand in the ashes contained in the left the two fyllables ja ra, intimating the contest betwixt the fire and air in the egg, in carrying the heavens to the top, and the earth underneath. This done, they lay their hands below the navel, on

the upper crifice of the stomach, upon Baldwus. the breast, front, head, and crown of the head, and afterwards upon the inferior parts of the body; they likewise touch the eyes, ears, feet, and heels with their fingers, extending now and then their hands, as if they were going to give fomething: they likewise shew their empty hands to the eight guardians of the world; and afterwards befinearing themselves with ashes, with three fingers of the right hand (in honour of Bramma, Vistrum, and Ixora) on the breast, front, and shoulders, they then reckon themfelves clear and purified of all their fins. If you ask them what makes them use all these ceremonies, they give for answer, That they have two different laws, viz. the Carma and Nhana, one whereof contains instructions for the inward service of god, the other for the exteriour or ceremonial part. They add, that Parexi Rama, when he made the fea recede from the coast of Malabar, did recommend, in a most peculiar manner, the ob-fervance of the Carma to the Malabars, whence Malabar to this day retains the name of Carma pumi, i. c. the country of

CHAP. XIV.

Of the Holy Ashes used in anointing themselves, and of their Festivals.

HE ashes of cow-dung are a thing in fuch request among the Indian pagans, that they with it befmear every morning their front, breast, and shoulders; every king maintains in his court a certain person, who every day, early in the morning, exposes a good quantity of these ashes upon a fig-leaf in the marketplace, when every one that pleafes comes and takes some part thereof for his use: of these as they also offer daily facrifices to their gods. The Gogyes attend constantly near the Pagedes, with a whole bag full of these ashes, which they diftribute to the people; who in return give them fome alms. They always appear befmeared with these ashes, in which confifts a great part of their holinefs, their god Ixora being also bedaubed with these ashes; the reason whereof, as they relate it, is this.

We told you before, that Ixora, or Quiven, having undertaken to keep Quifacred with velinga, the ashes which settled within them. the shell rendered Ixora immortal. Viftnum being defirous to enjoy the fame prerogative, feized upon a cow, and carrying her to Calaja, Ixora's refidence, he

Wir the

fnatched away some of these ashes; which Ixora perceiving, he struck out feveral of her teeth by a blow he gave her; which falling upon the carth, produced a kind of large water melons, called Abobacus by the Portuguese. However, Viftnum keeping close behind his cow, he gathered the next dung, and burnt it to ashes; whence it is, that to this day, these pagans have so great a veneration for the cow-dung, that they believe it purifies every thing upon earth. The faid cow brought forth a bull-calf: unto which Ixora gave the name of Irixipaten, and used him instead of a horse. The Malabar women, though otherwise pretty cleanly, yet are fc intoxicated to this superstition, that they cleanse their chambers and their cifterns with cow-

The Samoryn or king of Calecut, wa- How the thes himself every day before dinner; king of Caand when he goes to the Pagode, the way the bimfrom the eistern to the Pagode is covered felf. with cow-dung, upon which they strow roses and other flowers; besides that two women, each with a pot of cow-dung mixed with water, walk just before him;

the Mala bars of the

Ba' leus, and the place where he dines is afterwards constantly cleanfed with cow-dung.

They relate farther of the cow, that Quenavady and Superbennia c'id fit betwixt her horns, the fun and moon in her eyes, Bramma's two wives in her ears, Ixora in her nose, Viftnum in her tongue, in her thighs the Rixii, the four books of the Vedam in her four legs; that her milk is the true Ambrofia, or Amortam, and her piss the Tirtam, or the water fit to purify themselves from their fins: whence it is, that when they fee a cow ready to piss, they catch it with their hands, drink a little of it, and with the rest wash their faces. As these pagan kings claim the patronage of cows, so the Samoryu of Calecut is attended every morning early by fix boys, all over befineared with fresh cow-dung, with garlands of flowers on their heads: as foon as the Samoryn rifes, they pay him reverence; who orders them immediately to give the flowers to the cows, which they do.

They have not the same regard for the bulls and oxen, though they make a bull the father or author of the royal family of the Exaftri, from whence the kings of Cochin, Cranganor, Cananor, and others are descended: they relate that all the males of this family being extinct, a woman of the fame tribe being begot with child by a bull, revived the

faid family.

The Malabars alledge the following the Mala reason for the ashes of the cow-dung; bars of the They say that the Lingam, (i. e. memsow-dwag brum virile) of Ixora, before it was cut in pieces, being so long that it reached up to his forehead, let fly fome few drops of feed, which happening to light into his fiery eye in the front, was burnt to offices immediately. Hence it is that in Canara, betwixt Cananor and Mangalor, there are to be found a certain order of pretended holy religious men, living con-fantly in the Pagodes. These appear in the streets quite naked, and making a noise by the ringing of a bell they carry along with them, the women (without distinction of age or quality, even to the queens) come running out to touch their privy members.

That the Egyptians, and after them the Jews, had a peculiar veneration for cows and calves, is fufficiently evident from many passages in the icripture; and the ashes of the red cow are mentioned, Heb. ix. 13. and Numb. xix.

Betides this purification, these pagans have also their meritorious acts of piety; fome of the Gogys carry iron collars about their necks, walk constantly with iron fetters and chains, and have iron nails with the points inwards in Baldaus. their wooden flippers, or fandals. Some have been known to tie themselves with ropes to a tree, till they expired in great

I faw 1657 one of these Gogys at Columbo, whose arms were grown together over his head, a posture he had chosen out of devotion. Others of this order never sleep, but pray incessantly; of this kind are also to be found in Japan

and China.

Another meritorious act of the pagans, is the visiting their celebrated Pagodes, and other holy places, (like the pilgrimages of the romanists,) as the famous Pagode Rammanakojel, the Adams mountain in Ceylon, and divers other places at Su-ratte, Davarca, Mottera, Cafi, Bengale, and Ayotia, twelve leagues from Cafi; for which reason it is, that the rich erect Pagodes, Jans, (called Ammalams,) and cinerns, for the conveniency of the tra-

velling men and beafts.

The Malabars have a peculiar way to merit the forgiving of their fins; There grows a certain stone, called Talagramma, on one fide of the mount Mahameru, near a river-fide, (which the Gogys always carry about them,) fome whereof contain gold, and are then called Jerenia Querpam; one of these carried in a veffel, and in another the five following things belonging to the cow, viz. the cream, milk, butter, pi/s, and dung, mixed together, called by them Panchaviam wine, and afterwards put into the other vessel, wherein lies the Talagramma, and given to any person whilst he recites the Vedamantiram, (a prayer of five words,) purchases pardon for all fins, destroys his enemies, reconciles him to his friends, and procures riches. This prayer is in high veneration among the Brahmans, which they use constantly when they are sitting down to eat; but no body dares to fay it in the streets. The five words are Panefua, Apanefua, Vinefua, Udanefua, and Sumanefua; the first lignifies the foul or spirit; the second the posteriors, where the excrements are discharged; the third the hearing; the fourth seeing; the fifth the smel-

They have also their festivals: One of Their festivals, of these trues. the most remarkable festivals of these tivals. pagans, is celebrated in honour of Viftnum or Ixora; though the Malabars folemnize certain festivals, as that in honour of Ixora's spouses, which are not regarded by other Brahmans, which beginning the 8th of Jan. continues for nine days, the ceremonies may be feen in Rogerius, 1. 2. c. 12. Its origin.

The fecond

falt.

Baldaus. honour of Ixora and Viftuum, are called months in the year, viz. April called Baldaus.

Trenaca and Punduga. The Gentives,

Malabars, and inhabitants of Coromandel,
July Ajadam, August Spawanam, Sep-

also solemnize a feast to the memory of the nativity of Viftuum, and his transformation into Kijua in August, when they adorn their houses with all forts of greens, which feems to have fome refemblance to our christmass. also use another feast to the honour of Viftnum, in remembrance of the fixteen thousand virgins; it begins the eighth day after the full moon in October. They have also a feast in honour of Vistnum's spouse, called Lasceni by those of Coromandel: this is celebrated by the Brabmans wives in September for nine days, when they pray for the long life of their husbands, and to obtain riches. have also two other seatts in July and November. They observe besides this certain days, as facred and fortunate; as the first day of every month, the day of the Solflice, when the fun turns from the

north to the fouth.

They pay every morning their reverence to the fun, and having wathed themselves three times, they throw the water with their hands upwards, to prevent (as they say) the evil spirits from keeping the sun betwitt the mountains. The new year they begin with the new moen in April, as the modern Jews in the month Alib. They call the new years feast Samwatsardi Pandaga, Pandaga ignifying as much as a teast, and Samwatsaram a year, as Adi is the first day of the month; for they have twelve

months in the year, viz. April called Baldev Thestram, May Weiwiacau, June Jestam, July Ajadam, August Spawanam, September Badrapadam, October Aswyam, November Carticam, December Margifaram, January Ponjam, February Magam, March Paelgouwan. And because these twelve months are not equivalent to the months of the sun, they have every third year a leap-year, consisting of thirteen months, which we have only

once every four years.

Befides the names of every month, and of every day in the week, the Malabars have a peculiar name for each day in every month. They have also peculiar names for each year, as far as fixty years, unto which they add the word Samwatsaram, fignifying a year, which however is often left out for brevities sake; then they say, Prabawa the first, Pinawa the second, &c. Isaja the fixtieth, meaning the Samwatsaram, or year. They compute by fixty years, just as the greeks do by their Olympiads; they also name the days of every week (like the antient pagans) after the planets: thus Suria figuifies to them the fun, and Jendra the moon, whence they call Suria Waram the funday, and the moonday fendance.

They divide each day into thirty hours, just as the gentives divide their day and night into fixty hours, some whereof they account fortunate, and some unfortunate. Of the pagan feasts you may consult Carolinus, chap. 22.

CHAP. XV.

Of the Fast-Days of the Pagans; and their Origin. Their Marriages and solemn Oaths; Ceremonies used with their Sick and Dead.

S the pagans pray constantly thrice a day, viz. in the morning, about noon, (when they repose themselves,) and in the evening, so they have their folemn fast-days: one of these is called Egadexi, which word (in their learned language, called Samoferad, or Hanferet, as Kircher stiles it, which is in the same esteem among the Malabars, as the latiin Europe) lignifies as much as eleven, or the eleventh, because it is kept the eleventh day after the full moon, and again the eleventh day after the new moon; fo that they have two of thefe fasts every month, viz. one every fifteen days, when they abstain from eating all the day long, or at least till four or five a-clock in the afternoon, when they must not feed upon flesh, or fish, or rice; but only upon fruits, pease, beans, milk, and such like, and not drink the least

frong liquor.

The origin of this fast-day is ridi-origin of culous enough. They tell you, That a the first young fellow, much addicted to venery fist day of going one night very late to visit his gaut. mistress, could not light on a boat to ferry him over the river; however, being resolved not to depart, he staid there all night, and did full asleep, without having eaten any thing all that day. Next morning early palling the river, as he was going to his mistress's house, he met with a camel just at sun-rising, at which throwing a stone, it hit accidentally upon some flowers, and cast them

li-Origin of to the first full-day of Typehoe pa-hisgans.

Baldens, from the stalks upon the ground, and so

he came to his mittrefs. After some years happening to die, and being carried before Chitrapatren, he could not produce any good works he had performed in his life-time to intitle himself to the paradife, except this his accidental falling, and the throwing down of the flowers at fun-rifing, which he interpreted as a facrifice intended for Chitraputren, after a long hearing condemned him to the internal regions; yet in confideration of his fasting on the 11th day after the full-moon, having the favour granted him of abiding for fome days in the paradife, he was asked what paralife he would chuse; he answered, The Woman's-Paradise. Being conveyed thither accordingly, as he was in bed the next night with one of the ladies, he broke out into most dreadful ejaculations; and being asked by his bed-fellow the reason, he replied, Because I have so short a time to stay in this paradise. The woman, who had taken a liking to him, told him, That he should rise early in the morning, wash himself all over, and at the gate watch the coming of the fervants of Ixora, who were then going into the wood of rojes, to gather flowers for their mafter; she bad him to crowd in among them, and having gathered the most odoriferous flowers he could find, offer them as a present to Ixora. He followed the woman's advice; and having gathered the most sweet-scented flowers he could, offered them to Ixora; who extremely pleafed with this prefent, asked Chitraputren, who this young man was; he told him, he was a perion condemned to the infernal punishments. But Ixora ordered him to remain in paradife with the fame woman, and to gather flowers for him. Now, because this young min got into paradife by his fasting, the pagans fast

upon the before-inentioned eleventh day.

They have another fast, called Quiverafiri, which deduces its origin from Quiven, (the fame as Ixora,) and Rafiri, i. e. the night, fignifying as much as a night-fast, or Quiven's night. It falls out in February; and being one of their established fasts, is kept with a great deal of strictness, they being for-bid either to eat or drink, or to sleep all that night, which they fpend in rehearfing the fictions of their gods, and walking round the Pagodes till day-break, when they facrifice to the idol, and give alms to the poor; which done the foft is

The origin of this fast they ascribe to one Beri, a famous hunter; who going

one evening abroad to shoot fome birds, Baldaus. got upon a certain tree near a ciftern, called Cuola, the leaves whereof finell as fweet as flowers. Being very eager at the iport, he tarried upon the tree all night; and to pass away his time without fleeping, he pulled off conffantly the flowers of the tree; which he throwing one after another upon the ground, one of them did iall upon Quivelinga; who happened just to lie under the tree without Beri's knowledge, who returned to his own home the next morning.

Some years after the faid Beri happening to die, and being carried before Chitraputren, the judge of the dead, he found, upon examination, that having committed many crimes in his life time, by killing the wild beafts, he was condemned to the infernal regions. But as Yewen, or Famma, the chieftain of the devils, and his company, were hurrying him along, they were met by Ixora; who being informed of his falling all the night long upon the tree Cuola, and his offering of the flowers to Quivelinga, he delivered him immediately out of the devil's hands, and fent him inco

Some tell a different story upon this head, viz. That Beri perceiving a tyger under the tree, was forced to remain upon the tree all night without eating any victuals. They also tell you the dialogue betwixt Beri and the tyger. Beri, it feems, told the tyger, That whereas he was not able to fast above three days, he defired him to let him go unmolefted to his house, where he would take leave of his wife, and return again. The tyger replied, No; for, faid he, if I let thee come down fafely, thou wilt certainly kill me with thy bow and arrow, which thou didst leave under the tree whilst thou wast climbing up to setch a pigeon thou hadit shot before. But Beri taking an oath by Ixora, that he would return, the tyger let him pass. Beri being returned home, told his wife what had happened, and that he must return to the tree, where the tyger staid for his coming. The woman offered to go in his flead; and fo did his children, to be devoured by the tyger, alledging, That without him, they fhould be deprived of all But Beri not approving fubliftence. their choice, they went all together to the tyger; unto whom Beri faid, purfuant to his oath, he was come to be devoured by him, But the woman entreating the tyger to devour her in his stead, as not being able to fublift without him, and the children making the same pe-

The fecond falt.

Baldaeus, tition to him, the tyger was put to fuch a tering all the while by themselves the Baldaeus, nonplus, that he did not know what words Naraina and Aquanama, firnames to chuse; but whilst he was ruminating belonging to Vistoum. All this while upon the matter, Ixora threw a net over them, and so drew them all into paradife.

The third fast, called Tirinadira, is

The third

god of love mas

Ixora,

kept only by the women, having got its name from the 27th day of the 9th month; on which day Canteven, the god of love, being killed by Ixora, the wo-Its origin, men were so grieved thereat, that they would not touch the least eatables all that day; and ever fince kept a fast on the 27th of December, in memory of this difaster, being much about the same time we celebrate the feast of our Saviour's nativity. They say, the reason why Ixora killed this Canteven, or Cupid, was because the last was fallen in love with Paramesceri, Ixora's spouse; for which reason he burnt him to ashes with his fiery eye on the forehead. But the Brahmans fay that Ixora being for a confiderable time employed in holy matters, and there-by become forgetful of Paramesceri, she addressed herself to Canteven, to insufe into her husband fresh sentiments of love; but the afterwards no fooner understood his death, than she died for grief. Being however brought to life at the foot of the mount Timana, (where the flaid for fome time after to do penance, and thence got the name of the daughter of the mount Timana,) Ixora appeared to her, promiting to continue his conjugal love hereafter. Paramesceri took this opportunity to defire Ixora to revive Cupid from the dead, with this addition, That he should remain immortal for ever after: whence they fay, that Cupid reigns all over the world by the strength of imagination in both fexes. By which they feem to intimate, that as the in-clination to love ceases in old persons, it is constantly revived in the young

world stands. The fourth

They have another famous fast, called Masaupasa, from the word Masa, (which in the high Malabar tongue fignifics a mouth,) and Upada, a fast, being the most facred of all their fasts, beginning with the last day of October

ones; and fo will continue as long as the

Such as keep this fast, having first washed and dressed themselves very clean, repair to the Pagode of Viftnum; and the next day being the 19th of November, after having changed their clothes, go round the faid temple early in the morning one hundred and one times, and the most devoted one thousand and one times. The fame they repeat every day during the whole November and December, mut-

they must eat nothing but milk and figs, neither look upon a woman, and think or speak of nothing but what relates unto Viftnum. The next following year they take the same course, beginning with the 1st day of December, and continuing till the 10th of January, in all, forty days. The third year they begin with the 1st of January, and continue the fame devotions till the 10th of February; and thus the fame fucceffively for nine years longer, till the number of twelve years being compleated, they obtain a general pardon for all their trespasses.

Concerning their marriages, Peliganty, Their marand fome other matters relating to this ringes. purpose, we have had occasion to say fomething already in the description of Ceylon: we will now give an account of fuch things as were not mentioned, or at leaft, not circumstantially in that place. The first is, That the Brahmans are not only at liberty to marry as many wives as they think fit, (a privilege they always enjoyed, as may be feen out of their ancient records, called Poranes,) but also may chuse their wives out of four different tribes, just as the Levites enjoyed the privilege of marrying in what tribe they thought fit among the Yews.

As to their marriage ceremonies, fome precede the marriage it felf, fome are concomitant to it, and the rest follow

The first thing they observe, is to Marriage confult an aftrologer about the position erremonies of the planets, and the time or hour when it is fortunate for the bride to be married; for which reason they also confult on what day of the month, and under what conjunction the bridgroom is born. Next they apply themselves to a Brahman, or prieft, who for four days fuccessively before the wedding, burns a little rice and butter mixed with eggs, for a facrifice. The time of the folenn promife or engagement approaching, they light a large wax-candle, and put some rice upon the table of Quenavady, the huge devouring elephant before mention-ed. This done, the bridegroom throws a necklace, or Taly, with some gold fastened to it, about the bride's neck, as a token, that the engagement is now made; whence the Malabars call marriage Quitha, i. e. an obligation. The wife, after the death of her husband, always breaks this necklace, as a token, that the obligation is diffolved; after which the bride fasts fifteen days.

y, Their mar-

nis riages.

Baldaus. After the copulation is performed, hey entertain their friends at a feast; but the young couple are not bedded till about eight or ten days after : for before they can actually cohabit, they mult attend a fortunate conjunction of the planets; and before they enter the bedchamber, perform their prayers at the door, in the company of a priest, who gives them his blessing. The next following day the new-married couple take a piece of cloth cut at one end, where-with they go a fishing in a river. The first fish they take, they touch on the head with a great deal of reverence, and according as they take more or less fishes, they shall have few or more children; if they eatch nothing, the woman is to prove barren.

As the chief reason why they marry so young among the Brahmans, is their ton lhels of a maidenhea!, fo, on the other hand, nothing is more despicable among them than a maiden come to a full age : which has introduced the cuftom of begging portions for maidens that they may

be married in time.

The Indian kings that are not Brabmans, nevermarry, but only keep certain mistrelles, whose children do not inherit, nay, cannot as much as challenge the least prerogative in respect of their nobility: fo that here obtains the axiom, Fructus sequitur ventrem. The kings fifters are generally married to some other sovereign princes; who must fast fifteen days before marriage. The Nairos have likewife no fettled marriages; whence their wives are are stiled Parasceri, i. e. women for many. The Brahmans take as much care to couple a bull and a cow together, as other people do in marrying their children.

Their man. These pagans perform their solemn ner of ta- oaths near a Pagode; and the Brahmans of Coromandel, in the presence of a priest, near a holy fire, just as the Romans use to do in the presence of their priests, the Athenians before the altar, and the Arcadians during the facrifice. These pagans being ready to take an oath near the Pagode, they put three fingers of the right hand, viz. the thumb, the next, and the middle-finger, into an earthen veffel filled with melted butter; this done, they put a leaf into the fame butter, which they tie close round their three fingers: after three days the faid leaf is taken off in the presence of the king or prince of the country; if his fingers are not burnt, his adverfary fuffers punishment; but if he proves hurt, he is fure to be punished.

Vol. III.

They have another way of taking an Baldaus. oath, no less dangerous than the former: he that takes the oath is obliged to fwim crofs the river, betwixt Cochin and Cranganor, which is full of crocodiles; and if he that has taken the oath escapes without hurt, he is supposed to have taken a just oath.

In Canara they have another way: for they put some adders and a lemon into an earthen voffel; and if he that takes the oath, takes the citron out of the veffel without receiving any harm, he has truly fworn. The inhabitants of Formofa, when they take an oath, break only

a straw to pieces.

Whenever any body falls fick, the pa-What core-tient need not tour to be disturbed with monies they much physick, bleeding, clysters, and use with fuch like, their chief remedy confifting and fich. in fasting, fometimes more than is con-venient. They also fend forth continual prayers, to obtain a happy transmigration of the foul, and exhort the patient to rehearle continually the name of god; and when his thrength fails, his friends repear the fame in his prefence; because the Brahmans are of opinion, that he who dies with the name of god in his mouth, goes directly to the paradife: for the fame reason they also distribute alms to the poor. If they give the patient any medicines, they are generally laxatives of fresh herbs, a little milk, Canfie, (or rice and water boiled together,) a little faffron, ginger, or lecks.

When the patient is near expiring, they reiterate their prayers, besprinkling them with holy water of the river Ganges; for they fay, that the infernal judge fends his fervants to torment them at that time, and that they fend forth their prayers to Viftnum, to fend one of his fervants to deliver the dying person out

of their clutches.

After their decease they wash the corps, afterwards shave his beard, stop his mouth with betel and lime, wrap him in a shrowd, and last of all close his eyes. Of the burning of their dead, we have fpoken before, in the description of the funeral ceremony of the prince of Ceylon, and Rogerius * has given a more ample * 1, 1, c. account of the whole matter. Some of 10. these pagans bury their dead near their habitations, and without the cities, (like the Athenians and Romans,) and cover them with stones, for fear the jackalls and other wild beafts, should dig them

up and devour them.

They fast and shave their heads for their deceased friends; and if they be of royal extraction, all the fubjects are obli-

9 Z

A

A

Ag Ag Ag

Baldaus ged to have their heads shaved. In Malabar, the next relations do not flir out of doors for fifteen days, fleep only on mats upon the ground, and do not affift at the ufual facrifices. When I mention foffing, I mean, that they only cat a little rice at noon. After feven days, they fend for the barber; who having cleanfed the house with milk and cow-pis, and the persons belonging to it, they gather up the ashes of the deceased person, after the expiration of the fifteen days; and having put the fame into an urn, they throw it with great lamentations into the river, the sea or any other water. This done, they purify the place where the corps was burnt, and plant there a fig-tree. Afterwards changing their clothes, and being cleanfed by repeated washings, they put an end to the mourning, except the next heir, who continues in mourning a whole year, during which he abstains from flesh, fish, eggs, wine, nay, even from their beloved Betel. No person must touch his head, neither must be cohabit with his wife: betides which, he is obliged to perform daily the following ceremony: he takes a small quantity of boiled rice, made up in form of a little ball; this he lays upon a fig-leaf fpread upon the ground without the house-door, and taking part of another fig-leaf, he bends it together, fancying all the while, that the deceased is there present to eat the rice-ball; then taking a little rice mixed with butter in both his hands, he turns his face about, as if he were looking to put it into the mouth of the deceafed person. This done, the standers-by clap their hands together, a fignal to

the crows (of which there are vost num-Baldaus, bers in Malabar) to come to take the ball of rice prepared for the deceased person; which it the crows do, the heir is at liberty to go to his dinner; but is they do not, it is looked upon as an ill onnen, and the whole ceremony considered as fruitless.

At the conclution of the mourning, the relations of the deceased are invited to a splendid seast, where however they must not eat either sless, fish, or eggs; and none but the richer fort are invited to partake of it. This they repeat once a year, on the fame day the deceafed di-ed, to the memory of their friend. I will not enlarge myfelf in this place upon that most barbarous custom of some of these pagans, for the wives to burn themselves alive with the dead carcases of their husbands, a thing still practised in the most populous city of Pandi; for when the funeral ceremony of Vinepi Naigne, the prince of the country, was folemnized with great pomp, three hundred of his wives did precipitate themfelves alive (under the found of drums and trumpets,) into the fame hole fil-led with burning oil, butter, and other combustible matter, which burned both his and their bodies to ashes. We conclude with a hearty wish, that these poor wretches, quite entangled in the darkness of paganism, may through his mercy, and with the assistance of such magistrates as ought to keep a watch-ful eye over their actions, be in time brought to the true knowledge of the gospel.
